His mind was somewhat affected, unable to give sensible answers to questions. Constant urgent call to stool, but only small, hard, black balls were passed. Liver dullness only heard from upper border of sixth to upper border of seventh rib.

Lead poisoning was suspected, but as no evidence of it could be found, Plb. 6c three times a day was prescribed. In six days the colic attacks were less frequent and less severe, two stools passed without enema, his mind clearer.

Improvement continued in all respects, and in fourteen days N. was able to leave his bed to which he had been confined since November. By the middle of March he made an hour's journey to see Frohling and was hardly recognizable, he had gained so much flesh and his liver was of normal size.

Wingfield reported two characteristic cases. The first concerned Mrs. D., 50, no children, sparely built, very nervous, constipated fifteen years, took a teaspoonful of Cascara extract every other night. Tongue coated with yellowish white fur. Had constant headaches and after each motion was thoroughly exhausted and had to lie down the rest of the day.

Plb. 6x was given, three grains twice a day. In two days, bowels began acting naturally. In three weeks the headaches were gone, tongue clean, much less nervous.

Wingfield's second case was Miss M., 25, florid, had boils appear on face and arms and chronic constipation. The constipation had been a trouble since she was twelve years old. Slight spinal curvature. Tongue furred, occasional headaches. Suffered much during menstrual periods. Plb. 6x twice daily at once relieved the constipation and soon the boils disappeared. Patient soon felt quite well.

Arriaga, of Mexico City, reported the case of a woman, 73, seized with symptoms of intestinal occlusion, violent colic, nausea, constipation, meteorism, complete anorexia and no fever. Nux-v. relieved the colic, and then Plb. 12c and later 13c, gradually brought about recovery in four days.

Nash cured a severe case of post-diphtheria paralysis in a middle-aged man. The leading symptom was excessive hyperesthesia, he could not bear to be touched anywhere due to the pain. A single dose of Plb. 40,000c cured.

Nash told of a man, 70, attacked with severe pain in his abdomen and finally a large, hard swelling developed in the ileo-cecal region, very sensitive to contact or least motion. It began to assume a bluish tint and, on account of his age and weakness, the man's life was despaired. But his daughter, the wife of a medical man, found the symptoms in Raue under Plb. in the chapter on Typh., and Plb. 200c cured.

Theuerkauf cured a case of hypopion with great pain in six weeks using Plb. 6c.

Skinner cured a case of epilepsy in which the head turned to the right after a fit.

W. H. Woodyatt reported a case of "vasomotor neurosis" affecting the left eye. Mrs. D., 29, had been ill for two weeks and supposed she had caught cold in the eye. She had a drooping upper lid, intense photophobia, very profuse lachrymation of hot tears, peri-corneal injection, deep bluish redness of sclerotica, most marked at corneal margin. Cornea was very faintly hazy. Pupil contracted. Sight misty.

Ars. 6x and Plant. 6x failed to relieve. Plb. 6x was then given with immediate

Plumbum metallicum improvement, which went on to cure in seven days.

Plb. cured a case of right-sided sciatica that had been greatly benefited by Gnaph. 1c, but which had returned. The symptoms included stiffness, soreness from great trochanter and point of exit of nerve to knee, weakness in thigh, worse by stooping, walking causes sensation as if pushing a knife in thigh.

Plb. 6c was given four times day. Up to the twelfth day there was no change, on that day, the pain suddenly disappeared. The case had lasted nine months.

RELATIONS - Antidotes: Plat., Alum., Petr. **Compare:** (1) Plb-acet. (2) Plb-i. Alum., Plat., Op., Podo., Merc., Thal. (3) Plect. - paralysis, spastic, spinal form, (4) Plb-chr. (5) Plb-p. - loss of sexual power, locomotor ataxia.

***PLUTONIUM NITRICUM

(Plutonium)

PHARMACY - plut-n. Plutonium nitricum. Plutonium. **Historical dose:** All potencies.

CLINICAL - AIDS. Bone, cancer. Bone marrow, affections. Brain, tumors. Cancer. Diarrhea. **Fatigue.** Fibrosis. Hodgkin's diseases. Leukemia. Lung, cancer. Lung, complaints. Radiation, poisoning. Thyroid, enlarged. Virus infections. Vomiting.

HOMEOPATHIC - Very serious pathologies. Cancers, leukemia. **Periodical fatigue.** Paralyzing fatigue. Chilliness and shivering, yet great feeling of heat in head and face.

Desire to lie down from feeling of extreme heaviness. Body seems to be heavy like lead. Head very heavy, like an enormous weight, difficult to keep head up. Feels the pull of gravity. Desire to lie down on one's back and on the floor.

Sensation of dryness in throat, as if swallowing of food would be impossible. Paralyzing pain in sacral region. Pain as if broken or twisted. Great restlessness at night. Weakness of lower limbs. Cannot walk upright, must crawl on all fours.

MIND - Serious, no smile on the face, as if carrying burden of world on their shoulders. Extremely conscientious. Delusion of having too many responsibilities. Fastidious, impulse to put things in order. Deep religious feelings or philosophical thoughts. Feels alone and empty.

Aggressive, reckless impulses. Irritability and aggression. Resentment, controlled anger. Reproachful, reproaches his wife. Outbursts of violence. Aggressive fantasies. Dominant behavior.

Anxiety about health. Fear of falling ill, of catastrophes. Fear of narrow places, claustrophobia. Fear of one's own impulses, of being too aggressive. Panic-stricken. Persistent feeling of existential threat. Delusion of being threatened. Delusion of decaying and disintegrating.

Depressed, dark gloomy mood. Weeping on account of physical pain. Sadness better company. Restlessness, cannot find a place or position to relax. Delusion of changing one's identity. Clairvoyant. Severe mental illnesses.

Abdomen - Cutting pain, better bending double.

Back - Paralyzing pain in sacral region. Back pain extending to posterior part of thigh and popliteal region.

Breasts - Sensation of heaviness and fullness in breasts. Sensation of tension in breasts, desire to wear a bra.

Eyes - Burning sensation.

Food - **Desires bacon, raw meat,** lamb, pork, ham, fat.

Head - Shattering headache, in forehead. Pain as if vertex comes up, as if it would explode. Pressing pain in forehead. Sensation of enormous heaviness. Sensation of great heat in head and face.

Limbs - Sensation of leaden heaviness. Sensation as if left leg were shorter. Pain in soles of feet on account of vesicles on toes.

Modalities - Better warmth, sitting in the sun, **hot applications, hot bathing.** Better massage, strong pressure, after long sleep. Worse from walking. Worse 3 p.m., sunset, evening, night. Worse overcast weather, first ray of sun.

Rectum - Anal warts. Sensation of insecurity in rectum when passing flatus.

Sleep - Short sleep improves. Sleeplessness and restlessness from pain in sacral region, tossing about to relieve pain; sleeplessness from feeling of heat. Dream of falling. Dream of killing or murders, of dead people, of bodies.

RELATIONS - Compare: Androc., Aur., Care., Hydrog., Med., Rad-br., Stram., Syph., Tarent., Uran-n., X-ray.

REFERENCES - Sherr.

***PNEUMOCOCCINUM

(Pneumococcus Nosode)

PHARMACY - pneu. Pneumococcinum venenosum. Pneumococcus nosode. Bacteria of the Diplococcus genus, Micrococcales. Non-pathologic bacteria of the mucus membranes. Nosodes. **Historical dose:** All potencies.

CLINICAL - Hemisphera. Hypochondria. Memory, loss. Neuralgia of the skull. Pneumonia.

HOMEOPATHIC - Pneumococcus is a gram positive bacteria of the Diplococcus genus and of the Micrococcaceae family. Pneumococcus is a saprophyte host of the mucus membranes. It is found in the saliva, nasal and pharyngeal mucus, or the conjunctiva of 50% of healthy subjects. Sevaus conducted a clinical symptomatological study, but there is no homeopathic proving.

Respiratory complaints localized in the bronchial region. Cardiac palpitations. Dysmenorrhea with late menses and premenstrual syndrome. Intoxication.

Depressive condition associated with pains situated all over the cervical and dorsal regions. Acute pains, which come suddenly of the stinging (Nit-ac.) or cramping type (Cupr.), lasting only a short while. Constricting pains, as if in a vice (Cact.).

MIND - Loss of memory. Depressive condition with anguish, anxiety. Desire to stay at home, horror of going out (Sep.). Lack of taste for life. Impression that the patient is going to collapse, that he cannot walk. Very afraid of being ill, of dying.

Abdomen - Bad digestion. Hepatic deficiency. Air in the stomach and colon. Distention and pain in the left hypochondrium, eased by expulsion of wind. Gas with alternation of constipation and fetid stools.

Back - Dorsal and lumbar arthrosis. Dorsal pains, preventing standing.

Constitutions - Bilious and nervous, depressive, anxious. Allergic, psoric constitutions. sycotic, cancerous, and tubercular constitutions.

Ears - Otitis media.

Eyes - Fatigue from neon light. Frontal pains above the eyes.

Female - Premenstrual aggravation. Menstrual cycle short, every 22 or 24 days. Menses stopping on the 2nd day. Menses late, scanty, legs heavy and swollen before menses. Menstrual migraines and vertigo. Bearing down pain and crosses legs (Sep.). Burning sensation during intercourse in cases of fatigue. Frigidity. Lack of orgasm.

Food - Ameliorated by eating (Anae.).

Head - Pains in left frontal sinus. Headaches lasting for 3 to 4 consecutive days. Headache on coughing or bending the head. Frequent headaches, localized at the nape of the neck, worse by noise. Right or left hemisphera, worse by walking, which causes throbbing in the head. Feeling of liquid in the head on stooping.

Heart - Aching in the precordial region with pains. Cardiac neurosis. Basedow's heart. Rhythmic anomalies. Emotive palpitations. Frequent palpitations at any time of the day. Palpitations forcing him to stop when walking rapidly or climbing stairs. Frequent redness of the face when going into a hot room.

Kidneys - Weakness of the bladder. Passes urine when coughing (Caust.).

Limbs - Pains in the arms. Pains in the legs. Legs restless, especially before menses (Zinc., Lach.). Legs heavy in the morning on waking. Trembling in the legs. Cramps in the feet. Poly-arthrosis.

Lungs - Sinusitis. Tracheitis. Chronic bronchitis. Emphysema. Incessant cough with no expectoration, especially at night with

nausea. Feeling of having a feather in the throat (Kali-bi.). Dry cough in the cold or heat. Coughs in the heat, particularly when entering a hot room and clears the throat (Rhus-t.). Sickening cough in the morning after breakfast. Does not cough any more after 9 a.m. Coughs a great deal as a result of frequent bronchitis during childhood. Has to stoop to cough.

Modalities - Better from the open air, in the country. Better from movement, a hot foot-bath, a short nap after meals (Nux- v.). Worse on entering a warm room, from damp before menses. Worse from inactivity (Rhus-t.), sitting for a long time, especially when remaining motionless, rest at night. Pains aggravated by rest, at night, better by movement (Rhus-t.).

Mouth - Aphthae in the mouth.

Neck - Neck pains with frontal aching.

Cervical pains with back aching. Chronic degenerative rheumatism of the cervical column.

Rectum - Gas with the alternation of constipation and very fetid stools. Constipation with empty urging (Nux- v.). Constipation when traveling (Ign.).

Skin - Itching with eruptions spread over the neck and forehead. Small eruptions on the face. Hands clammy.

Sleep - Sleepiness around 3 p.m.

Stomach - Acrid dyspepsia. Frequent nausea after eating. Gastric pains, especially when hungry. Stomach cramps with burning sensations.

RELATIONS - Compare: (1) Med. - amnesia for recent facts. Hasty with restless legs and burning in the heels. Burning pains in the joints and vertebral column. Improvement at the seaside and in the knee-chest position. (2) Thuja, - hydrogenoid condition, melancholy, worse from changing weather or after a trauma. Flatulence, diarrhea, periodic skin complaints.

REFERENCES-Julian.

*****PODOPHYLLUM PELTATUM**

(May-apple)

PHARMACY -podo. Podophyllum peltatum. May-apple. American mandrake. N. O. Berberidaceae by some placed in Ranuncu- laceae. Closely related to both. Tincture of root gathered after fruit has ripened of whole fresh plant of ripe fruit. Solution of resinous extract, podophyllin. **Historical dose:** Tincture and all potencies.

CLINICAL - Acidity. Amenorrhea. Anus, prolapsed. Asthma, bronchial. Bedwetting. **Bilious, attack.** Bronchitis. Cataract. Cholera. Cornea, ulcer. **Dentition.** Deafness. Depression. Diabetes. **Diarrhea.** Duodenum, catarrh. Dysentery. Dysmenorrhea. Dyspepsia. Fevers. Flatus. Gagging. Gallstones. Gastric, disorders. Goiter. Headaches. Heart, pain. Hemorrhoids. Jaundice. Liver, disorders. Ovary, disorders. Ovarian, tumor. Palpitations. Pneumonia. Proctitis. **Prolapsed, uterus. Prolapsed, rectum.** Prostatitis. Pustules. Sciatica. Stomatitis. Strabismus. Taste, disorders. Tenesmus. Tongue, burning. Urticaria. Uterus, prolapsed. Vomiting. Whooping cough. **Worms. Yellow, diarrhea.**

HERBAL - Podophyllum grows throughout the United States in damp, shady places, usually in woods. It has five to nine-lobed leaves, large white nodding flowers, and yellowish, egg-shaped fruits. The fruits are not unlike a small lemon, hence the plant is sometimes called "wild lemon." It flowers in May and June, and the fruit ripens in October.

Indian tribes used the root to expel worms, and dropped the juice of the root into the ear to cure deafness. "All the tribes are fond of the fruit," said Raffinesque, quoted by Hale, who gave an account of the medicine.

The herbal practitioners adopted the remedy and used it as the "vegetable mercury." The first homeopathic proving was made by Williamson.

HOMEOPATHIC - Podo, is a remedy for bilious constitution. It affects chiefly the **duodenum**, small intestines, liver, rectum, ovary, scapula and throat. It generally affects the right side.

Torpidity of the liver. Jaundice. Hypogastric pain. Gastro-enteritis with colicky pain and bilious vomiting. Painless cholera morbus. **Profuse diarrhea.** Stool is watery with jelly-like mucus, painless, gushing and offensive. Diarrhea, while being bathed or washed, of dirty water soaking through napkin, with gagging. Portal engorgement with a tendency to hemorrhoid. Fullness of superficial veins. Relaxed sphincters. Prolapsed uterus. Pendulous abdomen after confinement. Troubles during pregnancy.

Alternating conditions, diarrhea alternating with constipation, headache alternating with diarrhea. Sudden shocks from jerking pains. Constantly shaking and rubbing region of liver with hands.

Much drowsiness and desire to stretch. Great loquacity during chill and heat. Thirst for large quantities of cold water. Viscid mucus in mouth, coating teeth. Intense **desire to press the gums together.**

MIND - Fidgety and restless, cannot sit still. Whining. Child wants to be carried. Depression of spirits. Disgust for life, during headaches. Imagines he is going to die or be very ill. Delirium from eating acid fruits.

Fatigue of mind from business. Aphasia. Want of power of expression even of simplest ideas. Absurd words being chosen in place of right ones. Stupid during paroxysm of fever patient.

Loquacity during chill and fever, afterwards forgets what has passed. Inclined to talk, but would drop a sentence before half finished. Great desire to talk during chill, but can't because he forgets words.

Abdomen - Distended abdomen, heat and emptiness. **Sensation of weakness or sinking.** Can lie comfortably only on stomach. Fullness in right hypochondrium, with flatulence, pain and soreness. Rumbling and shifting of flatus in ascending colon. Rubs for relief. Weight in hypogastric region. Pain in right inguinal region, shoots down inner thigh to knees. Colic, in abdomen, with cramp-like knots, better flexing limbs. Colic continues after stool. Abdominal viscera are sore, worse during vomiting, diarrhea, before and during menses. Abdominal pains and stool excited by eating and drinking. Sick, empty feeling after stools.

Back - Nape of neck stiff, muscles sore. Pain under right scapula. Pain between shoulders. Pain in small of back. Pain in lumbar and sacral regions, worse during stool, and still worse after stool. Pain in loins, worse walking on uneven ground or from misstep.

Chest - Oppression in chest. Pains in chest worse by deep inspiration. Catarrh of chest during dentition.

Constitutions - Suited to persons of bilious temperament, especially after mercury poisoning.

Ears - Aching pain in right ear, with rough feeling extending along right Eustachian tube.

Eyes - Jaundiced. Eyes sunken. Eyes glazed and motionless. Cataract. Smarting, inflammation of lids. Lids half closed. Pain in eyeballs and temples.

Face - Hot. Cheeks flushed during diarrhea. Jaundiced.

Female - Suppressed menses with pelvic tenesmus. Menorrhagia from straining. Sensation as if the genitals would come out during stool. Pain in the region of the ovaries (right), down the crural nerve worse stretching the legs. Ovarian tumor with pain extending to shoulder. **Pain in uterus and right ovary with shifting noises along ascending colon.** Can lie comfortably only on the abdomen during early months of pregnancy. Swelling of labia during pregnancy. Hemorrhoids with prolapsed anus during pregnancy. **Prolapsed uterus** on straining or overlifting after childbirth.

Food - Thirst for large quantities of cold water (Phos., Bry.). Appetite variable, at times voracious. Indifference to food. Loss of appetite. Smell of food causes loathing. Satiety from small quantity of food, followed by nausea and vomiting. Craves acids, which disagree. Worse after eating and drinking, especially acid fruit and milk. Diarrhea after sour milk, canned fruits, acid fruit and milk.

Head - Headache, dull pressure, worse

Podophyllum peltatum morning, with heated face and bitter taste. **Headache alternating with diarrhea**, or better by diarrhea. Darting pain in forehead, must close the eyes. Rolling of head from side to side with moaning, during dentition, from business worry. Child perspires on head during sleep.

Heart - Palpitations with a clucking sensation, rising up to the throat, from emotions.

Kidneys - Frequent urination, at night, during pregnancy. Urinates immediately after drinking. Bedwetting. Diabetes mellitus and insipidus.

Limbs - Paralytic weakness on left side. Pain between shoulders, under right scapula, in loins and lumbar region. Pain along ulnar nerve of both arms. Pain in right inguinal region, shoots down inner thigh to knees. Cramps in calves with stools.

Liver - Sore and painful liver, better rubbing. Stitches in liver region, worse while eating. Liver and whole abdominal viscera are sore. Jaundice with gallstones.

Lungs - Inclination to breathe deep, sighing. Sensation of suffocation. Pneumonia. Chronic bronchitis. Bronchial asthma, worse after Catching cold. Loose, dry, hacking cough, with remittent fever. Whooping cough with constipation and loss of appetite.

Male - Diseases of prostate gland associated with rectal troubles.

Modalities - External heat ameliorates pain in bowels. **Better by pressure, rubbing or stroking liver.** Better lying down, lying on abdomen, stretching in bed. Hot weather, summer, aggravates diarrhea. **Worse in early morning**, 2 a.m. to 4 a.m., night. Worse open air, washing. Worse eating, swallowing, drinking, acid fruits, milk. Worse before, during and after stool, **dentition**, mercury. Worse from motion, walking, ascending stairs, exertion.

Mouth - Offensive odor. Bitter, foul, putrid taste. Everything tastes sour or putrid. Loss of taste, could not tell sweet from sour. **Tongue, broad, large, moist.** Tongue coated as of mustard spread on it. **Burning**, rough or flabby indented tongue. Grinding the teeth at night. **Difficult dentition with intense desire to press the gums together** (Phyt.).

Rectum - Fetid flatus. Long standing diarrhea. Diarrhea alternating with other symptoms. **Diarrhea early in morning, during teething, with hot, glowing cheeks.** Diarrhea while being bathed or washed, in hot weather, after acid fruits. Morning, painless diarrhea when not due to venous stasis or intestinal ulceration. **Gurgling through the bowels, then yellow profuse putrid stools gush out painlessly.** Cholera infantum and morbus. Constipation alternating with diarrhea (Ant-c.). Constipation, clay-colored, hard, dry, difficult. **Prolapse of rectum** before or with stool. Internal and external hemorrhoids. Sensation of weakness in rectum. Severe burning, deep in rectum, after stool. Anus feels very sore, sensitive and swollen.

Perspiration - Profuse, offensive sweat with sleep. Warm sweat on head and legs. Sweats on head with coldness of skin.

Sensations - As if strabismus would occur. Pain in head as from ice on occipital protuberance. As if tongue, throat and palate had been burned. Ball in upper esophagus. As if heart ascending to throat. As if a thousand live things moving about in abdomen or of fish turning over. As if everything would drop through pelvis.

Skin - Moist, warm, jaundiced. Cold, clammy skin. Sallow skin jaundice, also in children. Rawness and itching of genitals. Erysipelas. Intolerable itching of body and arms. Urticaria. Pustules, slow in healing. Scabs on arms and legs.

Sleep - Sleepy after paroxysms of malaria. Heavy sleep, fatigue on waking. Moaning and whining during sleep. Rising up in sleep without waking. Sleep disturbed, full of confused dreams.

Stomach - Stomach so weak that rice wouldn't digest. Heartburn, gagging or empty retching. Hot, sour belching, nausea and vomiting. Belchings smelling like rotten eggs. Constant gagging. Vomiting of a hot, frothy mucus. Vomiting of milk in infants.

Stool - **Stools yellow with undigested food.** Stools green, watery, at times mixed with

Podophyllum peltatum mucus, gushing. **Yellow, fetid profuse diarrhea.** Stools, white like water. Pale, hard, chalky stools. Stools foaming with meal-like sediment. Stools run right through the diaper, followed by weakness. Muco-gelatinous stools after miscarriage. Stools involuntary during sleep, when passing flatus.

Temperature - Chills at 7 a.m. with pain in hypochondria and knees, ankles, wrists. **Great loquacity during fever.**

Throat - Gagging in infantile diarrhea. As of a lump in esophagus. Sore throat, pain extends to ears. Dryness, swallowing painful. Sore throat right extends to left. Rattling of mucus in throat. Goiter.

Vertigo - Vertigo, tendency to fall forward. Vertigo with sensation of fullness above eyes. Vertigo while standing in open air. Vertigo from gastric or bilious disorders.

COMMENTS - An unintentional Podo, proving recorded by E. V. Rose brought out the chief characteristics and showed that its reputation as a "vegetable mercury" is well deserved.

At 11 a.m., Mr. J., 26 took grains x of Podo, lx to "stir up his liver." At 6 p.m. he was taken with an indescribable sick feeling all over and a persistent, dry, rough feeling in pharynx and esophagus, extending along right Eustachian tube with dull, aching pain in right ear, feeling as though a ball or lump in upper esophagus.

At 8 p.m., he had a dull and stupefying headache, chiefly frontal, worse lying down. Fullness in stomach, belching of gas, sour belchings, marked salivation and an offensive odor from the mouth. Sleep was disturbed, full of confused dreams, rolled and tossed about, bed felt too hard and a feeling as though head and shoulders were lying too low.

At 3 a.m., urge to stool, which was profuse, watery, and dark green. Frequent urging. Before stool there was a peculiar weak, dull, griping pain below umbilicus, fullness in rectum. During stool there was a weak feeling in the stomach. After stool, tenesmus and faint feeling.

These symptoms passed off in two or three days, the diarrhea was followed by

Podophyllum peltatum constipation, which was quickly removed by Nux-v.

External irritant. Produces a rawness like intertrigo when applied on the skin. The dust of the powdered root sets up intense inflammation, ulceration and leucoma if it gets into the eyes. Useful in potency for eye disorders.

Irritation of the brain, generally reflected to the abdominal viscera (cholera infantum), or the teeth (dentition). Moaning and whining during sleep, the head is thrown back and rolls from side to side, the child grates its teeth. Great desire to press gums or teeth together. Salivation, foul breath and moist, tooth-indented tongue (Merc.). Burning sensation on the tongue. Thirst.

Bilious, remittent, and intermittent fevers. Loquacity during chill and heat. Prone to sweat. Delirium, apt to be loquacious. Much drowsiness and desire to stretch. Congested, sensitive liver with excess or absence of bile. Generally for diarrhea with any other symptoms, painful or painless. Children's diarrhea (Ars., Nit-ac.). Yellow, profuse, offensive and excoriated diarrhea in infants with a raw and burning anus. Profuse stools, yellow or white. Early morning diarrhea. Dysentery, colitis. Cholera. Hepatitis concomitant with severe diarrhea. Severe cases of jaundice, gallstone attacks, and worms.

The stools may be painless or may be preceded, accompanied, and followed by colic, tenesmus and other symptoms. Pains in sacrum in lumbar region with rectal and uterine symptoms, cramps in calves with stools. Fullness and tenderness of the rectum. Proctitis, inflammation of the rectum and anus. Tendency to prolapse in the rectum and genital organs. "Symptoms of prolapse uterus with pain in sacrum with muco- gelatinous stools," and "sensation at stool as if the genital organs would fall out."

Pains in the ovaries, especially the right, extending down the anterior and inner side of thighs. Vomiting during pregnancy. Swelling of labia during pregnancy. "Can lie comfortably only on stomach" during the early months of pregnancy. Severe after-

Podophyllum peltatum pains with strong bearing-down sensation, hemorrhoids and prolapsed rectum after confinement.

Alternating conditions. Diarrhea alternating with constipation, headache alternating with diarrhea, headache in winter, diarrhea in summer, inflammation of scrotum or of the eyes, not of both. Antidotal to mercury. Worse hot weather.

Nash cured an obstinate case of intermittent fever with violent chills, followed by intense fever with great loquacity. When the fever was past, the patient fell asleep and, on waking, remembered nothing of his loquacious delirium.

W. A. Burr related a case of a young man who had for some weeks a burning sensation along the left edge of his tongue, occasionally shooting to tip or through to opposite edge. He had been in poor health, "bilious," for years. With catarrh of stomach, duodenum and bile ducts, extreme discomfort followed even the blandest foods. Podo. 3x improved in two days and the tongue was well in a week.

Clarke often cured prolapsed anus in children with Podo. 6c. With Podo, lx, Mr. Knox Shaw relieved "continual

urging and straining" in a case of rectal cancer too far gone for operation.

L. M. Barnes noted the case of a stout woman, 60, who complained of burning, aching, cutting pain in rectum. She was obliged to be on her feet all day. Nervous, cross, irritable. Podo, cured.

Barnes also reported the case of a woman who, for four months after a miscarriage, had ovarian pain, worse at night. She was sleepless, nervous, restless. Bearing down in abdomen and back. She was a large, stout woman with a pendulous abdomen. Podo, cured after Puls, and Cimic. had only partially relieved.

Guernsey mentioned that it is often called for in complaints of pregnant and parturient women with the sensation as if intestines were falling down. He mentioned also whooping cough with costiveness and loss of appetite.

RELATIONS - Compare: (1) Mand. – Great desire for sleep, exaggeration of sounds and enlarged vision. Bowels inactive, stools large, white and hard. (2) Aloe, Chel., Merc., Nux-v., Sulph. (3) Prune. - colitis.

***POLYGONATUM MULTIFLORUM

(Solomon's Seal)

PHARMACY - polyg-m. Polygonatum multiflorum. Solomon's Seal. Lady's Seals. St. Mary's Seal. Sigillum Sanctae Mariae. N.O. Liliaceae. Tincture of the root **Historical dose:** Tincture and all potencies.

CLINICAL - Abscess. Alopecia. Back, pain. Bone, disorders. **Bone, injuries.** Bone, spurs. Bruises. Bunions. Calcifications. Carbuncles. Constipation. Dysentery. Erysipelas. Hair, loss. Hemorrhoids. Hyperlipidemia. Injuries. Joint, pains. **Joint, weakness.** Leucorrhea. Malaria. Metrorrhagia. Muscle, weakness. Pyorrhea. Sores. Sprains. **Tendon, disorders.** Tinnitus. Tumors. Vertigo. Wounds.

HERBAL - Polyg-m., in material doses of tincture or low potencies, has been found useful in treating all kinds of musculoskeletal disorders.

Astringent, demulcent and tonic. Combined with other remedies, Solomon's Seal is given in pulmonary consumption and bleeding of the lungs. It is useful also in female complaints.

It is used mainly in the form of a poultice and is believed to prevent excessive bruising and to stimulate tissue repair.

The infusion of 1 oz. to a pint of boiling water is taken in wineglassful doses and is also used as an injection. It is a mucilaginous tonic, very healing and restorative, and is good in inflammations of the stomach and bowels, piles, and chronic dysentery.

A distilled water made from the whole plant has been used as a skin tonic and is an ingredient of expensive cosmetics.

Young shoots can be cooked, boiled and used as an asparagus substitute, they make an excellent vegetable and are widely used in Turkey. Root - cooked. Rich in starch. The root should be macerated for some time in water in order to remove bitter substances. Normally only used in times of famine, the root was powdered and then made into a bread by the North American Indians.

COMMENTS - According to the English- Chinese Rare Chinese Materia Medica, raw ho-shou-wu, that is, the dried root that has not been prepared with soybeans, is used to treat toxicosis (infections yielding abscess, swellings beneath the skin, sores, carbuncles, and eruptive diseases like rubella), inflammation, constipation, and hyperlipidemia.

The soybean-prepared ho-shou-wu is used as a tonic for yin and blood, nourishing the hair, strengthening the bones and muscles, and used to treat pale complexion, dizziness, tinnitus, premature graying of hair, weakness of loins and knees, numbness of extremities, metrorrhagia, profuse leucorrhea, weakness due to lingering diseases (e.g., malaria), and hyperlipemia.

According to evaluations done with raw and processed ho-shou-wu, the processed version does have different properties, and is the one with the most dramatic effects on preserving the immune system functions.

Processed ho-shou-wu is currently the only one that is regularly exported from China. During the past thousand years in China, processed ho-shou-wu has been used to nourish the liver and kidney, promote the growth of hair, treat alopecia, and premature graying of hair.

RELATIONS - Compare: Bell-p., Ruta, Calc., Symphytum.

***POLYGONUM AVICULARE

(Knot-grass)

PHARMACY-polyg-a. Polygonum aviculare. Knot-grass. Knotweed. Doorweed. Crawlgrass. N. O. Polygonaceae. Tincture of the whole plant **Historical dose:** Tincture and all potencies.

HERBAL - Polyg-a., in material doses of tincture or 1c potency, was found useful in lung tuberculosis and

intermittent fever and especially in arteriosclerosis. Erythema.

REFERENCES - Boericke.

***POLYGONUM PUNCTATUM

(Smartweed)

PHARMACY - polyg. Polygonum punctatum. Smartweed. Polygonum hydropiper. Polygonum acre. Persicaria urens. Water pepper. Pursh. N. O. Polygonaceae. Britain, North America. Tincture of whole fresh plant.

Historical dose: Tincture and all potencies.

CLINICAL - Amenorrhea. Antrum, pain. Blepharitis. Colic, flatulent. Cough. Diarrhea. Dysentery. Dysmenorrhea. Dysuria. Eczema. Epilepsy. Gonorrhea. Gravel. Heart, disorders. Hemorrhoids. Hysteria. Laryngitis. Nephritis. Neuralgia. Orchitis. Prostatitis. Sciatica. Spermatic cord, pain. Spleen disorders. Strangury. Ulcers.

HERBAL - The Polygonum are named by Gerarde "Arse-smarts." Burnett regarded it as a splenic and as useful in old cases of syphilis. As a splenic, he found it was often required in cases of gout and in gouty eczema with much irritation; he used it with much benefit in the 6c, 12c and 30c.

Hale stated, "Smart Weed is a popular domestic remedy throughout U.S.A. Applied externally it has the effect of a mustard plaster and the leaves saturated with hot water are applied to relieve cramps and colic. Also as an emollient in inflammation and sprains."

HOMEOPATHIC - Polyg. was proved by W. E. Payne and others. The provers were all men, but clinical experience has shown a definite action in the female generative sphere, as amenorrhea, aversion to sex and congestion of the ovaries have been cured by it.

Acts upon the genito-urinary organs and the intestines, **causing cutting pains**, along the ureters, along ovarian ducts, up spine with bearingdown. Pulsating, flashing, wandering pains in prostate. Coldness alternating or coincides with heat in the same or other part, burning in chest with cold feeling in pit of stomach. Smarting discharges.

Leading symptoms include aching pains in hips and loins with weight and tension in pelvis and tearing in groin, worse right. Metrorrhagia, also amenorrhea in young

Polygonum punctatum girls. **Varicose veins**, hemorrhoids and rectal pockets. Burning in stomach followed by feeling of coldness in the pit of the stomach.

Abdomen - Cold feeling in stomach with burning in chest. Cutting pains with great rumbling, as if whole intestinal contents were in a fluid state. Gripping pain with great rumbling, nausea and liquid feces. **Flatulent colic**. Nausea.

Breasts - Shooting pains through the breasts.

Ears - Acute pain, on bending head down, better bending backwards.

Eyes - Puffiness under right eye. Lids twitch when closed and when lying down.

Face - Coldness in right face, when pain is most severe in left.

Female - Metrorrhagia, amenorrhea in young girls. Cutting pain along the fallopian tubes with bearing down. Aching pains in hips and loins. **Sensation as if hips were being drawn together**. Sensation of weight and tension within pelvis.

Head - Acute pulsative pains in temples.

Kidneys - Nephritic colic with grinding, gripping, cutting **bellyache**. Suppurative nephritis. Cystitis. Painful constriction at neck of bladder. Cutting pain along ureters. Urine scanty, dribbling, dark or calcareous, adherent sediment.

Limbs - Aching in lower limbs. Feet alternately hot and cold. Sore pains in heels.

Male - Scrotum excoriated. Pulsating, burning pain in prostate on urinating. Pain in testes, spermatic cord on urinating.

Modalities - Better from warmth. Worse pressure of clothes. Worse by cold, damp, change of temperature. Lying down causes pressure in occiput, dizziness and wavering of sight. Rising causes sudden pain in occiput.

Mouth - Itching, burning palate, wants to scratch it. Tongue feels swollen.

Rectum - **Hemorrhoids with itching**. Interior of anus studded with itching eminence. Liquid feces.

Sensations - As of sudden rising of scalp. As if whole intestinal contents were fluid. As if hips drawn together. As of galvanic shock through lower limbs.

Skin-Superficial ulcers and sores on lower limbs, especially in females at menopause. Urticaria.

COMMENTS - Lancinating, cutting, pulsating, shooting, wandering and flashing pains. One prover described them as like aurora borealis, and a case of sciatica with pains of this description was cured with Polyg. The left temple was markedly affected, left side generally more so than right.

Epilepsy and hysteria. Marked diarrhea (Rheum, and Rumx.) and dysuria. Excessive weakness, trembling and

sensitiveness to cold.

Cold sensations, alternating or coinciding with heat in the same or other parts. Coldness of right side of face when pain in left side was most severe. Burning in chest with cold feeling at pit of stomach. Feet burning, then suddenly cold.

RELATIONS - Compare: (1) Card-m. - ulcers. (2) Ham., Senec. (3) Polyg-pe. - kidney colic, stones, gangrene. (4) Polyg-s. (5) Polyg-a.

***POLYGONUM SAGITTATUM

(Arrow-leaved)

PHARMACY - polyg-s. Polygonum Sagit- tatum. Arrow-leaved. N. O. Polygonaceae. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC-BogerusedPolyg-s. 2xfor pains of nephritic colic, suppurative nephritis. Sharp pains along spine, burning inner side of right foot and ankle, itching of hard palate.

REFERENCES - Boericke.

***POLYPORUS PINICOLA

(Pine Agaric)

PHARMACY - polyp-p. Polyporus pinicola. Pine agaric. N. O. Fungi. Tincture of fresh fungus. **Historical dose:** Tincture and all potencies.

CLINICAL - Anus, prolapse. Constipation. Hemorrhoids. **Intermittent, fever.** Liver, disorders. Malar bone, pain. Neuralgias. Prolapse, anus. Rheumatism. Spleen, disorders. Tonsils, enlarged.

Polyporus pinicola HOMEOPATHIC - The pine agaric, Polyp-p., like the larch agaric, Polyporus officinalis, or Bol., was proved by Dr. Burt. The symptoms of the two have a very close resemblance and many are common to both.

Hale said it is a remedy for ague in the middle and southern states, taken during the intermission macerated in whisky. Quotidian fevers are most suited to it. Intermittent, remittent and bilious fevers with headache, yellow tongue, constant nausea, faintness at epigastrium and constipation.

Despondency, aching distress in many parts. Stiffness of back of fingers, enlarged tonsils with dysphagia and constant inclination to swallow. Neuralgic pains in head, face and temples, pain in liver and spleen with diarrhea or constipation and hemorrhoids these are the chief features of the proving. **Modalities** - Better by rest. Worse in damp air. Worse after stool, motion, walking.

COMMENTS - Great lassitude. Congestion of head with vertigo, face hot and flushed, prickling sensation all over. Headache about 10 a.m. with pain in back, ankles and legs increasing until 3 p.m., then gradually better. Restless at night from pain in wrists and knee, rheumatic pains. Profuse perspiration.

RELATIONS - Compare: (1) Similar to its botanical relative, Polyporus officinalis or Bol. Deep dull, severe pain in shin bones, preventing sleep. (2) Bol-lu., Agar.

REFERENCES - Boericke. Clarke.

***POPULUS CANDICANS

(Balm of Gilead)

PHARMACY - pop-c. Populus candicans. Balm of Gilead. Populus balsamifera. N. O. Salicaceae. The name Balm of Gilead tree is given to the Black Italian Poplar. Tincture of the resinous buds. **Historical dose:** Tincture and all potencies.

CLINICAL - Aphonia. Asthma. Brain, congested. Bullae. **Colds.** Constipation. Dysmenorrhea. Dyspepsia. Dysphagia. Ecthyma. Heart disorders. Liver, disorders. Phosphaturia. Sinusitis. Sunstroke. Throat, sore. Vagina, burning.

HERBAL - The name Populus balsamifera applies especially to the variety Populus candicans, but also to all P. balsamiferae. In England, the name "Balm of Gilead tree" is given to the Black Italian Poplar, which abounds in Italy, but the origin of which is not known.

C. F. Nichols gave an account of Pop-c., the effects of which he observed. "The resinous gum exuding from buds and stalks, deliciously aromatic in perfume is widely used to heal wounds, open sores and eruptions and often suppresses these latter to the harm of the patient."

As an application, Nichols said, it is like Arn., dangerous, though most people are not susceptible to its poisonous effect. He never saw blisters of the size of those of Pop-c. produced by any other drug. Blisters hung down like bags of water the size of walnuts. Burning was a common symptom in the eyes, nose, throat, bowels, vagina.

HOMEOPATHIC - Pop-c. seems to have a remarkable power over **acute colds**, especially when accompanied by a deep, hoarse voice or even aphonia. Instantaneous voiceproducer (Coca).

General insensibility of surface, worse back and abdomen, rubbing and pounding borne without pain and is grateful on account of warmth produced. Fingertips thickened, horny insensible to pinching and prickling.

MIND - Loquacity. Discusses her symptoms with everyone. Hopeless foreboding, worse after sleep. Fear and anguish. Expectation of death. Feels as if the will were paralyzed. Vanishing of thought. Forgets to finish a sentence. Voices sound distant and words just spoken seem as if uttered long ago, objects seem multiplied.

Abdomen - Flatulent colic, doubling the body forward. Pain in right hypochondrium with enlargement. Wears her clothes loose.

Back - Numbness in back radiating from spine. Burning weariness in lower back.

Chest - Rawness, soreness of chest, throat.

Eyes - Sensation as if left eye were twisted during the headache. Burning irritation in eyes, nose, mouth, throat, and air passages.

Face - Face yellow. Burning, prickling on face.

Female - Menses scanty, usually delaying, afterwards absent, then abundant, early, with dysmenorrhea, better hot cloths. Vagina burns as if scalded.

Food - Appetite lost, loathes meat. Nothing relished. Hungry but dares not eat for fear of choking.

Head - Weight on vertex. Hot head with cold limbs. Cold-sores on lips (Nat-m.). Burning irritation of eyes, nose, mouth, throat and air passages.

Heart - Pain in heart, stitches. Palpitations when rising or lying on left side with vertigo. Heart's sound irregular, usually muffled, worse before menses.

Kidneys - Urine strong, high colored, hot, scanty, increased, variously colored, red, dark, light, phosphates abundant. Urine dark, straw color, smoky.

Limbs - Fingertips thickened, horny, insensible to pinching and pricking. Nails blue as in ague (not thickened).

Lungs - Suffocation. Breathing dry, asthmatic with dyspnea. Sits bent forward with dry cough, worse lifting arms. Dry cough when tired. Cough caused by "cobwebs" in his throat. Cough of children caused by nasopharyngeal catarrh, mucus drops from posterior sinuses.

Modalities - Better hot applications. Worse on moving, lifting arms, contact of clothes. Worse after sleep, before menses. Worse after food and drink.

Mouth - Speech thick. Taste bitter, sweet in morning.

Rectum - Stools small, round, preceded by cramps in abdomen, lack of expulsive power. Constipation, bowels feel hot and dry. Stools watery, green, alternating with constipation.

Sensations - Whole body feels swollen, bruised, lame, sore and painful, exhausted as in dry, sultry weather. Eye feels twisted with the headache.

Skin - Skin harsh, dry and cold with burning-stinging. Burning, prickling on face, chest, and hands. Blisters hanging down like bags of water.

Sleep - Sleepless after midnight with restlessness. Dreams frightful, vivid, fearful after fitful sleep.

Stomach - Belching of gas, feeling like hot steam. Nausea with a sinking in epigastrium. Vomits bile.

Temperature - Fever and unrest. Fever with congestion of brain, fullness, heaviness, dullness, soreness. Dry heat. Sweat on head and neck. Sudden coldness of limbs with numbness of them and heat of head.

Throat - Rawness and soreness of throat. Throat is red, dry. Throat and nostrils burn. Burning and paralysis in throat. Pharynx and larynx feel dry and the voice weak and toneless. **Acute hoarseness.**

Tongue - Tongue white, dry, feels thick and numb. Tongue and mouth feel burnt and dry, but are moist, worse after food and drink.

Vertigo - Vertigo from lifting head. Vertigo and heat of head as if scorched by sun.

COMMENTS - W. C. Stilson related a case of poisoning in a man who one evening drank rum in which Balm of Gilead buds had been placed for making a liniment. A few hours later his wife heard him breathing heavily and on waking him found he could not speak.

Stilson found him only able to speak in hoarse whispers and he would forget in the middle of a sentence what he was going to say. Face ashy pale, wild look. Tongue and mouth dry. Throat dry, burning, constricted, felt as if spiders had spun webs on it. It was some days before he recovered.

Since this occasion, Stilson cured several cases of catarrhal hoarseness and aphonia with Pop-c. and one case of nervous aphonia. Mrs. S. had nervous prostration and, during the attack, aphonia. The aphonia remained after the patient got well otherwise.

Among the peculiar symptoms observed by Nichols is surface anesthesia with or without numbness. The fingertips are thickened, horny, insensible to pinching and pricking. Skin is harsh, generally dry and cold with

a stinging burning behind the surface as if an eruption would appear or as if sweat would break out.

Numbness in back radiating from spine. Constipation, bowels feel hot and dry. The menses were at first scanty, later abundant and early, with dysmenorrhea pain, better by application of hot cloths.

RELATIONS-Antidotedby: Rhus-t. **Compare:** (1) Salx-a., Pop. (2) Salicylates. (3) worse contact of clothes, Lach.

REFERENCES - Boericke. Clarke.

***POPULUS TREMULOIDES

(American Aspen)

PHARMACY - pop. Populus tremuloides. American aspen. Aspen. Poplar. N. O. Salicaceae. The American Aspen; the British Aspen is Populus trémula. Tincture of inner bark. Solution of Poplin. **Historical dose:** Tincture and all potencies.

CLINICAL -**Acidity. Ague.** Ardor urine. Bladder, catarrh. **Flatulence.** Gleet, chronic. **Indigestion. Malaria.** Nausea. **Night-sweats.** Prostate, enlarged. Vomiting.

HOMEOPATHIC - Pop. is a good remedy in bladder troubles after operations and in pregnancy. Dyspepsia and catarrh of the bladder, especially in elderly people. Cystitis. Fullness of head. Sensation of heat of the surfaces of the body. **Nightsweats. Ague.**

Bladder - Severe tenesmus, painful scalding. Urine contains mucus and pus. Pain behind pubis, at end of urination.

Male - Prostate enlarged.

Stomach - **Indigestion with flatulence and acidity.** Nausea and vomiting.

COMMENTS - The symptoms were provided by Pane (an eclectic), whom Hale quoted. Pane used Populus tremuloides in disorders of the bladder, urethra and prostate. Hale confirmed its action in bladder tenesmus and inflammation of the neck of the bladder.

Hale gave the case of a woman who had metritis, vaginismus and cystitis and was apparently cured. A ride on the cars brought back weight, pressure and aching in pelvis and bladder tenesmus with frequent desire to urinate. Pop. 3x removed all these symptoms in three days.

Hale noted that in the cases he cured there was little pain during urination, but as soon as the last drops were voided or a little before, there was a severe cramp-like pain just behind pubes, lasting ten to fifteen minutes.

RELATIONS - **Compare:** (1) Pop-c., Salx-n., Gaul. (2) Salin, and Salicylates. (3) Nux-v., Chin., Com-f., Cann-i., Canth. **Follows well:** Cann-s., Canth. (succeeded after they had only partially helped).

REFERENCES - Boericke. Clarke.

***PREDNISONE

(Corticosteroid)

PHARMACY - predn. Prednisone. A synthetic corticosteroid drug. **Historical dose:** All potencies.

CLINICAL - Acne. Adrenal glands. Allergies. Arthritis. Asthma. Blood, disorders. Bone, fractures. Bruises. Cancers. Cataracts. Colitis. Connective tissue. Crohn's disease. Cushing's syndrome. Enteritis. Eye, diseases. Facial, swelling. Fluid retention. Glaucoma. Growth, stunted. Headache. High blood pressure. Hives. Lung, diseases. Lupus erythematosus. Meningitis. Menses, irregular. Multiple sclerosis. Muscle, weakness. Nephrotic syndrome. Osteoporosis. Poison ivy. Rheumatism. Skin, diseases. Stomach, ulcer. Thyroiditis. Trichinosis. Tuberculosis. Ulcerative colitis. Urticaria. Vertigo. Wounds.

HOMEOPATHIC - Prednisone is a synthetic corticosteroid drug. Abnormal adrenal gland development. Cushing's syndrome. Thyroid gland inflammation. Certain cancers. Blood disorders. High blood pressure. Congestive heart failure.

Increased appetite. Weight gain, "moonfaced" appearance. Stunted growth in children. Sweating. Distended abdomen. Inflamed esophagus or pancreas. Fluid retention due to nephrotic syndrome. Peptic ulcer. Irregular menses.

Muscle weakness. Brittle bones, bone fractures. Osteoporosis. Painful hips or shoulders. Convulsions. Vertigo. Nervousness. Insomnia. Hyperactivity. Depression, mania or other psychiatric symptoms. Unusual fatigue or weakness.

Diseases of the connective tissue, including systemic lupus erythematosus. Flare-ups of multiple sclerosis. Rheumatoid arthritis and related disorders. Severe flare-ups of ulcerative colitis or enteritis. Lung diseases, including tuberculosis. Prevention of organ rejection. Trichinosis.

Skin diseases. Severe allergic conditions. Hives. Acne, rash. Thin, fragile skin. Purplish stripe marks on the skin. Bruising. Poor healing of wounds. Infections. Eye diseases of various kinds, including eye infection, cataracts and glaucoma. Bulging eyes. Blurred vision. Increased pressure in the eyes or skull. Headache.

Meningitis.

MIND - Euphoria, severe depression. Insomnia. Mood changes, personality changes, psychotic behavior. May worsen any existing emotional instability.

RELATIONS - Compare: Cortico., Ars.

REFERENCES - Murphy.

***PREMARIN

(Conjugated Estrogens)

PHARMACY - prem. Premarin. Conjugated estrogens. **Historical dose:** All potencies.

CLINICAL - Allergies. Backache. Breast, disorders. Constipation. Cough. Cramps. Depression. Diarrhea. Dysmenorrhea. Edema. Eye, disorders. Fatigue. Fever. Flatus. Hair, growth. Hair, loss. Headache. Hemorrhages. Hot, flushes. Indigestion. Joint, pain. Leucorrhea. Migraine. Nausea. Nervousness. Rash. Skin, disorders. Sleep, disorders. Sore, throat. Tumors. Vaginitis. Vomiting. Weakness.

HOMEOPATHIC -Nervousness. Depression. Sleep disturbances. Fatigue. Weakness. Dizziness. Fever. Changes in blood pressure. Blood clots. Increased heartbeat. Twitching. Increased muscle tone. Muscle pain. Backache. Leg cramps. Joint pain.

Migraine headache. Hair loss from the scalp, increased body hair. Eye disorders. Intolerance to contact lenses. Runny nose. Sore throat. Cough. Infection. Allergic reactions. Skin darkening, especially on the face. Skin rash or redness.

Skin tingling. Swelling of wrists and ankles. Yellow eyes and skin.

Appetite changes. Weight gain or loss. Bloating, fluid retention. Indigestion. Abdominal cramps, gas. Nausea, vomiting. Diarrhea, constipation. Gallbladder disease. Inflammation of the pancreas.

Abnormal vaginal bleeding. Painful menstruation. Heavy bleeding during menstruation. Vaginal yeast infection. Enlargement of benign tumors in the uterus. Breast swelling and tenderness. Excessive flow of breast milk. Sex-drive changes.

RELATIONS - Compare: Sep., Foil., Estro., Lach., Puls.

REFERENCES - Mutphy.

***PRIMULA OBCONICA

(Primrose)

PHARMACY - prim-o. Primula obconica. Primrose. Tibetan Primrose. N. O. Primulaceae. Primulae. Tincture of whole fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Blisters. Chapped, hands. Eczema. Eyes, inflammation. Itching. Liver, pain. Skin, disorders. Spleen, pains. **Weakness.**

HERBAL - Prim-o. is an ornamented variety of primrose. Gardeners, amateur and professional, have discovered after much suffering that in some people it has a powerful action on the skin, taking place chiefly by contact but partly by effluvia.

HOMEOPATHIC - The poison of the Primrose is in its *glandular hairs*, which break easily and discharge an irritating fluid which is absorbed into the skin. But skin symptoms of poisoning appear in sensitive patients even without coming in direct contact with the plant, mere nearness begin sufficient, like poison ivy.

Prim-o. has deep infiltration and tension of tissues. **Paralyzed sensation. Weakness.** Pain in liver and spleen. Pharyngeal soreness alternates with diminished facial irritation. Blisters. Intermittent symptoms, worse right side.

Abdomen - Pain in region of liver, and a less severe pain in spleen, worse by bending from side to side.

Eyes - Burning irritation of eyeballs and eyelids, nostrils, and mouth. Lids greatly swollen, covered with large bullae. Lids half closed, stiff and immovable.

Face - Moist eczema. Papular eruption on chin. Burns at night. Urticaria-like eruption. Eyelids swollen.

Limbs - Eczema on arms, wrists, forearms, hands, papular and excoriated. Purple blotches on back of hands, palmar surface stiff. Blisters on fingers. Palms dry and hot. Cracking over joints and fingers. Rheumatic pain around shoulder.

Skin - Eruption between fingers. **Great itching**, worse at night, red and swollen like erysipelas. Tumefied.

Small papules on a raised base. Skin symptoms accompanied by febrile symptoms.

Temperature - At night feverish, hands and face would burn, then intolerable itching.

COMMENTS - The Rev. F. H. Brett, who was one of the first to notice its poisonous properties, undertook to prove it. He had handled the plants freely up to that time without experiencing any ill effect. He cut up some young plants and added some vigorous fresh leaves of an old one and made a tincture.

This he allowed to stand for a week and then took three or four drops, three times a day for four days. Two

days after ceasing to take it symptoms began to develop in the right little finger and two days afterwards in the right thumb. These became very intense and ran a chronic course.

He could not go near a plant of Prim-o. without worsening the symptoms. They were also worse at night, and by rubbing or scratching. At the same time, Brett noted that the pains in the liver and spleen to which he had been subject now troubled him no more. The right hand was much more affected than the left.

Clarke cured a chronic psoric dry eruption on the leg of a woman with Prim-o. 3c. Cooper relieved a case of severe eczema on the leg with bleeding.

RELATIONS - Compare: (1) Rhus-t., Fago, (antidotal). (2) Hume., similar skin symptoms. (3) Anag., Prim-v., Verat.

REFERENCES - Boericke. Clarke.

***PRIMULA VERIS

(Cowslip)

PHARMACY - prim-v. Primula veris. Cowslip. Primula vulgaris. Primula officinalis. N. O. Primulaceae. Primulae. Tincture of entire fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Dropsy. Eczema. Fevers. Gouty, pains. Migraine. Neuralgia. Rheumatic pains. Strokes, threatened. Vertigo. Voice disorders.

HERBAL - According to The Treasury of Botany, the flowers of Prim-v. are said to be narcotic. "Cowslip wine" is a favorite remedy in the country for many small disorders.

HOMEOPATHIC - Schier, of Mentz, proved a tincture of the fresh plant including the root. The duration of action is only a few days in healthy persons.

Prim-v. has threatened strokes, arising from depression. Cerebral congestion with neuralgia. Migraine.

"Pressure at heart." Wandering dropsy. Rheumatic and gouty pains. Chronic eczema.

Ears - Buzzing in ears, better in open air.

Head - Sensation of a band around head, cannot keep hat on (Carb-ac.). Skin of forehead tense.

Kidneys - Urine smells strongly of violets.

Limbs - Weight and lassitude in limbs, especially the **shoulders**. Right axillary muscles painful. Burning in hollow of right hand. Drawing pain in thumb and big toe.

Lungs - Cough with burning and prickling in respiratory tracts. Weak voice.

Modalities - Worse by bent position, stooping, movement. Worse in a room, in a closed carriage, traveling by rail. Worse in open air.

Vertigo - Violent vertigo, as if everything turned around. Fear of falling when standing up.

COMMENTS - Schier commended it as an external application when there is no skin lesion, "as this remedy has a certain relation with the skin. Prudence is necessary here, especially for persons with sensitive and easily vulnerable skin."

Cooper cured with Prim-v. a case of eczema of the hands after Prim-o. had failed. He also cured with it eczema palmaris of years' duration in a man, aged 70.

Cooper also cured a case of wandering dropsy with Prim-v. In a cancer case, one dose caused the disappearance of dropsy from the leg and led to oppression at the heart. Cooper thought this a characteristic aggravation.

RELATIONS - Compare: (1) Cycl., Ran-b. (2) Evening Primrose - exhausting, watery diarrhea, cholera infantum, hydrocephalus.

(3) Prim-f. - the wild primrose - dermatitis, especially on index fingers and thumbs.

REFERENCES - Boericke. Clarke.

***PRINOS VERTICILLATUS

(Black Alder)

PHARMACY - prin. Prinus verticillatus. Black alder. N. O. Aquifoliaceae. Tincture of the berries. Tincture of fresh bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Diarrhea. Fever.

HERBAL - The genus Prinus is very closely allied to the hollies. The Treasury of Botany reported that "The bark of Prin. is bitter and has been used in the treatment of fever and in the form of a lotion as an application in cases of gangrene. The berries are tonic and emetic."

HOMEOPATHIC - The only recorded experiment with Prin., swallowing twenty berries, showed the effect to be vomiting, plus an extremely profuse greenish diarrhea. Prin. increased the appetite and produced a feeling of well-being in spite of great loss of weight.

REFERENCES - Clarke.

***PROGESTERONE

PHARMACY-prog. *Progesterone. Historical dose:* All potencies.

CLINICAL - Acne. Amenorrhea. **Bloating.** Breast, disorders. Constipation. Cramps. **Depression.** Edema. Endometriosis. Epilepsy. **Fatigue.** Hair, growth. Hair, loss. Headache. Hemorrhages. Hormonal, disorders. Hot flashes. Infertility. Insomnia. Menopausal, disorders. Menstrual, disorders. Migraine. Miscarriage. Nausea. Obesity. Osteoporosis. **Premenstrual syndrome.** Vaginal, dryness.

HOMEOPATHIC - Progesterone is a hormone secreted by the ovary in the second two weeks of the menstrual cycle in reproductive age ovulating women. Progesterone, or progesterone-like substances called progestogens or progestins, are ingested by women in birth control pills and menopausal hormone replacement therapy.

Progesterone acts to stabilize the tissue lining of the uterus (endometrium) so if it is absent, such as with ovarian anovulation, irregular and heavy menstrual bleeding often occurs after a period without any menstrual bleeding. Thus progesterone is used to prevent this irregularity of bleeding if it is given continuously.

If, on the other hand, a onetime bolus of progesterone is given such as with a shot or with only 5 days of oral pills, then the falling progesterone levels will actually cause an estrogen-primed endometrium to slough and therefore start a menses.

It is sometimes used to induce a menstrual period or regulate abnormal bleeding problems if menses are skipping or bleeding is irregular or prolonged. Progesterone has been used as therapy for premenstrual syndrome and for women with infertility or frequent miscarriages.

Too much progesterone often causes tiredness and even sedation. This side effect can be beneficial in a women who has epilepsy or even uterine irritability causing preterm labor because progesterone in high doses can decrease seizure activity and uterine contractions.

Progesterone tends to promote vaginal dryness by counteracting the effect on lubrication of estrogens, and it can also decrease the amount of menstruation or block it entirely by reversing estrogen effect on the growth of the uterine lining.

Progestogens can cause some medical conditions to worsen, examples are asthma, heart failure, epilepsy and migraine headache. Natural progesterone tends to have fewer side effects.

Progesterone can cause blood clots, particularly in the legs. Irregular vaginal bleeding. Breast tenderness. Liver disease. Painful swelling of the abdomen. Bloating. Nausea. Constipation. Increased appetite. Weight gain.

Headache. Insomnia. Hot flashes. Profuse sweat. Acne. Unwanted hair growth. Tiredness, irritability. Loss of concentration. Depression, anxiety. Moodiness. Overly emotional.

MIND - Loss of concentration. Foggy thinking. Inability to make decisions. Inability to handle even the smallest amount of stress. Anxiety, irritability. Anger. Anti-social. Panic attacks. Very emotional, feeling overwhelmed.

Mood changes.

Severe depression. Feeling of despair and hopelessness. Uncontrollable crying, immense sadness. Suicidal depression. Psychotic. Delusion, feel like they are in another's body.

Abdomen - Bloating in abdomen, cramps, worse before menses.

Back - Back pain.

Breasts - Breasts tender and sore.

Face - Puffiness in face. Whole face broke out in acne.

Female - Premenstrual syndrome. Amenorrhea. Menses skipping, bleeding is irregular or prolonged. Infertility or frequent miscarriages. Vaginal dryness. Menopausal disorders.

Food - Increased appetite. Craving for sweets.

Head - Sick headaches.

Limbs - Puffiness in hands. Joint pains.

Lungs - Shortness of breath.

Modalities - Worse heat, before menses, before menopause.

Perspiration - Profuse sweating.

Rectum - Constipation.

Skin - Greasy skin. Unwanted hair growth.

Sleep - Sleeplessness. Strange dreams.

Stomach - Sick feeling. Bloating. Nausea.

Temperature - Hot flashes.

RELATIONS - Compare: Sep., Foil., Estro., Lach., Puls., Aur.

REFERENCES - Murphy.

***PROPOLIS

PHARMACY-propo. Propolis. Red or brown resinous substance collected by bees from buds for use in constructing *hives*. **Historical dose:** All potencies.

CLINICAL-Acne. Allergies. Bruises. Burns. Cancer. Chilly. Colds. Coughs. Earache. Fatigue. Fungus. Herpes. Herpes zoster. Immune system. Influenza. Lung, ailments. Lung, infections. Nasal congestion. Polyuria. Shingles. Skin, disorders. Sore, throats. Sunburns. Ulcers. **Weariness**. Wounds.

HOMEOPATHIC - Depending upon its precise composition, propolis may show powerful local antibiotic and anti-fungal properties. Generally efficient in treating skin burns. Allergies.

Great weariness. More tired in the morning than usual, even after sleeping longer. Symptoms appear and disappear suddenly. The action of the remedy is quick and violent. It can be compared with Aeon., Bell, and Cham.

It may stimulate the immune system, but some warn that it should not be taken if the user is likely to have severe allergic reaction to bees. Old beekeepers recommend a piece of propolis kept in the mouth as a remedy for a sore throat.

Ears - Earache.

Facé - Herpes labialis. Red blotches and spots on face.

Food - **Increased appetite**. Desire for every kind of food, especially fruit, bread. On waking strong desire for sweets. Increased thirst.

Head - Headache. Various pains of the head, similar to sinus troubles.

Kidneys - Frequent urination at night in spite of normal intake of fluids.

Modalities - Weariness, cough, worse morning on waking.

Mouth - Bad smell from mouth. Tongue coated grayish, except for the tip of the tongue.

Nose - Watery discharge from nose, preceded by fleeting pain in frontal sinuses. Tingling in nose.

Sleep - Anxious dreams. Dreams of traveling. Dreams of quarrels. Awakes with anger.

Temperature - Chilly. Icy-cold hands. Coldness of fingers between 10 a.m. and noon. Freezing sensation over whole body. Transitory chilliness at 4 p.m.

Throat - Dry sensation in throat and posterior nares.

RELATIONS Compare: Alf.

REFERENCES - Murphy.

***PROPYLAMINUM

PHARMACY - prop. Propylaminum. Trim- ethylaminum. Found in many plants and in herring-brine. Solution. **Historical dose:** All potencies.

CLINICAL - Ankles, pains. Diarrhea. Fever. Joint, pains. **Numbness**. Prosopalgia. Rheumatic fever. Rheumatism. Wrists, pains.

HOMEOPATHIC - Prop, is found in many plants (Chen-v., Crat., Phal., Pyrus-c., Am., Cot., Fagu., etc.) and in the Trimethylaminum, which is, among other sources, prepared from herring-brine, and has a very unpleasant and penetrating fish-like odor.

At one time it was regarded as a panacea in cases of acute rheumatism. Dissipates fever and pain in a day or two in acute rheumatism. Rheumatic prosopalgia and rheumatic metastases, especially heart lesions. Rheumatism, needle held in fingers gets too heavy.

Pain in wrists and ankles, worse slightest motion (Bry.), unable to stand. **Tingling and numbness of fingers**. Great restlessness and thirst. Experiments show that Prop, diminishes the amount of urea excreted.

COMMENTS - Hansen indicated great pains in the wrist joints, also great restlessness. Pains in ankle joints from standing, worse slight movement.

Dr. C. Smith noted "Rheumatism, when the needle held in the fingers gets so heavy she cannot sew." "Copious diarrhea with pains in ankle joints but not in wrists, thirst for large quantities of cold water like Bry." Weakness in lumbar and lower dorsal region.

REFERENCES - Boericke. Clarke.

***PROTEUS BACILLUS

(Bowel Nosode)

PHARMACY - prot. Proteus bacillus. Bowel nosode. Proteus bacteria. Intestinal bacteria. Bacillus proteus mirabilis reitgeri. Nosodes. **Historical dose:** All potencies.

CLINICAL - Acne. Aerophagy. Agoraphobia. **Allergies**. Alopecia. Angina pectoris. Backaches. Blood, clots. **Boils**. Convulsions. Coronary, disease. Cystitis. Diarrhea. Duodenal, **ulcers**. **Dyspepsia**. **Food,allergies**.

Eczema. Edema. Gastric, ulcers. Headache. Hematemesis. Herpes. Hysteria. **Indigestion**. Intermittent, claudication. Leucorrhea. Meibomian cyst. Melancholy. Ménière's disease. Meningitis. **Migraines**. Neuralgia. Neurasthenia. Otitis. Phlebitis. Premature, senility. Pyelitis. Pyelonephritis. Raynaud's syndrome. Rhinitis. Sciatica. Senility. Spinal, neurasthenia. Ulcers. Vaginitis. Vertigo. Worms. Writer's cramp.

HOMEOPATHIC - Culture of a bacteria of the Proteus genus: Proteus vulgaris, mirabilis, morganii, rettgeri. Proteus, a bacterium frequently found in the intestinal region, is a nosode whose range of action concerns essentially phenomena of digestive problems. G. Sevaus conducted a detailed clinical study, but there is no homeopathic proving.

Digestive allergies. Sudden nervous symptoms. Extreme feeling of intra-cranial tension. Meningitis with attacks of fever. Premature senility.

Convulsion, epileptiform fits. Cramps leg, calf. Neuro-arthritic diathesis. After-attack of phlebitis. Long, drawn-out convalescence. Pain aggravated by effort. Intermittent claudication. Icy cold feet.

Morbid alternations (Psor., Sulph.).

MIND - Prostration of mind, mental exhaustion. Brain fog. Confusion of mind. Memory weakness. Forgetfulness of words while speaking. Vanishing of thoughts. Premature senility.

Restlessness, nervousness. Feeling of extreme nervous tension and over-exertion. **Cannot handle things anymore, overwhelmed by stress**. Anxiety in stomach. Anguish during discomfort. Ailments from excitement. Melancholy. Sadness, despondency, depression. Suicidal disposition. Thinks about suicide without really wanting to die. Weeping, tearful mood when telling about her illness.

Sensitive. Horrible things, sad stories affect her profoundly. Frightened easily. Fear of being alone, of the dark. Agoraphobia. Fear something will bad happen. Fear of losing his reason. Hysteria.

Timidity. Want of self confidence. Offended easily. Fear of opinion of others. Aversion to company. Intolerant of contradiction. Anger from contradiction. Tense, irritable. Quarrelsomeness, scolding.

Brainstorm, outbursts of anger. Anger, throws things away, **impulse to kill. Temper tantrums**. Destructiveness. Hurls objects held in the hand, kicks out. Children rolling about on the floor when angry.

Abdomen - Hematemesis and melaena.

Aerophagy. Acrid dyspepsia. Gastric and duodenal ulcers. Spasmodic colon infections. Oxyuric diseases.

Back - Backaches. Spinal neurasthenia.

Hernia.

Chest - Eruptions, boils in axilla.

Constitutions - Allergic and psoric constitutions. Carbonic, flouric, and phosphoric constitutions.

Ears - Acute or burning pains like otitis, but without fever. Noises during vertigo. Ménière's disease.

Eyes - Burning pains. Acute pains, stitching. Pains ameliorated by pressure. Eyes red, tired by light. Intermittent failing of sight. Meibomian cyst.

Face - Dryness of lips. Corners of mouth cracked. Itching of upper lip. Herpes about lips. Acne on chin.

Female - Blood-streaked, brownish discharge before menses. Menses regular, with blood clots for seven days. Menses clotted, protracted. Fibrous blood clots at the end of menses. Leucorrhea before menses, between menses. Leucorrhea, acrid, brown, copious. Leucorrhea offensive, thick. Copious white discharge, worse during ovulation. Vaginitis. Metritis of the cervix. Vulvar pruritus. Anal and vulvar boils.

Food - Food allergies. Desires fats, butter, eggs, rich food. Desires sweets, sugar, salt. Aversion to butter, pork, beef. **Aversion to eggs, especially hard-boiled eggs**. Aversion to cranberries, raw food, salads, green beans, cucumber, onions, garlic. Aversion to chocolate, which he cannot digest. Worse fats, rich food, eggs, garlic, cranberries, cucumber and chocolate.

Head - Digestive migraine. Frontal headache with feeling of heaviness, aggravated during the week preceding menses. Headache in the morning. Headache with diarrhea and furred tongue. Pressing pains. Beats head against the bed. Knocks head against things. Hair falls out. Alopecia.

Heart - Coronary disease. Angina pectoris. Feeling of weight in the precordial region. Palpitations after excitement. Palpitations from the slightest emotion, when lying down.

Kidneys - Pyelitis. Pyelonephritis. Pain in the loin. Cystitis, after eating pork. Violent, burning pains in the urethra. Urine cloudy and fetid. Whitish tissues in the urine.

Limbs - Arthritic diathesis. Sciatic pain. Intermittent claudication. Legs look bruised. Pain in the calf, pain forcing him to walk with a stick, cramps in the legs. Pain in calves of legs after walking. **Muscular cramps**. Functional or professional contracture. Writer's cramp, pianist's cramp, dancer's cramp. Spasms of the hands. Flexor contraction of the little finger. Cannot close the hand. Awkwardness of hands, drops things. Moist eruptions, eczema, on backs of hands. Coldness and blueness of hands. Feet numb, as if frozen, aggravated by cold weather. Hammer-toes.

Lungs - Cough with sputum.

Modalities - Better resting, lying down, one hour after rising. Better from stretching, eating, drinking whisky. Better from mild temperature, in the mountains. Aggravation in the morning on waking, from exertion, from climbing stairs. Worse from drinking wine. Worse in stormy weather, cold, winter, heat, exposure to sun. Worse from lying down, at night.

Mouth - Aphthae and mouth ulcers. Taste of salt in the mouth. Gums sensitive. Cracking at the corners of the lips, resistant to treatment.

Nose - Impression of greasy discharge at the back of the nose. Hypertrophic chronic rhinitis. Nasal blockage. Nasal obstruction in warm room.

Rectum - **Diarrhea from excitement.** Diarrhea with headache and furred tongue. Alternation of diarrhea and constipation. Constipation with empty urging. Sensation of a lump. Hematemesis and melaena. Presence of oxyuris in stools. Stools yellow, soft, in the morning after breakfast.

Skin - Eczema. Itching vesicles. **Boils maturing slowly.** Herpes. **Herpetetic eruptions at muco-cutaneous margins.** Papular, pustular eruption, erythematous, dry, peeling. Severe pruritus. Nails split. Hair falls out. Alopecia.

Sleep - Dreams of dead people, of death or dying.

Stomach - Stomach pain while fasting. Empty sensation in stomach, not better eating. Acidity, heartburn, sourness. Acrid dyspepsia. Aerophagy. Gastric and duodenal ulcers.

Temperature - Copious perspiration from the axilla, falling in large drops, clammy hands.

Throat - Acute pharyngitis with difficulty speaking. Dryness during excitement.

Vertigo - Vertigo when looking at moving objects, while riding in a carriage, during railroad travel. Vertigo with feeling that the ground is coming up to meet him. Vertigo, accompanied by colored lights.

COMMENTS - Keynote **suddenness and**

violence with nervous symptoms and spasm. Slow build up of stress with a sudden catastrophe. Emotional hysteria (Ign., Nat-m.). Violent temper in a child with kicking.

Spasm in peripheral vessels, Raynaud's Syndrome (Sec.). Migraines headaches with blurred vision and Meniere's syndrome. Petit mal attacks of epilepsy.

Herpetetic eruptions with pain out of proportion to the lesion. Angioneurotic edema. Hemorrhage or perforation without any previous stomach symptoms but with a history of nervous strain.

RELATIONS - Related: Ign., Nat-m., Apis, Cupr. **Compare:** (1) Psor. - Inhibition, chilliness, sadness, periodic migraine, nocturnal need to eat, morning diarrhea, weakness in the back and joints, evil-smelling eruptions, appearing in winter, disappearing in summer. (2) Sulph. - Allergic, psoric conditions, burning skin with eruptions and itching. Impatient, quarrelsome, asthenic. (3) Tub. - Unstable, emotional, aggravated by physical or mental effort, emaciation, sweating, morning diarrhea. Aggravated by damp and cold and weather changes.

***PROZAC

(Fluoxetine Hydrochloride)

PHARMACY - proz. Prozac. Fluoxetine hydrochloride. An allopathic anti-depressant drug. **Historical dose:** All potencies.

CLINICAL - Acne. **Allergies.** Amenorrhea. Amnesia. Anemia. Angina, pectoris. Arthritis. Asthma. Belching. Bi-polar, disorder. Blood, clots. Bronchitis. Bruising. **Bulimia.** Bursitis. Chronic, fatigue. Colitis. Coma. Conjunctivitis. Convulsions. Cough. Depression. Dehydration. Diabetes. Diarrhea. Duodenal, ulcer. **Eating, disorders.** Eczema. Edema. Gallstones. Gout. Hair, loss. Headaches. Heart, attack. Heart, failure. Hemorrhages. Hepatitis. Hirsutism. **Hives.** Hypertension. Hypotension. **Impotency.** Indigestion. Influenza. **Insomnia.** Itching. Kidney, disorders. Menstrual, disorders. Migraines. Miscarriage. Nausea. Nervousness. **Obsessive compulsive disorder.** **Premenstrual,** syndrome. Psoriasis. **Rashes.** Salpingitis. Seborrhea. Shingles. Skin, disorders. Spasms. Stomach, ulcer. Strokes. Tooth, problems. Tremors. Twitching. Urticaria. Vomiting. Weakness.

HOMEOPATHIC - Changes in sleep habits. Increased fatigue. Difficulty concentrating. Slowed thinking. Feelings of guilt or worthlessness. Suicidal thoughts. Decreased sex drive.

Involuntary movements. Lack of muscle coordination. Twitching. Tremors. Weakness. Vague feeling of bodily discomfort. Nervousness. Drowsiness and fatigue. Headache. Flu symptoms. Sweating. Chills. Fever. Skin inflammation. Hemorrhage. High blood pressure.

Enlargement of or increased activity of thyroid gland. Inflammation of the esophagus. Tooth problems. Changes in appetite. Weight gain or loss. Fluid retention. Dehydration. Kidney disorders. Diabetes. Flatus. Diarrhea.

Pelvic pain. Premenstrual syndrome, with anxiety, depression, irritability or persistent anger, mood swings, and

tension. Physical problems that accompany premenstrual, syndrome include bloating, breast tenderness, headache, and joint and muscle pain. **MIND** - Changeable moods and emotions. Anxiety. Irrational ideas. Agitation. Paranoid reaction. Hostility. Antisocial behavior. Nervousness. **Obsessive-compulsive disorder. Bulimia, binge-eating** followed by deliberate vomiting.

Euphoria. Exaggerated feeling of wellbeing. Apathy. Confusion. Difficulty concentrating. Slowed thinking. Amnesia. Depersonalization. Hallucinations. Delusions. Feelings of guilt or worthlessness. **Suicidal thoughts.** Loss of consciousness. Coma.

Abdomen - Bloating and gas. Colitis.

Duodenal ulcer. Hemorrhage from intestines.

Bladder - Urinary tract disorders. Frequent urination. Hematuria, albuminuria, polyuria.

Blood - Anemia. High blood sugar. Leukocytosis. Leukopenia. Blood clots. Thrombophlebitis. Stroke.

Breast - Enlargement. Breast pain and swelling. Breast tenderness. Fibrocystic breast.

Chest - Angina pectoris. Severe chest pain.

Ear - Ear pain. Ringing in the ears. Deafness.

Eyes - Dry eyes. Dilated pupils. Conjunctivitis (pinkeye). Glaucoma. Bleeding. Amblyopia. Sensitivity to light. Photophobia. Vision problems. Double vision. Nystagmus.

Face - Face] swelling due to fluid retention. Excess growth of coarse hair on face.

Female - Amenorrhea. Abnormal stoppage of menstrual flow. Premenstrual syndrome. Menstrual disorders. Painful menstruation. Excess uterine or vaginal bleeding. Miscarriage. Salpingitis. Decreased sex drive.

Food - Increased appetite. Lack or loss of appetite. Thirst.

General - Chronic fatigue.

Head - Headaches. Migraines. Hydrocephalus. Hair loss.

Heart - Angina pectoris. Low blood pressure upon standing. High blood pressure. Slowing of heart rate. Irregular heartbeat. Rapid or throbbing heartbeat. Heart attack. Heart failure.

Kidney - Pyelonephritis. Kidney calculus. **Limbs** - Abnormal gait. Gout. Arthritis.

Rheumatoid arthritis. Bursitis. Bone pain. Tremors. Muscle spasm. Leg cramps.

Liver - Gallstones. Liver enlargement. Hepatitis.

Lung - Bronchitis. Cough. Asthma. Rapid breathing. Temporary cessation of breathing. Lung fibrosis.

Male - Abnormal ejaculation. Impotence. Decreased sex drive.

Mouth - Sores. Tingling sensation around the mouth. Dry mouth. Increased salivation. Bleeding gums. Gingivitis. Inflammation. Stomatitis. Slurred speech.

Nerves - Neuralgia. Convulsions. Uncoordinated movements. Decreased reflexes.

Nose - Sinus or nasal inflammation. Nosebleeds.

Rectum - Inability to control bowel movements. Diarrhea. Dark, tarry stool. Bloody diarrhea.

Skin - Itching. Sweating. Skin discoloration. Acne. Eczema. Psoriasis. Hives. Shingles. Urticaria. Rashes. Reddish or purplish spots on the skin. Bruising. Seborrhea.

Sleep - Drowsiness and fatigue. Yawning. Insomnia. Inability to fall or stay asleep. Strange dreams.

Stomach - Esophagitis. Gastritis. Indigestion. Hiccups. Belching. Nausea. Vomiting. Inflammation of the stomach lining. Stomach ulcer. Vomiting blood. Hemorrhage.

Temperature - Reduction of body temperature. Chills and fever. Flu symptoms. Infection.

Throat - Sore throat. Difficulty in swallowing.

Tongue - Taste altered, lost. Inflammation, swelling of the tongue.

Vertigo - Dizziness.

COMMENTS - Muscle spasms and weakness. Muscle inflammation. Tissue inflammation, below skin. Skin inflammation and disorders. Inflammation of eyes and eyelids. Fluid buildup in larynx and lungs. Spitting blood, stomach and intestinal. Colitis. Female milk production. Stupor.

RELATIONS - **Compare:** Aur., Care., Staph., Anae.

REFERENCES - Muiphy.

***PRUNELLA VULGARIS

(Self Heal)

PHARMACY - prune. Prunella vulgaris. Self Heal. N. O. Labiatae. **Historical dose:** Tincture and all potencies.

CLINICAL - Headache. Leucorrhea. Sore, throat. Wounds.

HERBAL - Prunella vulgaris is useful in sore and relaxed throat. Astringent. Internal bleeding, leucorrhea, etc. The infusion of 1 oz to 1 pt of boiling water is taken internally in doses of a wineglassful. Externally it is used as a gargle and injection.

Culpeper wrote, "Here is another herb of Venus, Self-heal whereby when you are hurt you may heal yourself;

it is a special herb for inward and outward wounds. Take it inwardly in syrups for inward wounds, outwardly in unguents and plasters for outward. The juice thereof used with oil of roses to annoint the temples and forehead is very effectual to remove headache."

COMMENTS - There is an old German saying that "He needs neither physician nor surgeon that hath Self-heal and to help himself. "

REFERENCES - Murphy. Potter.

***PRUNUS PADUSRHEUM

(Bird Cherry)

PHARMACY - prun-p. Prunus padusrheum. Bird cherry. Cerasus padus. Padus racemosa. Padus vulgaris. N. O. Rosaceae. Tincture of leaves and bark of small twigs collected when in blossom. **Historical dose:** Tincture and all potencies.

CLINICAL - Headache. Heart, disorders. Rectum, pains.

HERBAL - The fruit is small, black and nauseous to the taste. In Scotland it is known as the Hayberry. The Treasury of Botany noted that in the north of Europe it is made into a liqueur. The juices can also be expressed and drunk with milk, while the residue of the fruit can be kneaded into cakes. The plant is now classed with the cherries, but Clarke retained it under its old name.

HOMEOPATHIC - Lembke's proving of Prun-p. brought out marked symptoms in the head, rectum, chest and heart. Pains were pressive in head and beneath sternum, sticking in rectum. Tumultuous heartbeats. The symptoms were worse by pressure, sitting, standing, stooping and walking.

RELATIONS - Compare: (1) Heart, Crat., Prun., Prun-v., Laur.

REFERENCES - Clarke.

***PRUNUS SPINOSA

(Blackthorn)

PHARMACY - prun. Prunus spinosa. Blackthorn. Sloe. N. O. Rosaceae. Tincture of buds just before flowering. **Historical dose:** Tincture and all potencies.

CLINICAL - Angina pectoris. Appetite, lost. Ascites. Breast, pain. Cardiac, dropsy. Choroiditis. **Ciliary, neuralgia.** Cystitis. Dropsy. Dyspnea. Dysuria. Earache. Eyes, choroiditis. Flatulent. Glaucoma. Heart, affection. **Headaches.** Hernia. Herpes zoster. Leucorrhea. Menorrhagia. Metrorrhagia. **Neuralgias.** Sprains. Strangury. Stricture. **Toothache.** Vitreous, opacities.

HOMEOPATHIC-Prun.was proved by Wahle. The symptoms resemble those of Prun-p. in general, but some very strongly characterized ones were produced. Acts especially on the nerves, respiratory orbital and on urinary organs. Special action on the urinary organs and the head.

Shooting from within out, from before backward. The pains were pressive, and out pressing and out-shooting. Lightning like pains, wandering, causing **shortness of breath.** Spraining pains and pains which take away the breath.

Pains are felt in the skull, eye, root of the nose and ears. The teeth feel raised out of their sockets. Glaucoma, choroido-retinitis, irido-choroiditis, irido-cyclitis. **Ciliary neuralgia** (Spig.). Neuralgias. Nerve paralysis. Anasarca and edema. Dropsy caused by defective heart. Ankle and foot feel sprained. Pains after shingles. Cramps. Compensatory effects.

MIND - Restlessness, walks about constantly, cannot remain in one place.

Abdomen - Ascites. Cramp-like pain in bladder region, worse from walking.

Back - As of a lump below the left scapula.

Causations - Ill effects of sun, sprains, over-lifting.

Chest - Angina pectoris.

Eyes - Ciliary neuralgia. Shooting like lightning through the brain to occiput. **Sudden pain in eyeball as if it would burst,** better by lachrymation. Irido-choroiditis. Opacity of vitreous humor.

Female - Menses, thin, watery, too early, too copious, with sacral pain. Leucorrhea, acrid, watery purulent, staining yellow.

Head - Pressing, tearing pain beneath skull. **Shooting from right frontal bone through brain to occiput.** Headache from heat of sun. Piercing toothache, as if teeth were pulled out, worse taking anything warm.

Heart - Hypertrophied. Cardiac dropsy. Angina pectoris. Throbbing of carotid arteries. Knocking at heart with labored breathing, worse least motion. Furious beating of heart, worse slightest motion.

Kidneys - Neuralgic dysuria. Tenesmus of bladder. Ineffectual effort to urinate. Urgent desire to urinate, urine reaches glans penis and then **returns with violent pain and spasms** and tenesmus in rectum. Cramp in bladder from pressure of flatus, must double up to urinate. Glans pains on urinating. Must press a long time

before urine appears. Pulsating pudendum. Stream of urine thin like a thread or forked.

Limbs - Edema of feet. Itching at the fingertips as if frozen. Thumb as if sprained, hindering writing.

Lungs - Oppression of chest, anxious, short respiration. Wheezing when walking. Short breath with pains. Feeling as if air inhaled did not reach the pit of stomach, has to yawn and try to take a deep inspiration. Air hunger.

Male - Pulsation in glans from jar of walking.

Modalities - Better from rest, doubling up. Biting the teeth together helps toothache. Worse stooping, ascending, motion, jarring, must walk carefully. Worse by touch, pressure, night. Toothache worse from warm food.

Mouth - Teeth feel pulled out. Toothache better by biting teeth together.

Rectum - Hard, nodular stool with rectal pain, as if angular body were pressed inward. Burning in anus after slimy diarrhea.

Sensations - As if a sharp corner pressing against top of head. As is skull would be pressed outward by a sharp plug. Headache as if from sun. As if inner portion of eye would be torn out. Eyeball as if crushed or pressed asunder. Sighing as if climbing a steep mountain. As if small of back had been injured. As if right thumb sprained, as if left ankle sprained, as if first joint of big toe pulled out.

Skin - Herpes zoster. Dropsy. Itching on fingertips, as if frozen.

Temperature - Night sweat.

COMMENTS - "Breath always seems to remain sticking in pit of stomach." This symptom, with "pain as if sprained in left ankle," led Lippe to make a remarkable cure in the case of a young woman, 16, who jumped from a carriage while the horse was running away and sprained her ankle. Left ankle and foot much swollen. As swelling abated, breathing became rapid, great oppression with constantly recurring desire to take a long breath, felt as if air inhaled did not reach pit of stomach and until she could force air so far down had to yawn and try to take a deep inspiration. The tightness, stitches and sticking pains in chest have marked Prun. as a remedy in many cases of neuralgic pains with or following herpes zoster.

"Flatulence presses on bladder and causes cramps in bladder so that he is obliged to double up." Strangury. Hurriedly compelled to pass urine, which seems to pass forward into glans penis and then return and cause most violent pain in urethra.

Menses are too early, too profuse, last too long, and are thin and watery. There is leucorrhoea, which weakens and stains yellow. The right side is much more affected than the left.

c. M. Boger gave the case of a man, 60 with enlarged prostate, had frequent urging to urinate, day and night. Shooting pains in neck of bladder unless desire to urinate is at once gratified.

D.

Urination delayed if any great amount has accumulated.

Spasmodic tenesmus of bladder and rectum at close of urination with pains in glans. Pulsation in glans from jar of walking. Prun. 1,000c. (Fincke) removed the symptoms.

RELATIONS - Compare: (1) Laur. (2) Prun- p., bird-cherry - sore throat, pressure behind sternum and sticking pain in rectum. (3) Pyrus., mountain ash - irritation of eyes, constriction around waist, spasmodic pains in uterus, bladder, heart, cold-water sensation in stomach, coldness extends up esophagus, neuralgic and gouty pains.

REFERENCES - Boericke. Clarke.

***PRUNUS VIRGINIANA

(Choke-cherry)

PHARMACY - prun-v. Prunus virginiana. Choke-cherry. Wild cherry. Cerasus virginiana. N. O. Rosaceae. Tincture of fresh inner bark. Solution of concentrated resinous extract, Prunin. **Historical dose:** Tincture and all potencies.

CLINICAL - Acidity. Anorexia. Bronchitis. **Coughs.** Dyspepsia. Heart, hypertrophy. **Heart, weakness.** Heartburn.

HERBAL - Hale said the cold infusion of Prunus virginiana has been used from time immemorial for irregular intermittent action of the heart with deficient impulse.

HOMEOPATHIC - Prun-v. is a **heart tonic**. It relieves the flagging and distended ventricle, irritable heart, dilatation of right heart. **Cough, worse at night on lying down.** Chronic bronchitis. Weak digestion, especially in elderly people. Increases muscular tone.

Hale noted it for cough, sympathetic with heart troubles, dyspepsia with tendency to acidity, slow digestion, loss of appetite and heartburn. Excessive doses have caused a "dull, heavy feeling in head" like that of the other Pruneeae.

COMMENTS - Seymour Taylor said it is especially useful in dilatation of right heart, whether as a result of chronic bronchitis or of mitral stenosis.

Burnett used it for weak digestion especially of elderly people. He regarded it as a mild form of Hydr-ac.

Laidlaw gave as a particular indication persistent coughs acquired in winter, worse at night on lying down. Spasmodic and asthmatic coughs. Attacks of wheezing and whistling in trachea and large bronchi and cough left behind after an attack of influenza.

Laidlaw's first case was a delicate girl, 20, who took cold, which began with coryza and in a few days passed into a cough with scanty expectoration and soreness under the sternum. Cough was persistent and annoying at all times, but worse at night.

After many other remedies had failed, Prun., one grain every two hours, relieved in two days and cured in a week. A recurrence some months later was rapidly cured by the same remedy.

REFERENCES - Boericke. Clarke.

***PSILOCYBE CAERULESCENS

(Psilocybe Mushroom)

PHARMACY - psil. Psilocybe caerulescens. Psilocybe mushroom. N. O. Strophariaceae. (Agaricaceae).

Historical dose: All potencies.

CLINICAL - Aphthae. Coryza. Delusions. **Fatigue.** Headache. Heat, flushes. Nausea. Palpitations. Salivation. Sneezing. Tonsillitis. Vertigo. Weakness.

HOMEOPATHIC - **Extreme weakness and tiredness.** Weakness and nausea. Great weakness after eating, desire to take a nap, better motion. Flushes of heat at night. Increased sexual desire at night.

Voracious appetite, gets up at midnight to eat. Sour eructations after spicy and fatty food. Sensation of heaviness in stomach and indigestion, better drinking water. "Slow digestion with sensation of suffocation at night, better cold drinks." Thirst, not better drinking.

Dryness. Watery, mucus nasal discharge with sneezing. **Throbbing headache, especially on the right side.** Great pain in right shoulder, as if covered with ice. Sexual desire increased, especially in females.

Pains appear and disappear suddenly. Pains pricking and stinging. Fleeting and erratic pains. Pain worse by small movements rather than by big movements. Painlessness of complaints usually painful. Sensation of strength.

MIND - Mental weakness. Absent-minded when conversing. Abstraction of mind and fixed eyes. Distraction. Loses the thread of his conversation. Listens with interest but only some minutes later it occurs to him what was said. Forgets everything, from lack of involvement, yet without feeling worried about it.

Sadness. "Great depression, recalling the past as if something was left undone, recalling occurrences with great detail, making one melancholic." Vindictiveness, "without knowing why or against whom." "Want of ethical and religious principles." Indifference to everything around him.

Idea that one can be in several places at the same time and think differently in each place. Sensation of being two or three personalities at the same time that cannot fuse, as if looking into several mirrors.

Telepathic speaking with superior spirits. Sensation of being in visual touch with God. Alternatively attracted to God and the devil. Sensation of being possessed by a divine force.

Involuntary laughing. Feels that someone is spying on him from behind and to the right, which makes him turn over in an summersault. Sensation of being in the moon. Sensation of being able to resolve whatever problem of mathematics or being able to understand any language. Thinks he is well.

An old and badly dressed woman looks young and beautiful. Vivid hallucinations of luminous colors. Time appears shorter, passes too quickly.

Suddenly changing delusions (Cann- i.). Delusion of having creative power. Delusion of being in communication with God. Delusion of being under a powerful, superhuman influence, alternately by God

Psilocybe caerulescens and the devil. Delusion that he is hovering in the air like a spirit.

Abdomen - Pain in liver after cold food (Mang.).

Back - Coldness as from ice.

Chest - Sudden, paroxysmal palpitations.

Eyes - Sensation of enlargement of left eye (Arg-n.). Burning pain in eyelids on winking.

Food - Thirst, vanishing at sight of water. Worse cold food.

Head - Heaviness in forehead when stooping. Pain, headache, on head getting cold. Headache increasing gradually. Headache simultaneous with other pains. Pain in forehead from sunlight (Ign.). Pain in temples while chewing. Pressing pain as if by a band.

Limbs - Desquamating eruption of palms of hands, soles of feet. Itching of soles of feet. Wrinkling of fingertips, as if dehydrated.

Modalities - Better from cold. Worse cold, wet weather. Worse in the morning on waking, right side.

Mouth - Aphthae, bleeding easily. Salivation and dryness of tongue. Metallic taste, at tip of tongue, seemingly originating from the teeth, with sensation as if esophagus were knotted up.

Nose - Violent attacks of coryza. Coryza in warm room. Obstruction and watery discharge. Sneezing in morning, after rising.

Sensations - Sensation of flying. Sensation of obstruction of nose and watery discharge. Sensation of dryness of mouth and salivation. Sensation of dryness of throat, not better drinking. Sensation of sweating around the mouth, but the skin is dry.

Sleep - Falling asleep from weakness. Short sleep refreshes. Sleepiness during pain. **Unrefreshing sleep.** Difficult waking in morning. Waking from hunger. Dreams of being robbed and attacked in his own house and being incapable of defending *oneself*. *Dreams of being* chased by a vampire in a big house. Dreams of eating frogs with thorns and waking up with epigastric pain.

Stomach - Emptiness, weak feeling, better pressure. Nausea, in morning on waking, from odors, while smoking.

Throat - Sensation of mucus. Mucus in morning on waking. Pain when touched. Dryness of throat, worse emotions, not better drinking. Inflammation of tonsils from smoking or from tobacco smoke. Constant disposition to swallow from lump in throat. Weakness of voice after talking.

Vertigo - Vertigo and trembling, better sitting. Vertigo and momentary loss of consciousness. Sensation as if the earth were slipping away under one's feet. Vertigo with weakness and trembling of legs, tendency to fall to the right side.

Vision - Colors, black spots during headache (Meli.).

RELATIONS - Compare: Anh., Cann-i., Sulph., Lach., Agar.

REFERENCES - Murphy. Toledo.

***PSORINUM

(Scabies Nosode)

PHARMACY - psor. Psorinum. Scabies nosode. The product of "***Psora sicca***" epidermoid efflorescence of pityriasis by Gross. The salt from a product of psora by Hering. Nosodes. Triturations. **Historical dose:** All potencies.

CLINICAL - Acne rosacea. Adenoids. **Allergies.** Anus, itching. **Anxiety.** Asthma. Backaches. Bedwetting. Blepharitis. Boils. Cancer. Cholera infantum. Colds. Cough. Constipation. Cornea, ulcers. Crusta lactea. Crusta serpigiosa. **Debility.** Depression. **Despair.** Diarrhea. Diphtheria. Dyspepsia. **Eczema.** Emaciation. **Eruptions, itching.** Gleet. Gonorrhea. Gouty. **Hay fever.** **Headaches.** Hemorrhages. Hemorrhoid. Hernia. Hydrocele. Hypoglycemia. Impotency. Influenza. Injuries. **Itching.** **Leucorrhea.** **Lice.** Lienteria. Liver, disorders. **Malnutrition.** Melancholy. Nose, redness. Odor, fetid. Ophthalmia. Otorrhea, fetid. Ozaena. Pericarditis. Peritonitis. Plica polonica. Polyps. Psoriasis. Quinsy. **Scabies.** Sciatica. Scurvy. **Sian, disorders.** Spina bifida. Spleen, disorders. Sprains. Syphilis. Throat, mucus. Tinea, capitis. Tonsils, concretions. Ulcers.

HOMEOPATHIC - Dr. Hering prepared this nosode from the sero-purulent matter of scabies vesicles. The therapeutic field of action is found in the psoric manifestations, when there is a lack of reaction in chronic diseases, and when well related remedies fail to relieve or to permanently improve.

Psor. chiefly affects the folds of the skin, sebaceous glands, ears, bowels, respiration system and the right **side.** **Allergies and hay fever.** Syphilis, inherited and tertiary. Cardiac weakness. Looseness of joints, teeth. Prominent **skin symptoms.** Unhealthy skin. Severe itching, worse at night, heat of bed, worse from **wool clothing. Itching leads to despair.** Eczema and psoriasis. Eruptions and rashes disappear in summer, appear in winter.

Offensive discharges. Thick secretions. **Secretions have a filthy smell. Foul discharges,** odor of the body, stools, eruptions, sweat, stubborn foot sweat. Profuse sweating. Easy perspiration when walking. Night-sweats.

Otorrhea is horribly offensive. Emaciation. Cholera infantum. Diarrhea is profuse, watery, dark brown and even black and is putrid smelling like carrion.

Debility independent of any organic disease. **Prostration after acute disease** or after loss of fluids. Feels good and bad by turns. Feels sick all over. Recurrences of diseases. Hopelessness, despair of recovery. **Lack of reaction,** when well-chosen remedies fail to act (Op.).

A cold medicine, wants the head kept warm, **wants warm clothing** even in summer. **Extreme sensitiveness to cold. Dread of least cold air or draft.** Weak, tender and thin. Clothing seems large or he feels pushed down when walking in the sun. **Hungry or unusually well before an attack.** Wants to wash parts constantly, especially hands and feet.

Scrofulous patients. Nervous, restless persons who are easily startled. Adapted to dirty people with a filthy smelling body, even after bathing. Pale, sickly, delicate, unhealthy looking children, who have a disagreeable smell around them.

Sick babies will not sleep day and night but worry, fret and cry or good and play all day, troublesome screaming all night. Difficulty in breathing when standing in open air, wants to go home and lie down. Enlarged glands. Often gives immunity from catching colds.

MIND - Dull, beclouded mind. Confusion, better open air. Difficult thinking. Stupor. Aversion to work. Inability for calculating, due to confusion of senses. Vanishing of thoughts after over-lifting. Memory weak, can't remember, doesn't even know his room. **Anxiety and restlessness.** Gestures, wringing hands. Anxiety while riding downhill. Anxiety about salvation. Foreboding. Fears the business will fail. Fear of being alone, of becoming insane. Restless during a thunderstorm. Thought pains would drive him crazy.

Pessimism, thinks he is very ill when he is not. **Despair of recovery. Despair from itching of skin.** Constant thoughts of dying. Religious melancholy. Horrid thoughts, **suicidal tendency.** Weeping at night.

Great depression during menopause. **Hopelessness.** Great despondency, makes one's own life and those about him intolerable. **Forsaken feeling.** Sentimental. Melancholy and gloomy. Seeks solitude. Desires to remain in bed.

Severe ailments from even slight emotions. Thoughts which he can't get rid of constantly reappear in his dreams. Feels himself poor. Feels his business is going to be a failure, though it is prosperous.

Children very fretful, day and night. Children intolerably self-willed, annoying those about them. Peevish, irritable, noisy. Easily startled. Irritability on waking at night. Irritability while talking.

Abdomen - Constant feeling of emptiness and looseness in abdomen. Pain in abdomen after eating. Abdominal affections during menopause, with high degree of ill-humor. Chronic indurations of spleen. Stitches in spleen better standing, worse moving, and continuing when again at rest. Stinging, sharp, in inguinal glands. Inguinal hernia. Lumps in right groin.

preventing stooping. Pain through right groin when walking. Gripping in abdomen and desire for stool while riding. Painful bearing down with painful, burning micturition. Sensations as if intestines were hanging down. Colic better eating and passing fetid flatus. Flatus like bad eggs. Flatulent symptoms with distension.

Back - Backache and debility. Severe backache, as if bruised, can't straighten out. Backaches after suppressed eruption. Spina bifida. Boring in vertebrae in morning with colic, as from rheumatism. Bruised feeling in evening, cannot straighten it. Lumbar ache worse standing or walking. Pain in lumbar region, like weakness, worse motion. Pressing pain in lumbar region, worse motion. Sticking in back. Drawing pain extending to shoulder. Tearing and sharp pains between scapulae. Painful stiffness of neck, soreness and tearing pain on bending backward. Swelling of glands of nape, with bruised pain.

Breasts - Breasts swollen and painful, nipples red. Burning and itching pimples around nipples. Eruptions on breasts causing excoriation. Breast cancer.

Causations - Poor hygiene and diet. Ill effects of infectious diseases lasting for years. Over-lifting injuries, blows, sprains, dislocations. Slight emotions cause severe ailments.

Chest - Hot sensation in chest. Pain in chest, better lying down. **Feeling of ulceration under sternum.** Knife-like cutting pain in chest. Burning, pressing pain in chest. Dull pressure in right side of chest. Chest expands with great difficulty. Soreness as if everything were torn in chest. Chest pain extends to shoulder, worse cold drinks. Anxious oppression in chest every morning. Paroxysmal, in chest, with great anxiety. Eruption in axilla.

Constitutions - Suited to scrofulous, nervous, restless persons who are easily startled. Psoric constitutions, lack of reaction after severe diseases. Complaints of psoric origin, patients emit a disagreeable odor. Pale, sickly, delicate children. Peevish, unhealthy-looking children, who have a disagreeable odor about them. Dirty people in whom the body has a filthy smell which no amount of washing can remove. Those subject to diseases of the glands and skin and who have had eruptions suppressed.

Cough - Dry, hard cough with great weakness in chest. Severe, dry cough with pain as if everything in chest were raw and scratched. Cough from tickling in larynx, with soreness under sternum and heaviness on chest. Coughs a long time before expectorating. Cough from suppressed eruption, talking. Cough worse mornings, evenings, lying down, drinking. Cough returns every winter.

Ears - Putrid otorrhea, with headache, with offensive watery diarrhea. **Moist fetid pus** from ears, brownish, offensive. Ulceration of tympanum. Reddish wax. **Raw, red, oozing scabs around ears.** Eczema, humid sores, behind the ears. **Offensive discharge** from eczema around ears. **Intolerable itching.** Itching in ears, child can hardly be kept from picking or boring at meatus. Herpes from temples over ears to cheeks. Severe pains. Sore pain behind ears. Illusory noises, as if he heard with ears not his own. Impaired hearing with singing, cracking, humming, buzzing and ringing in ears.

Eyes - **Recurring chronic ophthalmia.** Acrid secretion. Profuse flow of hot tears. Sharp pains in eyes.

Soreness of eyes and burning, must close them frequently. Lachrymation. Agglutinated. Gummy. Edges of eyelids red. Pterygium. Everted eyelids. Blepharitis. Tendency to styes. Objects tremble, then get dark. Darkness before eyes. Sensation as if something were moving or one were playing with his fingers before eyes. Aversion to light. Photophobia when walking in open air, walks with eyes bent upon ground.

Face - Pale, delicate, sickly, dirty, fuzzy or puffy. Broad blue rings around eyes. Down on the face. Burning heat and redness of face. Acne rosacea, red, small pimples, on nose, chin and middle of cheeks. Pimples on forehead. Coppery eruption on face. **Humid eruptions on face**. Lips dry, brown, black. Swelling of the upper lip.

Cheekbones pain as if ulcerated. Soreness of jaw, right side, could not open mouth. Painful tension and pressure in right zygoma. Submaxillary and sublingual glands swollen, sore to touch.

Female - Amenorrhea. Menses, early and profuse. Menses delayed and scanty. Dysmenorrhea, near menopause. Menstrual disorders during menopause. Leucorrhea and debility. **Fetid leucorrhea**, gushing, lumpy, with violent pain in sacrum, with **backache and debility**. Pimples oozing an acrid fluid that burns and excoriates the glands. Ulcers on labia. Pinching pain in pubic region. Obstinate vomiting during pregnancy. Fetus moves too violently. Flow starts anew when the woman gets on her feet after a miscarriage.

Food - Canine hunger preceding attacks. Very hungry always, must have something to eat in middle of night. Ravenous appetite, but grows thin. Hypoglycemia. Hungry during attacks of headache. Loss of appetite after illness with great thirst. Anemia with aversion to food. Generally worse fasting. Desires beer, acids. Aversion to pork. Dinner tastes oily. Thirst during dinner. Drinking causes cough.

Head - Migraines. Headache as from a heavy blow, follows visual disturbances, better nosebleed. **Headaches from suppressed eruptions**, suppressed menses. Chronic headaches, hungry during attacks of vertigo. Hammering pain. Awakens at night with pain as from blow on head. Dull, pressive pain in occiput. Pain alternates with other complaints. Brain feels too large, worse change of weather. Head feels separated from the body. Sensitive to drafts about head, wants it covered in hot weather. Twitching in temples. Whole head burns. Viscid sweat about head. **Humid eruption on scalp, hair matted**. Pustules, boils on head. Spots of white skin with white lock of hair. Dry, lusterless, rough hair. Tangled hair. **Head lice**. Scurfy eruption of children.

Heart - Heart murmurs and mitral regurgitation. Gurgling in the heart, worse lying down. Purring in region of apex, cyanotic lips. Pericarditis. Heart pains, better lying down. Thinks the sharp pains will kill him if they continue. Stitches in cardiac region, for a moment breathing is impossible. Palpitations with anxiety. Palpitations in those suffering from hepatic disorders. Pulse weak, feeble, irritable. Weak, irregular pulse.

Kidneys - Has to pass urine several times from weakness of bladder. Burning and cutting pain in urethra. Frequent, scanty urine. Urine thick, whitish, turbid, red deposit, cuticle forms on surface. Escape of urine when coughing. Obstinate bedwetting, worse full moon.

Limbs - Caries, rachitis. Chronic forms of rheumatism. Tearing pains. Joints feel loose, weak, as if they would not hold together. Eruptions around joints, makes walking difficult. **Eruptions around fingernails**. Hot itching soles. **Fetid foot sweat** (Sil.). Hands and feet feel as if broken early in morning and after a little work. Heat in hands and feet.

Liver - Deep, heavy pain in region of liver, worse pressure or lying on right side, worse sneezing. Stinging, sharp pain in region of liver and spleen. Flatulence with disorders of liver. Chronic hepatitis.

Lungs - Difficult breathing, when standing in open air. Dyspnea wants to go home and lie down. Shortness of breath on walking in open air. Anxious dyspnea with palpitations and pain in cardiac region. **Asthma with dyspnea**, worse sitting up, better lying down and keeping arms spread wide apart. Asthma, feels as if he would die. Asthmatic attacks with hydrothorax. Hydrothorax. Tedious recovery in pneumonia. **Allergies. Hayfever returning** irregularly every year. Bloody expectoration with hot sensation in chest. Green mucus sputa, worse mornings when awaking and evenings on lying down. Tenacious mucus, difficult to expel. Green and yellow, salty taste. Small lumps of mucus.

Male - Offensive genitals. Hydrocele. Inflamed ulcer on glans. Discharge of prostatic fluid before urination. Chronic, painless discharge from urethra, staining yellow. Gripping pain in testes. Drawing pain, in testes and spermatic cords.

Chronic gonorrhea, painless discharge from urethra staining yellow. Aversion to sex. Impotency. Absence of erections, parts flabby, torpid. Want of enjoyment of emission during sex. Excessive, uncontrollable sexual desire.

Modalities - Better heat, warm clothing, even in summer. Better washing, hard pressure, rest, being in a room. Better from coffee, profuse sweating, nosebleed. **Better from lying with head low or quietly**. Better when eating, but rush of blood to head is worse immediately after. **Worse from cold, open air**. Worse changing weather, storms, before thunderstorms. Worse evening, before midnight, night, morning on waking. Worse

from heat of bed, wool clothes. Worse exertion in hot sunshine, walking, moving, washing. Worse pressure, rubbing, scratching, touch, contact of own limbs, bandage. **Worse from suppressions.** Liver is worse lying on right side. Over-lifting causes thoughts to vanish. Winter causes cough. Summer causes diarrhea, itching eruptions. Bedwetting is worse periodically, yearly, at the full moon.

Mouth - Mouth inflamed, sore, worse warm food, not annoyed by cold food. Mouth dry, burning. Bad taste in mouth, better open air. Bitter taste, better eating or drinking. Filthy taste. Tough mucus of foul taste adheres to soft palate. Gums, bleed, spongy, settled away from the teeth. Pyorrhea. Cyanotic lips. Burning, painful vesicles inside lower lip. Obstinate cracks in corners of mouth.

Neck - Glands of neck swollen, bruised pain extending to head on touch. Sticking in neck with pustules. Herpetic eruption on side of neck extending from cheek. Nape excoriated by discharge from eczema capitis.

Nose - Recurring colds. Allergies. **Hay fever**, regularly returning every year. Hay fever coming on in August. Watery acrid discharges. Dry, coryza with stoppage of nose. Coryza with loss of smell. Chronic catarrh, dropping from posterior sinuses. Tough mucus in nose. Burning pain followed by thin nasal discharge, which relieves. Nose sensitive when inhaling air. Bloody, purulent discharge. Smell of blood. Septum inflamed, white, suppurating pustules. Small, red pimples. Acne rosacea.

Perspiration - Profuse sweats, improves all complaints. Colliquative sweats. Sour, clammy sweats. Easy, profuse sweat, worse night. **Profuse, offensive at night.** Sudden outbreaks of sweat on slight exertion, which is offensive, followed by debility and easily taking cold. Sweats easily on limbs. Sweats if he turns in bed. Heat with steaming sweat. Sweats on face, palms of hands and perineum when moving about. Cold sweat, on palms. Lack of perspiration and dry skin.

Rectum - Constipation with pain in lumbar region. Obstinate constipation with coryza and obstruction of nose.

Constipation of infants in pale, sickly scrofulous children. Cholera infantum. Chronic diarrhea, early morning, urgent. Involuntary stools with sleep. Soft, difficult stools, has to go several times to pass normal stools. Hard, difficult stool with blood from rectum. Desire for stool when riding. Soreness in rectum and anus when riding. Burning in rectum. Burning hemorrhoids. Hemorrhages from rectum in old women.

Sensations - As if frightened. As if he would lose his senses. As if stupid in left half of head. As if brain had not room enough in forehead. As from heavy blow on forehead. As if brain would protrude. As if sand in eyes. Eyes as if pressed outward. As if he heard with ears not his own. Cheekbones as if ulcerated. Condyle of jaw as if lame. Tongue as if burnt. Teeth as if glued together. Plug in throat. Throat as if narrowing. As if intestines hanging down.

Skin - Unhealthy skin. Abnormal tendency to skin diseases. Sebaceous glands secrete excessively, oily skin. Urticaria, worse exertion. Crusty eruptions all over. Herpetic eruptions, especially on scalp and bends of joints, with itching. Eruptions bleed easily and constantly tend to suppurate. Dirty, rough, scabby, greasy, breaks out in folds. **Eczema behind ears.** Pemphigus.

Psoriasis. **Intolerable itching**, worse heat of bed. Scratches raw or until it bleeds. Rubbing skin causes small vesicles to arise. Condylomata on edges of skin. Pustules near fingernails. Indolent ulcers, slow to heal.

Suppressed eruptions. Enlarged glands. **Scabies. Recurring body lice.** Burning itching pustule after vaccination. Skin troubles disappear in summer, only to occur again in winter.

Sleep - Easily started. Sleepy by day. Sleepless from anxiety and despair./rozn **intolerable itching**, from congestion to head. Sleepless after 12 p.m. In morning lies in same position as when he fell asleep. On waking, can't get rid of the one persistent thoughts from dreams. Vivid dreams, continue after waking. Dreams of robbers, danger, traveling.

Stomach - Hypoglycemia. **Very hungry always, must have something to eat in the middle of the night.**

Weakness of stomach. Cramps in stomach. Sharp stinging pain in pit. Water brash when lying down, better getting up. Sour, rancid belchings, tasting and smelling like rotten eggs. Eructations, sour, rancid, room is filled with an offensive odor. Nausea after suppressed itch. Nausea all day, in morning, with pain in lumbar region. Vomiting first of blood, then of sour, slimy fluid. Vomiting of sweet mucus every morning at 10 a.m. and in evening. Nausea, vomiting of pregnancy.

Stool - Hot flatus, smelling like rotten eggs. Stools like rotten eggs or carrion, worse at night. Mucus stools.

Stools bloody, excessively fetid, dark fluid, brown, horribly putrid, gushing. Stools have a penetrating odor, going through the whole house. Involuntary stools during sleep. Diarrhea after severe acute disease. Fetid diarrhea during dentition.

Teeth - Teeth stick together as if glued, from tough mucus in mouth. Looseness of teeth, fears they may fall out, worse touch. Sensations of soreness of teeth. Stitching pain in teeth from one side to other. Toothache worse at night and from cold, better warmth. Gums bleed, spongy, settled away from teeth. Pyorrhea.

Temperature - Internal shivering, creeping chills and icy cold feet. Chilliness in evening, on upper arms and thighs, with thirst. Sudden heat over whole body, with trickling sweat all over face. Fever with steaming sweat.

Fever at night, with dryness of mouth. Fever when riding in a carriage. Thirst during chill and heat.

Throat - Throat burns, feels scalded. Tension and swollen feeling in throat. Dryness of throat in morning. Recurring quinsy. **Eradicates tendency to quinsy.** Tonsils greatly swollen, painful swallowing with pain in ears. Tonsillitis with swelling of submaxillary glands and fetid otorrhea. Profuse, offensive saliva, tough mucus in throat. Hawking up of cheesy, pea-like balls of disgusting smell and taste (Agar.). Sensation as if a plug in throat impeding hawking. Sensations of suffocation, with paroxysmal, dry, hacking cough. Tickling, throat as if narrowing, must cough to better it. Hoarseness when talking, phlegm sticks in larynx. Voice weak, trembling, talking very fatiguing. Herpetic eruption on side of neck extending from cheek.

Tongue - Tip of tongue feels scalded. Tongue thickly covered with whitish- yellow slime. Tongue, gums ulcerated. Tough mucus of foul taste adheres to soft palate.

Vertigo - Vertigo in morning. Vertigo, objects seem to go around with him. Vertigo with headache, eyes feel pressed outwards. Vertigo with confusion and drawing in forehead, and roaring in ears.

Vision - Sensation as if something were moving or one were playing with his fingers before eyes. Objects seem to tremble for a few moments, then get dark. Obscuration, with ringing in ears. Fiery sparks. Misty, after anxiety. Black spots or rings, flickering, dancing about of objects, before headache. Blurs and blue stars, during headache.

COMMENTS-Psoric manifestations. Similar symptoms to Sulph., particularly for psora conditions, itch and itch-like eruptions. Exceedingly chilly, likes to have a fur cap on in summer (Sulph. is hot).

H. C. Allen noted that Psor. is indicated in chronic cases when well-selected remedies fail to relieve or to permanently improve (in acute diseases, Sulph.), and when Sulph. seems indicated but fails to relieve. Clears up confused cases. Useful as an intercurrent, when indicated remedies palliate or fail to act.

Feeble reactions, lack of reaction. Weakness from loss of fluids, after acute disease, with or without organic lesion. Debilitated, worse exertion. Weak since loss of fluid. Emaciation. Feels unusually well before attacks, sense of well being. Lies with arms out, as if crucified (Puls.). Whole body painful, easily sprained and injured. Unhealthy skin. Skin is dirty looking, scurfy. Sores refuse to heal. Severe eczema, psoriasis, dermatitis. Scabies. Lice, worms, parasites. Bruises and scars easily (Sulph.). Rough skin, cracks and sores (Petr.). Scaly skin. Skin will ooze and crust. Sallow and greasy face, several pustules on chin and neck that itch intensely and bleed when scratched.

Constant irritation. Formication. Itch and scratch until they bleed (Alum.). Wandering itching. Tormenting, despairing itching, drives a person crazy, especially at night and in bed. Can pick at skin. Can't stand clothes or the covers. Skin problems along the hairline with inflammation and itching. Dry, lusterless hair, plica polonica. Scabs, pus, seborrheic dermatitis (Graph., Mez.).

Extreme dullness. Fears inflammation of brain, better by nosebleed. Dull, heavy pain in the base of brain, in the afternoon. Headache better by eating, nosebleed, suppressed menses. Very hungry during headaches. Headache following darkness before eyes. Black spots before eyes.

Chronic colds from little drafts and getting chilled easily. Chronic bronchitis with severe shortness of breath. Quinsy, throat burns, feels scalded. Tendency to quinsy. Cutting, tearing, intense pain on swallowing. Profuse, offensive saliva, tough mucus in throat, must hawk continually. Hay fever. Allergies. Allergic to wool (Sulph.). Sudden gnawing hunger. Wakes up in the middle of the night hungry. Large appetite, but loses weight. Malnutrition. Starvation (Sil., Calc-p., Calc.). Low blood sugar. Aversion to pork (Puls.). Desires acids. Thirst for beer. Chronic headaches with hunger (Anae.). Worms that irritate the colon (Cina.).

Sensation as though skin of abdomen was greatly relaxed and drawn down. Decomposition. Belching like rotten eggs (Arn., Chin., Carb-v.). Flatus with pungent, carrion-like odor. Smell penetrates the room. Horribly offensive, nearly painless, almost involuntary, dark and watery stool, only in night and most towards morning. Cracking and bleeding anal fissures.

Vertigo with poor circulation. Dizzy after exertion. Great sensitiveness to cold air, change, storms, sun. Lack of vital heat. Steaming perspiration. Restless for days before a thunderstorm. Symptoms are worse during menses from fats, sugar, coffee, meat. Dislikes bathing.

Depression, mental anguish. Very insecure. Possessive. Sense of depletion. Anxious about health. Despair about survival. Fear of poverty, of the future, of being forsaken. Ailments from illness, malnourishment, nutritional weakness, lack of hygiene.

Sick babies will not sleep day or night, but worry, fret, cry or good and play all day, restless, troublesome, screaming all night.

Clarke frequently saw Psor. develop its own symptoms in patients whom it has benefited in other ways. A man who complained of "cloudiness of mind and difficult thinking," and who had, among other symptoms, his "left foot colder than right," received Psor. 30c. It removed these symptoms, but while under its influence new symptoms appeared, including a heavy headache across the eyebrows, and greasiness of face and forehead.

Hahnemann noted the symptom "spasmodically contracting headache." A woman to whom Clarke gave Psor. 30c complained that after each dose she had a feeling "as if something in the head were being screwed up and drawn."

A patient who took Psor. 500c complained that it had a "filthy taste." Psor. 20,000c. has produced an eruption of boil-like indurations in both axillae, first in the left then in right. The general symptoms were relieved at the same time.

Clarke noted that Psor. cured more cases of hay fever than any other single remedy in his practice. Many cases have a psoric basis and when the basic taint is corrected, the irritating agents have no effect. Nasal polyps have also been cured with Psor. when the general symptoms indicate the remedy.

Hawley reported a case of cholera infantum that seemed to defy every remedy. Stools were very thin and watery, dirty greenish, smelled like carrion. Child was very fretful and had no sleep for two days and nights. Hawley gave Psor. 42,000c (Fincke), one dose in water. In two hours the child went to sleep, in four days it was well without repetition of the dose.

Hawley also had the case of Miss N., 20, who had an eruption in the bends of elbows and knees. It was dry, scaly, with little pointed vesicles around the reddened edges. It disappeared entirely in summer and reappeared when cold weather set in. Violent itching, worse by warmth of bed or by scratching. Psor. 42,000c, two doses at six weeks interval, cured, it did not return the following winter.

Wesselhoeft observed that headaches and eruptions were worse during changeable weather.

Miss C., when convalescing from typhoid fever, reported that she was "stationary, no appetite." Psor. 400c produced immediate change and ravenous appetite.

Mr. P., age 50, complained of nothing but weakness, no appetite, least exertion put him into a perspiration. Psor. 40c cured rapidly.

Mr. X., age 21, was obliged one day to run until nearly exhausted. Though strong and well before, he now became weak, perspiring easily, severe pains on right side, worse by coughing, laughing and motion. Psor. 40c cured rapidly.

Mr. C., age 43, was spare, dark. Hypochondriacal. "Nervous" nine months, had to give up business, took quinine and other drugs. Complained of a very disagreeable feeling about the head and manifested mental depression, thought he would never recover, lost all hope.

Could not apply his mind to business. Seemed confused, could not reckon. Numbness of legs and arms, worse left side, worse going to bed, formication and crawling with prickling and smarting on scalp and on limbs. Tongue coated white.

After three months, treatment was stationary. It was then ascertained that he sweated very easily on least exertion and somewhat at night, and had loss of memory. Psor. 400c soon caused improvement and enabled "the patient to return to business."

G. A. Whippy cured with Psor. 200c, a dose every third night, the case of a carpenter, 40, with a long-standing discharge of reddish cerumen from left ear, worse at night. There was a sensation of a valve opening and shutting in left ear, worse afternoon. Buzzing in ear, which stopped suddenly and was followed by violent itching.

RELATIONS - Compare: (1) Ped. - psoric manifestations in chi Idren. Eruption on dorsum of hands, feet, neck. Prurigo, pellagra. Unusual aptitude for study and work. (2) Ped. - transmit typhus and trench fever. (3) In lack of reaction compare Op., Calc, and Nat-ar. (4) Gaert. **Complementary:** Sulph.

***PTELEA TRIFOLIATA

(Hop Tree)

PHARMACY - ptel. *Ptelea tnfoliata*. Hop tree. Shrubby trefoil. Water ash. Wafer ash. N. O. Xanthoxylaceae of the Rutaceae. Tincture of bark of root. **Historical dose:** Tincture and all potencies.

CLINICAL-Asthma-AscarWes. Bilious, headaches. Constipation. Dysentery. Dyspepsia. Erysipelas. Gallstones. Gastric, headaches. Headaches. Intermittent, fever. Jaundice. **Liver, disorders.** Nightmares. Phosphaturia. Rheumatism. Spleen, disorders. Stomach,

***Ptelea tnfoliata* pain. Urticaria. Worms.**

HERBAL - Ptelea is the Greek name for the Elm and was applied by Linnaeus to a genus of shrubs and small trees, natives of North America and Asia and included in Xanthoxylaceae. The Treasury of Botany noted that the fronds are bitter and aromatic, and have been used as a substitute for hops.

In Canada, the young green shoots of Ptelea are used as an anthelmintic in the form of an infusion. One of the provers of Ptelea confirmed its anthelmintic powers by "a very copious expulsion of ascarides."

HOMEOPATHIC - The proving was very thorough and extensive, and T. Nichol, Burt and Cowperthwaite were

among the provers. Marked action on the liver and in those erysipelatous and urticaria eruptions that are so often concomitant with disorders of the liver.

Ptel. is a remarkable remedy in stomach and liver disorders. **Atonic states of stomach.** The aching and heaviness in the region of the liver is **greatly aggravated by lying** down on the left side. Stomach and liver symptoms associated with pain in limbs. **Worms.** Ravenous hunger, empty sensation in esophagus and stomach.

Taste bitter and belchings either bitter or like rotten eggs. Aching and heaviness in the region of liver worse lying on left side. Headache with hunger, especially on awaking, may prove a keynote. Right (liver) side most affected.

Asthma. Difficult breathing coming on as gastric symptoms improve. Alternating symptoms. Nervous pains alternated from left arm to left eye and temple. Liveliness alternates with sadness. Sensitive to light, sound, open air. Enlarged feelings, head feels large, fingers feel numb and large and clumsy.

Abdomen - Much weight and pain in right side, heavy, aching feeling, relieved by lying on right side. Retraction of abdomen.

Ears - Swelling of gland under right ear, sharp pain behind ear. Shooting pains from left ear down spine. Intolerance of loud talking. Roaring and singing in ears.

Eyes - Eyes heavy. Pressure over eyes, worse lifting eyebrows. Pains over eyes. Sensitiveness to light.

Face - Face pale, especially around eyes, sickly, yellow. Burning in face.

Food - Appetite voracious. Tired before finishing eating. Desire for acid food. Aversion to meat, butter and rich food. Thirsty, drank much water. Absence of thirst with bitter taste.

Head - Feels dull and stupid. **Pain from forehead to root of nose, pressing-outward pain. Frontal headache,** worse noise, motion, night, rubbing eyes with acidity. Temples as if pressed together. Headache better after stool.

Limbs - **Edema of feet** and legs with liver disorders. Stomach and liver symptoms associated with **pain in limbs.**

Liver - **Liver congestion.** Liver sore, swollen, sensitive to pressure. Weakness of liver.

Lungs - Feeling of pressure on lungs and of suffocation, when lying on back. **Asthma,** dyspnea, cramp-like pain in cardiac region.

Modalities - Better eating sour, acid things. Better in cold air, morning and evening. Worse lying down, lying on left side, after sleep, on waking, early morning, afternoon. Worse in hot room, walking, speaking, mental exertion, moving eyes, raising eyebrows. Worse after eating, cheese, butter, meat, puddings. Worse before, during, and after stool.

Mouth - **Excess of saliva with dry, bitter taste.** Tongue coated white or yellow, feels rough, swollen. **Papillae red and prominent** (Arg-n.). Coating may be brownish-yellow. Breath, hot, burns the nostrils.

Nose - Sneezing. Nose stopped, sore, breath burns and irritates nostrils. Influenza.

Rectum - Pressure in rectum, urging to stool. Stool followed by tenesmus and succeeded by itching and smarting at anus. Smarting in anus after hard stool, with diarrhea stool.

Sleep - Restlessness with frightful dreams, nightmares. Awakes languid and unrefreshed.

Stomach - Stomach feels empty after eating. Weight and fullness. Heat, dryness and distressing feeling of emptiness in esophagus. Constant sensation of corrosion, heat and burning in stomach. Belching, nausea and vomiting.

Throat - Dryness, roughness, heat, constriction in throat. Throat sore, ulcerated, worse right side. Burning and pricking pains, especially in tonsils.

COMMENTS - Hale said Ptel. has not the violent action of Podo, or Iris-v., but "a slow, pervading" action and causes chronic ailments. He found it useful in "bilious headache, dyspepsia, gastralgia, congestion of the liver, chronic hepatitis and chronic erysipelas." Others used it in chronic rheumatism, dysentery and constipation.

Hale said the oily constituent of Ptel. resembles turpentine and one of the most marked symptoms of the proving is: "Pressure as from a stone in pit of stomach," recalling Abies-n. and the conifers. In the proving, the liver was swollen and tender, but it was better lying on right side and worse lying on left

H. K. Leonard cured a seemingly hopeless case with Ptel. lx on the symptom weight, aching distress, dull pain in hepatic region, better lying on right side, turning on left causes a dragging as if liver pulling on its ligaments. The dull, muddled headed feeling is another liver symptom.

J. Preston cured with Ptel. a case of jaundice following gallstones with great emaciation. Aching distress, general aching and soreness, malaise.

***PUERARIA LOBATA

(Kudzu Vine)

PHARMACY - puer. Pueraria lobata. Kudzu Vine. Kuzu. **Historical dose:** Tincture and all potencies.

CLINICAL - Alcoholism. Anemia. Asthma. Bronchitis. Constipation. Diabetes. Diarrhea. Dysentery. Edema. Enteritis. Fevers. Hangovers. Headaches. Hypoglycemia. Impotence. Infertility. Influenza. Insect, bites. Measles. Migraines. Pneumonia. Sinus, problems. Snake, bites. Tonsillitis.

HERBAL - Traditional Asian herbalists have long valued kudzu's root and flowers for treating colds, flu, high blood pressure, chest pain, allergies, and a host of other ailments. Research indicates that a compound in the root (an isoflavone called puerarin) may also increase blood flow to the heart and brain which may explain certain traditional uses.

In traditional Chinese medicine, kudzu has been used to relieve muscle pain. Animal studies and some human case reports suggest that kudzu may have some antiinflammatory effects.

Chemicals in kudzu may also lower the heart rate and regulate its rhythm, as well as widen the blood vessels near the heart and the brain. This may support its uses in heart conditions and for the treatment of migraine headaches.

HOMEOPATHIC - Other medicinal uses for kudzu include influenza, cough, colds, tonsillitis, measles, and fevers. Bronchitis, pneumonia. Asthma. Sinus problems.

Lack of energy. Sexual apathy, impotence, infertility. Muscle shrinking. Dizziness. Headaches, migraines. Hangovers. Diaphoretic. Removal of excess fluids from the body. Anemia, internal bleeding. Snake and insect bites.

Thirst, hunger. Bad breath. Diarrhea, dysentery, intestinal ailments, enteritis, constipation, and digestive disorders. Diabetes. Can reduce blood sugar levels and result in hypoglycemia when taken in large amounts. Strengthens the spleen, stomach and intestines, as well as the entire immune system.

RELATIONS - Compare: Nux-v., Sul-ac., Lach.

REFERENCES - Murphy. Yui.

***PULEX IRRITANS

(Common Flea)

PHARMACY - pulx. Pulex irritans. Common flea. Insecta. **Historical dose:** All potencies.

CLINICAL - Abdomen, bloated. **Headache.** Leucorrhea. Salivation.

HOMEOPATHIC - Pulx. has marked urinary and female symptoms. Cannot retain urine, must attend the call immediately. Stains of menses and leucorrhea are very hard to wash out. As if cotton ball inside the vagina.

MIND - Very impatient. Restlessness. Cross and irritable, does not want to be looked at or spoken to. Memory confused. Cannot think. When walking has a sensation of lightness. Glad feeling, as though she had heard good news. Felt a dread of going to bed.

Back - Backache (Ox-ac.). Back weakness. Drawing of muscles below scapula.

Eyes - Eyes feel as if enlarged.

Face - **Face wrinkled and old-looking.**

Female - Menses delayed. Increased flow of saliva during menses. Leucorrhea, profuse, foul, staining a greenish yellow, stains of menses and leucorrhea very hard to wash out. Intense burning in vagina.

Food - Thirst, especially during headache.

Head - Frontal **headache with enlarged feeling of eyes.** Very impatient, cross and irritable.

Kidneys - Urine scanty with frequent urging with pressure in bladder and tenesmus in urethra. Cannot retain urine, must attend to the call without delay. Irritable bladder before menses. Urine foul. Flow of urine stops suddenly, followed by pain.

Modalities - Better sitting or lying down. Worse left side, moving about.

Mouth - Metallic taste. Sensation of a thread in throat. Thirsty, especially during headache.

Skin - Sore spots all over. Prickly itching. Skin emits foul odor.

Stomach - Breath and taste foul. Intense nausea with vomiting, purging and faintness. Stool very offensive.

Temperature - Feels a glow all over, like being over steam. **Chilly,** sitting near by fire.

Throat - As if a thread hanging in throat.

REFERENCES - Boericke. Clarke. Phatak.

***PULMO VULPIS

(Fox's Lung)

PHARMACY - pulm-v. Pulmo vulpis. Fox's lung. Sarcod. Trituration. **Historical dose:** All potencies.

CLINICAL - Asthma. Bronchitis. **Dyspnea.** Catarrh. Heart, disease. Lungs, catarrh. Lungs, edema. **Shortness**

of breath.

HOMEOPATHIC - The uses of tissues and organs as remedies have thrown light on many curiosities of ancient medicine. As the fox is probably the longest-winded of all animals, the doctrine of signatures pointed to his lungs as a likely remedy for short breath.

Pulm-v. has **persistent shortness of breath**, causing a attack of asthma on the slightest motion. Strong, sonorous bubbling rales.

COMMENTS - Grauvogl put on record his case of a women, 65, much reduced in flesh by a persistent condition of humid asthma. It commenced with chronic catarrh and symptoms of edema of the lungs.

Strong, sonorous bubbling, rattling, whistling sounds over whole chest and at some distance away, perceptible also to hand laid on chest. Accelerated short breath amounting to suffocation, even without corresponding heaving of the chest, frequently with cough and inability to expectorate.

Sometimes in light cases, there is no catarrh present and only persistent shortness of breath, becoming a paroxysm of asthma on the least bodily exertion. The patient could only live sitting up, bent forward, constant lividity of face, lips and limbs and dropsy of legs.

Heart's pulsations irregular and death seemed imminent. Pulm-v. lx grains right was given and repeated in an hour. Visible improvement set in but without increased expectoration. After a third powder the patient was able to lie down and fell into a refreshing sleep lasting several hours. In eight days she engaged in her domestic duties.

***PULMONARIA OFFICINALIS

(Lungwort)

PHARMACY - pul-o. Pulmonaria officinalis. Lungwort. Pulmonaria maculosa. Jerusalem sage. N. O. Boraginaceae. **Historical dose:** Tincture and all potencies.

CLINICAL - Asthma. Bronchitis. Coughs. Hemoptysis. Hemorrhoids. Lung, disorders. Urinary, incontinence. Tuberculosis.

HERBAL - Pulmonaria officinalis is an evergreen perennial species of lungwort, native to locations throughout Europe. A rhizome, P. officinalis produces small bunches of pink flowers which turn to blue-purple in spring.

The plant has been cultivated for centuries as a medicinal herb, the ovate spotted leaves were thought to be symbolic of diseased lungs. The appearance of the plant makes it easy to see why the lungwort was used for diseases of the lung (putrid bronchitis, hemoptysis), and also for hematuria, and urinary incontinence (see also under Myos.).

The medicines are prepared from the fresh, flowering herb. It is an astringent, demulcent, diaphoretic, diuretic, emollient, expectorant, ophthalmic, and resolvent.

The leaves and flowering shoots are often used for their healing effect in pulmonary complaints. The leaves can also be used externally to stop bleeding. They are harvested in the spring and dried for later use. A distilled water made from the plant is an effective eyewash for tired eyes.

The tannins in lungwort have a slight astringent effect when applied to the skin, thereby reducing secretions, relieving irritation, and improving tissue firmness.

It has been used as a wash, poultice, or soak for hemorrhoids and minor skin injuries such as scrapes and sunburn.

Lungwort has a high mucilage content and this makes it useful in the treatment of chest conditions, being of particular benefit in cases of chronic bronchitis. The herb is very mucilaginous and contains silica, tannins and saponins. It combines well with other herbs such as coltsfoot (Tus-fa.) in the treatment of chronic coughs including whooping cough and can also be taken to treat asthma.

Lungwort is good for coughs, hoarseness, and mild lung problems. It acts as a good expectorant, which breaks up chest congestion. Soothes throat irritation. It can also be used for diarrhea, which makes it useful for a stomach virus accompanied by a cough.

HOMEOPATHIC - Pul-o. is used in the treatment of bronchitis, coughs and diarrhea. Bronchial catarrhs, colds. In the past, lungwort was given for the coughing up of blood arising from tubercular infection.

***PULSATILLA NIGRICANS

(Wind Flower)

PHARMACY - puls. Pulsatilla nigricans. Wind flower. Pasque flower. Pulsatilla pratensis. Anemone pratensis. N. O. Ranunculaceae. Pastures in Central and Northern Europe, parts of South of England. Tincture of entire fresh plant when in flower (it flowers in spring and again in autumn). **Historical dose:** Tincture and all

potencies.

CLINICAL - Acne. Allergies. Amaurosis. **Amenorrhea. Anemia.** Bladder, catarrh. Blepharospasm. Breast-feeding, disorders. Breasts, pain. Bronchitis. Cataract. Catarrh. Chest, pains. **Chickenpox.** Chilblains. Clavus. **Colds. Conjunctivitis.** Coughs. Diarrhea. Distention. Dysmenorrhea. Earache. Epilepsy. **Ear, disorders. Eye, disorders.** Fears. Feet, painful. **Fetus, mal-position.** Freckles. Gonorrhea. Gout. Hands, painful. Heart, palpitations. Heartburn. Hemorrhoids. Hydrocele, congenital. Hysteria. Intermittent, fever. Faints. Labor, pains. **Leucorrhea. Measles. Menstruation, abnormal. Moles. Mumps.** Neuralgias. Nose bleed. Nymphomania. Ophthalmia. **Otitis, media.** Ovaries, inflammation. Phlegmasia alba dolens. Pregnancy, troubles. Priapism. Prostatitis. Prostatorrhea. Puerperal convulsions. Puerperal fever. Puerperal, mania. Retained, placenta. Rheumatism, gonorrheal. **Sinusitis. Smell, loss.** Spine, curvature. Styes. Synovitis. Tapeworm. Taste, lost. Tongue, coated. Toothaches. Urinary, incontinence. Uterus, prolapse. **Vaginitis.** Varicose veins. Whitlow.

HERBAL - Pasque flower is in bloom at Easter, its flowers have been used for coloring Easter eggs. It is a medicine of ancient times, and its affinity for the eyes seems to have been noted from the beginning. Perhaps its tearful propensities gave rise to the legend that it sprang from the tears of Venus. Dioscorides mentions it as a remedy for headache and ophthalmia.

HOMEOPATHIC - Stoerck was the forerunner of Hahnemann in the modern use of Puls.; he employed it especially in chronic disorders of the eyes (catarrh, amaurosis, spots on cornea). Pulsatilla affects the emotions, veins, mucus membranes, respiration and one side. It is pre-eminently a female remedy, especially for mild, gentle, yielding disposition.

Useful in acute as well as chronic diseases. Most suitable when not only the physical symptoms correspond but also when the mental and emotional disorders peculiar to the remedy encounter similar states in the disease to be cured, or at least in the temperament of the patient.

The disposition and mental state are the chief guiding symptoms. Sad, crying readily, weeps when talking. **Moody,** contradictory. **Changing, shifting symptoms,** known as a weather cock remedy. Alternations. Symptoms rise to a certain pitch, then suddenly cease.

Changeable nature. Erratic temperatures in fevers. Alternate pallor and redness of face. Wandering pains shift rapidly from one part to another, also with swelling and redness of the joints. Hemorrhages apparently stop and in a few hours return. Stools constantly changing color, no two stools alike.

When one set of symptoms comes on another vanishes. Symptoms appear on one side or go to side lain on. **The patient seeks the open air, always feels better there,** even though he is chilly. **Thirstless, chilliness and shortness of breath** with digestive or menstrual disorders. Chilliness with pains but burning with stitching pains with numbness.

Mucus membranes are all affected. Mucus **discharges are profuse, bland, thick, yellowish-green. Metastasis.** Hemorrhages, passive, vicarious, blood dark, easily coagulating. Varicose veins. Anemia. Emaciation of suffering parts. Symptoms in distant parts of the body cause dyspnea.

Epilepsy with absent or irregular menses. **Never well since puberty.** Chorea from amenorrhea or dysmenorrhea.

Peevish. Great sensitiveness. Scraping, jerking, tearing, ulcerative pains, wandering pains. Numbness, partial, hands, feet etc. of the part lain on of suffering parts. Heaviness. Pulsation through whole body. Wants the head high. Feels uncomfortable with only one pillow. Lies with hands above head. The longer he lies in the morning, the longer he wishes to lie. **Child wants to be carried slowly.**

Sensation of distention in size, as if one part or every part were growing too large during pain. Bandaged sensation. Wearing of flannels or woolen clothes cause itching and eruptions. Great inclination to stretch feet. Often indicated after abuse of iron tonics and after badly managed measles.

MIND - Changeable moods. Timid, irresolute. **Mild, emotional and tearful.** Highly emotional, easily moved to tears and laughter. **Craves affection and sympathy.** Desires company. Capricious. Easily discouraged. Whining. Wandering thoughts.

Forsaken feeling. Sadness from disagreeable news. Sadness from injuries of head. **History of abandonment or grief.** Silent grief with submissiveness. Remorse in evening.

Weeps easily. Can hardly give her symptoms without weeping. **Better being held and hugged. Weeps at everything, whether it is joyful or sorrowful.**

Weeping when disturbed at work. **Weeps easily before menses.**

Over-sensitiveness to pain. Given to extremes of pleasure and pain. **Consolation improves all symptoms.** Children like to be carried slowly and held. Children like affection and caresses. Children are extremely affectionate, which they manifest by kissing and caressing.

Very irritable, touchy, feels slighted or fears slight. Sensitive to reprimand. Easily offended. Answers yes or no

by nodding head. Selfishness. Miserly. Jealousy. Envy. Delusion she is alone in the world, that she is always alone.

Suspicious. Disgusted at everything. Fastidious. Fixed ideas about food, sex, religion. Imagines that certain articles of food are not good for the human race. Fixed ideas about marriage. Thinks that sex is a sinful act. Religious melancholy. Religious mania. Mania from suppressed menses. Despair of salvation, seeks aid in constant prayer. Weary of life, thinks of drowning.

Full of cares about domestic affairs. Anxiety better open air, better motion. Anxiety and uneasiness in bed, must uncover. Fear, wants to hide or run. **Fear of abandonment, of being unlovable.** Fear of marriage. Morbid dread of opposite sex. Fear of being alone, of dark, of ghosts in the evening. Fear of high places. **Fear of insanity.**

Abdomen - Great soreness of epigastrium. Cutting, pulsation in epigastrium. Abdominal walls sensitive and swollen, tender to touch. Feeling of numbness. Chilliness from abdomen. Tense distension in upper abdomen. Pressure as from a stone. **Painful, distended abdomen loud rumbling. Abdominal colic from ices, fruits, pastries, fat or greasy things.** Colic, with chilliness in evening. Colic and rumbling of wind in upper abdomen. Colic from getting feet wet. Incarcerated flatus. **Flatulence.** Cholera morbus from drinking ice-water. Pains extend into groins. Hard painful lumps in both groins.

Back - Curvature of the upper part of the spine. Pain in back and small of back as from prolonged stooping. Back painfully stiff, like a board. Backache worse lying on back, better lying on sides or changes of position, especially during pregnancy. Back feels bandaged. As if cold water was poured down the back. Chilliness and pain in sacral region during menses. Chilliness in lumbar region after stool. Lumbago, must move, yet motion gives no better. Shooting pain in the nape and back, between shoulders, in sacrum, after sitting. Swelling of cervical glands. Stiffness of neck after stool.

Bladder - Region of bladder painful to touch. Sensation as if a stone rolling in bladder. Sharp pain, pressure on neck of bladder. Burning in orifice of urethra during and after urination. Pain and tenesmus in urinating. Constrictive pain in region of bladder with urinary tenesmus and involuntary emissions of a little urine. Spasmodic pain in bladder, after urinating. Urination more frequent during attack of headache. Hematuria with burning at orifice of urethra. Retention of urine after childbirth. Involuntary urination at night, on coughing or passing flatus. Involuntary urination on laughing, sneezing. Dribbling of urine from anger. **Nocturnal bedwetting** after measles, worse in autumn, especially little girls.

Breasts - Lumps occurring in breasts of young girls, painful and affecting arm of corresponding side. Thin, milky fluid escapes from breasts before puberty. Aching, sore breasts. Secretion of milk during menses. Milk suppressed or very scanty. Weeps when the child is put to breast. Child refuses breast. Galactorrhea, in women who are not nursing their children. After weaning, breasts swell, feel stretched, tense, intensely sore, milk continues to be secreted.

Causations - Ill effects of suppressions, otorrhea, menses, lochia, milk etc. Abandonment. Grief. Eating ice cream, pork, fats, pastry, desserts, mixed rich diet, tea. Chill. Wetting feet.

Chest - Smothering sensation on lying down. **Pressure and soreness upon the chest.** Chest oppressed, as by a load. Soreness beneath clavicles. Tension in chest, worse drawing a long breath. Pain as from ulcer **Pulsatilla nigricans** in middle of chest. Paroxysms of burning in chest. Hard, painful, throbbing glandular swelling in right axilla. Congestion to chest and heart at night with anxious dreams. Chest symptoms, worse lying on painful side.

Constitutions - For females of mild, gentle, plethoric, yielding disposition, who cry readily and weep when talking. Pale, chilly blondes.

Cough - Dry cough in evening and at night, must sit up in bed to get relief. Loose cough in morning, with copious mucus sputum. Dry, hacking cough from tickling in epigastrium. Short, dry cough, worse becoming warm and after sleeping. Cough from dryness in larynx and trachea, worse eating and evening. Dry cough, often with palpitations, nausea, retching, headache, backache. Loose cough by day, dry after every sleep. Cough with retching and desire to vomit. Loose cough, with vomiting of mucus. Cough with diarrhea. Cough after measles.

Ears - External ear swollen and red. Lobes of ear swollen. **Catarrhal otitis media. Ear infections, worse at night.** Otorrhea, discharge of pus, blood, thick yellow humor, offensive after exanthemata. Threatened ulceration and perforation of tympanum. Itching deep in ears. **Severe earache, not better warm applications.** Earaches, worse night. Sensation as if something were being forced outward. Hearing difficult, deafness, as if ears were stopped up. Can hear better in car and in a warm room. **Deafness after suppressed measles.** Impaired hearing, worse cold, damp weather, better in warm room. Sounds of wind or rushing water.

Eyes - Pupils dilated or contracted. Ophthalmia neonatorum. Ophthalmia after suppressed gonorrhea. Ophthalmia with amenorrhea. Spots on cornea. Superficial ulcers on cornea. Incipient cataract. **Catarrhal**

conjunctivitis. Sub-acute conjunctivitis with dyspepsia, worse in warm room. Conjunctivitis from colds. **Thick, profuse, yellow, bland discharges.** Burning, itching in eyes, must rub. Child frequently rubs eyes. Profuse, acrid

lachrymation and secretion of mucus. Pressure, as from sand in eyes, when reading. Weeping eyes. Fistula lachry- malis, discharging pus on pressure. **Lids inflamed, agglutinated.** Veins of fundus oculi greatly enlarged. **Styes,** recurrent, upper lids. Blepharitis with acne of face. Oversensitive to light. Allergies.

Face - Face puffed, blue, red. Flushes. **One cheek red, the other pale, during fever.** Paleness of face during vertigo. Painful sensitiveness of skin of face. Facial erysipelas with stinging, pricking pains, skin peels off. Acne of young, growing girls. Prosopalgia towards evening until midnight, chilly with pain. Facial neuralgia. Right-sided neuralgia, with profuse lachrymation. **Mumps, especially metastatic to the breast or testes.** Tension of face and fingers, as if parts would become swollen. Boring pain in left malar bone. Frequently licks dry lips. Swelling of lower lip. Licks lips, crack in center of lower lip. Sweat on one side of face.

Female -Amenorrhea (Ign., Cimic., Polyg., Senec.), from wet feet, nervous debility, anemia or chlorosis. **Menses delayed at puberty.** Suppressed menses. Dark, thick menses. **Menses too late, scanty** after bathing. Mensesclotted, changeable. Flow more during day while walking about. Menses intermittent, irregular, or vicarious. Tardy menses. Bearing down pain, worse lying. Dysmenorrhea beginning in puberty. Dysmenorrhea, with chilliness, paleness of face, stretching and yawning. Metrorrhagia after abuse of quinine and iron. Leucorrhea worse lying down. **Acrid, milky leucorrhea, thick like cream,** with swollen vulva. Leucorrhea with pain in the back and exhaustion. Leucorrhea after masturbation. Vaginismus. Serous cysts, indurations or polyps in vagina. Promotes expulsion of moles. Nymphomania. Threatened miscarriage after fright. **Malposition of fetus, breach position.** Labor pains causes palpitations. Labor pains too weak or ceasing, with somnolence. **Weak labor pains.** Bearing down pain, worse lying. After-pains too long and too violent. Post-partum hemorrhages from retained placenta.

Food - Hunger, but doesn't know for what. Changeable appetite. Sudden loathing, worse eating. Food tastes too salty. **Thirstlessness with nearly all complaints.** Aversion to butter, pork, meat, fats, milk, bread, buckwheat. Aversion to warm food and drink. Aversion to smoking. Craving for what disagrees, pungent food, cheese, sweets, ice cream, peanut butter, soft-boiled eggs, herring. Craves or dislikes butter. Desire for tonics, acids, sour, lemonade, refreshing things, beer or alcoholic drinks. **Worse from rich foods, fats, pork. Worse pastries, desserts, ice cream.** Bad effects from onions.

Head - Confusion of head as after intoxication. Headaches from overwork, suppressed sexual desire, indigestion. **Headache from overloaded stomach, from pastry, fats, ice cream. Headache from abuse of coffee, spirits or chamomile tea.** One-sided headaches, pulsating, bursting, with scalding. **One-sided headaches, lachrymation of the affected side.** Headaches of schoolgirls at puberty. **Headaches, better walking in open air.** Occipital pain, worse coughing. Numbness of head during headache. Occipital headache worse coughing. Shooting pains in temples. Wandering stitches about head, pains extend to face and teeth. Frontal and supra-orbital pains. Neuralgic **scalding** pains, beginning in **right temporal side.** Pressure on vertex. Head seems heavy, cannot hold upright, cannot raise it. Sensations of emptiness in head. Humming in head. Tumors on scalp, suppurating. Profuse sweat on hairy scalp.

Heart - Burning in region of heart. Catching pain with short breath, better by pressure of a hand and walking. Murmur in jugular veins. Anxious palpitations with amenorrhea, from emotions, after dinner. Nervous palpitations in young girls during puberty, or from amenorrhea. Palpitations, worse lying on left side. Pulse with distended blood vessels. Beat of pulse is felt in pit of stomach. Pulse frequent in evening. Pulse slower in morning. Heart symptoms reflex from indigestion.

Kidneys - Cystitis with weeping. Urging to urinate when lying on back. Sensation as of a stone rolling in the bladder. Stricture, urine passed only in drops and stream interrupted (Clem.). Urine dribbles when angry. Spasmodic pain in bladder after urinating. Burning in orifice of urethra during and after urination. Hematuria after urination. Heavy pressure or cramp in bladder after urination. Involuntary urination at night during sleep, while coughing, sneezing or passing flatus. Involuntary on lying down, laughing, hearing sudden noise after surprise, shock.

Limbs - Swollen, red joints. Pains down lower limbs, alternating sides. **Pains, worse from letting the affected limb hang down** (Vip.). **Tensive pain, letting up with a crack.** Drawing, tensive pain in thighs and legs with restlessness, sleeplessness and chilliness. **Pain in limbs, shifting rapidly.** Rheumatism caused by getting wet. Rheumatism from protracted wet weather. Legs feel heavy and weary. Numbness in legs when after long standing. Painful hip joint. Knees swollen with tearing drawing pains. Sticking in tibia worse lying better cool air and walking. Milk leg. Periostitis. Inclination to stretch the feet. Feet red inflamed, swollen, edematous. Boring pain in heels toward evening. Cold sweat on legs. Foul foot sweat. Arms feel broken and dislocated.

Elbows numb. Veins in forearms and hands swollen. Veins full, varicose, painful.

Lungs - **Craves open fresh air, must open the window. Shortness of breath**, anxiety and palpitations worse lying on left side (Phos.). Smothering sensation on lying down, **worse in warm, stuffy rooms**. Asthma in evening after a meal. Asthma from suppressions. Dry, hacking cough, from tickling in epigastrium. Dry cough in evening and at night. **Cough must sit up in bed to get relief**. Loose cough in the morning with copious mucus expectoration. Urine emitted with cough (Caust.). Cough after measles. Expectoration, thick, purulent, slimy, sweet, salty, bitter as it loosens up. **Bland, yellow, greenish expectoration**. Large quantities of yellow, thick, lumpy mucus, worse mornings. Groaning or rattling breathing. Broncho-pneumonia in chlorotic or anemic women. Acute suppuration of lungs. Pneumonia from hepatic troubles or during measles.

Male - Orchitis, pain from abdomen to testicles. Orchitis, gonorrheal or from sitting on cold stones. Testicles hang low down. Soreness of testes. Burning and aching of testes, with or without swelling. Burning down left spermatic cord. Epididymitis. **Acute prostatitis** with pressure and great heat in perineum. Enlarged prostate. Hydrocele, varicocele, sarcocele. **Thick, yellow discharge from urethra, late stage of gonorrhea**. Bloody emissions. Pain and tenesmus while urinating, **worse lying on back**. Venous congestion of penis. Sexual desire in morning on waking, long-lasting morning erections. Nocturnal emissions, without dreams. Sexual excesses resulting in headache, backache, limbs heavy.

Modalities - **Better from cool, fresh, open air**. Better uncovering, cold applications, cold food and drinks, though not thirsty. Better from erect posture, lying with head high. **Better continued, gentle motion**, pressure, rubbing, massage. **Worse from warmth of air, stuffy rooms**, clothes, bed, sun. Worse getting feet wet, before and during thunderstorms. **Worse at twilight, sunset**, evening and night. Worse rest, beginning motion. Worse lying on one side, hanging down limbs. **Worse puberty, before menses, pregnancy**. Worse from eating, long after. **Worse from rich foods, pastry, fats, ice cream**, pork, eggs, tea. Worse hot food, is vomited immediately, aggravates toothache. Worse from iron, quinine. Never been well since puberty (anemia, bronchitis, phthisis).

Mouth - **Crack in middle of lower lip**. Frequently licks dry lips. Offensive breath. Offensive odor from mouth (Aur., Merc.). Copious salivation during pain in stomach. Much sweet **saliva**. Tenacious saliva, like frothy cotton. Watery saliva like water brash. **Dry mouth without thirst**, wants it rinsed frequently. **Yellow or white tongue, covered with a tenacious mucous**. Dimin-

ished taste and smell to all foods. Loss of taste with nasal catarrh. **Alterations of taste**, bitter, bilious, greasy, salty. **Foul taste**. Greasy taste. Food, especially bread, tastes bitter. Food leaves an aftertaste. Taste as of bad meat.

Nose - Foul discharge or odor before the nose. Bad smells, as of old catarrh. Imaginary smells. Stoppage of nose with loss of smell, taste and appetite. Coryza, stoppage of right nostril, pressing pain at root of nose, better going out in the open air. **Chronic bland yellow discharge. Yellow mucus**, abundant in morning. **Sinusitis with thick yellow, green nasal discharge. Yellowish-green discharge, worse indoors, better open air**. Nose stopped up in house, fluent in open air. Nose swollen and itching in evening. Frequent sneezing. Sneezing in sleep. Large green fetid scales in nose. Sore nasal bones. Nosebleed, before, during menses. Nosebleed from suppressed menses.

Perspiration - One-sided pains during sweat. Sweats only on face and scalp. Sweats at night, with stupid slumber. Profuse sweat in morning. Sweats during cough. Sour, musty sweat. Sweetish acid odor sweat. Sweat like musk.

Rectum-Changeable stools. Notwostools alike after fruit (Ars., Chin.). Rumbling, watery, worse at night. Obstinate constipation. Constipation with headache, irregular menses. **Constipation alternating with diarrhea**. Frequent urging, as if diarrhea would occur. Dysentery, mucus and blood with chilliness (Merc., Rheum.). Diarrhea in jaundice with sensation of heat. Diarrhea after fright. Diarrhea during or after menses. Discharge of blood from rectum even when not at stool. Pressure in rectum after stool. Burning and cutting pains in rectum during stool. Smarting of anus after stool. Blind hemorrhoids with itching and sticking pains, worse menses, lying down.

Sensations - As if beside himself. As if death were near. As if looking through a sieve. As if one had turned in a circle a long time, as **if he would fall**, as **if he** were dancing. As if in a hot atmosphere.

Chill as if drenched with cold water. As if brain would burst and eyes fall out of head, on coughing. Limbs as if bruised, as if asleep. Tongue as if burnt. Pain as from subcutaneous ulceration. As of a hot coal above ulcer.

Skin - Skin itches on being heated. Itching as from numerous fleas. Herpes zoster. Erysipelas. Moles or freckles in young girls. **Urticaria after rich food, with diarrhea**. Urticaria from delayed menses, worse undressing. Urticaria in summer. Acne at puberty. Ulcers with hard, red, glistening areola. Wounds suppurate. Pus thick, yellow, bland, too profuse. Swollen glands. **Measles with catarrhal symptoms**. Varicose veins.

Sleep - Sleeps late in morning. Wakes unrefreshed, confused. Great sleepiness during day. Irresistible

sleepiness in afternoon. Frequent yawning. Yawning during cough. Sleeplessness on account of an anxious sensation of heat. Sleeplessness from ideas crowding on mind. **"Wide awake in the evening**, restless first sleep. Talks, whines or screams during sleep. Chattering in sleep. **Lies upon back, with hands over head**, or with arms crossed on abdomen and feet drawn up. Dreams, frightful, disgusting, voluptuous, confused. Anxious dreams when lying on left side. Dreams of cats, of black beasts, of men, of falling. Sad dreams with weeping.

Stomach - Pain as from subcutaneous ulceration. Visible pulsations in the pit of stomach (Asaf.). All-gone sensation, especially in tea drinkers. Weight as from a stone, especially in morning on awakening. Gnawing, hungry feeling (Abies-c.). **Bitter taste**, diminished taste of all food. **Stomach disordered, feels heavy**. Pain in stomach an hour after eating (Nux-v.). **Indigestion from rich, greasy, fatty foods**. Worse after ices, fruits, pastry. Dyspepsia with great tightness after a meal, must loosen clothing. **Flatulence**. Heartburn. Water brash with foul taste in the morning. **Belchings, taste of food remains a long time. Hiccough when smoking tobacco**. Persistent nausea. Nausea, with colic, better after vomiting. **Vomiting after fruits, fats, pastry, ices**. Vomiting with pale face and chilliness. Vomiting of food eaten long before. Morning sickness.

Stools - Changeable stools. No two stools alike after fruit (Ars., Chin.). Green, bilious, stools. Stools resembling stirred eggs, perfectly white, yellowish white. Discharge of acrid, mucus stools, with sensation of weakness in loins, during urination. Mucus, blood, mixed with stool.

Teeth - Sensation as if teeth would be forced out. Sharp, shooting pains in teeth. Looseness of painful teeth. Toothache, better holding cold water in mouth (Coff.). Toothache from picking teeth. Toothache from abuse of quinine. Toothache better outdoors, returns on coming into room. Sore gums, with gnawing pain.

Temperature - Body hot, limbs cold. Childhood fevers, **chickenpox, earaches, measles and mumps**. Prophylactic for measles. Erratic temperature in fevers. Feverish, hot, body temperature normal. **Moaning during fever**. Attacks of flushes of heat. Fever just at sunset. **External heat is intolerable**. Intolerable burning heat at night with **distended veins**. Heat in parts of body, coldness in other. Partial sweat. During apyrexia, headache, diarrhea, loss of appetite, nausea. Chilly, yet averse to heat in **warm, stuffy rooms** with pain, on lying down at night. **Chilliness without thirst**. Chilly with pains in spots, worse evening. Chill about 4 p.m. One-sided coldness with numbness. One hand cold.

Throat - Great dryness of throat, in morning. Dry, sore throat with sense of dysphagia. Food lodges in throat. Constricted feeling about throat. Rawness and scraping. Stinging, sharp pain worse swallowing saliva or after food. As if a lump in it, when swallowing. Tough mucus in throat, worse night and morning. Hoarseness, comes and goes. Hoarseness and roughness of throat, can't speak a loud word. Nervous aphonia. Sensation of a worm wriggling up. Dilated or varicose veins in throat. As of a sulphur vapor when coughing.

Tongue - Dryness of tongue in morning. Edges of tongue feel sore as if scalded, middle of tongue feels as if burnt. Tongue feels too broad, too large. Yellow or white tongue, covered with tenacious mucus. Tongue bright red and covered with a network of dilated and congested veins. Blisters on sides and tip of tongue. Biting pain on tip of tongue. As if tongue would be torn out.

Vertigo - Vertigo caused by indigestion. Vertigo with nausea and gastric disturbances. Vertigo on stooping, with nausea. Vertigo as if intoxicated, with whirling. Vertigo with loss of sight. **Vertigo, better in open air**, worse sitting up, looking up. Vertigo before, during menses, after suppressed menses.

Vision - Diplopia. Amblyopia, with diminished hearing. Obscured vision in morning on rising, and on going into a warm room. Dim vision, as from accumulation of mucus. Dim vision, after getting warm from exercise, before menses. As if veil before eyes, worse in bright light. Loss of vision at night, as if eyes were tightly bound by a cloth, with menstrual disturbances. Day blindness with amenorrhea. Fiery circles. Bright streaks and rainbow colors.

COMMENTS - Hahnemann gave in the picture of Puls, "a timid, weeping disposition with a tendency to inward grief and silent peevishness or at all events a mild and yielding disposition. Especially when the patient in his normal health was good-tempered and mild or even frivolous and good-humored.

"It is therefore especially adapted for slow, phlegmatic temperaments, on the other hand, it is but little suitable for persons who form their resolutions with rapidity and are quick in their movements, even though they may appear to be good-tempered.

"Puls, acts best where there is a disposition to chilliness and thirstlessness. It is suitable for females when their menses come on some days after the proper time. Especially when the patient must lie long in bed at night before he can get to sleep and when the patient is worse in the evening. It is useful for the ill effects caused by eating pork." Rapid, changeable moods and desires. Capricious. Changeable and soft. Generally healthy, affectionate, loving, humble, particularly as children. Very sociable, needs attention, desires company. Exaggerated mothering instincts (opposite of Sep.). Better from consolation. Babies better from picking up, gentle rocking.

Strong fear of loneliness, often an etiology. Fear of abandonment, grief over abandonment, "forsaken feeling." Helpless feeling. Depression, insomnia, stemming from loneliness. Fear of being alone, the dark, more often in children. Fear of being unlovable.

Weeps easily, poor confidence, jealous. Self pity. Dependent, strong desire to please. Inability to make decisions. Fixed ideas, from parents, about diet, relationships, religion. Seeks stability. Can smother people in relationships, drive them away because of their neediness. Likes sex because of closeness, company.

Generally soft and fleshy. Great desire for fatty, creamy, buttery foods. Worse from fatty foods, rich foods, pastries, pork, sweets. Can have digestive problems, even nightmares, from overly rich foods. Dependency on food, eats when depressed. Emotional addiction to food, bulimia. Obligated to exercise to lose weight and to rationalize food choices.

Food cravings, but doesn't know what for. May eat too late in the evening, leading to nightmares, headaches and stomachaches. All-gone sensation in stomach, especially in tea-drinkers. Thirstless. Great dryness of mouth without thirst.

Chilly or warm blooded, but susceptible to cold, wet weather, worse sinus and menstrual symptoms. Craves fresh, open air. Will cover themselves with many blankets, then open a window to feel a cool breeze.

Loves to walk slowly outdoors, improves symptoms. Likes the seashore, walking by the ocean. Better slow, passive motion in the open air. Worse from warm, stuffy rooms. Dislike the confines of clothing. Fear of suffocating, drowning. Feels closed in.

Better lying with the head higher than the rest of the body. Worse at twilight, sad at twilight (Rhus-t., Phos.).

Measles, mumps, typhoid fevers, bilious, catarrhal intermittent, or rheumatic. In fevers, "chilly, worse by warmth, thirstless." Chilliness may be one-sided and associated with numbness. Chilliness flitting in spots, now here, now there. Heat with distended veins and burning hands that seek cool places, without thirst. Profuse sweat, may be one-sided, sour, sweetish sour or musty in odor.

"Mousey" odor, similar to measles, as well as a cough, catarrhal symptoms and rash. Ear trouble as a sequelae or complication of measles or other fever. Effects of suppressed rashes and metastases, as of mumps to testes or breasts. Prophylactic against measles (Bell.). For scarlatina, give 3c three times a day.

Pains appear suddenly and leave gradually, or tension increases until very acute, then "lets up with a snap." Characteristic wandering pains. When lying down, pain is in side on which patient is not lying, but when changing position, pain goes to the side that had been lain on before change of position. Rheumatoid arthritis. Rheumatic pains shift from joint to joint. Suffering parts emaciate. Vascular engorgement.

Congestion in respiratory system. "Pressure upon the chest and soreness." Coughing with a copious expectoration. Sinusitis. Secretions are generally thick, bland and yellowish green. Earaches (Cham.), sore throats, particularly with clinging and changeable moods. Colic, in babies. Can have a history of many acute infections and drug treatment.

Can almost be regarded as an organ remedy for the generative organs of both sexes. Gonorrhea with thick, purulent secretion. Effects of suppressed gonorrhea orchitis and cystitis, prostatitis, sarcocele, varicocele, and hydrocele. Metastasis of mumps to testes or breasts.

Useful for the sexual period from puberty to menopause, including menstruation, pregnancy, the puerperium and breast-feeding.

First serious impairment of health is referred to age of puberty, "never been well since," anemia, bronchitis, tuberculosis.

Premenstrual syndrome. Irritable before menses, weeps easily. Delay of menses in spite of evident symptoms of a flow of blood towards the uterus. Menstrual blood is black, coagulated, impoverished if menses either too early or too late. Menstrual cramps with chills and weeping. Epilepsy with absence or irregularity of menses.

Vaginitis with thick yellow or yellow green discharge, or without specific symptoms (Thuja., Nat-p.), may or may not have itching. Menopause with heat and flushing, desire for fresh air.

Weeping during pregnancy. Fears during pregnancy, that they are unloved, that no one will help with the baby. Feelings of helplessness, lead to weeping. Fear that they will not be a good mother, that something is wrong with the baby. Morning sickness with headaches, vomiting and nausea, and a large appetite. Labor pains. Ineffectual and weak labor (Caul.).

Bojanus related two cases, the first in which a girl, 18, of good constitution with no hereditary predisposition, had amenorrhea for six months and a fit occurred at the time each period was due. In the epileptic aura, she looked sad, pale as death, had chewing movements. Puls. 6c one dose a day was given. The next month, menses returned and there were no more fits.

The second case was of a robust girl, 14, with no hereditary predisposition. She had fits for twelve months. The exciting cause was the non-appearance of menses. She had one great fit per month, small fits daily. In the epileptic aura she was self willed, angry, stood on one spot, stared into vacancy, stamped her foot. In the

fit she cried, had deathly paleness, bit her tongue, urine flowed. She continued the occupation she was engaged with at the beginning of the fit. Puls. 30c one dose a day was given.

Some weeks after, she had a slight fit. A month later, menses came on for first time, she had no great fits, and small ones were rare. She was given Puls. 30c one dose a week. A month later, she had a great fit.

Puls. was then given once a day. She had no more great fits, only a few small ones. The cure was permanent. Teste noted a case of Stoerck's, in which a young girl who had amaurosis of both eyes since infancy. Stoerck cured in two months, administering an extract internally and externally a dry powder. The latter caused at first an acute pain and profuse flow of tears after which the pains, which had existed previous to the lachrymation, diminished as soon as it commenced and finally disappeared with it.

RELATIONS - Antidoted by: Cham, and Puls, antidote each other and follow each other well. If either one has over-acted the other will probably neutralize the ill effect and carry on the good. Coff., Ign., Nux-v. When the improper use of Puls, has affected the air passages, Calc-p. has proved the best antidote. **Antidote to:** Chin., Chin-s., Ferr. (in chlorotic girls who have been damaged by iron, Puls, has excellent effect). **Compare:** (1) Puls., similar effects. Cycl., Kali-bi., Kali-s., Sulph. (2) Tearfulness, Sep., Nat-m., Ign. (3) Varicose veins, varicocele, orchitis, milk leg, Ham. (4) Ophthalmia, Arg-n. (5) All-c., both have worse in room, better open air, but All-c. discharge is thin and excoriating, Puls, thick and bland. (6) Stinging pains in throat worse swallowing saliva and after eating, Apis. (7) Feeling as if food lying in esophagus, Chin., Abies-n. (8) Effect of fat food, Ip. Thuj., Carb-v. (9) Effect of ice cream, Ars., Carb-v., Ip., Bell-p. (10) Mixed diet, Nux-v., Ip., Chin. (11) Desire for lemonade, Cycl., Sabin., Bell. (12) Gastric ailments from pork, (13) Retained placenta, Canth. after-pains, Cham., Xan., Cupr. (14) Non-appearance of milk, Urt-u., Ric., Agn. (15) Uterine affections, Caul., Melon., Alet., Cycl., Hydr., Lil-t. (16) Measles, Morbill., Kali-bi. (17) Earache, Bor. **Compatible:** Ars., Bry., Bell., Ign., Kali-bi., Lyc., Nux-v., Phos., Rhus-t., Sep., Sulph. **Complementary:** Coff., Cham., Nux-v., Pen. often indicated after Puls, in later colds.

***PULSATILLA NUTTALIANA

(American Pulsatilla)

PHARMACY - puls-n. Pulsatilla nuttalliana. American pulsatilla. American Pasque Flower. Anemone Ludoviciana. Anemone nuttalliana. N. O. Ranunculaceae. Tincture of whole plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Amenorrhea. Clavus. Cold, liability to. Deafness. Diarrhea. Dyspepsia. Feet, fidgety. Homesickness. Knees, rheumatism. Liver, pains. Measles, prophylaxis. Menses, retarded. Ptosis. Rheumatism. Sciatica. Shoulder, pain. Tinnitus. Uterus, pains.

HERBAL - The American pulsatilla is more similar to Puls, vulgaris than to Puls. nig. in its botanical characters. It flourishes especially in the dry and sandy bluffs which form the bed of the Mississippi.

Hale wrote "The flower is pale purplish. The odor of the dried plant is rather faint, being slightly camphor-like, the taste of the dried flowers simply sweetish and herbaceous, that of the leaves more astringent with very slight acrimony. The taste and to some extent the odor of the fresh plant are both acrid and irritating."

A. W. Miller, a pharmacist, analyzed Puls-n. The extracted substances had an acrid, almost caustic taste and well-marked camphor-like odor. When volatilized, they produced an irritating, pungent vapor, affecting the eyes and causing sneezing.

His analysis revealed constituents including organic grape-sugar, gum, resin, an alkaloid and anemonic acid. Inorganic sulphate of potash, carbonate of potash, chlorate of potassium, carbonate of lime, magnesia and "a proto-salt of iron."

HOMEOPATHIC - Dr. W. H. Miller, an allopath, claimed to have used Puls-n. with success in many chronic eye affections, particularly catarrh, amaurosis and corneal opacities, skin eruptions and secondary syphilis.

Homesick feeling. Trembling weakness, weariness, heaviness. Great debility, on rising in evening. Languid, feverish, depressed. Snapping noise in ears. Hands constantly hot and dry. Stiffness of fingers.

Fidgety feet. Colic before and after stool. Colic after eating a pear.

MIND - Sad, gloomy, with frequent belchings. Homesick, despondent. Anxiety, at night. Irritable, quick, nervous motions. Dull, disinclined for work.

Abdomen - Dull pains in the right hypochondrium. Aching in one spot worse by moving. Aching in left groin, above left iliac crest on moving or bending. Dull pains in the abdomen, by spells in hypogastrium. Severe pain in umbilicus, 6 a.m., with desire for stool, stool dark, covered with mucus, severe pains for half an hour after. Rumbling after dinner of wind in distended abdomen moving from epigastrium to hypogastrium. Colicky pains after eating a ripe pear.

Back - Stiffness right side of neck, in the morning. Backache. Woke frequently with backache. Lameness in

back, especially loins. Weakness of loins, feeling as if menses coming on.

Chest - Sharp, stabbing pain in pectoralis major muscle, followed by burning distress. During evening, severe pain under left arm nearer back. Aching pain in chest all forenoon. Itching blotches on right breast, right side chest.

Ears - With the pains in head and eyes, frequent drawing pains in ears from within out. Hard, drawing pains along right Eustachian tube. Sharp pains in right ear and temples. Left ear feels closed, later both. Snapping noises in ears, fluttering in right. Deafness with edema of left upper eyelid.

Eyes - Neuralgic pains in eyeballs, while walking, worse right side. Dull pain deep in eyes with smarting. Dryness, smarting, profuse flow of tears. Profuse secretion of mucus from eyes. Profuse lachrymation with dull pains in eyeball extending to malar bone. Tarsal edges red, dry, irritable. Eyelids agglutinated, profuse secretion of soft, yellow or white matter. Paralysis of lids. Edema of left upper lid. Twitching of left brow and upper lid for half an hour after going to bed, right lids worse reading.

Face - Face red, hot, flushed. After eating, flushed, pressure of blood in face. Complexion at first rough, later very clear after disappearance of rash. Painful drawing in left cheekbone and jaw. Lips dry.

Female - Feeling as if menses coming on. Menses, weak, too soon (discharge, which had been formerly too dark and with pain, was this time natural in color and painless). Menses, always copious, increased to flooding and lasted three days. In morning on awaking found menses had returned first time since weaning babe (two months). Painless leucorrhea. Leucorrhea, bland but so profuse and with so great depression that the prover refused to take more of the drug although it removed a pleuritic pain. Stinging, darting pains passing through uterus from side to side.

Food - Great hunger, rapidly returned after eating. Loss of appetite. More thirst than usual, cold water extremely grateful.

Head - Dull heavy headache, in the mornings, better by active exercise before breakfast. Dull, oppressive, frontal headache, on waking. Hard pains in upper forehead pass in wave to occiput involving whole brain. Flying pains in head and feet. With headache cutting pains in the epigastrium. Hard pain over left eye, as if a nail being pressed into forehead. Pain over right eye afternoon, better walking in open air, worse in warm room with sense of heat, fullness in head and dryness of eyes. Sharp, shooting pains through both temples in right temple. Dull pain in right temple in vertex. Severe throbbing on vertex. Full, hot feeling at cerebellum. Headache arising from nape of neck and upwards.

Heart - Audible pulsation of heart. Pulse accelerated.

Kidneys - Frequent urination. Tenesmus, extending up ureters, uneasiness in kidneys. Pain on urinating, at end of urethra. Urine pale, albuminous, excess of water, skunk-like odor.

Limbs - Muscles stiff. Cramp. Nervous sensation, irresistible fidgets, worse night, with desire to urinate afternoon and at night. Legs heavy while walking, trembling weakness, nervous pains. Aching in limbs and loins wakes him frequently. Sharp neuralgic pains along sciatic nerve from hip joint to middle of thigh. Pain in both knees, rheumatic. Dull pain in ankles, flying pains. Very cold feet, evening. Frequent flying pains in hands, feet, toes. Rheumatism of right shoulder. Lameness in muscles of right upper arm. Frequent momentary pains in wrists and fingers. Hands dry and hot all day. Fingers stiff.

Lungs - Constant inclination to cough. Small sore spot in upper trachea.

Male - Distressing erection, soon subsiding. Emission. Pain in penis on waking, worse on urinating. Hard, sticking pains in left spermatic cord and testes. Dull pains in testes, worse right.

Modalities - Better walking in open air. Better from rubbing with brush, scratching. Worse coming in from open air, warmth, at night. Worse from reading, walking, urinating, after eating, eating a pear.

Mouth - Tongue coated white, covered with tough slime, red, rather dry and swollen, yellowish coat along center, unusually red after eating. Teeth indented on tongue. Breath offensive to self and others after eating. Mouth filling with saliva. Mouth and lips dry. Smarting of velum palati. On waking, dry, flat, pappy taste in mouth, as if tongue thickly coated (which it was not). Flat, bitter, rough, sweetish, bad taste. Wakes with vinegar-like acidity in mouth and dull, pressing pain in stomach.

Nose - Dryness and heat in nose.

Rectum - Feeling as if must go to stool immediately, with constant distress in lower epigastrium and umbilicus. Constipation. Sudden attack of diarrhea while riding on horseback. Stools dark, thin, pap-like, watery, light yellow, painless, mushy, dark, slightly covered with mucus, dry, hard, lumpy.

Skin - Red rash on body, face, neck, back, chest, abdomen, limbs, worse chest and abdomen. Itching, scattered pimples, right side of chest, light red, rash-like blotches on right breast, itching severely at night, worse when heated. Slight rash on back and shoulders. Elevated, blotchy eruption on legs and back. Erythema, nodules, turn white after scratching.

Intense itching all over, worse night before bedtime, better rubbing, worse riding in cold air, returned repeatedly throughout the winter.

Sleep - Sleepy, sleep not refreshing. Sleepless for an hour at 4 a.m., for several hours from over-eating. Restless with frontal headache. Many confused dreams.

Stomach - Gnawing, empty sensation. Painful emptiness, pressure, then rising towards esophagus like heartburn. Emptiness after action of bowels, after eating. Fullness in stomach preventing eating in spite of appetite. Weight and pressure in stomach after eating with faintness. Distress with severe cutting pains in epigastrium. Heartburn. Belchings, of food, hot, tasteless wind, sour air. Thick gulping. Nausea and dull headache, then faintness at stomach, on entering house.

Temperature - Chilly, with a full, uncomfortable feeling in stomach, with inclination to yawn, with papescent stool, shaking. Heat, feverish with debility, skin hot, flaccid, better cool, blustering wind. Hot face, cold feet, hands hot and feverish.

Throat - Scratchy, husky feeling in throat. Sensation of plug in lower throat. Frequent inclination to clear throat. Throat dry, smarts on waking, contains much tough mucus that is hard to dislodge. After eating, slight irritation in throat with easy expectoration of white, tough mucus.

Vertigo - Dizziness on entering house from open air, sudden in afternoon, with fullness of head.

COMMENTS - Hale instituted the first homeopathic research and Burt was the first prover. The symptoms have a strong resemblance to those of Puls, and cases cured with Puls-n. are mostly such as would be amenable to Puls.

The Puls, flying pains were very noticeable in the proving. Feeling as if needles being pressed through stomach. Heat in stomach gradually increasing to pain, worse in spots under sternum, burning, pricking burning.

The proving showed a powerful effect on the menstrual function and Hale reported many cures of amenorrhea, including the case of a young woman, formerly subject to retardation of menses. She had constant chilliness, cold hands and feet, loss of appetite, sour belchings, nausea after meals, hemicrania, toothache, melancholy, and general malaria. Menses were two weeks late, took a chill at the time they were due, when she had precursory symptoms, no symptoms of menses now.

Hale gave Puls-n. lx in water every two hours. After the first dose, the menses came on and the constitutional symptoms cleared off.

Hale also noted the case of a plethoric, usually healthy young woman, who had menses delay two weeks. Continual severe headache, a heaviness and fullness, worse moving or stooping. Sight dim, complete blindness on stooping or rising suddenly, weight in uterine region severe aching extending to back, worse evening. Hands and feet cold, weakness in lower limbs. Act. failed to relieve.

Puls-n. lx, 5 drops every three hours, brought speedy improvement. The next day menses came on profusely but without pain, two days before the expiration of the eighth week.

Hale reported the case of a strong, healthy looking man who had wandering rheumatic pains chiefly in dorsum of right foot, loins, thighs, chest, arms, head. The head pain was a dull, heavy pressure in vertex, nearly constant with occasional sharp pains.

Some fever but no local inflammation of joints or muscles. Urine scanty, depositing gravel. Acidity of stomach. Appetite good. Bowels normal. Puls-n. lx cured in three days.

A patient of Clarke's was incidentally cured of a tendency to catch colds by taking Puls-n. for some weeks as a prophylactic against measles.

Burnett cured with Puls-n. a case of deafness and edema of left upper eyelid.

RELATIONS Antidoted by: Ant-c. **Compare:** (1) Puls. (2) In fidgety feet, Zinc, Caust.

***PYRARARA

(Amazon Fish Lard)

PHARMACY - pyrar. Pyrarara. Amazon fish lard. The lard of the Pyrarara fish of the Amazon river. **Historical dose:** All potencies.

CLINICAL-Chloasma. Dermatitis. Elephantiasis. Gangrene. Leprosy. Nodules. Scleroderma. Syphilis. Tuberculosis. **Ulcers. Varicose veins.** Vitiligo. Wounds.

HOMEOPATHIC - Pyrar. has been used clinically for various skin affections, leprosy, tuberculosis, syphilis, varicosities, etc.

COMMENTS - Dr. Frederick M. Dearborn, New York, 1915, who brought some of the "lard" from South America and turned it over to Boericke and Tafel wrote, "I had curiosity enough to inquire of my homeopathic friends, while visiting Rio recently, if they knew of any 'new' remedies.

"While a number were suggested that I had never heard of, Pyrarara appealed to me because of its manifest dermal indications and because I was able to procure, through the endeavors of Dr. Theodore Gomes, a small supply of the extract, and by the courtesy of Dr. Marques de Oliveira, a genuine clinical record."

"Before proceeding to the recital of the clinical case, it might be well to mention that the use of Pyrarara is not limited to the treatment of leprosy, but has been used to relieve a number of dermatoses."

"The exact diagnoses of these conditions were hard to determine, but their descriptions would lead me to think of the tuberculosis, the syphilis, scleroderma, vitiligo, chloasma, elephantiasis, varicose vessels and the attendant dermatitis, gangosa, jaws and the varieties of gangrene. I received some positive assurances as regards its use in varicosities."

"Pyrarara is not listed in any group of Brazilian or South American remedies that I can discover and has not been scientifically proven, but I hope the following translation of Dr. Oliveira's notes may be of interest:

"The lard of the Pyrarara, a fish of the Amazon river, was brought from Acre by Major Carpenter of the Engineers, who offered it as a curiosity to Mr. Liberato dos Santos. The Major said that he had heard from the inhabitants of the Amazon valley that the lard has the property of changing the color of the plumage of parrots fed upon it, and that a person abusing the use of the fish, as a food, would develop leprosy or symptoms similar to that disease. After a talk with Mr. dos Santos, he gave me some of the lard for homeopathic experimentation on people affected with leprosy."

"The following is the result: Maria Theresa, 36 years old, has suffered from leprosy since she was 19 years old. The first appearance of the disease was on the extremities of her fingers and on her face after suppression of menstruation. She was treated by Dr. Gabizo for three years without any result and by many other doctors, using various medicines and electricity, but still no result was attained."

"The disease had reached the highest state of development; her anatomic structure had become deformed and her facial changes took away from her the appearance of a human being. Her body was covered with nodules and ulcers in constant suppuration; her ears were inflamed and deformed; her nose was ulcerated and corroded; her lips were tumefacted and ulcerated; her throat was so affected that her voice was completely lost; her arms looked like a piece of raw flesh; and the phalanges of all her fingers were destroyed. Certain areas of the skin were anesthetic and there was a general coppery discoloration."

"It was at this period that she came to me. I proposed experimenting upon her with the new medicine, which she reluctantly accepted, after many days of insisting. In June, 1905, we began our treatment, at first using the 3x trituration with a dose of three tablets every three hours applying, externally, vaseline with calendula. The first month there was no apparent dermal improvement, but her appetite increased. I then began to use the 5x potency and during the first two weeks there was a great transformation."

"Through the open lesions came an abundant discharge of a whitish color tinted with blood and very thick, and the body was covered with bullae, where there were no ulcers before, but always the same kind of discharge. Her appetite became very good and digestion regular, but she became prostrated and suffered from neuralgic pains in the head, face, and feet. During the month of August the inflammation of the lips was disappearing and the wounds of the lips healing. She was very cheerful with the result. As her sight was getting feeble, Asafoetida was given to her and the eye symptoms improved to a great extent."

"At the beginning of September the ulcers had ceased suppurating, the bullae did not appear any more and her general state was very good. As the menstrual periods came, she felt great pain in the lumbar and ovarian regions and Pulsatilla 30th was given to her and the menses appeared, although very feeble. I then gave Pyrarara in the 30x potency for a few days and she continued to improve. The nodules diminished in size and the ulcers became almost dry, with scant discharge, while the tumefaction disappeared."

"About this time Aurum met. 5th potency and afterward Apis 5x potency and Cuprum met. 5x potency were used as the symptom called for. On the following month the menses came freely. In November I returned to the use of Pyrarara 30x potency. The healing of the wounds continued and only three ulcers were to be found on the whole body, one on the forearm, on the foot, and one on the middle finger. The tumefaction gradually disappeared, except on the ears. General condition was very good. By the 25th of December one could hardly detect her sickness."

"The intense redness of her face was gone; the forehead was white, the natural color having returned; the lips, mouth and throat were normal; while the ears were still tumefacted, the nodules had disappeared; the body was free from ulcers and nodules;

the forearm completely well. Only one ulcer on the middle finger was to be found. Her organic functions were re-established, sensibility had almost returned and she could move the deformed fingers, but the sense of touch was not complete. By January, 1906, after seven months of treatment, she disappeared."

"This medication has been tried since on different people with splendid results, but lack of persistency has prevented complete cures. On the other patients the Pyrarara has been used, employing the centesimal scale

of potencies.”

REFERENCES - Anshutz.

***PYRETHRUM PARTHENIUM

(Feverfew)

PHARMACY -pyre-p. Pyrethrum parthenium. Feverfew. Chrysanthemum parthenium. Anacyclus officinarum. Leucanthemum parthenium. N. O. Compositae. Tincture of fresh plant. Tincture of dried **roots. Historical dose:** Tincture, all potencies.

CLINICAL - Convulsions. Delirium. Diarrhea. Dysentery. Fevers. Loquacity. Rheumatism.

HERBAL - Pyrethrum has bitter tonic properties like those of chamomile (*Anthemis nobilis*) and is a popular remedy in slight fevers, hence the name “feverfew.”

The Treasury of Botany noted that the smell of the whole herb is said to be particularly offensive to bees. Some popular insect powders were made of the dried flowers of *Pyrethrum roseum*.

Radix pyrethri, or Pellitory of Spain, which is used as an irritant and as a toothache cure is the root of *Anachyles pyrethrum*. The roots of the genus have a hot taste, the source of the name pyrethrum (fire).

HOMEOPATHIC - One observation was recorded with pyrethrum; a boy, 3 1/2 took 50 minims of the tincture. It nearly proved fatal, causing diarrhea, convulsions of a tetanic nature, twitchings, loquacious delirium, restless, rapid and weak pulse and profuse sweat at night.

Twitching of muscles, of limbs, subsided by morning of third day. Violent convulsions lasting an hour and leaving the child apparently moribund, but he gradually recovered.

Feet, legs and body, which were swollen, were decidedly reduced and the next menstrual period was dark and deficient in a gouty woman, age 50. She also had convulsive movements like tetanus. Restlessness. Stupor. Cooper cured cases of sub-acute rheumatism with *Pyrethrum roseum*.

MIND - Very excited, talks incessantly for hours. Lying in state of stupor, easily roused but quickly relapsing.

Limbs - Old sub-acute rheumatism of hands and small bones.

Mouth - Soreness of tongue.

Pulse - Pulse very rapid (120 to 130) and feeble.

Rectum - Tenesmus followed by involuntary evacuations of mucus, slightly tinged with blood, better next morning. Diarrhea, 5 a.m. with pain, at first profuse and exhausting.

Temperature - Profuse perspiration and restlessness at night.

RELATIONS - Compare: (1) Cham., Cina, Absin., Art-v. (2) other Compositae.

REFERENCES Clarke.

***PYROGENIUM

(Rotten Meat Pus)

PHARMACY - pyrog. Pyrogenium. Rotten meat pus. Pyrogen. Pyrexin. Sepsin. A product of the decomposition of chopped lean beef in water, allowed to stand in the sun for two or three weeks. Nosodes. Dilutions. **Historical dose:** All potencies.

CLINICAL - **Abscesses.** Appendicitis. **Bedsore.** **Bites.** **Blood, poisoning.** Boils. Bright's disease. Boils. Bones, pain. Constipation. Debility. Diarrhea. Dysentery. Eczema. **Enteric, fever.** **Fevers, high.** Fistula. **Food poisoning.** Headache. Heart, disorders. **Hectic, fever.** Hepatitis. **Influenza.** Injuries. Intestines, ulceration. **Lymphangitis.** Malaria. Miscarriage. **Offensive, discharges.** **Ovary, abscess.** **Palpitations.** **Peritonitis.** Plague. Ptomaine, poisoning. **Puerperal, fever.** Pyemia. Tabes mesenterica. Tuberculosis, lungs. Typhoid. **Restlessness.** **Septic, fever.** **Septicemia.** **Sores.** Syphilitic. Ulcers. Varicose veins. **Wounds.**

HOMEOPATHIC - John Drysdale, in 1880, was the first to suggest the use of this substance as a medicine. This nosode is prepared from decomposed lean beef allowed to stand in the sun for two weeks, or from septic pus.

Pyrog. is the great remedy for **septic states with intense restlessness.** H. C. Allen indicated that it is an anti-septic, useful in septic fevers, especially puerperal. Chronic complaints that date back to septic conditions.

For all types of **septic states when blood is disorganized.** The heart becomes weak and muscles prostrated. Hectic, typhoid, typhus, ptomaine poisoning, and diphtheria states. Dissecting wounds. Sewer-gas poisoning. Characteristic carrion-like odor of bodily emaciation, secretions and excretions. **Horribly offensive discharges,** foul, menstrual, lochia, diarrhea, vomit, sweat, breath, taste, body odor. Constipation from impacted feces in fevers, stool large, black, carrionlike. Great pain and violent burning in abscesses.

Septic fevers. Temperature rises rapidly. Quickly oscillating temperature. Fever commencing with pains in the limbs. **High fevers with sore limbs and delirium.** Threatening heart failure in zymotic and septic fevers. Influenza, typhoid symptoms. Cerebrospinal meningitis. Chronic malaria. **Rosy red streaks, lymphangitis.**

After-effects of miscarriage. **Food poisoning.**

Great heat with profuse sweat, but **sweating does not cause a fall in temperature.** Sweats without relief. Shivers and begins to move about restlessly. Cold and chilly all day. No fire will warm, sits by fire and chilly whenever he leaves it. Chill begins in back, between scapulae. Severe general chill of bones and limbs.

Aching, bruised, sore pains and prostration, yet restless. Bones pain. **Restless, must move to ameliorate the soreness of parts.** Cannot lie more than few minutes in one position, better change. **Bed feels too hard** (Bapt., Arn.), aching all over. Great muscular debility, rapid recovery in few hours. Debility in morning, staggered on trying to walk.

MIND - Sensitive, anxious, confused. Confusion of mind. Active mind, making speeches and writing articles at night. Loquacious, thinks and talks faster than ever before. Prostration of mind, mental exhaustion, brain fog. Weeping, tearful mood. Morose, sulky, cross, fretful, ill-humor, peevish. Anxiety in morning. Full of anxiety and insane notions. **Desires to be rocked.** Talks or whispers to herself in sleep. Cannot tell whether dreaming while awake or asleep. **Semi-conscious and muttering.** Stupor.

Bed feels too hard (Bapt., Arn.). **Restlessness, tossing about in bed. Restlessness and delirium with fever.** Delirium on closing the eyes. **Delirium, anxious and confused.** Delirium from sepsis.

Delusions, sees images, phantoms. Delusion that he is very wealthy. Delusions, he is enlarged, body parts were scattered about bed. Sensation as if she covered the whole bed. Feels if crowded with arms and legs. Confusion as to his identity. Sensation of duality. Feels when lying on one side, one person, and another person, when turning, on the other side. Disgust at his own body odor.

Abdomen - Distension. Full feeling of abdomen. Bloating, sore, cutting pain. Soreness of abdomen can hardly breathe or bear any pressure over right side. Sore, bruised pain and tenderness. Cutting pain. Cramping, griping pain in hypochondria. Severe cutting pains right side going through back, worse by every motion. Bubbling or gurgling sensation in hypochondria, extending back to left of spine. Rumbling, gurgling noises. Colitis. Peritonitis, enteritis. Tabes mesenterica. Pain in umbilical region with passage of sticky, yellow stool. Ileus, obstruction of bowels, impaction. Appendicitis. Hepatitis. Cholecystitis. Buboec.

Back - Weakness, tired feeling in back. Weak feeling in back, stitching pain on coughing. Coldness, chill. Sharp, shooting pain. Caries, necrosis of spine. Lumbago. Pulsation, cervical region. Throbbing of vessels of neck running up in waves from clavicles.

Breasts - Sore, bruised pain. Pains in the region of left nipple.

Causations - Chronic complaints since septic conditions. After-effects of miscarriage. Remote effects of hepatitis, diphtheria, chronic malaria. Typhoid fever, puerperal fever. Bites, cuts, dissecting wounds, blood poisoning. Ptomaine poisoning, sewer-gas poisoning.

Chest - Pain in right lung and shoulder, worse talking or coughing. Aching pain behind sternum. Chest sore, with purple spots. Oppression of chest. Severe contracting pain within lower sternum, sometimes extending to rib joints and up to throat, as if esophagus was cramped.

Cough - Cough with large masses of phlegm from larynx, worse by motion, in warm room. Coughs up yellow sputa at night. Cough, with night-sweats, frequent pulse. Cough causes burning in larynx and bronchi. Cough better sitting up, worse lying down.

Ears - Burning pains. Discharges, offensive. Ears red, as if blood would burst out of them. Ears feel cold. Pulsation, synchronous with pulse. Noises like steam escaping. Loud ringing like a bell.

Eyes - Cornea, keratitis. Sore, bruised pain. Eyeballs sore, worse looking up and moving eyes, particularly left eyeball. Swelling of eyes. Projecting eyes. Photophobia. Roughness of margins, edges of lids. Stytes.

Face - Face, burning, yellow, very red, pale, greenish, chlorotic, sunken and bathed in cold sweat. Hippocratic. Bluish around eyes. Circumscribed redness of cheeks. Hectic flush 3 p.m. to 4 p.m., lasting until midnight, then covered with large drops of cold perspiration.

Female - Fever at each menstrual period. Menses, bright red, clotted. **Menses horribly offensive, carrion-like.** Menses too short, last but one day, then a horribly offensive, bloody leucorrhoea. Genitals severely swollen (Bright's disease). Pelvic peritonitis or cellulitis. Abscess in ovaries. Abscess of left ovary, acute throbbing pain, great distress with fever and rigors. Ovaritis. Pulsating pain in ovaries. Salpingitis. **Prolapse uterus**, better holding the head and straining. Uterine hemorrhage of bright red blood with dark clots. Metrorrhagia, bright red, clotted, coagulated. Puerperal peritonitis with extreme fetor. Septicemia following a miscarriage with the **fetus or placenta retained and decomposed.** Retained placenta. **Septic infections after childbirth.** Lochia thin, watery. Lochia, acrid, offensive, bloody, intermittent. Lochia suppressed, followed by fever, chills and profuse fetid sweat. Post-operative cases with overwhelming sepsis.

Food - No appetite or thirst. Great thirst for small quantities of cold drinks, but the least liquid is instantly rejected. Better by drinking very hot water. Nausea, better very hot drinks.

Head - Excruciating, violent, throbbing headache, better bandaging. **Bursting pain with restlessness.** Great

throbbing of arteries of temples and head. Painless throbbing all though front of head, sounds like escaping steam. Dull throbbing in mastoid region. Rolls head from side to side. Skull-cap sensation. Forehead bathed in cold sweat. **Erysipelas.**

Heart - Anxiety in region of heart. Consciousness of the heart. Sensation as if heart enlarged, too full of blood. As if the heart were pumping cold water. Purring at region of heart. Cardiac weakness from septic conditions. **Threatened heart failure in zymotic and septic states.** Fluttering sensation. Heart tired, as after a long run, increased action worse least motion. **Palpitations**, worse by motion. Palpitations are increased without corresponding increase of temperature. **Pulse quick, out of all proportion to temperature or the reverse.** Loud heartbeats, audible to herself and others. Throbbing felt in head and in ears, preventing sleep.

Kidneys - Bright's disease. Intolerable tenesmus of both bladder and rectum. Urging to urinate before fever. Frequent calls to urinate as fever comes on. Urination twice a day, scanty. Urine clear like water,

Pyrogenium adhesive, red, slimy, sediment, deposits like red pepper. **Putrid smelling urine, horribly offensive, carrion-like odor.** Urine scanty, yellow after standing, cloudy with substance looking like orange peel. Urine, containing casts. Red sediment in urine hard to wash off. Albuminous urine during and after delivery, parturition. Suppression of urine, anuria.

Limbs - Soreness, better from motion (Rhus- t.). Aching in bones, all over body as from a severe cold with soreness. **Bed feels too hard** (Bapt., Am.). **Rapid bedsores of septic origin.** Great debility in the morning. Chilliness. Cold limbs. Numbness of hands, arms and feet, extending over whole body. Cramps. Pain in right shoulder, worse coughing, talking. Automatic movement of right arm and right leg, in cerebrospinal meningitis. Tingling in right little toe as if frostbitten. Feet and legs swollen (Bright's disease). Milk leg, phlegmasia alba dolens, phlebitis. Perspiration on limbs. Ulcers. Varicose ulcers on lower limbs. Panaritium. Exfoliation of nails. Nails threaten to fall off or feel loose.

Lungs - Pain in right lung, worse coughing, talking. Neglected pneumonia. Pleuritis. Empyema. Tuberculosis, last stage. Difficult breathing during sleep. Dyspnea, better open air. Wheezing when expiring. **Horribly offensive expectoration**, rusty mucus. Bloody expectoration, spitting of blood. Rusty sputum. Rattling expectoration. Thick, offensive, purulent, viscid expectoration. Abscess opens, discharging pus.

Male - Testes hang down, relaxed. Relaxed scrotum. Scrotum looks and feels thin. Prostatitis.

Modalities - Better from heat, hot bathing, hot drinks. Better from pressure, stretching, motion, changing position, hard rocking and walking. Worse cold, damp. Worse sitting, motion, moving eyes, passing flatus.

Mouth - Dryness of mouth. Horribly offensive, cadaverous, putrid breath. Taste sweetish, terribly fetid. Excoriation of mucus membrane. Sordes. Abscess of teeth, roots.

Nose - Cold feeling in nose. Obstruction, alternating sides. Fan-like motion of the alae nasi. Sneezing from uncovering. One-sided coryza. **Nosebleed with sepsis.** Nosebleed during fever. Nosebleeds, awakened by dreaming it and found it was so. Disgust at his own body odor.

Perspiration - Clammy sweats. Shivering with sweats. Great heat with profuse hot sweat. **Sweating does not cause a fall in temperature.** Sweats without relief. Profuse sweats at night. **Perspiration horribly offensive, carrion-like.** Sour smelling sweats. Disgust, up to nausea, about any effluvia arising from her own body.

Rectum - Inactivity of rectum. Constipation with complete inertia (Op.). Obstinate constipation from impaction. Constipation, stool remains long in rectum with no urging. Intolerable tenesmus of both bladder and rectum. Involuntary stool during urination. **Diarrhea with fever.** Diarrhea from excitement, emotions. **Diarrhea from septic conditions.** Painless diarrhea. Hemorrhage from anus. Sore, bruised pain. Fistula. Perspiration about the anus and perineum.

Skin - Pale, cold, dry. Dryness and burning. Unhealthy skin, every scratch festers or heals with difficulty. Small cut or injury becomes very swollen and inflamed, discolored. **Septic cuts, bites, wounds.** Abscess. Ulcers offensive, putrid, purulent, fetid, sloughing. Ulcers with bloody discharges. Varicose ulcers. **Offensive ulcers of old persons.** Bedsores during fever. **Lymphangitis, red streaks on skin.** Boils. Blood boils. Carbuncles. Scarletina. Smallpox. Purpura hemorrhagica. Obstinate varicose veins. Erysipelas. Ecchymosis. Actinomycosis.

Sleep - Restlessness. Unable to sleep for brain activity and crowding of ideas. Sleepless from fevers. **Sleeplessness, bed feels too hard.** Sleeplessness from thoughts. Kept awake by purring of heart. Seems to be in semi-sleep. **Position changed frequently.** Slept awhile, wakes to roll and tumble. **Whispering in sleep.** Cries out in sleep that a weight is lying

Pyrogenium on her. **Restless sleep from dreams.** Vivid dreams all night, of various things, of business. Frightful, anxious dreams.

Stomach - Coldness, chilliness in stomach. Stomach feels too full. Eructations sour. Belching of sour water after breakfast. **Nausea, vomiting and purging.** Urging to vomit with cold feet. Nausea, better very hot drinks

and vomiting. Vomits water when it becomes warm in stomach. Persistent, brownish vomiting, offensive smelling. Bile or bloody vomit, or like coffee-grounds. Vomiting, fecal with impacted or obstructed bowels. Vomiting with constipation.

Stool - Hard, dry stools, like small black balls, sheep dung. Knotty, nodular, lumpy stools. **Offensive, putrid, carrion-like stools.** Bloody streaks in stools. Mucus, slimy bloody stools. Long, narrow stools. **Horribly offensive, brown-black diarrhea.** Painless, involuntary stools. Insufficient, incomplete, unsatisfactory stools. **Temperature** - Chilliness with perspiration. Cold sweat over body. **Violent chill,** begins in back between scapula, felt in bones with sweat, at night. **Shivers and begins to move about restlessly.** Cold and chilly all day, no fi Temperature rises rapidly. Quickly oscillating temperature. Great heat with profuse sweat. **Sweating does not cause a fall in temperature,** re would warm, sits by fire and chilly whenever he leaves it. Cold, then hot. Quotidian fever. **Septic fevers.** Latent pyrogenic condition. Cerebrospinal meningitis. Fever commencing with pains in the limbs. **High fevers with sore limbs and delirium.** Slowly advancing hectic fever. **Fever and pulse don't match, high fever, slow pulse.** Frequent calls to urinate as soon as fever came on, urine clear as water.

Throat - Septic sore throats. Abscessed tonsils. Diphtheria with extreme fetor. Membrane, exudation, malignant diphtheria. Dry throat, difficult articulation. Hoarseness. Voice husky, weak.

Tongue - Tongue **red and dry,** clean, cracked, smooth, as if varnished. **Brown streak down center.** Red stripe down center. Cracked, fissured tongue. Excoriation of tongue. Fiery-red, glistening, tongue. Yellow tongue. Smooth, shining, glazed, glistening, glossy tongue. Large, flabby tongue, with imprints of teeth. Clean, clear tongue. Protruding the tongue is difficult.

Vertigo - Staggers as if drunk on rising in morning. Dizziness on rising up in bed.

COMMENTS - Drysdale prepared a tincture of Pyrog., which he preferred to call Pyrexin since it is not a mere fever-producer. Others have called it Sepsin, but this is too close to Septicemia, a name given to a related and perhaps identical nosode.

The provings and most of the clinical experience have been obtained from this preparation. Subsequently, Dr. Swan po- tentized some septic pus, which has also been proved and clinically applied. There does not seem to be any marked difference in their effects.

As Drysdale put it, "The most summary indication for Pyrog. would be to term it the Aconite of the typhus or typhoid quality of pyrexia," and it is likely useful wherever there is poisoning by bacterial products (e.g. in the hectic of tuberculosis). Sepsis is the essence of its action.

H. C. Allen, who published the proving and most of the cases in Med. Adv., rightly describes Pyrog. as a "Product of Sepsis." He gave the indication for its use in septic state, "When the best selected remedies fail to relieve or permanently improve," analogous to the action of Psor. and Sulph. in other conditions.

Drysdale's original cases include a number in which threatened typhoid was averted, a case of tabes mesenterica cured, and one of ulceration of the colon greatly benefited. Drysdale's success was encouraging, but as he continued to use the tincture and the lowest potencies it was difficult to keep the preparation.

The remedy did not come into extensive use until Burnett published his pamphlet on Pyrogenium in Fevers and Blood-poisoning in 1888. Burnett used chiefly the 6c dilution, which is perfectly harmless and which will keep indefinitely. Heath, who made one of the preparations used by Burnett, gave some of it to Swan of New York, who ran it up into the high infinitesimal.

Much of the American experience is with Swan's potencies, including a proving by Sherbino. Yingling collected symptoms from many reported cases and arranged them with the symptoms of the proving.

In Sherbino's proving, he was cured incidentally of a consciousness of the heart, and its working and palpitation from least excitement or anxiety, worse beginning to move, congestion to head as if a stroke would ensue. Cact. had done no good.

Sherbino cured a case of puerperal fever with Pyrog., being led to its selection by the very high pulse rate. He also had a case of relapsed typhoid, with pulse 140, temperature 102 F., both were normal in twenty-four hours.

He had a third case of a young woman, 17, with a fever and aching bones where the bed felt very hard. She had a numb, paralytic feeling. As the fever left, the pulse kept mounting up. Sherbino used Swan's potency, Pyrog. 100,000c, repeated as often as effect ceased.

Clarke had ample opportunity to observe the power of Pyrog. over typhoid fever, typhoid, and hectic states, including one of discharging abscess connected with Pott's disease of the spine.

Burnett had cases of fully developed typhoid cut short at the height by Pyrog. 6c given every two hours. In his pamphlet he included Dr. Shouldham's successful experience with Pyrog. 6c in two cases of diphtheria sore throat.

Burnett also recorded that Pyrog. 5c, five drops in water night and morning, assisted in the cure of a case of

anal fistula. Under its action a sweating at the seat, which the man had for many years, disappeared. The skin of his hands, which were subject to dry eczema, assumed a much cleaner aspect.

J. S. Hunt reported five cases of varicose ulcers, all of which healed quickly under Pyrog.

Bellairs gave Pyrog. 200c to an elderly woman who suffered for years with an ulcerated leg, which was riddled with deep, burrowing wounds, extremely painful and discharging freely. Hep., Sil., Ars., and Ham. did no good. Under Pyrog. once or twice a day, "a large boil" formed on the calf of the leg and discharged its contents after which the various ulcers healed up directly.

Septicemia (Bapt., Merc., Rhus-t., Lach., Ars., Echi.), after surgery. Septic bites, cuts, wounds, and snakebites (Led., Hyper.). Blood poisoning, from dissecting wounds. Gangrene (Sec.).

Abscesses with violent, burning pain. Abscesses in the muscles and major organs. Abscesses of the ovaries. Ruptured abscess of the lung, pus in the lungs. Ruptured organs, blood filled with pus. Septic organs, rotting away.

Septic kidney with offensive urine. Ulceration of the colon with blood and pus in the stool. Severe, acute, abdominal infections; acute appendicitis, peritonitis. Septic varicose veins. Large boils with accompanying fever.

Septic fever with pus, decomposed tissue, abscesses (Aeon, and Bell., are clean, inflammatory). Sudden, septic onset (Bapt.). Infected bite, cute or wound that lead to an infected fever. High fevers, 105-106 F.

Fever and pulse don't match, high fever, slow pulse. Throbbing pains, sudden chills, rigors. Chill felt in the bones. Cold, clammy hands. Never well since septic fever (Bapt.). Typhoid, diphtheria. Toxic flu (Ars., Nux-v.). Delirium. Loquacity. Confusion about the body, delusion of too many limbs. Feel as if their body fills the whole bed. Cannot find their body. Delusion of a man at the foot of the bed. Stagger as if drunk, vertigo. Confused, muttering, talking in a whisper.

Toxic state. All discharges and odors are offensive and fetid, diarrhea, sweat, breath, menses.

Putrid, fetid, offensiveness. Stench-like odors; cadaver-like (Kreos., Bapt.). Offensive perspiration (Merc.).

Bitter, offensive taste. Tongue is brown, yellow at the back. The tip of the tongue can be red (Rhus-t.). Constipation with black, putrid balls. Infected anal fissures with abscesses and offensive pus. Vomit of bile, blood and water, coffee grounds (Ars., Cadm-s.).

Rapid, irregular heartbeats, high pulse. Feels as if the heart is pumping cold water. Hemorrhage of dark, offensive blood with high fever, especially with pelvic infections and abscesses. Nosebleeds with offensive blood.

Uterine hemorrhage. Horribly offensive menses (Kreos.). Bloody, vaginal discharges that are offensive, no matter the cause. Septicemia after a miscarriage. For expelling a dead fetus (Sec.), beginning to decompose in the womb, with a fever. Decomposing placenta after labor.

Severe muscle aches and soreness. Restless in bed. The bed feels hard (Arn., Bapt.). Difficulty getting comfortable. Flesh feels tender and sore. Bone aches, bruised feeling (Arn.). Pains better motion. Cannot lie in the same place very long, must move (Ars.).

RELATIONS - Compare: (1) Echi., Carban., Ars., Lach., Rhus-t., Bapt. (2) Sepin. - a toxin of *Proteus vulgaris*, prepared by Dr. Shedd, same symptoms as Pyrogen of which it is the main constituent. (3) Malar., Lach. (4) In typhoid with soreness, bed feels hard, Bapt., (5) Arn., Rhus-t., better motion and stretching limbs, Rhus-t. (6) Cough worse by motion and in warm room, Bry. (7) Uterine hemorrhage, Ip. (8) Offensive diarrhea, Psor. (9) Black stools, Lept. (10) Constipation, Op., Sanie., Plb. (11) Lochia thin, fetid, Nit-ac. (12) Vomits water as soon as warm in stomach, Phos. **Complementary:** Ars., Bapt., Bry.

***PYRUS AMERICANUS

(Mountain Ash)

PHARMACY - pyrus. *Pyrus americanus*. Mountain ash. N. O. Rosaceae. The British is *Pyrus aucuparia*. Swamps and mountain woods from Maine to Pennsylvania. Tincture of fresh bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, irritation, prolapse. Chills. Clairvoyance. Dyspepsia. Gout. Heart, disorders. Hysteria. Rectum, constriction. Rheumatism. Sciatica. Tongue, paralysis. Uterus, prolapse.

HOMEOPATHIC - *Pyrus Americanus*, the Mountain Ash, was proved by Gatchell on himself, a married woman and two boys. Gatchell's only symptom was "irritation of the eyes." Another prover had a similar symptom.

By far the greatest number were induced in the woman, though hers were largely confirmed by those of the boys, and included severe neuralgic pains, and rheumatic and gouty symptoms. Labor-like or spasmodic pains were frequent in uterus, in bladder, like prolapse. Constrictive at base of lungs and around waist, like spasm of heart.

Aches in every joint, acute intense pains like inflammatory rheumatism. Pains seem to move in lines. Worse motion, dreads to move on account of joints. Feels as if full of cold water. Worse cold, sensitive to cold and air.

MIND - Brain active, intellect clear, thoughts vivid, whole being intensified. Indolent, indifferent, no inclination to read. Full of gloomy determination. Feels gloomy and discouraged but cannot cry. Sad, weeping mood, tears will come.

Hypochondriac, not nervous, lazy, would like to lie in bed and be waited on. Feels weak as if about to die, moans, groans, calls for help. Cries and feels apprehension, fears something terrible going to happen. Seems to her that fundus of stomach is depressed in abdomen and pyloric end of fire, a red spot like raw beef there as if stomach burnt up with raw whiskey.

Thinks she is clairvoyant, can read character and understand motions, see into herself. Seems to be able to go out of herself for a short distance to walk around and return into her body.

Abdomen - Feels constricted around waist, obliged to loosen clothes at once.

Back - Sick feeling under right scapula.

Chest - Feels as if lungs congested, especially at base and constricted.

Eyes - Irritation of eyes. Eyes feel as if they had been crying a long time, smart.

Female - Bearing down and pressing out as if swollen and burning all over. Sense of prolapse of womb.

Food - Craves hot tea. Wants soft food, feels as if meat would not digest.

Head - Headache begins over eyes, pains knife-like, left side of headaches terribly like a toothache. Headache extends to right side. Head feels as if it would burst. Great weight at vertex. Shooting pains in forehead. Headache penetrating in temples.

Heart - Oppression about heart as if it had stopped beating, as if going into convulsions. Sense of spasm at heart, as if blood too thick to circulate (better by Camph.). Heart aches as if from some great sorrow.

Kidneys - Irritation of bladder and urethra. Sensation as if bladder prolapsed.

Limbs - Twinging pains in arms, legs and toes. Drawing, cutting pain. Joints feel constricted and sore. Some pain in finger joints. Pains drawn, rending along backs of thighs to toes, worse left. Feels as if left leg drawn up and would never straighten again. Tight feeling of patella. Pain in knees is followed by pain in tendons and along calves. Knees and toes feel as if immensely swollen and ache. Left great toe feels as if torn from its socket. Toes burn. Unendurable aching of bones of toes.

Lungs - Can hardly breathe, as if cold water in stomach. Spasmodic breathing as of nervous women. Dry cough, as if pharynx stuffed with cotton. Hoarseness. Can't talk loudly, voice gone.

Mouth - Tongue partially paralyzed, cannot direct it.

Rectum - Sensation as if rectum were shrunk and dried up.

Sensations - As if she were outside of herself and could see into herself. As if stomach full of cold water, coldness extends up esophagus under sternum. As if rectum were shrunk and dried up. As if left leg drawn up and would never straighten again.

Skin - Clammy feeling of skin.

Stomach - Stomach feels weak as if nothing would digest, it feels dry and wrinkled. Feels as if stomach full of cold water. Thinks mucus accumulated in cold stomach. Feeling of coldness extends up sternum and esophagus.

Temperature - Chilly when air strikes him. Chilly down back and both legs. Very cold, shivering internally, thinks she must look blue. Cold creeping all over. Chilly and with a very tranquil feeling, especially of consciousness. Glow all over, hands sweat.

Throat - Throat feels obstinate.

RELATIONS - Antidoted by: Camph. **Compare:** (1) Neuralgic and gouty pains, Prun. (2) Heart, Crat. (3) Chilliness, Camph.

REFERENCES - Clarke.

***QUASSIA AMARA

(Quassia Wood)

PHARMACY - quas. Quassia amara. Quassia wood. Picrena excelsa, (Jamaica) and Quassia amara (Surinam). N. O. Simarubaceae. Tincture or cold infusion of the wood. **Historical dose:** Tincture and all potencies.

CLINICAL - Amblyopia. Ascites. Cataract. Cirrhosis. Dyspepsia. Dysentery. Headaches. Heartburn. Indigestion. Intermittent fever. Threadworms. Worms.

HERBAL - The Quassia now found in the shops in the form of "Quassia chips" is the wood of Picrena, the Jamaica Quassia. The name "Quassia" was given by Linneus to Quassia excelsa of Surinam from the name

of a healer, Quassi or Coissi, who employed its bark as a remedy for fever.

The wood of this tree was formerly employed under the name of Surinam Quassia. The wood is very bitter and yields its properties best to cold, distilled water. In the old school the infusion is used as a bitter tonic in dyspepsia, and in enemas for clearing the rectum of threadworms.

HOMEOPATHIC - Quas. acts on digestive organs as a tonic (Gent., Hydr.). Pressure and stitches in liver and sympathetically in spleen. Pain in right intercostal muscles above the liver. Seems to possess a marked action on eyes, producing amblyopia and cataract.

Abdomen - Sticking pains between umbilicus and stomach. Abdomen feels empty and retracted. Abdomen hard and distended.

Back - Sensation of coldness running over back with constant inclination to yawn and stretch out the feet.

Head - Constant dullness of head.

Kidneys - Excessive desire, impossible to retain urine. Secretion of urine increased, solid constituents diminished. Copious urination day and night. As soon as the child wakes up the bed is drenched.

Limbs - Prostration, with hunger. Inclination to yawn and stretch (Rhus-t.). Sensation of coldness over back. Cold limbs with sensation of internal coldness (Helo.). Drawing pain in calves.

Liver - Very acute sticking in hepatic region, followed by dull pain. Cirrhosis of liver with ascites.

Neck - Severe drawing pains in cervical muscles.

Rectum - Stools at first hard with great effort, afterwards pasty, once very thin.

Stomach - Dyspepsia after infectious diseases, especially influenza, dysentery. Atonic dyspepsia with flatus and acidity. Heartburn and gastralgia. Regurgitation of food.

Tongue - Tongue dry or with brown sticky coating.

COMMENTS - There is a short homeopathic proving. J. O. Muller took a single dose of the tincture, Eidherr four doses of Quas. 30x. Lembke took the extract.

The most peculiar characteristic symptoms were drawing in hypochondria and sensation as if abdomen were empty and retracted, with sensation as if he would have a stool. Stool at first hard with effort, later pasty. Sticking in liver and abdomen. Peculiar beating through abdomen, extending into limbs.

Eidherr had "coldness running over back with constant inclination to yawn and desire to stretch out the feet," which gives a clue to its action in fevers.

RELATIONS - Compare: (1) Fevers - Cedr. (2) Worms - Cina.

REFERENCES - Boericke. Clarke.

***QUEBRACHO ASPIDOSPERMA

(White Quebracho)

PHARMACY - queb. Quebracho aspidosperma. White quebracho. Aspidosperma quebracho. N. O. Apocynaceae. Tincture and trituration of the bark. Trituration and solutions of the alkaloid aspidospermine and its salts. **Historical dose:** Tincture and all potencies.

CLINICAL - Asthma. Cardiac, asthma. Cyanosis. **Dyspnea.** Emphysema. Fever. Heart, disorders. Paralysis. Pulmonary stenosis.

HERBAL - Quebracho is a Brazilian herbal remedy from which the alkaloid aspidospermine has been isolated. The alkaloid takes the form of small, very brilliant, white crystals, sparingly soluble in water, readily soluble in alcohol and ether.

Queb. removes obstruction to the oxidation of the blood by stimulating respiratory centers. Increases oxidation and excretion of carbonic acid.

HOMEOPATHIC -Shortness of breath during exertion. **Dyspnea**, respiratory paralysis, slowed heart and paralysis of limbs. Dyspnea with cyanosis. Dyspnea in tuberculosis and pleurisy. Uremic dyspnea. Asthma, cardiac asthma. Emphysema. Pulmonary stenosis. Thrombosis of pulmonary artery.

COMMENTS - Dr. Hale reported that Aspin, or Queb. is derived from the Chilean "White Quebracho" (Aspidospermine Quebracho). At Santiago de Chile, the bark is used as a substitute for chinchona as a febrifuge. The alkaloid forms salts with citric, hydrochloric and sulphuric acids.

Hale said Queb. produces in animals dyspnea, respiratory paralysis, slowed heart and paralysis of limbs. It relieves dyspnea in tuberculosis and pleurisy, but without influencing the fever.

The lx relieved asthma with livid face, and dyspnea with cyanosis is frequently relieved by it. Following this were signs of emphysema and severe attacks of asthma. Rales were heard and "pearls" of rounded gelatinous masses were expectorated. Aspin. 3x gave more relief than any other remedy.

Hale noted two cases relieved by it, one of mitral incompetence and stenosis with severe nocturnal dyspnea, the other of fatty heart (Queb. had no influence on the edema, which was removed by Dig.).

Jos. P. Cobb recorded a case of heart affection of some duration in a man, age 24. There was some heart

enlargement, especially of right side. Much dyspnea and a slight mitral murmur.

REFERENCES - Boericke. Clarke. Hale.

*****QUERCUS GLANDIUM SPIRITUS**

(Acorn Kernels)

PHARMACY - querc. Quercus glandium spiri- tus. Acom kernels. Aqua glandium quercus. Quercus robur var. English oak. Quercus pedunculata. Quercus sessilifera. N. O. Corylacee or Cupulifere. Fagaceae. Tincture of acorns are peeled and crushed or shredded. Water extract of acorns with addition of alcohol for Aqua glandium quercus. **Historical dose:** Tincture and all potencies.

CLINICAL - **Alcoholism.** Breath, offensive. Constipation. Diarrhea. Dropsy. Fistula. Giddiness. Gout. Intermitting, fever. Leucocythemia, splenica. **Liver, disorders.** Spleen, disorders. **Spleen, dropsy.**

HERBAL - Rademacher gave the tincture of acorns to an old brandy drunkard who had long suffered from the spleen, which was at times very painful and who was at that time **"sick unto death"** with ascites and dropsy of the legs. The urine at once increased, but the patient complained that each dose of the medicine caused constriction of the chest.

This led Rademacher to prepare the Distilled Spirit and finally the Aqua, as milder preparations, which they proved to be, for the remedy completely cured the patient without causing further constriction of the chest.

In the course of cures of spleen cases Rademacher noticed that not only was the flow of urine increased, there was also, especially in old spleen engorgements, an eliminative diarrhea with amelioration of the symptoms generally. A passing diarrhea often appears for a time when using it.

HOMEOPATHIC - Querc. is one of Rademacher's splenic remedies. It was introduced to homeopathic practice by Burnett, who published a translation of Rademacher's account of the remedy.

Chronic spleen disorders and **spleen dropsy.** Dropsy and liver disorders. Useful in gout, old malarial cases with flatulence. Flushed state. Vertigo, deafness with noises in head. Exceedingly nervous.

Antidotes effects of alcohol. **Desire for alcoholic drinks.** Burnett does not find Querc. a remedy for the liquor habit, it stops short at that, but it diminishes the craving and antidotes the alcoholic state.

Clarke noted that Querc. acts well in trituration of the Acorn 3x in splenic cases, flatulence, old malaria and alcoholic history. Missionaries who used Querc. on Burnett's indications in spleen disorders found it no less effective in the intermittent fevers which gave rise to the enlarged spleens.

Powdered oak bark is an excellent dry dressing for ulcers and discharging wounds.

MIND - Nervous, depressed, glum, taciturn. Easily moved to tears, not quite capable of stating his own case.

Abdomen - Pain in spleen region. Pain in hypochondria, worse left, much worse by stooping. Ascites.

Chest - Constriction of chest in précordia. **Ears** - Deafness and noises in the head. **Eyes** - Eyes yellow, puffy underneath. **Face** - Flushed.

Head - Peculiar sensation in head, feel as when drunk, sensation lasts a minute or two. Gouty eczema of scalp, poll and backs of hands.

Heart - Fluttering, irregular heart. **Kidneys** - Increased flow of urine. **Limbs** - Gouty eczema of backs of hands. Hands tremble. Dropsy tottering gait. Varicose veins.

Liver - Enlarged liver and spleen.

Mouth - Foul breath, stercoraceous. Tongue foul.

Rectum - Diarrhea. "It keeps his bowels open. " Fistula in alcoholics.

Stomach - Gnawing at pit of stomach. Flatulent dyspepsia. Removes craving for alcohol.

Vertigo - Wheeling vertigo. Vertigo with disorders of spleen and left side. Afraid to move for fear having a stroke or giddiness would come on.

COMMENTS - Burnett noted the symptom "Certain few people feel, as soon as they have taken it, a peculiar sensation in the head, lasting barely a minute or two, which they say is like being drunk." This led him to use it in the treatment of alcoholism and its effects, which he elaborated in his Gout and its Cure.

The first case Burnett noted was that of a military man, 64, broken down with gout and alcoholism and pretty severe chronic bronchitis. Heart irregular. Liver and spleen enlarged. Complained bitterly of gnawing at pit of stomach. Gait tottering, hands quivered.

He had lost his wife and had to keep himself up with nips of spirits, for which he had a constant craving. Querc., ten drops in water, three times a day, completely revolutionized his state and took away his abnormal craving for spirits.

In a merchant of 57, given to nips of sherry, Querc. threw out a gouty eczema on scalp, poll and backs of hands, which took three months to cure after which Querc. was again given and completed the cure.

An officer who drank too much had foul breath, eyes yellow, puffy underneath. Querc. cured.

A hunting man, 40, free liver, gouty, had varicose veins of legs originating apparently in enlarged spleen, left

by typhoid fever. Querc. cured. The patient said it kept his "bowels very regular."

A country squire, 60, bachelor, appeared in a hopeless condition. Was unable to state his own case. Flushed, much pain over the eyes and in both rib regions. Stooping caused great pain, worse left hypochondrium. Liver and spleen much enlarged. Nervous, depressed, glum, taciturn, easily moved to tears. Could not walk without support on account of his great giddiness.

Breath in highest degree disgustingly stercoraceous, nearly caused Burnett to vomit when examining him. That smell of breath, said Burnett is an unmistakable sign of the chronic tippler indicating undigested alcohol. Burnett subsequently ascertained that he was quite a sober man, but took frequent nips, particularly when confined to the house by wet weather.

The pain in left side, giddiness, and flushed state indicated Querc., which was given. In a week the breath was normal, giddiness a little better, tenderness of rib region much diminished. In six weeks he was quite well.

Clarke, noting that giddiness with spleen trouble is met by it, gave Querc. to a young woman for extreme whirling vertigo, an affect of influenza. The patient was greatly relieved when she took it in a severe attack, but if she took it when the giddiness was only slight it caused severe aggravation.

Patients to whom Cooper gave Querc. complained that they "felt as if in a vice, dared not move for fear of having a stroke or an attack of giddiness." "Deafness with noises in the head" is another effect observed by Cooper.

RELATIONS - Compare: (1) Ange., Nux-v. (2) Lach., Nat-m. (3) Helia., Cean. - spleen enlarged and painful.

REFERENCES - Boericke. Clarke.

***QUILLAYA SAPONARIA

(Chile Soap Bark Tree)

PHARMACY - quill. Quillaya saponaria. Chile soap bark tree. N. O. Rosaceae. Soap bark contains saponine. Tincture of the dried bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Bronchitis. Catarrh. **Colds. Coryza.** Coughs. Lung, disorders. Sneezing. Sore, throats.

HOMEOPATHIC - Quill, is most effective in the **beginning of colds, coryza**, often checking its further development. Colds with sore throat, heat and dryness of throat. Acute catarrh, sneezing and sore throat. Coughs with difficult expectoration. Squamous skin.

COMMENTS - Quill, is used herbally to loosen cough in chronic bronchitis and pulmonary complaints. The infusion of 1/2 oz of bark in 1 pint of boiling water is taken in tablespoonful doses or more as required. It is also used externally as a cleansing application to cutaneous ulcers and eruptions.

RELATIONS - Compare: (1) Kali-hp., Gels., All-c., Squil. (2) Sapo. - sore throat involuntary urination. Seneg.

REFERENCES - Boericke. Murphy.

***RADIUM BROMATUM

(Radium Bromide)

PHARMACY - rad-br. Radium bromatum. Radium bromide. Triturations. Radium brom. of 1,800,000radio-activity was employed (At. Wt. 226). **Historical dose:** All potencies.

CLINICAL - Acne. Albuminuria. Appendicitis. Arteritis. **Arthritis.** Atheroma. **Backaches.** Bones, disorders. **Burns.** Callosities. Cancer. Carbuncle, urethra. Corns. Dermatitis. Diarrhea. Duodenal, ulcer. Eczema. Epithelioma. Erythema. Eyes, disorders. Gout. Hemorrhage. Headaches. **Itching.** Leucocytosis. **Lumbago.** Lupus. Menopausal, flushes. Moles. Nephritis. Neuralgia. Neurasthenia. Nevus. Nose, disorders. Nosebleeds. Ophthalmia. Phimosis. Prurigo. Pruritus, anus. Pruritus, vulvae. Psoriasis. **Radiation, burns. Radiation, ulcers.** Rheumatism. **Rodent ulcer.** Scleritis. Skin disorders. Tic douloureux. Trachoma. **Ulcers.** Warts. **X-ray dermatitis.**

HOMEOPATHIC - Pure radium is a white metal which "oxidizes in water, burns paper, turns black on exposure to air and has the property of adhering firmly to iron." This last quality is not without significance and shows a close affinity with ferum. It is found in ore pitchblende.

The discovery of radium and its properties in 1898 by Pierre and Marie Curie set many persons thinking and among them, naturally, those who are engaged in the healing of the sick. Curie himself made the first "proving." He put a tiny bit of radium salt in an India rubber capsule and fastened it to his arm, leaving it there for ten hours. When he took it off the skin was red, the place turned into a wound, which took four months to heal, leaving a white scar the size of a shilling surrounded by discolored, puckered skin.

On another occasion he left it for half an hour. A wound appeared at the end of a fortnight and took another fortnight to heal. On a third occasion, it was left for eight minutes only, two months later the skin became red and a bit sore, but it soon passed off.

Skin and nerves are affected. Acne rosacea, nevi, moles. Cancer. Lymphoid tissue. **Ulcers due to radium**

burns, that take a long time to heal. Effects of **x-ray burns**. Effective for rheumatism and gout. Chronic rheumatic arthritis.

Severe aching pains all over with restlessness, better moving about. Nerves are affected causing suddenly shifting or electric pains, must lie down. Electric shocks through the body during sleep.

Dull, hard aching pains all over, deep in joints, very restless. Numbness, worse stretching the part. Dry burning heat, as if on fire, through the entire body, craves cool air.

Constriction of the chest, heart etc., with air hunger. Lowered blood pressure. Necrotic changes. Marked increase in the white bloodcells. Lateness in appearance of symptoms. Weakness, lassitude, tiredness. Great weakness.

MIND - Apprehensive, depressed. Tired and irritable. Cross. Easily vexed. Torpid, apathetic. Great desire to be with people, wants to have someone near. Fear of being alone, of the dark.

Abdomen - Alternating with chest or ear symptoms. Pain over McBurney's point and at location of sigmoid flexure. Colic better bending double and passing stools. Pain, violent cramps, rumbling, full of gas. Much flatulence.

Back - Aching in back of neck. Pain and lameness in cervical vertebrae, worse dropping head forward, better standing or sitting erect. Weakness between scapulae. Backache between shoulders and lumbar- sacral region, better after walking. **Lumbar and sacral aches**, pain appears to be in bone, continued motion relieves, better hot bath, worse going upstairs.

Breasts - Right breast sore, better hard rubbing.

Causations - Ill effects of x-ray, radiation burns.

Chest - Tightness of chest. Chest pain alternating with indigestion and stuffed up feeling.

Ears - Sound of rushing water, better lying on face.

Eyes - Red, smarting, worse reading. Sensation as if pieces of cotton in eyes, better rubbing.

Face - Flushed. Acne rosacea. Aching pain in angle of right lower jaw. Violent trifacial neuralgia.

Female - Itching genitals, pruritus vulvae. Aching over pubes during menses. Delayed and irregular menstruation and backache. Menses last one day, then bloody leucorrhea. Leucorrhea, white and scanty, curdy and cheesy. Uterine hemorrhage (lp.). Lochia putrid, scanty or suppressed.

Food - Nausea, better eating. Usual food not relished, sour things taste good. Craves pork. Aversion to sweets, ice creams, of which she is usually very fond.

Head - Both eyes ache. Severe pain over right eye, spreading back to occiput and to vertex, better in open air. Occipital and vertex pain, accompanying severe lumbar aching. Frontal headache. Head feels heavy. Aching pain of right lower jaw. Violent trifacial neuralgia.

Heart - Constriction. Wakes with palpitations. Pulse, rapid, irregular, fluttering. Low blood pressure.

Kidneys - Nephritis with rheumatism. Kidney irritation, albuminuria, granular and hyaline casts. Increased elimination of sediment. Bedwetting.

Limbs - **Arthritis**, aching pains, worse at night. Deep pain in joints, knees and ankles. Muscles of legs and hips sore. **Pain in toes**, calves, hip joint, popliteal spaces. Legs, arms and neck feel hard and brittle, as though they would break on moving. Cracking in shoulder. Sharp pains in shoulders, arms, hands and fingers. Arms feel heavy. Rheumatism of the hands. Dermatitis of the fingers. Trophic changes in the fingernails.

Lungs - Tightness of chest, feels as if she could not get enough air. Spasmodic cough. Persistent cough from tickling in throat pit. Cough, worse lying, smoking, better eating and open air, sitting up, exercise.

Male - Eczema of penis and inner surface of thighs. Itching. Dysuria, then erection.

Modalities - Better lying down, after sleep. Better continued motion, pressure, hot bath, open air. Better eating, cold drinks. Worse from smoking, shaving, washing. Worse getting up, warmth of the bed. Worse at night, noon, 3 a.m., 4 a.m., 7 a.m., and 11 a.m.

Mouth - Dry mouth. Breath seems hot. Metallic taste. Prickling sensation on end of tongue.

Nose - Burning in nose. Itching and dryness of nasal cavities, better in open air.

Rectum - Alternating constipation and loose movements. Stools, soft, dark or offensive, slate colored. Rectum sore, prolapsed. Itching of anus and hemorrhoids.

Sensations - As if skull too small, as if foreign body in eye, as if something dropped into trachea. Knees feel as if the bones would protrude. Intolerance of tobacco can be produced.

Skin - **Itching all over body**, burning of skin, as if on fire. Irritable, thick, moist if scratched, worse face and genitals. Erythema and dermatitis with itching, burning, swelling and redness. Eczema. Psoriasis. Small pimples. Branny scabs. Scabby on ears. Scleroderma. Callosities. Cancer. Necrosis and ulceration. Epithelioma.

Sleep - Restless. Sleepiness with lethargy. Wakes panting with palpitations. Dreams vivid, busy, of fire, which seems true.

Stomach - Empty feeling in stomach. Warm sensation in stomach. Nausea and sinking sensation, belching of gas.

Temperature - Cold sensation internally, with chattering of teeth. Internal chilliness followed by heat of the skin, associated with bowel movements and flatulence.

Throat - Dry, sore, raw with earache. Feeling in throat as from eating pepper.

Vertigo - Vertigo with pain in back of head, left when in bed.

COMMENTS - After investigating radium for ten years, Dieffenbach reported that when the provings commenced, one prover's hands had eczematous eruptions, cracks, scaly excrescences and wart-like growths as a result of X-ray and radium-ray experiments. These gradually disappeared after his proving with 6x.

This is confirmed by a case reported by Mr. E. S. Pierrepont. A girl employed in the X-ray department of the hospital with which he was connected developed dermatitis of the right hand and fingers. An ointment was prescribed without benefit, and cracks appeared on the skin. Two doses of Rad- br. 30c were given, on Mr. Pierrepont's suggestion, one in the morning and one in the evening.

The following day the patient came out in a rash, which the matron mistook for measles. Her eyes watered, fingers very sore and she felt very ill. By the following day, the rash had disappeared and she felt well. The fingers were now better and they got quite well, except that a sore feeling was left after washing.

A feature of Dieffenbach's proving was the disappearance of small nevi, which is significant as the rays are used for the destruction of nevi.

Useful for indolent and phagedenic ulcers. Sores that refuse to heal. Skin cancers, especially cancerous ulcers. Severe psoriasis. There is some history of moles and birthmarks disappearing.

Dermatitis and eczema after radiation exposure. Radium burns. Ulcers due to radiation treatment (Fl-ac.). After affects of radiation exposure, weakness, tendency to infections, where nothing else seems to work (Stront.).

Rad-br has been used in cases of lupus, epithelioma, carcinoma of the cervix uterus and urethral caruncle. There are numerous cases of skin cancers cured with Rad-br. in potencies.

T. Simpson recorded one such case. A retired officer had an intractable eruption on his genitals and the inner surface of thighs and legs that had prevented him from getting any refreshing sleep for three years. One tablet of Rad-br. 30c each morning was prescribed for a month. All conditions were vastly improved and the patient got well without further medication.

Clarke reported the case of a young, unmarried woman who, after the application of a belladonna plaster to the back for lumbago, developed an edematous rash involving the whole face and neck. It was extremely irritating, worse at night, preventing sleep.

At the back of the neck was a sore, oozing patch. After temporary relief from some remedies, there still remained an irritating, oozing rash, sore eyes, first right, then left, lids swollen, oozing from corners, lips hard, swollen.

One dose of Rad-br. 30c was given. The result was dramatic. The first night she was able to sleep, waking only once. Two days later, the rash had nearly gone and the eyes had ceased to water. In a few days all had vanished and the patient could enjoy open air.

Dr. S. L. Guild-Leggett recorded the case of a girl, 2.5 years, who had shifting rheumatism from her left foot to right knee, then to left knee, hands and toes. She had also a peculiarity about her stools, they were slate-colored, very offensive, urgent and came at noon during a meal.

Guild-Leggett used symptoms from Dieffenbach's proving: "defecation at noon, stool soft, dark or offensive, slate-color, clay-color, pains in limbs, wakes 4 a.m., pains in all joints knees, ankles, feet, could not walk, had to lie down." Rad-br. was given and cured entirely.

RELATIONS-Antidotes: Rhus-v., Tell. **Compare:** (1) Anae. - the ulceration produced by it is like radium. It may appear elsewhere than on place of contact and appear late. (2) X-ray, Rhus-t., Sep., Uran-n., Ars., Puls., Caust.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***RADON

(Radioactive Gas)

PHARMACY - rado. Radon. Radioactive gas. **Historical dose:** All potencies.

CLINICAL-Adenocarcinoma. Emphysema. **Lung cancer. Lung, disorders.** Pneumonia, interstitial. Pulmonary fibrosis. Respiratory lesions. Silicosis.

HOMEOPATHIC - Radon is a toxic radioactive gas, formed by the natural radioactive decay of uranium in rock, soil, and water. It is colorless, odorless, tasteless, and chemically inert.

Radon gas decays into radioactive particles that can get trapped in the lungs when breathed in. The primary adverse health effect associated with chronic exposure to radon is **lung cancer**. Squamous cell carcinoma.

Small cell carcinoma. Large cell carcinoma. Adenocarcinoma.

Other harmful respiratory effects associated with chronic exposure to radon include emphysema, pulmonary fibrosis, respiratory lesions. Chronic interstitial pneumonia. Silicosis.

COMMENTS - Uranium changes to different elements as it decays down to its final element of lead. All of the elements it changes into are solids except one, radon, which floats freely in the soil and is easily drawn into the lower level of homes by the natural flow of air.

Radon's primary hazard is caused from inhalation of the gas and its highly radioactive heavy metallic decay products (polonium, lead, and bismuth) which tend to collect on dust in the air.

***RAJANIA SUBSAMARATA

PHARMACY - raja-s. *Rajania subsamarata*. Amphypterygium adstringes. N. O. Anacardiaceae or Dioscoreaceae family. Tincture from the triturated and macerated bark in 80% alcohol. **Historical dose:** Tincture and all potencies.

CLINICAL - Abscesses. Anthrax. Bacillary, dysentery. Blepharitis. Boils. Colitis. Diphtheria. Encephalitis. Fevers. Mastoiditis. Measles. Meningitis. Myelitis. Typhoid. Vaccination, reactions.

HERBAL - *Rajania subsamarata* is a shrub 1.50m high, which grows in the Michoacan in the warm territories of Morelos and Guerrero. It has dioecious leaves, a trilocular herbaceous stem and the limb is cut near the top. It has six fibrous stamens, an ovary linked to the perigon tube with two to three seeds in the receptacle.

HOMEOPATHIC - De Legarreta proved the remedy, reporting symptoms of high fevers, general exhaustion. Stares, stunned, closes eyes as if to think more easily. Jaw hangs, muscles relaxed, slips into bed. No longer has the strength to speak.

Swelling of the neck and parotid region. Measles, diphtheria or whooping-cough. Epidemic spinal and cerebral meningitis. Acute post infectious encephalitis in the child. Post-vaccination encephalitis.

Circumscribed inflammation of the skin with swelling or ulceration. Congestion of the nerves and blood vessels. The diarrhea is muco-purulent and blood-streaked. Metrorrhagia of black, putrid blood.

MIND - Indifferent towards everything around him, bewildered. Loss of sense of identity. Mumbles in his delirium, weeps and sighs and speaks incoherently. Sings bawdy or religious songs. Fits of exaltation, fury and lasciviousness.

Abdomen - Hypogastric region painful, especially when speaking. Abdomen retracted into a boat shape. Rumbling and abdominal wind. Gurgling in the right iliac cavity and pain at McBurney's point. Cholera-like enteritis. Enteritis. Ileitis. Bacillary dysentery. Hemorrhaging recto-colitis.

Ears - Mastoiditis. Catarrhal discharge. Suppurating inflammation of the eardrum. Sensitive to sharp sounds. Buzzing. Sensation of blocked ear, as if full of earth. Sounds seem far off like distant train. Later total deafness.

Eyes - Eyes bloodshot. Eyes bright at first, then lusterless, as if covered with a film of gum or tears, which are burning and corrosive. The pupil is contracted and insensitive to light. Conjunctivitis. Eyelids are heavy, eyelashes stuck together. Blepharitis.

Face - Face dull, serious at first, then aspect becomes hippocratic, cadaverous. Earthy, dirty, moist.

Female - Menses ameliorate the general condition. Menses with evil-smelling blood, black and irritating. Menses with a bitter odor. Metritis. Profuse, sticky leucorrhea, causing vaginal insensitivity. Labia majora excoriated. Puerperal fever. Venereal granuloma. Ulcerous vulvar elephantiasis.

Head - Acute headache, like a nail being driven into the head. Pain in the head persisting for a long time, accompanied by anguished lamentation.

Heart - Fall in arterial tension. Sub-acute myocarditis. Pericarditis. Palpitations and diffuse pains in the precordial region. Pulse thready, weak. Heartbeat irregular, moderate tachycardia. Hears the heart beat when lying down, as if the heart were on the pillow.

Limbs - Limbs trembling and slack with convulsions. Limbs are cold, purple. Continual involuntary movements of the hands, as if seizing particles in the air.

Lungs - Chest swollen, panting and anguish. Respiration weak, becoming imperceptible. Pulmonary gangrene. Pulmonary abscess. Breath fetid.

Male - Soft canker. Ulcers. Epithelioma of the glans. Penis limp, scrotum slack. Fetid sweating, smelling of rancid cheese.

Modalities - Better from coolness, discharges. Worse from moving, speaking.

Mouth - Breath fetid, putrid, repulsive. Sticky saliva, nicotine-colored like that of a tobacco chewer. Aphthae and ulcerations which bleed at times, on the tip of the tongue. Tongue fissured with black stripe in the middle and red, excoriated edges. Teeth tarnished with yellow, then brown, deposit, despite frequent brushing. Lips swollen. Mouth open, lower jaw dropping.

Slight trismus at times.

Nose - Rhinitis. Sinusitis. Ozaena. Nose dry. Hairs inside the nose bristling, as if dusty. Attacks of nosebleed, which ameliorate. If abundant, they are exhausting.

Rectum - Constipation for the first few days, then diarrhea. Diarrhea, mucopurulent, blood-streaked, loosely bound, very fetid.

Skin - Skin rough, sticky sweat. Earthy appearance with petechiae on the chest, abdomen and on the inside of the arms. Erysipelas. Pimples, boils, suppurating abscesses. Bedsores. Varicose ulcers. Painful, purulent anthrax. Soft canker with fetid, blood-streaked discharge. Gangrenous patches. Septic gangrene. Cancerous tumors and ulcerations with blue-black edges, painful and bleeding.

Stomach - Paresis of the esophagus with difficulty in swallowing. Hiccoughs, nausea, vomiting.

Temperature - Fever high, general exhaustion. Temperature between 39.5°C and 41 °C.

Throat - Throat dry with need for liquid in order to swallow. Cold foods go down better than warm foods. External swelling of the throat and parotid region.

COMMENTS - Rajania has been used in compress form for ulcerations, diluted in water with 1% or 2% of the mother tincture.

RELATIONS - Compare: (1) Mur-ac. - Adynamic conditions, prostration, hyperthermia, deep, bleeding ulcerations. The patient is so exhausted that he falls into bed. (2) Lach. - Acute infections, adynamic condition with tendency to hemorrhage and decomposition of the blood. Loquacity, burning pains, cannot bear anything tight, cardiac failure, ameliorated by drainage, spontaneous ecchymosis. (3) Anthr. - Septic infections, burning pains, extreme prostration. (4) Bapt., Hyos., Bell., Stram. and Crot-h.

REFERENCES-Julian.

***RANUNCULUS ACRIS

(Goldcup)

PHARMACY - ran-a. Ranunculus acris. Goldcup. Crowfoot. Ranunculus acer. N. O. Ranunculaceae. Tincture of whole plant. **Historical dose:** All potencies.

CLINICAL - Erysipelas. Fever. Gangrene. Lumbago. Neuralgia. Rheumatism. Ulcers.

HERBAL - Ran-a. is distinguished from Ran- b. by its slender cylindrical flower-stalk, that of Ran-b. being furrowed. Both are common buttercups, and have acrid and poisonous properties.

HOMEOPATHIC - Ran-a. was proved by Franz and Lembke. The chief skin symptoms were observed in a woman of seventy who applied a handful of the herb to her limbs with the result of setting up violent constitutional symptoms, fever and intense inflammation, going on to gangrene of the skin of the legs.

Rheumatic pain in the muscles and joints, especially ankles and wrists. Pains when walking and at rest. Lumbar pains, worse on bending or turning the body. Heat, faintness and fever.

RELATIONS - Compare: (1) Ran-b.

REFERENCES Clarke.

***RANUNCULUS BULBOSUS

(Buttercup)

PHARMACY - ran-b. Ranunculus bulbosus. Buttercup. Bulbous crowfoot. North America. N. O. Ranunculaceae. Tincture of whole plant. **Historical dose:** All potencies.

CLINICAL - Adhesions. **Alcoholism.** Breast, pain. Cachexia. Chest, pains. Chilblains. Corns. **Delirium tremens.** Depression. Diarrhea. Dropsy. Dyspnea. Eczema. Epilepsy. Feet, pains. Gastralgia. **Hangovers.** Hay fever. **Herpes zoster.** Hiccoughs. Hydrocele. Hydrothorax. **Intercostal, pain.** Jaundice. Liver, **pain.** **Neuralgias.** Nyctalopia. Ovaries, neuralgia. Pemphigus. Pleurodynia. Rheumatism. Sciatica. Spinal, irritation. Warts. Writer's cramp.

HOMEOPATHIC - Ran-b. was proved by Franz and some effects of its external application have been observed and results of inhaling the fumes while preparing the plant or when it has been burned. The last caused headache and in one instance epilepsy, followed by cachexia, gout, headache and death.

One prover, who expressed the juice with the fingers, reported a long-lasting and recurrent eruption of vesicles on the fingers, with blue vesicles and horny scabs.

"Small, deep, transparent, dark blue little elevated blisters of the size of an ordinary pin ' s head. Crowded together in oval-shaped groups of the size of a coin with intolerable burning itching, emitting when opened a dark yellow lymph afterwards becoming covered with a herpetic, horny scurf."

Symptoms rising from the acrid vapor while the juice of the plant was being prepared included "Smarting from eyes as from smoke in evening. Smarting in eyes, nose and fauces, the eyes run and are very painful. He has to stop using them for half an hour because he cannot see anything, whites slightly inflamed, mucus runs in

torrents from nose."

Ran-b. is a painful remedy, affecting nerves, muscles, eyes, serous membranes, chest, skin, fingers toes and left side. Its most characteristic effects are upon the chest walls like pleurodynia. Hydrothorax. Fauces painful as if sore during an inspiration, less during deglutition. Hay fever.

Pains are stitching, stabbing, shooting, extort tears with shuddering, cannot rest in any position. Burning, biting, bruised soreness or as of deep ulceration. Sore, spots. Burning in small spots from sedentary living. Neuralgia. Herpes.

Bad effects of alcohol, including hiccough, epileptiform attacks, and **delirium tremens**. Spasmodic hiccough. Epilepsy of alcoholics. Weak and tottering patients, from the prolonged use of whisky, brandy or other alcoholic stimulants.

Sudden weakness and fainting. Trembling from anger. Distended feeling. Shocks throughout the whole body. Sensitive to air and touch. As of a cold wet cloth, especially on chest, worse on going into cold air.

Caustic and pain producing properties. Ran-b. forms a constituent of some arsenical plasters used to disperse cancers.

M. Jousset noted it for chronic sciatica, he applied the tincture to the heel of affected leg.

MIND-Quarrelsome, angry mood. Irritability, with pains. Anxious. Worse thinking of complaints. Restlessness at night. Obtuse intellect. Vanishing of thoughts on reflection. Stares at one point. Cowardice. Weeping in evening. Depression of spirit and desire to die.

Great fear of ghosts in evening, dares not be alone. Ailments from fright, vexation or anger. **Delirium tremens**, with hiccough. Delirium tremens, with talkative mania, unusual exertions and powerful efforts to escape from bed. **Bad mental effects of alcohol**.

Abdomen - Hypochondria bruised. **Tenderness of abdomen to pressure**. Pinching colic, alternating with chest pains.

Back - Muscular pain along lower margin of the shoulder blade. Pain extending through lower half of left chest. Burning in small spots from needlework, type writing, piano playing. Scapula adherent. Muscles of neck rigidly contracted, can speak only by moving shoulders up and down.

Causations - Bad effects of alcohol injury, fright, vexation. Cold air brings on all sorts of ailments.

Chest - Various kinds of pains and **soreness, as if bruised in sternum**, ribs intercostal spaces and both hypochondria. **Intercostal rheumatism**. Rheumatic pain in chest. **Sharp, cutting, stitching** in chest, bilateral. Stitches in chest, worse when inspiring, moving. Small sore spot as from subcutaneous ulceration in chest. **Herpes zoster**. Pleurodynia. Pleurisy, adhesions after intercostal neuralgia. **Chilliness in chest when walking in open air**.

Ears - Shootings in ears, especially in evening. Cramp-like sensation in and on ears.

Eyes - Herpes vesicles on cornea with intense pain, photophobia and lachrymation. Eyeballs sore on moving them. Hemipopia during pregnancy. Day-blindness, mist before eyes, pressure and smarting in eyes, as from smoke. Night-blindness. Lids burn. Pain over right eye, better standing and walking.

Female - Acrid and gnawing leucorrhea. Ovarian neuralgia always excited by atmospheric changes.

Food - Thirst augmented in afternoon. Feeling of hunger and rumbling in stomach early in morning. Butter tastes too sweet. Bitter, empyreumatic taste while eating or after having eaten dry food.

Head - Irritable with pains in forehead and eyeballs. Aching in forehead and vertex as if pressed asunder with nausea and sleepiness. Pressing pain in forehead from within outward. As if too large and distended. Creeping sensation in scalp.

Limbs - Crawling and tingling in fingers. Itching palms. Sudden jerking, stitching pain in forearm (right) while writing. Pain in heels as if pinched by boots.

Liver - Icteric with itching of body, especially palms.

Lungs - Anxious, oppressed breathing with desire to draw deep breath. Dyspnea from anger.

Modalities - Better from standing, sitting bent forward. Worse from open air, drafts, change of temperature, atmospheric changes. Worse damp, cold, rainy and stormy weather. Worse from change of position, motion of arms, standing, breathing, touch. Worse evening and morning. Worse after eating, alcohol. Worse from fright, vexation, anger.

Mouth - Increased saliva. Butter tastes too sweet. Crawling on palate, wants to scratch it. Cramp, spasms of lips.

Nose - Crawling and tingling in nostrils^ in posterior sinuses. Tries to relieve it by hawking and blowing the nose.

Sensations - Confusion of head as if intoxicated. As if head would be enlarged. As if head pressed asunder. Hypochondria in lowest ribs painful as if bruised. Burning in left side of chest in region of short ribs. As if a full breath could not be drawn. As of a knife thrust through side and into back. As if something tearing in chest. As

if cold wet cloths applied.

Skin - Herpetic eruptions with great itching. Vesicular and pustular eruptions. **Shingles, bluish vesicles. Burning and intense itching, worse contact.** Flat, burning, stinging ulcers. Pemphigus. Blister-like eruption in palms, itching. Fingertips and palms chapped. Horny scabs. Hard excrescences. Corns, smart or burn worse touch.

Stomach - Pains in stomach. Pressure on scrobiculus. Frequent risings. Nausea in afternoon or evening, sometimes with headache. Spasmodic hiccoughs of alcoholics.

Temperature - Chilliness, worse open air. Shivering in evening with heat in face. Heat in head with coldness in hands.

Throat - Inflammatory burning pains. Scraping, burning down the throat. Accumulation of much tough mucus in throat. Spasmodic sensation of something which ascends esophagus and passes into throat.

COMMENTS - Pains in nerves, serous membranes, muscles, tendons, joints, eyes and internal organs. The pains are lancinating, pressing and outpressing, jerking and sticking, as if bruised with external sensitiveness. Pains are sharp, stitching, shooting, come in paroxysms.

Pains are induced by atmospheric changes, sudden exposure to cold or heat, worse in wet, stormy weather, from touch, motion or turning the body. General sensitiveness to cold air and change. "Worse during inspiration." Sensitiveness to touch with a sore, bruised sensation, soreness of parts affected.

Pains particularly in the chest. Muscular pains about the margins of shoulder blades in women of sedentary employment. H. C. Allen noted burning pains in small spots from close work.

"Jerks and shocks and sudden tearings in right forearm and between thumb and index finger while writing." Writer's cramp and professional neuroses. "Pressure and smarting in eyeballs." Day-or night-blindness. Herpes. Spinal neuralgia.

White-coated tongue. Bitter, sour or sweetish taste with accumulation of saliva.

Scraping, burning in throat. Spasmodic hiccough, spasmodic feeling in esophagus and pharynx, ascending. Painful indigestion. Belchings, nausea.

Pressure on sternum with labored breathing. Violent burning in cardiac end of stomach, hunger early in morning, thirst in evening. Pains in liver and spleen region, worse by touch. In pleurisy, pleurodynia intercostal neuralgia.

Hering mentioned "hemeralopia" as having been cured with Ran-b. in a woman during pregnancy and in her three-year old son. The word "hemeralopia" has been used to denote both day-blindness and nightblindness. Hering used it in the latter (rarer) sense, for he says of the woman, she "can see well during the day."

The concomitant symptoms were "heat, biting and pressure in eyes, redness of conjunctiva and lids, especially inner surface of lower lids, lachrymation, pus in canthi, pustules on eyes. Eyes look weak, pupils dilated, candlelight appears as a bright circle, can see well during day."

In a child who was cured of ague with subsequent dropsy and hydrocele by applying Ran-b. to the wrist, ulcers of the fingers penetrating down to the flexor tendons were produced.

The "cold-water feeling" occurred in a patient of Burnett's. A woman, 30, had a fall two years before Burnett saw her and ever since had the peculiar sensation that whenever she goes out of doors she feels as if wet cloths were applied to three different parts of the anterior walls of thorax-both infra-clavicular fossae and under left breast. Never felt indoors, but constant as long as she is out.

Guided by this symptom, "Unusual chilliness of outer parts of chest when walking in open air, with the worse in open air and worse walking in open air," Burnett gave Ran-b. In two days, the patient was better; in three weeks, the sensation had completely gone and the general health very much improved.

Dudgeon reported the case of a woman, 27, who went for a drive three weeks after confinement.

The day was cold and an accident occurred to the carriage which frightened her.

In the evening she had a slight rigor and complained of pain in her left side about sixth and seventh ribs. Worse slightest movement, better sitting rather bent forward and leaning a little to the left. Pulse 120, no heat of skin. No signs of lung or pleural involvement.

Bry., and later Arn., gave no relief and for two days the symptoms grew worse. The patient had to be propped up with pillows, leaning forward and to the left. Her head rested on her breast, not daring to breathe at all deeply.

Ran-b. 1c relieved her in ten minutes, when she "felt a wrench in her side and the pain was gone." She was able to lie down, slept all night and made a rapid recovery. There were some slight returns of pain, now on one side, now on the other. But Ran-b. soon removed them.

RELATIONS - Antidoted by: Bry., Camph., Puls., Rhus-v. **Compare:** (1) Rad-a. - pain in lumbar muscles and joints by bending and turning body. (2) Rad-g. (3) Rad-r. - crawling sensation in forehead and scalp in evening in bed. (4) Rad-fl. (5) Bry., Crot-t., Mez., Euph. **Incompatible:** Sulph., Staph., Nit-s-d., alcohol, wine, vinegar.

REFERENCES - Boericke. Clarke. Phatak.

***RANUNCULUS FLAMMULA

PHARMACY -ran-fl. Ranunculus flammula. N. O. Ranunculaceae. Tincture of whole plant. **Historical dose:** All potencies.

CLINICAL - Gangrene. Ulceration.

HOMEOPATHIC - Ran-fl. produces abdominal distention and inflammation and gangrene of abdominal organs in horse who eat large amounts of it. but it is only hurtful if eaten in excess.

It promotes digestion when eaten in moderation. In a woman who applied the plant to her wrist, it produced gangrene of the arm down to the tendons and bone. Ulceration.

REFERENCES Clarke.

***RANUNCULUS FICARIA

(Lesser Celandine)

PHARMACY - ran-fi. Ranunculus ficaria. Lesser celandine. Pilewort. Ficaria ranunculoides. Ficaria verna. Scrophularia minor. N. O. Ranunculaceae. Tincture of whole fresh plant. **Historical dose:** All potencies.

CLINICAL - Hemorrhoids.

HERBAL -The "lesser celandine" is not botanically related to the true celandine, Chelidonium majus, or to the Figwort tribe (Scrophularia) although it is named Scrophularia minor in old books.

Ran-fi. is in all respects a true crowfoot except that it has three deciduous instead of five persistent sepals and nine petals instead of five. Gerarde noted that "It grows in meadows, by ditches and trenches and it is common everywhere in moist and dark places.

It comes forth about the Calends of March and flowers a little after: it beginneth to fade away in April, it is quite gone in May afterwards it is hard to be found, yea scarcely the root."

Gerarde wrote that the idea of its use in hemorrhoids was derived from the cluster of small tubers growing around the crown of the root, which bear a striking resemblance to a bunch of hemorrhoids.

REFERENCES Clarke.

***RANUNCULUS GLACIALIS

(Reindeer Flower)

PHARMACY - ran-g. Ranunculus glacialis. Reindeer flower. N. O. Ranunculaceae. Tincture of whole plant. **Historical dose:** All potencies.

CLINICAL - Cerebellum, pain. Dyspnea. Headaches. Night-sweats. Strokes. Thighs, sweat.

HOMEOPATHIC - Dr. Codde of Spoleto proved the tincture and the 3rd and 9th dilutions of this plant. It produced an enormous weight in the head with vertigo and feeling as if a stroke were impending, better from coffee. Pulmonary affections, broncho-pneumonia. Dyspnea, worse when lying down and compression of chest. Intolerance of weight of coverlet.

Influenza with an enormous weight in head with vertigo and sensation as of impending stroke. Right-sided early morning headache, better by rising. General copious night-sweat, especially abundant on thighs. Coldness of thighs.

REFERENCES - Clarke.

***RANUNCULUS REPENS

(Creeping Buttercup)

PHARMACY - ran-r. Ranunculus repens. Creeping buttercup. N. O. Ranunculaceae. Tincture of whole plant. **Historical dose:** All potencies.

CLINICAL - Back, pulsation. Coma. Eyes, disorders. Feet, weakness.

HOMEOPATHIC - Ran-r. has furrowed flower-stalks like Ran-b., but it has a spreading calyx and creeping scions.

Franz reported a number of symptoms experienced from preparing the juice of this plant, including phantasmagoria.

Jahr quoted an account of the effects of eating Ran-r. observed in a flock of sheep. Several fell down as if struck by lightning, eyes rolled, breathing hurried. Some reeled and died with heads bent towards left groin.

Great weakness in feet remained behind. Sleep, short but refreshing. Mucus membranes of eyes injected, mouth dry. Abdomen slightly distended, ruminations ceased. Bleeding worse. Some raised themselves, reeled, fell down again, bleated piteously, most were in profound coma. Ether in milk gave much relief.

*****RANUNCULUS SCLELERATUS**

(Marsh Buttercup)

PHARMACY - ran-s. Ranunculus sceleratus. Marsh buttercup. Marsh crowfoot. Celery- leafed crowfoot. N. O. Ranunculaceae. Europe, North Asia and North America. Tincture of whole plant. **Historical dose:** All potencies..

CLINICAL - Aneurysm. Anus, itching. **Blisters.** Chest, sternum, pain behind. Coms. Coryza. Diphtheria. Earache. Glossitis. Gout. Hemorrhoids. Herpes, zoster. Liver, pain. Neuralgia. Nose, ulceration. **Pemphigus.** Quinsy. Sternum, pains. Stomatitis. Toes disorders. Tongue, peeling, mapped. Varicose veins.

HOMEOPATHIC - Ran-s. has the most acidity of all the Ranunculi, causing burning in mouth, throat, stomach, chest, urethra and other parts. It causes blisters on the skin which leave a raw surface with acrid discharge. The effects of Ran-s., which German shepherds call "cold fire," on horned cattle is loss of appetite, trembling and shivering, and distention of abdominal veins. A dog poisoned with it became anxious, howled, tossed about, bent double, and was very restless at night.

Affinities for the chest, skin, vertex and right side. **Rawness, burning, smarting, gnawing or boring pains.** Overall sore feeling. Convulsive twitchings. Periodical complaints. Shortness of breath. Fainting with pain in stomach.

Burning in the mouth, throat, stomach, chest, urethra. Sensation as of a plug. Characteristic **"mapped or peeled tongue,"** with smarting, burning and rawness. **Pemphigus.**

Ran-s. cured pemphigus in a three-months old infant with continual thirst, weak intermitting pulse, trembling with anxious features. After Ars. 4c had caused improvement, Ran-s. 3c healed up the resulting ulcers.

MIND - Indolence and aversion to mental work. Sadness and melancholy in the evening.

Abdomen - Sensation of a plug behind umbilicus. Pressure as of a plug behind right false ribs, worse deep inspiration.

Chest - Integument sensitive. Bruised pain and weakness in the chest every evening.

Sore burning behind xiphoid cartilage. Face - As if covered with cobwebs.

Head - Fluent coryza with sneezing and burning urination. Gnawing pain in small spot on vertex or either temples. Biting, itching on the scalp. Frightful dreams about corpses, serpents, battles, etc.

Heart - Sensation as if a plug in heart.

Limbs - Boring pain. Gnawing in knee, left palm. Gout of fingers and toes. Sudden burning, **sticking pain in right toe.** Sudden stitches in big toes, passing into burning. Corns with burning and soreness, especially when feet hang down.

Liver - Pain over region of liver with sensation as if diarrhea would set in.

Lungs - Stitches in chest muscles, chest and sternum are sensitive to touch. Sore burning behind sternum. As of a plug forced between ribs, worse deep breathing.

Modalities - Pains better after midnight. Worse from motion, walking, letting limb hang down. Worse by touch, pressure, blows. Worse deep breathing, open air. Worse evening, after midnight, morning. Worse after a meal.

Mouth - Burning and rawness of tongue. Tongue cracks and peels off, denuded patches. **Tongue mapped.** Mouth sore and raw. Teeth and gums sensitive. Blunt teeth with toothache.

Nose - Fluent coryza, with sneezing, with burning urination.

Skin - Vesicular eruption with **tendency to form large blisters. Acrid exudation,** which makes surrounding parts sore.

Sensations - As if head were too full and too large. As if a plug were lodged in umbilicus. Pressure as from a dull instrument. As if diarrhea would set in. As of a needle thrust deep into big toe. With pains in stomach there is fainting. Convulsive twitches of limbs. Gnawing and boring sensations.

Skin - Yellow vesicles. Bullae with acrid contents. Pemphigus.

Sleep - Dreadful dreams of dead bodies, snakes and fights.

Stomach - Nausea worse after midnight. Pain with fainting.

Throat - Burning scraping in throat.

COMMENTS - External sensitiveness, especially of chest and sternum. Chest disorders, including aneurysm. Arrest of breathing. Pains in liver, spleen, chest or heart, worse on deep inspiration and associated with external soreness.

Most of the symptoms are right-sided, but there is one left-side symptom that is peculiar: continual gnawing in left palm. The right toes, especially the right big toe, are the seat of many acute pains, giving the remedy a high place in acute attacks of gout and painful corns.

Mahoney cured with Ran-s. 3c an aged woman subject to gout aching in dorsum of feet, especially the right, with wakefulness at night. Kali-c. 30c had previously removed pain passing downward over the glutei.

RELATIONS - Antidoted by: Puls. Wine and coffee antidote only partially. The ulcers were somewhat relieved by Peruvian Balsam. **Compare:** (1) Ran-b. - Ran-s. more irritative. (2) Headache, gnawing in small spot at vertex, Puls. (3) Mapped tongue, Nat-m., Ars., Rhus-t., Tarax. (4) Ran-s. has more burning and rawness than any. (5) Cobweb sensation, Am-c., Bor., Brom., Bry., Calc., Con, Graph., Mag-c. **Follows well:** Ars. in pemphigus. **Followed well by:** Lach, in diphtheria with denuded tongue.

REFERENCES - Boericke. Clarke. Phatak.

***RAPHAM SATIVUS

(Black Garden Radish)

PHARMACY - raph. Raphanus sativus. Black garden radish. Wildradish. Raphanus raphanistrum. N. O. Cruciferae. Tincture of fresh root immediately before flowering in spring. Tincture of whole fresh plant.

Historical dose: Tincture and all potencies.

CLINICAL - Abscess. Alcoholism. Amblyopia. Axilla, inflamed. Breast pains. Catalepsy. Coughs. Diarrhea. Emaciation. Esophagus. Faintness. Fevers. Flatulence. Flushings. **Gas, pains.** Headaches. Heart, disorders. Heel, pain. Hernia. Hysteria. Insomnia. Intoxication. Lienteria. Liver, affections. Menorrhagia. Metrorrhagia. Myopia. Nosebleeds. Nymphomania. Palpitation. Pemphigus. Seborrhea. Tonsillitis. Toothache. **Tympanitis.** Vomiting. Yawning.

HOMEOPATHIC - Nusser proved both the garden radish and the wild radish (the former probably only a cultivated variety of the latter). He took tinctures of the long, round and black (the favorite in Germany) varieties of garden radish, and ate the different radishes themselves.

Raph. affords a marked example of a common article of diet being at the same time a poison and a medicine. The symptoms are from effects of eating radishes and provings by Curie made on a woman with 15c and 30c dilutions. The symptoms will not appear if salt is used with the Radish.

Cooper wrote "A man, has these symptoms whenever he eats even a single radish: "Burning sensation in epigastrium, followed by hot belchings, lasting a whole day and ending in a headache." Turnips (*Brassica rapa*) produce in him a similar effect, but in less degree.

Raph. produces in provers hysterical, mental and uterine symptoms. Numbness, changing places. Coldness of one foot. Can only lie on back. Seborrhea with greasy skin. Pemphigus. Stopped sensation in ears. Teeth feel as if made of paper.

Produces pain and stitches in liver and spleen. Increases of bile and salivary secretion. Globus, as of hot ball from uterus goes up to the throat. Appetite without hunger 4 a.m. in bed. Drinks more than one urinates. Urine thick like milk.

Great accumulation and incarceration of flatulence. Retained flatulence, cannot be passed up and down. **Post-operative gas pains.** Loss of vision and hearing just before vomiting. Vomiting of fecal matter.

Hysteria, chilliness in back and arms. Epilepsy, reflex from removal of an adherent prepuce, the healing being delayed by furious priapism. Sexual insomnia. (Kali-br.) Nymphomania.

The leaves of Raph. are said to antidote its roots, and the arum root is said to antidote the effects of radish leaves.

MIND - Forgetful during menses. Hysteria during first day of menses. Brain excitement. Extreme anxiety with feeling of impending

death. Fear of becoming a burden. Anguish with fear of death, which is supposed to be near.

Capricious, stupefaction, sadness, tears. Hopefulness alternating with sadness. Weeping on waking. Sadness with aversion to children. Aversion to her own sex and children especially girls. Dread of men. Nymphomania. Sexual insomnia.

Delusion she has an unrecognized disease. Fancies herself talking. Delusion of being in different places. Sense of intoxication. Alcoholism.

Abdomen - Distended. **Tympanitis, no flatus emitted upward or downward.** Gripping about navel. Retching and vomiting, loss of appetite.

Back - Weak back. Burning, itching on the back. Acute pains in coccyx, as if an abscess forming. Cracking in nape of neck. Numbness of muscles of neck near left ear, coldness in left eye.

Chest - Pain in chest extends to back and throat. Heavy lump and coldness in center of chest.

Ears - Tearings and shootings in left ear. Lancinations in right ear. Itching in concha of left ear, which is painful to the touch. Loss of sight and hearing just before vomiting.

Eyes - Eyes filled with blood, sight lost. Edema of lower eyelids. When she turns her eyes in the direction of the ear she feels a pain in the ear, temple and parietal bone.

Face - Face, red, somber. Cheeks burn, are red, whole head and face red. Face disfigured.

Female - Menses very profuse and long-lasting. Nervous irritation of genitals. **Nymphomania**, with aversion to her own sex and to children, and sexual insomnia.

Head - Headache, brain feels tender and sore. Headache after dinner. Severe headache in temple, eyes and root of nose. Aching above root of nose. Dull pain in occiput, better by throwing head back. Gnawing in occiput followed by numbness. Sharp pains in vertex. Tightness in skin of vertex. Sweat on head after rising.

Kidneys - Urine scanty or else more in quantity than the drink swallowed. Urine more copious, thick like milk. Turbid urine with yeast-like sediment. Pale urine of a dirty yellow.

Limbs - Weakness and bruised feeling in limbs. Trembling of limbs. Sticking pains in left shoulder. Gland in right armpit, swollen and tender to touch. Numbness of soles and buttocks. Cramp in calf, at night in bed.

Modalities - Better walking in open air. Throwing back head ameliorates pain in occiput. Worse at night, morning on waking, 3 a.m. to 4 a.m. Worse eating or drinking. Worse from touch, jarring. Motion aggravates pain in belly. Laughing causes a cough. Cough causes painful shock in brain, efforts to vomit, pain in chest. Riding in carriage causes pain in heart. Pain in heart worse after breakfast.

Nose - Nose pointed. Dull pain in root of nose extending to occiput. Pressure, as from a weight, on back of nose. Breath feels burning hot in nose. Stoppage of nose. Mucus in posterior sinuses. Frequent sneezing or at least frequent want to sneeze. Nosebleed of deep red blood. Smell of horseradish.

Rectum - Stool liquid, frothy, profuse, brown, with colic and pad-like swelling of intestines. Vomiting of fecal matter.

Sensations - Sensation of stiffness. Sensation of an iron band around waist. Swelling of abdomen. Hot breath, hot belchings. Sensation of a number of balls rising from abdomen to throat. Sensation of a hot foreign body like a ball going up from uterus to throat. Numbness in hands in soles of feet and buttocks of the parts near the painful bones. Sensation of swelling of bones of hands, arms, eyes, yet feet feel small.

Skin - Skin greasy. Painless pemphigus. Itching and heat of skin, fever, pimples under skin. Itching of whole body, scratching causes burning.

Sleep - Nervous yawning. Inclination to sleep. Sleep with dreamy reveries, lascivious dreams.

Stomach - Pains in stomach, which urge

continual eating. Burning in epigastrium, followed by hot eructation. Putrid belchings. Black vomit. Vomiting of fecal matter.

Throat - Hot-ball feeling from uterus to throat, stopping there. Heat and burning in throat.

Vertigo - Vertigo with loss of vision. Vertigo with dim sight in evening, head feels tightly bandaged.

COMMENTS - The hysterical, mental and uterine symptoms of Curie's prover were very well marked, including a state approaching catalepsy: "On returning a little to herself she was unable to speak or stir."

"Globus" symptoms. Sensation of a number of balls ascending from abdomen to throat. Sensation of a morsel, too large to be swallowed, sensation of something hard to digest, leaving an empty sensation with hunger.

Constant, violent thirst. "Drinks more than he urinates." "Pains more severe when he drinks liquid." Pressure in hypogastrium as if a hernia would protrude. Flatulence. Accumulation of gas almost stops the breathing, cannot be passed either up or down.

Hot, foreign body goes up like a ball from uterus and stops at the beginning of the throat. Nymphomania. Aversion to her own sex and to children, especially girls.

Cough, causing jarring of head and chest, seems to come from epigastrium. Low cough to loosen phlegm. Expectoration of a large amount of tenacious white mucus from pharynx and esophagus, with sensation of stricture in throat.

Pain in vertebral column as if a foreign body passed through it from top to bottom and was stopped at certain points by obstacles causing pain. Pains in the back on swallowing. On breathing, pain under breasts and in back. Heavy lump and coldness in center of chest between breasts, preventing sleep.

Acute pains in coccyx, sensation as if an abscess forming. Sensation as of an abscess in liver. Throbbings in the body that became lacerations. Chilliness along the back and posterior surfaces of arms. Icy cold knees. Sensation as if she had put her cold feet into very hot water. Fever sensation, as if a cold coming on.

E. T. Blake reported two cases of sexual insomnia cured with Raph., one of which shows that Raph. has an influence on the male sexual sphere analogous to that it has on the female.

A young man suffering from reflex epilepsy had a generally adherent prepuce removed. Healing was delayed by furious priapism, which caused dragging at the sutures. Raph. lx given each night cured.

Blake's second case was in a woman of 40 with old pelvic troubles. Orig. had failed and Plat. had helped only slightly. Raph. cured.

RELATIONS -Antidoted by: Copious draft of cold water (Milk and water worsen the pains in abdomen).

Compare: (1) Mom-b. - Worse near splenic flexure. (2) Carb-v, Anae., Arg-n., Brass. **Follows well:** Lyc., Coch., Brass., Cheir., Thlaspi., Matth., Sin a.

*****RATANHIA PERUVIANA**

(Rhatany Root)

PHARMACY - rat. *Ratanhia peruviana*. Rhatany root. Mapato. *Krameria triandra*. Pu- macuchu. N. O. Polygalaceae or Leguminosae according to some. Tincture of the dried root **Historical dose:** Tincture and all potencies. Locally, the Cerate has proved invaluable in many rectal complaints.

CLINICAL - **Anus, fissures. Breast, fissures.** Breast pain. Breath offensive. Constipation. Diabetes. Dysentery. Dyspepsia, atonic. **Fissures.** Gonorrhea. Hemoptysis. Hemorrhages. **Hemorrhoids.** Hemoptysis. **Hiccoughs.** Hydrothorax. Itching. Metrorrhagia. Miscarriage. Metrorrhagia. **Nipples, fissures.** Nosebleed. Pimples. **Pinworms.** Pleurisy. Pterygium. Scurvy. Snoring. Speech, arrested. Stomach, disorders. Throat, contraction. Tinnitus. **Worms.**

HERBAL - *Ratanhia* is remarkable for its entire, ovate, acuminate leaves, covered on both sides with silky hair; it is one of the species most known as yielding the Rhatany root of commerce. All the species ***Ratanhia peruviana*** of *Krameria*, as far as known, are intensely astringent. The root of several species of *Krameria*, especially *Krameria triandra*, is used to make the remedy.

The Treasury of Botany noted that the infusion of the root is blood-red, and has a history of being used to adulterate port wine. The infusion has been used as a gargle and wash, and the powder, mixed with charcoal, forms an excellent tooth-powder.

In Peru, an extract is made that is a mild, easily assimilated astringent medicine, useful for passive, bloody or mucus discharges. As a tonic, it is used for the weakness of digestive organs and muscular debility, and restores tone to relaxed parts.

Ratanhia is useful for delicate and nervous women, and to prevent miscarriage in those with a history of it. Can arrest passive hemorrhages. Styptic action, astringent. Used in intermittent and putrid fevers.

HOMEOPATHIC - Teste put Rat. in his Sulph. group. He wrote, of its pre-homeopathic use, "There is perhaps no plant the properties of which have been so well indicated by chance as this."

Anal and rectal symptoms have received a great deal of clinical confirmation. **Pinworms.** Various forms of incontinence of urine. Mucus discharges, such as chronic catarrh of the bronchia, vagina, large intestines, etc.

Violent hiccoughs.

Hemorrhages, passive. Nosebleed, hemoptysis and metrorrhagia. Cracks, fissures. **Cracked nipples** (Graph., Sil.). Chronic edema of the skin. Scurvy. Pterygium.

Weakness and prostration with anxiety and sweat over whole body. Pains are here and there. Shooting pains, as from excoriation. Jerking in different parts. Sense of constriction. Dark thin scrawny persons.

MIND - Irritable, peevish and quarrelsome humor. Changeable mind. Depression when alone, better in company. Desire for company. Fear something will happen when alone, better conversation. Anxiety at night on waking. Starting from sleep. Desire to die during pains.

Abdomen - Gripping in lower abdomen, externally violent itching. Heat and burning sensation in epigastrium. Repeated violent sticking in hypochondrium. Pinchings in abdomen and sides of abdomen, sometimes with a burning sensation. Pullings and a sensation of coldness in umbilical region. As if abdomen had been cut to pieces, worse deep breathing. Movements in sides of abdomen as of something alive.

Back - Tearing in nape of neck with heaviness of head. Stiffness in nape on turning head, better on violent motion. Drawing tension from nape of neck to the bottom of spine. Bruised pain in whole spine. Bruised pain in loins and hips, morning rising, better on motion.

Breasts - Fissure of the breasts. **Cracks in nipples** in nursing women.

Chest - Painful constriction in both sides of chest. Sticking, burning, cutting pains. Burning stitch in last ribs near back, on stepping. Rush of blood and heat to chest with difficult breathing. Violent pressure in chest as from a stone, with short breath on slight exertion. Ulcerative pain in chest during and after coughing.

Ears - Tearing, itching and shooting in ears. Violent stitch in right ear. Crawling as if insect in right ear. Chirping in right ear. Nocturnal tinkling and ringing in ears.

Eyes - Pains in eyes as if compressed in a vice and could not be moved. Inflammation of sclera. Contractions and burning sensations in eyes, especially in evening. Agglutination of eyes at night and lachrymation in morning. Jerks and quivering of eyes and eyelids. Very rapid twitching of eyelids. Stiffness of upper lids with soreness of upper tarsal edges. Pterygium. White spot before eye, which obstructs the sight with constant urging to wipe the eyes. Vision dim for distant objects. Myopia.

Face - Heat in face. Burning vesicles on the red part of upper lip. Tearing pain in face and jawbones. Violent tearing in left malar bone, evenings. Tearing in left side of lower jaw and corresponding teeth. Tearing in inner surface of lips in

a small spot. Sensation of cobwebs above right side of mouth.

Female - Menses suppressed with swelling of abdomen and breasts, simulating a pregnancy of several months with profuse leucorrhea and kidney pain. Menses delayed. Menses too early and of too long duration and too copious, with pains in abdomen and loins. Metrorrhagia. Pressure in groin, as of a general bearing-down pain towards genital organs, followed by leucorrhea. Leucorrhea with itching in rectum and discharge of bloody mucus. Miscarriage. Compelled to get up at night and walk about during pregnancy, with toothache.

Food - Thirst in evening. Constant desire to eat. Anorexia with dislike of food and drink.

Head - Bursting headache when straining at stool or after stools. Bursting in head when sitting with head bent forward. Pain in middle of forehead, as if brain would fall out, while straining at stool. Long-lasting headache, as if screwed in a vice. Dullness of head, as if intoxicated. Sensation as if scalp from nose to vertex were stretched. Itching of scalp, not better by scratching.

Heart - Sharp sticking in precordial region, rather external. Full pulse.

Kidneys - Frequent and urgent want to urinate with scanty emission. More frequent and more abundant emission of urine, even at night. Pale urine. Urine more scanty, deposits a cloud and becomes turbid. Burning in urethra and root of penis when urinating.

Limbs - Tearing in limbs. Tearing in shoulder, arms, forearms and wrists. Contraction of flexor muscles. Spasmodic and painful contractions in elbows and fingers. Pain in bend of elbow when flexed, better extended. Jerking, tearing and stitches in thumbs. Drawing and tearing in thighs, knees, legs, feet and toes. Tension and burning sensation in thighs. Tearing from left Achilles tendon, up the leg. Sticking and burning tearing in left big toe. Tickling on heels on soles. Voluptuous itching in left sole.

Lungs - Malaise with frequent yawning, repeated and labored attempts to draw a long breath and distressing constriction across chest. Dry cough with tickling in larynx and pain of ulceration in chest. Some tight mucus evacuated with great difficulty.

Male - Chronic gonorrhea. Burning in root of penis while urinating. Itching in scrotum, not better by scratching.

Modalities - Better from hot water applications, hot bath, cool bathing. Better walking in open air, exercise. Pressure ameliorates pain in chest. Worse from anxiety, uneasiness of mind, at night. Worse exertion, touch, sitting bent over, stooping, straining at stool. Eating aggravates, better emission of flatus.

Mouth - Offensive breath. Dryness of mouth at night. Tasteless water collects in mouth. Acid blood from gums on sucking them. Tension and burning sensation at tip of tongue. As if cool air came from teeth. As of a cobweb about the right side of the mouth.

Nose - Itching in nose. Violent itching on tip of nose, better by rubbing. Nostrils inflamed and scabby with burning sensations. Dryness of nose with frequent sneezing. Dry coryza with complete stoppage of nose. Violent nosebleed, three times a day, for five days in succession.

Rectum - Constriction or as of sharp splinters of broken glass in rectum. Dry heat at anus with sudden knife-like stitches. ***Fissure of anus with great constriction, burning like a fire.*** Hemorrhoids burn like fire, temporarily relieved by cold water, protrude with straining. Stool is forced with great straining and followed by prolonged aching and burning, better hot water. Fetid, thin diarrhea, stools burn, burning pains before and after stools. Discharge of blood from rectum with or without stools. Oozing at anus. Dry, itching anus. ***Pinworms*** (Sant., Teucr., Cina.). Ascarides.

Sensations - As if intoxicated. As if head in a vice. As of a white speck before eyes, skin before eyes. Eyelids feel stiff. As if coldness rushed out of molars. As of

Ratanhia peruviana cobwebs about right side of mouth. As if abdomen or chest cut to pieces. Movement as if something alive in abdomen. As if rectum and anus were all twisted up. As if splinters of glass in rectum and anus. As if rectum protruded and then suddenly went back with a jerk. Jerkings and quivering. Right side is most affected.

Skin - Sickly looking skin. Small red and white pimples that do not suppurate, especially between shoulders and on loins. Pimples, itching and burning after scratching. Formication and itching eruption on back. Itching in nape and between scapula, on scrotum, front of thigh, bends of knees.

Sleep - Disposition to sleep, especially after dinner. Violent yawning. Retarded sleep. Snoring. Frequent waking and prolonged wakefulness. Waking with a start, with trembling inquietude and fear. Dreams of battles, sick people, quarrels, anger, vexation, funerals, death of friends, and earthquakes.

Stomach - Stomach feels too full. Sudden painful bursting in pit of stomach. Pains as from ulceration in stomach. Heat and burning sensation in stomach. Cutting like knives or griping pain better belching. Empty belching with taste of food. ***Violent hiccough***, which causes pain in stomach. Long-continued hiccough after dinner. Nausea and disgust with retching and vomiting of food, worse in open air. Vomiting of water, of mucus streaked with blood.

Teeth - Toothache in evening, especially after lying down, compelling one to rise and walk about. Toothache

with tearing or jerking. Digging pains. Pulsative pain in teeth. Bleeding of teeth. Painful sensation of coldness and elongation in the molars and as if coldness rushed out of them. Violent pain in incisors, painful to the touch.

Temperature - Predominance of coldness and shivering, especially in evening. General chill 8 or 9 p.m. Chilly even in warm room. Heat of whole head with heaviness. Heat and puffiness of face. Dry heat in anus with cuttings. Nocturnal perspiration. Wakes 1 a.m. with sweat, thirst and dry mouth.

Throat - Sore throat, generally felt during empty swallowing. Painful spasmodic contraction in throat, which stops the voice. Unable to speak a loud word.

COMMENTS - Teste quoted from Trousseau and Pidoux a case in which Bretonneau cured a fissure of the rectum. In the case, a woman suffered from constipation and fissure of the rectum that caused her horrible pains and had damaged her health. Bretonneau ordered a daily injection mixed with one-fourth of Rat. and in a short time the constipation and fissure were cured.

Other similar cases were also cured and the treatment was shown to be successful in cases of fissure without constipation. One patient of fissure, cured by Rat., was better by an application of hot water, he sat in a sitz-bath as hot as he could endure, the relief only lasted while in the bath.

The provings of Hartlaub and Trinks bring out the keynotes of Rat. in rectal cases: "straining, stool so hard she cried out with great protrusion of hemorrhoids, followed for a long time by burning in anus."

Burning in the anus, persists for a long time after the stool and it occurs when the stool is diarrhea as well as hard. Burning also precedes and accompanies the stool. Dry heat with sudden stitching, like knife-stabs.

Oozing at anus. Dropping of blood from anus. Anal fissures (Graph., Nit-ac., Sil.). The anus and rectum feel as if they're sitting on glass. Hemorrhoids with severe bleeding and burning pains. Worms with severe itching.

Bursting headache that accompanies and follows a straining at stool. "Pains in middle of forehead, as if brain would fall out," and a similar pain after stool. Head pains are worse on bending forward. Violent nosebleed.

Burning, smarting of the eyes. Obscured vision. Inflammation of the whole eye, a membrane seemed to extend to central point of eye, which burned. Pterygium. Twitching of lids.

Bleeding gums, toothache, worse lying down. Aching molars with a sensation as

if coldness rushed out of them. Toothache during pregnancy, compelling the patient to get up at night and walk about. Tasteless water collects in mouth.

Contractive sensations in stomach, groin, anus, eyes, neck, muscles, throat, "painful spasmodic contraction of throat during which she could not speak a loud word." Causes and prevents miscarriage, metrorrhagia and leucorrhea. Fissure of the breasts or nipples in nursing women.

Dr. Toumel, who, no doubt, did not suspect that Ratan. produced abortion, had the idea of prescribing it as a tonic in cases of incipient miscarriage and thus preventing that accident in delicate and nervous females who had never yet been able to go their full time.

Rummel related the case of a servant girl who had rapid twitching of the lids of right eye to such an extent as to hinder her seeing. There seemed to be also a rotary motion of the ball. Bell, and Calc, failed to relieve. Rat. 12c relieved quickly.

Cushing, who made a proving of Rat., said it caused great itching in the rectum and he has cured with it since nearly every case of pin-worms in his practice. Cushing considered that, next to Sang-n., Rat. meets more rectal cases than any other remedy.

In an old and feeble woman, he cured with Rat. 3x internally and a Rhatany rectal suppository each night. There were frequent discharges of mucus, blood and pus from the bowels night and day with great pain and burning in rectum almost wholly preventing sleep.

RELATIONS - Compare: (1) Pleurisy, Seneg. (2) Fissure of anus, Nit-ac. (3) Anal symptoms, Sulph., Iris-v., Canth., Peon. (4) Graph, is similar, but has not the constriction of Rat. (5) Splinters of glass in rectum, Thuj. (Sticks, Aesc.). (6) Pain in head from straining at stool Ind., Puls., Sil. (7) Hiccough, Cycl. (8) Burning on tongue, Raph., Ran-s., Sang. (9) Toothache of pregnancy, Raph., Mag-c., Cham. (10) Alive sensation, Croc., Thuj. (11) Cobweb sensation, Ran-s., Bar-c. **Follows well:** Sulph., Bov., Sep. in uterine affections (Teste).

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***RAUWOLFIA SERPENTINA

PHARMACY - rauw. Rauwolfia serpentina. **N. O.** Apocynaceae family. Java and India. Containing, among others, the alkaloid reserpine. The tincture is prepared from the root. **Historical dose:** Tincture and all potencies.

CLINICAL - Addison's disease. Angina pectoris. Basedow's disease. Colitis. Dystonia. Hypotension. Pancreatitis. Parkinson's disease. Thyroid, disorders. Vasomotor complaints.

HERBAL - Rauwolfia serpentina, found in Java and India, belongs to the Apocynaceae family. A very old drug

in Ayurvedic medicine, the roots and rhizomes contain hypotensive and neuro-depressive alkaloids.

In 1952, the Russian chemist Muller isolated the specialized reserpine under the name of "serpasil." Most of the alkaloids are built on the base of reserpine, a harmonic group linked with a second isoquinoleic group.

HOMEOPATHIC - The homeopathic proving was conducted in 1954 by Leeser and Schrenk at the Robert Bosch Hospital in Stuttgart. The proving was carried out on twenty-four doctors, using the 1x and 3x potencies, for a period of fourteen to twenty-eight days.

W. Lee Templeton also conducted a proving at the Faculty of Homeopathy in London in 1954-55 on six provers, using the 3x, 6x, 12c, and 30c potencies, depending on the subject, for a period of six months.

Beja of Orléans began a self-proving in July-August 1956 using the 3x potency, for one month, at the rate of 10 drops four times a day. Finally, Julian undertook detailed clinical studies to determine the range of action of Rauw. in a homeopathic potency.

Rauw. has a general and cerebral hypotonia. Lack of tone in the nerves and circulatory system. Congestive vascular condition. Pallor, alternating with redness and hot flushes. Insomnia after midnight.

Chronic allergic condition progressing to cancer. Chronic neurotic conditions with development of arthrosis or depression. Rapid, widespread trembling. General stiffness.

Heaviness in the legs. Libido disorders. Dripping after urination.

MIND - Uneasiness with irritability and apprehension. Aversion to company, better when alone. Abrupt. Face expressionless and he avoids any effort. Dullness from alcohol.

Diminution of the memory and powers of concentration. Phases of increased ability to work and well being, alternating with phases of fatigue and exhaustion. Alternating excitability and depression. Maniacal depressive psychosis. Psychosis in elderly people.

Restlessness at night in bed. Neurosis from anguish. Psychological complaints during the menopause. Melancholic conditions. Hyper-emotiveness. Unstable personality. Delusions, everything seems unreal. Sudden impulse to kill.

Abdomen - Abdominal plethora and dropsy.

Chronic pancreatitis. Feeling of gastric and abdominal repletion. Heartburn, nausea, malodorous flatulence. Aerophagy, air in the colon. Colitis from fermentation, enterocolitis.

Blood - Circulatory dystonia. Hypotension, faintness. Temporary rise and then fall in arterial tension. Vasomotor complaints. Vascular or febrile congestion.

Chest - Angina pectoris.

Constitutions - Carbo-phosphoric types with nervous or sanguine temperament.

Face - Congestion of the face and possible nosebleed. Neuralgia of the upper maxilla, ameliorated by heat. Numbness sensation in the right half of the face, followed by shooting pains.

Female - Heaviness in the small pelvis with frequent need to urinate. Amenorrhea. Menses too early, accompanied by cramping pains. Too frequent menses. Endometriosis. Fibroma. Menopausal complaints. Frigidity.

Head - Congestive headache with arterial palpitations in the temples and forehead. Frontal headache, spreading towards the occiput, ameliorated in fresh air, accompanied by hot flushes, dizziness.

Heart - Hypotonia with diarrhea. Constriction, angina pectoris and rhythmic anomalies. Bradycardia, aortitis. Aortic aneurysm. Palpitations, prickling and irregular heartbeat. Palpitations and irregularity of the heart when lying down, ameliorated by standing and walking. Cardio-renal edema.

Kidneys - Difficulty in urinating with need to squeeze to push. Dysuria. Cystitis. Urine reddish-brown. At the end of urination, a little urine is passed, drop by drop. Bedwetting from compression (fibromas, prostate).

Limbs - Chronic rheumatism. General stiffness and pain in all the limbs. Legs heavy, black and blue, as if shattered. Joint pains in the left hip and big toes, which are hot and swollen. Arthrosis of the knee. Painful flat feet in adolescents. Gout. Soft edema, puckered, located in the malleolar region, at times connected to a generalized edematous infiltration including the upper limbs and the face.

Liver - Cirrhosis of the liver. Pigmentary cirrhosis or glandular pigmentation or hypertrophic pigmentary cirrhosis in sugar diabetes. Biliary sycosis.

Lungs - Dyspnea from exertion with lack of air. Tracheal bronchitis. Fitful cough with expectoration of sticky, sometimes blood streaked, mucus.

Male - Clear diminution in libido, sometimes with a temporary phase of excitement. Impotence. Sterility. Prostatitis.

Modalities - Better in the open air, fresh air. Better from violent exercise, prolonged movement, strong pressure. Better from the emission of gas or stools. Worse from heat, confined air. Worse on waking, after meals, from 6 p.m. to 8 p.m.

Mouth - Excessive salivation. Impression of a rotten taste in the mouth.

Nose - Dryness of the nasal mucus membranes. Nosebleed with ulcerations on the nasal wall. Sinusitis. Spasmodic rhinitis.

Rectum - Morning attacks of colic with evil-smelling black diarrhea-type stools. Sudden urging, followed by pallor of the face with sweating, thirst and faintness.

Anal fissure. Congestive hemorrhoids, bleeding at times.

Skin - Clammy, odorous sweating from the axilla, hands and feet. Dyshidrosis. Lymphaedema. Elephantiasis-type edematous dystrophy. Sweating. Fissures. Cracks. Ulceration of the heel.

Sleep - Insomnia. Slow in going to sleep and stays awake for hours after midnight. Erotic dreams. Dreams of wasps, drowning, death, dying.

Stomach - Excessive hydrochloric gastritis. Alcoholic gastritis.

Temperature - Sensation of heat on the whole body with or without sweating and accompanied by congestive headache and general uneasiness.

Throat - Dryness of mucus membranes of the nose and throat. Tickling in the throat with need to cough, aggravated by lying down. Laryngitis.

Vertigo - Vertigo and precordial heaviness, cramping pains spreading towards the neck, discomforts, tendency to faintness with sticky sweating from the hands and feet. Amelioration from movement in the open air.

RELATIONS-Compare: (1) Lach. - Circulatory dystonia with localized congestion, amelioration by discharges, occurring predominantly on the left side. (2) Phos. - Agitation with uneasiness, worse at dusk, vertigo on waking, burning sensation at the hands and between the shoulders. (3) Ars. - Anxious, especially between 1 a.m. and 3 a.m., edema of the lower eyelids, thirst for small quantities of iced water, diarrhea with vomiting, physical and mental agitation. (4) Nux-v. - Nervous irritability. Sleepy after meals, ameliorated by a short nap. Heaviness in the stomach, constipation and hemorrhoids. (5) Aur. - Congestions, disgust for life, obsession with suicide, palpitations. Pains in the bones and right testicle, worse at night and from contact.

***RED CHESTNUT

(Bach Flower Essence)

PHARMACY - rd-ch-b. Red chestnut. Aes- culus carnea. The flowering clusters are boiled for half an hour. The boiled water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Rd-ch-b. belongs to Bach's group **For Those who Have Fear**, with Rck-r-b., Mimul-b., Cher-p-b. and Asp-b. Fear for the welfare of others. Extreme physical nervousness and anxious weakness, with tightening in the stomach and abdominal region from fear.

MIND - Fearful worries about loved ones' welfare. Nervous energy. Grief and worry. Sense of danger. Fears for life and limb. Helplessness, self-blame.

REFERENCES-Bach.

***RESCUE REMEDY

(Bach Flower Essence)

PHARMACY - resc-b. Rescue Remedy. Rescue Remedy is made up of a combination of five Bach flower remedies. Add two drops from stock bottles of each of the five remedies listed below to a one ounce (30cc) bottle filled with brandy or alcohol. **Historical dose:** Add three drops of the Rescue Remedy to a glass of water. The patient should sip this frequently and as he or she grows calmer, at intervals of fifteen minutes, and then every half hour according to the progress made.

HOMEOPATHIC - Bach discovered this unique combination of five remedies which aim at restoring balance and calm to a person in acute emergency situations.

Cher-p-b. - for desperation, to balance intense tension and the fear that events and one's own life, including one's mental power, is out of control. **Clem-b.** - for that faraway, out-of-the-body state that precedes fainting or loss of consciousness. Can reduce faintness or coma.

Imp-b. - to counteract inner turmoil, tension and impatience. **Rck-r-b.** - to counteract terror and panic. **Star-b.** - to reduce shock, trauma, sadness and prevent the trauma's possible long-lasting effects on mind, emotions and body from imprinting.

Rescue remedy is of great value immediately after accidents or similar moments of shock and panic when there is faintness, trembling, or other failing of normal physical functioning. Useful as the first medicine administered on arrival at the accident. After accidents, shocks, traumas or during severe illness, mental or physical.

Can be given before stressful events to help calm the anticipation or fear. Anxiety, panic attacks and sudden fear. Speechless and trembling. Can also be used as a daily remedy in chronic situations of intense nervousness and tension when the vital force needs to recharge and recuperate. Can prevent or give a peaceful death if given at the right moment.

MIND - Rescue Remedy helps to bring balance, calm and synchronicity of functioning within the levels of the human being, these being the mind, emotions and body.

REFERENCES - Bach. Muiphy.

***RESERPINUM

(Reserpine)

PHARMACY-reser. Reserpinum. Reserpine. Alkaloid of Rauwolfia serpentina. **Historical dose:** All potencies.

CLINICAL - Allergies. Cancer. Catalepsy. Diarrhea. Duodenal, ulcer. Dyspepsia. Headache. Hemorrhoids. Hypotension. Hypothermia. Jaundice. Migraines. Melancholy. Nasal polyps. Parkinson's disease. Pharyngitis. Rhinitis.

HOMEOPATHIC - It is one of the alkaloids of Rauwolfia serpentina and was found commercially under the name of serpasil ciba. The proving was carried out by Julian on a group of thirteen provers during the winter of 1964-65, using the 3x, 5c, 7c, 9c, 15c and 30c potencies.

Sleepiness. Sleeping after meals. Slowing down of the mind and body. Asthenia, particularly accentuated between 3 p.m. and 4 p.m. General condition of weakness. Habitual trembling. General excitability. Anxiety. Suicidal tendencies.

Muscular hypertonia and a total lack of movement. Hard trophic edema. Intermittent stomach pains. Hypotension. Bradycardia. Vertigo. Allergies. Cancer.

MIND - Slowing down of the mind and body. Lassitude and aversion to work in the evening. Catalepsy. Nervous depression. Melancholy. Anxiety and suicidal tendencies. Difficulty working. Very hyperactive and aggressive. Feeling that the nerves are at skin level in the evening. Premature senility.

Abdomen - Spasmodic attacks of pain in the colon.

Breasts - Excessive milk in the mother.

Constitutions - Allergic and psoric constitutions. Syphilitic, asthenic types with tendency to inhibition of nervous reactions.

Eyes - Myosis.

Head - Headache on waking, better by breakfast and worse again at the end of the morning.

Heart - Hypotension. Tension instability. Bradycardia, with vertigo. Permanently slow pulse.

Limbs - Fidgets in the legs.

Lungs - Laryngitis and tracheitis.

Mouth - Tongue covered with a yellowish coating. Excessive salivation.

Nose - Nasal obstruction. Congestive rhinitis. Nasal polyps.

Rectum - Jaundice. Constipation followed by diarrhea. Diarrhea. Hemorrhoids.

Skin - Dry, ligneous scabs. Hard, trophic edema. Lymphaedema. Dull and damp hair.

Sleep - Sleepiness. Sleeping after meals.

Stomach - Acrid dyspepsia. Slight nausea.

Gastric pain coming late after meals in painful bursts. Gastric and duodenal ulcer. Cancer of the stomach.

Temperature - Hypothermia, at 31°C, adynamic condition, hypertonia total indifference.

Throat - Pharyngitis. Throat sensitive.

Vertigo - Violent attack of vertigo with feeling of a black hole in front of the eyes and leaving an empty feeling for a few minutes, then return to former condition.

RELATIONS - Compare: (1) Rauw. (2) Aur.

- Depressive suicidal condition. (3) Lach. - Emotional instability. (4) Ars. - Anguish and fear of dying. (5) Nux-v. - Complaints of the nervous and digestive systems.

REFERENCES - Julian.

***RHAMNUS CALIFORNICA

(California Coffee-tree)

PHARMACY - rham-cal. Rhamnus californica. California coffee tree. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, tenesmus. **Constipation. Dizzy. Dysmenorrhea.** Gastralgia. Heart, disorders. Lumbago. Muscular pains. Pleurodynia. Rheumatism.

HOMEOPATHIC - Proving were done using the 2x potency.

Rumbling, griping and cutting pains in ileocecal region. Bladder tenesmus. Pleurodynia. Gastralgia. **Dysmenorrhea** of muscle origin, pain in head, neck and face. Rheumatism and muscular pains. **Inflammatory rheumatism**, joints swollen, painful. Lumbago. Rheumatic heart. Tendency to metastasis. Profuse sweat. **MIND** - Nervous, restless, irritable. Lassitude, mentally dull and dazed, unable to concentrate mind on studies. **Chest** - Sub-sternal oppression. Tenderness on pressure of right intercostal muscles. **Ears** - **Dullness of hearing**. Soreness, deep under right tragus, on swallowing. **Face** - Flushed, hot and glowing. Outward pressure from malar processes. **Head** - **Dizzy** full feeling. Heavy bruised sensation, better from pressure. **Bursting feeling** with every step. Soreness, especially in occiput and vertex, worse bending over. Dull pain in left temple. Dull aching in frontal region (left), extending backwards and over forehead. Deep, right-sided frontal headache. Twitching eyelids. **Heart** - Variation of pulse. Slow pulse. **Kidneys** - Increased urination. Tickling in anterior urethra, small morning drop (no previous gonorrhea). Sexual desire increased. **Limbs** - Legs sore. Unable to control muscular action. Walked like a drunken man. **Modalities** - Worse in evening. **Mouth** - Canker sore between gums and lips. Tongue coated, with clean, pink, central patch. **Rectum** - **Constipation** with some flatus. Tenesmus and dry stool. Flatulent diarrhea. **Throat** - Dry, rough. Soreness on right side and tonsil. **RELATIONS** - **Compare:** (1) Rham-cath. or Rham-f., European Buckthorn - a rheumatic remedy, abdominal symptoms, colic, diarrhea, hemorrhoids, especially chronic. (2) Rham- p. (3) Cas-s. - palliative in constipation, as an intestinal tonic and dyspepsia dependent thereon. 10-15 drops of tincture. **REFERENCES** - Boericke. Clarke.

***RHAMNUS CATHARTICA

(Purging Buckthorn)

PHARMACY-rham-cath. Rhamnus cathartica. Purging buckthorn. Buckthorn. N. O. Rham- naceae. Tincture of fluid extract of ripe berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Appendicitis. Canker, sores. Colic. Constipation. Diarrhea. Tympanites. Typhlitis.

HOMEOPATHIC - The common buckthorn produces black, shiny, four-sided berries with an acrid taste. A syrup is made from these berries, and forms the Rhamni succus of the old school. Symptoms were observed in a boy poisoned by eating the berries.

Copious watery stools. Nausea and severe vomiting. Rham-cath., in doses of a few drops, is a useful palliative in cases of constipation. The ileo-cecal symptoms seem to indicate it as a possible remedy in cases of appendicitis. Milne noted that it was formerly given in dropsy.

Abdomen - Abdomen hard, tympanitis.

Colic. Violent rumbling and griping. Cutting pains in ileo-cecal region and in transverse colon.

Eyes - Eyes glistening and injected.

Face - Trembling of lips. Commencing trismus.

Food - Complete loss of appetite.

Head - Unable to rise, seemed to desire to press his head against the wall.

Kidneys - Urine highly colored.

Limbs - Weakness and prostration in all limbs.

Lungs - Respiration short, anxious.

Mouth - Coated tongue. Extremely bitter taste.

Pulse - Pulse variable.

Rectum - Diarrhea. Liquid stools.

Temperature - Violent chilliness. Skin at one time warm, at another cold.

Throat - Scraping in throat.

RELATIONS - **Compare:** (1) Cas-s. (2) Cean. in appendicitis, Iris-t.

REFERENCES - Clarke.

***RHAMNUS FRANGULA

(Alder Buckthorn)

PHARMACY - rham-f. Rhamnus frángula. Alder buckthorn. N. O. Rhamnaceae. Tincture and trituration of the bark gathered in spring from the younger branches. Tincture of bark of root. Tincture of ripe berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Anus, itching. Appendicitis. Ardor urine. Cecum, gurgling. Diarrhea. Flatulence. Urethritis.

Vomiting.

HOMEOPATHIC - All parts of Rham-f. appear to produce irritant and cathartic properties. The majority of the symptoms were the result of the root bark, but the leaves were no less active.

There was more vomiting with Rham-f. than with Rham-cath., and the former was abandoned as a cathartic because it so frequently produced vomiting instead.

Burning in urethra while urinating and frequent urination may prove an indication in gonorrhea. Stools of a dark-green color, copious, thin or pasty. Much rumbling in the ileo-cecal region and along the transverse colon with weakness after stool.

RELATIONS - Compare: (1) Rham-cath., Cean. and Cas-s.

REFERENCES - Clarke.

***RHAMNUS PURSHIANA

(Cascara Sagrada)

PHARMACY - rham-p. (cas-s.). Rhamnus purshiana. Cascara sagrada. Sacred bark. N. O. Rhamnaceae. California. Extract of bark. **Historical dose:** Tincture and all potencies.

CLINICAL-Cholera. Cirrhosis. **Constipation.** Headache. Hemorrhages. Hemorrhoids. Indigestion. Jaundice. **Rheumatism.** Vomiting.

HERBAL - Cas-s. is a palliative for constipation, fifteen drops of fluid extract restores normal function by its tonic effects. Only material doses have been used.

HOMEOPATHIC - Pathogenic effects on patients taking it for constipation have been recorded, including vomiting, severe griping, and hemorrhage. In one case, temporary insanity was produced from a homemade decoction of the bark. In two cases, cholera symptoms were produced.

This is a well-known purgative as it has been found curative in cases of acute and **chronic rheumatism with constipation.** Chronic indigestion, cirrhosis and jaundice. Hemorrhoids and constipation. Gastric headache. Broad, flabby tongue. Foul breath. **Kidneys** - Must wait before flow starts, then comes in drops at first.

Limbs - Rheumatism of muscles and joints with obstinate constipation.

Liver - Cirrhosis and jaundice.

Rectum - Hemorrhoids. **Severe constipation.**

Stomach - Chronic indigestion. Gastric headache. Vomiting.

RELATIONS - Compare: (1) Hydr., Nux-v. (2) Rham-cal - tincture for constipation, tympanites and appendicitis and especially rheumatism.

REFERENCES - Boericke. Clarke.

***RHEUM PALMATUM

(Turkey Rhubarb)

PHARMACY - rheum. Rheum palmatum. Turkey rhubarb. Rheum officinale. Rhabar- barum. N. O. Polygonaceae. China. Tincture and trituration of the dried root. A tincture of the fresh leaves and young stalks should be investigated. **Historical dose:** Tincture and all potencies.

CLINICAL - Ardor urine. Breath offensive. Constipation. Deafness. Dentition, difficult. **Diarrhea.** Duodenum, catarrh. Dysentery. Ears, thickening. Esophagus, constriction. Headaches. Jaundice. Kidneys, disorders. Meniere's disease. Milk, abnormal. Mouth, mucus. Nipples, pain. Nose, pain. **Nursing disorders.** Rheumatism. Salivation. Screaming, children. Snoring. **Stomach, disordered. Sour smell** Taste, bad. Tongue, numbness. Urination, difficult. Urine, red.

HERBAL - Rhubarb, called "Turkey rhubarb," comes from China, but the exact species is unknown.

Milne summarized its action from the traditional point of view as being "tonic, cathartic and a feeble astringent, the latter property being overborne by the cathartic and only coming into play afterwards," i.e., the constipation which follows rhubarb purgation.

"In small doses, it improves digestion and appetite and renders the kidney secretions more healthy. In larger doses it is an excellent cathartic, acting on the whole bowel and especially the duodenum and increasing the peristaltic action." It affects the liver, duodenum, bile ducts and intestines.

HOMEOPATHIC - Hahnemann's proving of Rheum confirmed many of its traditional uses. Rheum is a remedy for nursing infants and children especially during dentition, and suited to pregnant and nursing women.

The whole child smells sour, washing does not remove it. Colicky children who are always screaming and crying. **Sour diarrhea,** taste, vomits, stools, sweat etc. Difficult dentition. Requires very little sleep and not much food. Sensation of crepitation.

MIND - Impatient and vehement, desires many things and cries (Cina.). Impetuous desire for particular objects. Temper of child is as acrid as are the stools. Child dislikes even its favorite things. Child cries and tosses all

night.

Full of fear. Fear of death, and restlessness, in first days after confinement, with diarrhea. Anxiety from motion, when stooping. Indolent. Taciturn. Asks for nothing. Morose. Delirious talking. Quarrelsome in sleep. Restless with weeping.

Abdomen - Wind seems to rise up to chest.

Colicky pain about navel. Colic with screaming, better doubling up, worse uncovering any part, Then diarrhea.

Back - Stiffness in sacrum and hips, cannot walk straight. Cutting pain in lumbar region, worse after stools.

Causations - Eating prunes, unripe fruit. Dentition. Spasms, dislocations.

Chest - Lancinations in chest. Rush of blood to chest. Crackling bubbling (even audible) in right then left pectoral muscles.

Constitutions - For nursing children, especially during dentition, and for pregnant and nursing women.

Ears - Otalgia with itching in ear. Pressure and throbbing in ears. Dullness of hearing.

Eyes - Weak when looking steadily at any object. Convulsive twitching of eyelids.

Face - **Cool sweat on face**, especially about mouth and nose, on upper lip. Tendency to frown. Forehead wrinkled. Twitching.

Female - Urinary complaints after abortion. Diarrhea after childbirth. Yellow and bitter milk in nursing women, infant refuses breast.

Food - Loss of appetite. Requires little food. Loathing after first bite. Food tastes bitter, even sweet things. Desire for various things, but cannot eat them. Plums and prunes disagree.

Head - Sweat on hairy scalp. Wet, sopping hair.

Kidneys - Burning in bladder and kidney, before and during urination. Unsuccessful urging to urinate before stool.

Limbs - Limb on which he lies falls asleep. Twitching in arms, hands and fingers. Bubbling sensation in elbow joint from bend of knee to heels. Lameness of wrist and knee after sprains and dislocations.

Liver - Jaundice from eating unripe fruits, with white diarrhea.

Lungs - Snoring inspiration during sleep. The cough is dry in evening, with expectoration of mucus.

Modalities - Better from warmth, wrapping up. Better lying bent, lying doubled up, takes the queerest positions in order to rest awhile. Worse uncovering, summer, night, after sleep, and morning. Worse motion, dentition. Worse after eating, plums. Worse before, after and during stools. Worse in nursing women.

Mouth - Salivation with colic or diarrhea. Offensive mucus in the mouth after sleep. Breath smells sour (Cham.). Food tastes bitter, even sweet things. Teeth feel cold. Difficult teething, restless and irritable.

Nose - Stupefying drawing from root of nose to tip, where it tingles. Heat in nose.

Perspiration - **Child smells sour, even if washed or bathed.** Sweat on scalp, about mouth, nose, and on upper lip. Easy perspiration, on forehead and scalp. Stains yellow.

Rectum - Frequent, ineffectual urging to stool, worse motion and walking. Tenesmus. Before stool, unsuccessful urging to urinate. Renewed urging after stool, when moving. Colicky, even ineffectual urging to evacuate altered fecal stools. Severe constipation. Diarrhea only when walking. White diarrhea from eating unripe fruits with jaundice. Sour diarrhea during dentition. Diarrhea in first days after confinement, with colic. Loose, soursmelling stool with colic, immediately after nursing child.

Sensations - Sensation as if brain moved when standing. Heaviness as on waking from a heavy sleep. Coldness in teeth. Blunt feeling in teeth. Tongue numb, numbness of part of limb lain on. Constriction of stomach of gullet. Crackling, crepitation or bubbling in muscles and any part of body.

Skin - Sweat stains yellow. Pemphigus on face, scalp and hands, face, lips and tongue swollen, face livid. Itching rash on forehead and arms.

Sleep - Restless with whining and crying. Twitching of face and fingers. Requires very little sleep and not much food.

Stomach - Throbbing and shootings pain in pit of stomach. Contractions in stomach. Fullness in stomach with pressure, as if overloaded. Nausea during colic.

Stool - **Stools smell sour**, with shivering and tenesmus, and burning in anus. Sour diarrhea during dentition. Diarrhea of varying color and consistency, usually frothy and of a sour odor. Diarrhea only when walking. Stools pasty, pappy, brown, green, fermented, slimy or acrid. **Yellow stool, turning green on standing.** Stools with shivering, tenesmus and burning in anus. **Thin, pasty, sour-smelling stools**, with straining before, and colicky, constrictive cutting in abdomen after. Stools worse from eating unripe fruit, or in the evening.

Temperature - Chilliness alternating with heat. Internal, with external heat. Heat all over, mostly on hands and feet, with cold face, no thirst.

Throat - Contraction of gullet.

COMMENTS - Characteristic sourness and acidity. The stools are sour, the taste is sour, the whole body has

a sour smell. No amount of washing will wash the sourness out. The breath, stools, and sweat smell sour (Mag-c., Nat-p., Calc.). Sopping-wet hair.

Often indicated in nursing babies when they get sores in their mouth and soursmelling diarrhea. Dentition with sour stools. Colic with night screaming. "Screaming of children with urging and sour stools." Sour disposition (Cham.). Peevish, impatient, screams for things, dislikes even his favorite playthings.

Stomach disorders with a sour, flat, slimy, insipid or nauseous taste. Food tastes bitter, even sweet things. The mouth is covered with offensive mucus after sleeping, with a bad taste and offensive breath.

Hunger for various kinds of food, but the first few mouthfuls nauseate. Bad effects of eating plums or unripe fruit. Nausea. Severe colic, compelling one to bend double, worse standing, worse just before stool, not better after, worse at once by uncovering an arm or leg. Evacuations accompanied by shivering and renewed urging. "Shivering with stool."

Symptoms are mostly left-sided or go from above down or from right to left. Generally affects the left loin, brain, upper part of body (sweat).

With a few drops of Rheum, Clarke relieved severe constipation in an acid child who was intolerant of almost all remedies in the potencies.

On the indication "diarrhea only during active exercise," Hundall cured a horse of a diarrhea that only came on when he was at work.

Cooper noted that "Rheum has the property of setting up pains in old disease, in the old cellulitis and old psoriasis patches. Hot burning pains therein as well as in the unaffected veins of the thighs and other parts. Its good effect in old middle and internal ear thickenings seems due to the creation of tissue-activity in dormant structures."

Cooper offered two cases, the first was that of a woman who suffered from characteristic symptoms of Meniere's disease, feeling of things spinning around with extreme giddiness and noises in the head. She was cured by a chemist giving her 10 grains of powdered rhubarb based on the idea that it was due to the liver. Before this, great suffering had been endured without any relief.

The second case concerned vertiginous symptoms due to brain exhaustion with flushings followed by perspiration and awful muffled and discordant tinnitus. Great relief followed the sniffing of 3x trituration of Rheum.

RELATIONS - Antidotes: Camph., Cham. **Compare:** (1) Mag-c., Mag-p., Hep., Podo., Cham., Cina, Ip. **Complementary:** Mag-c.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***RHODIUM METALLICUM

PHARMACY - rhodi. Rhodium metallicum. Rhodium metal and element, (Rh. At. wt. 103). **Historical dose:** All potencies.

CLINICAL - Cough. Headache. Nausea. Rheumatism.

HOMEOPATHIC - Proved by MacFarlan with the 200c potency. Nervous and tearful. Frontal headache, shocks through head. Fleeting neuralgic pains in head, over eyes in ear, both sides of nose, teeth. Dull headache. Loose cold in head. Feels weak, dizzy and a tired feeling.

Stiff neck and rheumatic pain down left shoulder and arm. Cough scratchy, wheezy. Thick, yellow mucus from chest. Lips dry. Itching in arms, palms and face. Hyperactive peristalsis, tenesmus after stool. Loose stools with gripings in abdomen. More urine passed. Nausea, especially from sweets.

REFERENCES - Boericke.

***RHODIUM OXYDATUM NITRICUM

PHARMACY - rhodi-o-n. Rhodium oxydatum nitricum. Nitrate oxide of rhodium. Solution. **Historical dose:** All potencies.

CLINICAL - Anus, itching, burning. Constipation. Ears, pains. Hemorrhoids. Headache. Hearing, illusions. Impotence.

HOMEOPATHIC - Rhodium is often found in association with platinum. Hering's preparation was obtained from exposing a small quantity of rhodium sponge, hydrate of potash and nitre to the action of a blowpipe until oxidized.

After having the oxide well washed and boiled in nitric acid for a few minutes and exposed to a gentle heat for an hour, the nitrate was obtained from the oxide, producing a fluid of a golden color of the consistency of syrup. Dilutions of this were made and the 4th was proved for Hering by Dr. Person, the 2nd and 3rd by Dr. Negendank. The bowels were affected in both, constipation with hemorrhoids being relieved in one and constipation with itching of the anus being caused in the other.

Headache on being woken in the night. Headache alternating with faintness. Faintness better by passage of stool. Heat preceding chill and alternating with it. Sensation as if teeth blunt, as if sand between them. A scraping or harsh noise causes disagreeable sensation in teeth. The hearing is more acute, illusion that he hears whispering.

REFERENCES - Clarke.

***RHODODENDRON CHRYSANTHUM

(Yellow Snow Rose)

PHARMACY - rhod. Rhododendron chry- santhum. Yellow snow rose. Rhododendron aureum. Siberian rhododendron. Gout rose. N. O. Ericaceae. Tincture of fresh leaves. **Historical dose:** Tincture and all potencies.

CLINICAL- Amenorrhea. **Arthritis**. Asthenopia. Bone, pains. Bunions. Chorea. **Ciliary, neuralgia**. Colic. Coryza. Delirium. Diarrhea. Diphtheria. Dysmenorrhea. Earache. Eye, disorders. Fever. Flatulence, incarcerated. **Fibrositis**. Gout. Gums, itching. Headaches. **Hydrocele**. Lienteria. Lumbago. Memory, weak. Meniere's, disease. Neuralgias. Nightmares. Nosebleeds. **Orchitis**. Ovary, cyst. Periostitis. **Rheumatism**. Spleen, pain. Sprains. Stiff-neck. **Testes, disorders**. Tinnitus. Toothaches. Vagina, cysts. Wrists, pains.

HERBAL - The golden flowered rhododendron grows among the fog and storms of the Siberian mountains. It is not well known in general medicine, but the Treasury of Botany said that "it is narcotic in its properties and is used medicinally."

Gmelin, during his travels in Siberia, noted that the Cossacks and Mongolians used it for rheumatism and gout. The hunters and mountain rangers would drink an infusion of it to remove the weariness and pains from their limbs after fatiguing expeditions.

Gmelin was the first to recommend rhododendron in Europe as a remedy for gout and rheumatism. The first publication on the subject was by Professor Kolpin, of Stettin, in 1779. It was used with greater or less success, and recommended accordingly by many German physicians.

HOMEOPATHIC - Rhod. is a gouty, rheumatic remedy, affecting the **fibrous tissues**, forearm, lower legs, small joints, bones, genitals, nerves, and single parts. **Fibrositis. Arthritis**. Great weakness after slight exertion. Formication with sweat. Undulating sensation. Tearing, zigzag, boring, rapidly changing, descending, paralytic pains.

Rhod. produces delirium, fever, headache, neuralgias, rheumatism and inflammations. **Symptoms come on or are worse on the approach of a storm, worse during a storm or in wet weather**. Sensitiveness to electric changes, lightning (Phos.). Weather vane, can predict an upcoming change (Calc., Rhus-t., Dulc.).

Arthritis cases are especially sensitive to barometric changes. Aggravated symptoms before a storm, usually arthritis, headaches, neuralgias, toothaches and earaches. Increased warmth of hands even in cold weather.

Sensitive to windy or stormy wet weather, even if he is in the house. For nervous persons who are afraid of thunder, dread of storms. Chorea before storm. Disorders which come on in the spring and autumn. Rheumatism in the hot season. Symptoms alternate.

MIND - Dread of a storms. **Fear of thunderstorms** in nervous persons (Phos.). Nervous before storms. Fits of anxiety. Confused and stupid. Impatience. Irritability. Peevish, without any apparent cause. Phlegmatic mood, he is affected by neither pleasant or unpleasant impressions. Gloomy mood. Sadness, being alone aggravates.

Indifferent. Aversion to everything, especially to occupations. Aversion to his business. Stupefaction. Obscuration or loss of senses. **Forgets what he is talking about, leaves out whole words while writing**. Does not recollect what he had been talking about until he has thought a while. Vanishing of thoughts. Easily affected by wine.

Mental derangement. Frightful visions. Delirium, he staggers, tosses his head about and reels. After a short time, falls asleep upon his knees. In vain he attempts to rise, but is overcome with sleep for an hour and a quarter, during which he starts continually and appears terrified, but awakes cheerful.

Abdomen - Colic at navel. Flatus felt in back. Undulating sensation arising from abdomen. Sickening pain in spleen on walking fast. Pain from rectum to genitals. Paroxysmal pain, lying on abdomen impossible. Pain in left hypogastrium. Umbilical pain.

Back - Stiff neck. Sacrum pains, worse sitting. Pain between scapulae. Backache, lumbar region. Stitching pain, extending to pit of stomach.

Bladder - Frequent desire to urinate. Burning in the urethra before and during urination. Copious urine.

Causations - Catching cold. Stormy weather, thunder, getting wet. Sprains. Eating fruit.

Chest - Violent pleuritic pains running down the left anterior chest. Crampy pain under short ribs. Stitches in spleen from fast walking. Breathless and speechless from pain.

Constitutions - Suited to nervous persons who dread a storm and are particularly afraid of thunder.

Cough - Choking. Suffocative coughs, worse motion. Cough from tickling in trachea. Paroxysmal coughs with retching, choking. Morning coughs, from 6 a.m. to 9 a.m.

Dreams - Erotic dreams. Exhausting, frightful dreams. Nightmares.

Ears - Earache. Sensation as of a worm in the ear. As if hot air was flowing from throat to ears. Tinnitus with vertigo. Difficult hearing with whizzing and ringing in ears. Hearing better in the morning, noises come on after patient has been up a few hours. Deafness, long after rising.

Eyes - Muscular asthenopia. **Ciliary neuralgia** involving orbit, eyeball and head, worse before storm. Heat in eyes when using them. Darting pains, red-hot needles darting from within out. Contractive pain behind the eyes, with pain in forehead. Pain in eyes before a storm.

Face - Prosopalgia, violent jerking pain involving dental nerves from temple to lower jaw and chin. **Pains better warmth and eating.** Painful pimples, better pressure.

Female - Suppressed menses. Painful menses. Dysmenorrhea. Fever with headache, with each menstrual period. Serous cysts in vagina. Burning in uterine region after childbirth, alternating with pain in limbs, fingers spasmodically flexed. Sexual desire increased.

Food - Desires sweets. Dullness of taste, food has no flavor. Gnawing, hungry sensation before a meal. Speedy satiety with good appetite, followed by uneasiness. Augmented thirst.

Generals - Burning, stitching pain. Pressure on certain points ameliorates. Trembling. Weakness. Weariness, worse afternoon. Lack of vital heat. Sensation of heat. Desires open air.

Head - Headaches, worse wine, wind, cold and wet weather, early in the morning, better eating. Aching in temples. Throbbing in right side. Bursting pains, better pressure and rubbing forehead. Tearing pain in bones. Drawing, tearing under scalp. Hair stands up as if electrified. Heat in afternoon, evening. Pressure in temples, as if compressed. Contracting, as if scalp stretched tight.

Heart - Warm undulation at heart. Strong heartbeat.

Kidneys - Frequent urging to urinate with drawing in the bladder region. Pain in the urethra as from subcutaneous ulceration. Profuse, foul, greenish urine.

Larynx - Dryness. Hoarse voice. Trachea irritation, mucus. Sensation of mucus that he is not able to eject. Burning pains, like splinters.

Limbs - Swollen joints. **Rheumatic and tearing pains** in all the limbs, especially right side. **Rheumatic pains worse at rest and in stormy weather.** Rheumatism in hot weather. Numbness. Numbness as if limbs have gone to sleep, must move about. Stitching pain. Pain, better motion. Drawing, tearing in periosteum of long bones. Pain in bones, in spots, and reappear by change of weather. Coldness of limbs. Sensation like a cool draft of air over limbs. Gout. Gouty inflammation of great toe joint. **Cannot sleep unless legs are crossed.** Lower legs, cold, skin wrinkled,

Rhododendron chrysanthum feel as if asleep. As of a weight hanging to feet. Feet cold even in warm room, even in bed. Pain in Achilles tendon on stepping. Shoulder pain, better firm pressure and warmth on certain points. Pain in shoulders, arms, wrists, worse when at rest. Bruised, sprained feeling in wrist. Hands feel warm in cold weather.

Lungs - Bruised, sprained feeling in chest. Breathless and speechless from violent pleuritic pains, running down anterior chest. Expectoration in mornings, 6 a.m. to 9 a.m. Crumbly expectoration, left-over food, like leaves in the mouth.

Male - **Hydrocele** of boys from birth (Sil.). Drawing from spermatic cord into abdomen and thighs. Orchitis. Itching, wrinkled, sweaty, scrotum. **Testes, especially the epididymis, are intensely painful to the touch swollen,** drawn up, worse left. Contusive pain in the testes. Induration and swelling of testes after gonorrhea. Glans feels crushed. Burning, sore pain between the genital organs and thighs, especially when walking.

Modalities - Better after the storm breaks, when the sun shines. Better heat, warmth, wrapping up, wrapping head. Better motion and eating. **Worse before a storm, rough weather.** Worse during windy, cold, damp, cloudy weather. Worse when the seasons change, midsummer. Worse getting wet, catching cold. Worse at night, towards morning, from rest. Worse wine, eating fruit.

Mouth - Salivation with nausea and intermittent pain in stomach. Insipid, bitter taste. Dryness in the mouth, palate, and tongue. Speech impossible due to numbness of cheeks, and lips, in morning after waking.

Nose - Dryness, soreness inside nose. One sided nasal obstruction. Nostrils obstructed, alternately with fluent coryza, better in open air. Nasal discharge, viscid like gravel on dry mucus membranes. Paroxysmal sneezing. Nosebleed. Diminished smell.

Perspiration - Offensive smell in the axillary sweat, but the general sweat may be aromatic in odor and not unpleasant. Formication with sweat.

Rectum - Diarrhea worse fruits, does not weaken. Difficult evacuation, even of soft feces. Feces of pap consistency. Mucus evacuations.

Sensations - Brain as if in a fog. Scalp as if bruised. As if a worm in ear. As if water rushing into ear. As if throat lined with mucus. As from tension under short ribs. As if a fist pressed forcibly against stomach. Undulating sensation arising from abdomen. Warm undulations in heart. Testicle as if violently contused or crushed. As if blood ceased to circulate in arms. As if arms asleep. As if feet and legs asleep. As if heavy weights hanging to feet. As of subcutaneous ulceration. Bruised pains. Pains flying about. Crawling sensations.

Skin - Eruptions. Burning and tearing with erysipelas. Itching, burning and creeping.

Sleep - Cannot sleep unless legs are crossed. Wakes, as if called.

Stomach - Empty feeling in morning. Weak feeling, better eating. Feels full after a little food. Paroxysmal pain. Heartburn. Belching, after eating eggs. Heavy pressure from cold drinks. Nausea, better fresh air. Green, bitter vomiting after drinking cold water.

Teeth - Swollen gums. Stumps of teeth are loosened. Toothache in damp weather and before a storm. Toothache, better eating and warmth. Toothache ceases suddenly, worse again in two or three hours.

Temperature - Formication and itching of skin with sweat. Chilliness, 11 a.m. to 11:30 a.m. Shaking, shivering rigors. Cold feet, even in warm room or bed. Hands warm in cold weather.

Throat - Dryness. Burning pain. Swelling of throat. Chocking, constriction and burnin" sensation in throat. Scratching, scrapin^ in throat, sensationasif lined with m -c"" Mucus tough, gluey, green, diffi. .. to detach with cough and retching. Sensation of foreign object. Heat, as if hot air were to gush out from throat to ears.

Vertigo - Vertigo, when lying in bed, better when moving about. Tinnitus with vertigo.

COMMENTS - Characteristic loss of memory. Words are omitted while writing, thoughts suddenly disappear, forgets what they are talking about, has to think a while before they can recall it. Narcotic symptoms. Intoxication, and sensitivity to wine. One pupil dilated, the other contracted.

Vertigo and confusion, "brain feels as if surrounded by fog." Vertigo while lying in bed, better by moving about. Tinnitus aurium, associated with the vertigo. Meniere's disease. "Loud sounds re-echo long in ears."

Symptoms frequently alternate, left and right nostril, burning in uterus and pains in limbs, chilliness and heat. Pains go from within outward. Both sides are affected.

Arthritis, worse rest and better motion (Rhus-t.). Better from warmth and wrapping the area up. Chorea of left leg, arm and face, worse on approach of a storm. Splenic stitch on walking fast.

Offensive smell in the axillary sweat, but the general sweat may be aromatic in odor and not unpleasant. Formication with sweat.

Like the other Ericaceae, Rhod. has a strong effect on the kidneys, producing increased urine with offensive smell, clear, brown red or of greenish tinge and, whatever color it may be, of offensive smell.

Diarrhea. Paralytic condition of the rectum, effort is required to expel a soft stool. "Flatus felt in the back," in cases of flatulent indigestion.

Pains in rectum extend to genitals. The scrotum shrinks, testes are retracted or else they swell (especially at night) and are the seat of a bruised pain, as if they had been crushed violently. Pains are worse by touch, worse sitting, better moving about. Pains may be so violent as to arrest breathing.

The menses are too early and too profuse. Menses are accompanied by fever and headache. Menses reappear soon after they have ceased. In one prover,

Rhod. restored the menses after six months' absence. Vaginal cysts, has caused the rupture of ovarian cysts.

The paralyzing effect of Rhod. was exemplified by the poisoning of a flock of sheep from eating the leaves. A number of them died and the autopsy showed that cause of death was paralysis of the swallowing muscles.

Cooper cited a parallel case of death from post-diphtheria paralysis affecting the throat muscles, occurring a few minutes after drinking tea. In both instances, the fluid entered the trachea instead of the gullet and caused suffocation.

H. S. Budd related the case of Mrs. X., 44, who was married ten years and had three children. She had neuralgia for three years. Attacks usually occurred on Friday or Saturday and would last until Monday or Tuesday, but were induced any time by high winds, damp weather or an approaching storm. Passi. only partly relieved, sometimes enabling the patient to get sleep.

The pain was worse after hard work, during any movement, in very cold weather or from hot applications. She had intense soreness all over the right half of her head, she could not rest on a pillow or endure even the lightest hairpins when pain was worst. Worse at night.

She was intensely nervous and hysterical at being touched, even by accident. During the pain, she had increased activity of the kidneys, that ceased when pain ceased. Pain was greatest in her right lower jaw. Sometimes better for an hour by chewing gum or eating. Afraid of thunder. Omitted words when writing.

Rhod. 16x every hour was given on May 12. Each dose caused an immediate worsening of symptoms. The next morning, pains stopped suddenly and did not return. On June 7th there was a premonitory twinge and a powder of Rhod. 1,000c was given, after which there was complete immunity.

E. V. Moffat treated a girl, 10, for neuralgia, which had existed for several years. The patient was of a marked gouty heredity and had been treated by leading old-school doctors in New York. She was well during ***Rhododendron chrysanthum*** the summer, but suffered intensely during winter.

Pains were general and shifting, sometimes intercostal, sometimes sciatic in bad weather, never absent. The last form was a prostrating headache incapacitating her for schoolwork.

Her eyes were normal. While the sun shone, she was comfortable. If it stormed or threatened, she was miserable. If she had a headache on a stormy day and the sun came out in ten minutes she was relieved, and it returned at once if snow or rain came on. A cold day, especially if damp, was almost as bad as a storm.

Rhod. in repeated and increasing doses, cured in three weeks. Color, spirits, strength returned and she no longer minded the weather or missed her school.

RELATIONS - Compare: (1) Ampe-qu. - hydrocele and kidney dropsy. (2) Med., Dulc., Rhus-t., Nat-s. (3) It is analogous to and follows as regards the testes, Puls., Aur., Spong., as regards hydrocele, Clem., Graph.

***RHUS AROMATICA

(Fragrant Sumac)

PHARMACY - rhus-a. Rhus aromática. Fragrant sumac. Rhus canadensis. Rhus suaveo- lens. Betula triphylla. Lobadium aromaticum. Turpinia glabra. N. O. Anacardiaceae. Tincture of fresh root bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Atony. Bedwetting. Bladder, hemorrhage. Cystitis. Diabetes. Diarrhea. Dysentery. **Hematuria. Hemorrhages.** Kidneys, hemorrhage. Uterus, hemorrhage, atony.

HERBAL - J. T. McClanahan's account of Rhus-a. : "It is a shrub, growing from two to six feet high, on high, rocky soil, stems straight, branching near the top. The flowers are yellow, fruit clustered, red, seedy and acid. When the bush is fractured it emits a strong odor. The bark of the root is the proper medicinal part."

HOMEOPATHIC - Rhus-a. has kidney and urinary disorders. **Diabetes**, large quantities of urine of low specific gravity (Ph-ac., Acet- ac.). Bedwetting due to bladder atony, senile incontinence. Hematuria and cystitis. The urine is **pale**, albuminous. **Incontinence of urine. Severe pain at beginning or before urination**, causing great agony in children. Constant dribbling.

COMMENTS - McClanahan mentioned hemorrhage from kidneys, bladder and uterus, menorrhagia and other discharges accompanied by a relaxed condition of the uterus as indicating the remedy, also atonic conditions generally.

These experiences have been confirmed by others. McClanahan's grandfather, Dr. John Gray, used Rhus-a. as a remedy in diabetes, and his father, Dr. F. McClanahan, in other genito-urinary diseases.

J. T. McClanahan recorded several cases, including the case of Mr. A., 27, cadaverous, emaciated, haggard, had diabetes insipidus. Rhus-a., teaspoonful doses of the powdered root bark in sweet milk, three times a day, completely cured in four months.

Mrs. B., 37, had diabetes mellitus. First noticed increase of urine ten months before, became so weak she had to abandon house-work. Pain in back, thirst, appetite, now ravenous, now deficient. Skin sallow, doughy. Cough and night-sweats occasionally. Diarrhea at times.

Rhus-a., half-teaspoonful doses every four hours, was given. Quantity of urine diminished next day and as this diminution progressed the doses of Rhus-a. were given at increasing intervals, and in three months it was discontinued. Proper diet had been observed in the meantime.

Mr. C. had incontinence of urine more than a year, constant dribbling. Rhus-a. tincture 10 drops, three times a day, improved at once and cured completely in eight weeks.

A girl had bedwetting during the day and night for two years. Rhus-a. tincture, one part to glycerine three parts, a teaspoonful three times a day, cured.

A boy, early in summer had diarrhea, stools

pale and thin, running from him like water, no particular pain or fever. Pale, emaciated, limbs trembling, scarcely able to stand. Abdomen flabby. Rhus-a. tincture 3 drops in water after each stool, cured rapidly.

A laborer had "chronic dysentery" for two months. On the average, had five stools a day, sometimes copious and painless, sometimes scanty and with pain. Stools consisted largely of blood and mucus or clear blood. Patient was thin, anxious, bowels (abdomen) flabby. Skin sallow. Rhus-a. tincture in ten- drop doses with boiled milk diet, cured.

J. A. McKay related the case of Mrs. S., 45, who had severe, profuse uterine hemorrhage for eight days, which three old-school doctors failed to arrest. The condition was becoming desperate, large clots passing away and the patient fainting from the loss.

Rhus-a. tincture 10 drops, every six hours, was given. The first dose checked the flow, which ceased entirely after the second.

***RHUS DIVERSILOBA

(California Poison Oak)

PHARMACY - rhus-d. Rhus diversiloba. California poison oak. N. O. Anacardiaceae. Tincture of fresh leaves.

Historical dose: All potencies.

CLINICAL - Chickenpox .Eczema. Erysipelas. Fatigue. Skin, sensitive. Sprains.

HOMEOPATHIC - Rhus-d. is an antidote to Rhus-t. Affects the skin with violent skin symptoms with frightful itching. Much swelling of the face, hands and genitals. The skin is very sensitive with eczema and erysipelas. Tired from least effort, goes to sleep from sheer exhaustion. Great nervous weakness.

Causations - Ailments from overexertion, lifting, physical labor. Strains. Sprains.

COMMENTS - Murray Moore observed the effect of Rhus-d. on three persons. The first was Miss M., 25 of brown hair and fair complexion. She walked up a hill one warm morning and, while perspiring, gathered fems which grew among the Rhus-d. trees. the leaves of which she must have touched, though she did not pull any. The result was a very severe poisoning.

J. W., a light-haired, robust Englishman, 23, lay down while sweating among the bushes and was smartly poisoned. Ver-v. tincture internally and a lotion of magnesia sulph. externally checked the spread of the disease.

A boy, 10, pure blond type with thin, freckled skin, plucked some of the leaves and in eighteen hours the poisoning symptoms came on, facial erysipelas with extreme edema, closing both eyes, itching and burning. The symptoms became general.

M. Moore also related the case of a man who was poisoned in California in September, returned to the eastern states, and suffered from an annual eruption for six successive years. During the seventh attack he was carried off with pneumonia, which Moore thought would not have been the case but for the Rhus-d. complication.

RELATIONS - Rhus-d. is an antidote to Rhus-t. **Compare:** Rhus-t.

REFERENCES-Clarke.

***RHUS GLABRA

(Smooth Sumac)

PHARMACY - rhus-g. Rhus glabra. Smooth sumac. Rhus Carolinas. Rhus elegans. Rhus virginica. Pennsylvania sumac. Upland sumac. N. O. Anacardiaceae. Rocky or barren soils in North America. Tincture of fresh bark of root. Tincture of berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Aphthae. Debility. Diarrhea. Dreams, annoying. Dysentery. Hemorrhages. Headache. Mouth ulcers. Nosebleed. Pharyngitis.

HERBAL - Rhus trypanosomiasis, Rhus glabra and Rhus coriaria have acid fruit and astringent bark, which is used in tanning. Rhus-g. is a deciduous shrub with a stem 2 to 12 feet high and has terminal flowers and fruit clothed with acid crimson hairs like the other non- poisonous Rhus.

A tincture made of the whole pannicle, "**Sumac-bobs**" cured a patient who had every spring an attack of laryngeal cough with dyspnea and almost complete loss of voice. Farmers place "**bobs** " in the mangers of hoses who have "**heaves**. "

HOMEOPATHIC - The tincture of the bark was proved by Dr. A. V. Marshall on himself with very substantial doses. The symptoms are his and they bear out the traditional uses of the remedy.

One of these is "**profuse perspiration arising from debility**." Marshall had "profuse sweat during sleep" and such a degree of debility that he was obliged to leave off the proving.

Hale mentioned that an infusion of the root had a popular reputé in diarrhea and dysentery, especially when the discharges are fetid, and that the berries were used for chronic cough, wheezing cough and laryngeal asthma.

It was claimed that this remedy will so disinfect the bowels that the flatus and stools will be free from odor. It acts well in putrescence conditions with tendency to ulceration. **Fetid flatus**.

Used locally on soft, spongy gums, aphthae, pharyngitis, etc. Ulceration of mouth. Nosebleeds and **occipital headaches**. **Dreams of flying through the air** (Stict.). Exhaustion and painful fatigue. Loss of weight.

MIND - Stupid, forgetful, indifferent to surrounding objects. Distaste for society.

Abdomen - Sharp cutting in umbilical region and abdomen. Umbilical region tender to pressure.

Back - Pain in small of back.

Food - Loss of appetite. Hunger at breakfast, could eat but little though feeling as if he had fasted many days.

Head - Dull, heavy headache on waking, better by exercise. Dull heavy pain in front and top of head.

Kidneys - Scanty, high-colored urine.

Limbs - Aching and fatigue of lower limbs, can hardly stand.

Modalities - Better by movement. Worse after sleep. Abdomen, ulcers in mouth, worse from touch.

Mouth - Taste flat, alkaline. Taste of drug remains long. Tongue furred white. Bleeding from mouth. Aphthous stomatitis. Several small, very sensitive ulcers on mucus membrane opposite the bicusps. Scurvy, nursing sore mouth (Vero-o.).

Nose - Bleeding from left nostril and mouth. Bloody scabs in left nostril. Left nostril hot and dry.

Perspiration - *Profuse perspiration arising from debility* (Chin.). Sweat, profuse during sleep.

Rectum - Diarrhea in afternoon, worse towards evening. Dry, hard stool, later moist, then natural, and again diarrhea.

Sleep - Sleep disturbed by annoying dreams, very restless. Dreams of flying through the air.

Stomach - Distress in stomach, disturbed, very restless. Pain in stomach, much worse by all food or drink.

Temperature - Sense of coldness while there is actual increase of heat in the skin. Skin hot, dry with thirst.

Throat - Expelled two clots of blood from throat soon after waking.

COMMENTS - Cooper observed an aggravation in a case of psoriasis in which the patient felt irritable and despondent and the skin became irritable. Aggravation of stomach symptoms by either food or drink.

In the proving there were dull, heavy headaches, better by exercise. Hale said Rhus-g. has cured occipital headaches.

RELATIONS - Said to be antidotal to the action of Merc, and has been employed in the treatment of secondary syphilis after mercury. **Compare:** (1) Rhus-t. Anae, and other Ana- cardiacae, and the Xanthoxylaceae, which are an allied order.

REFERENCES - Boericke. Clarke.

***RHUS LAURINA

(Laurel Sumac)

PHARMACY - rhus-1. Rhus laurina. Laurel sumac. N. O. Anacardiaceae. **Historical dose:** All potencies.

CLINICAL - Edema. Itching. Skin, eruptions. Swelling. Urticaria. Vesicles.

HERBAL - This variety grows abundantly in the Sacramento and San Joaquin valleys, as well as in the mountains and is found in all parts of California. It differs from Rhus-t. principally in the shape of the leaves, and in the entire absence of the slightest pubescence, both on their superior and inferior surfaces.

The sap of the plant is a thin milky fluid, but when allowed to touch the skin, it produces a dark purple stain, and for three or four days afterwards, whenever the part is washed, it looks as if it had been recently touched with silver nitrate.

HOMEOPATHIC-M. J. Rhees, M.D. wrote, "Some persons are much more readily and severely affected by this plant than others, while a very few are entirely exempt from its influence. The great majority are more or less susceptible to its action. I have seen very many cases of poisoning by it.

"Some have presented the same symptoms and the same kind of eruption as were present in my own case, but in more severe form. I have seen eyes completely closed for 24 hours by the swelling, and the scrotum and prepuce have been so badly swollen in a few cases as to render it necessary to support them with a suspensory bandage.

"In other instances, the vesicles are much longer than in my case, and become confluent, forming a dark scab of an inch or more in diameter. I have not seen any case in which the tongue or pulse were materially disordered. I have been informed by a gentleman in this city, that two persons with whom he was acquainted, died from the effects of the poison, but I have been unable to learn anything concerning their symptoms.

"Dr. Lewis Post, of San Jose, California, informs me that if he rides within ten feet to leeward of the plant, he is speedily affected by it, particularly and almost exclusively on the scrotum and prepuce. It seems to have a great affinity for this part of the body, as almost all the cases I have seen have complained of the intense voluptuous itching of the external genital organs and the inside of the thighs."

COMMENTS - Recorded in proceedings of the American Institute of Homeopathy on rhus-1., M. J. Rhees, M.D. wrote, "On the 4th of the present month, at 10 o'clock a.m., I procured several branches of both sexual varieties of Rhus laur., and cut the leaves, twigs, and clusters of flowers into small fragments, and put them into a vial, with the intention of making a tincture.

"While doing so, I was troubled with a smarting and burning in the eyes. My hands were protected at the time by kid gloves, and I washed them carefully with strong soap before I touched any part of my body. In the evening I began to experience slight itching and burning in the face, particularly about the eyes and forehead; and voluptuous itching on the scrotum and prepuce. At night, felt a sense of oppression as if the air was too

heavy.

"April 5th. Last night the sleep was disturbed and full of dreams, which were lascivious, and of venereal pleasure; felt heavy and unrefreshed in the morning; during the day the itching in the face has increased and spread over the nose, the edges of the nostrils, the upper and lower lips, the external ears, and the inferior portion of the neck immediately above the sternum and clavicles; the skin on these parts feels rough, and is covered with a minute eruption of lenticular vesicles, filled with transparent serum.

"Itching on the back of the hands, particularly between the fingers. The itching on the scrotum and prepuce has become more troublesome, and is much increased by scratching; scratching, or rubbing of the parts is followed by intense burning; the prepuce is slightly swollen. In the evening the nose is quite red and shining; the redness is not removed by pressure.

"April 6th. This morning I felt weak and languid. Dull, aching pain, and weakness across the loins. Redness, and swelling of the skin of the forehead, eyelids, nose, cheeks, lips, and ears, behind the ears, and on the front of the neck.

"The skin on these parts is covered with the minute lenticular vesicles spoken of yesterday, which are more filled with serum. These vesicles seem to be situated in the rete mucosum; at least they involve a deeper tissue than the cuticle. During the day some of them find their way to the surface, and are ruptured while being scratched.

"The itching is so intolerable that it is impossible to resist the inclination to scratch. After scratching, the parts burn and sting, become more swollen, and feel stiff and dry; the prepuce is much swollen and very red, and the itching is unbearable about once in five or six hours on this part and the scrotum; the scrotum is red, swollen, and much corrugated.

"After scratching for a few minutes, the itching is entirely relieved for several hours; eruption of pimples and minute vesicles with excessive itching on the backs of the hands and between the fingers; itching on the inside of the thighs.

"April 7th. The same symptoms continue as were noted yesterday, but with increased violence. The eyes were nearly closed in the morning, by the swelling of the lids. Chilly sensation during the day, through the whole body, while sitting in a warm room.

"April 8th. The itching and swelling on the face, between the fingers, and on the scrotum and prepuce, became so intolerable, that, fearing it would incapacitate me for business, I took Rhus tox. 6th, every four hours, and bathed the parts with cream. This treatment alleviated the symptoms somewhat. At night itching and redness on the inside of the thighs, from the perineum to the knees.

"April 9th. The itching and swelling in the face is very much abated, as well as that on the scrotum and prepuce. The itching on the hands and between the fingers is very harassing, and is much increased by rubbing and scratching.

"The itching comes on at intervals of 5 or 6 hours, but it may be produced at any time by rubbing or scratching. Scratching is followed by excessive burning, and between the fingers by a dull, aching pain, the skin becoming more swollen, hard, and white, as in urticaria.

"This evening took a hot bath, as hot as it could be borne, using Castile soap and the flesh-brush freely. This was followed by immediate and complete relief for several hours. Continued the Rhus tox. as yesterday, and the cream externally.

"April 10th. The itching in the neck returned at bed time, last night, and was somewhat troublesome through the night. This morning the itching returned with great severity in the hands, and was again relieved by bathing them in hot water, which was repeated this evening.

"The face is very dry and rough, and has a scurfy appearance, and the skin seems to be thickened and indurated; all other parts have been comfortable through the day, with the exception of the thighs and the skin covering the lower portion of the abdomen, which has at long intervals itched considerably.

"April 11 th. Bathed the hands in hot water this morning, and they have not been at all troublesome through the day. There has been some itching on the thighs and scrotum, but not nearly so much as formerly.

"April 12th. The hands have been very troublesome at intervals of 12 hours during the day. This morning vesicles made their appearance in the palm of the left hand wherever the sap of the plant had touched the skin, in gathering it.

"April 19th. Up to the present time, the itching and burning in the palm of the left hand, and between the fingers of both hands, have been very annoying, almost painful, at intervals of 10 or 12 hours. Wishing, however, to know how long the effect of the plant would continue, I have made use of no remedies since the 11th. It is now evidently abating."

RELATIONS - Compare: Rhus-t. Anae, and other Anacardiace, and the Xanthoxylaces, which are an allied order.

REFERENCES Rhees.

***RHUS RADICANS

(Climbing Poison Ivy)

PHARMACY - rhus-r. Rhus radicans. Climbing poison ivy. Poison vine. Toxicodendron radicans. N. O. Anacardiaceae. Tincture of fresh leaves gathered at sunset just before flowering time. **Historical dose:** All potencies.

CLINICAL - **Arthritis. Backaches.** Boils. Chills. Colic. Constipation. Cough. Debility. Dermatitis. Diabetes. **Dislocated joints.** Dyspnea. Eczema. **Erysipelas.** Faintness. **Fever, blisters.** Fevers. **Fibrositis.** Glossitis. Headaches. **Herpes zoster.** Hives. Housemaid's knee. **Influenza. Injuries.** Intermittent fever. **Joint, pains. Lumbago.** Muscular, pains. Nausea. Neuralgia. Nosebleeds. Palpitations. Palsy. Paralysis. Periosteum, pains. **Poison ivy, oak.** Rashes. **Rheumatism. Sciatica.** Spine, diseases. **Sprains. Stiffness. Strains. Tendonitis.** Typhoid fever. Typhus. Ulcers. **Urticaria.** Vesicles. Vertigo. **Whiplash.**

HERBAL - Dispute whether Rhus radicans differs from Rhus toxicodendron continues. Botanists agree in recognizing little distinction other than that of habit between the two.

Millsbaugh, in his book "American Medicinal Plants," tells in his account of the plant that he had seen the two varieties springing from the same root-stock. He advises that the tincture should be made from specimens of both.

Rhus-t. is a dwarf, erect, shrub, while Rhus-r. is a climber, with stem five to forty feet long, furnished with numerous radicles by which it adheres to trees and climbs up them like ivy. The leaves of Rhus-t. are almost entire and glabrous. The leaves are smoother at the margins than Rhus-t.

HOMEOPATHIC - Under the name "Rhus," Hahnemann published his proving of "Rhus radicans, also called Toxicodendron." The two forms have been proved independently. The American provings were made with Rhus-r. and the majority of the poisonings have occurred from this plant.

It acts on the brain, mucus membrane, skin, muscles, joints, and tendons. Inflammation of fibrous tissues. Neuralgias. Palsy of the limbs.

Rheumatism of the chest, neck, and back. **Wandering, rheumatic pains,** first one joint, then another. **Pains and stiffness** are often semi-lateral and in various parts, often remote and successive.

Traumatic inflammation of the joints. Sprains. The pains are worse when first beginning to move in the morning, relieved during the day, when occupied, and when walking in the open air.

Ailments from straining a single part, muscle or tendon, over-lifting, particularly from stretching high up to reach things. **Whiplash. Dislocated joints.** Injuries and traumas to the joints. **Tendonitis.** Sprained joints. Severe backaches, chronic, low back pain. Burning in the spine. **Stiffness in the sacrum,** better with cracking and adjustments. Coldness in left tibia. Old injuries that never healed, stiffen with weather changes.

Headache in occiput, even pain in nape, and from there pains draw over the head forwards. Jaws are tight and stiff, can crack and pop. Inflammation of the tongue Burning in tongue, tip feels sore (Rhus-t.).

Erysipelas, red, itching, phlegmonous swelling, with vesicular eruption extending like a band around right ankle. Large open ulcer on ankle, pain worse after, not during motion (Rhus-r. cured after failure of Rhus-t.). Intermittent fever. Fever with debility. Excessive debility. General languor. Inclination to lie down. Faintness and dyspnea. Typhoid. Typhus conditions. Diabetes.

Symptoms better after a storm has thoroughly set in, especially after an electric storm. Pronounced yearly aggravation (Lach.). Symptoms increased after drinking cold water.

MIND - Unfit for any mental labor. Confusion at night on lying down. Irresolution in projects. Mistakes in speaking. Jestings. Melancholy. Mental depression. Great discouragement and apprehension about the future. Delusion that she is criticized. Unconsciousness while standing.

Abdomen - Distention and flatus. Constriction and pain in left hypochondria. Dull pains. Lancinations in right hypochondria during inspiration. Sharp pains. Shooting pain after drinking cold water. Gripping colic. Colic that compels him to flex the trunk.

Back - Backaches and stiffness. Severe backaches, chronic, low back pain. **Stiffness of back in the morning.** Aching in the back and in the renal region. Aching in the lumbar spine and ileum when lying down at night. **Lumbago.** Pain across the back, loins and quadratus lumborum. **Stiffness in the sacrum** that's better with cracking and adjustments. Weakness in the whole spine. Burning in the spine. Pains in and between the scapulae. **Rigidity of the neck. Stiff neck.** Pain in the cervical muscles on motion, feel tender.

Chest - Chest sensitive to pressure. Chest pains that seem to proceed from the stomach. Pain in chest, near the nipple. Dull pain. Pains worse on inspiration.

Ears - Pain in one ear. Small boil. Sensation as if the beating of the heart and arteries were heard. Sound of rushing water.

Eyes - Pain in the eyes when opening them. Burning, smarting in the eyeballs. Lachrymation. Itching at the inner canthus. Swelling and redness of the lids, with itching and burning. Edema of the lids. Confusion of sight. Vision obscured. Dimness at candlelight.

Face - Neuralgia. Pain in the left side of the face and lower jaw. **Erysipelas**, burning, smarting, heat, and redness. Boils. Pustules. Vesicles. Pimples on the face and forehead. Large red pimple on the cheek. Eruptions at the angle of the mouth.

Food - Appetite deficient or lost.

Head - Head feels as if it were swelling, and had become too large. Heaviness, fullness. Sensation as if the crown of the head were rising up. Heat, pain, and throbbing in the head. Continual dull pain in forehead. Semi-lateral pain in the temple. Pain over the eye. Headache, with nausea worse when lying down, better after rising. Pain in vertex and nape of neck. Scalp tender. Small elevations. Eruptions. Itching.

Heart - Palpitations of the heart with fullness in the head. Pulse frequent and small.

Kidneys - Pressure on the bladder. Increased secretion and flow of urine. Milky urine. Deep red urine, with pink deposit.

Limbs - **Rheumatism**. Inflammation of the joints with heat, redness, and swelling. **Wandering pains from joint to joint. Traumatic inflammation of the joints**. Instability. **Stiffness of joints**. Weakness, and feeling of heaviness in the limbs, when walking. **Sprains. Dislocated joints. Pain as though the muscles or tendons were strained**. Pain and stiffness in hip. Soreness and excoriation about the nates. **Swelling, stiffness and lameness of the knee, ankle**. Pain in knee, near the patella, worse on moving the joint. Pains in calf when walking. Cramps in the calf when lying in bed, or extending the limb. Pains at the ankles. Sharp pains in the feet. Pains in the sole of the right foot. Coldness of the feet. Coldness, with numbness. Severe pain in shoulder and the acromion process. Aching in the wrists, especially during exertion of the fingers. Numbness of the arms, hands and fingers. Erysipelatous inflammation of the hands and fingers. Vesicles between the fingers. Scratches and injuries tend to inflame and suppurate. Itching, red eruption on the legs, and about the ankles. Vesicles.

Lungs - Dry cough. Hacking cough, excited by tickling. Cough on movement or lying down.

Male - Penis swollen, bloated. Scrotum, inflamed and irritated by walking. Rash in genital area. Vesicles.

Mouth - Increased saliva. Disagreeable bitter or metallic taste. Air feels unusually cold in the mouth. Sore pain, as if the mouth had been scalded. Ulcers. Vesicles inside the mouth. Gums inflamed, tender. Transient throbbing in the teeth. Pains in carious teeth. Toothache, with flow of saliva.

Nose - Frequent sneezing. Nostrils excoriated and encrusted. Fluent coryza, with copious secretion of mucus. Nosebleed.

Rectum - Anus, sore, excoriated, especially after walking. Constipation with head-

Rhus radicans ache. Diarrhea, with slimy, yellow stools. Pale evacuations. Evacuations streaked with blood. Bright blood after a stool.

Skin - Itching, pricking, stinging. Dermatitis. **Poison ivy and poison oak rashes**. Hard, red eruptions. Inflamed tubercles, elevations, hard pimples. Pustules, blisters, watery pimples. **Vesicular eruption**, some disappear without rupture of the cuticle, others burst. Yellow, acrid fluid from eruptions. Erysipelas, especially in hot weather. Small boils. Ulcers. Swelling of the lymphatic glands.

Sleep - Sleepy by day, and early in the evening. Imperfect sleep at night, disturbed by frequent waking. Dreams of danger and horses. Fear on waking.

Stomach - Stomach sensitive to pressure. Severe pain in stomach with dizziness. Shooting, sharp pain. Pain after food. Pressure and fullness in epigastrium. Empty eructations. Nausea. Vomiting of tasteless water.

Temperature - Chills, general or partial, generally in the back. Coldness of the extremities. General body heat with dry skin. Intermittent fever, every day, at 1 p.m. Fever, with pain in the legs. Typhoid fever with brown tongue, red tip.

Throat - Rawness, excoriation. Pricking, smarting, stinging, irritation. Red, hot, burning, and swollen, constriction. Painful deglutition.

Tongue - Tongue feels dry, sore. Burning, pricking. Scalded feeling, tip of the tongue feels sore or burnt. Vesicles at tip. Rough tongue. Yellow coated tongue.

Vertigo - Vertigo, and pains in the limbs. Vertigo with confusion and momentary loss of consciousness.

COMMENTS - Rhus-r. has almost identical action as Rhus-t.; characteristic burning in the tongue, tip feels sore. Pains are often one-sided and in various parts, often remote and successive. Pronounced yearly aggravation (Lach.).

H. C. Allen noted a periodicity in Rhus- r. that marks it as a great anti-psoric. It is, he said, on deeply psoric or tubercular constitutions that its toxic effects are most felt and longest lasting, and these constitutional effects "seem incurable without the anti-psoric."

Guernsey considered Rhus-r. deeper acting than Rhus-t., being indicated in phlegmonous erysipelas, especially where it begins in ankles and moves gradually up the leg, moving in the deeper tissues, with no fever, and for axillary glands when the swelling is very deep and hard.

Millsbaugh summarized the effects of Rhus poisoning: the majority of poisonings have been caused by Rhus-r., as first redness and swelling of the affected part with intolerable itching and burning, followed by vertigo, weariness and a sort of intoxication.

Farrington gave, as distinctive indications for Rhus-r., an occipital headache with rheumatic stiffness of the nape. Drawing, tearing pains in legs. Pleurodynia when the pains shoot into the shoulders.

Mahony reported a case of eczema on the perineum and scrotum with sweat in cleft of buttocks, both relieved in a week with Rhus-r., 12c, twice daily.

RELATIONS - Rhus-r. is said to be antidotal to the action of Rhus-t. and has been employed in the treatment of cases where Rhus-t. had failed. **Compare:** Rhus-t. Anae, and other Anacardiaceae, and the Xanthoxylaceae, which are an allied order.

***RHUS TOXICODENDRON

(Poison Oak)

PHARMACY - rhus-t. Rhus toxicodendron. Poison oak. N. O. Anacardiaceae. Tincture of fresh leaves gathered at sunset just before flowering time. **Historical dose:** All potencies.

CLINICAL - Abortion. Acne, rosacea. After- pains. Allergies. **Amenorrhea. Ankleinjuries.** Anus, fissure. Appendicitis. Appetite, lost. **Arthritis. Beriberi. Back, injuries.** Bones, pain. Cecum, inflammation. Chilblains. Circulation, poor. Cyanosis. Dengue fever. Dermatitis. Diarrhea. Diphtheria. **Dislocated, joints.** Dysentery. Dysmenorrhea. Dyspepsia. Ear, eczema. Ecthyma. Enteric fever. Erysipelas. Erythema nodosum. Exostosis. Eyes, disorders. **Fever, blisters. Fevers.** Gastro-enteritis. Glandular, disorders. Gout. Hemorrhages. Hemor- **Rhus toxicodendron** rhoids. Hernia. **Herpes. Herpes zoster.** Hives. **Hoarseness.** Housemaid's knee. Hydrocele. **Influenza. Injuries.** Intermittent fever. **Joint, injuries.** Liver, abscess. **Lumbago.** Measles. Menorrhagia. Metrorrhagia. Muscular, pains. Neuralgias. Ovary, tumor. Paralysis. Paraphimosis. Pemphigus. Periosteum, pains. Pleurisy. Pleurodynia. Pneumonia. **Poison ivy. Poison oak.** Ptosis. Pyemia. **Rashes.** Relapsing fever. **Rheumatism. Rhus, poisoning.** Scarletina. **Sciatica.** Sleep, restless. Smallpox. Spine, diseases. **Sprains. Strains.** Strictures. **Tendonitis.** Throat, sore. Tongue, disorders. Typhoid fever. Typhus. **Urticaria.** Vesicles. Warts. **Whiplash.** Wens. Yawning.

HERBAL - Poison ivy grows in thickets and low grounds in North America, flowering in June. It was introduced into England as a plant in 1640. In 1798, Dufresnoy of Valenciennes first used it as a medicine.

It was brought to his notice by the cure of a young man of a herpetic eruption (darter) of six years duration, through his being accidentally poisoned with the plant. Dufresnoy used it successfully in eruptive diseases, paralysis, rheumatism and amaurosis.

A peculiarity of the plant is that it is more poisonous during the night, and when bursting into leaf, or at any time in June or July when the sun is not shining upon it. The absence of sunlight together with dampness, seems to favor the exhalation of toxicodendric acid.

"An acrimonious vapor, combined with carburetted hydrogen, exhales from a growing plant of the Poison Oak during the night. It can be collected in ajar and is capable of inflaming and blistering the skin of persons of excitable constitution who plunge their arms into it."

Though it is not certain that Hahnemann used Rhus-t. at all exclusively, Jahr gave a separate presentation of the Rhus radicans symptoms. Under the name of Rhus, Hahnemann published his proving of "Rhus radicans, also called Toxicodendron."

Botanists agree in recognizing no distinction other than that of habit between the two. The milky juice, which turns black on exposure, is used as a marking ink (like Anae.), and as an ingredient in varnishes for finishing boots.

HOMEOPATHIC - Rhus-t. affects the fibrous tissue joints, tendons, sheaths, etc., producing pains and stiffness. Irritating agent to the skin, especially of the face, scalp, genitals and mucus membranes.

Rheumatism in cold damp season. Stiffness of muscles and joints. Motion "**limbers up**" the Rhus-t. patient, hence he feels better for a time from a change of position. Inclination to stretch. **Dislocated joints.** Stretching causes cracking in knees, soreness in abdomen. Sciatica, better by warmth from exercise.

Ailments from straining a single part, muscle or tendon, over-lifting, particularly from stretching high up to reach things. Injuries and traumas to the joints. **Tendonitis.** Sprained ankles. **Whiplash.** Old injuries that never healed, stiffen with weather changes.

Pains are tearing, shooting, stitching, worse at night, **cannot rest in any position. Tearing asunder pains.**

Parts feel sore, bruised and **stiff**. Pains as if the flesh was torn loose from the bones. Dislocated joints sensation. Soreness of prominent projection of bones. Muscles twitch. Crawling, trembling, turning, swelling and lividity.

Severe backaches, chronic, low back pain. Burning in the spine. **Stiffness in the sacrum** that's better with cracking and adjustments. Affections of **nerves and spinal cord** give rise to **paretic effects**. Numbness of parts paralyzed.

Unwanted exercise causes paralysis. Hemiplegia, right sided, sensation as if gone to sleep. Infantile paralysis from exposure to cold damp. Paralysis after unwonted exertion, after childbirth. Over-exertion causes palpitations, aggravates coxalgia. Limbs lain on fall asleep, no sweat on them. Ailments from getting wet, while perspiring.

Septic conditions. Cellulitis and infections, carbuncles in early stages (Echi.). **Septicemia**.

Inflammation and swelling of the long bones, scraping, gnawing, tearing loose in periosteum. Strictures after inflammation. Mucus discharges are acrid, rusty red like meat water, musty, causing eruptions. Postoperative complications.

Influenza. Smallpox. **Glands are swollen**, hot and painful indurated, suppurating. Boils, abscesses. **Typhoid-like fevers**. **Headache in occiput**, even pain in nape of neck, and from there pains draw over the head forwards. Jaws are tight and stiff, can crack and pop. Coldness in left tibia.

Symptoms appear on the left side or go from left to right. Characteristic modalities, particularly worse at night and from damp. "The more he moves the better he is," (opposite of Bry.). Worse during rest, and after rest.

Nausea, worse after eating. Craves cold water, which is vomited immediately. Many symptoms are better after a storm, especially after an electric storm.

MIND - Confusion. **Mind and senses becomes cloudy**. Low, mild delirium, incoherent talk, answers correctly but slowly, or hastily, or reluctantly. Forgetful and cannot remember the most recent events. Recalls with difficulty things and names. Vanishing of thoughts while standing. Can't hold mind on one subject long enough to answer. Stupor, with tingling in head and pains in limbs, better motion.

Anxious, sadness, helplessness and profound despondency. **Causeless weeping, without knowing why**. Inclination to cry, worse in evening without knowing why, with desire for solitude. Forsaken feeling.

Inexpressible anxiety with pressure at heart. Anxiety about one's children. Anxiety, worse twilight, with restless change of place. **Great apprehension at night, cannot remain in bed**. Mental and physical restlessness at night. **Extreme restlessness with continued change of position**. Restlessness during menses.

Anguish as if she had committed a crime or as if some terrible calamity impended, driving her from one place to another. Superstitious fears. Fears, with sighing, worse at night. Fear and despair on account of sad thoughts. Delirium with fear of being poisoned (Hyos.). Complaints from fright.

Fretful, impatient, ill-humored, easily vexed. **Irritability at night, better walking in open air**. Discouragement and dissatisfaction. Satiety of life. **Dwells on past disagreeable occurrences after midnight**. Talking of business in sleep.

Aversion to company alternating with bursts of pleasantry and sarcasm. Delusion he is roaming over fields, or hard at work. Delusion of being watched. Suicidal disposition in twilight. Thoughts of suicide, wants to drown himself.

Abdomen - Ileo-cecal symptoms, appendicitis. Swelling of inguinal glands. Incarcerated hernia. Hourglass contraction. Excessive distention after eating. Mucus colitis. Colic after getting wet. Colic, compelling to walk bent. Violent pains, relieved by lying on abdomen. Pain in region of ascending colon. Rumbling of flatus on first rising, but disappears with continued motion. Soreness of navel. Sensation as if water swashing in abdomen. Sensation as if a lump in abdomen.

Back - Back strain or injury. Pains from over-lifting or overuse. Backache, as if back would break, better hard pressure. **Backache, compelling him to move constantly in bed**. Contractive or breaking backache, better hard pressure, lying on something hard, walking about or bending backwards. **Pain and stiffness in small of back, better motion or lying on something hard**, worse while sitting. Pain between shoulders on swallowing. Aching and stiffness in lumbar region as after long stooping or bending. Burning in lumbar region. Lumbago, coccyx aches into thighs. Curvature of dorsal vertebrae. Acute spinal paralysis of infants. Spinal membranes inflamed, from getting wet or sleeping on damp ground. Myelitis. Stiffness and lameness in sacrum, worse resting.

Breasts - Great soreness of nipples after confinement. Breast pain with itching, burning papular eruption about nipples.

Causations - Effects of drinking cold water (Bell-p.), beer (headache). Cold, getting wet, especially after being heated, cold bathing, sea bathing (Mag-m.). Wetting head, damp sheets, bathing. Slightest anger. **Strains**,

over-exertion, **over-lifting**. Raising arms high to lift things.

Chest - Oppression of the chest, cannot get breath, with sticking pains. Tickling behind upper sternum, causing dry, hoarse, tearing, tormenting cough. Tingling in chest with tension in intercostal muscles, worse rest. Numb sensation in chest. Chest pains worse using arms. Pleurodynia, chest pains shoot into shoulders. Pain as if sternum were pressed inward. Stitches in chest and sides of chest. Herpes axillaris. Axillary abscess after delivery.

Constitutions - Suited for the psoric or tubercular constitutions. Rheumatic constitutions.

Cough - Bronchial coughs in old people, worse on awaking and with expectoration of small plugs of mucus. Dry teasing coughs. Dry coughs from midnight until morning. Coughing and sneezing worse uncovering body (Rumx.). Coughing during chill, or when putting hands out of bed. Coughing prevents sleep at night. Cough with profuse sweat and pain in stomach. Frequent hacking cough with bitter taste in throat.

Ears - Lobes swollen. Swelling of ears. Otagia. Pain in ear with a feeling as if something were inside. Painful throbbing in ear at night. Discharge of bloody pus, with deafness.

Eyes - **Orbital cellulitis**. Suppurative iritis. Iritis after exposure to cold, dampness. Iritis of rheumatic origin. Corneal injection with intensive ulceration. Suppuration of cornea. Ulceration of cornea. Glaucoma. **Pustular inflammations**. Saccular conjunctiva. Acute retro-bulbar neuritis. Swollen, red, edematous. Profuse flow of yellow pus. Lachrymation when yawning. Profuse gush of hot, scalding tears upon opening lids. Photophobia. Eye painful on turning it or pressing. Paralysis of the eyeball muscles. Eyelids, stiff agglutinated, dry, firmly closed. Edema of lids. Ptosis. Styes or abscesses, on lower lids. Old eye injuries.

Face - Pale, sickly look, with sunken eyes. Blue rings about eyes. Cyanosis of face and hands. **Swollen face**. Erysipelas, shining redness with formation of vesicles. Moist eruptions and thick scabs on face. Suppurating eruptions on face. Acne rosacea. **Crusta lactea** (Calc., Viol-t.). Corners of mouth ulcerated. **Fever blisters around mouth and chin** (Nat-m.). Red spots on left cheek. Parotiditis (left) with fever. Joints painful. Pains in maxillary joint. Painful cheekbones, sensitive to touch. Facial neuralgia with chilliness, worse evening.

Female - Amenorrhea, from getting wet with milk in breast. Menses early, profuse and prolonged, acrid. Menstrual flow light-colored and acrid, causes biting pain in vulva. Dysmenorrhea, cramping, with backache, worse lying on back. Membranous dysmenorrhea in rheumatic women. Violent pain in vulva during menses. Soreness in vagina shortly after sex, or preventing coition. Swelling with intense itching of vulva. Bearing down pain when standing or walking, with backache. Pelvic joints stiff when beginning to move. Consciousness of uterus. Prolapse uterus from lifting overexerting. Uterine infection, septic. Polyps of uterus after getting chilled from sea-bathing. Metrorrhagia, clotted blood, with labor-like pains. Miscarriage from a strain. **Lochia thin, protracted offensive diminished** (Puls., Sec.). **Lochia with shooting pain upwards in vagina** (Sep.). Frequent after pains.

Food - No appetite for any kind of food. **Drowsy after eating**. Food tastes bitter, especially bread. Desire for sweets, oysters, tonics, beer, acids. **Desires cold milk, yogurt and cheese**. Dairy relaxes. Nausea worse from ice cream. Aversion to meat and bread. Great thirst with dry mouth and throat. Drinks little and often during fever. Craves cold drinks, though they aggravate cough, chill. Worse after ice-water. Sweats from warm drinks. Pulse affected by beer, coffee or alcohol. Aversion to spirituous liquors, beer.

Head - Headache in occiput (Rad-br.), painful to touch. Stupefying headache, must lie down, worse least chagrin. Headache after taking a cold bath, from beer, immediately after a meal. **Heavy feeling** in head. Pain in forehead, proceeding backward. Feels as if a board were strapped on the forehead. Brain feels loose and as if struck against skull on walking or rising. Burning in forehead when walking. Aching in occipital protuberances. Painful tingling in head, occiput. Vesicular erysipelas of scalp, going from left to right. Dry herpes on hairy scalp. Scalp sensitive, worse on side lain on. Humid eruptions on scalp, itching greatly.

Heart - Hypertrophy from overexertion. Weak and tremulous feeling about heart, after walking. Acute, stabbing pains in cardiac region on deep inspiration or raising left arm suddenly. Heart feels tired, pains go down left arm. Left arm aches with heart disease. Anxious palpitations in morning on awaking. Palpitations after overexertion. Severe palpitation and pain in heart when lying on left side. **Trembling and palpitations when sitting still**, better from walking. Pulse quick, weak, irregular. Pulse intermittent with numbness of left arm.

Limbs - Arthritis and rheumatism. **Stiffness of all the joints, better warmth, motion and massage**. Hot, painful swelling of joints. **Cracking of joints when stretching**. Synovitis. Rheumatic pains spread over a large surface at nape of neck, loins and limbs, better motion (Agar.). **Pains tearing in tendons, ligaments and tissues**. **Sciatica**, worse cold, damp weather, at night. Sciatica better warmth, exercise. **Limbs stiff, paralyzed**, the cold fresh air is not tolerated, it makes the skin painful. **Numbness and prickling in limbs after over-work and exposure to damp**. Paralysis, trembling after exertion. Paraplegia after childbirth, sexual excess, fever. Pain along ulnar nerve. Soreness of condyles of bones. Tension as from shortening of muscles. Legs feel dead, wooden. Involuntary limping. Tearing pains down thighs. Tenderness about knee. Cramps in

calves.

Ankles or knees are swollen, stiff after sprain or injured. Tingling in feet. Sensation as if walking on needles. Itching of legs and feet. Gangrenous ulcers on legs, runs bloody water, on dropsical legs. Cold hands and feet. Arms nervous and shaky (left). Paralytic pains in elbows. Loss of power in forearm and fingers, crawling sensation in the fingertips. Cracks on back of hands. Palms, dry, hot, cracked and sore, washing causes burning.

Lungs - Oppressed breathing, as if breath were stopped at pit of stomach. Anxious breathing, as if not able to draw a long breath. Hurried and very short breathing at night. Dyspnea from pressure and painfulness in pit of stomach. Hot air from trachea. Shortness of breath during stool. **Asthma alternating with skin eruptions.** Hemoptysis from overexertion or from blowing wind instruments. Hemoptysis bright blood. Sudden hypostasis or edema of lungs. Pale, clotted or brown blood. Rust colored sputum. Expectoration, acrid pus. Gray-green cold mucus of putrid smell. Pneumonia with typhoid symptoms, often after reabsorption of pus.

Male - Painful, persistent erections, better lying on back. Erections at night with desire to urinate. **Intense itching** of genitals. Dark-red, erysipelatous. Humid vesicles on glans. Humid eruptions on genitals and between scrotum and thighs. Swelling of glands and prepuce. Paraphimosis. Hydrocele from over-lifting. Scrotum, swollen, **edematous**. Scrotum thick and hard, with intolerable itching. Edema of scrotum and penis after scarlatina, with recurrence of fever. Metastasis of mumps to testes.

Modalities - **Better from heat**, hot bath, warm wrapping, warm applications. Better warm dry, weather. **Better stretching limbs, continued motion**, change of position, walking. Better rubbing, holding affected part, abdomen, head. Better from nosebleed. **Worse from cold, dampness, wet rainy weather. Worse before storms**, after rain. **Worse exposure to wet, cold**. air, draft. Worse being chilled, when hot or sweaty, ice cold drinks. Worse uncovering parts. **Worse beginning of motion, rest, sprains**, blows, jar. **Worse overexertion, lifting**, after exertion. Worse prolonged sitting, rising from bed or a seat, riding. Worse at night, after midnight, during sleep, lying on back or right side. Worse on side lain on.

Mouth - General dryness of the mouth, with thirst. Coppery, herby, **or bitter taste** (Cupr.). Salivation, must spit frequently. Much tough mucus in mouth and throat. Bloody saliva runs during sleep. Gums sore. **Mouth filled with herpes sores**. Herpes on lips. **Fever blisters around mouth and chin** (Nat-m.). Lips dry and parched, covered with reddish-brown crusts. Lips, dry, brownish, cracked, at corners, crusty. Corners of mouth cracked, ulcerated. **Jaw's crack when chewing**. Cramp-like pain in joint of jaw, when yawning. **Pain in maxillary joint**. Easy dislocation of jaw (Ign., Petr.).

Neck - Carbuncle on nape. Neck strain or injury with stiffness. **Neck stiff after injuries. Whiplash**. Stiff neck with painful tension, when moving. Stiff neck from a draft, or dampness, better heat and massage.

Nose - Swelling of nose. Violent aching in bones of the nose. Red, sore, ulcerated tip of nose, drips water. Soreness in nostrils. Hot breath burns nostrils. Dryness and stoppage of nose. Sneezing with fluent coryza, from getting wet. Spasmodic sneezing after sudden cessation of cough. Sneezing and coughing worse uncovering body. Nasal discharge thick, yellow mucus, green, offensive pus. Nosebleed, worse at night, stooping, at stool, gives relief in fevers. Loss of smell.

Perspiration - Sudden outbreak of sweat while sitting, often with violent trembling. Sweats with violent itching of eruptions. Perspires with pains, often with trembling. Sour, musty, putrid sweat. Perspires all over, except on head. Profuse sweat on exterior parts of body, but not on parts on which she lay. Sweat, worse during pain, with sleepiness. Night sweat with miliary itching eruption. Profuse sweat in morning.

Rectum - Constriction in rectum. Shooting pain up rectum. Painful tenesmus without stools. Colitis mucosa. Dysentery with tearing pains down thighs. Diarrhea alternating with constipation. Diarrhea of blood, slime and reddish mucus. Diarrhea after walking through moist ground with bare feet. Remission of pains and urging after stools. Fissure of anus, with periodical profuse bleeding. May abort a beginning suppurative process near the rectum. Hemorrhoids, worse lifting. Hemorrhoids protruding after stool, with pressing in rectum, as if everything would come out.

Sensations - As if intoxicated. As if asleep. As of a band strapped across forehead. As if head were swelling out. Brain, as if loaded, as if torn, as if loose, as if fluctuating, as if a quantity of blood shot into it when stooping. As of a weight behind right orbit. Legs as if made of wood. As if hamstrings and tendons of limbs too short. As if walking on needles. Joints as if bruised. As if bones ached. As if sinking through bed. As if whole body was burning. As if cold water poured over him. As if blood ran cold through veins.

Skin - Skin sensitive to cold air. Dry, hot, burning. Red, swollen, **intense itching. Cellulitis. Dermatitis**. Eczema. Burning eczematous eruptions with tendency to scale formation. **Poison ivy, oak. Shingles, herpes zoster**. Burning and neuralgic pains after herpes zoster. Herpetic eruptions alternating with dysentery and pains in chest. Boils and abscesses. Vesicles, herpes, pemphigus, erysipelas, vesicular suppurative conditions. Vesicles over abscess. Hives. **Urticaria** from getting wet with rheumatism. Urticaria during chills

and fever. Bluish, gangrenous carbuncles. Smallpox. Swollen glands. Milk crusts. Baker's itch. Warts on hands and fingers. Pus erodes the hair. **Itching better hot water.** Itching with burning and smarting, feeling as if pierced with hot needles. Itching all over, worse on hairy parts. Itching worse sweating. Burning after scratching. Rubbing affected part aggravates eruptions. Eruptions, alternating with dysentery.

Sleep - Drowsy after eating. Yawning, frequent, violent, spasmodic. Yawning without inclination to sleep. Yawning with stretching. Sleepy during day, sleepless at night, with inability to remain in bed. Sleepless before midnight. Sleeplessness at night with burning of whole body. **Restless sleep tossing about can't get comfortable.** Sleep prevented by cough. Heavy sleep, as from stupor. Sleeps with mouth open. Somnolence with snoring, muttering and grasping at objects. Laborious dreams. **Dreams of great exertion,** rowing, swimming, working hard at his daily occupation. Dreams that the world was on fire, with palpitations on awaking. **Awakens, stiff and sore must stretch.** Awakes tired or nervous.

Stomach - Hunger and emptiness in stomach, without appetite. Fullness as if overloaded. Pressure as from a stone (Bry., Ars.). Pressure in pit, as if swollen or as if drawn together. **Pain in stomach after ice water.** Ulcerative pain in stomach. Violent throbbing in epigastric region. Eructations with tingling in stomach, worse rising from lying. Nausea, vertigo and bloated abdomen after eating. Nausea, worse from ice cream, at night. Vomiting while lying on back. Vomiting from coughing.

Stools - **Involuntary stools with great exhaustion.** Stools involuntary during sleep, or with tenesmus, worse drinking. Stools, lumps of transparent mucus. Stools, frothy, watery, slimy, gelatinous, painless, bloody. Black blood from bowels. Stools of cadaverous odor.

Teeth - Teeth feel as if asleep. Teeth feel loose and long. Sensation as if teeth were being torn out. Shooting pain, in evening and night, better external heat. Teeth painful with stinging at root of nose. Toothache at night, better application of cold hand. Toothache worse at night, cold, vexation. Sordes on teeth. Gums sore.

Temperature - Easily chilled, worse least uncovering with pain in limbs. Chills, as if cold water were poured over him, followed by heat and inclination to stretch the limbs. Chills as if cold water in the veins, preceded by cough, alternating with heat. Chill in single parts. Wants to yawn and stretch during chill. **Intermittent fever,** chill with dry cough and restlessness. Rapid alternations of burning heat and shivering. Sudden flushes of heat follow or alternating with chills. Fever after chill, with sweat which better. General heat, as from hot water or hot blood running through veins. **Influenza fever, restlessness, stiff and sore,** with aching in all bones (Eupper.). **typhoid fever,** tongue dry and brown, sordes, bowels loose, great restlessness. Fever with busy delirium. Urticaria during fever. Hydroa.

Throat - **Sore, stiff feeling in throat after straining throat.** Sore throat with bruised pain. **Soreness,** better warm drinks with swollen glands. **Hoarseness from overstraining the voice** (Arn.). Hoarseness, better after talking a while. Hoarseness with roughness and soreness in chest. Hoarseness, worse evening and change of weather. Red, puffy itching fauces. Sensations of dryness of throat. Sore throat with swollen glands. Esophagitis from swallowing corrosive matter. Tonsils covered with yellow membrane. Larynx cold when breathing. Sticking or stinging pain in tonsils, worse beginning to swallow. Difficult swallowing of solids as from contraction of saliva.

Tongue - Tongue, red and cracked, dry and red at edges. Tongue shows imprint of teeth. **Tongue coated, except red triangular space at the tip.** Tongue coated diagonally or on one side only. Yellowish- white coating at root of tongue. Tongue coated with brown mucus, except on edges, in morning on rising. Feeling as if tongue covered with skin.

Urinary - Nephritis. Tearing pain in region of kidneys with edema, worse after exposure to wet. Dysuria with loss of blood. Retention of urine, with restlessness and backache. Tenesmus of bladder, with discharge of a few drops of blood-red urine. Dark, high colored, white sediment, scanty urine. Urine turbid when passed. Urine passes in a divided stream. Frequent, profuse urination day and night. Frequent and painful urination from prolapsed uterus. Incontinence of urine, worse lying at night, or sitting in boys. Dribbling of urine in cold air or from becoming cold.

Vertigo - Vertigo with heaviness in limbs.

Vertigo when rising, as if she were going to fall forward or backward. Vertigo while walking. Vertigo with staggering, as if intoxicated. Vertigo in the aged, whirling, then headache. Nausea, vertigo and bloated abdomen after eating.

COMMENTS - The worst poisonings with Rhus divers, happened to persons who were moist and heated. One prover of Rhus-t. was not influenced by contact with the leaves when his skin was dry, but only when perspiring. Millspaugh noted several instances of rhus poisoning. In one poisoning case, ten men were employed to clear a piece of land of shrubs, among which the poison vine predominated; only four escaped without symptoms. "Most of the men soon began to show signs of being tired and at the end of the fourth day six of them were

flat on their backs too sick for anything.”

Actual contact with the plant is not necessary in order to produce its effect. One such instance occurred on a sultry day in June. A young woman drove a croquet ball across a lawn to a clump of poison ivy that grew beside it. Knowing her susceptibility, she reached under the plant and drew out the ball without touching a leaf.

In the evening of the same day her face began to itch and burn. That night her face swelled so badly that the eyes were not merely closed, but the lashes even disappeared in the swelling. It took nearly two weeks for her to recover.

Generally, there is infiltration of the face and eyes, and agglutination of the lids after sleep. Great restlessness, pain, thirst and fever. The surface of the skin becomes studded with confluent bullae where the cellular tissue is loose.

Then a dermatitis follows, resembling erysipelas; this may spread rapidly and finally be communicated to the mucus membranes. This is followed by swelling of the mouth and throat, cough, nausea and vomiting.

Rheumatoid pains develop about the joints and a painful stiffness asserts itself in the lumbar region while the legs and arms become numb. Confusion of mind and delirium may then set in, during which the patient may become so ill-humored, restless and anxious that he will jump out of bed.

Concomitants include inflammation of the eyes, dilation of the pupils, weak vision, and sometimes diplopia. Nosebleed, brown-coated tongue with triangular red tip. Swelling of parotids, difficult swallowing. Gripping, diarrhea, profuse urination. Oppression, rapid pulse, prostration, soreness of muscles, worse by exercise, bleariness, chilliness followed by fever and copious sweat.

Neidhard added a note which brought out a modification of “worse by rest,” which is of the greatest practical importance. Neidhard said that the disease in which he had made the most use of Rhus-t. is a form of rheumatism common in North America and characterized by the following symptoms:

“Rigidity, paralytic weakness of the joints with stinging pain along the tendons and muscles. Swelling and redness on or near the joints. Rheumatism of the hip joint and wrist seem to be most effectually controlled by its action. The greatest rigidity and pain is experienced on first moving the joints after rest and on waking up in the morning. After the joints are moved for a while the pain is lessened.”

Nash noted that the restlessness of Rhus-t. will be found to qualify the symptoms in a large proportion of the cases in which it will be called for. It is as restless as Aeon, and Ars., but in a different way from either. With Rhus-t. it is due to the pain and soreness, temporarily better by movement or a nervous internal uneasiness which makes the patient want to be on the move when there is no particular pain present.

Conditions can often change from Rhus-t. to Bry., as well as the reverse. Hahnemann wrote about “these two antagonistic sister remedies.”

Each in its place successfully met with typhus which prevailed in the countries desolated by the war which raged from the summer of 1813 and onwards. Of 183 cases treated by Hahnemann in Leipzig, not one died. Hahnemann perceived the keynote of the Rhus-t. symptoms: “We observe,” he said in his preface to the proving, “this curious action, the severest symptoms and sufferings are excited when the body or the limb is at rest and kept as much as possible without movement.

“The opposite of this, namely, an increase of the symptoms by movement is much more rarely observed.” He contrasted Rhus-t. with Bry., which has almost the same rheumatic pains but with opposite modalities.

Hahnemann pointed out another keynote of Rhus-t. : “Multiplied experience has taught me that Rhus-t. is the most efficacious and the specific remedy for the frequently fatal effects of over-lifting inordinate exertions of the muscles and contusions.” He might have been led to this inference by the “bruised and sprain-like pains” and “stiffness” of the provings. Rhus-t. is in the front rank of vulneraries.

Restlessness in fevers, typhoid and other. Clouded sensorium, stupefaction, muttering delirium. Characteristic stiffness, better heat, manipulation. Worse remaining in one place and sitting. Worse damp weather, causes stiffness. Worse in the morning, better from hot shower. Worse twilight (Puls., Phos.).

Demands exertion, better from exertion, exercise. Tendency to overwork physically. Stiff personality. Worrisome. Tendency to dwell on things. Projects into the future. Difficulty relaxing. Can turn to exercise as a cure for tension, may become an addiction.

Irritable, bored without a physical outlet. Can have fixed ideas, superstitions. Fear of not functioning, of injury. May have a history of auto accidents, fear of accidents, of fast motion in a car (Calc.). Fear of infection.

Rheumatoid arthritis. Rheumatic paraplegia from getting wet, lying on damp ground, sleeping in damp sheets after exertion, after childbirth, sexual excess or fevers. Paralysis of single limbs. Numbness of parts paralyzed. Facial neuralgia, lumbago and sciatica (left side) with restlessness, coming on after a wetting or after a bath. Ptosis. Neuralgic pains.

Burning pains, better heat, particularly in blistering skin rashes or allergic reactions. Skin can feel tight, like its wrapped. Dermatitis. Chickenpox (Puls., Sulph., Ant-t., Ant-c.). Scalp sensitive, worse turning hair back.

Herpes zoster. Herpes alternating with asthma and dysentery. Fever blisters around mouth, herpes in the mouth. Yellow blisters in herpes. Shingles. Inflamed and burning blisters. Rheumatic fever. Flu. Chronic sinusitis, colds and sore throats. Sore throat with hoarseness. Straining, rheumatic coughs. In intermittents, "cough during the chill." Taste of blood with cough (no blood being raised). Chokes easily on swallowing. Swallowing causes pain in middle of back. Tongue is dry or dark, coated with a triangular red tip. Craving for cold drinks, milk, yogurt and cheese. Dairy relaxes. Likes sweets. Aversion to meat and bread. Anorexia. Nausea in chest. Hour-glass contraction of abdomen.

Threatened miscarriage from a sprain. Prolonged after pains and other effects of the strain of a severe labor. Axillary abscess from severe labor.

RELATIONS - Antidotes: Bathing with milk and Grindelia lotion very effective. Aloe vera gel topically. Desensitizing against Poison Ivy by use of ascending doses of the low potencies by mouth is recommended. Especially for acute reactions: Rhus-t. 30c and 200c and Anae., Crot-t., Grind., Mez., Cypr., Plumbg. - eczema of vulva., Graph. **Compare:** (1) Rhus-r. (2) Rhus-d. - California Poison-oak, antidote to Rhus-t., violent skin symptoms with frightful itching, much swelling of face, hands and genitals, skin very sensitive, eczema and erysipelas, great nervous weakness, tired from least effort, goes to sleep exhausted. (3) Xero. - dysmenorrhea and skin symptoms. (4) Am., Bapt., Lach., Ars., Hyos. (4) Op. - stupefactions more profound. (5) Mim-h. - Sensitive Plant - rheumatism, knee stiff, sharp pains in back and limbs. Swelling of ankles. Legs tremble. (6) Ampe-tr. - Toxic dermatitis due

to vegetable poisons. Very similar to Rhus poisoning. **Complementary:** Bry., Calc-f. Phyt. (Rheumatism). In urticaria follow with Bov. **Inimical:** Apis.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***RHUS VENENATA

(Poison elder)

PHARMACY - rhus-v. Rhus venenata. Poison elder. Poison sumac. Swamp sumac. N. O. Anacardiaceae. North America in swampy ground. Tincture of fresh leaves and stem. **Historical dose:** All potencies.

CLINICAL - Boils. Chilblains. Diarrhea. Dyspepsia. Dysphagia. Eczema. Emissions. Erysipelas. Erythema nodosum. Glands, cervical, ulceration. Hemorrhoids. Herpes. Hydroa. Impetigo. Irritation. Lips, swollen, sore. Lumbago. Measles. Menorrhagia. Ophthalmia. Paraplegia. Prurigo. Purpura. Scabies. Sore throat. Stiff neck. Tongue, cracked. Urticaria.

HERBAL - Named "Rhus Vernix," the name belongs properly to the allied Vamish-tree of Japan. Rhus-v. in one of the most actively poisonous of the Rhus.; the skin symptoms of this species are most severe.

HOMEOPATHIC - P.B.Hoyt, who first drew attention to it and made the first provings, said it is more poisonous than Rhus-t., which he could handle with impunity, while he was violently affected by Rhus-v. in spite of extreme caution. Further, he considered it more actively curative in a case of Rhus sore throat, when Rhus-t. failed, Rhus-v. acted with excellent effect.

Persons poisoned by Rhus-t. are more liable to be poisoned by Rhus-v. Children are more readily poisoned than adults. Rhus-v. in the potency is credited with the cure of Rhus-t. poisoning.

Butman observed that blondes are more susceptible to Rhus-v. poisoning than brunettes. When once affected, persons are liable to a renewal of the affection (without further poisoning) each year at the same time.

Rhus-v. has many symptoms referring to the bones and, according to Hering, it affects those parts where the bones are directly covered with skin, especially the forehead, backs of fingers, etc.

Pain as if sprained. "Pain half way down the esophagus" which is probably a variant of the Rhus-t. "Pain between the shoulders on swallowing food." Eating raw things aggravates burning of lips. Diarrhea 4 a.m. Washing with cold water or snow improves itching on back. Chills in warm room.

Clarke found Rhus-v. an excellent remedy for arsenical overdosing. A minor use of Rhus-v. is as a topical remedy in itching, burning chilblains. The tincture painted on relieves almost instantly and practically cures the chilblains in a large number of cases.

MIND - Great melancholy. Gloomy and depressed. No desire to live.

Abdomen - Pain in hypogastrium before every stool. Stools with colicky pains, expelled with force. Profuse, watery, white stools in morning, 4 a.m.

Back - Back very stiff. Sharp pain under left scapula, extending through to ribs. Rheumatic pains between scapulae. Lumbago from a strain or a cold.

Breasts - Burning in left breast and left side of body. Breast must be supported, it aches when it hangs down,

Chest - Violent stitches through chest with great suddenness.

Ears - Transient stitches in right concha. Jerk-like tearing in bone behind right ear. Earache, hammering-

throbbing deep in ear after dark. Jerk-like cutting stitches in ear. Vesicular inflammation of ears.

Eyes - Eyes nearly closed with great swelling, red. Eyes ache as though pressed on. Eyes feel as if sand in them.

Face - Heaviness in swollen face. Boring in right upper jaw. Itching of upper lip and chin. Lips sore, swollen, blistered, cracked. Sensation as if sand on lips.

Female - Menses with very large clots like pieces of meat. Soreness of vagina during menses.

Head - Heavy, frontal headache, worse walking or stooping.

Limbs - Paralytic drawing in right arm, especially wrist and extending to fingers.

Modalities - Better moderate exercise or open air. Better hot bath, gently rubbing and scratching. Worse before stools. Worse damp days, hot weather. Worse rest, after waking, morning. Worse mental exertion, touch and pressure. Motion aggravates pain in elbow. Walking aggravates frontal headache.

Neck - Stiff neck or crick in neck. Ulceration of cervical glands.

Nose - Nose red and shiny, redness not removed by pressure. Nose dry, sore. Erysipelas. Both nostrils filled with tenacious mucus. Loss of smell.

Rectum - Neuralgic pains in anus. Intolerable burning and itching in anus. Bleeding hemorrhoids with extensive itchings and burning. Discharge of blood from rectum after a stool.

Sensations - As if mouth and throat had been scalded. As if sand on lips in mouth. Sensation in arm as if the bone would break. Pains wander about, upward and downward along the periosteum, come and go suddenly, chill runs up back.

Skin - **Vesicles. Erysipelas, skin dark red.** Itching, relieved by hot water. Erythema nodosum with nightly itching and pains in long bones.

Temperature - Chills over whole body, run up back even when warm and in a warm room. Feeling of coldness when moving.

Throat - Irritation and acidity about throat and eyes. Tonsils red, congested, dull aching distress in them. Soreness left side throat. Frequent desire to swallow. Swallowing difficult.

Tongue - Red at tip. Fissured in middle. Vesicles on under side.

COMMENTS - Hoyt, wishing to prepare a tincture, went to a swamp and procured a sample. He wore a pair of buckskin gloves and kept carefully to the windward side of the plant.

Nevertheless, in an hour and a half a most intense itching and burning (more burning) set in scrotum and penis. The glans was very painful, slight friction better for a moment the itching but not the burning.

The symptoms continued through the next day. At 11 a.m. he made the tincture, using great caution in manipulating the plant. At 3 p.m. itching and burning began on back of right hand. A restless night followed.

He awoke in the morning with itching, especially on palmar surface of wrists. This spread all over his body, symptoms steadily advancing. Dizziness, eyes and ears became affected, fever set in. When the symptoms passed off it was found that some chronic dyspeptic symptoms and inflammation of the eyes had been much benefited.

Clarke frequently used Rhus-v. with good effect in skin diseases. Bayes told him of a case of universal eczema with intense in an old man which he cured in a fortnight with Rhus-v.

A case of pemphigus in a young man of 27 came after years of treatment under allopathic specialists who had given him arsenic until they could give no more, telling him at the same time that nothing but arsenic could do him any good. Rhus-v. 3x and 30c completely cured in a few month and the cure enabled the patient to marry. Hale had a case showing the comparative action of Rhus-v. with Rhus-r and Rhus-t. A woman had several times every year a sore mouth with intense redness of mucus membrane of tongue, cheeks and fauces, in small vesicular points intense burning and feeling as if mouth and throat had been scalded.

If unchecked, every mucus membrane, including those of rectum and vagina, became involved. No remedy helped until Rhus was tried. Rhus-r. and Rhus-t. only slightly relieved, but Rhus- v. 3c always removed the affection quickly.

RELATIONS -Antidote: Clem. The California Poison-oak (Rhus-d.) is identical with it. **It antidotes:** Rad. and follows it well. **Compare:** (1) Skin - Anae., Com., Rhus-t. (2) Stitching pains, Kali-c. (3) Wandering pains, Puls. (4) Pains come and go suddenly, Lyc. (5) Pain at root of tongue, Kali-i.

***RIBES NIGRUM

(Black Currant)

PHARMACY - ribs-n. Ribes nigrum. Black currant. Leaves, fruit. **Historicaldose:** Tincture and all potencies.

CLINICAL - Arteriosclerosis. Arthritis. Colic. Gout. Gums, bleeding. Hoarseness. Kidney, problems. Rheumatism. Sore, throat.

HERBAL - Ribes nigra is a diaphotic, diuretic, sudorific, refrigerant, detergent, and has been used as a substitute for tea as it also contains tannins. The leaf tea stimulates the kidneys and is good for gouty and rheumatic problems, as well as for arteriosclerosis. Drunk cold, it is also useful for hoarseness and other throat ailments.

Both the leaf tea and the expressed juice of the berries can be used for whooping cough in children. The berries or their juice is beneficial for kidney problems and colic pains. An infusion of the dried berries can be used as a gargle for inflammation in the mouth and throat and as a mouthwash for bleeding gums.

***RIBONUCLEINICUM ACIDUM

(RNA)

PHARMACY - rib-ac. Ribonucleinicum acidum. RNA. Ribo nucleinic acid. **Historical dose:** All potencies.

CLINICAL - Allergies. Cancer. Eczema. Epilepsy. Herpes. Hypoglycemia. Hypotension. Hypothyroidism. Insomnia. Leukemia. Urticaria. Varicose ulcer. Weight, unstable.

HOMEOPATHIC - The proving of RNA was conducted in 1971 and 1972, by O. A. Julian. Twenty-two people, two females, took part in the experiment, taking the 3x, 7c, and 30c potencies, plus a placebo, in a single-blind trial.

Symptoms are the result of provings incorporated with the clinical research of several Belgian homeopaths, including Dr. Guiot of Wavre who gave a report on a self-proving. Recommended by Jenaer for treatment for cancer and leukemia.

Lively feeling, optimistic, dynamic. General lassitude. Lessened physical strength. Feels depressed, ill at ease in his skin. Wants to run, to disappear. Tiredness, vertigo, stiffness. Tired in the morning to the point of not hearing the alarm bell ring. Sleepiness.

Extreme chilliness. Cortical and medullary hyposthenia. Endocrine glands produce a mucus which is too viscous. Slight edema of the feet and hands.

Desire to sleep, to eat, to make love. **Hunger with need to nibble throughout the day, especially sugar.** Unstable weight, sudden increase in weight, then sudden loss of weight two days later.

WIND - Psychological and physical slowness. Mental over-exertion. Cannot concentrate on intellectual work. Dullness of mind. Slowness at schoolwork. Personality disorders in children.

Ugly character. Aggressiveness. Wants everything and nothing. Cannot bear anything, cries at anything. Clings on to everything, breaks everything and becomes even more annoyed. Feels as if he is living on his nerves. Desire to go away, to escape. Feels weary and leaves everybody.

Abdomen - Distention, especially at the end of the afternoon. Cramps in the transverse colon at 4 p.m. Biliary sycosis. Entero- pancreatic syndrome.

Back - Joint pains in the shoulders and feet. Pain all along the vertebral column.

Blood - Circulatory discomfort. Hypotension. Leucopenia. Leukemia.

Constitutions - Allergic, psoric, tubercular constitutions. Cancerous conditions.

Female - Increase in libido. Sexual weakness. Frigidity. Fetid leucorrhea. Mycosis vaginitis.

Food - Extreme hunger. Must eat often. **Strong desire and need to eat sugar.** Hypoglycemia. Hungry sensations. Desires vinegar and cold, spicy food, which goes down more easily. Aversion to fats and hot food. Loss of appetite.

Limbs - Lymphaedema. Arthralgia in the back and lumbar regions. Swelling of the lower limbs, more marked in the morning and the evening. Hands and feet slightly swollen. Infection around the nails, especially of the index, second and third fingers of the right hand.

Male - Increase in libido. Impotence.

Modalities - Better from lying on the stomach (Med.), worse from lying on the back. Worse from the cold.

Mouth - Fever sores on the middle of the lower lip.

Nose - Small pimples in the nostrils.

Rectum - Tendency to constipation. Watery diarrhea with colic.

Skin - Recurring herpes. Tendency to eczema. Chronic recurring eczema. Small red patches on the forehead, disappearing rapidly. Urticaria. Varicose ulcer. Fissures on the heels and the skin of the heels flakes off in long strips. Tendency to reopening of old healed ulcerations.

Sleep - Sleepiness around noon, beginning of the afternoon. Persistent insomnia, between 2 a.m. and 4 a.m. Sleeps badly, wakes up excited and tired.

Stomach - Acrid dyspepsia. Nausea.

RELATIONS - Compare: (1) DNA, Sil., Cor- tiso.. Tub. (2) Alf. - increase appetite, weight gain. (3) Cann-s. - appetite increased, desire for sweets.

REFERENCES - Julian.

***RICINUS COMMUNIS

(Castor Oil Bean)

PHARMACY - ric. Ricinus communis. Castor oil bean. Palma christi. N. O. Euphorbiaceae. Tincture made with hot alcohol and water. Trituration of fresh seeds. Tincture of fresh plant. **Historical dose:** All potencies.

CLINICAL - Albuminuria. Aphthae. Arthritis. **Breast, disorders. Breast-feeding. Cholera.** Cholera infantum. Constipation. **Diarrhea.** Duodenum, catarrh. Dysentery. Eruptions. Gangrene. **Gastro-enteritis.** Jaundice. Muscle pain. Peritonitis. Sprains.

HERBAL - The castor oil plant is a native of Egypt and India. In the tropics, it is a small tree growing to the height of eight or ten feet. It can be cultivated as an annual, its stems reaching from three to five feet.

Castor oil, obtained from the seeds, can be rubbed into muscles and joints. Castor oil packs, warm oil-soaked flannel, can be applied to inflamed tissues or organs. Leaves can be applied topically.

The blandest form in common use is "cold drawn," i.e., expressed without the aid of heat and contains the smallest amount of the acrid principle. A decoction of the seeds, used in the East and West Indies, contains a much larger proportion.

Ric. has great power over breast-feeding. O. McWilliams observed in the Cape Verde Islands that the leaves of the plant were applied to the breasts to increase the flow of milk if it were delayed and even to produce it in women who had never borne children or who had not suckled for years.

In increasing the flow of milk in nursing women, the breasts were fomented with a decoction of the leaves of the plant, the boiled leaves being afterwards thinly spread on the breasts.

For producing milk in others more vigorous measures were resorted to. The women had to sit over a boiling decoction of the leaves, care being taken to prevent the escape of steam. When the decoction was sufficiently cool the parts were bathed with it, and also the breasts to which the leaves were applied as in the other case. Women with well-developed breasts were more easily influenced. When the breasts were small and shriveled this treatment acted more on the uterine system, bringing on the menses long before their time or causing immediate flow if the time is near.

HOMEOPATHIC - Hale made the first collection of the pathogenetic effects of Ric. and pointed out its analogy to cholera, which Salzer confirmed.

Cases of poisoning, some of them fatal, have been recorded from the ordinary oil, but the greater number of the pathogenetic effects have resulted from eating the seeds. Fatal effects have followed eating three seeds, and one seed has caused violent effects. After twenty seeds, gastroenteritis and death preceded by general convulsions and collapse occurred.

Ric. has marked action on gastro-intestinal tract. Vomiting and purging. Very painful cramps in trunk and limbs. Collapse. Con-

vulsions. Muscular contractions. Languor and weakness. Pale and listless. Anemia. Profound adynamia.

The leaves have an especially powerful action on the breasts and female generative organs. **Increases the quantity of milk** in nursing women.

Abdomen - Rumbling. The different parts of the abdominal muscles can be seen successively and individually contracting under the skin. Feels as if all the intestines violently drawn together. Violent colic and yellowish green vomiting. Cramps with the diarrhea. Pain over abdomen, worse by pressure.

Back - Pains in back like after-pains.

Breasts - Breasts thick, swollen with swelling of axillary glands and pains running down arms. Thin discharge from breasts, becomes milky. Brings milk in breasts of virgins and women who have not nursed for years.

Ears - Buzzing and humming in ears.

Eyes - Conjunctiva is injected. Copious lachrymation, pupils only moderately dilated. Eyes convulsed and turned up.

Face - Face slightly congested. Face pale, features strongly contracted. Twitchings of mouth.

Female - Menses too early, excessive. Leucorrhea.

Food - Anorexia. Thirst, great, burning.

Head - Brain seems exhausted and easily overpowered, in open air. Severe headache. Sudden pain as if seized by something in occiput extending around to backs of ears, eyes and forehead with rush of blood to head and shocks which come and go as from electricity, thirty times in five days.

Heart - Pulse is extremely small, scarcely perceptible, though normal in frequency.

Kidneys - Complete anuria. Passes a little dark, thick, highly albuminous urine.

Limbs - Prurigo on wrists and bends of knees. Gangrene of one foot necessitates amputation.

Mouth - Tongue, coated white and dry, furred. Salivation.

Rectum - Incessant diarrhea with cramps and chilliness, colliquative like cholera. Diarrhea without pain. Violent purging with the diarrhea. Rice-water stools. Stools serous liquid mixed with mucus. Bloody diarrhea. Complete confinement of bowels for five days, causing headache.

Skin - Pronounced jaundice, skin saffron yellow. Pruriginous eruptions or redness and itching, at wrists and bends of knees.

Sleep - Great desire for sleep.

Stomach - Pit of stomach very sensitive, pains radiate from this center, shooting to umbilicus and hypochondria. A kind of bar across stomach, which caused profound anguish. Cramps, burning in stomach. Heartburn. Nausea and vomiting persistent, vomited mattery liquid, slightly colored by a little bile, contains only a few mucus threads in suspension. Vomiting and purging. Painless vomiting. Vomiting profuse with burning in gullet and all the symptoms of Asiatic cholera.

Temperature - Chilliness with the diarrhea. Skin moist and cool, especially lower limbs. Forehead covered with cold sweat. Perspiring freely.

Throat - Burning pain in the gullet accompanied the vomiting. Voice altered, veiled.

COMMENTS - Salzer gave to Ric. the same importance in cholera with diarrhea that Camph. occupies in relation to spasmodic cholera. The stools of Ric. correspond exactly to the rice-water stools in cholera, while those of Ver-a. do not.

Ric. also has painless evacuations which are met with in many cases of cholera. Ric. therefore corresponds to the diarrhea stage of cholera and also to the collapse stage if vomiting and purging continue.

Salzer quoted B. L. Bhaduri as having observed "rice-water stools, cramps and suppression of urine brought on by eating the seeds."

Hale said that before he had learned to use Ric. as a homeopathic remedy he has often been discomfited by seeing aphthous diarrhea cured with small (half-teaspoonful) doses of castor oil, repeated three or four times a day, by old nurses or impatient mothers.

Such diarrhea often arises in improperly-fed children. It begins with sickness, frequent and griping evacuations, greenish yellow to dark green, becoming more liquid and more or less mixed with slimy or gelatinous mucus or blood.

Each stool is accompanied with pain and tenesmus, mouth dry and aphthous. The anus is inflamed, belly tumid and painful, child becoming more and more feverish and somnolent.

Hale later gave a Ric. 1x trituration of the oil with sugar. In acute and chronic dysentery and in those cases in which there is impaction of feces. Hale saw the oil promptly curative.

Hering remarked that puerperal fever had become much less common in Philadelphia (where it used to be very common) since homeopaths interdicted the use of castor oil in confinements.

Tyler Smith experimented with the leaves, in his cases the application produced swelling of the breasts, throbbing and other pains in them, swelling of the axillary glands with pains running down the arms.

Pains in the back like after-pains were caused in every case. Leucorrhea was increased. Discharges from the breasts became milky and menses came on too soon. The radiating pains, bar sensation, constricting and cramping pains are the most peculiar.

RELATIONS - Compare: (1) Tea tree oil. Olive oil. (2) Cro-t., Jatr. and Euphorbiaceae. (3) In cholera, rice-water stools, Agar. Phos., Jatr. (4) Galactagogues, Alf., Agn-c. Asaf., Lee., Puls.

(5) Duodenal catarrh, Berb., Chin., Hydr., Lyc., Merc., Podo.

***RITALIN

(Methylphenidate Hydrochloride)

PHARMACY - rital. Ritalin. Methylphenidate hydrochloride. An allopathic stimulant drug. **Historical dose:** All potencies.

CLINICAL - Angina pectoris. **Attention deficit disorder.** Bi-polar. Coma. Convulsions. Delirium. Depression. Dermatitis. Dizziness. Drowsiness. Dyslexia. Fever. Glaucoma. Hair, loss. Hallucinations. Headaches. Hives. **Hyperactivity. Insomnia. Learning, disability.** Narcolepsy. Nausea. **Nervousness.** Palpitations. Schizophrenia. Tremors. Tourette's syndrome. **Twitchings.** Urticaria. Vomiting. Weight, loss.

HOMEOPATHIC - Methylphenidate is a central nervous system stimulant. Excessive doses of Ritalin over a long period of time can produce addiction; it is also possible to develop tolerance to the drug, so that larger doses are needed to produce the original effect.

Common side effects may include an inability to fall or stay asleep, nervousness. In children, loss of appetite, abdominal pain, weight loss during long-term therapy, inability to fall or stay asleep, and abnormally fast heartbeat.

Chest pain. Abnormal heartbeat. Palpitations. Fluttery or throbbing heartbeat. Pulse changes. Rapid heartbeat. Blood pressure changes. Dizziness. Abnormal muscular movements. Jerking. Joint pain. **Severe twitching.** Reddish or purplish skin spots. Hives. Skin reddening. Skin inflammation with peeling. Skin rash. Hair loss. Headache. Fever. Drowsiness. Abdominal pain. Loss of appetite. Nausea. Retardation of growth in children. **MIND -Attention deficit disorder.** Distracted. Short attention span. **Learning disability.** Dyslexia. **Hyperactivity.** Agitation. Confusion. Emotional impulsivity. Feeling of elation. **Nervousness and restlessness.** Depression.

Delirium. Hallucinations. Psychotic episodes. Paranoia. Bipolar disorder. Schizophrenia. Minimal brain damage.

Tourette's syndrome.

Abdomen - Abdominal pain.

Chest - Angina pectoris. Chest pain.

Blood - Increased blood pressure. Leukopenia, and anemia. Necrotizing vasculitis. Thrombocytopenic purpura. Increased blood sugar.

Eyes - Dilated pupils. Glaucoma. Blurred vision. Difficulty with accommodation.

Food - Loss of appetite. Weight loss. **Head** - Headaches. Alopecia. Hair loss. **Heart** - Angina pectoris. Blood pressure changes. High blood pressure. Cardiac arrhythmias. Abnormally fast heartbeat. Palpitations and irregular heartbeats.

Limbs - Arthralgia. Joint pain. Muscle cramps. **Hyper reactive reflexes.** Abnormal muscular movements. Jerking. Convulsions. Tremors and tics. **Twitchings.** Tourette's syndrome (severe twitching).

Skin - Reddish or purplish skin spots. Pruritus. Urticaria. Hives. Skin reddening. Skin inflammation with peeling. Exfoliative dermatitis, erythemamultiforme. Dryness of mucus membranes.

Sleep - Insomnia. Inability to fall or stay asleep. Drowsiness. Narcolepsy.

Stomach - Loss of appetite. Nausea, vomiting.

Temperature - Extremely elevated body temperature. Heat, flushing.

Vertigo - Dizziness.

COMMENTS - Exaggerated feeling of elation. Hyperactivity. Agitation, confusion. Transient depressed moods. Nervousness and insomnia. Delirium. Psychotic episodes including hallucinations.

Dry mucus membranes. Dilated pupils. Extremely elevated body temperature, flushing. Fever. Sweating. Vomiting. Dizziness, drowsiness, headache, and dyskinesia. Headaches. High blood pressure. Irregular or rapid heartbeat.

Rash, pruritus, urticaria. Exfoliative dermatitis, erythema multiforme with histopathological findings of necrotizing vasculitis, and thrombocytopenic purpura. Alopecia. Arthralgia. Muscle twitching. Tremors. Convulsions, muscle cramps, choreo-athetoid movements, tics, or exacerbation of pre-existing tics, Tourette's syndrome.

REFERENCES - Murphy.

***ROBINIA PSEUDACACIA

(Yellow Locust)

PHARMACY - rob. Robinia pseudacacia. Yellow locust. Common acacia. False acacia. North American locust. N. O. Leguminosae. Papilionoideae. Tincture of fresh bark of young twigs. Trituration of the beans. **Historical dose:** All potencies.

CLINICAL-Acidity. Belchings. Coryza.Dys-pepsia. Flatulence. Headaches. **Heartburn. Hyperchlorhydna. Indigestion.** Intermittents. Neuralgia. **Stomach, disorders.** Urticaria.

HERBAL - The Treasury of Botany stated "The roots of Robinia have the taste and smell of liquorice, but are a dangerous poison and accidents have occurred from their being mistaken for liquorice roots."

HOMEOPATHIC - The recorded poisonings were due to eating the beans or chewing the bark. Of thirty-two boys so poisoned, in the mildest cases there was vomiting of ropy mucus, dilatation of pupils, dry throat, flushed face.

In the severest, the vomit was more copious and mixed with blood with retching, epigastric pains, debility, stupor, cold limbs, dusky pallor, heart's action feeble intermittent, limbs pulseless. Recovery took place in two days.

Acidity of children. Child cries when its arms were laid hold. **Sour infants with sour smell of the body, sour stools and vomiting of sour milk.**

Hyperchlorhydia, when the belchings and taste is sour and vomiting is so sour that it sets the teeth on edge or dulls them. The gastric symptoms with the most **pronounced acidity** are well authenticated and are the guiding symptoms. Acid dyspepsia. Burning in stomach and between scapulae. Squeezing in stomach.

Heartburn and acidity worse lying down especially at night. Water brash.

Albuminoid digestion is too rapid and starch digestion is perverted. **Intensely acrid belchings.** Acrid and greenish vomiting, colic and flatulence, nightly burning pains in stomach and constipation with urgent desire. Stools and perspiration sour. Incarcerated flatus. Acidity accompanied by frontal headache. Constant dull frontal headache worse motion and reading. Sick headache with acid vomiting.

MIND - Excessively irritable. Very low-spirited. Tried to write but could not. Can hardly tell what she is doing.

Abdomen - Constant dullness in epigastric region with cutting pains in stomach and bowels and a good deal of rumbling. Burning distress in stomach and region of gallbladder. Bowels greatly distended with flatulence, seemed to fill up whole abdomen, tympanites, better passing flatus. Soreness in bowels when moving or from pressure.

Causations - Ill effects from fat, gravies, flatulent food, cabbages, turnips, new bread, ice cream, raw fruit, etc.

Eyes - Eyes sunken. Eyes sore, watery with rough throat. Pupils contracted (in poisoning cases, dilated).

Face - Neuralgic face ache, spreading to eyes, forehead, ears and teeth, changing the whole features. Spasmodic pains in jaws, feels as if they would be broken or dislocated, intensely sour taste in mouth. Face flushed (in mild poisoning cases), dusky, pale (in severe cases).

Female - Menses too late, black. Bleeding between the periods, accompanied by purulent leucorrhea. Leucorrhea, acrid, fetid, whitish, greenish, yellowish, thick and purulent. Ulcerative pains in vagina with acrid, yellowish leucorrhea of most fetid smell. Cramps in uterus. Tumefaction and bruised feeling in neck of womb and general prostration. Hard swelling of uterus. Herpes on vagina and vulva. Nymphomania.

Food - Worse from eating, fats, cabbages, turnips, raw fruit, ice creams. Thirst.

Head - Constant dull, heavy, frontal headache, much worse by motion and reading. Dull headache, with profuse nasal discharge and frequent sneezing, with sharp stitches in temples. Stinging pain in temples, changing from right to left side. Gastric headache with acid vomiting. Sick headache with sour stomach from fat meat, gravies, flatulent food, cabbage, turnips, warm bread, pastry, ice creams, raw fruits. Steady headache with sensation as if head full of boiling water. As if brain struck against skull when moving. Unable to hold his head upright.

Heart - Almost pulseless. Heart's action is very feeble, embarrassed when moved from horizontal position.

Kidneys - Urine scanty, painful or profuse, turbid.

Limbs - Could not move in slightest degree fingers, hands, arms or legs, later could move fingers of right hand a little, later could stir legs, but not draw them up, tickling feet caused much distress.

Lungs - Voice reduced to a whisper and efforts to cry exceedingly feeble, suddenly ceasing with a slight sigh, as if from exhaustion. Feeble respiration.

Modalities - Worse at night, by motion. Neuralgia from contact of food, worse by touch. Headache worse by reading. Heartburn and acidity worse lying down. Nausea and vomiting worse being raised from the horizontal.

Mouth - Burning, sharp pains, especially in carious teeth, spreading to cheeks, eyes and temples, worse at night or on contact of food, especially if cold or spiced. Teeth become loosened from the spongy and easily bleeding gums. White coating on tongue with red tip. Tongue covered with whitish-brown fur, smooth and slimy. Mucus membrane of mouth pale.

Nose - Profuse continual discharge from nostrils with sneezing and dull headache. Wax-like tumor on nose.

Rectum - Heat and pressure in epigastrium, cramps. Bowels costive with frequent ineffectual desire for stool. Desire for stool, but only flatus passes, finally constipated stool. Sudden attacks of purging and vomiting. Stools are loose, black,

Robinia pseudacacia fetid with great tenesmus, watery, whitish, excessively frequent and generally involuntary. **Sour stools of infants with sour smell from body and vomiting of sour milk.** Diarrhea stools, yellow, green, burning with nervous agitation, weakness, cold sweat, dyspnea. Sensation as if whole body would pass away with stool. The daily motion has a slimy look and bilious tinge.

Sensations - As if head were full of boiling water. As if brain revolved. As if brain struck against skull. Jawbone as if dislocated. Stomach as if scalded. As if whole body would pass away with stool. The left side was most affected. A sleepy, dull feeling in head and limbs changed from right to left.

Skin - Covered from head to foot with urticaria.

Sleep - Sleepiness and dullness in limbs and head. Restless sleep all night on account of frequent sneezing from indigestion.

Stomach - Everything turns to acid. **Sour stomach.** Regurgitation of acid and bitter substances. Heartburn and acidity of stomach at night on lying down. Heavy, aching dullness in stomach. Very severe, sharp pains in stomach all day and night. Great distention of stomach and bowels. Flatulent colic (Cham., Dios.). Nausea **with sour belchings.** Profuse **vomiting of an intensely sour fluid** (Sul-ac.). Vomiting of ropy mucus, tinged with blood, retching and epigastric pains. Vomiting with slight convulsions.

Temperature - Hands and feet cold. Hectic fever with night-sweats. Paroxysms of pain late in afternoon, lasting until 3 to 4 a.m., face hippocratic, much flatulence.

Throat - Dry scratching in throat, with flushing of face. Rough soreness, with sore eyes.

Vertigo - Faintness, worse when raised from horizontal position. Vertigo and dullness of head in whatever position it is placed. Sensation as if brain revolved, worse lying on right side. Vertigo with unsteadiness and nausea.

COMMENTS - The provings of Burt and Spranger developed the symptoms which have led to the chief clinical uses, but some of Houatt's symptoms have also been confirmed. Clinical experience has added to the symptoms.

Among Houatt's symptoms was a facial neuralgia spreading to eyes, forehead with contraction of the jaw and features and also a sensation as if the jaws would be dislocated or fractured. Hering gave a case of neuralgia as having been cured with Rob. "Jawbone feels as if dislocated intensely sour taste and vomiting."

The paralytic symptoms were very marked in one of the poisoning cases. Flatulence and diarrhea were produced and also constipation with constant ineffectual urging.

The chief keynote of Rob. is acidity, especially at night. Cooper observed improvement under Rob. cease at night-time.

Sour stomach, heartburn and acidity coming on when lying down at night and preventing sleep. Vomiting of intensely sour fluid which set the teeth on edge. Belchings of a very sour fluid. Sour stools of infants with sour smell of body and vomiting of sour milk.

Halbert related a case of hyperchlorhydria treated with Rob. Mrs. S., 40, had stomach troubles for many years, for which she had bitter tonics, stomach douching, and electric massage. She had acid belchings and vomitings of intensely sour food.

Extreme appetite, but gastric pains an hour or two after meals. Stomach and bowels distended with gas almost constantly, and extremely irritating flatulence. Craved meats, but could not tolerate vegetables. Craved solid food, but did not dare take it. Emaciated and cachectic.

Lavage was performed every alternate day and after it the patient was directed to eat a full meal. Rob. 3x was given every two hours and steady improvement occurred in all particulars, until health was practically restored.

Burt had a severe neuralgia in left temple, preventing sleep from midnight to daylight. He had also a "dull, heavy aching in stomach," and a "constant dull, heavy frontal

Robinia pseudacacia headache, much worse by motion and reading." The combination of gastric and head symptoms has placed Rob. among the chief remedies in migraine and sick headaches.

A. L. Fisher relieved with Rob., when everything else failed, the intensely acid vomiting in four cases of gastric cancer.

***ROCK ROSE

(Bach Flower Essence)

PHARMACY - rck-r-b. Rock rose. Helianthe- mum nummularium. Rock Rose flowers are gathered and put in a sunlit bowl of water for several hours. The water imbued with healing power is strained and prepared as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - This remedy belongs to Bach's group "**For Those who Have Fear**," with Mimul-b., Cher-p-b., Asp-b. and Rd- ch-b. Rck-r-b. treats states of intense fear and panic, plus a chronically weakened nervous system.

Acute anxiety states cause accelerated heartbeat and breathing, shortness of breath, choking sensation, dry mouth, indigestion with possible nausea, vomiting and diarrhea, dizziness and fainting and internal and external trembling.

Chronic, advanced nervousness, characterized by nervous weakness, insomnia, lack of physical and mental/emotional endurance, shakiness, digestive problems including lack of appetite, heightened sensitivity to noise and touch, first signs of a nervous breakdown and other typical symptoms of an exhausted nervous system.

Restores equilibrium after a nervous breakdown (Cher-p-b., Verv-b.).

MIND - Fright and heightened anxiety. Extreme agitation and nervousness. Chronic state of nervousness, frequent starting and inner trembling. Anxiety disorders. Prolonged fearful worry, chronic loss of sleep. Exhaustion of nerve power.

Anger, hatred, irrational resentment. Impatience, aggressiveness. Feelings of helplessness, despair. Easily aroused weeping. Longing for help. Desire for peace and rest.

Frequent nightmares, fixations and obsessions of a fearful nature, as in phobias or panic disorders. Fright from near death or the near death of a loved one. Post-traumatic stress disorder and adjustment disorder, trauma was related to fear or terror (Star-b-b.).

Repeated fearful experiences or one-time traumas of fright have become linked with a certain person, object, or circumstance which will trigger renewed fear on contact even when the real danger has passed.

***ROCK WATER

(Bach Flower Essence)

PHARMACY - rck-w-b. Rock water. Aqua petra. Water from any special well known to carry healing power is placed in a sunlit bowl for only one hour and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - This remedy belongs to Bach's group "**Over-Care for Others' Welfare**," along with Beech-b., Vine-b., Verv-b. and Chic-b. These remedies heal the tendency to overly influence and control others. Rigidity and hardening of physical structures. Excessive willpower resulting in inner tension and strain.

MIND - Disappointment or despair, leading to a sacrifice or loss of pleasure.

Inner conflict. Intense self-control, leading to personal pride and the desire to inspire others to be equally strong. Rigidity and self-centered toughness, with frustration, sadness, depression, or anger. Hardened. Sense of loss.

Ritualistic, perfectionist, obsessive-compulsive behavior (Cher-pl-b., Crb-a-b., Pine-b., Verv-b.). Tendency to adhere to routines and one-sided acceptance of limitations. Self denial and habitual patterns in the rehabilitation of addictive drugs or behavioral patterns.

***ROSA CANINA

(Dog Rose)

PHARMACY - ros-ca. Rosa canina. Dog-rose. Cynorrhodon. N. O. Rosacea. Europe. Tincture of ripe fruits.

Historical dose: Tincture and all potencies.

CLINICAL - Bladder, disorders. Dysuria.

HERBAL - Rose hips are used for making the very pleasant "Confection of Roses" used in general medicine as a basis for pills and electuaries. Rosa canina has been used in ancient times as a remedy in urinary difficulties.

HOMEOPATHIC - A proving only evoked a somewhat increased flow of urine and a little heat in the urethra. Burnett confirmed this to some extent.

REFERENCES - Clarke.

*****ROSA DAMASCENA** (Damascus Rose) **PHARMACY** - ros-d. Rosa damascena. Damascus rose. Damask rose. N. O. Rosacea. Tinctures of the flowers. **Historical dose:** Tincture and all potencies.

CLINICAL - Allergies. Coryza. Deafness. **Eustachian, catarrh.** Hay fever. Hearing, problems. Rose-colds. Tinnitus.

HOMEOPATHIC - Hay fever and allergies. Hardness of hearing, tinnitus. Rose-colds. **Eustachian catarrh** (Kali-m., Merc-d.), Eustachian tube swollen.

Farrington mentioned that Ros-d. was introduced by Jeanes as a remedy at the beginning of rose-cold when the Eustachian tube is involved with some degree of deafness and tinnitus.

RELATIONS - Compare: (1) In hay fever: Phle., (Timothy grass) - Hay fever with asthma, watery coryza, itching of nose and eyes, frequent sneezing, dyspnea. Use 6c to 30c potency. (2) Eustachian tube catarrh: Kali-m., Merc-d. (3) Succ-ac, Sabad., Euph., Psor., Kali-hp., Napht.

***ROSMARINUS OFFICINALIS

(Rosemary)

PHARMACY - rosm. Rosmarinus officinalis. Rosemary. N. O. Labiatx. Tincture of whole plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Baldness. Dandruff. Dizziness. Headache. Lice. Menses, too early. Memory, weak. Miscarriage. Sleeplessness.

HERBAL - Rosemary oil has an ancient reputation as a remedy for baldness, headache and flagging mental powers. It has been called the "Herb of Memory," which Shakespeare alludes to when he has Ophelia say, "There's Rosemary, that's for remembrance."

HOMEOPATHIC - **Memory deficient.** Head heavy, **drowsy.** Menses too early, violent pains followed by uterine hemorrhage. Chilly with icy coldness of lower limbs without thirst, followed by heat.

MIND - Anxiety. Memory weak. Dullness.

Female - Violent pains followed by uterine hemorrhage and miscarriage, succeeded by faintness, spasms of chest, cold hands and feet, small, rapid, irregular pulse. Menses four days too early.

Head - Headache. Heaviness and dullness of head. Weight and tension around head. Baldness.

Lungs - Oppression of breathing. Spasms in chest.

Skin - Hair loss. Dandruff. Lice.

Sleep - Overpowering sleepiness with yawning. Sleeplessness.

Temperature - Coldness so that she could not leave the bed. Chill over whole, legs icy cold, no thirst and no subsequent heat.

Vertigo - Dizziness.

COMMENTS - The most violent of the symptoms of Rosm. were observed on a woman who took a strong infusion for eight days resulting in a miscarriage. In another woman, it brought on the menses four days too soon. Chilliness predominated, the chill not being followed by heat.

RELATIONS - **Compare:** (1) Hedeo., Menth., Puls.

***RUBIA TINCTORUM

(Madder)

PHARMACY -rub-t. Rubia tinctorum. Madder. N. O. Rubiaceae. Tincture of the root. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC - Burnett found Rub- t. an excellent remedy for anemia and under-nourished conditions, especially in splenic anemia. Useful for the spleen (Cean.) Anemia with undernourished conditions. Chlorosis amenorrhea and tuberculosis. Bone disorders.

RELATIONS - **Compare:** (1) Chin., Coff., Gali, (bot.). (2) In anemia, Fetr.

REFERENCES - Clarke.

***RUBUS FRUTICOSUS

(Blackberry)

PHARMACY - rubu-f. Rubus fruticosus. Blackberry. Brambleberry. Dewberry. Cloudberry. Tincture of the leaves. N. O. Rosaceae. **Historical dose:** Tincture and all potencies.

CLINICAL -Anemia. Appendicitis. Coughs. Cystitis. Diarrhea. Dropsy. Dysentery. Eczema. Gingivitis. Gums, bleeding. Hemorrhoids. Insect, bites. Laryngitis. Leucorrhea. Menorrhagia. Mouth, sores. Pharyngitis. Sore, throat. Tonsillitis. Toothache. Ulcerations. Whooping cough. Wounds.

HERBAL - Blackberry is also known by the common names brambleberry, dewberry, and cloudberry. The berry grows on small, bushy vines, each berry being a cluster of tiny black knobs. In England, they are often referred to as brambleberries because of the prickly thorns, or brambles.

It is astringent, tonic, mild diuretic, and hemostatic. The fruit and juice is considered a refrigerant and tonic. The root-bark and the leaves are strongly astringent, depurative, diuretic, tonic and vulnerary. Blackberry leaf is more specific to the stomach and intestines. The fruit is more specific to liver and kidneys.

The root is the most astringent part. It has been used as a preventative for dropsy. It makes an excellent remedy for diarrhea, hemorrhoids, and cystitis. The root-bark as well as the dried and powdered fruit have been used for dysentery. Extract of the root has been used for stomach problems as well as an antidote to poison.

In American folk medicine the root was also used for tonsillitis. It has been used as an anti-inflammatory for conditions such as laryngitis and pharyngitis. The root decoction was once used during the spasmodic phase of whooping cough. A decoction of the root has been used for lung problems in general, as well as amenorrhea. Medicinally, the leaf of the Blackberry is most often used. The white underside of the leaves was said to "draw"

while the smooth green upper side was said to "soothe."

The leaves, root, and root bark have been used for inflammation of the throat, mouth and gums (also bleeding gums), as well as hemorrhoids and leucorrhea. The leaves were used in England for burns and scalds. Blackberry leaves were also used as a poultice for wounds and insect bites, and as a wash for oily skin.

Blackberry leaves have been made into a tea to ease the discomfort of sore throat. It has also been used internally to loosen phlegm. The leaves were chewed to treat bleeding gums and mouth sores. Blackberry leaf tea was used as a gargle to treat sore throats, mouth ulcers and gum inflammations.

A strong tea of the leaves has been used externally for eczema. Another method was to soak leaves in hot wine to make an infusion, then placing a cloth dipped in the liquid on the ulcerations morning and evening. A decoction of the leaves was once used as a fomentation for ulcerations.

Blackberry leaves have also been used to inhibit excessive menstrual bleeding. Blackberry tea made from the roots was a remedy for pregnant woman who were in danger of miscarrying due to overwork. The leaves have been used as a uterine tonic.

Blackberry tea, made of the scrapings of the bark of the branches, was used for bronchial infections. As a poultice, it was used to treat pneumonia. Boiled vines, roots, and berries for a drink for those vomiting and spitting blood. Boiled the cane to use as a diuretic and used a root tea for diarrhea.

The fruit and juice have been used for anemia and to regulate menses. The flowers and fruit were once used for venomous bites and the young shoots eaten to tighten loose teeth. The ancient Greeks used blackberries to treat gout, mouth inflammation, and bowel inflammation.

Blackberry was believed useful for appendicitis. Steeped berries in water was drunk as a vermifuge. European settlers to North America used blackberry jam to remedy diarrhea.

Blackberry jelly was an English folk remedy for swelling of the limbs (especially those associated with heart problems). The jelly was added to apple cider vinegar and used as a compress. Blackberry glycerite was also used as a compress on swollen joints.

COMMENTS - The common name blackberry also includes the species *Rubus villosus*. *Rubus laciniatus*, *Rubus procerus*, and other *Rubus* species, which are used interchangeably with *Rubus fruticosus*.

The primary constituents of this herb include tannins, gallic acid, villosin, and iron. The fruit portion contains vitamin C, niacin, pectin, sugars, anthocyanins, and flavonoids (kaempferol, quercetin).

The tannin content of blackberry leaves makes it an effective astringent. It also has diuretic properties. The tannins in blackberries also contribute to the plant's ability to treat diarrhea and dysentery, as well as to constrict blood vessels, which inhibits bleeding.

REFERENCES - Murphy.

***RUBY

(Gemstone)

PHARMACY -ruby. Ruby. Gemstone. **Historical dose:** All potencies.

CLINICAL - Allergies. Anemia. Anger. Angina. Belching. Blood, disorders. Circulation, weak. Constipation. Cough. Debility. Diarrhea. Earache. Flatulence. **Heart, disorders.** Heartburn. Hemorrhages. Hemorrhoids. Hepatitis. High blood pressure. Immune, disorders. Infections. Leucorrhea. Migraine. Nausea. Nosebleed. Palpitations. Vomiting. Wounds.

HOMEOPATHIC - Ruby has an affinity for the blood, immune system, heart and circulation. It is a blood cleanser, blood tonic. Wounds, stab or lacerations. Hemorrhages. Encourages speedy coagulation. Anti-septic properties. For the after-effects of bacterial and viral infections.

Chronic fatigue and all states of debility. Poor vitality due to liver dysfunction. Chilliness, affecting one side of the body, generally the right. Patches of cold, especially if they are felt to move around the body.

Affinity for children and adolescents and for those from the Indian sub-continent and Southeast Asia.

MIND - Clear mind, sensation of energy breaking free all over body. Mental and physical clutter. Mental blankness with an inability to focus one's ideas or thoughts. Forgetful. Cannot remember details. Fastidious. Feels isolated. Helps to restore a sense of self-worth (Aur.). Feeling of unworthiness due to the recognition of how much worse off are others, while feeling that there is nothing that can be done to redress the balance.

Sense of being consumed by worldly events or by family emotions. Inability to

let go of emotions. Guilt and shame. Resentment. Confused and distressing thoughts. Escapist daydreaming.

Anger comes up in outbursts. Anger that is expressed inappropriately. **Suppressed anger** (Staph.). Anger associated with sexual frustration. Vehemence and intolerance. Impatience with slowness and poor articulation of expression. Teenage anger.

Anticipation. Shaking or trembling with fear. Fear of new situations. Fear of the dark. Fear of one's own dark side, of being in someone else's power. Fear of death, of being sacrificed.

Abdomen - Ache in epigastrium. Epigastric discomfort, as though the lateral edges of the muscles contract in towards each other, better with massage. Ache in left hypochondrium. Pain in right hypochondrium. Fullness and heaviness in lower abdomen. Sharp twinges in lower abdomen, right side (psoas muscle), constant heaviness like pressing down. Mild cramping in lower abdomen, comes straight up midline. Bloating more than usual. Foul gas, nibbly (not painful), very bloated lower abdomen. Loud, painless gurgling in stomach. Reduction in abdominal gas.

Back - Pain in lower sacral, right side. **Bladder** - Frequent urination.

Blood - Anemia. Blood disorders. Immune disorders.

Chest - Heat in chest and pressure in the morning, around esophagus, centrally located. Heavy constricted chest, all day belching and heartburn, need to burp feeling, know it will taste bad. Dull pain in heart region, lasted several minutes. Circulation feels dull.

Ears - Aching pain in left ear, with fullness like earache. Ears feel full. Hearing not registering. Heightened sense of hearing, all sounds are so clear.

Eyes - Pupils dilated, eyes were very wild and maniacal looking. Bloodshot and glassy, red and dry. Eyes tired and burning, itching. Pain in the corner of the right eye as if stabbed by a finger. Heavy eyelids, burning sensation.

Face - Face puffy. Tingly cheeks. Face grayish with blemishes, irritated.

Female - Labia feels swollen and itchy. Vaginal discharge yellow and curdly. Leucorrhea, yellow, lumpy, and not itchy. Early sexual awareness. Increased desire. High sexual energy. Uses sex as a way of avoiding hidden emotions. Decreased or absent sexual desire.

Food - Appetite diminished, not hungry. Appetite increased, very hungry, wakes hungry. Thirsty. More thirstless than usual. Craving meat, salty food, fatty foods, bread.

Head - Head pain started at left front and moved to the back of my head. Migraines with nausea and vomiting, especially when the liver is involved. Pain from the cervical area and up and over the head to the forehead. Compression down the back from the head and neck. Sensation of pushing down on the vertex or of pushing inwards. Head feels split. Hair fuller, thicker, healthier and stronger. Hair feels dry. Cannot detangle hair at nape of neck.

Heart - Heart disorders. High blood pressure. Compression of the cardiac area. Pain in heart, seized up, sharp constriction for five minutes. Pain behind the sternum as if a heart attack would come on. Angina. Palpitations.

Limbs - Right side feels alive while the left side feels dead. Tingling in the legs. Fidgety and restless. Pins and needles in the right leg. Itching and aching in the right leg. Tweak in right hip. Feet and legs are cold. Goosebumps on upper arms and thighs. Poison oak like rash between wrist and elbow, itching and oozing. Mark on right arm (the underside in the middle of forearm which itches on occasion). Backs of the hands feel itchy. Nails healthier and stronger.

Liver - Useful after hepatitis when the body is weakened and cannot restore itself to full strength.

Lungs - Cough in the middle of the night. Dry, gagging cough, with thick phlegm. Wakes with choking cough.

Male - Anger associated with sexual frustration. High sexual energy. Not interested in sex.

Mouth - Taste somewhat enhanced. Food tastes funny. Burning, dryness on sides of tongue. Pain under left side of tongue,, at the root, could be felt even exteriorly. Sore under tongue, behind teeth, very painful. Sores on inside of lip, on lower gums. Swollen gums.

Nose - Middle separation of nostrils is sore to touch. Rawness in nose and throat came and went, itchy and dry. Nose very wet and damp in the morning. Pain at the root of the nose as if it is blocked. Nose plugged, crusted, hard. Nose mucousy, tight without discharge. Intermittent sneezing, relieves. Sneezing, nose is running, like allergies or hay fever. Profuse nosebleeds. Sensitivity to smells, especially vinegar and beer. Everything smells different.

Perspiration - Body sweaty, unusual. Sweating at peak of anxiety attack. Sweats all night long. Hot and sweaty had to take covers off. Apple-like smell coming off body.

Rectum - No bowel activity. Constipation. Diarrhea, explosive, loose, watery, painless. Gassy diarrhea, gassy expulsion. Bouts of loose stool with sudden urge (9 a.m. to noon). Small stool with urination. Foul gas, nibbly, painless. Blood from the hemorrhoids with each stool. Prolapsed old hemorrhoids.

Skin - Flushed, mottled skin. Itching rash, especially on buttocks. Itchy all over, better with scratching.

Sleep - Deep sleep. Sleep interrupted, woke often beginning at 2 a.m. then 3 a.m., 4 a.m. Awoke unrefreshed, feeling almost drugged, hard to open eyes. Groggy in morning. Sleepy in the morning. Difficult getting up. Nap in the afternoon, did not feel good from nap. Can't get enough sleep.

Stomach - Digestion sluggish. Sensation of a stone in the stomach. Heaviness in the upper abdomen. Empty pit feeling. Bloating, both flatulence and flatus. Constant heartburn. Belching to the point of interrupting conversation. Burping loudly, involuntary, repeatedly. Foamy belching. Constant nausea. Empty, nauseous

feeling. Nausea, not from stomach but umbilicus.

Morning sickness. Cancer.

Stool - Diarrhea, explosive, loose, watery, painless. Defecate with expulsion, gassy diarrhea, gassy expulsion. Five bouts of loose stool with sudden urge. Small, dry stools with blood.

Teeth - Grinding teeth. Hard to floss, teeth are tight.

Throat - Heat around esophagus, in morning, with heat in chest and pressure. Burning esophagus. Closing up. Rawness in throat and nose, came and went, itchy, dry. Instantly dry throat. Throbbing sore throat. Sore throat, tight and dry, mild headache, sneezy, running nose. Wakes with slight dryness in back of throat, full ears.

Urine - Smells acidic, like acidosis.

Vertigo - Some vertigo and weakness in the sun. Dizzy feeling when stands up, like wavering in a clockwise motion.

COMMENTS - Ruby is one variant of the simple mineral corundum, the other is sapphire. Corundum is a compound of aluminum and oxygen, Al_2O_3 (aluminum oxide). Chromium is responsible for the color of ruby, while iron, titanium and other elements cause the coloration of sapphires.

The name "corundum" is derived from the Sanskrit word "kuruvinda" via the Tamil name for ruby, "kuruntam."

The name "ruby" comes from the Latin word for red, "ruber."

Sluggish system with low energy. Circulation feels dull and weak. Heavy feeling, body heavy like lead, heaviness, hard to exercise. All over tiredness. Felt need to lie down, fighting gravity. Very tired in the evening, barely made it to bed. Hungover or fluish feeling. No desire to exercise. Better as day goes on. Weight gain.

Body warm all over. Cooler temperature. Goosebumps on upper arms and thighs. Tingling all over body. Sensation as if air were passing through certain areas of the body. All senses acute. Left ear painful with dull ache, ear fullness.

RELATIONS - Compare: Amber, Staph., Ferr.

REFERENCES - Murphy.

***RUMEX ACETOSA

(Sorrel)

PHARMACY - rumx-a. Rumex acetosa. Sorrel. N. O. Polygonaceae. Tincture of the leaves. **Historical dose:** Tincture and all potencies.

CLINICAL - Convulsions. Esophagus inflammation. Gastritis. Paralysis. Throat, sore. Uvula, elongated.

HERBAL - Sorrel was at one time cultivated as a salad. The Buckler-shaped or French Sorrel is cultivated in France, where it is considered a powerful anti-scorbutic. The leaves contain a large quantity of Bin oxalate of Potash (Kali-ox.).

HOMEOPATHIC - The Rumx-a. symptoms were observed on three men who ate largely of the leaves. In one, very violent convulsions were induced of a peculiar kind, the limbs being thrown reciprocally backwards and forwards and the head from side to side. The hands being alternately clenched and unclenched, the eyes prominent.

Other remarkable symptoms included swelling of the lower eyelid. Elongated uvula. Pain all down esophagus worse by swallowing. Persistent short, dry cough. Complete paralysis of bodily powers, copious green vomit, constipation.

RELATIONS - Compare: (1) Kali-ox., Lapa. (2) In persistent cough, Rumx.

REFERENCES-Clarke.

***RUMEX CRISPUS

(Yellow Dock)

PHARMACY - rumx. Rumex crispus. Yellow dock. Curly dock. Sour dock. Narrow dock. N. O. Polygonaceae. Tincture of fresh root. **Historical dose:** Tincture and all potencies.

CLINICAL - Abortion. Acne. **Anemia.** Aphonia. Asthma. **Bothorygm.Bronchitis.** Catarrh. Coms. Coryza. **Coughs.** Diarrhea. Dyspepsia. Dyspnea. Feet, tender. **Flatulence.** Gastralgia. Headache. Heart, disorders. Heartburn. Hiccough. Indigestion. Irritation. Jaundice. Lichen. Miscarriage. Mouth, ulceration. Nausea. Nosebleeds. Phimosi. Prurigo. Rheumatism. Throat, sore. **Trachea, disorders.** Tuberculosis. Urticaria.

HERBAL - Rumex is an old Latin word for "lance," referring to the shape of the leaves. Crispus means "curly," also in reference to the leaf shape. The yellow dock or curly dock is a common British weed, a member of the buckwheat family. It grows abundantly throughout North America.

The common yellow dock includes the species Rumex occidentalis, Rumex venosus, Rumex obtusifolius and Rumex sanguineus, which are used interchangeably with Rumex crispus.

The common dock of fields and roadsides, *Rumex obtusifolia* has a well deserved reputation among children as the best antidote to the nettle's sting. *Rumex crispus*, according to Joslin, was used by herbalists internally and externally for the cure of scabies.

Yellow dock has been used for hundreds of years for its astringent properties, treating a variety of skin problems, including boils, rashes, blemishes and burns. Topically, the crushed leaf of yellow dock can soothe the stings from nettle plants.

It can also be added to a tooth powder for spongy gums, and to a gargle for laryngitis. Salves, poultices or compresses of this herb have been used for eczema, hives, itchy skin, scabies and ringworm.

The properties of this herb are alterative, laxative, purgative, cholagogue, and astringent. It has been used for nutritional support of the blood, lungs, and urinary system. Yellow dock is valued today as one of the **best available sources of iron**. Its high iron content makes it beneficial for treating anemia and pregnant women. Yellow dock has also been known to help improve bladder and liver functions, and reduce bowel inflammation and glandular swelling. This herb can be used to treat some cases of jaundice, and skin eruptions associated with the toxicity of the intestines.

HOMEOPATHIC - Hale noted that among the constituents and salts of *Rumx.* are Sulph. and Calc-p., and Sulph., Calc, and Phos. are strongly represented in its action. *Rumx.* is a close ally of *Rheum* and has analogous purgative and other properties.

The provings were made by Houghton,

Joslin, Paine, Bayard, Rhees and Co., both with the tincture and potencies, and its characteristics were well defined.

Dry, hacking, tickling cough (*Bry.*). Constant tickling in the pit of the throat, runs into bronchi. Trachea sore to external pressure, feels excoriated, as do the fauces. Lump sensation in the throat that descends and comes back up after they swallow.

Cough is excited by pressure on throat. Touching the throat brings on the cough. Violent cough with a scanty difficult expectoration. Rattling cough. Coughing as if a piece of phlegm is stuck in chest.

Cough caused by an incessant tickling in the throat, tickling runs down to the bifurcation of the bronchial tubes. **Cough, worse from the least cold air or uncovering**. Cough ceases by covering the body and head with bedclothes.

Marked action on the skin, producing an **intense itching**. Numerous and varied pains, neither fixed nor constant. Sharp pains, neuralgias. Acts on joints, especially ankles, the skin, left side, chest. Cold affects the joints. Obesity.

Rumx. diminishes the secretions of mucus membranes and at the same time exalts sensibility of the mucus membranes of the larynx and trachea. Dry and sensitive mucus membranes. Mucus secretions decrease causing stickiness with **burning**. **Lymphatics are enlarged** and secretions perverted.

MIND - Disinclination to mental exertion. Indifferent about his surroundings. Restlessness in evening. Patient refuses to speak or even listen to conversation, lest his attention should be withdrawn from the supervision of his respiratory acts. Low spirited with serious expression of the face. Suicidal mood. Feels like killing herself in despair.

Abdomen - Annoying rumbling flatulence in women. **Flatulence**. Flatulent abdominal colic soon after a meal. Creeping near navel better by discharge of offensive flatus.

Back - Pain under scapulae, right.

Breasts - Pain in the left breast after meals.

Chest - Pain under sternum, under right nipple. Pain in left side of chest after meals with flatulence. Burning, sticking pain in left chest near the heart, worse deep breathing. **Rawness or burning** under clavicle as if the air penetrated there, worse hawking. Clavicular pain, worse hawking. Soreness behind sternum, especially left side in region of left shoulder.

Constitutions - Tubercular or nervous constitutions.

Cough - Suffocative choking coughs. **Tickling in throat** causes cough. **Dry, tickling cough, preventing sleep**. Barking cough. Cough worse by pressure, talking, lying on left side, **inspiring cool air and at night**. Cough provoked by changing rooms. Cough by change from cold to warm and warm to cold. **Cough from uncovering, drafts**. Cough comes regularly at 11 p.m., 2 a.m. and 5 a.m., in children. **Continuous coughing**. Cough in the daytime only. Cough worse during early pregnancy, may cause miscarriage.

Ears - Ringing in ears. Itching deep in ears. Pain, throbbing, stopped sensation in ears.

Eyes - Burning indoors, puffed up in morning. Pain in eyes as from dryness, lids inflamed, worse evening. Sore feeling in eyes without inflammation. Deep-seated pain in right eye. Sharp, shooting pain in left eye. Lachrymation when yawning.

Face - Sodden complexion. Pale, while standing. Pain in right jaw, morning.

Female - Pain from right ovary to back. Tendency to miscarriages, in early stage of pregnancy (Sep.). Miscarriage with dry, shaking, spasmodic cough, in paroxysms of great violence.

Food - Ravenous appetite. Worse when eating and after meals. Worse after excessive use of alcohol. Gastric disturbances, from tea drinking. Can't eat meat, it causes eructations, pruritus. Worse from apples.

Head - Headache after waking in morning. Headache and nausea after eating. Catarrhal headache with great irritation of larynx and trachea. Darting or sharp piercing pains, in left side. Bruised feeling in forehead. Dull feeling in head

Rumex crispus during cough.

Heart - Feels as if suddenly stopped, followed by heavy throbbing through the chest.

Kidneys - Sudden urging, involuntary with cough. Copious, colorless urine in afternoon. Urine less copious, flocculent deposit, oily surface, marked brick-dust sediment.

Limbs - Pain in left shoulder on coughing, on raising arms. Hands cold when coughing. Spasmodic cramps in ankles and feet.

Liver - Jaundice after excessive use of alcohol.

Lungs - Dyspnea on retiring. Better closing the mouth or covering the head. Breathing worse in wind. Asthma.

Copious mucus discharge from nose and trachea. Profuse, frothy, thin expectoration, stringy and tough, by the mouthful.

Male - Tendency to phimosis. In evening, feeling of soreness and excoriation with redness of end of prepuce. Itching of prepuce. Sexual desire diminished, lost.

Modalities - Better from covering mouth. Better wrapping up, lying on right side. Better from discharge of offensive flatus. Worse weather change, warm to cold, cold to warm. ***Worse from cool air, inhaling***, open air. Worse deep or irregular breathing. Worse uncovering. Worse motion, riding, lying on left side. Worse from pressure on trachea, talking. Worse eating, after meals. Worse evening and night, morning, on waking. Worse 3:30 p.m., 11 p.m., 2 a.m. to 5 a.m.

Mouth - Bitter taste in morning. Dry tongue and mouth. Tongue sore at edges, coated. Tongue feels as if burned. Tongue coated yellowish-brown or reddish-brown. Toothache, entirely better after dinner, rinsing mouth with cold water. Toothache with acute colds. Ulceration of mouth and throat.

Nose - Nose obstructed, dry sensation in posterior sinuses. Copious mucus discharge from nose and trachea. Yellow mucus from posterior nares. Sneezing attacks, fluent coryza. Violent sneezing and painful irritation of nostrils. Itching that extends from the end of the nose to pharynx. Desire to pick nose. Nosebleed.

Rectum - Brown, watery ***diarrhea, early in morning*** with cough, driving him out of bed. Sudden, profuse, foul, painless, brown, black or thin, watery stools. Itching of anus with sensation as of a stick in rectum. Hemorrhoids. Valuable in late stage tuberculosis (Seneg., Puls., Lyc., Ars.).

Sensations - Eyes pain as if from dryness. Tongue as if burned. As if cough did not reach low enough to raise phlegm. Lump in throat, it descends on deglutition, but immediately returns. Hands cold when coughing. As if head would fly to pieces with cough. As if he might raise blood any minute. Hard substance in pit of stomach. As if heart suddenly stopped. Pressure of a stick in rectum.

Skin - Acne vulgaris on back. Intense itching of skin, especially of lower limbs, ***worse exposure to cold air or when undressing***. Urticaria, contagious prurigo. Jaundice after excessive use of alcohol.

Sleep - Sudden sleepiness. Sleep disturbed, wakeful, restless, short naps and unpleasant fancies, even when awake. Unpleasant dreams of danger and trouble.

Stomach - Tight, suffocative, heavy ache in epigastrium to back, clothes feel tight. Chronic gastritis, aching pain in pit of stomach and shooting in the chest, extends towards the throat, worse any motion or talking. Hiccough, heartburn. Nausea, better by belchings. ***Eating meat causes belching and itching***.

Teeth - Pain in teeth of both sides, morning. Toothache better after eating dinner, better by rinsing with cold water.

Temperature - Sweat on waking from a sound sleep.

Throat - Throat feels hollow. Rawness of larynx and trachea. Hawks much tenacious mucus. Lump, not better by hawking, descends and rises again after swallowing. Irritation in larynx when eating, causes cough.

COMMENTS -Guernsey described the cough of *Rumex* as a "cough caused by an incessant tickling in throat-pit, which tickling runs down to the bifurcation of the bronchial tubes touching the throat brings on the cough, by covering up all the body and head with the bed-clothes there is no cough."

Shakes head as if it would fly to pieces and chest so that he feels he might raise blood any minute. Exhausting paroxysms, rapid coughing spells (Coc-c., Cor-r.). Coughing if the hands get cold. Headache during cough. Cough causes expulsion of urine and it may even cause expulsion of the fetus in pregnant women. Palliates late stage tuberculosis (Phos., Ph-ac., Stann.).

Cold air and drafts bring on coughing spells, as well as itching and skin aggravations. Characteristic sensitivity to cold air. The cough and skin symptoms are worse by uncovering or exposure to air. Wants to be covered (Hep.).

Worse from change of weather, temperature, talking with cough, eating. Worse motion, lying on the left (Phos.). Worse touching the throat. Irritated by irregular or deep breathing. Coughing worse at night around 11 p.m., and from 2-4 a.m.

Flu with a dry, hacking cough. Dryness of the nose and throat. Tendency to colds easily, with cough. Asthmatic cough, allergic asthma with constriction and a hacking, tickling cough.

Allergies with more coughing than sneezing, with a runny nose. Irritation of the nose. Burning, smarting, rawness in nasal passages (Caust.). Rapid sneezing. Severe sinus headaches, especially when the discharge dries up.

Thick, white discharges deep in the lungs or in the sinuses. Mucus or dryness alternating with total obstruction of thick mucus. Catarrh of the nose, eyes and chest that is gluey, thick, white, gelatinous, ropy and lumpy (Ant-t.). Nosebleeds from hawking.

Lachrymation of the eyes. Aphonia, aphasia. Hoarseness and change of voice (Spong.). Toothache, worse from inhaling cold air, may be better from cold drinks. Raw, burning sensation on inhaling.

Disturbed circulation. Violent palpitations of the heart and throbbing throughout the whole body. Itching with burning, worse scratching, after bathing (Sulph.). Skin is worse being uncovered (Hep.). Scabies with severe itching. Eczema with small, red pimples. Itching without eruptions (Spong., Alum., Sulph.).

Sensation of weight in stomach. Borbo-rygmi, particularly on the left. Flatulence and rumbling. Diarrhea in the early morning, driving the patient out of bed. Morning diarrhea, brown, watery, offensive. Diarrhea after catarrh, often associated with a cough.

Sadness and aversion to work, with irritability. Restless, sleep with vivid dreams, especially when the cough wakes them. Dreams of danger and robbers. Can wake up coughing or with diarrhea.

Paine noted a particular symptoms that led to many cures of skin cases where exposure to air is the exciting cause, "while undressing and for some time after, considerable itching of surface of lower limbs."

P. P. Wells related the case of Mrs. X., who had eight miscarriages all in the early months of pregnancy. Each miscarriage was attended with a severe dry, shaking, spasmodic cough in violent attacks. This was regarded as the cause of the miscarriages.

At the beginning of the ninth pregnancy she came under homeopathic treatment. The cough came on very dry, harsh, loud, shaking, worse at night, preventing sleep, excited instantly by pressure on the trachea. Rumx. 30c promptly relieved.

Wells also cured with Rumx. 200c a cough in a man that began with tickling behind top of sternum, sometimes in paroxysms lasting for five to ten minutes.

Joslin pointed out the left chest had more verified symptoms than any other region. Conditions are worse lying on left side, better lying on right side. Worse at 11 p.m. and 4 a.m.

RELATIONS - Antidoted by: Camph., Bell., Hyos., Con., Lach., Phos. **Compare:** (1) Caust., Sulph., Bell., (2) Rumx. contains chrysophanic acid to which the skin stitches correspond. (3) Rumx-a. - Sheep sorrel - Gathered in June and dried, used locally for Epithelioma of face.

Dry, unremitting short cough and violent pains in bowels, uvula elongated inflammation of esophagus, also cancer. (4) Rumex obtusifolius - Broadleaf dock - nosebleed and headache following, pain in kidneys, leucorrhea.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***RUSSULA FOETENS

PHARMACY - russ. Russula foetens. N. O. Fungi. Tincture of the fresh mushrooms. **Historical dose:** Tincture and all potencies.

CLINICAL - Bedwetting. Blindness. Chorea. Coma. Convulsions. Cyanosis. Dyspnea. Spasms. Tremors.

HERBAL - Some species of Russula are edible and are much esteemed as a food.

HOMEOPATHIC - Alphonse Barrelet observed the effects of eating cooked Russula foetens, which produced a very severe poisoning. Russ., has produced hallucinations, muscular tremors and clonic spasms recall the effects of Agar.

The eye symptoms were even more pronounced, complete blindness lasting many days occurred with this peculiarity of the pupil, that it was sometimes normal, sometimes dilated and sometimes contracted.

Constant trembling of muscles, at times interrupted by tonic contractions increasing to general clonic spasms with complete loss of consciousness. Muscular spasms, deathly anxiety, dyspnea. Patient recovered after two or three weeks.

MIND - Hallucinations constant for three days after spasms ceased. Unconsciousness. Deathly anxiety.

Abdomen - Nausea, colic, vomiting, diarrhea, with cold limbs.

Eyes - Pupils at one time normal, at another time dilated, at another contracted. Consciousness returned on third day, patient could hear but was completely blind.

Face - Cyanosis.

Kidneys - Involuntary urination.

Lungs - Dyspnea.

Pulse - Pulse small and contracted.

Skin - The attack was followed by pseudoerysipelas on elbows and painless furuncles over whole body, especially on scapulae and small of back.

REFERENCES - Clarke.

***RUTA GRAVEOLENS

(Garden Rue)

PHARMACY - ruta. Ruta graveolens. Garden rue. Bitterwort. N. O. Rutaceae. Tincture of whole fresh plant.

Historical dose: Tincture and all potencies.

CLINICAL - Amblyopia. Anus, prolapse. Arthritis. Asthenopia. **Backache.** Bedwetting. **Bone, bruised.** Bruises. Bursitis. Cancer. **Carpal tunnel** Cartilages, bruises, pains. Chest, pains. Constipation. **Dislocated, joints.** Dyspepsia. Exostosis. **Eye-strain.** Facial paralysis. Fevers. Fractures. **Ganglions.** Hemorrhages. Hands, pains. **Injuries. Joint, injuries. Lameness.** Nosebleeds. Paralysis. Perichondritis. Periostitis. Rectum, cancer. Rectum, prolapsed. Restlessness. **Rheumatism.** Sciatica. Spleen, disorders. **Sprains.** Stammering. **Strains. Tendonitis.** Tongue, swelling. Urination, difficulty. Varicocele. Veins, swollen, varicose. Vision, weak. Warts.

HERBAL - The common rue is a native of southern Europe. Teste noted that it was formerly in great repute in medicine for epilepsy, hysteria, hydrophobia and weakness of sight from excessive reading. Ozaena, nosebleed, foul gumboils, flatulent colic, and inertia of the bowels have been cured with it empirically.

Teste added that Ruta graveolens was supposed to be a kind of universal antidote, "Even in our own time the Roman ladies imagine that the most odoriferous flowers may be left in their rooms without the least danger provided a bush of garden rue be amongst them."

Practitioners have perhaps been deterred from employing it by the symptoms of acrid- narcotic poisoning induced by an overdose. It is noted, in The Treasury of Botany, that locally applied rue is a powerful irritant and one species, Ruta montana, is dangerous to handle even with gloves

Green's Herbal mentioned that Ruta is "useful in feverish complaints, promotes perspiration and removes noxious material in headache, nervous and hysteric complaints, weakness of the stomach and pains in the bowels, suppressed menses and if taken for a long time it benefits epilepsy. The expressed juice benefits nightmare."

M. Helie indicated that, in large doses, it causes violent gastric pains, excessive and sometimes bloody vomiting, profuse salivation and swelling of the tongue. Great prostration and confusion of the mind. Convulsive twitchings and, in pregnant women, miscarriage.

HOMEOPATHIC - Hahnemann's proving showed how largely the old uses were founded on a homeopathic relationship. The vulnerary remedies indicate in symptoms of their provings the peculiar form of injuries for which they are adapted.

Like the sprained pains of Rhus-t. and the bruised pains (in skin and muscles) of Arn., Ruta also has bruised pains, but these are more particularly manifested in bones. Historically, it was used to ward off plague.

Affinity for fibrous tissue, flexor tendons, joints, ankles, wrists, cartilages, periosteum, uterus and skin. Acts upon the eyes and uterus. **Eyestrain.** Overstrain of ocular muscles. Jaundice.

For **injured joints**, tendons, bones and especially **bruised bones.** Rheumatism. **Tendonitis.** Formation of deposits or nodes in the periosteum, tendons and about the joints especially wrists. Brittle bones. Lain on parts become sore, even in bed.

The pains are bruised, **sore, aching with restlessness**, a feeling of intense, painful **weariness. Lameness after sprains. Sprains with weakness in joint** (Arn.). Complaints from straining **flexor tendons** especially. All parts of the body are painful, **as if bruised.**

Heaviness, as of a weight in forehead or hanging to feet or lower limbs. As of a rough blunt plug in part, head, nose etc. Paralytic rigidity. Distortions. Grating, burning pains, neuralgia.

MIND - Stupefaction. Thought and comprehension slow. **Feeling of intense lassitude, weakness and despair.** Indifference. Disinclined to work. Quarrels and contradicts. Inclined to anger and vexation. Morose, peevish, fretful. Disposed to weep.

Frequent anxiety, with despondent thoughts and fear. **Fear of death during fever.** Anxious restlessness. Anxious all day, as though he had done something wrong. Fear that someone will come to arrest him. Melancholy, dissatisfied with life, and sad. Dissatisfied with himself and others. Mistrustful. Suspicious, imagines that he is always being deceived. Delusion someone is behind him. Starting from sleep from slightest touch. Desire for light.

Abdomen - Painful swelling of the spleen. Gnawing ache in region of liver. Gnawing and eating pain about navel. Sick feeling in abdomen followed by soft stools. Pinching pain in abdomen after bread and butter. Cancer of lower bowel. Colic in children, from worms.

Back - **Backache from injury or strain**, better pressure and lying on back. Bruised pain in coccyx, sacrum. Spine and limbs feel bruised. **Vertebrae slip out of place easily.** Coldness of spine, downwards. Drawing in nape of neck and in the shoulder blades. Tension and pressure in nape and shoulders. Pain in small of back, groin and nape. Weak, bruised feeling in lower back. Lumbago worse morning before rising. Stitches in lumbar region.

Bladder - Constant urging to urinate, can hardly retain urine. If urine forcibly retained, could not pass afterwards, with severe pain. Urging with scanty urination. Sensations as if bladder were still full, after urinating. Pressure in neck of bladder after urinating, painful closure (Apis). Sensations as if bladder is moving up and down at every step. Scanty, green urine. Frequent urination at night. Incontinence at night, or even during day when walking.

Causations - Ill effects of bruises, fractures, carrying heavy weights. Bone or joint injuries. Overuse of tendons. Sprains. Going up and down stairs causes hamstrings

Ruta graveolens to feel shortened and weak. Dyspepsia from straining stomach by carrying heavy weights. Over-exertion of eyes.

Chest - Short breath with tightness of chest. Painful spot on sternum. Sensation of coldness or heat in chest. Gnawing, biting and burning pains in chest. Tuberculosis after mechanical injuries to chest. Ill effects of mechanical injury to chest.

Constitutions - Suited to robust, bloody persons and corresponds to hemorrhages from nose (with pressure at root), gums, and rectum.

Ears - Earache with scraping pressure. Itching lancinations in ear. Cartilages of ears as if bruised. Pain in ear and under mastoid process as from a bruise. Pain as from a blunt piece of wood.

Eyes - Amblyopia. Asthenopia. Weakness of ciliary muscles. Spots on cornea. Eyes burn like fire. Lachrymation in open air, not indoors. Pressure deep in orbits. **Eyestrain with headaches.** Weary pain while reading. Red, hot and painful from reading fine print, sewing (Nat-m., Arg- n.). Itching inner canthi. Tarsal cartilage feels bruised. Spasm in lower eyelids, when it ceases, lachrymation starts. Pressure over eyebrow.

Face - Acne. Acne rosacea. Eruption of pimples on lips. Lips dry and sticky. Pain as if bruised in periosteum of facial bones. Spasmodic tearing in cheekbone. Itching and gnawing at face and on cheeks. Coldness beneath left eye. Erysipelas in forehead with swelling. Facial paralysis after catching cold.

Female - Menses very irregular. Menses scanty, lasting but two days, preceded and followed by leucorrhea. Corrosive leucorrhea after irregular or suppressed menses. Symptoms worse at menstrual period. Vaginal pruritus. Bearing-down pains. **Prolapsed uterus.** Metrorrhagia as a forerunner of miscarriage. Miscarriage, at seven months. Lameness and soreness all over with feeble contractions during labor. Sterility.

Food - Appetite normal, but aversion to everything as soon as he begins to eat. Disgust at first mouthful with a sensation of fullness and satiety in abdomen. Great thirst during chill. Violent thirst for ice cold water. Headache from abuse of alcohol. Worse after eating bread, butter, eating meat, grapes, raw or indigestible food.

Head - Heat in head, with anxious restlessness. **Headache from eye-strain.** Stitches, worse reading. Aches as if a nail is driven into it. Pain as from a nail after excessive intoxicating drinks. Pressure over eyebrow. Pulsative, pressive, in forehead. Head externally painful, as if bruised or beaten. Periosteum sore. Erysipelas and swelling of forehead. Erysipelas of scalp, arising from wounds. Corrosive itching on scalp. Humid scabs on head.

Heart - Anxious palpitations. Pulse somewhat accelerated only during fever.

Limbs - Bursitis. Cracking in joints, worse walking in open air. Paralytic weakness of legs after spraining of the back. Sciatica, worse lying down at night, pain from back down hips and thighs. **Hamstrings feel shortened (Graph.).** Great restlessness. **Thighs feel broken**, worse when stretching the legs. Legs give out on rising from a **chair (Phos., Con.).** **Knees give way, while** ascending and descending stairs. Pains as if deep in long bones, must walk about. **Tendons sore.** Aching pain in Achilles tendon. Pain in bones of feet and ankles. Ankles swollen from strain or injury. Contraction of fingers. Pain and stiffness in wrists and hands. **Ganglion of wrist** (Benz-ac., Calc-f.). Nodes in palms.

Lungs - Cough with copious, thick, yellow expectoration, chest feels weak after. Waking from cough, about midnight. Violent cough, with expectoration of tough mucus and nausea. Shortness of breath from tightness of chest.

Male - Varicocele following a strain. Injury to genitals, testes. Hematocele in which the effusion is small and firmly coagulated.

Modalities - Better from lying on back. Better warmth, motion, rubbing, scratching. **Worse from overexertion, lifting, injury, sprains.** Worse exertion, ascending or descending stairs. Worse lying down, sitting, stooping. **Worse eyestrain,** reading. Worse pressure on an edge. Worse from cold air, damp, wind, wet. Worse during menses. Worse from uncooked

Ruta graveolens or indigestible food. Warm stove causes chilliness.

Mouth - Woody taste. Dryness in mouth and throat. Mouth dry and glutinous. Profuse salivation and swelling of tongue. Cramp in tongue, causing embarrassment of speech. Boring pains in lower teeth. Gums bleed easily.

Nose - Pressive, hard aching at the root of nose, with nosebleed. Perspiration on back of nose.

Perspiration - Cold sweat on face. Perspires in morning in bed. Sweats after walking in open air.

Rectum - Constipation from impaction of feces following mechanical injuries. Constipation, alternating with mucous, frothy stools, discharge of blood with **stool. Difficult stool,** evacuated only with straining. Feces often escape when stooping. Protrusion of rectum when stooping. When sitting, tearing stitches in rectum. Urging to stool, causing rectum prolapses. **Rectal prolapse.** Sudden prolapsus recti, with tenesmus, after eating grapes. Anal prolapse on stooping. Anal prolapse after delivery, during hard or soft stools. Stricture of rectum. **Cancer affecting lower bowel.** Nausea felt in rectum.

Sensations - As if a nail were driven into head. Head as if bruised or beaten. Eyes, as if strained, as if a shadow flitting before them, as after looking too long and intently at an object, as if eyes were balls of fire. As if one were digging about in the ear with a blunt piece of wood. As of a lump in throat. Bladder as if constantly full. Spine as if beaten and lame. Pain as if from a fall in periosteum. As if pain were in marrow of bone or as if bone were broken. **Wrists as if sprained.** Thighs as if beaten, as if weak. As if there were an ulcer on ankle. All parts of body bruised at night, feeling as if it were time to rise.

Skin - Easily chaffed from walking, riding, also in children. Flat, smooth, painful warts, on palms. Warts with sore pains. Corrosive itching over whole body, better scratching. Itching of skin from every attempt to eat meat. Erysipelas after mechanical injuries of hands. Skin becomes easily chafed, from walking and riding.

Sleep - Sleepiness during day, with stretching. Yawns, stretches and extends hands. Yawning and stretching, after eating. Frequent waking at night, as if it were time to rise. Vivid, confused dreams.

Stomach - Epigastric region sensitive. Aching, gnawing pains in stomach. Tension in stomach, better drinking milk. Pains in stomach after eating bread or crude and indigestible food. Burning, gnawing pain. Dyspepsia caused by straining stomach when carrying heavy weight. Frequent odorless eructations. Hiccough, with depression. Sudden nausea when eating, with vomiting of food. Nausea felt in rectum.

Temperature - Coldness and shivering, with great thirst. Cold shivers run over back. Coldness running over one side of head. Chills mostly left-sided, worse up and down back, shakes even near a warm stove. Heat of face and dull head. Frequent attacks of quick flushes of heat. Glowing heat on face, skin etc.

Throat - Sensation as if a lump in throat on empty swallowing. Larynx as if bruised.

Vertigo - Whirling vertigo, which causes falling when rising in morning. Vertigo when seated, when walking in open air.

Vision - Amblyopia dependent upon anomalies of refraction. Amblyopia from writing by artificial light.

Disturbances of accommodation. Obscuration of vision as if one had looked too long and intently at an object. Blurred vision with burning, aching in eyes and strained feeling. Blurred vision from fine sewing, reading too much, worse using eyes in evening. Letters seem to run together. Dim vision, as if a shadow were flitting before objects. Green circle around light in evening.

COMMENTS - The vulnerary power of Ruta does not appear to have been known before the provings were made, but an old use of the remedy for impaired sight due to eyestrain, corresponded to symptoms from the provings.

"His eyes feel as if he had strained the sight too much by reading," "weak, pressive-like pain in right eye with dimness of surrounding

objects, as if from having looked too long at an objects that was fatiguing to the eyes," "a feeling of heat and burning in the eyes and pain in them when he reads (in the evening and by candle-light)."

Eyestrain, with burning and itching in the eyes. Eyestrain headaches (Onos.). Blurry vision. Contracted pupil. Eyeballs ache. Paralysis of the eye muscles and neuralgias. Facial paralysis from catching cold in robust, sanguine persons.

Rheumatic paralysis of wrists and ankles. Affinity for the joints, especially the tendons and ligaments. Joints feel weak and bruised. Chronic weakness and inflammation. Structural abnormalities. Torn or overstretched ligaments. Often a history of injury, remaining weakness in injured spot. Often follows or is complementary to Rhus-t.

Twisting injuries to the spine (Arn., Hyper., Rhus-t.). Wrenching injuries. Injuries to the shin and face. Injuries that are close to the bone. Bone injuries with torn ligaments, muscles or nerves (Am., Calc-p., Symph.). Hard lump after injury (Am.).

Overuse of joints, particularly the wrists. Dislocated joints, or the tendency to dislocate. Weak ligaments or joints. Carpal tunnel syndrome (Caust.). Shooting pain in wrist (Rhus-t., Hyper.). Chronic shortening of tendon due to overuse. Fibrositis. Bursitis, tendonitis, from overuse. Chronic knee complaints. Frozen shoulder. Thickening of the periosteum or nodules after injury (Bellis).

Stiff and aching (Am., Rhus-t.). Sharp pains (Hyper.). Deep, grinding pain. Sharp, tearing nerve pain. Drawing pain, as if area is being pulled shorter. Feeling of lameness ever since injury. Worse sitting or lying down. Chronic weakness after an injury.

Gnawing, grinding pains, especially in the shoulder. Pain worse in cold, damp weather. Stiffness, worse in the morning, better from motion and heat (Rhus-t.). Coldness down the spine, leg or sciatic nerve. Tearing pain down the sciatic nerve.

Great weakness, pain in limbs after a short walk. Limbs feel bruised, pain in small of back and loins. Tottering as if thighs were weak. Uneasiness and heaviness in legs, difficulty finding a comfortable position. All parts of the body on which he lies, even in bed, are painful as if bruised. Restlessness.

Sore spot on sternum. Pain below right scapula and stitches in small of back. Backache. Lying on back ameliorates many conditions, has led to relief in cases of malignant disease of kidneys and bladder.

Cramp in the tongue with embarrassed speech. Swollen tongue. Toothache with digging pain. Dry sockets, with aching pain. Slow pulse. Hangovers. Rhus poisoning, itching, inflammation, and rashes. Skin is red, swollen with watery vesicles.

Rectal polyps. Constipation, since trauma to the area (Bell-p.), since childbirth (Sep.). Constipation from inactivity of rectum or impaction of feces following mechanical injuries. Hemorrhoids and impacted feces after an injury.

Prolapse of the rectum after confinement.

Prolapse is worse by stooping and crouching, comes on immediately on attempting a passage. Tearing stitches in rectum when sitting. Tearing in rectum and urethra while urinating. Sensation of nausea located in the rectum.

Rushmore cured with one dose of Ruta 900c (Fincke) a case of prolapse preceding a very difficult stool.

A prolonged use of Ruta 3x has cured ganglion in front of left wrist.

Cooper said, "It certainly acts strongly on deposits of scirrhus material in both the breasts and in the vagina and sometimes lessens the size of these." He used Ruta ointment, prepared by extracting the plant in warm Vaseline, as an application in broken cancer of the breast.

RELATIONS-Antidote'di'y.-Camph. Anrii/ote to; Merc. **Compare:** (1) Arn., Bell-p., Rhus-t., Hyper., Calc., Calc-f. (2) Restlessness, effects of cold and damp, Rhus-t. (3) Eye-strain, Nat-m., Onos., Seneg. (4) Prolapsed rectum, Aesc. Bell., Chin-s., Nit-ac., Podo. (5) Pain in back, worse in morning before rising, Pet. (6) Sore as if bruised in parts lain on, Am., Bapt., Pyrog. (6) Constipation after injuries, Am. (7) Warts on palms, Nat-c., Nat-m. - on backs of

Ruta graveolens hands, Dulc. chafing. (8) Arg-n., Con., Euphr., Lyc., Cham., Sep. (9) In diseases of bone, Ang., Conch. **Compatible:** after Am. in joint injuries, after Symph. in bone injuries, Calc., Caust., Lyc., Ph-ac., Puls., Sulph., Sul-ac. - diseases of bone. **Complementary:** Calc-p. in joint disorders.

***SABADILLA OFFICINALIS

(Cevadilla Seed)

PHARMACY - sabad. Sabadilla officinalis. Cevadilla seed. Cevadilla. Asagraea officinalis. Scoenocaulon officinale. Veratrum officinale. N. O. Melanthaceae of the Lili-aceae. Tincture of seeds. **Historical dose:** Tincture and all potencies.

CLINICAL-Allergies. Ascarides. **Chilliness.** Colds. **Coryza.** Coughs. Debility. Diarrhea. Diphtheria. Dyspepsia, pregnancy. Earache. Esophagus, stricture. **Hay fever.** Headaches. Imaginary diseases. Influenza. Intermittents. **Lice.** Mania. Melancholia. Neuralgia. Nosebleeds. **Pinworms.** Rheumatism. Tapeworm. Throat, sore. Toothache. Uvula, elongated. Vertigo. **Worms.**

HERBAL - Asagraea is a Mexican genus belonging to the Colchicum family, Melanthaceae. It has only one

species, *Asagraea officinalis*, furnishing the cebadilla seeds from which Veratrine is prepared. According to the Treasury of Botany, the seeds were formerly used to destroy vermin.

HOMEOPATHIC - *Sabadilla* first appears in homeopathic literature as one of Stapf's additions; Hahnemann was one of the provers. Stapf's additions form a kind of appendix to the *Materia Medica Pura*. Stapf said that the plant was first described by Monades around the year 1572. At first, it was almost exclusively used for destroying lice and worms in putrid ulcers and the intestines.

Sabadilla has affinities for the ***mucus membranes of the nose***, lachrymal glands, anus, digestive tract, and the nerves. Coryza and symptoms like ***hay fever***. Allergies. ***Chilliness***, sensitive to cold.

Nerves are affected, producing weakness. Alternate nervous and bodily symptoms. Cutting pains in bones. Formication. Worms. Reflex nervous symptoms with twitching, convulsive trembling or catalepsy. Children's diarrhea with constant cutting pains.

MIND - Nervous, timid and easily startled. Mental exertion aggravates. ***Thinking produces headaches and sleeplessness***. Feels miserable. Fright causes hysterical paroxysms. Unresponsive to questions. Loss of consciousness, then he jumps up and runs recklessly through the room. Rage. Mania better washing head in cold water. Delirium during intermittents.

Erroneous, fixed ideas about himself. Imagines he is very sick. Imagines that she is pregnant or that she has cancer. Imaginary diseases. Imagines that parts are sunken, limbs are crooked, chin is elongated. That one side is longer than the other.

Abdomen - Bowels feel knotted. As of a lump or thread moving rapidly in abdomen.

Back - Contusive pain in back and loins, especially when seated. Burning, tingling, stinging sensation between scapulae. Stitches in rapid succession in right side of back.

Causations - Ill effects of fright, mental exertion, thinking. Worms, causing convulsions, nymphomania.

Chest - Burning sensation on chest. Pressure on the chest. Breathing obstructed, as if there were a stone in the chest. Shootings in sides of chest. Inflammation of pleura. Red spots and points on chest.

Constitutions - Suited to sensitive persons of light hair, fair complexion with a weakened, relaxed, muscular system. Children and old people.

Ears - Otagia with troublesome pressure, with snapping as of electric sparks before ears. Tickling in ears. Itching in ear, alternately with itching at anus. Burning, itching and shootings in tips of ears. Humming, gurgling, and detonation in ears. Deafness as if there were a band over ears. Boring in parotids.

Eyes - ***Red, burning eyelids***. Redness of margins of eyelids. Lachrymation, worse during pain, sneezing, coughing, yawning. Pressure on eyeballs, especially when looking up. Weakness of sight.

Face - Lips hot, burn as if scalded. Heat of face with fiery redness, especially after drinking wine. Blue circles around the

eyes. Boring in lower jaw and submaxillary glands. Cracking of the articulation of the jaw on opening mouth wide.

Female - Menses too late, come by fits and starts, intermit, sometimes stronger, sometimes weaker (Kreos., Puls.). Nymphomania from worms.

food Thirstless. Canine hunger for sweets and farinaceous food. ***Desires hot things***, milk. Loathing for strong food. Aversion to all food, meat, sour things, coffee, garlic. During pregnancy, no relish for food until she takes first mouthful, then she makes a good meal.

Head - Dullness and oppression. Unilateral head pains or alternating sides, worse thinking, better eating. Burning, itching, crawling on hair and scalp, better scratching. Headache in schoolgirls.

Heart - Palpitations with pulsations through whole body.

Kidneys - Urgent want to urinate, especially in evening, with tenesmus and scanty emission. Increased secretion of urine. Turbid, thick urine, like clay-water. Burning in urethra when urinating.

Limbs - Upward jerking of arms. Cutting pains in bones. Red spots on arms and hands. Yellow spots on fingers. Swelling of feet with painful soles. Cracking of skin under and beneath toes. Inflammation under toenails. ***Thickened***, deformed horny nails (Ant-c.).

Lungs - Wheezing respiration. Short, difficult breathing. Breathing obstructed, as if there were a stone in the chest. Asthmatic breathing with itching of skin, nose and anus. Violent coughing attacks, muffled, worse anger with lachrymation. Hawking up of bright red blood, which comes from the nose. Cough dry with perspiration and water in the eyes. Cough immediately on lying down. Pleurisy with great paralytic debility.

Male - Digging and pressive pain in testes. Tensive and painful erections, without desire for sex. Pollutions with flaccidity of penis. Diminished sexual desire.

Modalities - Better from heat, warm food and drink, swallowing. Better being wrapped up, open air. Better quick motion

of affected part. Warm stove ameliorates chilliness. ***Worse from cold air***. Worse forenoon, new and full moon.

Worse periodically, every week, two weeks, four weeks, same hour. Worse odors, wine. Worse undeveloped rash. Worse mental exertion. Worse forenoon.

Mouth - Itching of the soft palate. Dryness of the mouth without thirst. **Sweetish taste**. Copious saliva, jelly-like saliva. Cannot bear anything hot or cold in mouth. Lips as if scalded. Tongue as if burnt, as if full of blisters. Pricking, soreness in tip of tongue. Cannot protrude tongue with sore throat.

Nose - Influenza. Hay fever. **Spasmodic sneezing with running nose**. Copious, watery, nasal discharge. Coryza with severe frontal pains and redness of eyes and lachrymation. **Fluent coryza**, worse from the **odor offlowers**, even thinking of flowers increases the discharge. **Oversensitive to odors**, cannot tolerate the smell of garlic. Dry, **itching**, tickling in nose, rubs or picks at it. Tickling in nose spreads over the whole body, then dyspnea. One or the other nostril stuffed up. Hawks bright red blood from naso-pharynx.

Rectum - Constipation. Stools burning, frothy, loose, brown, floating. Broken, hard, scanty stools. Itching, crawling in rectum and anus, as from ascarides, alternating with itching in nose or ears. **Pinworms**, lumbrici, tapeworm.

Sensations - As if things were turning around each other. As if she would fall if she did not hold on to something. As if eyes went around with the whirling sensation. As if uvula were down. As if esophagus would be closed. As of a lump in abdomen. As if a ball of thread were moving and turning rapidly through abdomen. As if knives were cutting abdomen. As if abdomen were shrunken, were empty. Croaking as of frogs in abdomen. As of something alive in abdomen. As if stomach were gnawed.

Skin - Parchment-like dryness of skin. Hot burning, creeping and crawling sensation. Itching with asthmatic breathing. Tingling and burnings shooting under skin.

Red bands, spots, and points in different parts of skin.

Sleep - Great inclination to sleep during day. Sleep comes on when thinking, meditating or reading. Agitated and unrefreshing sleep at night, with anxious dreams. Sleep retarded by a multitude of thoughts. Starts up as from a fright in the morning.

Stomach - Spasmodic pain in stomach with dry cough and difficult breathing. Heartburn, copious salivation. Cold, empty feeling in stomach.

Teeth - Toothache with drawing and pulsative pain. Shooting pains in molars. Tooth decay. Pricking in gums. Bluish gums.

Temperature - **Chill predominates** from below upwards. Heat in head and face, hands and feet icy cold with chill. Thirstless, thirst after chill only. Lachrymation with chill. Shivering as a concomitant.

Throat - Chronic sore throat, worse from cold air. Sore throat, **left to right**, worse empty swallowing, better hot drinks. Tonsillitis after coryza. Much tough phlegm. Sensation of a skin hanging loosely, must swallow it.

Warm food and drink relieve. Painful empty swallowing. Dry fauces and throat. Sensation of a lump in throat with constant need to swallow.

Vertigo - Vertigo with sensation as though all things were turning around each other. Vertigo accompanied by blackness before eyes and sensation of fainting. Vertigo, sudden on waking at night or rising from stooping, better resting head on table.

COMMENTS - Stapf pointed out that the provings reveal strong febrile symptoms. Sabad. may be as clock-like as Cedr., and is a leading remedy in intermittent fevers and neuralgias. Sabad. is a chilly remedy, the symptoms, especially the coryza, are generally worse in the open air.

Intolerant of mental exertion, thinking causes a headache. Tendency to be startled. Erroneous impressions as to the state of his body. Imaginary diseases, imagines parts shrunken. Imagines she is pregnant if there is distention from flatus.

Giddiness, may cause staggering and even fainting. Objects seem to whirl around or to whirl around each other. Sitting aggravates

vertigo. Rising from seat causes vertigo. Lying perfectly still ameliorates vertigo.

Severe catarrhal symptoms. Hay asthma. Allergies. Hay fever with itching and tingling in the nose (All-c., Ars.). Tingling and numbness in the nose (Petros, in the urethra.). Itching in the roof of the mouth, rubbed raw by the tongue (Wye.). Spasmodic sneezing. Coryza, sneezing and runny nose (All-c.). Thick, yellow discharge, worse stuff rooms, better fresh air (Puls.), alternates with watery discharge.

Sore throats characterized by a sensation of a lump or foreign body in the throat and a constant need to swallow. Pressure on larynx causes sore throat. Lying down causes cough immediately, worse expectoration. Kent said it is suited to "old, chronic sore throats that are worse from cold air. The patient is sensitive to cold air. Every time he takes cold it settles in his nose and throat. Tonsillitis going from left to right."

Desires hot drink (opposite of Lach.). Overly sensitive to the smell of garlic (Thuj.). Opening mouth wide causes cracking of jaw joints. Disordered digestion and loaded tongue. Sinking at stomach and gnawing hunger. Indigestion, during pregnancy.

"Violent itching of hairy scalp, compelling her to scratch until blood comes." "Itching of the vertex as if a quantity of vermin had collected there, obliging him to scratch incessantly." "Itching of anus and rectum as from ascarides." "Itching of anus alternating with itching of alae nasi and meatus auditorius." Scratching ameliorates itching of scalp, causes burning of anus.

Kent gave Sabad. to a pet dog which had great irritation of anus and soon afterwards the dog passed a very large number of worms.

RELATIONS - Antidoted by: Camph., Lach., Lyc., Puls., Con. Compare: (l) Colch., Nux-v., Bry., Arund. and Poll. (2) Veratrina is alkaloid of Sabad., not of Verat., locally in neuralgias and for removal of dropsy. Five grains to two drams. Lanolin, rubbed on inside of thighs, causes diuresis. (3) Phle. - Timothy-Hay - Potentized to 12c a specific to many cases and evidently acts in a desensitizing manner. Cumin. - hay fever. **Follows well:** Bry. (Pleurisy). **FoUowedwellby:** Ars. Bell., Merc., Nux-v. **Complementary:** Sep.

***SABAL SERRULATA

(Saw Palmetto)

PHARMACY - sabal. Sabal serrulata. Saw oalmetto. Serenoa serrulata. N. O. Palmace- ae. South Carolina to Florida. The tincture must be prepared from the fresh berries to be effective. **Historical dose:** Tincture and all potencies.

CLINICAL - Appendicitis. Asthma. Atrophy. Backaches. **Bedwetting.** Breast, disorders. Bronchitis. Catarrh. **Cystitis.** Debility. Dysmenorrhea. Dysuria. **Epididymitis.** Gland disorders. Gleet. **Gonorrhea.** Headache. Hoarseness. **Impotency.** Infertility. Iritis. Laryngitis. Lumbago. Malnutrition. Menses, delayed. Neuralgia. Neurasthenia. Obesity. Ovaries disorders. Peritonitis. Pharyngitis. Proctitis. **Prostate, disorders. Prostate, enlarged. Prostatitis.** Puerperal fever. Rhinitis. **Sexual, debility.** School, headache. Strangury. Testes, atrophy. Throat, sore. Tuberculosis. **Urine incontinence.** Uterus, disorders. Whooping cough.

HERBAL - Sabal serrulata was introduced into medicine by J. B. Read and A. A. Solomon, both of Savannah, Georgia. Dr. Read gave a "Saccharated oil," of which he said, "By its peculiar soothing power over the mucus membranes it produces sleep and relieves the most troublesome coughs, promotes expectoration, improves digestion and increases fat, flesh and strength.

"It has been used with benefit in cardiac asthma, tuberculosis, especially laryngeal, chronic bronchitis and dilatation of the bronchial tubes. Sabal's action in catarrhal disorders is rapid and permanent. A cold in the head may be checked with two or three doses (of the saccharated oil) mixed with boiling water and used by inhalation it has been found beneficial in chronic ozaena."

HOMEOPATHIC - In the provings, the tincture or fluid extract were used, from 5 to 10 drop doses, repeated two or three times

a day. A similar dosage has been adopted in the clinical use of the remedy.

Sabal is an organ remedy of great power, selecting the uterus and prostatic gland (which is the male analog of the uterus), ovaries and testes and bladder. For irritability of the genito-urinary organs, especially the prostate, ovaries, breasts, bladder and urethra. It is soothing to the mucus membranes and is tonic, nutritive and stimulating to the overworked brain.

Prostate enlargement and weakness. Prostatitis. Epididymitis and urinary difficulties. Iritis with prostatic trouble. Homeopathic catheter for retention of urine due to enlarged prostate.

General and sexual debility. Nervous irritability with loss of sexual desire in both sexes. Sexual neurotics. **Valuable for undeveloped breast glands.** Small and undeveloped genitals.

Sharp, stinging and wandering pains. Languor, apathy and indifference. **Fear of going to sleep.** Promotes nutrition and tissue building.

MIND - Difficult thinking, cannot grasp or re- memberwhatisread. Confused. Impatience, fretfulness. Irritability and depression, particularly before menses. Irritability from loss of sexual desire. **Dislikes sympathy, makes them angry.** Self-concentrated on their own sufferings, wants to be left alone. Apathy. Wants to go away and die alone. Indifference to wants of others. Fears to fall asleep lest something should happen. Starts up with fear as he is dozing.

Abdomen - Sudden, intense, cramp-like pain through abdomen. Sharp, stinging pains running up and down front of abdomen, and also right side. Pain extending to thighs.

Back - Aching across lower part of back. Deep pains in lower back. Fearful backache, pain in sacral region, before and at commencement of menses. Backache after sex.

Bladder - Feeling as if bladder too full. Heavy, aching pain and sense of coldness in bladder, extending to external genitals. Painful starting the flow, as if forced through very narrow meatus. Feeling as of a stricture about two inches down urethra. Urethra sensation of narrowness (Arg-n.). Difficult urination, smarting, burning

in urethra. Paresis of bladder sphincter. **Cystitis from prostate enlargement.** Painful urination, connected with ovarian pain. Urinary sediment. Incontinence from any exertion, lifting, laughing. Constant desire to pass urine at night. **Bedwetting.** Chronic gonorrhea.

Breasts - One breast smaller than other. **Breasts shrink in size** (Iod., Kali-i.), or increase rapidly. Breasts, sore, tender and full feeling, itching. Stinging in breasts, soreness worse after cold bath. Sharp pains in mammary glands. Pain in breasts, worse coldness, pressure. Defective lactation.

Chest - Sharp pain in left side of chest, running through left breast.

Constitutions - Sycotic constitutions.

Ears - Chronic inflammation of middle ear. Fullness in nose and ears. Frequent sharp, stitch-like pains inward from ears. Hearing diminished, voices seem far off.

Eyes - Iritis when prostate gland is involved. Dim vision during headache.

Face - Papular eruption on left temple and about mouth. Slight neuralgia in right temple and right jaw. Pallor.

Female - Amenorrhea. Ovaries tender and enlarged. Stinging pain in ovary, pains running down the thighs. Stinging pain in uterus. Uterine tumor. Heavy feeling over womb. Vulva feels open. Sensation of coldness in genitals. Awakened by a most distressing itching of labia majora. Furious sexual passion. Loss of sex drive. Sexual neurotics with suppressed or perverted sexual inclination.

Food - Appetite poor and capricious. Malnutrition and great emaciation. Better from bread, milk. Constant desire for buttermilk, milk (Rhus-t., Tub.), which is usually disliked. Aversion to mother's milk. Worse meat, pudding, vegetables.

Head - Severe headache with giddiness and dim vision. Headache of weak persons. Neuralgia in feeble patients. Sharp, darting pains here and there, coming and going suddenly. Pain runs up from nose and centers in forehead. Dull, aching pain

in right temple and on vertex. Pain and irritation at base of brain and upper third of cervical spine (Gels.). Sensation as if something tightening in brain.

Kidneys - Pain or irritation in region of kidneys. Excruciating pain and fainting on being raised up to urinate.

Limbs - Pains into thighs, radiating in different directions, settling in ovaries. Sharp pain running down thigh. Aching in knee and calf. Annoying eczema of hands.

Lungs - Chronic bronchitis (Stann., Hep.). Copious expectoration with catarrh of nose. Wheezing cough, worse lying down, until 6 a.m.

Male - Coldness of genitals. Drawing pains in spermatic cords. Slight twisting chordee as if stretched from the root. Atrophy of testes. Testes drawn up, painfully. Epididymitis. Gonorrhea. **Impotency, loss of sexual power.** Hard erections. Semen thick, causes hot feeling along the cord. Sex is painful at the time of emission. Loss of sex drive. **Sexual neurotics** with suppressed or perverted sexual inclination.

Modalities - Better after sleep, from milk. Worse from cold, damp, cloudy weather. Worse in early morning, from rising, at bedtime. Worse from sympathy. Worse before menses. Worse from motion. Backache worse after sex. Catarrhal symptoms are worse in cold, damp weather. Cough worse on lying down at night. Depression worse before menses.

Mouth - Pungent, burning sensation in mouth and fauces, causing sneezing, coughing, and gagging. As if mouth coated with fat. Burning on tongue as if scalded.

Nose - Pain at root of nose. Pain running up from nose and centering in forehead. Fullness in nostrils, compelling him to pick them. Catarrhal symptoms, worse cold, damp weather. Sneezing and lachrymation, coughing and gagging.

Prostate - Prostatitis. Emission of prostatic fluid during stool, on straining at stool, during urination. **Prostatic weakness** with discharge of prostatic fluid. **Enlarged prostate.** Dull aching in prostate extending into abdomen. **Cystitis from prostate enlargement.** Dribbling of urine from prostate enlargement.

Rectum - Constipation and enlarged prostate. Hemorrhoids with dryness of stool and pressure from within out. Stools dark, almost black. Stools unusually easy, free from hemorrhoidal troubles.

Skin - Papular eruption on face. Eczema of hands.

Sleep - Fears to fall asleep lest something should happen, starts up with this fear when he is dozing. Wakes from coldness. Awakened by stinging pains in ovaries, or by a distressing itching of labia majora.

Stomach - Sharp pain running through stomach. Severe pain in left side of stomach. Irritation of stomach. Belching and acidity. Acute gastritis, fearful burning as from sulphuric acid. Could not take meat, vegetable, or pudding, only bread and milk.

Throat - Voice changed, throat feels husky. Sharp pain in left side of throat. Pungent, burning sensation in fauces, followed by smooth sensation, as if coated with oil.

Vertigo - Vertigo with headache from fumes of oil.

COMMENTS - In his book, Saw Palmetto, Hale put together most of the available knowledge regarding this

plant. It is a dwarf palm with a creeping (or leaning), branching stem, the edges of leaf and petioles serrate, roots fibrous, large, half exposed.

The fruit, so-called "berry," is a one-seeded dupe about the size of an olive, dark purple when ripe, and ripening in October and November. The fruit is richer in sugar than sugar cane and contains two oils, one volatile and one fixed. The volatile oil is considered to possess the most characteristic properties of the medicine.

Hale described it as "yellow," but he quoted John Uri Lloyd of Cincinnati, as writing to him, "The principal constituent is a volatile oil. This oil possesses a deep green color." And he goes on to say that the color is not due to chlorophyll nor to the copper of the form used in condensing it.

This agrees with Estep's contention that the preparation of Sabal should be darkgreen or grass-green. The preparation

Estep used was a fluid extract prepared by Burrough Brothers of Baltimore from the "fresh green berries." Hale directs that the fresh ripe berries should be used.

Hale's tincture was of fresh ripe berries and seeds, all crushed and macerated in 90 percent alcohol for fourteen days and decanted. He noted that the fluid extract was "probably four times stronger than the tincture."

C. S. Estep used a dark-green fluid extract that was made from the fresh green berries and as "almost as green as grass and has an oily surface." He made his dilutions from this. Other preparations disappointed him. Oil can be prepared from the expressed juice of the fruit by allowing it to stand a few days. Saccharated oil is one part of the oil to seven parts of cane sugar. Malted Sabal is one part of the oil to seven of Maltine. Aqua Olei Sabal, for use as a spray, is a preparation suggested by Hale made by triturating 15 drops of the oil with Mag-c. 3j., gradually adding a pint of distilled water and decanting.

The preparation used by Dr. Mullin's prover was made by Boericke and Tafel. All are agreed that preparations of the dried fruit and of the root-bark do not possess the curative powers of the remedy.

While on a trip through the wilds of Florida, Hale observed the great fattening properties of the berries on animals. During summer, food is scanty and the wild animals become very thin, but as soon as the palmetto fruit ripens they improve rapidly. In a few weeks have put on so much fat that they become easy prey. This fat, said Hale, "consists principally of olein and will not make lard."

Dr. Langton said that she gave 5 drop doses four times daily in cases of overworked brain and school-headache for the "tonic, nutritive and stimulating" effect of the remedy. She gives the lx as soon as relief has been obtained and she finds that the dilution often gives greater relief than the larger doses for the headaches. Mullins said "I now found the use of the drug in the 3c and 6c potency curative in nearly all of the diseases of the uterus and appendages. Also in headache from reflexes uterine troubles in breast abscess, mental irritations and nervous debility." He thought that it well deserved the name of "The Homeopathic Catheter," but he added that it must be given on its individual indications.

W. E. Rely published three cases illustrating the prostatic action of Sabal. The first, Mr. J., 56, was very despondent, irritable. Sympathy seemed to anger him. Great tenesmus in neck of bladder with heavy, aching pains with sense of coldness extending into external genitals. Occasional sharp pains extending up into abdomen and down into thighs. Capricious appetite. Chronic constipation. Urination too frequent, disturbing sleep.

Sabal tincture was given, five drops, night and morning. Steady improvement followed, and in eight weeks all the symptoms had gone and with them an annoying eczema of the hands.

The second case was Mr. M., 45, who had increasing frequency of urination for a year. Despondent, distressed. Capricious appetite. Vertex headache and gastric catarrh. Little sexual desire. Sex followed by digging pain in back and tenesmus of bladder with difficulty in commencing to urinate.

Genitals were cold, dull aching in region of prostate, extending to abdomen and thighs. Sabal tincture gradually relieved and cured in three weeks.

The third case concerned Mr. E., 35. He had frequent urination for one and a half years. Heavy, dragging pains, extending into back and thighs, back pains much after sex. Considerable loss of prostatic fluid at times. Sexual desire much impeded. Severe headache on vertex and gastric catarrh. All symptoms were removed by Sabal tincture.

Hale said that E. S. Evans of Columbus, Ohio, considered Sabal "almost specific in iritis when the prostate gland is involved. I have cured cases with the 3x which could not be relieved in any other way."

A. L. Davidson related a case of impotence in a man, 51, who had difficult urination, tenderness of prostatic portion of urethra,

loss of power. His testicles shrunk, penis shrunk and cold.

Sabal tincture, 15 drops, four times a day, was prescribed. At the end of the first week he complained of drawing pains in spermatic cords, there was freer flow of urine, he slept better and felt better. At the end of the second week the testes gradually increased in size. The urethral tenderness had nearly disappeared and

erections were established. In two weeks more the cure was complete, the testes were even larger and firmer than normal.

J. Martin Kershaw of St. Louis, treated a young woman, 23, who had great difficulty in controlling her urine all her life. Undue exertion, lifting, straining, or laughing caused it to dribble away. Unless she rose several times in the night, she was sure to wet the bed. Sabal tincture, one drop, four times a day, was given. In one month she was much improved and under the same remedy she gradually got quite well.

Elias C. Price reported three cases. The first was a case of a very nervous, sensitive woman with chronic inflammation of the bladder, frequent, painful urination, ten to twelve times in the night and every fifteen to thirty minutes during the day. Spells of pressing pain on rectum, better by warm water enemas, which generally brought away hardened feces.

Lil-t. 3x removed this temporarily. Rectal examination disclosed a hard, fleshy tumor the size of half a hen's egg on the posterior aspect of the uterus. Sabal fluid extract 5 drops, thrice daily, diminished the tumor by half in two months and removed it entirely in three more.

Prices' next case was of Mrs. X. who, five days after confinement after her first child, had irritation of kidneys and a week later symptoms of pelvic peritonitis. Her uterus was much enlarged, very tender. She did not urinate very often, but when she did the pain was so excruciating that she fainted away and sometimes did not come to for an hour. •

For three days no remedy did any good. Then she had a violent pain on the right side of her head above and behind the

ear, and paralysis of her left arm and leg. She became unconscious and could not be aroused, at times would talk of things that had occurred before her illness, insensible to external impressions.

She remained so for ten days. Sabal fluid extract, 20 drops, every two hours, relieved the pain on being raised to urinate after the second dose. Recovery from the other condition was very gradual.

The third case was of Miss X., 22, who had irregular menses for years, having once gone nine months without a period. When she came to Price she was three months past her time, one breast was much smaller than the other.

Sabal fluid extract was given, 5 drops, thrice daily. In about a month the menses came on freely, lasting four days instead of the usual two. Breasts began to increase in size. In three months one was as large as the other. The following year she again missed her time and Sabal brought it right in a week.

Using Sabal, Price has cured cases of pelvic cellulitis, peritonitis, puerperal fever inflammation of uterus, tubes, ovaries and even appendicitis and proctitis, especially **if the prostatic gland is involved. Enlarged** prostates. Acute prostatitis. Prostate conditions relating to impotence. Prostate cancer (Con.). Frequent urination. Chronic bladder inflammation. Benign prostatic hypertrophy.

Characteristic stinging pains. Wandering, radiating and cramping pains were also prominent. Sabal has several groups of associated regions of pain: pains affecting head and ovary, ovaries and breasts, lower back and right temple, prostate and eye. Mainly used in tincture.

RELATIONS - Antidoted by: Sil. - Sabal grows on the sandy shore. Puls, delayed menses, Puls, also grows on sandy soils. Sabal. is most fruitful nearest the sea, compare Sil-mar. **Compare:** (1) Stinging pains in ovaries, Apis, Merc. (2) Pain in right ovary and thigh, Apis. (3) Breasts painful, Con., Calc. (4) School-headaches, worse by sympathy, Nat-m. (5) Prostatic affections, Ferr-pic., Cham., Arg-n., Dig., Solid. (6)

Prostate and eye, Solid. (7) Worse from sex, Kali-c. (8) Wandering pains, Kali-bi. the roots of Sabal. are very rich in potash salts. (9) Over-worked women, Mag-c.

***SABINA OFFICINALIS

(Savine)

PHARMACY - sabin. Sabina officinalis. Savine. Juniperus sabina. N. O. Coniferae. Cupressaceae. Tincture of the young, fresh tops of the branches. Tincture of the oil. **Historical dose:** Tincture and all potencies. Locally, tincture for warts.

CLINICAL - Abortion, effects. After-pains. Boils. Condylomata. Cystitis. **Dysmenorrhea.** Fibroids. Gonorrhea. **Hemorrhages.** Inter-menstrual, flow. Leucorrhea. **Menstruation, excessive. Miscarriages.** Moles. Nephritis. Nymphomania. Ovary, disorders. Penis, swelling. Phimosis. Retained, placenta. Rheumatic, gout. Strangury. Sycosis. Toothache. **Uterus, bleeding. Warts.**

HOMEOPATHIC - Stapf made the first collection of the symptoms of Sabin., and Hahnemann and his son were among the *pro vers.* A number of observations on women who had taken the drug to bring on menses or procure miscarriage have also been added, and some cases of fatal poisoning are recorded.

A close botanical ally of Thuj., Sabin, is not too close to be complementary to that great anti-sycotic. Broad

condylomata, fig-warts with much itching and exuberant granulations are characteristic. Like Thuja, it removes wart-like growths from the mucocutaneous surfaces.

Cooper noted that Sabin, acts as a widespread irritant, inflaming the pyloric end of the duodenum and causing patches of inflammation in other portions of the intestines, especially the upper intestines, the omentum and the peritoneum. In addition, it affects the fibrous tissue of small joints, serous membranes and heels.

Pronounced action on the generative organs of both sexes. It produces fig-warts with itching and burning of the external

genitals, phimosis of the male, swelling of the dorsum of the penis, and gonorrhea. Uterine hemorrhages, abortion.

Hemorrhages, where blood is fluid and clots together. Hemorrhage is partly pale red and partly clotted, worse from the least motion, but may be better by walking. The flow is in paroxysms and is accompanied by labor-like pains.

Tendency to miscarriage especially at the third month. Warmth ameliorates pain of dysmenorrhea. The dysmenorrhea pains were better lying on flat of back with limbs extended out. Walking ameliorates the metrorrhagia.

Pain from **the sacrum to the pubis**. Pain increases suddenly and decreases slowly. Cold applications ameliorates wandering pains in joints. Red, shiny, swelling of affected parts. Acutely inflamed arthritic nodes.

Violent pulsations, wants windows open. Heaviness and indolence of body, wants to lie down. Sense of fullness. Lies on left side during sleep. Sleepless and restless after midnight.

MIND - Dejection, discouragement and sadness. Feeling of deep-seated trouble, which makes him melancholy and sad. Sadness with great tiredness and laziness. Melancholy. Moroseness with dislike to conversation, especially when exercising in open air. Weeping aloud. Desires repose and tranquility. Reserved while walking in open air. Taciturn while waking in morning.

Nervous and hysterical. Great anxiety, fear and apprehension. Irritable nerves. Much irritability of temper. Irrascibility with tears and sobs. Listlessness. Weakness of memory. Hypochondriacal mood. Sensitive to slightest noise. Starting from noise. Music goes through bone and marrow. **Music is intolerable**, it produces nervousness. Distraction from sound of piano.

Abdomen - Tympanitic distention. Congested. Quivering as if something were alive, resembling fetal movements. Bearing-down, constrictive pain. Colic, mostly in hypogastric region.

Back - Paralytic pain in small of back. **Pain between sacrum and pubis**.

Breasts - Crawling, voluptuous itching in nipples. Stitches in left nipple.

Chest - Pressure on chest. Pressive, spasmodic tension in chest in middle of sternum. Trembling in the lungs with dull rattling and crackling. Lancinations.

Constitutions - Suited to hot-blooded women with gouty or rheumatic diathesis, arthritic pains. For the chronic ailments of women, tendency to miscarriage, hemorrhagic tendency, nosebleeds and hematuria. Farrington said it is suited to "plethoric women who suffer from what they call rheumatic inflammation" of the heels.

Ears - Pinching in ears. Hardness of hearing. Gets deaf when tired, in foggy weather, or at any change of weather.

Eyes - Tensive pain in eyes, as if muscles too short. Heat in eyes. Eyes dull and downcast. Clouds before eyes. Smarting tears. Jerking quivering of lids.

Face - Pale with blue circles around eyes. Black pores in cheeks and around nose. Paralytic pain and pressure in zygomatic process.

Female - Menses, too profuse too early, gushing of hot, watery, **bright, blood, mixed with dark clots**. Dysmenorrhea, better lying flat on the back with limbs extended. Bleeding between periods with sexual excitement. Increased desire for sex. Vaginitis. Leucorrhea from suppressed menses or copious menses. Leucorrhea. foul, acrid, thick, yellow. Leucorrhea after menses, corrosive, offensive. Atony of uterus. Uterine pains extend into thighs. **Pain from sacrum to pubis** and from below upwards. **Shooting pain up the vagina**. Uterine hemorrhage, partly clotted, **worse from least motion**. Bleeding fibroids (Thalspi). Promotes expulsion of moles from uterus (Canth.). Tendency to miscarriage, especially at the third month. Menorrhagia in women who abort readily. Itching of pudenda during pregnancy. **Retained placenta, intense after-pains**. Inflammation of ovaries and uterus after childbirth.

Food - Poor appetite. Bitter taste of food, especially milk and coffee. Desire for acids, especially lemonade.

Head - Rush of blood to head and face. Bursting headache, coming suddenly and going slowly. Splitting sensation in forehead and temples. Pulsative headache with heaviness and stupefaction. Drawing pains in masseter muscles.

Heart - Violent pulsation in blood vessels through whole body. Augmented and extended beating of the heart. Pulse unequal, generally quick, strong and hard.

Kidneys - Burning and throbbing in region of kidneys. Bladder inflamed, throbbing. Bladder irritability with gouty diathesis. Inflammation of urethra. Bloody urine with much urging.

Limbs -Arthritic pain in joints. Red, shining swelling. Gouty nodosities (Am-p.). Gout, worse in heated room. Knots and enlargements in varicose veins. Bruised pains in anterior portion of thighs. Shooting in metatarsal bones. Shooting, intermittent aching in the heels. Swelling, redness and stitches in right big toe.

Lungs - Dry, hacking cough and tickling in the trachea. Hemoptysis. Expectoration of mucus streaked with blood.

Male - Burning, sore pain in glans. Prepuce painful with difficulty in retracting it. Sexual desire increased with violent continuous erections. Hard swelling on dorsum of penis. Sycotic warts, growths. Gonorrhea with pus-like discharge.

Modalities - Better from cold, cool open air. Better exhalation. Worse from foggy weather, night. Worse heat, warm air. **Worse heat of bed** or room. Worse exertion, stooping, least motion, taking a deep breath. Worse letting limbs hang down. Worse pregnancy, menopause. Worse music. Worse by touch, though better pressure.

Mouth - Drawing pain in the muscles of jaws. Toothache, worse only when chewing. **Bitter taste** to food especially milk or coffee.

Nose - Dry coryza.

Rectum - Sense of fullness. **Pain from back to pubis.** Constipation. Hemorrhoids with bright, red blood, bleed copiously. Hemorrhoids alternate with pain in limbs.

Sensations - As if she would fall. As if parts of temporal eminence were pressed asunder. As if skin had grown fast in forehead. As if eyes would be pressed out. As if tooth would burst. As if he had to swallow over a foreign body. As of a lump in throat. As if vomiting would come on. As if something alive in abdomen. Right shoulder joint as if sprained.

Skin - Black pores in skin, especially face. Foul, itching, burning. Exuberant granulations (Thuj., Nit-ac.).

Warts. Fig-warts, moist with intolerable itching and burning.

Sleep - Sleeplessness and restlessness after midnight. Disturbed sleep with frequent waking. Talking and loud snoring during sleep. Tendency to lie on left side when sleeping. Anxious, continued dreams, full of fanciful images and intellectual efforts.

Stomach - Fullness and inflation of region of stomach. Pain from epigastrium to back. Stomachache. Acidity in stomach after a meal. Empty risings and heartburn. Nausea with fullness in stomach. Vomiting of bile or of food eaten the previous day.

Temperature - Intolerable burning heat of whole body, with great restlessness. Great chilliness through the day. Chill in the evening with attacks of chilliness. Fever in evening, first shivering, then heat and lastly perspiration.

Throat - Sore throat during deglutition, as from a foreign body or an internal swelling in gullet, with pressure and choking. Dull lancements in throat. Dryness in throat with drawing pain.

Vertigo - Vertigo with suppressed menses. Stupefying vertigo, leading to falling, with cloudiness of sight. Giddiness with congestions to and heat in head.

COMMENTS - Characteristic pain from sacrum to pubis. Pains are paroxysmal and labor-like. Pain suddenly increases and then slowly disappears. Wandering pains (Puls.). Numbness, goes through bone and marrow. Inflamed sacrum, or severe aching pains in the sacrum. "Intermittent aching" in the heels. Tendency to bleed (Phos.). Nosebleed (Phos., Ferr-p.). Tendency to warts, genital warts, venereal warts, and anal warts. Bleeding warts (Nit-ac.). Gonorrhea, or a history of gonorrhea, with genital warts (Thuj.). History of vaginitis with genital warts.

Hemorrhage of bright red blood, with clots (Bell.), comes in gushes. Heavy menstrual bleeding, with swelling, fatigue and headaches, worse motion. Menses too early, too abundant, may last too long. Painful dysmenorrhea with heavy bleeding, pains from the pubic bone back to the sacrum, better lying on the back, limbs extended. Pains can be sharp and stabbing. Bearing down pains. Drawing pains.

Endometriosis (Med.). Pelvic inflammatory disease, with a throbbing uterus. Discharge of blood between the periods with sexual excitement. Bleeding fibroids. Blood streaked leucorrhea. Vaginitis with offensive, irritating, profuse discharge.

Severe morning sickness, spasmodic vomiting. Miscarriages due to spasmodic vomiting. Tendency to miscarriage (Caul., Sep.), usually in the third month (Bell.), with bleeding, passing clots and membranes. Retained placenta (Sec., Caul.). Hemorrhage after an abortion. Postpartum hemorrhage. Severe after-pains. Hemorrhage during menopause. Pulsating sensation and hot flashes during menopause. Throbbing with hot flashes. Turmoil in the circulation. Hot flashes, worse clothing, wants to take off clothing and fan themselves. Desires fresh air. Irritable and ill humored during menopause. History of being worn out, overworked, with

many children. Menopause brought on by a weakened uterus. Varicose veins.

Obscure abdominal pains due to inflammatory states of the peritoneum. Sensation of something alive in the abdomen (Thuj.). Rumbling with indigestion and uterine problems, as if something is kicking or moving. Bleeding hemorrhoids, especially with a history of constipation and uterine problems. Bloody urine. Irritability, hysteria and hypochondriasis. Discouraged and adverse to conversation. Music is intolerable. Overheats easily.

dislikes stuffy rooms. Desires juicy, sour things. Can complain that food tastes too bitter. Generally left sided. Worse at night and from physical contact.

RELATIONS-Antidoted by: Puls. **Compare:** (1) Croc., Calc., Tril., Ip., Mill., Erig. (2) Hir. - the leech. (3) Rosm. (4) Worse by music - Ambr., Thuj., Sep. (5) Inter-menstrual flow, Ham., Ambr. (6) Condylomata, Thuj., Nit-ac. (7) Hemorrhage, worse from least motion, Sec. (8) Menses partly fluid, partly clotted, Ferr. (9) Retained placenta, Caul., Sec. Promotes expulsion of moles or foreign bodies from uterus, Canth. (10) Better in fresh air, desires lemonade, Puls. (11) Clotted hemorrhage, Mill., Plat, is dark, Sabin, bright red. **Compatible:** Ars., Bell., Rhus-t., Spong. **Complementary to:** Thuj., Nit-ac.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***SACHARINUM

(Sacharin)

PHARMACY - sacchin. Sacharinum. Sacharin. Benzoic sulphinide. Saccharine. Artificial sweetener.

Historical dose: All potencies.

CLINICAL - Allergies. Bladder, cancer. Bladder, tumors. Hypoglycemia. Insomnia.

HOMEOPATHIC - This substance is a derivative of benzoic acid, and is made synthetically from coal-tar. It is a white powder, readily soluble in warm water, but to only a slight extent in cold water.

Saccharin is the foundation for many low- calorie and sugar-free products and is used in table top sweeteners, baked goods, jams, chewing gum, canned fruit, candy, dessert toppings and salad dressings.

Saccharin is about 300 times as sweet as sucrose, but has an unpleasant bitter or metallic aftertaste, especially at high concentrations. Saccharin goes directly through the human digestive system without being digested. It does not affect blood insulin levels, and has effectively no food value.

Saccharin is not recommend for children with "sulfa" allergies, and has been linked to short-term problems with infant muscle tone, "lazy" eye, irritability, and insomnia.

Saccharin has been implicated in the development of photosensitive skin eruptions in humans, and as a hypoglycemic agent in animals. Increased incidences of bladder cancer and tumors have been found in toxicity studies.

RELATIONS - Compare: (1) Aspart., Sac-alb.

REFERENCES - Murphy.

***SACHARUM ALBUM

(Cane Sugar)

PHARMACY - sac-alb. Sacharum album. Cane sugar. Sucrose. Sacharum officinale. White sugar. Sugarcane. N. O. Gramineae. Trituration. Solution. **Historical dose:** Tincture and all potencies.

CLINICAL -Acidity. Anal, itching. Anorexia. Aphthae. Ascites. Biliary. **Blood, sugar.** Bulimia. **Cachexia.** Cataract. Chills. Chlorosis. Constipation. Cornea, opacity. Cramps. Coughs. **Diabetes.** Diarrhea. Dropsy. Dyspepsia. Edema. Emaciation. Epilepsy. Fainting. Fatigue. Fever. Gangrene. Gout. Hair, growth. Headache, periodic. Heartburn. Hemorrhoids. Hoarseness. **Homesickness. Hyperactivity. Hypoglycemia.** Hysteria. Intermittent, fever. Insomnia. Leg, ulcers. Liver, disorders. **Malnutrition.** Migraine. Myocardial, degeneration. Nausea. Neurasthenia. Ophthalmia. Pancreas, disorders. Panaritium. Poisoning. Quinine, effects. Ranula. **Restlessness.** Rheumatism. Rickets. Scurvy. Sleeplessness. Spleen, disorders. **Sugar, effects.** Tabes mesenterica. Teeth, decay. Ulcers. Vertigo. Vomiting. **Worms.**

HOMEOPATHIC - According to Hering, a large proportion of chronic diseases of women and children are developed by using too much sugar. Like so many other articles of diet, Sugar may be a poison and a medicine as well as a food. Sugar preserves food, as salt does, and both sugar and salt have produced scurvy.

Cases of scurvy, rickets in bottle-fed children have been traced to excess of sugar in their food and the exclusion of sugar from the dietary of the gouty, rheumatic and the

diabetic, shows the pathogenetic power it is credited. Acidity of the stomach and itching at the anus are common effects of taking too much sugar.

Sugar is an antiseptic. Combats infection and putrefaction. It has a solvent action on fibrin and stimulates secretion by the intense osmotic changes induced, thus rinsing out the wound with serum from within outward,

favoring healing. Leg ulcers.

Sensitive to pain or **not sensitive to pain at all. Fainting from pain.** Fainting on seeing blood. Fainting from a blood puncture. Fainting spells. Plethora. **Weakness**, lack of energy. Sudden weakness, ameliorated by eating. Weakness after **sweets.. Physical tension. Waking very early in the morning.**

Extreme **dryness**, dryness of skin, hair, nails, hands, feet, inside of nose, eyes, mouth, throat, vagina, stool. Tingling in the limbs. Pains in bones from head to foot. Edema of feet.

Cold expectoration. Opacity of cornea. Dim sight. Myocardial degeneration. Headache every seven days.

Emaciation with great appetite. Obesity with compulsive eating, especially sweets, cakes and pastries. potato chips, anything. **Acidity and anal itching.**

Children who are **cross, peevish**, whining, capricious. Very aggressive children, often emaciated. Children who want dainty things, tidbits and refuse substantial food. Scurvy, rickets in children. Fat, bloated, large limbed children. Family history of diabetes and cancer.

MIND - Discontented with himself and with everything. Hard to please. Lack of joy in life, feeling that life is not worth living. Want of childish cheerfulness. **Sadness, worse after sweets. Loneliness.** No real feelings of relationship with other people and with life in general. **Longing and melancholy, as if homesick.**

Lack of love. Possessive love. **Jealousy, from fear of losing the loved one.** Fundamental frustration in affection in the past, mostly in early childhood. **Very uncertain about the love of partner or parents.**

Fear of failure. Sensitive to criticism.

Great need of approbation. **Ailments from lack of affection**, lack of physical contact in early childhood. Lack of attention. **Loquacity**, mostly to have attention. **Plays antics** to have attention. **Forsaken feeling.** Desire to be held in the mother's arms. Desire to be carried.

Great need to be caressed and touched, or difficulty in admitting this need and refusing every contact. Often a lack of contact with the mother. **Sucking the fingers or thumb.** Sucking thumb almost the whole day and during the night, or never sucking the thumb at all. Sucking the thumb until an advanced age. **Biting nails**, up to the quick. Biting toenails. **Touches everything.**

Alternating moods, gentleness alternating with aggression. Peevishness. Melancholic mood with chilliness.

Capriciousness. Low spirited, hypochondriacal mood. **Restlessness, aggravated after eating sweets.**

Indifference. Disinclined to talk, want of interest. **Antisocial.** Thinks he is neglected and placed at a disadvantage. Feels despised. Envious. **Jealous. Lack of self-confidence. Timidity.** Increased modesty of women. **Great modesty.** Stupidity. **Irresolution.** Dainty, cross and whining, indolent.

Anxious. Worries about all sorts of things at night. Fear of fainting, of seeing blood. Fear of falling. Felt afraid to go to bed, **of the dark. Fear of failure** (Care.). Fear of losing beloved persons and parents. Hypochondriacal mood. **Intense nervousness.** Jumps from her seat at the least unusual noise. Seems as if she would fly out of her skin.

Irritable, in morning, until breakfast. **Irritable when hungry, better by eating.** Offended easily. Cross and fault-finding. Censorious and sarcastic. Biliary sanguineous temperament.

Quarrelsomeness. Violent temper. **Extremely aggressive**, quarrelsome, violent, malicious and defiant, especially after eating chocolate or sweets. **Fits of anger, unapproachable.** Kicks and hits. Ailments from anger. Bad effects from violent anger. Ailments from excitement, stress. **Fainting from pain.**

Delusion of being persecuted. **Delusion that her parents don't love her or that she**

is less loved than her siblings. Imagined that her mother wanted to kill her. Imagines that some one is behind her. Feeling that everybody in the world is against him.

Abdomen - Abdomen swollen and enlarged.

Abdomen as hard as a stone. Painful hardness of the abdomen. Hard swollen abdomen after scarlet fever. Swelling and induration of the mesenteric glands. Tabes mesenterica. Abdomen shows the presence of water on percussion. Dropsy. Flatulency. **Pain in the spleen** (from a blow received a long time ago) and liver. Swelling of the spleen.

Breasts - Atrophy of breasts. Fullness and swelling of breasts before menses. Pain in breasts before menses.

Causations - Sugar. Anger.

Chest - Sharp pains in the left side of the chest. Rheumatic pain in the region of the heart. Fullness in the chest, in the morning and relieved by expectoration of mucus. Swelling of the lower part of the sternum. Emaciation of the chest, the muscles dwindle away.

Constitutions - Biliary, sanguine temperament. Plethoric constitution.

Ears - Discharge of pus from the ears.

Eyes - Dullness of eyes. Dryness. Eyes closed by swelling and inflammation of lids. V aricóse distention of vessels of eyes. Ophthalmia. Cataract, opacity of lens. Opacity of cornea. Dimness of the cornea. Dimness of sight. Obscuration of sight. Inflammation of the eyelids. Edematous swelling of the eyelids.

Face - Changed expression of the countenance. Face pale, deathlike. Face bloated, edematous. **Healthy fresh color of the face.** Twitching of muscles of right cheek, over malar bone.

Female - Amenorrhea. Menses diminished, scanty. Menses painful, dysmenorrhea. Menstrual pale blood, watery. Painful ovulation and menses. Brown leucorrhea. Suppressed leucorrhea. Complaints before menses including sadness, irritability, swelling and painful breasts (Sep., Care.). Brown bloody discharge preceding menses. **Leucorrhea, bloody before menses.** Dryness of vagina. Increased sexual desire. Swelling of the genitals.

Food - **Compulsive eating.** Bulimia with obesity. Ravenous appetite soon after eating with feeling of emptiness in stomach and general **weakness. Insatiable appetite not ameliorated by eating.** Morbid hunger with the fever. Anorexia, no feeling of hunger at all at any time, no desire to eat. Little or no appetite in the morning, but insatiable appetite in the evening, especially for sweets. **Hypoglycemia.** Has to eat at the normal times, otherwise weak, dizzy, trembling, headache. Tendency to eat frequently between meals. **Better after eating,** after breakfast, from sweets. **Desires sugar, sweets, chocolate,** pastries and cakes. Desires sweets after dinner and before menses. Desires bread, butter, fat, salt, sour, lemons, mustard. Desires raw vegetables. **Worse from chocolate, sweets.** Aversion to sweets, butter, fat, warm milk, warm food, cooked vegetables. Aversion to anything except sweets. **Thirst for large quantities.** Thirstlessness. **Desires licorice.** Desires cold drinks, especially water, tea, warm milk. **Desires alcohol.** Bad effects from spirituous liquors.

Head - Giddiness from indigestion. Migraine. One-sided headache. Headache every week the same day. Severe headache with the chill. Cold in the head. Hair grows rapidly. Perspiration only on the head.

Heart - Myocardial degeneration. Endocarditis. Rheumatic pain in heart region. Weakness of heart. Pulse weak and irregular.

Kidneys - Great pains in kidneys. Sharp burning pains run from kidneys to shoulders, passing under scapulae. Increased urination, strong odor, white sediment. **Diabetes mellitus. Sugar in urine.** Urine diminished. Scanty urine.

Limbs - Stiffness. Legs swollen and as hard as a stone. Emaciation, especially of lower limbs. **Heat of lower limbs, must uncover feet.** Gouty pains, wandering. Sharp pains. **Weakness of the legs.** Tingling in limbs. **Restlessness of legs.** Cramps in the calves of the legs. **Caries on the feet.** Ulcers on legs. Edematous swelling of the legs, water oozes out from them. Sensation

as if water, oozing from legs. Swelling around the ankles. Panaritium. Felon. Nail disorders. **Edematous swelling of the right arm with stinging,** less painful when uncovering the arm, more painful in the evening and during damp weather. **Fistulous ulceration of the right forearm with tingling and stitches,** discharge of yellowish thin pus (Bute-j.).

Liver - Pain in liver and spleen. Liver is swollen, indurated. Increased secretion of bile. Hypoglycemia.

Lungs - Breathing oppressed with cold expectoration. Suffocative attacks, must be bolstered up. Can only breathe in an erect position. Respiration difficult, oppressed in the morning, relieved by expectoration. Accumulation of mucus in the lungs. Expectoration with the cough is very offensive. **Suppressed expectoration is restored.** Expectoration very fetid, offensive odor. Expectoration white, yellow. Expectoration tastes salty. Expectoration thin, watery, while walking in open air. Dry, loose cough. Cough with children. Pneumonia.

Male - Enormous swelling of scrotum, right genitals. Swelling of the penis. Increased sexual desire. Frequent involuntary emissions.

Modalities - **Better after eating,** in evening. Dyspnea better in erect position. Worse in early morning, difficulty starting the day. Worse from warm weather. Worse from anger (Staph., Coloc., Cham.). **Worse sugar, sweets, chocolate.** Bad effects from spirituous liquors.

Mouth - Dryness of mouth. **Salivation.** Inflammation of salivary glands. Inflammation of lining membrane of mouth. **White coating on tongue, so thick as to cause stiffness in it.** Cracked, fissured mouth, tongue. Ranula. **Thrush.** Aphthae of children. Scorbutic gums. Teeth feel as if on edge. Dullness of teeth with sour vomiting. Scurvy. **Sucking the fingers or thumb.** Children put fingers in the mouth. **Biting nails.**

Nose - Dryness inside nose. Coryza, dry without discharge. Sneezing.

Perspiration - **Perspiration day and night.** Profuse sweat at night, especially on head. Sweats on head, neck and shoulders. All perspiration is suppressed.

Rectum - Lump sensation. Dragging and heaviness sensation in rectum. Constipation alternating with mucus diarrhea. Constipation, stools difficult, dry. Diarrhea, stools watery and debilitating. Stools of mucus and blood, bilious. **Itching at the anus.** Congested and painful hemorrhoids. **Hemorrhoids bleed.** Painful hemorrhoidal tumors. **Worm affections of children.**

Skin - **Dryness of skin.** Chlorosis, after anger, with dropsy. Eruptions, red blotches. Pale red blotches over the **body. Anasarca after scarlet fever.** Scurvy. Panaritium. Ulcers. Excessive granulation in the ulcers.

Proud flesh in the ulcers. Gangrenous ulcers, cold dry gangrene. Old herpes.

Sleep - Sleeplessness. Starts in sleep. Dreams of dead persons, of falling. Slow to wake up and revive after rising in the morning.

Stomach - Acidity of the stomach. Disordered stomach. Slow digestion. **Indigestion, weak with acidity.** Burning at pit of stomach. Stomach bloated, overloaded with sour mucus. **Empty, weak, hungry feeling in stomach.** Painful constriction of stomach. Painful sensitiveness of the pit of the stomach. Coldness or heat in the stomach. **Gurgling and rumbling noises in stomach.** Pressure in the stomach in the morning when fasting. Stomach pain with hypochondriacal persons. Nausea early in morning. **Violent retching and gagging.** Vomiting of white, viscid tough mucus. Vomiting of blood. Vomiting acid, making teeth dull. Vomiting, occasional with the chill. Periodical vomiting. Vomiting of alcoholics. **Malnutrition.**

Temperature - Instability of body temperature. Extreme chilliness alternating with heat, especially at night. Chilliness from 10 a.m. until evening with melancholic mood. Chills beginning in lower back, spreading up and down. Chilliness alternates with perspiration. Chill followed by profuse sweat. Intermittent fever every one, two or three days, irregular in its type. Evening fever. Rheumatic fevers. Malignant plague fevers. Suppressed fevers from quinine sulphate. Hot feet, sticks them out of bed, often only one foot. Sticks one or two arms out of bed or sleeps with the upper half of body uncovered.

Throat - Dryness of throat. Dry, rawness in the larynx. Irritation of larynx, causing a slight hacking cough with yellow, salty sputa, which floats on water. **Ulceration of the larynx.** Ulcers in throat. Hoarse, catarrhal voice. Hoarseness from reading but a short time.

Vertigo - Fainting attacks. **Giddiness from indigestion. Harassing giddiness with gout.** Vertigo with low blood sugar, weakness. Vertigo better after eating. Vertigo while lying down. Vertigo as if sinking down through the bed.

COMMENTS - Restlessness, aggravated after eating sweets. Running, moving all the time. Restless while sitting. Difficult concentrating, particularly when eating sweets. Very uncertain. Fear of unknown situations (Lyc., Stram.). Sensitive to reprimand, or not sensitive to reprimand at all (Tub.). Impossible to correct. Alternating moods, gentleness alternating with aggression. Extremely **aggressive**, quarrelsome, violent, malicious, and defiant, especially after eating chocolate or sweets. Kicks and hits. **Fits of anger.** Insolence. Disobedience. Unapproachable.

Waking early in the morning. Aphthae.

Profuse salivation.

To these symptoms have been added others observed by Swan from a patient who accidentally discovered after twenty-five years of suffering, that the cause of his trouble was sugar. All the symptoms disappeared when he abstained from sugar in food or drink and only reappeared when he took it again by way of experiment. Then from two to four days after taking sugar, the same train of symptoms invariably occurred. Burning at pit of stomach. A white coat on tongue, so thick as to cause stiffness of it. Sharp burning pains run up from head to foot, causing a rigidity of the muscles so that it was impossible to rise from bed until he had been rubbed. Chill commencing in small of back and spreading up and down. Severe headache and occasional vomiting with the chill. Fever followed with headache, morbid hunger and a hectic flush.

Increased urine, strong odor, white sediment. Great pain in kidneys. Constipation. Sleeplessness. Edema of feet and ankles. Weakness of legs, as if paralyzed, causing staggering. Painful jactitation of feet and legs during the burning in the stomach. Oppression of chest with a cough. Profuse cream-like expectoration, that was very offensive and cold.

Sac-alb. 10,000c and 5,000c cured him of some remaining symptoms and the 41,000c enabled him to eat sugar with impunity.

Swan also reported the case of a woman who was continually eating candies of which she was very fond, until her digestive organs were affected. A few doses of Sac-alb. 30,000c changed her taste so that she ate no more and could not even bear the sight of them.

Farrington traced a great similarity between Sac-alb. and Calc. Sac-alb. is indicated, he said in children who are large-limbed, fat and bloated with a tendency to dropsy.

Sac-alb. has produced opacity of the cornea and ought to cure it. The children are dainty and capricious, care nothing for substantial food, but want little "knick-knacks," always cross and whining and, if old enough, are insolent and do not care to occupy themselves in any way. Everything is too much trouble.

H. C. Allen related a case of opacity of cornea cured with Sac-alb. and with the same remedy in 2,000c potency he cured swelling around the ankles following rheumatism.

According to Lippe, black-and-tan terrier dogs that eat sugar go blind. The cataract and amblyopia of diabetics are well known. Here, again, salt and sugar meet as Burnett has shown in his super salinity of the blood that

excess of salt in food has been an important factor in the production of cataract.

Sugar must be considered a sustainer and developer of the musculature of the heart and hence useful in failure of compensation and a variety of cardio-vascular troubles. It acts as a nutrient and tonic in wasting disorders, anemia, neurasthenia, etc. increasing weight and power.

One ounce of lump sugar morning and evening valuable adjunct in the treatment of obstinate cases of heart failure due to deficient heart muscle without valvular lesion. Epilepsy, blood with reduced sugar content irritates the nervous system with tending to convulsions.

Sugar as an oxytocic has its most suitable application toward the end of labor when there is no mechanical obstruction and delay is due to uterine inertia. 25 grams dissolved in water, several times every half hour.

RELATIONS - Compare: (1) Sac-1., (2) Sacchin - hinders both the salivary and peptic ferment actions with consequent dyspepsia. Prof. Lewin believes its action to be on the secretory cells themselves and it has caused pain, (right hypogastrium). loss of appetite, diarrhea and wasting. (3) Arg-n., Lyc., Sulph. - craving for sweets. (4) Sil. - rickets. (5) Arg-n. - diabetes, swollen ankles, (6) Santa. - Kidney ache.

REFERENCES - Boericke. Clarke. Lippe. Smits. Swan.

***SACHARUM LACTIS

(Milk Sugar)

PHARMACY - sac-1. Sacharum lactis. Milk sugar. Lactose. **Historical dose:** All potencies.

CLINICAL - Amblyopia. Angina pectoris. Body, odor. Diabetes. Dyspepsia. Earache. Gout. Headache. Hysteria. Labia, soreness. Nervousness. Neuralgia. Ovaries disorders. Over-exertion. Ptosis. Sciatica. Sighing. Styes. Umbilicus inflammation.

HOMEOPATHIC - Hahnemann chose globules of Sacharum lactis as the chief vehicle of his remedies because he considered it the most inert substance he could find. But his method of attenuating remedies had shown that no substance is inert in potencies and experience shows that no substance is absolutely inert in any form. Sac-1, in large doses develops the bacillus acidophilus to correct putrefactive intestinal conditions and also constipation. Diuresis. Amblyopia.

Sensitive in every part of body. Small shooting pains all over in morning. Throbbing in parts of body. **Cold pains**, as if produced by fine, icy cold needle with tingling, as if frost bitten. **Great physical exhaustion and weakness, caused by overwork.** Prostration from mental excitement.

MIND - Extremely nervous, jumps from her seat at least unusual noise. Sudden fear and trembling of whole body, as from fright. Sarcastic and fault-finding, could not speak a pleasant word to any one. Laziness. Longing and melancholy as if homesick, with oppressed breathing. Her heart aches as if it would burst, yet she cannot weep. Fear of death during pain in heart. Hysteria in evening, laughing and crying, jumping up and lying down.

Sensation as if she were kept together by a great effort. Loses her way in well-known streets. Imagines that there is a large hole in her back just above sacrum, that her mother wants to kill her, that some one is behind her.

Abdomen - Sore to touch, painful from the jar caused by walking. Severe pain passing through abdomen during stool. Sharp pain passing across bowels just above navel and all around body. Pain in left hypochondrium passing under left breast. Pain above left hip, which would come when leaning back, followed by severe pain in forehead.

Back - Dull ache all over back and in right arm. Backaches the whole length of spine. Pain passing up and down along right side of neck. Hot flashes all over back of neck and shoulders. Pain with soreness at upper right scapula. Pain in sacral region, worse when taking a breath. Pain passing up back from sacrum. Pain in lumbar region, worse by leaning backward.

Breasts - Sharp pain into right breast, very sore to touch. Constant pain under left breast, worse when bending forward. Severe pains under left breast at every inspiration.

Causations - Mental excitement. Overfatigue.

Chest - Feeling as if ulcerated over right short ribs, worse from touch and when stooping. Pain in axilla.

Ears - Pain in right ear and underneath it. Painfulness of right external ear with burning like an ulcer, also when touched. Pain passing from right ear to shoulder. Pain from right ear to lower part of inferior maxillary bone. Pain in left ear and sensation as if there were a gathering. Shooting pains in and behind ears and all over face. Pains in external ears and behind them. Reverberation of voice when speaking. Buzzing sound in right ear. Sensation as if she could not hear, but she could.

Eyes - Pain through right eye inwards. Sensation as if needles were sticking in eyes. Dryness of eyeball so that the lid would stick to it. Looking at bright light dazzles and makes her close eyes, no pain. Sight fails, eyes tire very easily. Styes. Swelling of right upper lid. Can only elevate upper lids half way.

Face - Sad expression of face, eyes look as from weeping, though she has not wept. Wretched appearance. Great pallor efface with dark places under eyes. Burning in cheekbones towards temples and lower jaw. Pain passing from corner of mouth of forepart of right axilla. Pain all over face, then centering in right ear. Corners of mouth, chin smart and burn.

Female - Menses commenced too early, no pain. Menses very dark. Profuse greenish- yellow leucorrhea. Bloody leucorrhea. Soreness and rawness of labia with profuse greenish-yellow leucorrhea. Itching of labia. Lobulated growths on each side of vagina, extremely sore and sensitive to touch. Pain in region of right ovary. Ovarian region very weak and painful when walking. Dragging-down sensation in pelvic region.

Food - Hungry all the time. When first getting out of bed feels faint for something to eat. Desire for dainties. Feeling of distention after eating. Great thirst, wanted large quantities of very cold water.

Head - Sharp pains behind right ear. Pain in left eyebrow. Left temple sore to touch. Burning like fire, extending from right frontal eminence to vertex. Sensation as of pressure on frontal bone at inner canthi of left eye, felt very sore. Sharp darting pain on left side of head from temple to occiput. Forehead feels very heavy with a tendency to fall forward. Sharp pain in forehead from one temple to the other. Head feels large and as though all the blood in the body had gone into the head. Head feels confused and as if it were tossing on a rough sea.

Heart - Sensation as if a fire in heart. Feeling as if heart would burst. Awoke at midnight with severe numb pains about heart, great fear of death, when the pains passed off they left great soreness around heart. Pulse intermittent.

Kidneys - Constant pain in region of left kidney. Soreness of urethra during urination. Constant, urgent desire to urinate with cutting pain up urethra. Sound of running water produced urination, no power to restrain it. Involuntary urination during night. Urinates large quantities very frequently. Urine causes intense pain when coming in contact with the labia, which are very sensitive. Urination followed by a thick yellow discharge. Urine stains a dark yellow.

Limbs - Pain from right shoulder passing down to waist. Pain from right shoulder to left breast. Pain in forepart of right upper arm. Pain in right wrist. Pain, itching in palm of right hand. Grasping anything with right hand causes pains to pass from all the fingers into palm. Sharp pain in all right fingers except little finger. Skin under nails looks dirty. Awful pain extending down the right sciatic nerve. Pains in thighs and hips. Hot flashes in lower limbs. Pain in right instep when bending foot. Pain like gout in right toe. Balls of feet covered with little corns, which are very painful when walking.

Modalities - Worse by a coming storm, the approach of which was felt some twelve hours previously. Pains, worse in damp room or basement, but better if there was a fire. All symptoms better after 4 p.m. Worse by blue and yellow colors, better by red.

Mouth - Burning in whole mouth. Sensation of coolness as of ice in mouth and throat. Roof of mouth sore. Soreness like blisters in mouth and on tongue. Sore on left side of tongue. Tongue, coated white, yellow. Taste, putrid in mouth after eating or fine spicy taste like fresh nuts. Thick bitter mucus in mouth during morning. Lips feel very sore, raw and dry with great thirst.

Nose - Pain in sides, end of nose. Ridge of nose extremely sore, it feels sore to touch or from the least movement of facial muscles, the left side is the worst and somewhat swollen.

Rectum - Stool preceded by shooting pains across abdomen, which are better by stool. Before stool, pains in breasts and upper abdomen. Urgent inclination to stool, felt as though there were a great ball in rectum, much straining and some flatulence, but no stool and not better from the flatulence. Stools smell like rotten eggs. Soreness around anus, extending up rectum. Creeping, itching and crawling around anus, extending inside rectum. Shooting pains in rectum.

Skin - Very restless at night from itching all over body as soon as she is covered in bed. Itching of both shoulders.

Sleep - Yawning all day. Sleeplessness after midnight. Cannot sleep on right side. Cannot go to sleep without putting arms over head. Impossible to lie straight in bed, finds herself continually lying diagonally across bed. Has to lie on left side. Fatiguing dreams all night. Awoke with the impression that she had dreamed of dreadful pains in chest, does not know whether it was a dream or a reality.

Stomach - Pressure in stomach as if she had eaten something indigestible. Dyspepsia after eating hot pie-crust. Heartburn with sweet taste coming from stomach without water brash. Violent sickness, going on all day. Nausea does not affect appetite. Nausea like seasickness.

Temperature - Great coldness as if a chill were coming on. Fingers, feet toes, icy cold, could not keep warm in bed covered with clothes. Hot flashes inside body pressing from below upward. Feeling of heat all over, the body is covered with a light sweat, enough to feel uncomfortable. Strange restlessness at night.

Throat - Spasmodic stricture in esophagus. Globus hystericus after lunch at noon with dull, sick headache. Throat very sensitive to external pressure, the least pressure causes a feeling as if she were choking.

Sensation when swallowing as of a fishbone in throat.

COMMENTS - Swan is the authority for Sac- 1. as a homeopathic remedy. He published a full pathogenesis of Sac-1., proved in the potencies from 30c upward, together with confirmed and cured symptoms.

One of Swan's pro vers had the symptom "Sight fails, eyes tire very easily." Another patient, when taking pilules of Sac-1, three times a day complained that they made his "eyes ache and feel weak."

Sensations of both coldness and heat. One of the cold sensations is "Sensation of extreme cold passing in a fine line from center of pubes to a point two or three inches above."

Swan regarded cold pains as a keynote and recorded the case of Mr. S., who had an excessively cold neuralgic pain in the cartilage of both ears, the right being the worst with tingling as if frost-bitten, rubbing with difficulty restored the warmth.

Lancinating, neuralgic pains in forehead in occiput, extending from region above ears down through ears into muscles of neck in both eyes, worse by least breath of air, skin sensitive to touch as in inflammatory rheumatism.

These pains were icy cold, as if produced by an extremely fine ice-cold needle. As Sac-

1. has "fine cold pains" and pains passing in all directions, Sac-1. 1.000c was given and relieved all the pains within an hour.

H. A. Hare said of Sac-1.. "Scientific and clinical studies have shown it to be possessed of very great diuretic powers when given in full doses."

He said further, that its direct action on the kidneys and its slight action elsewhere indicate it in kidney dropsy and kidney inactivity, that it acts best in cases where albuminuria is absent and that it causes profuse diuresis in infants fed on it.

RELATIONS - Camph. aggravates the effects of Sac-1. **Compare:** (1) Sac-alb. in rickets, acidity, fat children. Calc., the Lacs. (2) Right cheekbone, Mag-c. (3) Roof of mouth, Mang. (4) Ball sensation in rectum pains, Kali-bi. (5) Kidney ache, Santa, Sacchin. (6) Fatigue, Pic- ac., Mag-c. (7) Heat in heart, Lachn. (8) better lying on left side, Lil-t. (9) worse from damp, Dulc. (10) Sensitiveness, Kali-i. Mag-c.

***SALICYLICUM ACIDUM

(Salicylic Acid)

PHARMACY - sal-ac. Salicylicum acidum. Salicylic acid. Acetylsalicylicum acidum. Found in spiraea blossoms. Gaultheria. Prepared from Phenol. Trituration. **Historical dose:** Trituration and all potencies.

CLINICAL-Arthritis.Belching. Bone, decay. **Canker sores.** Colds. Colitis. Coryza. Deafness. Diarrhea. Diphtheria. Dyspepsia. **Flatulence.** Foot-sweat, suppression. Gastritis. Hematuria. Hot flashes. Influenza. Intestine ulceration. Iritis. Melancholy. **Meniere's disease.** Menopausal. Necrosis. Pharyngitis, herpetic. Puerperal fever. Purpura. **Rheumatism. Rheumatoid arthritis.** Scarlatina. Sciatica. Septicemia. Stomatitis. Tapeworm. Throat, sore. **Tinnitus.** Ulcers. Urticaria. Vertigo.

HOMEOPATHIC - Salicylic acid is found in nature in the leaves and barks of willows and in wintergreen oil (Gaultheria), which is one of the chief sources of its supply, and is obtained synthetically from carbolic acid. Like Carb-ac. it has been largely used as a disinfectant, and, as it is supposed to be non-poisonous, it is used for mixing with and so preserving foods.

MacLagan of London and Senator of Berlin, introduced it into medicine as a remedy for rheumatism. It has a specific relation to rheumatism, but the massive doses given in allopathic practice have been attended with so many unpleasant symptoms of vital depression, fainting, flatulent dyspepsia and delirium.

Overdoses led to the discovery of its power to set up Meniere's disease, auditory nerve vertigo, gastric disturbances and delirium. Roaring and ringing in the ears. Deafness with vertigo. Prostration after influenza, also tinnitus aurium and deafness. Hematuria. Effects of suppressed foot sweats.

MIND - Melancholy, wants to be quiet, feels faint. Anxiety, worrying, restless. Excited mood. Maniacal exaltation. Talked incessantly and disconnected. Mistakes in speaking and writing. Awkwardness, drops things, bumps into things. Delirium, stupid, can hardly collect his ideas, then laughed without cause.

Abdomen - Abdominal distention. Violent, constant pressure in abdomen with feeling of incarcerated flatus. Ulceration of bowels.

Chest - Spasmodic, flatulent asthma, fetid bronchitis, gangrene of lungs. Firmly seated pressure at side of sternum as large as the hand, with feeling as if the bone was sore.

Causations - Suppression of foot-sweat. Aspirin overdose.

Ears - Meniere's disease. **Tinnitus**, dependent on hyperemia. **Roaring and ringing in ears**, hears music, swarm of bees or buzzing of flies. Auditory nerve vertigo with a troublesome nausea accompanying the head

symptoms. Hearing diminished. Nervous deafness. Deafness with noises in ears, with vertigo.

Eyes - Retinal hemorrhage. Retinitis after influenza, also albuminuric. Plastic iritis following acute rheumatism. Diminished acuteness of vision.

Face - Dull, heavy aspect, face flushes quickly on slight excitement.

Female - Leuco-phlegmatic woman, frequent hot flashes with irritability, forgetfulness, dull, heavy pain in cerebellum. Septic puerperal fever.

Head - Piercing pain in temples. Headache commencing on top or back of head, running down neck, which is tender to touch. Headache, confusion in head on rising suddenly. Dullness of head, stupefaction.

Rush of blood to head. Buzzing sensation in the brain as if blood were forced violently through a contracted vessel.

Kidneys - Diabetes mellitus. Albuminuria, rheumatic diathesis. Urine scanty, clear, brown.

Limbs - **Arthritis and rheumatism.** Acute joint rheumatism, worse touch and motion, profuse sweat. Pain shifts. Sciatica, burning pain, worse at night. Knees are swollen and painful. Copious foot-sweat and ill effects if sweat is suppressed.

Lungs - Respiration hurried. Spasmodic, flatulent asthma, fetid bronchitis, gangrene of lungs. Dry cough of a hard, racking, spasmodic character, worse at night, in old people.

Modalities - Better by hot applications, especially by dry heat. Worse by motion. Worse at night, cold air, touch of anything cold.

Mouth - Taste extremely disgusting, as of something burnt, bitter. Burning, scalded feeling. Burning and scraping in mouth and throat. Redness of mouth and fauces. Mouth dotted with white patches. **Canker sores** with burning soreness and fetid breath. Tongue purplish, leaden-colored, foul breath. Ulcers on tip of tongue. Stomatitis, mouth hot and dry, tongue covered with burning vesicles.

Nose - Sneezing. Coryza. Incipient catarrh, patients, especially children, sneeze all day.

Rectum - Putrid diarrhea, gastro-intestinal derangements, especially in children, stools like green frog's spawn (Mag-c.). Stools green, flushes easily as in hectic, acid, sour, or putrid smelling. Cholera infantum with peculiarly putrid belchings. Worms. Pruritus ani.

Skin - Hot and burning skin. Itching vesicles and pustules, better by scratching. Skin red and sensitive, points like flea-bites. Urticaria. Herpes zoster. Purpura. Necrosis and softening of bones.

Sleep - Yawning. Dreams of being pregnant. Frequently awakens from sleep thinking he heard music.

Stomach - Weak, nervous sensation in stomach. Burning in epigastric region. Erosions and ulcers in stomach and bowels. **Putrid fermentation and dyspepsia.** Water brash. **Flatulence, hot, sour belching.** Gaggling, frequent vomiting.

Temperature - Slight chill, crawling in spine, yawning, chill in fingertips. Fever continuous, burning, then sweat with relief, fever again till exacerbation of symptoms. Weak, faint after fever and sweat. Flushes easily as in hectic. Profuse sweat, as sweat increased strength declined.

Throat - Burning in throat. Sore, red and swollen. Tonsils red, swollen, studded white. Scraping in throat causing cough. Hemorrhagic pharyngitis with difficulty of swallowing.

Vertigo - Vertigo, tendency to fall to left side. Deafness with vertigo. Meniere's disease.

COMMENTS - Sal-ac. has been notably used for corns and warts, as well as to hasten the peeling of palms and soles after scarlet fever.

Brunton noted that "A mixture of 2 parts with 100 of tallow, applied directly to the feet, not to the stockings, has been found most useful in preventing sweating and soreness of the feet in soldiers after a long march."

Sal-ac. has had an accidental proving which has led to some homeopathic uses, including blood-poisoning conditions, such as puerperal fever and septicemia. Like carbolic acid and other disinfectants, Sal-ac. produces fermentative dyspepsia and diarrhea with putrid-smelling stools. Disorders following suppressions of foot sweat.

RELATIONS - Compare: (1) Nat-sal., Salol. (2) in rheumatism and subsequent weakness, Colch. (3) Piercing in temples, throat, diarrhea, ulcers, anti-septic properties, Kreos. (4) In anti-septic properties, dyspepsia, fever, urine, Carb-ac. (5) Tinnitus, Nat-sal., Chin., Chin-s., Carb-s. (6) Bones, Phos. (and throat), Lac-ac. (7) As if blood forced through contracted vessel, Coc-c. (8) Foot-sweat and suppressed foot-sweat, Sulph. Sil. (9) Loquacity, Lach.

***SALIX MOLLISSIMA

PHARMACY - salx-m. Salix mollissima. N. O. Salicaceae. Tincture of fresh leaves and young shoots.

Historical dose: Tincture and all potencies.

CLINICAL - Neuritis. Rheumatism. Sciatica.

HOMEOPATHIC - Cooper used Salx-m. with success in rheumatic affections, especially in sciatic neuritis in nervous subjects in whom the capillary cutaneous circulation showed up visibly and there was some tenderness and swelling of the limb.

REFERENCES-Clarke.

*****SALIX NIGRA**

(Black Willow Bark)

PHARMACY - salx-n. Salix nigra. Black willow bark. Pussy willow. N. O. Salicaceae. Tincture of fresh tree bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Diarrhea. Emissions. Fevers. Gonorrhea. Impotence. Masturbation. Nightsweats. **Nymphomania.** Prostatitis. Satyriasis. Sexual mania. Spermatorrhea.

HERBAL - The black willow of North America has a reputation as a purgative and febrifuge. Salx-n. has been largely used by herbalists in a great variety of disorders of the genito-urinary system.

HOMEOPATHIC - A proving by E. D. Wright, who took half an ounce of the tincture in a day, is given in Allen's Appendix. He developed soreness of muscles, a tired, sleepy state, loose bowels, sore gums and fever.

Salx-n. has a positive action on the generative organs of both sexes. It reduces the irritability of sexual organs, moderates sexual passion, and controls genital irritability. It has been used after a history of masturbation or spermatorrhea.

Acute gonorrhea with much erotic trouble, chordee. Satyriasis and sexual mania. Libidinous thoughts and lascivious dreams. Seminal emissions in presence of woman or when talking with her. Hysteria and nervousness.

Back - Pain across sacral and lumbar region. Unable to step out quickly.

Face - Red, swollen, especially the end of nose. Nosebleed. Eyes blood-shot, sore to touch and on motion. Roots of hair hurt.

Female - Before and during menses much nervous disturbance, pain in ovaries, difficult menstruation. Menorrhagia. Bleeding with uterine fibroid. Ovarian congestion and neuralgia. Nymphomania.

Head - Skin on temples sore to touch. **Male** - Painful movement of the testicles. **Mouth** - Gums sore.

Rectum - Looseness of bowels.

Sleep - Disposition to lie down and sleep. **COMMENTS** - Dr. John Feams wrote of the tonic and anti-septic properties of this species of Salix, but also of its usefulness as a sedative to the generative system. As a sedative on these lines he had very good results from its use.

Fearn gave Salx-n. in doses of thirty to sixty drops on retiring and repeated at midnight or towards morning, if needed. He found it particularly useful in cases of acute gonorrhea with much erotic trouble, chordee with great irritation, and excessive sexual desire, amounting to satyriasis.

Salx-n. seems to control the venereal appetite in a very satisfactory manner. It can be given in cases where the bromides have always been considered appropriate and it can be given where the bromides would be very inappropriate and there is no reflex effect on the brain or nervous system.

W. B. McCoy related a number of cases illustrating this action. The first concerned a man, 35, who lost control of his sexual appetite. The more he indulged the worse the craving became, and indulgence made him a physical wreck. Salx-n. tincture in teaspoonful doses thrice daily, cured in five weeks.

The second case concerned a youth, 23, who had masturbated since he was a boy. Salx-n. tincture, 20 drops, four times a day, was given for a fortnight, the quantity being gradually diminished, until in a few weeks the young man was quite cured.

A teacher, 21, five years before had a spell of fever which left him with a tendency to seminal emissions which had become very

frequent and had reduced him to a very low condition. Extremely thin, sallow, nervous. Cold hands and feet even in heat of summer. Extremely cross and irritable.

Salx-n. tincture, 1c one drop four times a day, was given with speedy improvement. Later on the dose was reduced to thirty drops. The losses ceased and in three months the patient had gained 41 pounds in weight.

A man, 53, had sexual desire but without ability, yet during the night he would have emissions without erections. Salx-n. tincture, 15 drops, four times a day, cured in three weeks.

McCoy also used Salx-n. successfully in gonorrhea, but other remedies were given as well.

RELATIONS - Compare: (1) Dam., Yohim., Canth., Con., Agn., Pic-ac. (2) In gonorrhea, Salol, Petros. (3) Aven., Sabal.

REFERENCES - Anshutz. Boericke. Clarke. Phatak.

*****SALIX PURPUREA**

(Purple Willow)

PHARMACY - salx-p. *Salix purpurea*. Purple willow. Red willow. N. O. Salicaceae. Tincture or infusion of fresh bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Diarrhea. Fever. Parotiditis. Vertigo.

HOMEOPATHIC -T. C. Duncan and his wife proved Salx-p., taking drachm doses of the infusion of the bark. The chief symptoms were giddiness, loose stools, swelling of the right parotid gland. Fever, marked by heat preceding chill and perspiration.

Duncan chewed the bark on one occasion and this caused the astringent effect on the mucus membrane of the mouth. The only rheumatic symptom was aching in right acetabulum.

MIND - Very nervous, irritable and despondent all day. Dullness of intellect.

Abdomen - Pain in abdomen. Flatulence. **Face** - Swelling of right parotid gland. **Head** - In a few minutes dizzy feeling commencing just in front of ears and passing up to vertex like a wave, compelled to sit down.

Heart - Pulse feeble, circulation torpid.

Kidneys - Urine slightly acid, excess of phosphates and epithelium, less uric acid crystals.

Limbs - Aching in right acetabulum.

Mouth - Peculiar astringent taste, puckering mucus membrane and closing Sténo's duct. Taste of undigested food.

Rectum - Bowels loose, two stools in one day with griping.

Sleep - Rested poorly, woke often, first too hot, then too chilly.

Temperature - First too hot, then chilly and at last towards morning in a profuse perspiration.

REFERENCES - Clarke.

***SALMONELLA TYPHI

(Salmonella Nosode)

PHARMACY - salm-t. *Salmonella typhi*. *Salmonella nosode*. Bacteria. **Historical dose:** All potencies.

CLINICAL - Cholecystitis. Dehydration. Diarrhea. Enteritis. Fever. **Food poisoning. Gastroenteritis.** Heartburn. Nausea. Pancreatitis. Salmonellosis. Typhoid fever. Ulcers. Vomiting.

HOMEOPATHIC - The attenuations of this bacteria nosode are prepared from washings of a culture of *Salmonella typhi*. Disease-causing salmonellae have recently been re-classified into a single species, *Salmonella entérica*, which has numerous strains. *Salmonella typhi* is a well-known strain that causes typhoid fever.

Other salmonellae are frequent causes of food-borne illness, especially in poultry and raw eggs, and more generally from food that has been cooked or frozen, and not eaten straight away.

The acute symptoms of salmonella gastroenteritis include the sudden onset of nausea, abdominal cramping, and bloody diarrhea with mucus. The onset of symptoms usually occurs within 6 to 72 hours after the ingestion of the bacteria.

Salmonella infections usually resolve in five to seven days, and often require no treatment, unless the patient becomes severely

dehydrated or the infection spreads from the intestines. Persons with severe diarrhea may require rehydration, often with intravenous fluids.

Some salmonella bacteria have become resistant to antibiotics, however, and this has occurred possibly as a result of the use of antibiotics to promote the growth of feed animals.

Confusion and mental vagueness, e.g. in cerebral degeneration. Highly febrile illnesses. Enteritis. History of intestinal infections or acute inflammatory fever. Chronic cholangitis and cholecystitis. Cholelithiasis. Duodenal and gastric ulcer. Chronic pancreatitis.

RELATIONS - Compare: Ars., Echi., Pyrog.

REFERENCES - Murphy. Reckeweg.

***SALOL

(Phenol Salicylate)

PHARMACY - salol. Salol. Phenol salicylate. Salolum. Trituration. **Historical dose:** All potencies.

CLINICAL - Arthritis. Diarrhea. Dysentery. Fever. Gonorrhea. Headaches. Influenza. Neuralgia. Rheumatism. Smallpox.

HOMEOPATHIC - Salol, was primarily used as an anti-rheumatic, especially in the treatment of acute cases. It was given as an antipyretic in 30 to 45 grain doses in powders or tablets. It is soluble in ether and petroleum spirit, very sparingly, if at all in water.

It does not disturb digestion because it passes through the stomach unaltered, being decomposed in the duodenum, by the ferments of the pancreas into salicylic acid and phenol (it contains 38 percent phenol). These are excreted by the kidneys and the condition of intestinal digestion has been estimated by the length of time required after the ingestion of Salol., for them to appear in the urine.

Helbing reported that it has been used in acute diarrhea, dysentery, cholera and other diseases where intestinal asepsis is indicated and also in disorders of the bladder and urethra as a substitute for ordinary mechanical irrigations and injections.

Its internal use in gonorrhea (in 5-grain doses three times a day) has met with much success.

Dull aching in head and all over body. Can hardly go up stairs, and it is dreadfully painful to sit on a hard stool. The hands shrink when cold, cannot straighten the little fingers without much pain.

Head - Dreadful headache, especially over eyes. Dull aching in head and all over body.

Kidneys - Urine smelled strongly of violets.

Limbs - Rheumatic pains. Feeling of stiffness in joints. Limbs sensitive to touch. Pain in shoulder. Pain in right arm in evening. Pain in wrists. Cramp in hand on writing. Hurts even to carry a book in hand. Buttocks sore. Pain in left buttock, especially on walking.

Modalities - Worse walking, raising eyes, ascending stairs. Pain in buttocks worse sitting on hard stool. Worse by touch, in evening.

Skin - Burning and itching eruption. Smallpox.

COMMENTS - The only proving of Salol, was made incidentally on a chemist from making up powders of the remedy. He experienced very severe symptoms from inhaling the odor, and possibly also some of the powder. Rheumatic pains in joints with soreness and stiffness were marked, especially pain and soreness in the buttocks, knees, and wrists.

The prover was subject to headaches, but he never had so violent a headache as that produced by Salol, and conversely after the proving, Salol. 12c immediately relieved him when threatened with one of his usual headaches.

The first symptom he noted was that his urine smelled of violets and it was only when this passed off that the other symptoms came on. The joints felt stiff, "as if they wanted oiling."

C. Beg referred to the use of Salol, in smallpox and other skin disorders attended with burning and itching. The relief of itching in smallpox was a constant and most satisfactory result. When administered early it prevented maturation of pustules.

RELATIONS - Antidoted by: Bry. **Compare:** (1) Sal-ac., Salin., Nat-sal., Carb-ac. (2) Wrist rheumatism, Act-sp., Led., Viol-o. (3) Urine smells of violets. Terebe. (4) Gonorrhea, Napht., Petros. (5) Smallpox, Carb-ac., Sarr., Vario.

REFERENCES - Clarke.

***SALVIA DIVINORUM

(Shepherdess's Herb)

PHARMACY - salv-d. Salviadivinum. Shepherdess's herb. Ska pastora. Shka pastora. Maria pastora. Mexican mint. Yerba de Maria. N. O. Lamiaceae. Tincture of fresh leaves and blossom-tips. **Historical dose:** Tincture and all potencies.

CLINICAL - Amnesia. Ascites. Debility. **Delusions.** Depression. Diarrhea. Drug, addictions. Edema. Headache. Intoxication. **Memory, loss.** Nightmares. Panic attacks. Personality, disorders. Rheumatism. Visions.

HERBAL - The Latin name Salvia di vinorum literally translates to "sage of the seers." The genus name Salvia is derived from the Latin salvare, meaning "to heal" or "to save." The words salvation and savior also come from this root.

Salvia di vinorum is a sprawling perennial herb which grows wild only in the Sierra Mazatec region of Mexico. Its leaves contain the extremely potent salvinin-A. It has a history of use as a divinatory psychedelic for oral use and has been widely available since the 1990's primarily as a smoked herb.

Salvia divinorum is traditionally used by chewing pairs of leaves. Modern use includes both smoking and chewing the leaves. When the leaves are chewed, the quid and bitter juice are held in the mouth to increase absorption.

Strong effects can be difficult to attain from smoking dried leaf, but extracts and potency-bred leaves can cause dramatic, sometimes frightening deep mind-states. Many people who try S. divinorum do not find the effects at all pleasant and choose not to repeat the experience.

Historical uses include headache, diarrhea, rheumatism, debilitation and ascites. Intense shaking of body. Inability to control muscles and maintain balance. Tendency to stagger, fall. Depression. May prove to be

useful for those troubled with addictions.

MIND - Altered perceptions. Clarity of thought. Introspection. Insights into life and existence. Trances and visionary states of intoxication. Dreamlike experiences. Powerful visions with open or closed eyes. Visions of past lives and times. Feels the presence of entities. **Delusions and visions.**

States of tranquility and ecstasy. Great relaxation and bliss. Uncontrollable hysterical laughter. **Restlessness.** Panic attacks. **tense experiences of fear, terror and panic.** Speechless. Complete loss of memory.

Overlapping realities. The perception that one is in several locations at once. Feel detached from reality with a heightened senses of space, sight smell and sound. **Loss of the body and personal identity.**

Sensation of dying. Near death experiences. **Out of body experiences.** Sensation of entering or perceiving other dimensions, alternate realities. Revisiting places from the past, especially childhood.

Back - Prickling and tingling up and down the spine.

Perspiration - Increased perspiration.

Sensations - Sensation of pins and needles all over my body. Prickling and tingling. **Sensation that the body becomes suddenly very heavy.** Sensations of physical push, pressure, or wind. Various sensations of motion, or being pulled or twisted by forces of some kind.

Temperature - Change in body temperature, flushing.

COMMENTS - One person wrote, "For the next two hours I felt light headed and restless. I couldn't sit still. Whenever I sat down I felt compelled to get up. I tried to eat something and drink a little wine in order to get grounded and relaxed, but I couldn't seem to swallow anything. I had been shaken to the soul."

RELATIONS - Compare: (1) Anh., Bani-c., Cann-i., Op.

REFERENCES - Murphy.

***SALVIA OFFICINALIS

(Common Sage)

PHARMACY - salv. Salvia officinalis. Common Sage. N. O. Lamiaceae. Tincture of fresh leaves and **blossom-tips.** **Historical dose:** Tincture and all potencies.

CLINICAL - Cough, tickling. Fever. Gums, bleeds. Mouth, sores. **Night-sweats. Perspiration, excessive.** Tuberculosis.

HERBAL - Gerard wrote, "Sage is singularly good for the head and brain, it quickened the senses and memory. Sage strengthen the sinews, restore health to those that have palsy and take away shaky trembling of the members."

French doctors called attention to sage for gargling in cases of inflammation of the throat and for washing the mouth in disorders of the gums.

HOMEOPATHIC - Salv. exerts a tonic influence on the skin. Controls excessive sweating when circulation is enfeebled. **Night-sweats** in persons suffering from disorders of the respiratory organs, especially tuberculosis. **Colliquative perspiration.** Soft skin, relaxed with enfeebled circulation and cold limbs. Suffocating, tickling cough. Galactorrhea.

COMMENTS - Salv. should be given in doses of 20, 30 or 40 drops in a tablespoonful of water. The effects manifest themselves very quickly, two hours after taking a dose, and these effects persist for two to six days. The tickling cough of tuberculosis and the night sweats are entirely relieved by doses of 20 to 40 drops in a tablespoonful of water.

In the numerous experiments made with it, there were never any disagreeable concomitant effects. Salv. acts even more favorably on the tickling coughs in tuberculosis patients than Bell., Rumx., so that preparations of morphine and codeine could be dispensed with.

In one case. Ms. Smith had for three weeks an irritating cough following an attack of pneumonia. The irritation being particularly great, she was given, fresh from the garden, some sage to chew, and the irritation was instantly relieved.

RELATIONS - Compare: (1) Phel., Merc., Tub. (2) Chrysan. (3) Salv-sc - tonic influence on nervous system, dose, teaspoonful to one pint hot water, as inhalant for sponging. (4) Rub-t.

REFERENCES - Boericke. Clarke.

***SAMBUCUS CANADENSIS

(Elder-bush)

PHARMACY - samb-c. Sambucus canadensis. Elder-bush. Marsh elder-bush. Sambucus humilis. Sambucus glauca. N. O. Caprifolia-ceae. Tincture of buds, flowers, tender shoots and leaves. **Historical dose:** Tincture and all potencies.

CLINICAL - Albuminuria. Angina pectoris. Asthma. Blotches. Cuts. Larynx, dry. Lumbago. Wounds.

HERBAL - The indigenous North American elder grows in rich alluvial soils, flowers in July and fruits in September.

The species, said Millsaugh is not sufficiently distinct from the European elder (*Samb. nigra*), differing only in being less woody and having more loose cymes, larger flowers and more compound leaves.

Millsaugh said of *Samb.-c.* that a decoction or ointment of the flowers and leaves was used as an application to large wounds.

HOMEOPATHIC - The severe chest symptoms and blotched face recall symptoms of *Samb.* with which it is probably identical in action. Uneasiness, and unrest. Exhaustion. Recurrence of symptoms.

MIND - Depression and dread of undefined danger.

Back - Back felt sprained. Pressing pain in lumbar region.

Chest - Palpitations. Heaviness and constriction in chest, as from a heavy load. Aroused from sleep by a terrible constriction of chest and heart, cannot lie down for fear of choking.

Face - Face flushed and broken out in blotches, looks ill.

Head - Severe drawing in head with fullness, motion causes sensation as if water were undulating in it. Head heavy, confused with drawing and darting pains.

Heart - Constriction of chest and heart, lying down causes choking. Sharp pain in heart (region of valves), with palpitations, at times visible through the clothes. Heart labors heavily. Pulse rose to 100, but became normal at end of perspiration.

Kidneys - Pressure in kidney region, followed by profuse flow of clear urine. Frequent urination. Urine albuminous.

Limbs - Sharp, darting rheumatic pains hands and feet.

Lungs - Breathing labored, asthmatic, wheezing. Has to sit up in bed to get breath.

Modalities - Better by sweat, getting out of bed. Worse from lying down.

Mouth - Mouth parched, dry, desire for drink.

Temperature - Sweat, soon becoming profuse, which gradually ameliorates all other symptoms (except exhaustion). Head perspired less than rest of body.

Throat - Pharynx and larynx felt dry and swollen, impeding free respiration.

REFERENCES-Clarke.

*****SAMBUCUS NIGRA**

(Elder)

PHARMACY - *samb.* *Sambucus nigra*. Elder. N. O. Caprifoliaceae. Tincture of fresh leaves and flowers.

Historical dose: Tincture and all potencies.

CLINICAL - Angina pectoris. Asthma. Chest, oppression. Choking. Colic. Contusions. Coryza, dry. **Coughs.**

Croup. Cyanosis. Edema. Emaciation. Headaches, catarrhal. Hoarseness. Hydrocele. Ileus. Laryngismus.

Spasms. Snuffles. Suffocation. Tuberculosis. Whooping cough.

HOMEOPATHIC - *Samb.* was proved by Hahnemann and appears in his *Materia Medica Pura*. It acts especially on the respiratory organs, kidneys and the skin.

Spasm, mainly affecting the respiratory system, larynx, chest and nasal passages. **Shortness of breath.**

Snuffles in infants preventing breathing and nursing. Dry coryza. When it occurs lower down in the tract, it causes dyspnea. The child awakens suddenly nearly suffocated, face livid, blue. Sits up in bed, turns blue, gasps for breath, which it finally gets. The attack passes off but is again repeated. Child inspires but cannot expire. Sleeps into the attack. The breathing is rattling. Croup, whooping cough, asthma.

Profuse sweat during waking hours, dry heat when asleep, particularly in tubercular or febrile conditions. A deep, dry cough precedes the fever paroxysm. Fever without thirst. Dreads uncovering.

Edema, dropsical swellings in various parts of the body, especially legs, instep and feet. When edema affects the nose it may give rise to obstruction. Contusions cause dark red swelling.

MIND - General trembling with anxiety. **Constant state of fretfulness.** Very easily frightened. Fright followed by suffocative attacks. Worse from fright or strong emotions. Sees images when shutting eyes. **Abdomen** - Pressive pain in abdomen with nausea. Spasmodic tearings, shootings and pinchings in abdominal muscles, with expulsion of flatus. Colic with nausea and flatulence. Frequent, watery, slimy stools.

Back - Aching in middle of spine during repose and movement. Lancinations in scapulae.

Causations - Ill effects of fright, grief, anxiety, excessive sexual indulgence. Fright causes suffocative attack.

Chest - Oppression of chest with pressure in stomach, nausea and weakness. Pressure on sternum. Sudden sensation of contraction in sides of chest.

Constitutions - Suited to diseases of scrofulous children that affect the air passages especially. Suited to persons previously robust and fleshy who suddenly become emaciated.

Ears - Sharp stitches in right inner ear, with cramp pain in it. Itching, creeping in ears and in throat.

Eyes - Pupils at first contracted, then greatly dilated. Photophobia. Half open in sleep.

Face - Pale, bluish, puffy. Turns blue with cough. Blotches on face. Red, burning spots on cheeks. Heat and perspiration of face. Hot face with icy cold feet.

Female - Menses too profuse, like metrorrhagia. Debilitating sweats after childbirth.

Food - Thirst without relishing the drinks. **Head** - Headache as from intoxication. Motion of head causes tension and dizziness. Pressure and expansion in head. Sudden shocks in the brain. Digging pain in vertex. Scurf on head with intolerable itching.

Heart - Orgasm in whole body. Occasional omission of heartbeat. Pulse generally very frequent and small, sometimes slow, full. Intermitting. Angina pectoris where pressure proceeds from spine.

Kidneys - Dropsical symptoms with vomiting of bile and distress in stomach after eating. Acute nephritis. Profuse urination with a sensation of heat in the body, dry heat of skin. Urine frequent and scanty.

Limbs - Tension in hamstrings as if they were too short. Tearing in legs and ankles. Edematous swelling in legs, insteps and feet. Icy-cold feet with a warm body. Hands and feet bloated and blue. Drawing in forearms and bones of hands. Paralytic heaviness in elbow joint. Lancinations in wrists. Trembling of hands (when writing).

Lungs - Spasmodic croup. Asthma. Cyanosis. **Sudden suffocation** or strangling on falling to sleep, or waking him at midnight with violent sweat. **Child awakes suddenly, nearly suffocating, sits up. turns blue.** Paroxysmal, **suffocative cough, coming on about midnight** with crying and dyspnea. Loose choking cough. Spells of coughing, before fever. Dry coryza. **Sniffles of infants**, nose dry and obstructed. **Cannot expire** (Meph.). When nursing child must let go of nipple, nose blocked up, cannot breathe. Whistling breathing.

Male - Hydrocele from injury. Swelling of scrotum.

Modalities - Better sitting up in bed, motion, from pressure over a sharp edge, and wrapping up. Worse from dry, cold air, uncovering. Worse cold drink while over heated, eating fruits. Worse motion. Worse sleep, rest, lying down in bed, on left side. Worse about midnight, after midnight, 2 to 3 a.m., wakes with sense of stoppage of air tubes. Head low aggravates, must sit up to regain breath.

Mouth - Dryness of the mouth and throat without thirst. Half open in sleep. Toothache with tearing and lancinations in all the teeth and with a sensation as if cheeks were swollen.

Neck - Pressive heaviness in nape. Deep incisive lancinations in muscles of neck. Sweat on throat and neck with children.

Nose - Dry coryza with snuffles in infants. Sensation of numbness in nose with itching on bridge. Obstruction of nose with accumulation of thick and viscid mucus in nostrils. Dry coryza of children.

Pelvis - Pains in loins with drawing pressure. Incisive blows in loins.

Perspiration - Very debilitating sweats. **Profuse sweat over entire body during waking hours.** Continued perspiration while awake, changing into dry heat as soon as one goes to sleep. Night sweats, except on head, worse towards morning.

Rectum - Irritable anus with hemorrhoids. Frequent, watery, slimy stools.

Sensations - As if head were filled with water. Skull as if stretched. As if suffocating.

Skin - Dry heat during sleep. Tingling, itching of skin. Sudden painful drawing in all points over surface while sitting. Edema, anasarca. Bloated and swollen, general dropsy, **profuse sweat on waking.**

Sleep - Frequent waking with a start, with obstructed respiration. Child starts up suddenly as if suffocating. Incomplete sleep with mouth and eyes half open. Sleeps with arms above head. Dry heat during sleep, profuse perspiration after waking. Lascivious dreams.

Stomach - Pressure in stomach. Acute lancinations under the stomach, worse by pressing upon it. Vomiting in morning, first of mucus and milk (or food) that had been taken, followed by bile.

Temperature - Shuddering with shivering. Icy coldness of hands and feet. Pricking, tingling in skin. Intermittent fever.

Dry, burning fever while asleep, copious sweating on waking. Fever with excessive perspiration, especially at night. Debilitating night sweats (Salv., **Acet-ac.**) **Dreads uncovering.** Dry, deep cough precedes the fever paroxysm. Sweats with cough.

Throat - Hoarseness with tenacious mucus in larynx. Screeching voice. Spasms of glottis. Itching, tingling in throat.

Vertigo - Dizziness and confusion in the head, during movement, on rising.

COMMENTS - The leaves of *Sambucus nigra* have an unpleasant odor when bruised, which is supposed to be offensive to most insects. A decoction of the leaves is sometimes used by gardeners to keep caterpillars off delicate plants.

Green noted that sheep that have the rot can be cured by letting them eat the bark and young leaves of *Samb.*

Herbalists use the inner bark, as well as the leaves, to make an ointment. The flowers serve for fomentations or are made into a medicinal tea. According to the Treasury of Botany, the berries are the principal ingredient in elderberry wine.

Millsaugh said that the bark contains viburnic acid, which is identical with valerianic acid. This no doubt accounts for the odor and suggests a relationship in action between sambucus, valerian and the viburnum.

Nash once relieved with Samb. 200c a very bad case of asthma in an old woman, who had suffocative attacks. The relief was accompanied by a profuse flow of urine, which carried off a large amount of dropsical effusion in her legs and abdomen.

Severe croup, whooping cough, bronchitis, and asthma. Infants with chronic snuffles (Thuj., after vaccinations). Suffocating attacks (Ip.). Tendency for attacks to recur. Croupy attack "passes off but is again repeated." Spasms in the throat. Severe coughing with mucus. Thick, white, upper respiratory mucus that suffocates and gags the person (Ant-t.)

Patient can wake up in the middle of the night, grab at their throat, face turns blue. Waking with a spasm where the oxygen gets cut off (Cup.). Worse about midnight or after midnight, worse 2:00 to 3:00 in the morning. Worse dry, cold air.

RELATIONS - Samb-c. may be regarded as practically identical with **Satnb-n. Antidoted by:** Ars., **Camph. Antidote to:** Ars. - relieves ailments from abuse of Ars. **Compare:** (1) Ip., Meph., Op. (2) Samb-c. - great value in dropsies. (3) In Miller's asthma, Arum-d. (4) Dyspnea, inspires, cannot expire. Chlor., Meph. (5) Sleeps into the attack, Lach. (6) Peculiarities of sweating. Chin., Con., Thuj., Puls. (7) Dreads uncovering, Nux-v. (8) Fat people emaciate suddenly, Iod., Tub. (9) Tenacious mucus in larynx, Kali-bi. (10) Effects of cold drink when over-heated, Bell-p. (11) Effects of dry cold. Aeon. Snuffles, Am-c., Nux-v. **Compatible:** Bell., Con., Nux-v., Phos., Rhus-t., Sep. **Follows well:** Op. (effects of fright).

***SANGUINARIA CANADENSIS

(Blood-root)

PHARMACY - sang. Sanguinariacanadensis. Blood-root. Puccoon. N. O. Papaveraceae. Tincture of fresh root. The resin, leaves, seeds, seed-vessels, powdered root and expressed juice have also been used.

Historical dose: Tincture and all potencies.

CLINICAL - Alcoholism. Anemia. Aphonia. Arthritis. Asthma. **Bilious, disorders. Blood, disorders.** Breast, tumor. Bronchitis. Cancer. Catarrh. Chest, pains. Cold. Croup. Deafness. Diphtheria. Dysmenorrhea. Dyspepsia. Ear, polyps. Gleet. Granular, lids. **Headaches.** Heartburn. Hemoptysis. Hot, flashes. Influenza. Keratitis. Liver, disorders. Menopause. Menstruation, painful. Migraines. Nails, ulceration. Neuralgias. Edema, glottidis. Ophthalmia. Pharyngitis. Tuberculosis. Physometra. Pneumonia, **acute. Polyps.** Pregnancy, disorders. Quinsy. **Rheumatism.** Rhus poisoning. **Shoulder, rheumatism. Sinusitis.** Smell, loss. Stomach, neurosis. Syphilis. Tinnitus. Tumors. Vomiting. Whitlow. Whooping cough.

HERBAL - The bloodroot is commonly found throughout the United States and Canada, and is the sole representative of the genus

Sanguinaria of the Papaveraceae. It is herbaceous, has a thick, branching root stock, which creeps along underground.

In early spring, it sends up from the ends of the little side branches a single long- stalked leaf and another stalk bearing a solitary flower. The leaf is wrapped around the flower bud when it rises from the ground and is bluntly five to nine-lobed, roundish at first, but later kidney-shaped.

The Treasury of Botany noted that Native Americans used the orange-colored juice of the root for smearing their bodies and for staining various domestic articles. The plant had also been successfully used by American and French dyers.

HOMEOPATHIC - Sang, is a **right-sided remedy**, affecting the head, liver, chest and deltoid. Affects chiefly the mucus membranes, especially of the respiratory tract. Suited to pulmonary disorders with liver involvement. Marked vaso-motor disturbances, as seen in the circumscribed redness of the cheeks, flashes of heat, determination of blood to head and chest, general pulsations and distention of temporal veins.

Burning heat and ebullitions. Burning in various parts. **Burning sensations** like from hot water. Burning in palms and soles. Burning in throat, under sternum, spots or stitches in chest, palms and soles. Burnt feeling in tongue. Applicable to menopausal disorders.

Influenza coughs. **Sudden stopping of catarrh of respiratory tract followed by diarrhea.** Tuberculosis. Mucus membranes become dry. Acrid, blood-streaked or foul discharge. **Sick and faint from odor of flowers.** Polyps, nasal, uterine. Fungus excrescences. Pains in places where bones are least covered. Internal rawness. Lies on back with head elevated. Bilious. Pains increase and decrease with the sun. Symptoms

ascend or end in bilious vomiting.

MIND - Hopefulness, confident of recovery. Mind confused, better by belchings. Anxiety and dread preceded vomiting and delirium. Borrows trouble. Grumbling. Angry, irritability, moroseness. Rage after insults. Disgusting thoughts and ideas. Sensitive to noise.

Mental torpor, stupor, heaviness, sleepiness. Lassitude, indisposed to move or make any mental effort. Indolence. Dreamy state with eyes open. Sensation as if paralyzed and unable to move while lying on her back. Recognizes everything but can't move. **Abdomen** - Throbbing in abdomen. Tension in epigastrium. Awoke with severe pain in region of spleen. Violent stitches in spleen. Sensation as if hot water poured itself from breast into abdomen, followed by diarrhea. Flatulent distention with escape of flatus from vagina. Colic with torpor of liver.

Back - Soreness down muscles of back. Pain in inner border of right shoulder blade. Pain in sacrum from lifting.

Breasts - Sore and enlarged breasts, at menopause. Pain in right breast to shoulder. Severe soreness under right nipple. Hot streaming from breast towards liver. Pain in breast with periodic cough.

Chest - Pain, burning soreness, in right chest to shoulder. Burning in chest, as of a hot steam extending to abdomen with cough. Tickling behind sternum, causes a constant hacking cough, worse at night on lying down. Hemoptysis. Hydrothorax. Pneumonia.

Ears - Burning of ears with redness of cheeks. Cracking in right ear while stroking cheek. Earache with headache. Polyps. Humming and roaring in the ear, painfully sensitive to sounds, at menopause. Throat disorders causing deafness and earache.

Eyes - Acute conjunctivitis. Yellow sclera, jaundice. Retinal congestion. Catarrhal ophthalmia, granular lids. Redness of eyes in morning. Burning dryness in eyes, followed by copious lachrymation. Lachrymation with coryza, tears hot. Vapor or cloud before eyes. Eyeballs painful on moving them. Swelling over eyebrows. Blepharitis.

Face - **Hectic flush, redness and burning of cheeks.** Neuralgia, pain extends in all directions from upper jaw. Fullness and tenderness behind angle of jaws.

Female - Amenorrhea. Before menses, itching of axilla. Menstruation too early with a discharge of black blood. Menses offensive, profuse. Leucorrhea fetid, corrosive. Uterine polyps. Menopausal disorders, especially flushes of heat. Burning of palms and soles at menopause.

Food - Loss of appetite with great weakness of digestion. Unquenchable thirst. Craves, knows not for what. Craving for spicy things. Aversion to butter, leaves a sweetish taste. Sweet things aggravate, taste bitter, cause burning. Bilious headaches if he goes without food.

Head - **Periodical sick headache**, pain begins in occiput, spreads upwards or **ascending from occiput to over right eye**. Pain in the occiput like a **flash of lightning**. Pain in small spot over upper left parietal bone.

Veins and temples are distended. Headaches if he goes without food. Headaches, better sleep, vomiting and passing copious flow of urine. Headaches return at menopausal, every seventh day (Sulph., Sabad.). Sun headache. Hemicrania increases and decreases with the sun.

Heart - Weak feeling, irregular action. Palpitations. Valvular disease with lung development, phosphates in urine and loss of flesh. Metastasis of rheumatism (or gout) to heart from outward applications.

Kidneys - Dull, heavy pain across kidneys. Urine dark yellow with jaundice. Copious and frequent, clear, worse at night. Urine high-colored, red sediment. Ardor urine.

Limbs - **Rheumatism of right shoulder.**

Pain in shoulder, worse night. Cutting pain or stiffness in right deltoid, worse raising or turning arm. Pain in arm better swinging arm to and fro. Itching in axilla, worse before menses. Aching and swelling of ball of thumb (right). Palms wrinkled. **Burning of palms and soles**, worse covers, at menopause. Rheumatism of left hip joint and nape of neck. Pain in bones near surface. Neuritis better by touching the part.

Liver - Pain over region of liver. Jaundice. Liver-cough.

Lungs - **Severe dyspnea** and constriction of chest. Asthma with stomach disorders (Nux-v.). **Pneumonia**, catarrhal, right side, better lying on back. Sudden stoppage of catarrh of air passages brings on diarrhea. Tuberculosis. Hemoptysis from suppressed menses. **Cough of gastric origin**, relieved by eructation. Cough with burning pain in chest, worse right side. Tough, **rust-colored**, purulent, offensive sputum, almost impossible to raise. Spasmodic cough after influenza **and after whooping cough**. Cough returns with every fresh cold.

Male - Burning in glans. Cheesy secretions from glans (syphilis). Gleet, old cases. Emissions two nights in succession, after which he felt very well.

Modalities - Better acids, sour things. Better vomiting, passing flatus. Better cool air. Better darkness, sleep, lying on back or on left side. Worse from motion, raising arms, looking up. Worse touch, **right side**. Worse

light, sun, odors, and sweets. Worse 3 a.m., weekly, nightly, periodically. Worse menopause.

Mouth - Ulceration of mouth and fauces with dry, burning sensation. Palate feels scalded. Tongue white, feels burnt. Anterior tongue looks red, like raw beef. Offensive breath. Sweet things taste bitter.

Neck - Soreness of nape on being touched. Rheumatic pain in nape, shoulders and arms. Pain in right side of neck as if strained in left side.

Nose - **Nasal polyps**. Chronic rhinitis, membrane dry and congested. Hay fever. Ozaena with profuse, offensive, yellowish discharges. Coryza, followed by diarrhea. Pain at the root of nose. Rose-cold with subsequent asthma. Sensitive to odors. Loss or perverted sense of smell, smell in nose like roasted onion.

Rectum - Alternate diarrhea and constipation. Colic followed by diarrhea. Diarrhea as coryza improves. Dysentery. Urging to stool, but only discharges of flatus. Ineffectual urging to stool, then vomiting. Bilious, liquid, gushing diarrhea (Nat-s., Lyc.). Copious apple-green stools with flatus. Hemorrhoids. Cancer of rectum.

Sensations - As if forehead would burst. As of a band across forehead. As if head were drawn forward. As if electric current shooting through head. As if temples and scalp were alive with irrepressible pulsation. As if eyes would be pressed out. As if hairs were in eyes. As if paralyzed. As if she was in a railway car that was moving and jarring her and as if all about her moved rapidly and confusedly.

Skin - Heat and dryness of skin. Prickling heat spreading over body. Burning and itching, worse by heat. Circumscribed red spots. Red, blotchy eruptions, worse in spring. Acne with scanty menses. Scaly eruptions, carbuncles. Itching and nettlerash before the nausea. Old indolent ulcers with callous borders and ichorous discharge. Fungus excrescences. **Antidotes rhuspoisoning**. Jaundice.

Sleep - Drowsiness causing mental and bodily indolence. Sleeplessness at night, awakens in a fright as if he would fall. Can't sleep without brandy. Slightest noise disturbs, yet is sleepy and dreamy. Dreams of sea voyages with sensation of being rocked. Dreams of frightful business matters.

Stomach - Sinking, faint, all-gone feeling (Phos., Sep.). Stomach pains to right shoulder. Burning in stomach with headache, and vomiting. Hiccough while smoking. Nausea with salivation, not better by vomiting. Vomiting of bitter water, sour, acrid fluids, of ingesta, of worms. Spitting of bile, gastro-duodenal catarrh.

Teeth - Looseness of teeth, with salivation. Toothache from picking teeth. Pain in hollow teeth, especially when touched by food. Pain in decayed teeth after cold drinks. Bleeding, spongy, fungoid gums.

Temperature - Fever, heat and delirium. Intermittent fevers, marsh fevers, nervous fever. Fever from pulmonary, hepatic or gastric inflammation. Flushes of heat, rising into face and head with headache. Burning, scanty sweat. Copious sweat, cold sweat. Heat flying from head to stomach. Chill with nausea, headache. Chill and shivering in back. Shaking chill.

Throat - Dry cough, tickling in throat. Tonsillitis. Ulcerated sore throat, as if raw and denuded. Sore, swollen (right), pains to ear and chest. Burning, worse eating sweet things. Dry and constricted. Sensation in pharynx as if scalded by hot drink. Edema of larynx. Larynx, full and dry in singers. Aphonia.

Tongue - Burnt, sore feeling. Tip of tongue burns as if scalded. Crawling, pricking on tip of tongue. Stitches in left side of tongue. White coated tongue with slimy, fatty taste. Red streak through middle of tongue.

Vertigo - Vertigo, worse looking up and moving head rapidly, with nausea, fainting and headache.

COMMENTS - Acts powerfully on the outer chest, sternum and breasts. Reputed to cure cancer, polyps and new growths (Chel.). Clarke saw breast tumors diminish under its action.

Grimmer stated that this remedy has cured breast cancer with severe burning pains and inflammatory symptoms of the mucus membranes, the respiratory and gastrointestinal tracts, and the skin. Pronounced heat, flushing and redness of the skin. Characteristic burning pains (wherever pain exists).

S. L. Mitchell recorded the fatal poisoning of workmen who drank the tincture in mistake for brandy. They were all soon seized with severe racking and burning pains in the stomach and bowels with intense thirst. "Burning" is one of the leading notes of the remedy and is found in many different parts.

Winterburn published a case illustrating this indication in the region of the stomach. Mr. F., 48, of sanguino-bilious temperament, energetic and refined, had been ill with pains in the stomach for several months. A clairvoyant had recommended "a decoction of blood-root and bone-set in tablespoonful doses." Each dose produced "intense burning pains in the stomach lasting for hours," and it had to be discontinued.

Weeks later, Winterburn was consulted and found Mr. F with burning in his epigastrium with pressure, worse at night, but coming on soon after lying down and compelling the patient to rise. Belching gave no relief. Great appetite, torpid bowels, an unsatisfactory relief each morning, leaving a sense of discomfort.

There was a peculiar drawing pain in the shoulders and arms during sleep, so that when he woke his fists were tightly clenched and flexed on the sternal end of his clavicle, lameness and weariness of the muscles followed. Sang. 200c, was chosen after careful comparison with Nux-v., Graph, and others. It was given every night at bedtime. After the first dose, the symptoms disappeared "like magic," and the patient was soon well.

Leonard said "a circumscribed burning in the chest, commonly followed by heat through abdomen and diarrhea," is a strong indication for Sang, in pneumonic conditions.

Sang, also has the circumscribed hectic flush on the cheeks, as in tuberculosis in which it is frequently indicated. Flushed face, at times dark red or livid (Op.). It has the "hopefulness" of tubercular patients.

Severe headaches. Migraine, starting at the back of the head and moving to above the right eye (Sil.). Headaches begin at occiput, spreading upwards and forwards, settling over the right eye. Pains like a flash of lightning in occiput. Bursting headaches, as if the eyes would be pressed out. Better by sleep. Symptoms begin in the morning, increase to noon, then diminish. Headaches return at menopause. Right-sided headaches with the flu. Bilious or gastric headaches.

Hering described the headache as the "American sick-headache." There is a rush of blood causing faintness and nausea, pains are sharp or throbbing. Patients cannot bear light, odors, or the least jar, as that of anyone stepping across the floor. There can be vomiting of food and bile. Pain so violent the patient goes out of her mind or seeks relief by pressing head against pillow or pressing with the hands.

Cooper gave as a keynote, "If he goes without food, gets bilious headaches." Violent, throbbing headache with extreme nausea and vomiting, frequent, fetid belchings and great salivation. Severe burning in stomach, vomits bitter water and sour, acrid fluids. Nausea may not be relieved by vomiting. Sweets taste bitter, aggravate the burning. Vomiting of worms. Tormenting thirst. Offensive breath and flatus.

Irritation of the nasal mucus membrane. Polyps. Coryza with pain at root of the nose. Influenza, hay fever and ozaena. Sinusitis, more on the right side. Lost or perverted sense of smell, sensitive to the odor of flowers.

Laryngitis and membranous croup. Tracheal and bronchial coughs in epidemic influenza. Cough after influenza or whooping cough, particularly in children. Cough returns with every fresh cold. Violent, dry cough, wheezing, whistling, metallic. Offensive and acrid discharges. Sputa is almost impossible to raise.

Clarke recorded several cases in which Sang, relieved patients who had thick plugs of suffocating mucus which the patients were too weak to dislodge.

Offensive menses, bright red flow, later blood darker and less offensive. Itching of axillae before menses. Eruptions on the face of young women, during scanty menses. Menopausal disorders, flashes of heat, leucorrhea, and painful enlargement of breasts.

Neuralgia of the face, ameliorated by kneeling down and pressing head firmly against the floor. Pain extends in all directions from the upper jaw.

Rheumatism. Rheumatic pain in right arm and shoulder, worse at night. Cannot raise the arm, but can swing it to and fro. Frozen shoulder. Great affinity for the right shoulder. Right side generally more affected. Symptoms go from right to left. Marked periodicity. Pains in places where the bones are least covered.

Cooper gave the case of a woman, 19, who had a condition of her throat from scarlatina three years previously, and lately increasing deafness. There were noises all over her head and vertigo. Sudden flushings in daytime, menses too frequent, and profuse leucorrhea. Backache, paining her to walk, forcing her to give up teaching from the pain.

Poor appetite from the headaches and tinnitus, she often had pain behind the angles of lower jaw and swollen glands. All symptoms disappeared after a single dose of Sang, tincture, although at first the leucorrhea was increased.

F. Nichol, in giving Hale his experience with Sang, in croup, said he used a solution of Sanguinarine in vinegar, and he found that the most effective preparation.

RELATIONS - Compare: (1) Just. - bronchial catarrh, coryza, hoarseness, oversensitive. (2) Dig. (migraine). (3) Bell., Iris, Meli., Lach., Ferr., Op. (4) Chel., Op. In rheumatism of right deltoid, Mag-c. (5) Headache extending forward from occiput and settling over right eye, Spig. (6) Headache better by hard pressure, Chin., Indg., Mag-m. (7) Paroxysms of headache ending in profuse urination, Ign., Gels., Verat. (8) Menstrual headache, Sep. scanty flow, Sang, profuse. (9) Right side, throbbing, congestive headache, worse light and noise, Bell. (10) Periodic sick headaches, Iris-v. (11) Pneumonia, Phos., Ant-t. **Compatible:** Bell. - in scarlatina rashes. **It antidotes:** Op. **Complementary:** Ant-t.

***SANGUINARINUM NITRICUM

(Sanguinarine Nitrate)

PHARMACY - sanguin-n. Sanguinarinum nitricum. Sanguinarine nitrate. Trituration. **Historical dose:** All potencies.

CLINICAL - Adenoids. Allergies. Asthma. Borborygmus. Bronchitis. Catarrh. Colic. Colds. Coryza. **Coughs.** Deafness. Eustachian catarrh. Hayfever. Headaches. Influenza. Laryngitis. Pharyngitis. Polyps. Post-nasal catarrh. Quinsy. Stiff-neck. Throat, sore. Tinnitus.

HOMEOPATHIC - Sanguin-n. is a very fine brownish-red powder, pungent, acid, bitter and inodorous. It is soluble in alcohol, ether, water and oils, but not in the same proportion in all. Pure sanguinarine is a pearly-white substance, but when combined with any of the acids the result is a salt of some shade of red, crimson or scarlet. The color of the blood-root may be due to the presence of some native salt of Sanguinarine.

Sang-n. was proved in 3x trituration by Professor Owens of Pulte Medical College. Nasal polyps. Acute and chronic catarrh. Acute pharyngitis (Wye.). Smarting and burning in throat and chest especially under sternum.

Influenza. Chronic follicular pharyngitis. Lachrymation, pains in eyes and head, sore scalp, **sense of obstruction.**

Abdomen - Borborygmus and pains in abdomen, as if diarrhea would set in, with sharp, cutting pains.

Back - Stiffness in muscles of left neck and shoulder.

Causations - Driving in cold wind, winter weather, exposure.

Chest - Pressure behind center of sternum.

Tightness in the chest. Tension in chest, burning and accumulation of mucus behind center of sternum. Short, hacking cough arising from sensation of tightness in chest.

Ears - Obstruction of Eustachian tube. Roaring in right ear. Difficulty in distinguishing sounds.

Eyes - Sore, aching pain in eyeballs. Burning, pressing aching, and sore pains in eyes. Profuse lachrymation, tears gush out. Redness and soreness of inner canthi. Redness of lids and conjunctiva. Sight dim, as if looking through gauze.

Food - Little appetite. Everything tastes dry like chips. Coffee did not taste natural, wanted something succulent, not pungent, but soothing to mouth and throat.

Head - Pain in supra-orbital region. Burning pain in forehead and root of nose. Sensation of obstruction and fullness in head, ameliorated by discharge of a large quantity of thick, yellow, sweet-tasting mucus.

Kidneys - Passed urine every hour during the night. Urine had bright yellow or white sediment.

Limbs - Stiffness in muscles of left shoulder and neck.

Lungs - Strong desire for fresh air. Sense of suffocation. Dryness and burning in throat and bronchials.

Feeling as if air passages lined with thick, stiff mucus or pus. Chronic nasal, laryngeal and bronchial catarrh. Raises thin, frothy mucus, which is very tenacious. **Tickling cough.** Short, hacking cough with expectoration of thick, yellow, sweetish mucus. Cough is deep and rattling.

Modalities - Worse touch, at night. Pressure aggravates soreness of eyes. Bathing with warm water ameliorates heat in forehead. Headache is ameliorated by discharge of much mucus from nose.

Mouth - Acrid, burning sensation on tongue. **Ulceration on the side of the tongue.** Roughness and dryness in mouth and throat. Heat in mouth as if pepper had been taken. Increased flow of mucus and saliva with sneezing and burning in forehead. Bitter taste extending back to root of tongue.

Nose - Dry and burning nostrils. **Feels obstructed.** Enlarged turbinates at beginning of hypertrophic process.

Profuse, watery mucus with burning pain, with pressure over root of nose. **Sneezing.** Secretion scant, tendency to dryness. Nostrils plugged with thick, yellow, bloody mucus. Small crusts which bleed when removed. Post-nasal secretions stuck to naso-pharynx, dislodged with difficulty. Rawness and soreness in posterior sinuses.

Sleep - Sleep poor, restless from feverish and irritable condition.

Stomach - Sensation of burning in stomach and esophagus. Belching up of putrid-smelling gas though she had eaten nothing since morning.

Throat - Voice altered, deep, hoarse. Rough, dry, **constricted, burning.** Right tonsil sore, swallowing difficult.

COMMENTS - The catarrhal symptoms of Sanguin-n. appear in great intensity, the nose, eyes, throat and bronchi being affected. Sensation of obstruction and fullness in the head, accumulation of mucus obstructing nose, awakes frequently with dry mouth, the nose being obstructed.

Accumulation of mucus behind center of sternum, sense of suffocation, feeling as if air-passages lined with thick, stiff mucus or pus. Heat and tension behind sternum is characteristic and so is expectoration of quantities of sweet-tasting mucus. Expectoration

of thin, frothy, very tenacious mucus.

Lachrymation, pains in eyes and head, sore scalp, obstructed nose and burning pains throughout all regions were experienced. Symptoms of influenza, even to the loss or perversion of taste. "Sensation arising to nostrils as if he had eaten strong horseradish."

Hale reported the case of Mr. B., 40, dark, had for eight years in spite of continuous old-school treatment, chronic post-nasal catarrh, bronchitis and laryngitis. Voice altered, deep, hoarse, speech with effort, as if from chest. Severe pressure from behind sternum. Mucus membrane dry, raised only a few balls of gray mucus.

He spent two winters on St. John's River, Florida, and was better there, but worse again on his return north. Sanguin-n. 6c trituration, was given every two hours. In one week he was better, there was more moisture in

his throat than three had been for two years. Voice markedly better.

Sanguin-n. was given every four hours. In ten weeks he regained six pounds of his lost weight and strength in proportion. The voice not having improved in the same degree, Caust. 6c and afterwards Dros. 3c, were given and in sixteen weeks he was perfectly well.

Mrs. S., city missionary, 49, had constant hacking cough, raw, sore feeling in throat, sore aching and pressing behind sternum. She was much exposed to cold winds of winter, which set up coryza and irritation. Sanguin-n. 6c. every two hours, enabled her to follow her occupation without suffering and in ten weeks she was completely cured.

O. W., 55, subject to frequent attacks of cold in head, throat and chest. After a long drive in open trap contracted a severe cold in head, throat, lungs. Sore and lame all over, frequent sneezing, lachrymation.

Next day sore throat very marked, constant tickling in throat-pit, exciting cough, at first short and hacking, but in two days it became violent and convulsive. Bell, and Dros. did little good. Pressure behind sternum became very severe.

Sanguin-n. 6c was given every two hours. In four hours copious perspiration came on with frequent sneezing. Next day, sore throat appeared after waking from a troubled and restless sleep, constriction of throat with difficult swallowing, tension across chest radiating from behind sternum.

Sanguin-n. was given every hour. In one hour, free discharge from nose set in; three hours, moisture and relaxation of constriction across chest. The discharge was yellow and sweetish-tasting, continued all day. Slept well and woke next morning feeling quite free. But little cough or coryza during the day. The following morning he was quite well.

C. Wesselhoeft regarded Sanguin-n. as the simillimum for "New England colds." Adenoids and polyps have been cured with it. There is great craving for air.

RELATIONS - Compare: (1) Sanguin-t. - exophthalmos. (2) Mydriasis, dim vision. Arum- t., Psor., Kali-bi., Sang. (3) Burning in nostrils, Arum-t. (4) Tenacious mucus, Kali-bi. (5) Hay fever, Psor. (6) Sweet expectoration, Stann.

REFERENCES - Boericke. Clarke.

***SANGUINARINUM PURA

PHARMACY - sanguin. Sanguinarinum pura. N. O. Papaveraceae. Trituration. Solution in vinegar. **Historical dose:** All potencies.

HOMEOPATHIC - Sanguin, is a pearly white substance. Thomas noted that in smallest physiological doses it acts as "**expectorant**," in large, it causes nausea and still larger vomiting. In repeated doses, it lowers the pulse rate.

Useful for croup. Pseudo-membranous croup. Great dyspnea. Hoarse, muffled cough, with complete aphonia. Grasped his throat in agony. Nausea and vomiting.

COMMENTS - T. Nichol gave his experience with a solution of one grain of Sanguin, in two ounces of vinegar in cases of pseudomembranous croup. He related the case of W. G., age 5, who had been ill some days. Nichol found him with a hoarse, muffled cough, complete aphonia, pulse 132. Soft palate and fauces covered with pearly, fibrinous exudation, a hissing sound was heard on auscultating larynx.

Great dyspnea. The child stretched back his head and grasped his throat in agony. Features swollen and dark. Sangn. acet, was given and in fifteen hours there was notable improvement. In forty-eight hours the boy was out of danger.

REFERENCES-Clarke.

***SANGUINARINUM TARTARICUM

(Sanguinarine Tartrate)

PHARMACY - sang-t. Sanguinarinum tartari- cum. Sanguinarine tartrate. Papaveraceae. Trituration. **Historical dose:** All potencies.

CLINICAL - Exophthalmos. Mydriasis. Stool, bilious. Vision, dim.

HOMEOPATHIC - Tully and Terry experimented with Sang-t. in considerable doses. Tully said he repeatedly witnessed all the effects of sanguinaria root, save the neuralgic pains and the convulsive disorders, from the use of Sang-t.

The most peculiar of the symptoms are starting and protrusion of the eyes, extreme mydriasis, haggard expression and cold surface and cold sweats.

REFERENCES - Clarke.

***SANICULA AQUA

(Mineral Springs)

PHARMACY - sanie. Sanícula aqua. Mineral Springs of Ottawa, Ill., USA. Containing, approximately in grains per gallon, Nat-m. 93, Calc-m. 23.5, Mag-m. 23.25, Calc, bicarb. 14.25, Calc-s. 9.5, Kali-s. 5, Nat-bic. 1, Nat-br. 3, Fe. bi-carb. 1, Nat-i. 12, Sil. 5, Alum. 01 and traces of Lith. bi-carb., Nat-p., Bor. Dilutions of the spring water. Triturations of the evaporated salt. **Historical dose:** Tincture and all potencies.

CLINICAL - Amenorrhea. Anterior crural, neuralgia. Asthma. Bedwetting. Bee stings. Boils, blind. Borborygmus. Coccyx, soreness. Condylomata. Conjunctivitis. Constipation, children. Cornea, ulceration. Coryza. Cough. Dandruff. Debility. Diabetes. Diarrhea. Digestion slow. Dropsy, during pregnancy. **Eczema. Emaciation.** Excoriations. Foot sweat. Gastritis. Gumboil.

Sanícula aqua Headaches. Indigestion. Influenza. Intermittents. Itch, suppressed. Itching. Leucorrhea. Liver, soreness. Lumbago. **Marasmus.** Melancholy. Milk, thin. Morning, sickness. Motion sickness. Mouth, sore. Neuralgia. Neurasthenia. Night-terrors. Nose, crusts. Ophthalmia, tarsi. Os uterus, dilated. Ossification, early. Ozaena. Perspiration, excessive. **Pot-bellied children.** Rectum, cramp. Rheumatism. **Rickets.** Ringworm. Scurvy. Seasickness. Shoulder, rheumatism. Throat, sore. Tongue, burning. Toothaches. Uterus, prolapsed. Uterus, tumor. Vomiting, milk, water. Wrist, boils.

HOMEOPATHIC - Sanie, has sometimes been confused with the plant Sanicula mary- landica. or black snake-root. The water is odorless and colorless, and has an agreeable and slightly alkaline taste.

Sherbino proved Sanie, in the potencies and a large number of the symptoms of the provings have been confirmed. It's a polycrest and anti-psoric of wide range. Guernsey considered Sanie, the chronic of Cham.

Sanie, affects the nutrition, female organs, rectum, neck and skin. Useful for bedwetting, seasickness, motion sickness, constipation, etc. **Rickets. Marasmus.** Thick, acrid, yellow pus. Body smells like old cheese.

Bursting in perineum, bowels, bladder, vertex, chest. Shifting pains. Cannot bear to have one part touch another or cannot lie near another person. Enlarged feeling in throat, vagina etc. Child kicks off covers at night, wants to lie on something hard though thin. Clothes feel cold, damp.

MIND - Irritable, least word or action would upset her. Misconstrues everything. Crossness quickly alternating with playfulness in children. Headstrong, obstinate, touchy children. Restless desire to go from place to place. Instability of purpose. Does not want to be touched. Constant desire to look behind. Dread of downward motion. Fear of the dark.

Abdomen - Bowels bloated as if they would burst. Sore pains in groin. Loud gurgling, pot-bellied children.

Back - Neck weak and emaciated, child cannot hold its head. Stiff backache, worse least turning, raising arms or putting hands behind him. Must turn whole body to look around. Sits, head forward, to ease the pain. Cold lumbar spine. Lumbago, better lying on right side. Lumbar vertebrae as if dislocated or were gliding past each other. As if back is broken in two pieces. As if a damp cloth on sacrum.

Causations - Poor diet, strains.

Chest - Tickling under sternum. Great soreness of upper chest, must hold it with hands when coughing.

Constitutions - Patients are thin and look old, especially children.

Ears - Eustachian catarrh. Soreness behind ears with discharge of white, gluey, sticky substance. Stuffed feeling in left ear.

Eyes - Lids agglutinated in morning. Lachrymation in cold, open air or cold application. Eyes burn, exuding a sticky fluid. Ulcerated cornea. Dim sight. Photophobia. Dandruff of the eyebrows.

Face - Acne about eye and cheek. Itching eruptions in beard, especially under chin, worse when warm. Excoriation of upper lip.

Female - Leucorrhea with strong odor of fish-brine, worse stools. Bearing down as if contents of pelvis would escape, worse jar, walking. Supports the relaxed parts by placing the hand against vulva, better rest. Vagina feels large, cannot stop menstruation. Os cervix open and dilated.

Food - Child wants to nurse all the time, yet loses flesh. Craves, salt, bacon or ice cold milk. Eating causes urging for stool, must leave the table. Feels better after eating. Great longing for the spring water. Thirst little and often.

Head - Bursting in vertex. As if a cold cloth around brain. Cannot bear cold air on occiput and neck. Profuse sweat on occiput and neck, worse during sleep. Electric crackling in hair when combed. Profuse scab dandruff, falling of hair. Small boils on head that do not mature.

Kidneys - Bursting in bladder with urgent call to pass urine. Frequent, profuse, sudden urination, urging ceases if desire is resisted. Briny urine, stains diaper red. Child cries before urinating, strains to urinate while at stools.

Limbs - Pain in shoulders, worse raising arms or putting them behind back. Hands become sweaty when putting them together. Cold, clammy hands and feet. Burning of palms and soles. Feet as if in cold water. Cramps in feet. Foul foot sweat, chafes toes, destroys shoes or stiffens the hose.

Liver - Soreness through hepatic region. Enlargement of liver, sensitive to pressure and jar.

Lungs - Asthmatic breathing, worse after supper. Wheezing, rattling under sternum, worse during or after eating. Deep, hollow cough with loud rattling, caused by tickling under sternum. Tickling on lying down at night and on waking. Rattling cough, child gags and vomits a mouthful of tough, stringy matter. Expectoration of large, yellow, cheesy masses.

Male - Increased sexual desire at first, then much decreased. Discharge of semen too early, with little sensation. Scrotum relaxed, clammy sweat about parts. Briny odor of the genitals, a few hours after sex. Child's parts smell of fish brine even after bathing.

Modalities - Better from open air, warmth. Better vomiting. Worse from strain, jarring. Worse motion, raising arm, putting hands behind, descending. Worse cold wind on occiput or neck.

Mouth - Offensive breath. Mouth and palate covered with ulcers, white aphthae. Profuse flow of white, clear, transparent, stringy saliva when teething. Teeth sensitive to cold air, as if they were very thin. Teeth feel too long. Gums sore and painful, worse from eating. Gumboils.

Nose - Sneezing and itching of nose. Nose sore and stuffed with yellow scabs. Fluent coryza, worse eating. Water smells like old, musty rainwater.

Rectum - Constipation with ineffectual urging. Pain, bursting in the perineum during stool. Even soft stool requires great effort to expel. Stool of one large heavy mass, foul like rotten cheese, or dry, small balls. Stools, misshapen, changeable, involuntary. Stools must be removed or crumbles at the verge of anus.

Skin - Eczema exuding sticky fluid, behind ears, on wrists, fingers and toes. Itching, worse by scratching. Skin is dry, brownish, flabby. Skin about neck wrinkled and hangs in folds. Copper-colored syphilitic sores. Fissured hands and fingers. Cracks on fingers. Tendency to small boils that do not mature.

Sleep - Falls asleep after vomiting. Frequent waking at night. Dreams of robbers and cannot sleep until the whole house is searched. Dreams of murder and remorse, lascivious dreams. On waking, child rubs eyes and nose with its fist.

Stomach - Bloating of stomach on beginning to eat. Sensation of a lump in stomach. Thirst little and often, water is vomited as soon as it reaches the stomach. Sour, rancid, burning belchings. Nausea after eating with sick feeling, better from smoking. Vomiting of milk soon after nursing.

Temperature - The cold air chills him. Chill every day at same time. Whole body feels too hot at night. Begins to sweat as soon as covered. Sticky sweat, particularly on side lain on. High fever every night with sleeplessness.

Throat - Dry throat. Hoarseness following sore throat, must clear throat before speaking. Cold, icy sensation, like peppermint. Throat feels too large. Can swallow solids better than fluids. Ulcers with yellowish base on tonsils.

Tongue - Sides of tongue turn up. Tongue adheres to roof of mouth. Tongue, large, flabby, burning, must protrude to keep it cool, ringworm on tongue. Thick yellow coating on back of tongue.

Vertigo - Vertigo on rising from stooping. Vertigo while sitting at table or desk. Vertigo after eating with nausea. Faint, smothering sensation with great desire for open air. Seasick sensation.

COMMENTS - Itching skin, eczema, worse bathing (Sil.). Sweaty, smelly feet, particularly in children (Sil.). Fear of the dark, sensitivity to storms (Phos.). Children are very obstinate, stubborn, hard to please. Offensive vaginal discharges that smell like fish brine or dead fish (Hep.). Strong fishy odor in hemophilis, gardnerella and

Sanícula aqua trichomonas. Discharge can also smell like rotten cheese.

RELATIONS - W. J. Guernsey considers Sanie, the chronic of Cham. **Compare:** (1) Sil., Phos., (2) The constituents of the Sanie, water, especially Nat-m. and Calc. (3) Dread of downward motion, Bor. (4) Head sweat, Calc., Sil. (5) Soreness behind ears, viscid discharge, Graph., Psor. (6) Ringworm on tongue, Nat-m., Ran-s., Tarax. (7) Drinks little and often, vomits as soon as it reaches stomach, Ars. (8) Symptoms change constantly, Care., Lac-c., Puls. (9) Sphincter not under control, Aloe soc. (10) Stool recedes, Sil., Thuj., must be removed mechanically, Sei.

***SANTALUM ALBUM

(Sandalwood)

PHARMACY - santa. Santalum album. Sandalwood. Santalum freycinetianum. Santalum paniculatum. N. O. Santalaceae. India, Sandwich Islands. The oil distilled from the wood. Dilutions with alcohol. **Historical dose:** Tincture and all potencies.

CLINICAL - Cystitis. Gonorrhea. Kidney pain.

HERBAL - The word "Santalum" is of Persian origin. Sandalwood oil is obtained from several species of Santalum, S. album being the chief. Its chief use in old-school practice is in gonorrhea.

HOMEOPATHIC - Shirliff observed in a man taking the oil for gonorrhea, soon after each dose, an acute aching pain felt in the kidney region, so severe that if he was standing he was obliged to sit, which slightly relieved.

Shirliff gave the same indication in his case of an elderly man, who looked worn and haggard, complained of pain in region of left kidney from ribs to iliac crest, brought on by walking, better leaning forward, completely better by lying down. Better pressing clenched fist into back.

The pain lasted six months and was very acute; Sulph., Berb. and Bry. gave no relief.

Santal, (oil), one drop every four hours, soon gave great relief and entirely removed the pain in two months.

REFERENCES - Boericke. Clarke.

***SANTONINUM

(Santonin)

PHARMACY - sant. Santoninum. Santonin. A neutral active principle obtained from Ciña. N. O. Compositae. Trituration. **Historical dose:** All potencies.

CLINICAL - Amblyopia. **Bedwetting. Blindness.** Cataract. **Color blindness.** Convulsions. Cough. **Cystitis.** Delirium. Diarrhea. **Dysuria.** Eyes, paralysis. Enteralgia. Enteritis. Epilepsy. Gastroenteritis. **Hallucinations.** Hemoglobinuria. Hemiplegia. Hysterical. **Incontinence.** Nephritis. Infantile remittents. Melancholy. **Night, cough.** Nosebleed. Photophobia. Strangury. Tetanus. Urination, frequent. Urticaria. **Vision, yellow.** Vomiting. **Worms.**

HOMEOPATHIC - Sant, is the active principle of Santonica, the unexpanded flower heads of Cina Artemisia Maritima.

Sant, is the favorite anthelmintic of the old school and it has been chiefly given against lumbrici. Fatal poisonings have caused convulsions, left side paralysis, delirium, vomiting and purging.

Worm affections, corresponding to the **"pain in shocks"** (Cina.). Gastro-intestinal irritation, **itching of nose**, restless sleep, twitching of muscles. Asearí lumbricoides and thread worms, but not tapeworms.

Colorblindness and yellow vision. Visual illusions, **yellow sight**, violent light not recognized, colors not distinguishable. **Chronic cystitis.** Urine deep saffron color. Chronic gastric and intestinal troubles. **Night cough** of children. Laryngeal crises and lightning pains of tabes.

Spasms and twitchings. Violent convulsions, unconscious, head hot, face flushed, purplish. Spasm begins in face and spreads to limbs. Partial paralysis of one (left) side. Restlessness and prostration.

MIND - Delirium. Excited, laughs and sings. Hysterical. Restless and irritable. Wants everything, but satisfied with nothing. Profound and unusual depression with irresolution and want of confidence, unfitting him for work of any kind. Melancholy like that produced by jaundice. Coma.

Abdomen - Rumbling, very sensitive abdomen. Bruised but soft, hot, full. Severe abdominal pains with vomiting and purging. Every night pain in intestines before stool.

Chest - Paralysis of lungs, needs artificial respiration.

Eyes - Dark, blue rings around eyes. Eyes rolled convulsively, distorted, staring. Pupils dilated and insensible. Pressure in eyes. Photophobia with lachrymation. Sudden dimness of sight. Flickering before eyes. Objects seem to totter and dance, visions of figures, cherries, animals. **Color blindness**, xanthopsia. Yellow soup looks red, blue evening sky looks green, objects look green, white looks yellow, violet. **Yellow vision**, objects as if in yellow haze or yellow light. Strabismus due to worms.

Face - Red, hot face, staring eyes. Face pale. Pale around mouth, worse afternoon. One cheek white, the other one is red. Lips swollen, glistening with the distention. Swelling under chin, left side of face. Face pinched, drawing in of lips over teeth with pinched expression of mouth and nose. Convulsive movements of muscles of face, especially lips and lids.

Food - Deficient appetite. Thirst intense, continual for ice cold water.

Head - Occipital headache with **chronic hallucinations**. Head turning and twisting, restless. Dullness of head. Pain in forehead.

Heart - Pulse is quick and full, rapid, lowered, left absent, right soft and steady.

Kidneys - Nephritis. Feeling of fullness of bladder. **Incontinence and dysuria. Bedwetting.** Frequent efforts to urinate, only passes a few drops at a time, that color linen yellow. Urine greenish if acid and reddish purple if alkaline. Urine deep saffron yellow, thick, sulphur yellow, greenish. Hemoglobinuria.

Limbs - Spasms of limbs. Convulsive jerking of upper limbs. Twitching of hands and feet. Gait unsteady and tottering, staggered.

Lungs - Coughed incessantly all night from tickling in larynx and trachea. Breath is rapid, sighing, quick and catchy, rattling.

Mouth - Frothing from mouth. Tongue deep red, dry. Burning pains apparently torment her, as she forces

everything into her mouth. Hallucinations of taste.

Nose - Nosebleeds. Hallucinations of smell. Things smell peculiar.

Rectum - Well-marked tenesmus. Purging of watery, flaky, foul-smelling stools, followed by vomiting. Stools copious, grayish, putrid-smelling.

Skin - Urticaria, with edema of nose, lips, and eyelids, over almost entire lids, with vomiting.

Sleep - Sleepy, tired. Sleep restless, disturbed, woke unrefreshed with sickness, frontal headache, and deficient appetite.

Stomach - Dull pain in pit of stomach. Frequent belchings. Nausea and vomiting. Nausea, better after eating. Vomiting and purging of yellowish, slimy mucus with severe abdominal pains.

Teeth - Grating teeth during sleep. Teeth clenched.

Temperature - Whole body icy cold, lips and ears blue, face white as snow. Limbs cold, very clammy coldness. Cold sweats. Hot sweat in occiput, more clammy in front. Violent fever, rapid pulse, burning heat of skin, face puffy, eyes brilliant, fixed.

Throat - The glands of neck, parotid and submaxillary are swollen.

Vertigo - Giddiness and intense headaches, every object looks bright green.

COMMENTS - A case recorded by Demme was quoted in Brit. Med. Jour., 1892. A boy, 3, was given fifteen tablets over three days by his mother. Each tablet contained 1/3 grain of Sant.

The symptoms produced were vomiting, dilatation of the pupils, collapse, cyanosis, dyspnea and finally convulsions. Dilatation of the pupils, collapse, cyanosis, dyspnea, and finally convulsions.

After a warm bath with cold applications to the head and spine, consciousness returned. The temperature was 103.5, nosebleed and hemoglobinuria occurred and a scarlatinalike eruption was noticed.

The child ultimately recovered. After a dose of 7 centigrams, a child, 2, was seized with prostration, convulsions, cramps and jaundice, followed on the third day by salivation and ulceration of the gum.

Less serious but very characteristic are the effects on the senses, especially the sense of sight. Visions of figures have been produced and colored vision is a frequent phenomenon, even when the lower triturations have been used.

Yellow is the predominant color, but green and violet vision are also marked. The urine also is yellow colored and stains yellow and is passed with much urging and painful burning. A kind of giant urticaria occurred in one case.

Hale recorded that Sant, cured cases of "**nervous blindness**." It was given to an old man, quite blind, for worms and his sight partially returned. This led to further trials in which it was given in nine cases of cataract and, according to Hale, four were cured, the rest not benefited.

Hale also mentioned bedwetting, strangury, chronic cystitis, as having been cured by it. Chronic catarrh of the bladder. Infantile remittents with or without worms. In one prover there was "**sensitiveness of the abdomen**."

RELATIONS - Compare: (1) Cina, Teucr., Napht., Nat-m. Phos., Spig. (2) Amaurosis, Benz-d., Carbn-s. (3) Colored vision, Cycl.

REFERENCES - Boericke. Clarke. Phatak.

***SAPONARIA OFFICINALIS

(Soap Root)

PHARMACY - sapo. Saponaria officinalis. Soap root. Soapwort. Hedge pink. N. O. Caryophyllaceae. Tincture of the roots. **Historical dose:** Tincture and all potencies.

CLINICAL - Ciliary, neuralgia. Colds. **Coryza**. Exophthalmos. Glaucoma. Sore throat. Trigeminal, neuralgia.

HOMEOPATHIC - Acute colds, coryza, sore throat, etc. Will often "**break up**" **acold**. Worse at night, mental exertion, left side.

MIND - **Depressed with sleepiness**. Apathetic. Utter indifference to pain or possible death.

Eyes - Violent **eye** pains. Hot stitches deep in eyeball. Ciliary neuralgia, worse left side. Exophthalmos, worse reading and writing. Increased intra-ocular pressure. Glaucoma. Photophobia.

Face - Left-sided trigeminal neuralgia, especially supra-orbital.

Head - Stitching pain, **supra-orbital**, worse left side, evening, motion. Throbbing over orbits. Congestions to head, tired feeling in nape.

Heart - Impulse weak, pulse less frequent. Palpitations with anxiety.

Nose - **Coryza**. Stopped up feeling in nose, also itching and sneezing.

Stomach - Difficult swallowing. Nausea, heartburn, full feeling not relieved by eructation.

Vertigo - Sensation of drunkenness with constant endeavor to go left-wards.

RELATIONS - Compare: (1) Sapin. (2) Verb., Cocc. - both containing Sapin. (3) Quill., Anag., Helon., Sars., Par., Agrostema, Cycl. and others contain Saponin.

REFERENCES - Boericke.

***SAPONINUM

(Saponin)

PHARMACY - sapon. Saponinum. Saponin. A glucoside obtained from Saponaria officinalis. Trituration. Solution. Watery solution speedily decompose. **Historical dose:** All potencies.

CLINICAL - Acne. Bedwetting. Boils. Colic. Constipation. Diarrhea. Dysmenorrhea. Fevers. Headaches. Leucorrhea. Migraines. Menstrual disorders. Nausea. Photophobia. Rheumatism. Sleeplessness. Spleen, pain. Strabismus. Tongue, strawberry. Tonsillitis Vomiting.

HOMEOPATHIC - Sapon., a glucoside found in Quillay a, Yucca, Senega, Dioscorea and other plants, has had a somewhat extensive proving in potencies ranging from 1x to 30c, conducted by A. J. Hills.

One prover, who took the 30c, was for many years a sufferer from joint rheumatism, but had none of his usual pains during the proving and a great enlargement of the left knee was entirely removed.

Tired, indifferent. Migraine. **Pain in left temple, eye**, photophobia, hot stitches deep in eye. Fifth nerve disorders. Much pain before the menstrual flow, severe sore throat, worse right side tonsils swollen, worse in warm room. Sharp burning taste and violent sneezing.

Modalities - Better by stool, onset of menses. Better by cold, cold bathing. Better while sitting. Worse by moving, even motion of the eyes. Worse mental labor. Worse by warmth. Worse swallowing. Desire to vomit and defecate, worse when quiet.

COMMENTS - Two female provers had marked disturbance of the menstrual functions, especially pain and sufferings before the flow. Miliary eruption, colic and leucorrhea before the menses, pain better but not removed when the flow was established.

Severe sore throat, worse right side, was experienced by several provers, and Hills had so much swelling of the tonsils that he was obliged to abandon the proving. Bodily and mental depression. Exophthalmos and strabismus.

Roughness of mouth mucus membrane, raised papillae on palate and tongue. Strawberry tongue. Involuntary emission of urine when walking. Nausea and vomiting, colic and diarrhea, "nausea more in esophagus and throat, worse in a warm room."

This worse by warmth was met with in relation to many symptoms and is probably a keynote. At the same time there was much chilliness and lowered temperature is a characteristic feature.

RELATIONS - Compare: (1) Tough mucus, Kali-bi. (2) Onset of menses ameliorates, Lach. (3) Spleen pain, Cean. (4) Kidney pain, Santa. (5) Worse by movement, moving eyes, Bry. (6) Sleepy but cannot sleep, Bell. (7) Early waking, Bell., Nux-v. (8) Worse in warm room, Puls. (9) As if damp stockings on, Calc., Sanie. (10) Strawberry tongue, Frag., Bac. (11)

Involuntary emission of urine when walking, Ferr., Caust. (12) Seneg.

REFERENCES-Clarke.

***SARCOLACTICUM ACIDUM

(Sarcolactic Acid)

PHARMACY - sarcol-ac. Sarcolacticum acidum. Sarcolactic acid. Dextrum lacticum acidum. Isomer of lactic acid. **Historical dose:** All potencies.

CLINICAL - Addison's disease. **Chronic fatigue. Diabetes.** Dyspnea. Headache. **Influenza.** Lichen planus. Myasthenia. Myasthenia. Myotonia. Neurasthenia. Polyuria. **Prostration.** Psoriasis. **Rheumatism.** Raynaud's syndrome. **Rhinitis.** Tumors.

HOMEOPATHIC - Sarcol-ac. is formed in muscle tissue during muscle exhaustion. It differs from ordinary lactic acid in its relation to polarized light. It represents a much broader and more profoundly acting drug and its pathogenesis is quite dissimilar from the normal acid.

The proving was the work of W. Griggs of the Hering Laboratory, Philadelphia. The experimentation was carried out in 1940 on eleven people (nine men and two women), using the 4x, 6x, 15x, and 30x potencies.

Wm. B. Griggs found Sarcol-ac. of great value in the most violent form of **epidemic influenza, especially with violent and retching and greatest prostration**, when Ars. had failed. **Influenza with rhinitis.** Locally in the tuberculous ulceration of vocal cords.

Intra-muscular lactic acid, following prolonged exercise, which generates fatigue. This **chronic fatigue**, when pushed to an advanced stage, results in an almost paralyzing weakness with prostration. Spinal neurasthenia, muscular weakness, dyspnea with myocardial weakness.

Extreme fatigue, anxiety, prostration. Muscular cramping pains, aggravated by movement. Digestive intolerance. Dryness and itching of the skin. Morning sickness, **diabetes and rheumatism** offer a field for this

remedy. Troubles in the breasts.

MIND - Feeling of laziness, weakness. Dejection. Irritability, becomes easily annoyed by the smallest thing.

Abdomen - Sedative, palliative for gastrointestinal tumors.

Back - Tired feeling in back and neck and shoulders. Paralytic weakness. Cramping pains in the back and lumbar region, aggravated when standing.

Chest - Aortic pain and rapid pulse after exertion.

Head - Headache and vomiting, pain situated on the forehead and above the eyes, ameliorated by going to stool.

Heart - Cardiac rheumatism. Raynaud's syndrome.

Kidneys - Polyuria. Profuse nocturnal urination. Urine clear with traces of proteinuria.

Limbs - Psoric rheumatism. Rheumatoid arthritis. Fibrous rheumatism. Paresthesia, joint numbness and pains. Extreme weakness from climbing stairs. Stiffness of thigh and calves. Cramp in the calves. Arms feel as if no strength in them. Wrist tires easily from writing. Writer's cramp. Difficulty in brushing hair.

Lungs - Dyspnea, feeling of cardiac weakness, croupy cough, especially at night. Bronchitis. Dry, painful pleurisy.

Modalities - Worse at night. Worse from movement, from standing upright.

Nose - Coryza, throat dry and painful, swallowing impeded, alleviated by day, aggravated at night.

Rectum - Burning hemorrhoids. Stools acrid and expulsion of gases in profuse, easing the condition.

Skin - Intense general itching, improved by the cold. Keratotic eczema. Lichen planus. Psoriasis. Scleroderma (Graph.).

Sleep - Difficulty in going to sleep, sleep light when it comes. Wakes aching and exhausted.

Stomach - Heavy, painful feeling in the pit of the stomach. Digestive intolerance, especially of cold water. Acrid dyspepsia. Nausea. Uncontrollable vomiting even of water followed by extreme weakness.

Temperature - General chilliness with coldness of the limbs. Extreme chilliness in bed. The right hand does not become warm by external heat.

Throat - Constriction in pharynx. Sore throat with tightness in naso-pharynx. Tickling in throat.

COMMENTS - According to Dr. Kuhl, lactic acid has an anti-cancerous preventive action and he recommended a special diet with additional lacto-fermented products.

RELATIONS - Compare: (1) Eup-per. - cracking sensation with acute pains in the bones. (2) Bry. - aggravation by movement. (3) Am. - muscular bruises.

REFERENCES - Boericke. Julian.

***SAROTHAMNUS SCOPARIUS

(Scotch Broom)

PHARMACY - saroth. Sarothamnus scoparius. Scotch broom. Spartium scoparium. Cystisus scoparius. Genista scoparia. N. O. Legumi- nosae. Papilionoideae. Europe. The tincture is prepared from the flowers.

Historical dose: Tincture and all potencies.

CLINICAL - Acne rosacea. Albuminuria. Alopecia. Angina pectoris. Bacillary, dysentery. Cheyne-Stokes. Choroiditis. Collagen diseases. Diabetes insipidus. Emaciation. Glaucoma. Hay fever. **Heart, disorders.** Hodgkin's disease. **Hypertension.** Hypotension. Impetigo. Insomnia. Iritis. **Kidneys, disorders.** Leukemia. Nephritis. Ozaena. Palpitations. Parasites. Pityriasis. Sinusitis. Tobacco, heart. Worms.

HERBAL - Sarothamnus scoparium is ashubby tree, widespread throughout Europe. The twigs are used for the extraction of the official spar- tein, the flowers are rich in flavonoids, and the plant contains aromatic amines. Sparteine sulphate, an alkaloid found in scotch broom, causes a lowering of the systolic and diastolic pressures of the provers. It also lowers blood-pressure.

Depresses the heart by its poisonous action on the myocardium, and this, with the stimulating action of the drug upon the vagus, accounts for the lowered blood pressure and reduced pulse rate. It weakens the cardiac contraction. The total amount of urine is increased, diuretic properties, useful in dropsy.

HOMEOPATHIC - Hinsdale attempted the

first homeopathic proving in 1918, on three students. In 1897, Schier conducted a proving on six people, using the tincture and the infusion of the winter root, as well as the tincture and infusion of the fresh flowers.

Mezger undertook a true proving on twenty-seven provers of whom seven were women, at the Robert Bosch Hospital in 1951-52. He used the 4x, and 2x potencies as well as the mother tincture.

Saroth. is a **heart tonic**, affects the kidneys, cord, muscles and left side. Sparteine sulphate increases the strength of the heart, slows it and reduces the blood pressure. Hinsdale reported that it continues the good effects of Verat. and Dig. without any of the undesirable effects of either.

Irregular heart action from influenza or other infectious diseases. Arterial hypertension, arteriosclerosis. Relieves the congestion of kidneys enabling them to eliminate and relieve the distress upon the heart. Heavy aching.

Cheyne-Stokes respiration. Irregular heart following grip and various infections. Hypotension. Very useful in sustaining heart after stopping habit of morphine. Indicated when primarily the muscles of the heart and especially the nervous apparatus is affected. Acts rapidly and lasts three to four days. Does not disturb digestion.

Specific action on the kidneys, enabling them to eliminate and relieve the stress on the heart. Nephritis. Albuminuria.

Congestion of the thyroid gland, hands clammy, sleep disturbed, hot flushes, emaciation. Increase in the size of the thyroid. Extreme tiredness. Leukemia with eosinophil.

MIND - Irritable, loses his temper at the slightest thing. Irritability from trifles. Inner agitation, ideas escape him. Easily irritated and likely to explode. Excitement at night. Melancholic disposition is upset easily.

Apathetic without spirit, distracted. Absentminded. Everything is too much for him, difficulty in concentrating. Weakness of the senses and body. General inhibition, but especially erotic. Obsession with erotic thoughts. Sexual thoughts intrude and crowd around each other.

Abdomen - Stomach and bowels seem to be filled with stones or as a firm mass. Spasmodic entero-colitis. Flatulency with much mental depression. Sensation of abdominal repletion and stomach feels hollow. Passage through intestines accelerated with three to six evacuations a day. Bacillary dysentery. Intestinal tuberculosis. Intestinal parasites.

Back - Pain in the lumbar region.

Blood - Leukemia. Eosinophilia. Attacks of vasodilation at the limbs in the big toe and foot.

Breasts - Nodular congestion of the right breast (especially in men).

Chest - Angina pectoris. Constriction in the precordial region with sensation of tightness and anguish.

Constitutions - Tubercular, thyroidism or *nervous. Allergic, psoric constitutions.*

Ears - Monotonous rumbling and crackling in both ears, particularly intense between 7 p.m. and 8 p.m. Buzzing and other noises.

Eyes - Chronic glaucoma. Choroiditis. Iritis. Burning and stinging pains, especially behind the left eyeball. Pain on moving the eyes. When looking at an area of light, the brightness of the light and the rainbow colors of the halo seem more intense.

Face - Barber's itch.

Female - Excessive menses and long intervals between menses. Menses late and prolonged. Sex drive increased. Loss of libido, genital deficiency and evil-smelling sweating from the genital region.

Food - Appetite increases, constant need to eat. Persistent feeling of hunger, despite constant feeling of nausea. Loss of appetite with aversion to food and strangling feeling. Aversion to eggs and meat.

Head - Pulsating headaches, as if the skull would burst. Headache, as if wearing a helmet, going from the eyes towards the occiput (glaucoma). Congestion in the head. Flashes of heat in head.

Heart - Anxious oppression, radiating to left shoulder and neck. Hypotension. Tobacco heart. Angina pectoris. Irregular action, disturbed rhythm due to gas, feeble in

Sarothamnus scoparius nervous hysterical patients. Myocardial degeneration, failing compensation. Palpitations with congestion to head.

Kidneys - Drawing pains in the kidneys with colic pains. Increased urination. Very profuse, bright foaming urine, then burning in the pudendum. Hydronephrosis. Albuminuria. Diabetes insipidus. Frequent need to urinate at night, especially around 5 a.m. Bedwetting.

Limbs - All the muscles are painful, as if stiff. Shooting pains. Sudden pains, regularly in the sciatic nerve. Sciatica. Neuralgic pains, beginning on the right side, moving towards the left and diminishing on the right. Drawing joint pains. Chronic inflammation of the hip. Nocturnal pain in the hips and sacrum, left shoulder, left elbow and fingers of the right hand. Fidgets in the legs, which prevent him from falling asleep. Strumous edema of the legs. Deadness of right arm and fingers. Chilblains. Acrocyanosis.

Lungs - Asthma.

Male - Loss of libido, genital deficiency and evil-smelling sweating from the genital region.

Modalities - Better from cool air, rapid motion, passing flatus. Worse turning on left side.

Mouth - Vesicles on the lips and mouth.

Nose - Hay fever. Ozaena. Maxillary sinusitis. One-sided obstruction. Nostrils blocked alternately. Nasal secretions, streaked with blood and abrasion of the nasal orifices. Tickling in the nose with frequent sneezing. Small new growths on the nasal wall.

Rectum - Tenesmus, ameliorated by emission of wind. Colic, then bright acrid foaming stools followed by

burning in anus. Stools yellow, glairy with tenesmus. Stools hard like balls, covered with mucus and mixed with a frothy diarrhea. Alternating diarrhea and constipation. Hemorrhoids with splinter-like pain.

Skin - Allergic eruptions. Urticaria. Folliculitis. Boils. Pityriasis. Dysidrosis. Adenitis of the sweat glands. Impetigo. Acne rosacea. Small vesicles, extremely irritating. Eczematous eruption, both damp and dry. Infiltration and bluish coloring in the joints of the toes. Copious nocturnal sweating with a strong odor. Hair stiff, dandruff. Loss of hair in patches. Alopecia.

Sleep - Insomnia. Sleep long in coming with abundant ideas. Sleep light, easily woken by noise. Waking between 3 a.m. and 5 a.m. Dreams are pleasant and colorful. Dreams at times, about disappearances, murders, deaths. Unrefreshing sleep. On waking, feels tired and has the impression of not having slept enough. Great need for sleep, spends a large part of the day in bed.

Stomach - Ptosis of the stomach and intestines. Dyspepsia. Aggravation of stomachache by food.

Temperature - Sensitive to the cold, worse in the evening, feeling of head, sweating, numbness.

Throat - Irritation of the larynx with dry cough, coming from the throat. Tickling in the throat. Acute and chronic laryngitis.

COMMENTS - Weakness of the senses and body. Sensation of uneasiness and cold, which is worrying, only the head needs fresh air. Sensation of coldness, except for the head, which is better in fresh air.

Pain in the cardiac region and rhythmic anomalies. Pains and cardiac palpitations with tingling and feeling of soreness, especially when lying on the left side. Palpitations, especially at night and when resting, but also from slight exertion. Violent cardiac pulsations, which shake the whole body.

Pulse accelerated. Extra systole, notices the irregularity of the contractions. Left ventricular cardiac deficiency. Angina pectoris. Rhythmic anomaly. Basedow's heart. Aortitis.

Bubbling sensation in the head. Precordial constriction with anguish. Rheumatic pain, moving from right to left. Sudden pain in the left sciatic nerve around 10 p.m. Hollow sensation in the stomach and abdominal repletion. Sleep long in coming.

RELATIONS - Compare: (1) Kalm. - Pains along the nerves from the center to the periphery and from top to bottom. Sudden pain, which moves around. Palpitations, worse when lying on the left side. Pulse slow. (2) Spig. - Violent palpitations with oppression and anxiety. Must lie on the right side with the head high. (3) Iber. - Violent palpitations at the least exertion. Pulse full, irregular. Aggravated in a warm room and when lying on the left side.

REFERENCES - Boericke. Julian.

***SARRACENIA PURPUREA

(Pitcher Plant)

PHARMACY - sarr. *Sarracenia purpurea*. Pitcher plant. N. O. Sarraceniaceae. Grows in boggy places from Canada southward. Contains a very active proteolytic enzyme. Tincture of fresh plant. Tincture of root.

Historical dose: Tincture and all potencies.

CLINICAL - Back, pains. Bones, pains. Bor- borygmus. Constipation. Coxalgia. Diarrhea. Eruptions, scrofulous. Femur, pains. Herpes. Influenza. Lumbago. Psoriasis. Smallpox. Vision, disordered.

HERBAL - The use of the pitcherplant in smallpox is a discovery of the Native Americans of North America, the spotted appearance of the plant probably suggesting a resemblance to the disease.

HOMEOPATHIC - A proving by T. C. Duncan, Thomas and others brought out symptoms of fever, backache, headache and gastric disturbance. Hale collected much confirmatory evidence of its power to antidote the smallpox poison.

Sarr. is a remedy for variola. Congestion to head with irregular heart action. Sick headache, throbbing in various parts, especially in neck, shoulders and head, which feels full to bursting. Visual disorders. Chlorosis. Feels dull and heavy, sweats freely. Insensibility of right side, paralysis of hearing and smell. Debility, heavy, languid. Dull, heavy, sore feeling in all bones. Phlegmonous swelling with a rosy tint on various parts. Unrefreshed though slept soundly.

MIND - Melancholy. Great depression of spirits with frontal headache. Dullness of mind. Forgetful. Loss of memory with the headache. Difficult to concentration. Alternate apathy and intellectual activity. Anxious about everything.

Abdomen - Transient pains in bowels. Bloated about navel. Borborygmi and some pain in bowels with constipation, dry throat.

Back - Deep-seated pain in back. **Pains shooting in zigzag** course from lumbar region to middle of scapula.

Weakness between the shoulders. Warm sensation passed up back into head. Back weak, wants to lean on something. Pain and soreness in sacrum.

Chest - Pains in third and fourth ribs, with great apprehension of heart disease. Pain in angle of ribs. Soreness

of pectoralis major.

Ears - Ringing in ears. Sticking pains deep in right ear, transient but recurring often, same in left ear. Intense earache, fears he will lose his senses. Swelling of parotids.

Eyes - Eyes feel swollen and sore. Pain in orbits. Photophobia. Black objects move with the eye.

Face - Face flushed. Heat and redness of face. Face pale with heat and chill alternating. Erysipelatous swelling of face. Miliary eruption. Scaly herpes on face. Intense neuralgic pains from temples to jaws.

Female - Bloody discharge at other times menstrual period, as during menopause. Watery or milky leucorrhea. foul-smelling, with spasmodic pains in uterus. Pulsative pains in womb with swelling as if from a tumor or dropsy. Uterus swollen as if full of cysts. Cervix swollen, hot. Miliary eruption and heat in vulva.

Food - Hungry all the time, even after a meal. Appetite unusually active. Little appetite, but what is eaten agrees. Great desire to sleep during eating.

Head - Light feeling in head. Sensation as if he had received a knock on the head, drowsiness and staggering gait. Sensation as if head were split.

Heart - Congestion to chest, heavy feeling about heart. Feeling of congestion about head, with irregularity of heart's action.

Kidneys - Urine phosphatic, scanty, limpid.

Limbs - Limbs cold when still, as from poor circulation. Weakness of limbs with paralytic debility. Limbs weak, bruised pain in knees and hip joints. Pains and soreness in diaphyses of all long bones. Bones in arm pain.

Lungs - Paroxysms of suffocation and nosebleed. Tuberculosis and bronchial disorders. Cough with desire to vomit, and vomiting. Hemoptysis, thick cough, continual tickling in larynx and bronchi. Hard cough, shaking chest and bowels. Expectoration of mucus, tenacious, filamentary, with a bitter, putrid, oily taste.

Modalities - Better in fresh air, out of bed. Worse about midnight, in the morning, at 3 p.m. Worse rising from lying, trying to walk. Worse in stormy weather. Open air causes chilliness, hands and feet cold, causes head to be hot. sore and feel full. Cold air causes to chilliness and aggravates bone pains.

Mouth - Tongue is dry, coated brownish white. Mouth dry, lips and mouth parched. Toothache at night in bed, from least contact, and cold air.

Nose - Nosebleed nearly producing fainting. Nose swollen, red, with pressure and pulsation at root. Fluent coryza with cold chills and loss of smell. Foul-smelling, green, yellowish, or bloody discharges. Fetid smell.

Rectum - Rectum and anus swollen and inflamed. Much flatus. Much tenesmus, dysenteric diarrhea. Stool copious, dark, fetid, evacuated with great straining, morning. Stools very hard, covered with mucus, and dark. First part of stool natural, last diarrhea. Morning diarrhea, faint after stool.

Sensations - Heat in face as if on fire. Left eye as if congested. Swelling in uterus as if from a tumor or dropsy, as if full of cysts. As if bones of leg were too thick.

Skin - Eruptions similar to crusta lactea. Herpes. Psoriasis. Scrofulous eruptions. Smallpox, aborts the disease, arrests pustules.

Sleep - Sleepy in daytime, sleep disturbed by strange and frightful dreams. Awakes early in a fright with urging to urinate.

Stomach - Sleepy during meals. Empty, hungry feeling, can keep nothing in his stomach. Burning pains in stomach with palpitations and contraction. Pinching pain in stomach, it feels distended and torn. Copious, painful vomiting.

Temperature - Feverish and shaking chills, worse morning. General chills between shoulder blades. Chills, heat, and sweat, 5 p.m. Skin hot and dry. Hands hot, warm all over. Head and body warm. Perspires freely.

Throat - Throat dry, not better by tea or water.

Vertigo - Vertigo with cramps in neck, worse at night.

COMMENTS - Hering quoted several instances of Sarr. action. The first was a woman far advanced in pregnancy who was cured of smallpox with Sarr. 3c, 6c and 9c, delivery as accomplished during her convalescence, the infant bearing on its body numerous red blotches indicating that it had been affected with the disease.

A second case concerned an infant a few months old who was attacked with a grave form of smallpox with variolous angina so severe that it was with difficulty it could take the breast, the mother took Sarr. 3c, 6c and 9c and continued to nurse the infant, which promptly recovered, the mother not taking the disease.

In an epidemic occurring in the environs of Wavre, Sarr. was given to two thousand people living in the very middle of the disease and coming in constant intercourse with it, but all who took Sarr. escaped. During the same epidemic, two hundred cases were treated with Sarr. without a death.

Bilden, who used the 1 x tincture in an epidemic with success, concluded that San. is to smallpox what Gels, is to bilious fever.

Hale quoted Surgeon-Major C. G. Logie's (an allopath) account of his experience with San. (decoction probably)

in smallpox: "Four of the cases in my hospital have been severe confluent cases. They have throughout the disease all been perfectly sensible, have had excellent appetites, been free from pain and have never felt weak.

"The effects of this medicine, which I have carefully watched, seemed to arrest the development of the pustules, killing, as it were, the virus from within, thereby changing the character of the disease and doing away with pitting."

A number of eye symptoms appeared in the provings and Sarr. has cured disordered vision. A case of "phlyctenoid herpes" has also been reported cured by it. Extreme lassitude and pains in the bones were prominent in the provings. Weak feeling in the arms. Very sensitive to cold air.

Sarr. has the empty, hungry, sinking sensation of the anti-psorics. Dryness of mouth and throat. Faint after stool. Bladder and rectal tenesmus. Stool smells of musk. The right side was more affected than the left.

RELATIONS -Antidotedby: Podo. **Compare:** (1) In smallpox, Ant-t., Merc., Vac., Vario., Maland. (2) In bone pains, Eup-per.

REFERENCES - Boericke. Clarke.

***SARSAPARILLA OFFICINALIS

(Wild Licorice)

PHARMACY - sars. Sarsaparilla officinalis. Wild licorice. Smilax officinalis. The root of several species of Smilax. N. O. Smilacaceae, by some classed as a sub-order of the Liliaceae. Triturations and tincture of the dried rhizome. **Historical dose:** Tincture and all potencies.

CLINICAL - Asthma. Bedwetting. Bladder, disorders. **Blood, disorders.** Bones, disorders. Breast, scirrhus. Bright's disease. Constipation. **Cystitis.** Cracks, skin. Dysmenorrhea. Dyspepsia. **Dysuria. Emaciation.** Eruptions. Eyes, disorders. Faintness. Glands, enlarged. Gonorrhea. Gout. Gravel. Hands, chapped. Headaches. Hernia. Herpes. Hiccoughs. Intermittent fever. **Kidney, colic.** Kidney, disorders. Marasmus. Masturbation, effects. Melancholy. Menopause. Mercury, abuse. Mycosis. Nephritis. **Nipples, retracted.** Plica polonica. Rheumatism. Seborrhea. Spermatic cords, swelling. Spermatorrhea. **Stones.** Strangury. **Syphilis.** Ulcers. Warts.

HERBAL - The dried root or rhizome of sarsaparilla, as imported, is of the thickness of a goose quill, many feet in length, reddish brown, odorless, mucilaginous in taste, feebly bitter, and faintly acid.

It was historically reputed, according to Mile, to be a diaphoretic tonic, alterative. It was given in scrofula and secondary syphilis and the concomitants of these diseases such as ulcers, cutaneous eruptions, nodes indurated glands, decay, and necroses. Joint swellings and rheumatism often improve under a protracted course of it. Some think it a kind of restorative after an exhausting course of mercury.

HOMEOPATHIC - Hahnemann proved Sars., confirming many of the historical uses. Sars. is "**restorative**" after over-dosing with Merc., because it is a homeopathic antidote to Merc. It covers the syphilitic, sycotic and psoric constitutions.

Affinity for the genito-urinary organs, skin, bones, and lower right extremity. Marasmus, emaciation. Kidney colic. Marked urinary symptoms. Moist eruptions about the genitals or between the scrotum and thighs. Periosteal pains due to venereal disease. Retraction of nipples in those of cancerous inheritance or constitution.

Clears the complexion. Eruptions following hot weather and vaccinations, boils and eczema. Fig warts. Scratching causes itching to begin in another place, causes eruption on forehead to become humid.

Parts feel screwed together. Nightly bone pains. Pains shoot in different directions and are accompanied by depression and anxiety. As if salt were put upon the wound. Very sore, gouty nodes. Rheumatism.

MIND - Depression and anxiety from pain. Despondent, gloomy without any cause. Ill humored and taciturn. Sensitive, easily offended.

Abdomen - Rumbling with sensation of emptiness. Much flatus, rumbling and fermentation. Colic and backache at the same time, with diarrhea. Cholera infantum.

Back - Emaciation of neck. Backache with colic. Pain from small of back down the spermatic cord after emission.

Bladder - Bladder distended and tender. Tenesmus of bladder. Urging to urinate before menses. Pain at meatus, in urethra going back to abdomen. Jerking along the urethra. Can pass urine only when standing, **urine dribbles while sitting.** Urine passes in thin, feeble stream. Urine scanty, slimy, flaky, sandy, pus, **bloody.** Air passes from bladder during urination. Crusty urinary sediment. Sand on diaper. **Severe pain at conclusion of urination.**

Breasts - Sore, shriveled breasts. **Nipples retracted or cracked, small and shriveled.** Nipples retracted before menses.

Constitutions - Anti-syphilitic and anti- sycotic. Suited to children with faces like old people and enlarged abdomens, to thin, frail, shriveled, old looking persons. To dark-haired persons, and to lithic or sycotic diathesis.

Ears - Words reverberate in ear to the root of nose.

Eyes - Foggy vision, worse seminal emission. Itch like eruptions on eyelids.

Face - Yellow, wrinkled, old looking. **Eruptions on face and upper lip**, worse during menses.

Female - Moist eruption and soreness in right groin before menses. Menses late and scanty. Dysmenorrhea, with retracted nipples or sore breast.

Head - **Itching and humid eruption of forehead**. Moist eruption on scalp. Scalp sensitive. Crusta lactea beginning in face. Shooting pain from above right temporal region. **Pains from occiput to eyes** or to root of nose. As of a painful tight band around the head. Periosteal pains due to venereal disease. **Pains cause depression**.

Kidneys - **Pain from right kidney downward**. Kidney colic and painful urination, in infants. **Child screams before and while passing urine**. Gravel.

Limbs - Rheumatism, bone pains, worse at night. Rheumatic pains after gonorrhea (Thuj.). Paralytic, tearing pains. Affections of any kind in general in right lowerlimb. Trembling of hands and feet. Burning on sides of fingers and toes, under nails. Deep cracks on fingers and toes, worse sides. Cutting sensation under nails (Petr.). Tetter on hands, ulceration around ends of fingers (Psor.).

Male - Genitals moist and offensive. Itching on scrotum and perineum. Herpetic eruption on genitals. Syphilis, squamous eruption and bone pains. Intolerable stench on genitals. Bloody semen. Spermatic cord painful after emission, swollen after unrequited sexual excitement. Jerking along urethra.

Modalities - Better from uncovering neck and chest, warmth. Standing improves difficult urination. **Worse at the close of urination**. Worse from cold, wet, dampness, spring, at night. Worse from touch, pressure, tight clothes. Worse motion, sitting, going up and down stairs. Worse scratching, yawning. Worse after urinating, before menses, from suppressed gonorrhea.

Mouth - **Aphthae, salivation**. Offensive breath. Metallic taste, no thirst. White tongue. Pain in jaw, worse bending head back.

Nose - Stoppage for years. Swelling at the root of nose.

Rectum - Cholera infantum. Obstinate constipation with frequent want to urinate. Sand in stools.

Sensations - As if in a dream. Buzzing as if a large bell had been struck in head. As if he had been hit with a hammer on top of head. As of a great weight in head. As if breath were stopped by a spasm. Breastbone as if bruised. As if chest were too short. Limbs as if paralyzed. As if fingertips ulcerated or as if salt were put on a wound.

Skin - **Emaciated, shriveled, skin lies in folds** (Abrot., Sanie.). Dry, flabby skin. Skin hard, indurated. Cracks on hands and feet. New skin cracks and burns. Itching, scaly spots. Dry, itching rash from exposure to open air, **comes on in spring**, becomes crusty. Summer cutaneous disorders. Herpetic eruptions, ulcers. Irritating pus. Copper-colored eruptions. Ecchymoses in old age. Edema.

Sleep - Yawning. Complaints concomitant to yawning. Worse when yawning. Sleep early in evening. Nocturnal sleeplessness and frequent waking. Frightful dreams.

Stomach - Sensation of emptiness after a meal as while fasting, or else nausea or disgust when thinking of what has been eaten. Drinking water causes vomiting.

Temperature - Chill starts from region of bladder to back. Influenza.

COMMENTS - Sars. chiefly affects the urinary organs, genitals, rectum, skin and bones, right lower extremity, right lower side inner, and one-sided head. General "sinking" sensation of the great anti-psorics. General sensitiveness.

Acute and chronic bladder infections. Kidney stones, and the tendency to form kidney stones. Acute kidney stone colic (Berb.). Cystitis. Bladder infections in children, the child screams when they feel the urge because they anticipate the pain (Petros.).

Cannot pass urine freely except when standing, dribbles when sitting. Excessive pain in urethra that runs back into abdomen. Great pain and burning at end of urination (Equis.). Tenesmus. Urine is turbid, full of flakes and mucus or gravel, red or gray sand, or particulate matter. Urine with mucus or blood.

Gonorrhea, and the effect of suppressed gonorrhea. Herpes. Moist eruptions on scrotum and thighs. Spermatorrhea with swollen cords. The semen may be bloody. Offensive odor about genitals in both sexes.

"Moist eruption in right groin before menses." Painful and disordered menstruation. Nipples are soft, unexcitable, retracted, inverted. Cracked nipples (Cast-eq.), associated with cancer (Aster., Phyt.). Breast abscesses (Phyt.), with inverted nipples. Scirrhus of the breast. Helpful in patients of cancerous history with

retracted nipples.

Herpetic eruptions in all parts. Moist and dry tettery eruptions. Cracks. Itch-like eruptions, prone to appear in spring. Itching eruption on forehead during menses. Emaciation, causing the skin to be shriveled and lie in folds.

Pains shoot in different directions. Anxiety accompanies the pains, and can cause depression. Warmth generally relieves. Warm diet aggravates, cold diet relieves. Warm room aggravates vertigo. Washing, bread and yawning aggravates.

Grimmer wrote, "Ulcers, cutaneous eruptions, nodes indurated glands, decay, necroses, joint swellings and rheumatism often improve under a persistent course of this remedy."

One of Sars. popular uses was for "clearing the complexion." When it succeeds it is by virtue of its similarity, for Clarke saw a very extensive crop of blotches it produced in a young woman.

Farrington offered several indications for Sars., including sycotic eruptions with little spots scarcely raised above the skin, often scaling a little, but looking like the roseola of syphilis and itching intolerably, worse in spring.

Moist eruption on scalp, the pus from which causes the inflammation of any part it touches. Sycotic headache, beginning at back of head, coming forward and settling at root of nose with swelling of nose. Moist eruption about genitals or between the scrotum and thighs.

With Sars., Skinner cured many cases of retraction or flattening of the nipple in nursing women. On two occasions with high potencies of Sars. he enabled a woman to nurse her child when it was utterly hopeless.

RELATIONS - Antidoted by: Bell., Merc. **It antidotes:** Merc. **Compare:** (1) Berb., Lyc., Nat-m., Petr., Sass. (2) Saur. - Lizard's tail - irritation of kidneys, bladder, prostate and urinary passages. Painful and difficult urination, cystitis with strangury. (3) Cuc- c. - Watermelon, infusion of the seed acts promptly in painful urination with constriction and backache, relieves pain and stimulates flow. **Compatible:** Hep., All-c., Phos., Rhus-t., Sulph., Sep. **Complementary:** Merc., Sep.

REFERENCES - Boericke. Clarke. Grimmer. Murphy. Phatak.

***SASSAFRAS OFFICINALIS

PHARMACY - sass. Sassafras officinalis. N.O. Lauraceae. **Historical dose:** Tincture and all potencies.

HERBAL - Sassafras is a warm, aromatic stimulant, alterative, diaphoretic, and diuretic. Also used in diseases of the kidneys and bladder.

The oil is said to relieve the pain caused by menstrual obstructions, and pain following parturition, in doses of 5 to 10 drops on sugar, the same dose having been found useful in gleet and gonorrhea.

Dr. Shelby of Huntsville stated that it would both prevent and remove the injurious effects of tobacco. The mucilage of the pith (2 drachms to 1 pint of water) is used as a local application in acute ophthalmia, and is a demulcent drink in disorders of the chest, bowels, kidneys, and bladder.

Externally, as a rubefacient, in painful swellings, sprains, bruises, rheumatism, etc., and is said to check the progress of gangrene. A lotion of rose-water or distilled water, with sassafras pith, filtered after standing for four hours, is recommended for the eyes.

An infusion of the bark administered internally and applied externally is reputed an excellent treatment for rhus poisoning. Dr. King has also derived some benefit from its internal use in gonorrhea and obstinate gleet, 5 to 10 drops on sugar, 3 times a day.

REFERENCES - King. Murphy.

***SAURURUS CERNUUS

(Lizard's tail)

PHARMACY - saur. Saururus cernuus. Lizard's tail. N. O. Piperaceae. The entire plant including the root is macerated in twice its weight of alcohol. **Historical dose:** All potencies.

CLINICAL - Cystitis, Kidneys, disorders. Prostate, disorders.

HOMEOPATHIC - The Saur, plant is an indigenous perennial found in swampy localities in some parts of the United States. It has been and is still used in domestic practice for those conditions for which Dr. Phares commended it, including irritation and inflammation of the kidneys, bladder, prostate and urinary passages.

Phares considered it peculiarly adapted to all such cases if they were attended by strangury or painful difficult urination. He used the remedy both externally and internally and he found that the stomach was very tolerant of the rather heroic doses he prescribed.

RELATIONS - Compare: (1) Canth., Berb.

REFERENCES - Anshutz.

***SCAMMONIUM

(Scammony)

PHARMACY - scam. Scammonium. Scammony. Convolvulus scammonia. N. O. Con- volvulaceae. Triturations of the dried milky juice of the root. **Historical dose:** Tincture and all potencies.

CLINICAL - Diarrhea. Gastro-enteritis. **Vomiting.**

HOMEOPATHIC - Scam, is a drastic cathartic, producing copious watery evacuations and griping. Scam, must be compared with Jalap., another purging convolvulus. Sprengel recorded a case of fatal poisoning in an infant whose mother took a large quantity of Scam, and herself suffered no effects. Symptoms included **vomiting and copious green stools**, distention and sensitiveness of the abdomen, and finally death.

Abdomen - Distention and sensitiveness of abdomen. Violent pain and rapid succession of stools, leaving inactivity of lower intestines for several days.

Rectum - Copious green stools. Loose evacuation of feces with slight pain in stomach. Rapid succession of stools.

Stomach - Sudden vomiting. Pain in stomach with the bowel movements. Inflammation of mucus membrane attended with - loss of appetite and headache.

REFERENCES - Clarke.

***SCARLATININUM

(Scarlet Fever Nosode)

PHARMACY - scarl. Scarlatininum. Scarlet fever nosode. Nosodes. **Historical dose:** All potencies.

CLINICAL - Albuminuria. Nephritis. **Scarlet, fever.** Skin disorders. Throat, sore.

HOMEOPATHIC - Scarl. has been used, like other nosodes, for the prevention and cure of the disease from which it takes origin. Its well-known affinity for the skin, throat and kidneys suggests its applicability for disorders of those organs.

COMMENTS - Zinke reported a case in which a patient suffered from angina with hyperthermia. Profound asthenia and infectious look. Grave hyperthermia of tonsils swollen, pillars, the uvula dark red, the submaxillary glands swollen, painful. The patient had suffered from scarlatina treated by penicillin. Since that time the general condition was bad.

Zinke prescribed Scarl. 12x, twice 2 globules the first day. Immediate amelioration which the patient had not had till then. Repeated once 12 and 14 days after one dose of Scarl. 30x. The patient was cured.

RELATIONS - Bell, is the nearest analog and should be its antidote and the various Mercuries come next.

Compare: (1) Apis, Ars., Rhus-t., Morbill., Diph.

REFERENCES - Clarke.

***SCHINUS MOLLE

PHARMACY - schin. Schinus molle. **N. O.** Anacardiaceae. Tincture of leaves and berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Diarrhea. Esophagus, dryness. Flatulence. Heartburn. Liver, pain. Spinal cord, drawing. Vomiting.

HOMEOPATHIC - Allen reported that schinus is an evergreen shrub, native of Mexico and South America and frequently cultivated in Southern California under the names "Pepper tree" and "Chili pepper."

The Schin. symptoms were observed by Dr. P. W. Poulson on a young woman who ate a few berries after dinner, as well as on himself. He ate the leaves as well as the berries and experienced heartburn, griping in liver and "a kind of drawing sensation in the spinal cord and cerebellum." **Abdomen** - Rolling and flatulence in the bowels. Griping sensation in the liver.

Back - Drawing sensation as in the spinal cord and cerebellum.

Rectum - Painless diarrhea following painful vomiting. Profuse diarrhea continuing all night.

Stomach - Long continued vomiting, **"as if all the bowels would be emptied out."** Vomiting very painful, as the vomiting subsided diarrhea came on, the diarrhea being painless. Heartburn, dryness of esophagus.

RELATIONS - **Compare:** Anae., Rhus, Com.

REFERENCES - Clarke.

***SCIRRHIUM

(Cancer Nosode)

PHARMACY - scirr. Scirrhinum. Cancer nosode. Durum. Carcinominum. The nosode of scirrhous cancer. Trituration. **Historical dose:** All potencies.

CLINICAL - Breast, cancer. **Cancer.** Glands, enlarged. Hemorrhages. Tumors. Varicose veins. **Worms.**

HOMEOPATHIC - Burnett is the authority for this nosode. He proved it on himself and produced "a tremendous

sinking at the navel," which he regarded as a keynote for its use. Burnett particularly noted its usefulness on cases of breast tumors.

This cancer nosode corresponds to cancerous diathesis, cancer of the breast with enlarged glands. A valuable intercurrent remedy to be given during the course of the broad constitutional treatment, enhancing and complementing the action of the other indicated remedies.

Constitutions - Cancerous diathesis.

Modalities - Worse 5 p.m. to 6 p.m. Worse irregularly on through the night.

COMMENTS - A patient to whom Burnett had given Scirr. mentioned to him that it had caused the passage of an enormous number

of thread worms. On this hint, Burnett gave it with great success in many cases of this troublesome complaint. In inveterate cases where Cina and Teucr. have given little relief, Scirr. has wrought a great change for the better.

With Scirr., Burnett cured a man of hard glands which appeared on the left side of the neck after other glands had been removed by the patient's brother, a surgeon. Hemorrhages and varicose veins of legs and feet with purple points, have also been cured by Scirr.

RELATIONS - Compare: (1) Con., Care. (2) Worms, Cina, Teucr., Sulph., Sabal. (3) Sinking sensation, Sulph., Sep., Hell., Hydr. (4) Cancer, Con., Hydr., Phyt., Sang., Care., Cund., Ars.

REFERENCES - Clarke. Grimmer.

*****SCLERANTHUS**

(Bach Flower Essence)

PHARMACY - scler-b. Scleranthus. Scler- anthus annuus. The flowering sprigs are placed in a bowl of water and left in the sun for several hours. The water is strained subsequently and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Scler-b belongs to Bach's group **For Those who Suffer Uncertainty**, with Cer-b., Gent-b., Gors-b., Hom-b. and Wld-o-b.

States of indecisiveness and vacillation between options. The body is marked by a changeability of symptoms as well. Symptoms may alternate between mental, emotional and physical states.

Vacillating between feeling loved and rejected. Bipolar disorders, manic-depressive states, dissociative personality disorders, such as multiple personality disorder and in conversion disorder (Chic-b., Heath-b.). Hysterical neurosis when symptoms vacillate between extremes.

Quick changes in weight. Travel sickness due to disturbance in equilibrium. After head injuries (Horn-b., Must-b., Wld-o-b.), when the mind is imbalanced or over-stimulated, with a sense of chaos. Susceptibility to lung tuberculosis, other lung conditions.

Gives mental calm and restores the mind's ability to be in charge, to regain an overview (Elm-b.). State of prolonged indecisiveness, usually in regard to a vital decision, has been found to precede the onset of illness.

MIND - Inner uncertainty. Unable to come to a satisfying decision. Changes mind frequently. Preoccupied, over stimulated with internal arguments, disoriented and exasperated. Dread about possibly making the wrong choice paralyzes the mind.

Over stimulated by details and cares. Confusion. Inability to calm the mind. Feels overwhelmed, inadequate. Emotional instability, Capriciousness, mood swings. Too easily impressed, overreacts. Sudden interest and disinterest.

REFERENCES - Bach.

*****SCOLOPENRDA MORSITANS**

(Centipede)

PHARMACY - scol. Scolopendra morsitans. Centipede. Centipeda. The insect is triturated with sugar of milk in the usual way. Tincture of whole animals. **Historical dose:** All potencies.

CLINICAL - Angina pectoris. Backache. Constipation. Convulsions. Deafness. Dysmenorrhea. Gangrene. Headache. Hyperacidity. Leucorrhea. Malignant pustule. Nausea. Vertigo. Vomiting.

HOMEOPATHIC - When the centipede bites, it secretes a very active venom which contains cyanhydric acid and sulphuric acid. Swelling, pain inflammation and gangrene of the bitten part, often with appearance like malignant pustule. Vomiting and precordial anxiety.

In one fatal case the paroxysms of vomiting increased in intensity until the child, in a convulsive struggle, ceased to breathe. In the case of a man bitten in the arm by a centipede, reported in the Nashville Jour-

Scolopendra morsitans nal of Medicine, 1870, among the striking symptoms was no perspiration in the arm for three months.

Dr. Sherman of California reported the following symptoms as prominent in a woman bitten by a centipede: vertigo with blindness, worse in the morning, nausea and vomiting, unable to retain either food or liquid.

Terrible pain in back and loins, spasmodic and irregular, at times extending down the limbs. Pains returned every few days for three weeks, commencing in the head and going out at the toes. "Resembled labor pains as nearly as anything I ever saw."

MIND - Severe headache that makes him think that he has some brain tumor. Fear he is going to lose his mind. Delusion that he has been bewitched. Awakes with fear and a start. Loss of memory.

Abdomen - Tympanitis. Weakness in the epigastrium.

Chest - Pain in the chest on the right side. **Ears** - Severe pain in the ears. Itching in the ear. Abundant wax. Buzzing noise. Deafness.

Eyes - Burning in the eyes. Pupil is red.

Inflammation of the cornea. Sensation of gravel. Sensation as if the eye would burst. Sensation of pressure over the eyes. Weakness of vision.

Female - Irregular menstruation. Menses, the blood is black and coagulated. Dysmenorrhea. Leucorrhea, purulent discharge. Inflammation of the uterus and the vagina. Itching in the nipples.

Food - Anorexia.

Head - Headaches in forehead. Sensation as if the head would split open. Burning pain. Piercing sensation. Vertigo.

Heart - Precordial anxiety.

Limbs - Feet cold and aching. Cramps from the feet up to the calf. Arm greatly swollen. Erysipelatous blush extending half over arm. No perspiration on right arm.

Lungs - Respiration short. Dry cough. Mucus rales. Expectoration purulent.

Mouth - Burning of the tongue with diminution of the taste. Tongue is coated. Bad breath. Severe toothache, especially on the left side.

Nose - Sinusitis with severe pain in the forehead. Acute rhinitis. Itching and sneezing. Greenish discharge.

Rectum - Severe constipation. Stool is hard. Stool of a strong odor.

Skin - A large red spot, becoming black in the middle. Malignant pustules, associated with swelling of lymphatic glands. Violent itching, followed by violent pain in bitten part.

Stomach - Hyperacidity. Burning in the stomach. Sensation of fullness. Nausea. Vomiting of a pale yellow, glairy matter, continued at short intervals with increasing violence.

REFERENCES - Anshutz. Clarke.

***SCROPHULARIA NODOSA

(Knotted Figwort)

PHARMACY - scroph-n. Scrophularia nodosa. Knotted figwort. Scrophularia mary- landica. American variety introduced from Europe and Asia. N. O. Scrophulariaceae. Tincture of whole fresh plant. Apply locally to cancerous glands (Semp.). **Historical dose:** Tincture and all potencies.

CLINICAL - Adenoma. Appendicitis. Bedwetting. Breast, disorders. Breast, tumors. **Cancer.** Colic. Crusta lactea. Deafness. Dyspepsia. **Eczema.** Eyes, disorders. **Glands, enlarged. Hemorrhoids.** Hodgkin's disease. Liver, pains. **Lymphoma.** Nodosities. Palms, cramp. Pemphigus. Peritonitis. Rheumatism. Sigmoid flexure. Sleepiness. Stiff-neck. Ureter, pain.

HERBAL - The plants of the genus Scrophularia generally have an unpleasant smell. The generic name is derived from the supposed property of the roots to cure scrofula. The Treasury of Botany noted that a decoction of one of the common British species, S. nodosa, is sometimes used by farmers to cure the scab in swine.

HOMEOPATHIC - Scroph-n., according to Dr. Cooper of London, has an especial affinity for breast tissue.

Adenoma and cancer come within its curative range. **Enlarged glands.** Hodgkin's disease. Epithelioma. Nodosities in the breasts (Scirr.). Breast tumors.

Scrofulous swellings (Cist.). Threatened abscesses that show no sign of disappearing. Lupoid ulceration. Tubercular testis. **Eczema of the ear.** Vaginal **itching. Painful hemorrhoids.**

Pain in all flexor muscles. Cutting pains in the joints (Rhus-t.), but more intense and longer-lasting, worse by rest and in open air, better in warm room. Darting pain from knee to ankle joints, which feel stiff. Weakness, languor, wants to lie down.

MIND - Despondency, much troubled about the past and very apprehensive about the future. Miserable and sluggish feeling in mind when moving about.

Abdomen - Eczema around the navel. Peritonitis. Pain in sigmoid flexure. Pain in right hypochondrium, worse

deep inspiration or lying right side. Twistingpinching pain in umbilicus (left side). Dull, heavy, periodic pain worse when abdomen compressed, legs extended. Colic just below navel. Gripping below naval, in the side in afternoon, 7 a.m., after a slight vexation. As a local remedy for appendicitis.

Back - Pain in spinal column with slight opisthotonos. Stiff neck with pain and contraction of right sternomastoid muscle.

Chest - Oppression with tremulous movement as from much weeping. Constricted feeling, which causes uneasiness. Cramplike pain transversely across lower chest. Stitches in right chest, about 6th rib with shivering. Violent pinching stitches near right last true ribs, while walking during rest, seeming to be in liver.

Ears - Inflammation about auricle. Deep ulcerated auricle. Eczema around ear, behind right ear. Ringing in ears and sudden loss of hearing. Deafness in bull-necked boys. Deafness before and after menses, improving during the flow.

Eyes - Scrofulous keratitis. Sore eyeballs. Severe cutting pains in eyes, unable to move them, passed off with profuse sweat. Distressing photophobia (Con.). Black spots before eyes. On closing the eyes visions of objects. Pulsating stitches in right eyebrow. Blepharospasm.

Face - Pleasant warmth in cheeks. Recurrent periostitis of lower jaw in a syphilitic.

Female - Recurring metritis with painful hemorrhoids. Irritation, soreness and burning in vagina and anus.

Head - On rising, indescribable pain and fullness in head, especially occiput and vertex, causing congestion of conjunctive with puffiness, followed by nosebleed. Heaviness and distress in head, as after eating too much. Pain at exit of right facial nerve from hypo-mastoid foramen, darting to right eye. Headaches above the eyebrows while walking. Severe headache through temples, appearing every morning, extending to vertex and occiput. Severe, sharp pain in vertex, forehead and temples, dull and throbbing, returning periodically, worse resting, worse in open air, worse leaning forward, worse by study. Eczema behind ear.

Heart - Anguish in prœcordia, worse after food. Indescribable sensation in heart, with severe audible palpitations. Pulse full, regular.

Kidneys - Pinching and tearing as if in ureter, extending from anterior superior spine of ilium down to pubis. Increased secretion of urine with burning in urethra. Frequent, scanty emission of urine in afternoon. Bedwetting.

Limbs - Drawing rheumatic pain in all flexors of arms and legs. Tingling in limbs as from a blow on a nerve. Deep-seated cutting pain in all muscles of arms. Tingling or buzzing in arms and hands. Sticking and drawing in right palm from joints of fingers to middle of hand as far as carpal bones, muscular cramp of palms.

Liver - Cutting, *pains in liver* on pressure.

Lungs - Violent dyspnea, oppression of chest with trembling. On turning on either side, violent dyspnea, worse on right, with cutting in liver on pressure. Asthma in scrofulous patients. Pain about bifurcation of trachea. Pain in right lung, on taking a deep inspiration, which causes cough without expectoration. Cutting in upper left lung, worse breathing cold air.

Modalities - Better in warm room. Worse

lying on right side, in morning. Worse pressure, rest, after food. Worse deep breathing, breathing cold air and studying in cold air.

Mouth - Bitter taste. Accumulation of sweetish water in several parts of tongue. Sick, sticking taste just above pit of throat, frequently lasting an hour with sensation as if a soft substance (a plug of mucus) were lodged there. Increased saliva, then dry mouth. Teeth feel loose. Pain in carious teeth, worse upper jaw. Gums bleed freely.

Nose - Dry coryza.

Rectum - *Rectal pain*. Several stools daily with tenesmus. *Painful, bleeding, protruding hemorrhoids*.

Skin - Sallow. Surface burns when rubbed. Prickling, itching, worse back of hand, inside wrists and between fingers. Pemphigus gangrenous. Falling off of hair stopped by lotion of Scroph-n.

Skin - Irritating vesicles on inside of lip, loaded with spindle-celled epithelium.

Sleep - *Great drowsiness* in morning, with weariness and fullness in whole body. Sleep irresistible before and after a meal. Prolonged afternoon sleep.

Stomach - Appetite greatly increased at first, later nausea with weakness and oppression at epigastrium. Feeling as if he had missed his regular meal. Dyspepsia.

Temperature - Chilliness for several hours on moving about in cool air, after rising in morning, passing off with profuse sweat, followed by stupor and absence of all symptoms. Body feels dry and hot with burning sensation, followed by profuse sweat.

Throat - Thick, tenacious, offensive mucus in throat in forenoon. Rancid taste in throat with great weakness and stiffness in hollows of knees. Irritation of esophagus.

Vertigo - Dizziness, fullness and pressure in vertex. Vertigo in top of head when standing, even with severe

aching in supra-orbital region.

COMMENTS - Scroph-n. was proved by Franz, and later in America by W. H. Blakeley, who took from 10 to 60 drops of the tincture several times a day. Blakeley's proving showed pain in sigmoid flexure. Both Franz and Blakeley noted pains in the liver.

The most remarkable of Franz's Scroph-n. symptoms included excessive drowsiness in forenoon, in afternoon, and before and after eating. Sensation of a soft body in the gullet. Constriction of the chest. Oppression of chest with trembling as after much weeping.

A sickly, giddy feeling with a sense of weakness and sinking at pit of chest, too weak to speak, along with pain from forehead to back of head. Most of these symptoms were confirmed by Blakeley.

Gerard mentioned "hard kernels" and painful, swollen hemorrhoids as its indications.

Cooper saw Scroph-n., in the form of a poultice, relieve peritonitis affecting the lower abdomen. Colic from slight vexation occurred in Franz's proving.

Cooper gave Scroph-n. to a patient who had been poisoned by an Indian arrowpoison which produced inflammation and suppuration of the glands. Scroph-n. relieved a most painful condition of the rectum and purulent discharge that had kept up for years afterwards.

Cooper reduced strumous glands with it, cured deafness in a "bull-necked" patient, and cured a case of sycosis using Scroph-n. externally as well as giving it internally. ' "Nodosities in the breast" is another indication of Cooper's.

RELATIONS - Antidoted by: Bry. - chest symptoms. **Compare:** (1) Dig., Euphr., Grat.

(2) Pains in joints worse by rest, better in warm room, Rhus-t. (3) Sleepiness, Nux- m., Op., Lup. Lob-e., Ruta, Care., Con., Aster. **Followed well by:** Dig. in enlarged glands.

REFERENCES - Boericke. Clarke. Cooper. Murphy.

***SCUTELLARIA LATERIFOLIA

(Skullcap)

PHARMACY - scut. Scutellaria laterifolia. Skullcap. Mad-dog. N. O. Labiatae. Tincture of fresh plant.

Historical dose: Tincture and all potencies.

CLINICAL - Ardor, urine. Brain, irritation. Chorea. Delirium tremens. Dentition. **Diarrhea.** Exophthalmos. Flatulence. **Headache.** Hiccoughs. Hydrophobia. Hysteria, **insomnia.** Nervousness. Night-terrors. Sleeplessness. Tobacco-heart.

HERBAL - Hale, who introduced Scutellaria into homeopathy, noted that it is in the domestic practice of North America with the equivalent usage of valerian in Europe. "Its calming effects on the nervous system have been known ever since the settlement of New England."

HOMEOPATHIC-Scut. is a nervous sedative. **Nervous fear** or excitement predominates. **Chorea, twitching of muscles. Restlessness.** Chronic fatigue. Tired weak feeling. Uneasiness. Languor. Nervous weakness after influenza. Nervous irritation and spasms of children during dentition.

Cardiac irritability. Tobacco-heart. Like its relation, Lycopus, it caused weak and irregular action of the heart and protrusion of the eyes.

Hale used Scut. with success in sleeplessness, night-terrors, hysteria, nervous agitation from pain or exciting emotions, cerebral irritation of children from dentition or intestinal irritation.

MIND - Confusion of mind. **Fear of some calamity.** Apathy. **Irritability. Inability to study or fix the attention on one's work** (Aeth.).

Abdomen - Gas, fullness and distention, colicky pain and uneasiness.

Constitutions - Suited to persons of a nervo- bilious temperaments.

Eyes -Aching in eyeballs. Eyeballs painful to touch. Eyeballs feel too large, pressed outwards.

Face - Flushed face.

Head - Dull, frontal headache. Migraine, worse over right eye. Nervous sick headaches, worse noise, odor light, better night, rest. Explosive headaches of school teachers with frequent urination, headaches in front and base of brain.

Kidneys - Frequent urination but quantity small. **Quantity of urine diminished. Biliary salts increased.**

Limbs - Chorea. Twitchings of muscles, must be moving. Tremors. Sharp, stinging pains in upper limbs. Nightly restlessness. Weakness and aching.

Male - Seminal emissions and impotency, with fear of never being better.

Modalities - Better by sleep. The hemicrania is better moving about in open air. Headache worse from motion. Worse by overwork or over-exertion. Worse by work or excitement.

Mouth - Bad taste, sour, bitter.

Rectum - Diarrhea. Light colored. Stools preceded by colicky pain in abdomen.

Sleep - Restless, must move about. Disturbed sleep and frightful dreams. Night terrors. Sleep is *unrefreshing*.

Stomach - Poor appetite. **Sour belchings. Nausea.** Vomiting of sour ingesta, hiccough. pain and distress in stomach.

Throat - Sensation of lump in throat which could not be swallowed.

COMMENTS - Provings by G. W. Gordon and G. H. Royal gave the homeopathic data. Royal's provers took 3x and 30x. Gordon took repeated doses of 10 to 50 drops. Royal had this indication for Scut, given to him by a friend: "Nervo-bilious headache with the nervous symptoms uppermost and nothing the matter with her."

He related the case of Miss M., 32, who was the head of a large school, complained of being used up, unable to sleep or think. Pain in head almost constant, sometimes frontal, mostly at base of brain.

Whenever called upon to overdo herself, she could not sleep that night and then there is either a nervous explosion the following day or a nervous sick headache, either *being* followed by complete collapse.

This was in May. Pic-ac. and later Phos- ac., gave relief and in September the patient resumed work. Late in December there was another breakdown, and Stych-p. was given.

A week later after a very long and fatiguing day's work, Royal was summoned at 2 a.m. He found the patient screaming. Every few minutes she had to urinate and passed only a few drops. Stools frequent, loose, watery. Pulse irregular.

Scut, was given, ten drops every half-hour. Patient was better after the second dose, slept after the fourth. Since then she kept the medicine by her, but only took it when overworked. She never had another nerve explosion or headache. In this case there was "nothing the matter with her" i.e., no organic defect to which the sufferings could be attributed.

Hale quoted many eclectic writers who give various indications King mentioned depression of nervous and vital powers after long sickness, over-exercise, over-study, long-continued and exhausting labors. It controls nervous agitation. It was Burnett's chief remedy in the nervous debility after influenza.

Scudder mentioned chorea, delirium tremens and hydrophobia, as its popular name "Mad dog" suggests. Rafinesque cited cases of prevention of hydrophobia and Hale observed it produce in a patient taking it "Spasmodic or constrictive closing of jaws and a tightness of the muscles of the face."

A writer, quoted in the N. Y. Med. Times, said Scut, has the remarkable effect of calming fear in delirium tremens.

Paine added the indications subsultus tendinum following fevers in delirium tremens, epilepsy, catalepsy, and hysteria. Coe, who used Scutellarin, the concentrated preparation, mentioned sunstroke, tenesmus, tetanus, cramps.

Churton gave 60 drops of the tincture every two hours in a case of "severe and rapid hiccough" which chloroform, morphine and pilocarpine had failed to relieve permanently. After the eighth dose, the patient slept and the spasms gradually diminished and stopped for good by the fourth day.

RELATIONS - Compare: (1) Heart, Grave's disease. Lycps. (2) Nervous exhaustion, Cypr. according to Hale, acts more on brain, Scut, on

spinal cord. (3) Trismus, Nux-v. Hydrophobia, Agar., Fagus, Lach., Bell. (4) Overworked women, Mag-c.

REFERENCES - Boericke. Clarke.

***SECALE CORNUTUM

(Ergot of Rye)

PHARMACY - sec. Secale cornutum. Ergot of Rye. Spurred Rye. Claviceps purpurea. N. O. Fungi. Pyrenomycetae. The black, hornlike spur into which the grains of rye cereal are changed by the fungus Claviceps purpurea. Tincture of the fresh spurs collected just before harvest. **Historical dose:** Tincture and all potencies.

CLINICAL - After-pains. Blindness. Cataracts. Childbirth. Collapse. **Debility.** Delirium. Diarrhea. Emaciation. **Ergotism. Gangrene. Hemorrhages.** Labor, pains. **Leucorrhea. Locomotor, ataxia.** Lymphoid, tumors. Mania. Menstrual, colic. Metritis. **Miscarriage.** Myelitis. **Nosebleed.** Numbness. Nymphomania. Paraplegia. Petechia. Prostration. Puerperal, fever. Puerperal, mania. Raynaud's disease. Tetanus. Thrombosis. Varicose, veins. Varicose, ulcers.

HOMEOPATHIC - Rye and grasses are apt to be affected with the ergot disease in damp seasons and when grown on damp, ill-drained lands. If breeding cows are turned on pastures where infected grasses grow, they are very liable to drop their calves. Ergot has been known to hasten childbirth from remote times.

Secale's other actions have been, for the most part, learned from the terrible epidemics of "**ergotism**" which have occasionally devastated districts in which rye infected with ergot has been ground into flour and eaten by the population.

Death takes place in convulsions, from gangrene and consequent exhaustion, or from exhausting hemorrhages or discharges, as diarrhea. Many who escape immediate death are reduced to a cachectic state from which they never recover, are paralyzed, have limbs distorted and senses impaired. In general, the sufferer retains a clear intellect and a good, even abnormally good appetite to the last.

Sec. contracts the muscles of **blood vessels and the uterus**. It also decomposes the blood, producing hemorrhage which is thin, fetid, watery, black, oozing continuously. Small wounds bleed much. Mortification, **gangrene. Traumatic gangrene**, from application of leeches or mustard, better from cold. Lymphoid tumors. Useful for old people with shriveled skin or for thin, scrawny, old women. Produces contraction of the unstriated muscular fibers, hence a tight feeling throughout the body. Produces an anemic condition, with coldness, numbness, petechiae.

Restlessness, anxiety, extreme debility and prostration. Collapse. **Emaciation, though appetite and thirst may be excessive.** Discharges are dark, thin, foul and exhausting. Varicose veins. Thrombosis. Hinsdale noted that Sec. decreases the flow of pancreatic juice by raising the blood pressure.

Chronic, sharp, stinging neuralgic pains, which burn like fire, better application of heat. Tetanic spasms with full consciousness. Facial and abdominal muscles twitch. Twitchings, spasms with fingers spread apart. Gnawing and cramps with stiffness. Numbness. Insufferable tingling, crawling, better rubbing. Sensation of burning in the whole body or as of sparks falling on them or here and there like fire. Loss of power of voluntary motion.

Coldness, but does not want to be covered up. Symptoms are **better from cold**, the whole body is pervaded by a sense of great heat. Sensation of deadness in any part. Everything feels loose and open. Walking causes giddiness. The right side is predominantly affected.

MIND - Mania fear or depressed by fear. Anxiety with fear of death, restlessness and difficult breathing. Fear of death before menses. **Suspicious.** Unconsciousness during pregnancy or childbirth. Unconsciousness, with heavy sleep.

Excessive sadness, gradually changes to cheerfulness. Seems besides herself after miscarriage. Forgetful after sex. Weakness of mind after spasms or exhausting sex. Indifference to exposure of person. Impotence. Nymphomania during menses. Grasping at genitals during spasms.

Puerperal mania, exposes the body, tears at the genitals, inserts her finger into the vagina and scratches until it bleeds, all ideas of modesty lost. Sardonic laughing. Madness, inclination to bite or drown himself. Laughs, claps her hand over head, seems besides herself.

Delirium, abandons her relatives. Mocking at his relatives. Treats his relations contemptuously and sarcastically. Wants to fight. Rage, followed by continuous deep sleep.

Wandering talk and hallucinations. Raving delirium. Delusion that two sick people were in bed, one of whom got well and the other did not. Foolish behavior during spasms. Impulse to jump into river.

Abdomen - Excessively inflated and tight, wants uncovered. Empty feeling in hypogastrium or bearing down, must lie doubled up in bed. Twitching of abdominal muscles. Formation of large lumps and swelling in abdomen.

Back - Spinal irritation, tingling of lower limbs, can bear only slightest covering. Tingling in back, extending to fingers and toes. Formication and numbness. **Locomotor ataxia.** Myelitis. Pressure on affected portion causes pain there as well as through the chest.

Breasts - Suppression of milk with stinging in breasts. Breasts do not fill with milk properly.

Causations - Abortion, **miscarriage**, childbirth. Hemorrhages, wounds. Suppressions of tears, lochia, milk, or sweat.

Chest - Dyspnea and oppression with cramp in diaphragm. Boring pain in chest. Angina pectoris. Pains through chest, on pressing spine. Burning in lungs.

Constitutions - Hemorrhagic diathesis. Suited to irritable, plethoric subjects or to thin, scrawny, feeble emaciated women. To very old, decrepit persons. Women of very lax muscular tissue, everything seems loose and open, no action, flabby vessels.

Ears - Great difficulty in hearing, with roaring, humming in ears. Confused hearing or lost, after chorea. Sensitiveness of hearing, so that even the slightest sound re-echoed in her head.

Eyes - Dilated pupils, distortion and strabismus. Incipient cataract, senile, especially in women. Pustulous conjunctivitis. Suppuration of cornea. Diabetic retinitis. Ptosis. Catarrh. Suppressed tears. Sparks before the eyes. Double or triple vision. Blindness. **Eyes sunken and surrounded by blue rings.** Paralysis of upper lid from coal gas.

Face - **Spasmodic distortion**, or sunken. **Pale, pinched.** Wild look. Livid spots on face. Tingling, twitching, or cramps in face, which spread over the body. Lockjaw.

Female - Menstrual colic with coldness and intolerance of heat. Menses irregular, copious, dark, **continuous**

oozing of watery blood until next period. **Passive hemorrhages** in feeble, cachetic women. **Brownish offensive leucorrhea**. Burning pains in uterus. **Threatened miscarriage** about the third month (Sabin.). Never well since miscarriage or abortion. During labor no expulsive action, though everything is relaxed. Bearing down pain with coldness. Puerperal fever and putrid discharges. Contracted uterus, hourglass labor contractions. Septic placenta. **Severe after-pains**. Dark offensive, green lochia. Prolapsed uterus after forceps delivery. Tympanitis, coldness, suppressed urine. Vagina hot or cool. Weak uterus. Metritis. Gangrene of female organs.

Food - Unquenchable thirst. Thirst with dry mouth or burning. Unnatural, ravenous appetite. **Craves acids** and sour things. Averse to fat and meat.

Head - Passive, congestive headache, rises from back of head. Twisting of head to and fro. Head drawn back. Feels light or heavy, with tingling in legs. Falling of hair. Hair is dry and gray.

Heart - Precordial tenderness. Palpitations with contracted and intermittent pulse. Palpitations after sexual excess in males.

Kidneys - Paralysis of bladder. Retention with unsuccessful urging. Suppressed urine, pale, watery. Bloody urine, white, cheesy deposit. Discharge of black blood from bladder. Bedwetting in the elderly.

Limbs - Paralysis with distorted limbs, of lower limbs, of one side of one arm or one leg, with tingling, numbness and prickling. Paralysis after spasms. Paraplegia. Locomotor ataxia. Formication, pain and spasmodic movements. **Violent cramps**, in hands, legs, feet and cramps. **Icy coldness of limbs**. Numbness. Fingers and feet bluish, shriveled, **spread apart or bent backwards**. Cold, dry hands and feet in heavy smokers, with feeling of fuzziness in the fingers. **Varicose ulcers**, foul indolent. Trembling, staggering or shuffling gait, as if feet were dragged along. Violent pain in fingertips, tingling in toes. Toes drawn up.

Lungs - Heavy, anxious, obstructed breathing with moaning, sighs, sobs. Spitting of blood, with or without cough. Expectoration of blood during violent efforts to breathe.

Modalities - Better lying doubled up in bed. rocking, forcible stretching. Better cold applications, cold bathing. Better open air, uncovering, fanning. Better after vomiting. **Worse from heat, warmth, warm cover**. Worse touch, motion, exertion. Worse eating, smoking. Worse loss of fluids, sexual excess. Worse just before or during menses. Worse pregnancy and after miscarriage.

Mouth - Salivation, with fetid breath. Much acid fluid in mouth. Spitting of blood. Bloody or yellowish green foam at mouth. Dryness of mouth. Stuttering, indistinct speech. Speech difficult, slow and weak.

Nose - **Nosebleed**, oozing, dark blood, with great prostration in old people, alcoholics or young women.

Rectum - Cholera-like stools with coldness and cramps. Gushing offensive, painless, watery stools with collapse and great exhaustion. **Olive-green, thin, putrid, bloody stools with icy coldness** and intolerance of being covered. **Involuntary stools**, no sensation of passing feces. Anus feels loose and wide open.

Sensations - As if intoxicated while undressing. As of a solid plug in nose. Uterus as if burnt. As if contents of uterus would fall forward. As if soft air were creeping through back. As if sacrum would be forced out. As if something alive creeping under skin. As if limbs had been a long time in hot water. As if sparks of fire falling on different parts. As if mice creeping under skin. Fuzzy feeling in limbs.

Skin-Shriveled skin, numb, mottled, dusky- blue tinge. Skin cold, dry, wrinkled or bluish, worse over affected part. Raynaud's disease. Edema neonatorum. Twitchings or quivering in the skin. **Formication** under skin.

Burning sensation, better by cold, **wants parts uncovered**, though cold to touch. **Aversion to heat**. Petechiae. **Dry gangrene**, developing slowly. Slight wounds continue to bleed. Bloody blisters. Livid spots. Boils with green pus, matures slowly.

Sleep - Deep, lethargic, profound and long sleep. Insomnia with restlessness, fever, anxious dreams. **Insomnia of drug and liquor habits**.

Stomach - Burning in stomach and abdomen. Tympanites. Hiccough. Belching of bad odor. Empty retchings. Nausea, easy vomiting of blood and coffee-grounds fluid. Hematemesis.

Temperature - **Coldness**. Cold, dry skin, clammy sweat, excessive thirst. **Internal burning with icy coldness externally, yet averse to being covered**, worse abdomen. Heat as of sparks. Puerperal fever. Erysipelas. Cold or foul sweat destroys shoes.

Throat - Painful tingling, burning. Post diphtheria paralysis. Feeble voice inaudible, stammering. Voice hoarse and hollow. Painless aphonia in morning, as the day goes on he gets hoarse.

Tongue - Tongue dry, **cracked, blood like ink exudes**. Tongue coated thick, viscid, yellowish. Cold, livid. **Tingling of tip of tongue, which is stiff**. Tongue swollen, feels paralyzed. Stuttering as if tongue were paralyzed. Tongue clean, with dry, red tip.

Vertigo - Vertigo with stupefaction and heaviness of head. Reeling, inability to stand erect. Vertigo as from intoxication. Vertigo on slightest motion. Vertigo while sitting.

COMMENTS - Convulsive nervous symptoms. The body is at times rigid, at times alternating with relaxation. This is especially seen in the hands, which are either clenched or have the fingers spread widely apart (a keynote symptom).

The muscles of the face and abdomen twitch. Spasmodic twitchings of muscles in various parts (especially spreading of fingers), eyes sunk, features pinched, shriveled, dry, as though no moisture were left in the body. Anesthesia.

Cold to the touch, but cannot bear to be covered. Characteristic burning sensations, burning in all parts of the body as if sparks were falling on the patient. Worse from warmth and external heat. Characteristic numbness, tingling as if ants were crawling all over, better from rubbing.

Contraction and then dilatation of blood vessels. Vascular headaches, constriction. Migraines. The fingers turn bluish black. Hemorrhagic diathesis, persistent offensive bleeding. Hemorrhages with tingling.

Small wounds bleed persistently. Purpura. Hollow viscera and violent palpitations. Dry gangrene. Threatened amputation. Gangrene aggravated by heat, affected part feels cold. Shriveled, dry skin. Harsh and sallow complexion. Small and painful boils with green contents, mature very slowly, heal slowly and are very weakening. Exophthalmic goiter.

Spasmodic retching, the stomach is violently contracted. Incontinence or retention of urine. Involuntary diarrhea with wide-open anus. In cholera where the patient is cold, almost pulseless. Exhausting and offensive discharges. Loss of fluids, debility.

Threatened miscarriage, especially at the third month. Tendency to miscarriage. Prolonged, forcing pains, bearing-down, bearing down forwards (Sep. is bearing down downward). Irregular, too weak, feeble or ceasing labor pains (Puls., Caul.).

Everything seems loose and open, but no expulsive action. Used to hasten and promote delivery. Fainting. Hourglass contraction of the uterus. Too long, excessive after-pains. Postpartum hemorrhage of dark, oozing blood. Retained placenta. Suppression or non-appearance of the milk.

Menses are irregular, copious, dark, fluid, accompanied by labor-like pains in abdomen. There may be a continuous watery discharge of blood during the whole time between the periods.

Teste recorded the case of a woman, 50, fat, very soft flesh, who had flooding which nothing could stop. After several useless attempts, Teste gave large doses of Sec. with scarcely any effect. The patient asked for infinitesimal doses. At that time. Teste had no faith at all in infinitesimals, but he yielded to the patient's request and gave one drop of the 6c. Then the bleeding ceased immediately and permanently.

RELATIONS - Antidoted by: Camph., Op. **Compare:** (1) Ergot. (2) Pedi-can. - symptoms of locomotor ataxia, spinal irritation. (3) Brass. - dropsical swellings, scorbutic mouth, voracious appetite, tympanitis, dropping of nails, gangrene. (4) Cinnam., Colch., Ars., Aur-m. 2x - locomotor ataxia. (5) Agro. (6) vertigo, headache, difficult locomotion, burning sensation, Ust., Carb- v. (7) Pituin. - dilated os, little pain, no progress. **Compatible:** Chin., Ars., Aeon., Bell., Merc., Puls. Teste classes Sec. with Chin, in his Ferr. group.

***SEDUM ACRE

(Small Houseleek)

PHARMACY - sed-ac. Sedum acre. Small houseleek. Wall pepper. Crassulaceae. Tincture of the whole plant

Historical dose: Tincture and all potencies.

CLINICAL - Anal, fissures. **Fissures.** Hemorrhoids.

HOMEOPATHIC - Hemorrhoids. **Fissures.** Pains like those of anal fissures. Constricting pains, worse a few hours after stool.

RELATIONS - Compare: (1) Muc-u. - for the hemorrhoid diathesis. (2) Sed-t. - uterine hemorrhages, also for bowels and rectum, menorrhagia, at menopausal. (3) Sed-r. - Cancer, specific action on abdominal organs, pain, loss of strength.

REFERENCES - Boericke.

***SELENIUM

PHARMACY - sei. Selenium. The Element (Se, At. Wt. 79.5). Trituration. **Historical dose:** All potencies.

CLINICAL - Alcoholism. Bedwetting. Comedones. Constipation. Debility. Diabetes insipidus. Eczema, **scalp.Hair, loss.** Headache. Hoarseness. **Impotency.** Laryngitis, tubercular. Liver, disorders. Masturbation. Myasthenia. Prostatitis. **Prostatorrhoea.** Psoriasis. Scabies. Skin, disorders. **Spermatorrhoea.** Stammering. Sun, effects. Syphilis. Tea, effects.

HOMEOPATHIC - Selenium was discovered in 1818 by Berzelius and was named by him after the moon, because it is found associated with tellurium (Tellus, the earth). It is also found associated with sulphur. All

three belong to the same group of elements. Selenium is found either in its natural state or, more often, as a metallic selenide.

Colloidal selenium has been used as an injection for inoperable cancer. Pain, sleeplessness, ulceration and discharge are markedly diminished.

Marked effects on the **genito-urinary organs**. The larynx and liver are also affected. Often indicated in elderly men. especially for **prostration and sexual atony**. Bedwetting. Chronic urethritis. Diabetes insipidus.

Irritability after sex. **Sexual weakness**. Lascivious, but impotent. **Loss of sexual power** with sexual thoughts.

Prostate weakness with dribbling of urine. Escape of semen especially when straining at stool. Chronic gleet.

Great debility, worse heat. Debility after exhausting diseases, fevers. Patient becomes easily debilitated by heat or hot weather, a little mental or physical exertion makes him sleepy. Easy exhaustion, mental and physical in old age. Early senility.

Hemicrania. Neuritis and neuralgia of the head. Marked effects on the supra orbital nerves (left). Myasthenia. Chronic diseases of the bone-marrow. Emaciation of single parts, face, hands, thighs **etc.** **Pulsation in the whole body** especially in abdomen, worse eating. Cramps, then stiffness. Biting, here and there. Aversion to draft of air, warm cold or damp.

MIND - Dullness of mind. Difficult comprehension, concentration. Mental labor fatigues. Total unfitness for any kind of work. Forgetful in work, but dreams of what he has forgotten.

Great forgetfulness when awake with distinct recollection during half sleep. Fails to understand what he hears or reads. Lack of enthusiasm and of interest, indifference. Apathy. Talkative, when excited, stammers, pronounces some words incorrectly. Stutters.

Extreme sadness. Depression in the morning, aggravated in the evening. Despair, melancholy. Aversion to company of intimate friends. Dread of society. Reveries of a religious and melancholy character.

Easily irritated by noise, people and conversation. Easily antagonized. Irritability after sex. Confusion after emissions. **Dipsomania before menses**. Erotic thoughts with impotence. Lascivious thoughts. Becomes drunk easily.

Abdomen - Sensation of abdominal distention on the left side, ameliorated by pressure, aggravated by going to stool or by coughing. Left abdominal hyperesthesia, spreading towards the left kidney area. Violent shootings in spleen when walking. Pulsation all over the body especially in abdomen after eating which hinders sleep.

Back - The back becomes almost paralytic after a temporary illness. Paralytic pain in small of back, better lying on abdomen. Sensation of paralysis in loins. Pain as from lameness in small of back in morning. Hard swelling on back. Severe pain in the coccyx, aggravated when sitting, ameliorated by walking. Pain through left side of neck and down back of left leg.

Bones - Osteoporosis during menopause. Inflammation of the bones and cartilages in the young adult, attacking the knee, then the elbow and the hip. Bones fragile.

Breasts - More or less acute pain, prickling or dull aching in the left or right breast.

Causations - Bad effects from excess of tobacco or tea. Ill effects of debauchery, alcohol, sugar, salt, lemonade, loss of vital fluids, masturbation, sexual excess, over-study. Walking, exertion.

Chest - Constrictive or stinging pain behind the sternum and in the upper left thoracic region. Pains in right side, around under last ribs, especially on inspiration, extending to region of kidneys.

Constitutions - Suited to blondes and persons of light complexion.

Ears - Deafness from hardened wax. Ear stopped.

Eyes - Blurred vision, with difficult accommodation. Myopia. Pains deep in orbits. Discharge of a thick, yellow secretion, especially in the morning. Heavy, painful, burning, blood-shot with red marks on the eyelids. Spasmodic twitching of left eyeball. Itching vesicles on eyebrows and margins of lids. Styas. Blepharitis. Dacryocystitis. Falling off of eyebrows.

Face - Great emaciation of face and hands. Twitching in muscles of face. Greasy, shining skin of face. Upper lip cracked. Comedones.

Female - Rare menses. Menses early, scanty, painful. Menses painful on the first day. Awakened by pain of menses. Menses copious and dark. Menses delayed about eight days. Throbbing in abdomen during pregnancy, worse eating.

Food - Thirstless. Anorexia in morning with white-coated tongue. Hunger at night. Craves stimulants, brandy, tea etc. Desire for alcoholic drinks. Aversion to salty food. Worse from tea, sugar, salt, lemonade, wine. Sweetish, disagreeable taste after smoking.

Head - **Pain over left eye, worse walking in sun, strong odors and tea**. Nervous headaches. Headache from intellectual labor. Headache every afternoon. Headache after drinking lemonade, wine or tea.

Headache of alcoholics, headache after debauchery. Pain in the scalp as if hair were pulled out. Scalp feels

tense. Does not want hair touched. Hair falls out from eyebrows, whiskers and genitals.

Heart - Pulse very accelerated. Arterial pulsation, especially in the abdominal aorta, preventing him from sleeping. Pain in the heart region. Rhythmic anomalies. Syphilitic aortitis.

Kidneys - Frequent urination with urgent need to urinate. Sensation in the tip of urethra, as if a biting drop were forcing its way out. Red, itching irritation at the tip of the penis. Urine dark red, thick, scanty, gritty with deposits. **Dribbling of urine** after urination and after stool. Involuntary dribbling, when walking. Urination predominantly at night. Nocturnal bedwetting.

Limbs - Pains in all the limbs, as if caused by a chill. Legs feel weak, with fear of paralysis after typhus. Sudden left sciatic pain leaves soreness behind. Itching pimples on buttocks and thighs, near the scrotum. The knees crack when they are bent. Cramps in calves and soles. Flat ulcers on lower legs. Itching in feet, especially around ankles in evening. Blisters on toes. Emaciation of hands, of legs. Dry, scaly eruption on palms with itching, having syphilitic base. Psoriasis of palms. Painful hang-nails. Scabies-like pimples on hand. Tearing in hands at night with cracking in wrists. Itching at wrist in palms, itching vesicles on and between fingers. Miliaria in forearm.

Liver - Chronic liver affections. Pain in the liver, especially on taking an inspiration, extending to the kidney region with sensibility to external pressure. **Enlarged with fine rash over liver region.**

Lungs - Weak feeling in the chest. Frequent efforts to breathe deeply like sighing. Difficulty breathing when walking in open air. Respiration obstructed at night, when lying down, by pains. Dry hacking cough, worse in the morning. Hawking up of mucus and of small clots of blood. Hawks up clear mucus in the morning. Frequent necessity to clear the throat in singers. Tubercular laryngitis.

Male - Irritability after sex. **Loss of sexual power-with** lascivious fancies. Lascivious but impotent. **Increases desire, decreases ability.** Sexual weakness. On attempting sex, penis relaxes. Easy loss of semen during sex with feeble erection, but long continued voluptuous thrill during stools. Semen watery, odorless. Dribbling of semen during sleep. **Prostatitis**, prostatic adenoma. Oozing of prostatic fluid during sleep, while sitting, walking and at stool. **Hydrocele.** Chronic gleet. Bedwetting, chronic urethritis. Papillomas on the penis.

Modalities - Better after sunset. Better inhaling cool air, taking cold air or cold water into mouth. Worse loss of sleep, night watching, after sleep, rest. Worse in open air, draft, even if warm. Worse hot weather, sun and with the sun's increase. Headaches worse every afternoon. Worse singing, mental exertion. Worse by touch, pressure, motion. Worse after seminal losses, after stools. Worse wine, cinchona.

Mouth - Sweetish taste. Bitter taste in the mouth. Extreme dryness of the mouth. Tongue loaded with a thick white coating in morning. Burning at the tip of the tongue. Pain under root of tongue. Pain in the left molars, which spreads to all the teeth. Bleeding gums and ulcerations in the mouth. Stammering speech, articulates with great difficulty.

Neck - Glands of neck large and hard. Cramp in neck. Rigidity of muscles of neck and nape, which hinders head being turned.

Nose - Sinusitis. Atrophic rhinitis. Coryza, ending in diarrhea. Fluent coryza in evening. Yellow, thick, gelatinous mucus in nose. Full of thick glairy mucous. Complete chronic obstruction of nose. Nasal itching with the need to scratch the inside of the nose. Inclination to bore fingers in the nose. Sense of smell diminished at times. Smells a repulsive odor like garlic.

Rectum-Anal andrectal itching, especially towards evening. Constipation from rectal weakness with flatulence. Hard evacuations, followed by a discharge of mucus or of blood when passing the last portion of it. Stools large, hard, requiring a great effort, even a mechanical aid to expel them. Stools exceedingly difficult and threaten to tear anus from their immense size. Somewhat liquid feces with tenesmus. Filament like hair in feces.

Skin - Seborrhea, **comedones with an oily surface of the skin.** Oily. Frequent tingling in circumscribed parts of skin with great provocation to scratch. Red rash on region of liver. Miliary eruption. Vesicular eruption between fingers (Rhus- t., Anae.). Dry, scaly eruption in palms with itching. **Itching about the ankles** and folds of skin, between fingers. **Acne.** Prolonged oozing from parts which have been scratched. Flat ulcers. **Loss of hair** from the head, armpits, pubic region and eyebrows. Hair falls off head, whiskers and other parts. Alopecia.

Sleep - **Sleep prevented by pulsation in all vessels**, worse abdomen. Sleepless until midnight, awakens early and always same hour. Insomnia, following alcoholism, infectious diseases, heart diseases. Disposition to sleep early in evening with imperfect sleep and frequent waking during night. Jerks in body when going to sleep. Erotic dreams. Dreams of fire, murders, robbers, quarrels and unnatural cruelty. Waking early in morning and always at same hour.

Stomach - After eating, pulsation all over, especially abdomen. Pressure in stomach as if cramp would occur. Cramp in stomach. Belching. Hiccough and belchings after smflking. Inclination to vomit. Feels very sick after

sleep. Nausea, vertigo, thirsty for cold water, general weakness one hour after eating.

Teeth - Teeth covered with mucus. Toothache from tea. Toothache with feeling of coldness, better taking cold water and cold air into mouth. Toothache which compels use of toothpick until the blood comes. Boring in molars. The teeth become free of mucus, hard and smooth and crack when rubbed.

Temperature - Chilliness, followed by hot flushes. Constant alternation of heat and cold. Sweating from the armpits and genital region. Burning heat, extending over the skin. Perspiration from least exertion. Perspiration as soon as he sleeps, day or night. Tendency to profuse perspiration when walking or during an afternoon sleep. Perspiration on chest, genitals and under axilla, which leaves yellow or white spots on linen and stiffens it. External heat with burning in skin and only in single spots.

Throat - Chronic laryngitis. **Voice hoarse** and husky, as soon as he begins to sing, talk or read, affected by even cold. Voice rattles. Nodes on vocal cords. Incipient tubercular laryngitis. Throat dry, painful on waking, especially on the left side with extreme thirst. Cough in the morning, expectoration of a bloody mucus. Much clear, starchy mucus (Stann.). Laryngeal cough. Hawking and raising transparent lumps of mucus every morning.

Vertigo - Vertigo on lifting head, rising from a seat, raising himself in bed, moving about with nausea, vomiting. Faintness, worse for an hour after breakfast and dinner.

COMMENTS - The Sei. proving was conducted by Hering. In London, Raeside repeated a complete proving on sixteen provers and six controls in 1959-60, using the 6c, 12c, and 30c potencies.

A leading feature of Sei. is the weakness it causes, a weakness involving all parts of the body, easy fatigue from any labor, night watching, mental exertion and especially from hot weather. The hotter his body the weaker he is; strength rises as the sun sinks.

Irresistible desire to lie down and sleep, strength leaves him suddenly, especially in hot weather. Sluggishness, wants to sleep from sheer exhaustion and is worse after. Cannot bear any nervous drain, hence worse after sex or seminal emissions. Impotence. Debility after fevers, infectious diseases.

Great emaciation of face, hands, legs, feet, affected parts and single parts. Pulsation in whole body, especially in abdomen after eating. Very great aversion to a draft of air, either warm, cold or damp.

Irritability, headaches and other troubles following or worse by seminal emissions. Headaches are accompanied by profound melancholy and may be caused by indulgence in alcoholics or in tea, by hot weather, by over-study, and they are worse by strong odors. Headaches may be periodical and are frequently located above the left eye.

Chronic liver disorders. Sensitiveness of liver. Enlargement of liver with loss of appetite. In the morning, sharp stitching pain worse on any movement or pressure. "Fine rash over liver region."

Coryza ending in diarrhea. Hungry at night, longing for spirituous liquors, an almost irresistible maniacal desire. Aversion to salted food. Sensation as if a biting drop were forcing its way out of the urethra.

Constipation from weakness with impacted feces. Dribbling of semen after stool and after urination. Sufferings after seminal emissions mental confusion, headache, almost paralytic weakness of spine, involuntary escape of prostatic fluid.

Itching in folds of skin, as between fingers and about joints, especially the ankle-joint (Sulph.). The itching may occur in small spots and be accompanied by tingling (showing involvement of the nervous system).

Clarke frequently relieved "psoriasis palmaris" with Sei., which shows that it has a relation to syphilis. The scalp is affected with an eczematous eruption which oozes thin fluid after scratching. Hair falls off scalp and all parts of body.

Clarke cured with Sei. many cases of hoarseness, the special indications being hoarseness of singers, appearing as soon as they begin to sing or after long use of the voice with frequent necessity to clear the throat from accumulation of clear, starchy mucus. Scrofulous and incipient tubercular laryngitis have been cured with Sei.

RELATIONS -Antidoted by: Ign., Puls., Mur- ac. **Compare:** (1) Agn., Calad., Sulph., Tell., Ph-ac. (2) Arg-n. - Nervous imbalance with weakness, trembling, vertigo, ataxia. (3) Alum. - Paretic weakness, especially of the rectum and bladder. (4) Stann. - Nervous exhaustion and extreme weakness of the respiratory organs.

(5) Calad. - Depressive state as a result of excess of tobacco and sexual over-indulgence.

(6) Rauw. **Compatible after:** Calad., Nat-c., Staph., Ph-ac. (in sexual weakness). Itch checked by Merc, or Sulph. often requires Sei. **Incompatible:** Chin., wine.

*****SEMPERVIVUM TECTORUM**

(Houseleek)

PHARMACY - semp. Sempervivum tectorum. Houseleek. N. O. Crassulaceae. Tincture of fresh leaves. **Historical dose:** Tincture and all potencies.

CLINICAL - Bites, insects. Breast, cancer. **Cancer.** Hemorrhoids. Herpes zoster, Menopause. Menses, suppressed. Ringworm. Scirrhus. Tongue, indurations. **Tumors. Warts.** Wounds, poisoned.

HERBAL - In Hufeland's Journal, said Kallenbach, the fresh juice of Sempervivum tectorum is recommended in chronic aphthae in grown persons in causal relation to hemorrhoids, as well as in scirrhus indurations of the tongue.

In many countries, it has a popular reputation for indurations and sores on the tongue. Reichel of Staben, considered it curative in spasms of the uterus and in menstrual disturbances of all kinds. Cases of too exalted vascular activity in the sexual sphere. Also in ear troubles consequent on hardened earwax and in inflammatory exudations of the ear.

It is externally used for bites of insects, stings of bees and poisoned wounds, **warts.** Herpes zoster and **cancerous tumors.** Breast cancer. Ringworm. Hemorrhoids.

HOMEOPATHIC - Grimmer stated, "Sempervivum tectorum has cured many cases of induration and sores on the tongue, it also has definite action on the uterus and menstrual function in cancer constitutions, it could be thought of in cases of tongue cancer."

COMMENTS - Kallenbach was consulted by Mrs. S., 44, childless of sickly looks, for an affection of the tongue. For the previous six months menses had appeared only every eight to ten weeks and were accompanied with **Sempervivum tectorum** pains darting from small of back to uterus and vulva.

During the six months, she had stitching pain on the right rim of her tongue about 3/4 inch from the point, at which place after a few weeks, a swelling formed, the size of a small bean.

The swelling bled at times, and at night caused a burning sensation as of a small coal, disturbing sleep. Sour food caused pain. The swelling was not hard on the surface, but contained two hard nodules the size of lentils, one of which was denuded and bled on touch.

Three enlarged veins crossed the swelling and entered the tongue muscle behind it. She had been treated for over a month with Aur., Ars., Carb-v. in vain.

Kallenbach moistened the swelling with the fresh juice of Semp. thrice a day. Within three days it was smaller and folds appeared, the enlarged veins were contracted, formed thin, tense vessels crossing the swelling and seemingly tying it.

During the next three days, the patient applied the juice too energetically and Kallenbach found the surroundings in inflammatory irritation and very sensitive.

The applications was stopped and Semp. 2x was given internally. After a week's use the swelling had shriveled to one-third the size, and ten days later the menses, which had ceased altogether, reappeared and continued very profusely for five days.

The swelling shriveled to the size of a small pea, was firmer, harder, devoid of sensation and gave no further trouble. The menses continued regularly.

In another instance, Mrs. X., 27, a mother of a six month old healthy boy, formerly frequently afflicted with swelling of the glands, very sensitive to homeopathic remedies, complained of a pain under her tongue of ten days' duration, interfering with eating and speaking.

There was a bluish red elevation on under side of tongue the size of a split bean. It was hard, and along both sides there were enlarged veins. On the side a denuded spot exuded a whitish albuminous matter which could easily be wiped off.

Semp. 6c was given, one powder every forty-eight hours. On the second day, the swelling was less sensitive, and in a week, much smaller. Then the menses reappeared (first time since confinement) and in three weeks the whole swelling was gone, leaving only in its place a somewhat engorged vein.

Kallenbach treated with applications of 1x General V. B. who had nodules on the left rim of his tongue with swollen veins, the nodules disappeared and the sensitiveness was removed and the patient was so well that he refused to stay for the completion of the cure and failed to report.

Clarke's experience with Semp. was in domestic practice. For some child affections of the eyes he used rags moistened with "house leek and cream" (about equal parts of the juice and fresh cream) were applied and his recollection of it is that the application was exceedingly pleasant.

***SENECIO AUREUS

(Golden Ragwort)

PHARMACY - senec. Senecio aureus. Golden ragwort. Senecio gracilis. Squaw-weed. N. O. Compositae. North America, found in swamps. Tincture of fresh plant in flower. **Historical dose:** Tincture and all potencies.

CLINICAL -Amenorrhea. Ascites. Cirrhosis. Coryza. Cough. Dropsy. Dysmenorrhea. Dysuria. Fainting. Gleet. Gonorrhea. Hemorrhages. Homesickness. Hysteria. Kidney, coh. **Kidney, inflammation.** Leucorrhea. Lumbago. Mania. Menorrhagia. **Menstruation, disorders.** Nails, brittle. Nervousness. Neurasthenia. Nosebleeds. **Prostate, enlarged.** Prostatitis. Puerperal, mania. Sciatica. Spermatic cord, pain. Tuberculosis. Wounds.

HERBAL - The golden ragwort had a reputation in domestic and eclectic practice as a regulator of menstrual functions when Hale introduced it into homeopathic practice. Its action on the female organism was clinically verified.

Lyman Watkins said, "Females taking Senec. generally improve in health and strength, accumulate flesh, become lightheaded and cheerful. This may be due to some tonic influence."

HOMEOPATHIC - A. E. Small and others proved it and clinical additions have filled out the picture. Like many other Compositae, the Ragworts or Groundsels, have power over hemorrhagic conditions, whether arising from disease or from wounds.

Marked action on **female and urinary organs**, especially bladder. Lack of reaction in genito-urinary tract. Hemorrhagic tendency from other organs especially with suppressed or delayed menses. Dropsy after hemorrhage.

Debilitating or vicarious discharges. Backaches of congested kidneys. Early cirrhosis of liver. Tightness in nose, throat etc. Muscles draw into a knot. Nervous, pale, weak and sleepless hysterical women. Globus. Very sensitive to open air, tendency to catarrhs.

MIND - Despondent. Nervous and irritable, whining. Self centered. Elated and sad alternately. Inability to fix mind upon any one subject.

Abdomen - Pain about umbilical region, spreading in all directions better stools, bending double. Ascites from suppressed menses.

Back - Lumbar backache, as if to break with amenorrhea. Kidney disease.

Breasts - Burning in left nipple. Pains from ovaries to breasts.

Causations - Ill effects of suppressed or delayed menses, wounds, venesection.

Chest - Chest sore and raw.

Constitutions - Suited to women and little girls of nervous temperament.

Ears - Itching in Eustachian tube.

Eyes - Tears are irritating, causing itching.

Face - **Sharp, cutting pain** in left side. **Dryness** of fauces, throat and mouth.

Female - Before menses, inflammatory conditions of throat, chest and bladder after menstruation commences, these improve. Feels like the menses would **come. Menses, retarded**, suppressed with concomitant symptoms, dropsy, cough, backache. **Amenorrhea of young girls** with backache. Premature and too profuse menses (Calc., Erig.). Menorrhagia, a copious flow which continues until they become anemic. Anemic dysmenorrhea with urinary disturbances. Dysmenorrhea after abortion. Leucorrhea, thick, yellow, profuse, flows down thighs. Profuse flow of mucus from vagina from sexual excitation. Sexual irritation causing, itching, burning and swelling of labia. Pains from ovaries to breasts.

Food - Aversion to all food, especially sweets and coffee which she was very fond.

Head - **Wave-like dizziness** from occiput to sinciput. **Sharp pains over left eye and through the left temple.** Dull, stupefying headache. Headache precedes leucorrhea and irritation in bladder.

Kidneys - Kidney colic (Pareir., Oci., Berb.). Nephritis. **Great heat and constant urging**, with kidney pain. Irritable bladder of children with headache. Dysuria in women with dysmenorrhea or uterine displacements and in children with headache. Scanty, high-colored, **bloody** with much mucus sediment and **tenesmus**.

Limbs - Wandering rheumatic pains, periodical. Feet cold in bed. Brittle nails (Sil., Thuja.).

Lungs - Dyspnea on ascending (Calc.) Acute inflammatory conditions of upper respiratory tract. **Loose cough** with copious mucus expectoration and labored breathing. Cough tickling with blood- streaked sputum with suppressed menses. Dry teasing cough, stitching chest pains. Hoarseness.

Male - Lascivious dreams with involuntary emissions. **Prostate enlarged**, feels hard and swollen to touch. Dull, heavy pain in spermatic cord, extending to testicles.

Modalities - Colic is better bending forward and better by stool. Better at onset of menses, from menstruation. Worse puberty, sexual excitement. Worse dampness, cold open air. Worse at night, in afternoon. Worse sitting, must keep moving about.

Mouth - Twitching about mouth. Teeth very sensitive.

Nose - Burning in nostrils. Fullness of nasal passages, burning, **sneezing**, profuse flow. Tightness in nasal passage. Nosebleed or nasal catarrh take the place of menses when suppressed from any cause. Coryza with nosebleed.

Rectum - Thin, watery stool intermingled with hard lumps of feces (Ant-c.). ***Straining at stool, thin, dark, bloody with tenesmus.*** Stools, thin, watery, mingled with hard lumps of feces or thin, dark, bloody.

Sensations - As of a wave from occiput to sinciput. As if he would pitch forward. As of a ball rising from stomach to throat.

Skin - Dry.

Sleep - Nervousness and sleeplessness.

Sleepless women with uterine troubles and amenorrhea. Drowsy during day. Great drowsiness with unpleasant dreams. Many dreams, erotic.

Stomach - Sensation of a ball rising from stomach to throat. Sourbelchings. Nausea and vomiting of kidney origin.

Temperature - Hectic fever with anorexia.

Throat - Dry mouth, throat and fauces. Burning in pharynx, raw feeling in nasopharynx, must swallow, though painful.

Vertigo - Wave-like sensation of dizziness from occiput to sinciput.

COMMENTS - Hale noted that the country people call Senec. "Wild Valerian," and use it for nervousness, hysteria and low spirits, sleeplessness, especially in women.

He referred to this "globus" symptom of the pathogenesis: about the middle of the afternoon, sensation as if a ball was in the stomach. Rising up into the throat, lasting for about an hour. Sensation of tightness in the throat with a disposition to attempt to relieve it by swallowing.

Respiration as if greatly fatigued. Coughs and tuberculosis. "It is especially serviceable in mucus coughs." "In chronic coughs, catarrhal affections, hemoptysis incipient tuberculosis attended with troublesome cough, the result of obstructed menstruation."

Pains are radiating, shifting, lancinating. Symptoms alternate. "Dull, heavy pain in left spermatic cord, moving along cord to testicle. Prostatic gland enlarged, feels hard and swollen to touch. Lascivious dreams with pollutions."

Hemorrhagic function of menstruation. Menses, profuse and early, retarded or absent. Ailments from non-appearing menses. Nosebleed or nasal catarrh when menses are suppressed.

C. M. Foss reported the case of Miss L., 18, who had seen no period for fifteen months. She was chlorotic, had a dry, hacking cough with frequent pulse, made still more frequent by any excitement, headache, poor sleep, constipation. The abdomen had been gradually enlarging for six months and tapping had been decided upon when Senec. lx was given. All symptoms rapidly cleared up and the menses returned within a short time. Senec. lx also cured a girl, 21, who had suppression of urine in addition to chlorosis, ascites and suppressed menses.

S. H. Talcott reported an important case bearing on the same point. Mrs. X., 26, a mother of two children. Before confinement, the patient was haunted with the idea that her child would be stillborn.

Nine days after its birth, strong and healthy, she was admitted to hospital in a state of violent acute mania, which continued with high temperature, for three months, with great physical activity.

The mental state was that of a wild, violent and almost uncontrollable person. There was severe pain in the head, great nervous irritability and sleeplessness and hysterical weakness.

These symptoms, coupled with the fact (now first ascertained) that the lochia had ceased suddenly after confinement and the menses had not come on, led to the choice of Senec., which was given in drop doses of the 3x every two hours.

Steady improvement resulted and after a few weeks the patient was allowed out on parole. A relapse followed and Bell, did no good. Senec. was again given with good effect and complete recovery took place.

Talcott remarked that recovery from

puerperal mania seldom occurs unless menstruation is re-established. Talcott's case becomes more significant in the light of Cooper's observation of the brain action of Senec-j.

Hale reported the following case of dysmenorrhea: Mrs. X., mother of one child, had an miscarriage three years before and another (at the second month of pregnancy) four months before Hale saw her.

Since the last miscarriage she had suffered from painful menstruation, which had not been the case previously. Menses every three weeks, profuse, lasting eight or nine days, accompanied by much cutting pain in sacrum, hypogastrium and groins. Pale, weak, nervous, slight cough, generally at night.

Senec., 5 drops, was given three times a day until the next period, which came on at the twenty-ninth day and was perfectly normal in quantity and without pain.

Hale said he also found Senec. useful in advanced stages of gonorrhea and in prostatic disorders.

Small, who proved Senec., recorded the case of a woman, 30, who had been ill six weeks, the symptoms steadily increasing until the following picture was presented: face bloated, abdomen enlarged, feet edematous,

urine alternately profuse and watery or dark and scanty, frequent desire to urinate day and night. Senec., 10 drops, three times a day, cured quickly.

Small remarked that he has found Senec. useful in the dysuria of women and children when evidently of catarrhal origin and in dysuria with uterine displacement. Mucus sediment in the urine is an indication. But the benefits of Senec. are not confined to the female sex.

Small related the case of a man, 50, nervo- sanguine, subject of kidney inflammation affecting right kidney generally, causing intense pain, fever, prostration. On one occasion the pain was particularly intense and the bladder seemed implicated.

Every time he passed water he cried out in agony. Urine reddish, very hot and acrid. Bowels constipated. Dull headache, mouth and throat dry, chilly, fever and perspiration.

Senec., 20 drops in half a tumbler of water, a dessert spoonful every hour. There was relief from the first dose and the pain soon subsided entirely, leaving the patient freed from recurrence of the attacks.

RELATIONS - Compare: (1) Senec-j. - cerebrospinal irritation, rigid muscles, chiefly of neck and shoulders, also in cancer. (2) Alet., Caul., Sep. (3) Arn., Calen., Bell-p. (4) Uterine, chest and bladder symptoms, Puls., Helon. (5) Vicarious menstruation, Bry. Senec. has bloody expectoration. (6) Homesickness, Caps., Ph- ac. (7) Worse 4 p.m., Lyc. (8) Prostatitis and gonorrhea, Sabal., Solid., Puls., Pip-n., Cop., Thuj. (9) Nervousness, Coff., Cham., Valer., Ambr. (10) Fidgety feet, Caust., Zinc.

*****SENECIO JACOBEOEA**

(St. James Wort)

PHARMACY - senec-j. Senecio jacoboea. St. James' wort. Staggerwort. Ragwort. N. O. Compositae. Tincture of fresh *plant*. **Historical dose:** Tincture and all potencies.

CLINICAL - Arthritis. Brain, disorders. Cerebrospinal, irritation. Depression. Bedwetting. Headaches. Twitchings. Ulcers. '

HERBAL - This is the common ragwort, which, with its yellow flowers, is such a conspicuous feature of English roadsides and commons throughout the summer months. Gerarde mentioned "green wounds and old filthy ulcers" as benefited by it, also "old aches and pains in the arms, hips and legs."

HOMEOPATHIC - Cooper published several observations with Senec-j.

MIND - Depressed in body and mind, it seemed as if brain would not work. Talks incoherently.

Back - Constant rigidity of muscles, chiefly of neck and shoulders, especially at night, seems like a habit, but finds it most difficult to relax them, it seems to return involuntarily, so that the weight of the head is somehow held in this way and though touching the pillow does not rest on it.

Head - Exhaustion felt in back of head, after

Senecio jacoboea this felt lighter and better.

Kidneys - The bladder, which had been rather weak, became more so, the bedwetting continuing day and night for several days.

Limbs - Sometimes in the day the upper part of the legs gets a sort of ague fit of shaking.

Rectum - Bowels (before fairly regular) began acting in gushes, large stools occasionally, but in no way regular.

COMMENTS - Cooper gave a woman, 57 who had slight otorrhea of left ear with deafness on that side, a single dose of Senec-j. Immediately after, she began to feel depressed in mind and body, it seemed as if her brain would not work, for she talked incoherently. The bowels began acting in gushes and a bladder weakness was aggravated, so that there was bedwetting night and day for three days.

Another woman from a single dose of the same had "exhaustion in the back of the head."

Yet another woman, 51, had depression all her life, coming in fits. "Memory and everything goes," could not talk coherently to herself and dislikes conversation in others.

On July 1, 1900, she wrote, "Have suffered agony from awful feeling of torpor of brain, which has made it an effort to put words together, memory seemed to go, felt altogether insensible, bowels have been confined."

One dose of Senec-j. was given and removed the depression and relieved all the other symptoms. It also produced constant rigidity of muscles, chiefly of neck and shoulders, worse at night, it seems like a habit.

"And I try to relax them but find it most difficult, it to run back involuntarily, so that the weight of the head is somehow held in this way and though touching the pillow does not rest on it. Sometimes in the day the upper part of the legs gets a sort of ague fit of shaking."

On this Cooper remarked, "The exhaustion felt after a dose of Senec-j. in the back of the head in case 2 and the cropping up as a new

symptom of this strange-looking rigidity of the muscles of the neck, at night chiefly together with the shaking

of the legs in the daytime, points to incoordinated muscular action due to deranged cerebral control."

Cooper added the case of a man, 68, many years apoplectically inclined, who had constant twitchings at night with cascular deafness of right ear, loss of memory, pressure and heat of head. After a dose of Senec-j., he remained comfortable for three months and hearing improved.

Senec-j. has been used like Senec. in cases of menstrual irregularity.

REFERENCES - Clarke. Cooper.

***SENEGA OFFICINALIS

(Snake-wort)

PHARMACY - seneg. Senega officinalis. Snake-wort. Snake-root. Polygala senega. N. O. Polygalaceae. Tincture of powdered dried root. **Historical dose:** Tincture and all potencies.

CLINICAL - Allergies. Amblyopia. Ascites. Asthma. Bedwetting. Bladder, irritable. Blepharitis. Bronchitis. Chest disorders. Constipation. Cornea, opacity. Coughs. Esophagus, stricture. Facial paralysis. Hay fever. Headaches. Hydrothorax. Hypopion. Influenza. Iritis. Lungs disorders. Pleurisy. Pneumonia. **Snakebites**. Sneezing. Sprains. Styes. Throat, sore. Tuberculosis. Whooping cough.

HERBAL - Senega is one of the sources of Saponin. It has a nauseous taste and leaves a scraping sensation in the throat. It is in disorders of the chest, eyes and bladder that homeopaths have found it of most service and the extensive provings have supplied excellent data for prescribing.

Teste reported that Seneg. was introduced to medical practice by Dr. Tennant of Virginia, who was led to test its properties through hearing that the Native Americans used it as an antidote to snakebites as it relieved the symptoms of snakes' venom.

Tennant concluded that it might also relieve dyspnea, cough and hemoptysis arising from other causes and gave it with success in cases of pneumonia, pleurisy and hydrothorax.

Other old-school practitioners used it as an expectorant in chronic respiratory catarrh, acute tuberculosis, rheumatic fever, dropsies incipient cataract, croup. It is regarded as "a stimulant, diaphoretic and expectorant in chronic bronchitis."

HOMEOPATHIC - Seneg. affects the **mucus membranes** causing catarrhal symptoms especially of the respiratory tract and bladder. Eyes, serous membranes of chest, muscles and left side are also affected. Distinct eye symptoms of a paralytic type.

Great soreness of walls of chest. Pressure on chest as though lungs were forced back to spine. Pleurodynia. Lying on right side causes pain in chest. Motion causes pain under sternum. Motion of arms causes soreness of walls of chest. Circumscribed spots in chest left after inflammations.

Hoarseness. The throat is so dry and sensitive it hurts the patient to talk. Cough often ends in sneezing. Lying down causes tickling in larynx. Great accumulation of clear albuminous mucus, which is difficult to expel. Whooping cough in fat, chubby children, clear mucus like white of egg, difficult to raise, cough worse towards evening.

MIND - Anxiety with hasty respiration. Fear of suffocation. Inclined to quarrel. Readily takes offense. Suddenly remembers unimportant regions which he saw long ago.

Abdomen - Boring and digging pains in abdomen. Flatulent disorders with a sensation of a general bearing down towards hypogastrium.

Back - Bursting, distending pain in kidney region.

Causations - Ill effects of poisonous bites, sprains.

Chest - Chest feels oppressed on ascending. Pressure on chest as though lungs were forced back to spine. Pain in spots, as if bruised shifting pains on stooping. As of a crushing weight or weakness starts in chest. Sore from coughing, pressure, sneezing or moving arms. Burning in chest before or after coughing. Dry scraping in chest worse talking. Thorax feels too narrow. Exudation in pleura. Hydrothorax. Circumscribed spots in chest left after inflammations.

Constitutions - Suited to plethoric, phlegmatic persons, persons tending to obesity, fat persons of lax tissue, fat, chubby children and old persons. Suited to females of slender and tall, but having retained a good deal of sprightliness and moral power.

Ears - Aching in the ear when chewing.

Eyes - Oculomotor paralysis. Muscular asthenopia (Caust.). Opacities of the vitreous humor. Promotes the absorption of fragments. Staring. Lachrymation. Dryness with **sensation as if too large for orbits**. Eyeballs feel distended or like balls of ice. Sensation of trembling without visible trembling. Flickering, must wipe eyes frequently. Objects look shaded. Double vision, better only by bending head backward. Ptosis. Blepharitis, lids dry and crusty (Graph.).

Head - Dullness with pressure and weakness of eyes. Pain in temples. **Bursting pain** in forehead into eyes,

better cool open air.

Kidneys - Bursting, distending pain in kidney region. Scalding before and after urinating. Increased or decreased in amount. Greatly diminished urine, loaded with shreds and mucus. Urine, foamy, acrid with mucus shreds.

Lungs - Bronchial catarrh with **sore chest walls**, much mucus, sensation of oppression and weight of chest. Bursting pain in back on coughing. Hacking cough. **Cough often ends in a sneeze. Rattling in chest** (Ant-t.). Albuminous or blood-streaked sputum. **Exudations in pleura**. Pleuropneumonia. Hydrothorax (Merc-s.)

Difficult raising of tough, profuse mucus in the aged. Asthenic bronchitis of old people with chronic interstitial nephritis or chronic emphysema. Old asthmatics with congestive attacks.

Modalities - Better walking in open air, sweat, **bending head backwards**, walking in open air. Rest helps dry cough. Worse from inhaling air, open air, cold, wind, walking in open air. Worse in warm air, warm room. Worse going up stairs, stooping, bending forward. Worse by touch and pressure, rubbing. Worse rest, morning and night. Worse looking intently

at an object.

Mouth - Dry scraping in mouth, worse talking. Taste, metallic like urine.

Nose - Dry. Coryza, much watery mucus and sneezing. Sneezes, so often and so violently that the head grows dizzy and heavy. Nostrils feel peppery.

Sensations - Eyes, as if they were pressed out, as if eyeballs were being expanded, as if soap in eyes. As if red pepper throughout nostrils and air passages. Dyspnea as from stagnation in lungs. As if lungs pushed back to spine. As if chest would burst. As if chest too narrow. Wrist as if sprained. Joints as if lame.

Stomach - Loathing and nausea with inclination to vomit.

Throat - Catarrhal inflammation of throat and fauces with scraping hoarseness. Catarrh of larynx. Hawks viscid mucus in detached small clots. Burning and rawness. Sensation as if membrane had been abraded. Dry scraping, worse talking. Loss of voice. Voice unsteady, vocal cords partially paralyzed. Hurts to talk.

COMMENTS - The prover took from 40 to 6 drops of the tincture. Extreme tenderness. Worse bending head forward and worse from stooping. Generally left-sided.

Disordered digestive organs. Gnawing hunger and empty feeling. Irritability and catarrh of the urinary organs. Frequent urging, scalding in urethra before or after urination. Urine is loaded with mucus threads. Seneg. has been used as an emetic.

Pressure, dullness, heaviness in the head. Painful sensitiveness of hearing. Eye symptoms as an accompaniment of head symptoms. "Violent rush of blood to head when stooping, especially to eyeballs, where a painful pressure is experienced."

Pains, inflammation both of the exterior and interior of the eye and lids, and much disorder of vision. The eye troubles are worse when looking intently at an object and better bending head backwards.

The symptom in which it was first noticed was "When walking towards the setting sun he seemed to see another smaller sun hover below the other, assuming a somewhat oval shape when looking down, disappearing on

bending head backwards and on closing the eyes."

Guernsey outlined its action, "Where there is a great burning in the chest, either before or after coughing, profuse secretion of mucus. Dryness of inner parts which are usually moist, dry skin. General disorders of the windpipe, left side of chest particularly, right eye, lower eyelids."

Nash, who had only obtained success with low potencies of Seneg., cured many cases of "cough with great accumulation of mucus, which seems to fill the chest with much rattling, wheezing and difficult breathing."

A very stout elderly woman of tubercular family history had pneumonia of both bases, especially right. She had a very violent paroxysmal cough with ropy, difficult expectoration tinged with blood. Seneg. 30c quickly relieved a very dangerous condition when other remedies had failed.

Clinton Enos related a case of a very fat girl, age 10, with cold, damp feet and hands and sweating about the head, had spells of sneezing for two years, even since whooping cough.

Several sneezing spells a day lasting about half an hour. Sharp pains in chest and temples during the attacks. In nose a large quantity of mucus with stuffed-up feeling. One dose of Seneg. 200c removed the whole trouble in a week.

RELATIONS-Antidotedby: Bry., Am., Bell., Camph. **Compare:** (1) Sapin. - a derivative of Senega root. (2) In bronchial affections, Am-c. (3) Fat, plethoric people disposed to catarrhs, Calc. (4) Muscular asthenopia, loss of voice, paralysis (facial, etc.), Caust. (5) Laryngeal and pulmonary catarrh, Phos. (6) Bronchial catarrh, Spong. (7) Whooping cough, Coc-c., Kali-bi. (Seneg. clear phlegm, cough worse towards evening, Coc-c. clear phlegm worse morning, Kali-bi. yellow phlegm in morning). **Follows well:** Calc., Phos., Lyc., Sulph.

***SENNA

(Cassia Acutifolia)

PHARMACY - senn. Senna. Cassia acutifolia. Alexandrian senna. Cassia angustifolia. Cassia obovata. N. O. Leguminosae. Caes- alpinioideae. The leaflets of several species of Cassia. Trituration or tincture of the dried leaves. **Historical dose:** Tincmre and all potencies.

CLINICAL - **Acetonemia**. **Colic**. **Constipation**. Exhaustion. Fainting. **Flatulence**. Liver, disorders. Nitrogenous, waste. Oxaluria. Sleeplessness. Sneezing with heat.

HOMEOPATHIC - The symptoms are mostly derived from overdosings. Senn, is used as a laxative in ordinary practice.

Senn, has proved an excellent remedy in the colicofinfantwith incarcerated flatulence and sleeplessness.

Infantile colic, when the child seems to **be full of wind**. **Constipation** with colic and flatulence. Oxaluria with excess of urea increased specific gravity. Liver enlarged and tender.

Exhaustion. General swelling. Ebullitions of blood at night. "Repeated sneezing, which caused heat (especially of hands), exhaustion and panting breathing." **Acetonemia**, prostration, fainting. Unclean body swell.

Abdomen - Sensation of coldness in the abdomen with emptiness and uneasiness in the stomach. Accumulation of flatus with grumbling and fermentation in the abdomen and discharge of fetid flatus. Painful colic from incarcerated flatulence. **Colic**, especially in children, infants.

Face - Livid lips. Commissure of lips covered with small burning blisters.

Food - Anorexia. Thirst.

Head - Heaviness of the head when stooping, as if it were pressed down.

Kidneys - Specific gravity and density increased. Hyperazoturia, oxaluria, phos- phaturia and acetonuria.

Limbs - Heat in limbs, especially of hands.

Liver - Liver enlarged and tender.

Nose - Repeated sneezing, which caused heat, especially of hands, exhaustion and panting breathing.

Rectum - Burning in rectum with strangury of bladder. **Constipation** with colic and flatulence. Stools hard and dark with loss of appetite, coated tongue, bad taste and weakness. Diarrhea with straining and prolapsed rectum and sore anus in children. Liquid stools with griping pains. Loose evacuation with tenesmus and followed by a burning sensation in the anus .Yellowish fluid,with pinching pains before. Greenish mucus, never-get-done sensation (Merc.).

Sleep - Ebullition of blood, especially at night, disturbing the sleep. Sleeplessness with cries and tossing, especially in the case of infants.

Stomach - Empty or watery and fetid, risings. Loathing and nausea with inclination to vomit. Sinking immediately after meals.

COMMENTS - Farrington said it is one of the best remedies in the Materia Medica for "simple exhaustion with excess of nitrogenous waste." The exhaustion is exemplified in the sinking immediately after meals.

The pods caused an unclean smell from the body of a woman taking them for constipation. Acts as a tonic where the system is broken down, bowels constipated, muscular weakness and waste of nitrogenous materials.

***SEPIA SUCCUS

(Cuttlefish Ink)

PHARMACY - sep. Sepia succus. Cuttlefish ink. Sepia officinalis. N. O. Cephalopoda. Trituration of dried liquid contained in the ink-bag. **Historical dose:** All potencies.

CLINICAL - Abortion. Addison's disease. Alcohol, effects. **Amenorrhea**. Anal, problems. Appetite, depraved. Ascarides. Baldness. **Bedwetting**. **Bladder, weak**. Birth control pills. Cancer. **Childbirth**. Chloasma. Chorea. Condylomata. **Constipation**. Cortisone, effects. Cushing's disease. Cystitis. Depression. **Dysmenorrhea**. Dyspepsia. Eczema. Estrogen, effects. Eyes, disorders.

Face, yellow. Freckles. Gleet. Gonorrhea. Gravel. Hair, loss. Hemorrhoids. Herpes. **Hormonal, disorders**.

Hormonal, drugs. **Hot, flushes**. Hysterectomy. Hysteria. **Infertility**. Jaundice. Labor, pains. Leucorrhea.

Libido, low. Liver, spots. Liver, torpid. **Menopause**. **Menstruation, disorders**. Mental, disorders.

Miscarriages. **Morning sickness**. Neuralgias. Nose, inflamed. Nosebleed. Ovarian, disorders. Ozaena.

Phimosis. Pityriasis, versicolor. Pleurisy. **Pregnancy, disorders**. **Premenstrual, syndrome**. Pruritus.

Psoriasis. Ptosis. **Puberty, disorders**. Pylorus, induration. Quinsy. Rectal, disorders. Ringworm. Sacrum, pain. Sciatica. Seborrhea. **Sexual, disorders**. Smell, disorders. Spermatorrhea. Strokes. Stytes. Toothache.

Urinary, incontinence. **Uterus, disorders. Uterus, prolapsed. Vaginitis.** Varicose, veins. **Venous stasis.** Warts. Whooping cough.

HOMEOPATHIC - The inky juice of cuttlefish, known as Indian ink, is one of the remedies of the Chronic Diseases, and was proved by Goullon, Von Gersdorff, Gross, Hartlaub and Wahle.

It is preeminently a woman's remedy, although the first symptoms were found by Hahnemann accidentally proved by a male artist. It affects the generative organs of both sexes and a large number of the symptoms occurring in other organs have some relation thereto.

Sep. affects the venous circulation, especially of the **female pelvic organs** and of the digestive tract. It acts especially on the portal system with venous congestion. **Venous stasis**, ptosis of viscera. Violent ebullitions of blood with pulsation throughout the body. Pulsating headache in cerebellum. Bleedings.

Hormonal disorders. Affections in pregnant women. **Tendency to miscarriages. Bearing down in pelvic region. Uterus prolapsed.** Hot flashes at menopause with weakness and perspiration. Excess of sexual indulgence. Loss of vital fluids. Milky secretions.

Upward tendency of its symptoms. Symptoms settle in back, in ileo-cecal region, ovaries. Pains extend down to back, chills easily. Shuddering from pain. Burning pains in different parts of the body. Rheumatism, chronic cases. Fits of uneasiness and hysterical spasms. Spasms, clonic, tonic, cataleptic. Jerking in muscles. Fidgety. Sudden prostration. Easy fainting. **Feels cold**, even in warm room. Short walk fatigues much. Weariness and misery. Weakness, yellow complexion. Weak, empty, hollow feeling in epigastrium, chest, muscles, lumbar back, hips, knees etc. or sensation of fullness. As of a lump or something rolling over internally. **"Ball"** sensation in inner parts.

Females dragged down by overwork. Tubercular patient with chronic hepatic troubles and uterine reflexes. Children who take cold easily when the weather changes. Relaxed, plethoric females. Weak, potbellied mothers with yellow complexion. Diseased conditions which drag on, linger. Atrophy of children, their face like an old man. Warty growths. Big belly, dry flabby skin.

MIND - Mentally and physically worn-out patients. Industrious. Indisposed to mental labor. Repugnance to customary business, disgust of life. Makes mistakes while writing or reading. Poor memory. Confused, wants to run away. Confusion of mind when spoken to. Irresolution.

Anxious fear, over trifles. Anxiety during heat flushes. Constantly worries, frets and cries about her real or imaginary illness. Despair about recovery. **Cries when telling her symptoms.** Fear of poverty. Fear of thunderstorms. Nervous, so that she wants to hold on to something or she should scream.

Sense of helplessness. Feels unfortunate without cause. **Weeping, worse from consolation.** Breaks down in spells of weeping. Miserly. Dwells on past disagreeable occurrences.

Self-pity. Complaints and grievances. Sad and gloomy moods. Sad over her health and domestic affairs. Tendency to burst into tears. They have too much work to do. People are not kind to them. No one realizes how much suffering they have or with what difficulties they have to contend.

Depression, suicidal. Depression on awaking in morning. Depression related to pregnancy, menses or menopause. **Unhappy married life.** Great sadness during pregnancy or lactation. **Post-partum depression.** Emotional stillness.

Sexually shut down, no libido. Low sex drive since childbirth, hysterectomy, menopause. Aversion to the opposite sex. Women who dislike men and men who dislike women. **Loss of sex drive and sexual disorders.** Nausea, disgust at the thought of sex. Anxiety after sex. Dullness of mind after sex.

Aversion to those loved best, to family. Aversion to sympathy and company, yet dreads to be alone. Averse to occupation, house work. Indolent. Desires solitude, lies with closed eyes. Sits quietly and answers either with yes or no.

Irritable and easily offended. **Irritability**, alternating with indifference or sulks. Bad-tempered. Resents criticism of any kind. Spiteful. Lack of sympathy. **Angry, sensitive**, easily offended and miserable. Anger about past events. **Anger from contradiction.** Anger related to pregnancy, menses or menopause. Anger in morning.

Censorious. Takes pleasure in teasing others. Never seems happy unless annoying someone. Says and does strange things. Mania before menses. Sensitive to least **noise, odors. Excited during thunderstorms.** Cheerful when it thunders and with lightning. **Loves to dance.**

Abdomen - Brown spots on abdomen. Coldness in abdomen. Lax feeling in abdomen. Falling out or heavy, bearing down feeling in hypogastrium, better by holding it or crossing legs. Burning and shooting pains. Violent pain in umbilical region. Bloated abdomen after eating. Loud rumbling in abdomen after eating. **Flatulence** with headache. Colic and faintness before menses. Soreness and pain as if menses would appear. Pot-belly of mothers.

Back - Backache, causes nausea and faint feeling while standing. Sudden pain in back, as if struck by a

hammer, worse stooping, kneeling. Back pain, better belching, by pressing back against something hard. Heaviness in back in morning on waking. Burning pressure in spine. Spine tender to touch or pressure. Aching and dull pain in lumbar and sacral regions. Aching in inter-scapular or lumbar region, paralytic, wants to be pressed. **Weakness in small of back**, when walking, from uterine disease. **Weakness in lumbar region**. Lumbar region as if sprained. Throbbing in lumbar region. Cramps in buttocks when stretching out legs. Coldness between scapula, as from an icy hand. Collar feels tight.

Bladder - Chronic cystitis. **Prolapsed bladder**, must cross limbs to prevent protrusion or press against vulva. **Bladder weak**. Sensation as if bladder falls to side lain on. Cutting pain in bladder before urination. Involuntary urination, worse coughing, sneezing, laughing, hearing sudden noise, fright or inattention, especially in women. Slow urination with bearing down sensation above pubis. **Bedwetting** during first part of sleep.

Breasts - Swollen, sensitive breasts before menses. Sensation as if breasts were enlarged. Stitches, tender, burning pains. Induration of breasts. Scirrhus breasts. Burning pain in a fixed spot under right nipple. Nipples cracked across the crown. Nipples bleeding and sore, preceded by itching.

Causations - Ill effects of overwork, anger and vexation. Ill effects of blows, injury, over-lifting, falls. Ill effects of getting wet, laundry work, boiled milk, fat, pork, tobacco, alcohol. Snowy air. Puberty, hormone treatment, birth control pills, hysterectomy, pregnancy, childbirth, menopause. Sexual abuse.

Chest - Oppression of chest, morning and evening. Oppression when walking or from slightest exertion. Pain in sides of chest, when inspiring or coughing. Sensation of emptiness in chest. Chest symptoms better by pressure of hand. Stitches in chest when coughing. Fungus hematodes in clavicular region, bleeding profusely. Boils in axilla. Swelling and suppuration of axillary glands. Humid tetter in axilla. Brown spots on chest.

Constitutions - Hering said it was suited to young persons of both sexes of nervous and delicate constitution, who are disposed to sexual excitement or worn out by sexual excess. Women during pregnancy, in childbed, and while nursing. Children who take cold readily when the weather changes. Scrofulous persons. Men who have been addicted to drinking and sexual excesses. Pot-bellied mothers, yellow saddle across nose, irritable, faint from least exertion, leuco-phlegmatic constitutions. Bahr indicated it for sanguine, excitable temperaments inclined to congestions.

Coughs - Cough in morning with profuse expectoration, tasting salty (Phos., Ambr.). Rotten-egg taste with coughing. Cough excited by tickling in larynx or chest. Cough better eating. Cough with nausea and bitter vomiting. Dry, fatiguing cough with foul sputum, as if coming from stomach, worse rapid change of temperature. Spasmodic cough, evening and at night in bed, preventing sleep. Child cries each time it coughs at night. Whooping cough that drags on.

Ears - Chronic otalgia. Discharge, thick yellow pus offensive. Discharge of thin matter. Itching in affected ear. Pain as if from sub-cutaneous ulceration. Dragging or stitching pain in ears. Swelling of and eruptions on external ear. Herpes, behind ears, on lobe of ears, on nape of neck. Tetter on lobes of ear and behind ears.

Oversensitive to noise, especially music. Loud sounds and humming in ears. Sudden deafness, as if caused by the plug in ears.

Eyes - Eyes feel tired and look injected. Conjunctivitis. Muscular asthenopia. Asthenic inflammations with uterine trouble. Burning in eyes with lachrymation. Aching at back of eyeballs. Eyes feel sore as if bruised. Falling out feeling in eyes during headache. Pressure as from sand in eyes. Arrests cataract in women. Photophobia. Cannot tolerate reflected light. Aggravation of eye troubles morning and evening. Agglutination of eyelids. Epithelioma of eyelids. Eyelids red, itching. Styes. **Ptosis. Drooping eyelids**. Eyelids as if too heavy to open. Venous congestion of the fundus. Tarsal tumors. Tarsi, red, itching cancer.

Face - Old, wrinkled skin with spots. Black pores. Face changes color. **Chloasma**. Dark circles under eyes. **Yellowish-brown saddle across nose**. Yellow-brownish discoloration on nose and cheeks. Yellow blotches, pale or sallow, yellow about mouth. Rosacea. Acne, worse before menses. Warts. Swollen, cracked lower lip. Cancer of the lips, epithelioma. Swelling of submaxillary glands. Numbness of malar bones. Jerking of facial muscles while talking. Facial neuralgia during pregnancy.

Female - Hormonal disorders. **Never well since puberty, childbirth, after weaning or hormone pills**. Amenorrhea. **Menses irregular, early and profuse. Menses too late and scanty**. Menses cause faintness, chilliness and shuddering. Mania from profuse menses. Dysmenorrhea in women with scanty menses. Dryness of vagina and vulva after menses. Leucorrhea, yellow, greenish, milky in large lumps, with much itching, instead of menses. Leucorrhea, foul, gonorrheal with stitches up in vagina from uterus to navel. Leucorrhea in little girls. Pelvic organs relaxed. Weak uterus. Dragging or **bearing down sensation as if everything would escape through the vagina** (Bell., Lil-t., Nat-c.), must cross limbs to prevent protrusion or press against vulva. **Prolapsed uterus or vagina**. Sub-involution. Violent stitches upward in the vagina from uterus to umbilicus. Gripping, burning or sticking in uterus. Sharp clutching pains. Labia swollen, abscessed. Severe itching in vulva causing abortion. **Tendency to miscarriage** from the fifth to the seventh month. Labor-like, during seventh

month of pregnancy. **Morning sickness.** Motion of fetus is intolerable. Retained placenta after abortion. Offensive, excoriating lochia. **Infertility.** Sterility. **Aversion to sex,** worse since childbirth. **Low sex drive.** Nausea and irritability on thought of sex. Sexual parts tender to touch. Sex painful

Sepia succus from dryness of vagina. Bleeding after sex. Exhaustion after sex. **Sudden flushes of heat** with weakness and sweat during menopause. Metrorrhagia at the time of menopause.

Food - Voracious appetite or no appetite. Sudden cravings and sudden satiety. Everything tastes too salty (Carb-v.. Chin.). **Desires chocolate,** sweets, wine, **vinegar,** acids and pickles. Great sensitiveness to smell of cooking food. **Nausea at thought or smell of food.** Aversion to all food during headache, to bread and milk during pregnancy. Aversion to fat, meat, milk. Aggravated from acids and fats, loathes fats. **Worse from boiled milk.** Great nervous irritability from coffee. Water brash after eating or drinking. Thirst during headache.

Head - Headache alternating sides of occiput. Headache worse lying on painful side, indoors. Headache better after meals. Headache with **terrible shocks** at menstrual time, with scanty flow, or before menses. Weekly or monthly headaches. Headache worse from shopping, mental labor, better after meals. Headache with nausea and vomiting. Smell of food repulsive during headache. Jaundice with headache. Hair falls out after chronic headache. Shooting pains. Screams with pain. Stinging pain within out or upwards. Stinging pain over left eye. Heavy feeling on vertex. Cold sensation on vertex. Involuntary jerking of head backwards and forwards, with open fontanelles in children. Prodromal symptoms of a stroke. Hemispheres. **Hair falls out at menopause.** Root of hair sensitive to combing. Pimples on forehead along the margins of hair.

Heart - Irregular circulation, seems to stagnate. **Venous stasis.** Congestion of blood vessels. Dropsy in consequence of valvular insufficiency. General pulsations. Eruptions at night. Tremulous feeling with flushes. Beating in all arteries. Violent, intermittent palpitations. Palpitations with anxiety. Nervous palpitations, better walking fast, worse lying on left side. Visible palpitations, ascends to occiput. Palpitations before scanty menses. Wakes

up with violent beating of heart. An occasional hard thump of the heart. Sensation as if heart stood still. Pulse full and quick during night and then intermitting. Pulse slow during day. Pulse accelerated by motion or being angry.

Kidneys - Weak kidneys. Kidney pain and backache. Nephritis. Feeble stream, urine is **thick, foul,** white, milky, bloody. Gritty, red, **adhesive, sandy sediment** in urine.

Limbs - **Poor circulation.** Venous stasis. Heaviness and a bruised feeling. **Restlessness in all limbs,** twitching and jerks night and day. Sensation of running, as from a mouse in lower limbs. Tension in limbs as if they were too short. Lower limbs lame and stiff. Short walk fatigues. **Limbs go to sleep easily.** Coldness of legs, knees, feet, and heels. **Coldness of limbs during fever.** Hot hands with cold feet or vice versa. Cold hands in warm room. Rheumatic pains. Stiffness of joints. Weakness of joints, especially the knees. Swelling of veins of affected limbs. Sciatica, better during pregnancy, chronic, localizing in heels. Ulcers on small joints, fingers, toes. Thick crusts on elbows. Hands sweaty, purple. Skin of palms peels off. Crippled nails.

Liver - Aching, throbbing, shooting, stitching, pressing in hepatic region. **Liver sore and painful, relieved by lying on right side.** Pain in the region of liver or gallbladder, worse stooping.

Lungs - Dyspnea, worse after sleep, better rapid motion. Dyspnea better dancing or walking rapidly. Dyspnea in dry air, fog, east and north wind. Loss of breath, with palpitation, after mental emotions. Suffocation in stormy weather. Asthma, wheezing expiration. Spasmodic asthma. Suddenly aroused from a deep sleep by asthma. Neglected pneumonia. Pleuritis. Copious, very offensive expectoration. Expectoration of blood, after lying down. Yellow, green or grey pus. Expectoration milk-white, tenacious mucus, generally of salty taste, in morning. Can raise sputum if he turns from left to right side.

Male - Offensive perspiration on scrotum. Itching and dry eruption on genitals. Herpes. Prepuce ulcerates and itches. Cracks on foreskin. Condylomata surrounding head of penis. Swelling of scrotum. Cutting pains in testes. Weak prostate gland. Weakness of genitals. Genitals cold. Impotency. Insufficient erections. Sexual desire increased or decreased. Nightly emissions with sexual dreams. Watery semen. Complaints after sex. Gonorrhea. Gleet, discharge from urethra only during night, no pain.

Modalities - Better sitting with legs crossed, crossing or drawing limbs up. **Better from exercise, running, dancing, vigorous motion.** Better pressure, warmth of bed, hot applications. Better after sleep. Better cold drinks, cold bathing, open air. **Worse from cold, air,** dampness, north wind, snowy air, snowfall. Worse before thunderstorms. Worse washing clothes, laundry-work. Worse morning and evening. Worse after first sleep, falling to sleep. **Worse left side.** Worse after sweat. Worse sitting, standing, kneeling, jarring, stooping. Worse ascending, lifting. Worse from touch, rubbing, scratching. Worse after sex, sexual excess. Worse before menses, after pregnancy, miscarriage.

Mouth - Swelling and cracking of lower lip. Mouth and tongue feel as if scalded. Offensive or sour smell from mouth. Profuse flow of salty saliva. Taste of rotten eggs on coughing. Taste salty, putrid, cheesy, fishy. Taste

bitter, sour, putrid, offensive. Everything tastes too salty. Hawks foul or cheesy grains in the morning.

Nose - Yellowish-brown saddle across nose. Dry feeling in nose. Pressive pain in root of nose. Tip of nose inflamed and swollen. Nostrils ulcerated. Chronic nasal catarrh. Post-nasal catarrh, dripping of heavy, lumpy discharge, must be hawked through the mouth. **Thick greenish discharge**, foul, plugs and crusts. Ozaena. Ascending throat colds. Frequent sneezing without coryza. Fluent coryza. Nosebleed, when the nose has been struck by anything, even lightly, during menses or pregnancy, with hemorrhoids. Great sensitiveness to odors. Odors are **repulsive to the smell of cooking food**. Fetid smell before nose.

Perspiration - Hot sweats, worse menopause. Easy, offensive sweat, with orgasms, on genitals, in axilla or back, between menses. Hands sweaty, purple. Sweats from least motion. Sweat on feet, worse on toes, intolerable odor. Cold sweats at night, on chest, back and thighs. Continuous, debilitating sweats. Sweet-smelling sweat.

Rectum - Sensation of weight or ball in anus, not better by stool. **Shooting pains** up rectum and vagina. **Prolapsed anus** (Podo.), **rectum**, worse from smoking. Rectum is constricted and powerless, almost constant oozing from anus. Bleeding at stool and fullness of rectum. Weak feeling in rectum. Obstinate constipation, no urging for days. **Constipation**, large, hard stools, cannot strain, with great tenesmus. **Constipation during pregnancy**. Infantile diarrhea, **worse from boiled milk** and rapid exhaustion. Heat, burning and swelling of anus. Itching in rectum and anus. **Hemorrhoids during pregnancy**. Hemorrhoids prolapsing with sticking pain. Hemorrhoids bleed while walking. Soreness between buttocks. Cancer of rectum. Anus encircled by ring of condylomata.

Sensations - As if something twisting in stomach and rising to throat. As if viscera turning inside out. As if bladder full and contents would fall out over pubes. As if drops came out of bladder. As if bladder and urinary organs would be pressed out. **As of everything would fall out through vulva**. As if everything would fall out of uterus. Uterus as if clutched. As if vulva enlarged. As if something heavy would force itself from vagina. As if heart stood still. As of a ball in inner parts. As of hot water poured over body. As if roots of hair were sore, as if cut short near roots.

Skin - Chloasma. Spots on skin. Yellowish- brown spots. Blotched, raw, rough, hard or cracked, worse flexures. Wine colored skin. Delicate skin, least injury tends to ulceration. Ulcers, on small joints. Herpetic eruption on lips, about mouth and nose. **Ringworm** in isolated spots. Ringwormlike eruption every spring. Itching, not

Sepia succus relieved by scratching, worse in bends of elbows and knees. Itching vesicles. Urticaria, worse open air better warm room. Boils in axilla. Hyperidrosis and bromidrosis. Lentigo in young women. Ichthyosis with offensive odor of skin. Ichthyosis with offensive odor of skin. Skin pinkish after scratching. Indurations from constant pressure with purple color. Large, hard, seed warts. Small, itching, flat warts on hands and face. Epithelioma, on eyelids, lips.

Sleep - Sleeplessness from excitement. Insomnia from rush of thoughts. Talks loudly during sleep. Wakes frequently as if he has been called. Frequent starts with fright, screaming. Waking at night from frightful dreams, with screaming out. Dreams of rape, being pursued, chased with a knife. Dreams of urinating and finds on waking an urgent desire to do so. Dreams, worse if he lies on left side. No desire to rise in morning. Very sleepy during day, falls asleep as soon as she sits down.

Stomach - Gnawing in stomach, better eating. Sinking down feeling and weakness. **Faint sinking feeling at epigastrium**, not better by eating. Severe cramping pains. Hardness in pyloric region. Burning in pit of stomach. Heartburn. Sensation of a lump in stomach (Carb-an.). Sensation of something twisting about in stomach and rising into the throat. Disordered stomach after bread, milk, fat food or acids. Stomach pain and vomiting of mucus after simplest food. Acid dyspepsia with bloated abdomen, sourbelchings. Dyspepsia from over-lifting, from smoking. Belchings, milky, sour, bitter, rancid of tough, foamy mucus. Eructations like rotten eggs. **Nausea at thought or smell of food**. **Nausea in morning before eating**. Nausea worse lying on side. **Morning sickness**, motion sickness. Disposition to vomit after eating. Vomiting of milky fluid during pregnancy. Vomiting of bile and food.

Stool - Stools passed after prolonged straining, followed by cupful of jelly like yellow-white, very offensive mucus. Insufficient stool, mixed or covered with mucus. Dark-brown, round balls gluedtogether with mucus. Large, hard stools, constipated. Soft stool, difficult. Narrow stools, sometimes triangular. Greenish loose stool. Stool has a putrid, sourish, fetid smell, expelled suddenly. Almost constant oozing from anus.

Teeth - Bleeding of gums. Gums painful, as if burned. Grinding teeth. Teeth decay. Teeth feel dull. Hollow molar pains as if elongated and swollen. Toothache from hot or cold things. Toothache better cold water, returning as soon as water gets warm. Toothache better inhaling cold air. Toothache after sweets and from tea-drinking. Toothache when biting teeth together. Toothache during pregnancy. Toothache and throbbing in gums during menses.

Temperature - Poor circulation. General lack of warmth of body. Cold in spots, on vertex, between scapula. Easily chilled. Chilly in warm room, during day. Chilly with air hunger. Chilliness during stool. Feet cold and wet in bed. Very sensitive to cold air. Shivering with thirst, worse toward evening. Irregular fevers. **Hot flashes.** Heat ascending or as if hot water were poured over her. **Frequent flushes of heat.** Anxious hot flushes preceded by sudden weakness.

Throat - Dryness and soreness. Roughness and soreness of larynx and throat. Roughness and burning in fauces, worse hawking. Raw pain when swallowing. Pressure in the throat, feels neck cloth tight. Sensation of dryness in larynx. Sensation of a plug. Sore throat with swelling of cervical glands. Ascending throat colds. Hawks foul or cheesy lumps in morning. Hoarseness. Aphonia.

Tongue - Tip of tongue as if scalded. Tongue white and feels burnt. Tongue coated with mucus, dirty yellow, brown with red edges. Tongue pale, flabby and indented. Tongue stiff. Vesicles on tongue. Tongue dirty, becomes clear during menses.

Vertigo - Fits of vertigo, worse walking in open air, least movement of arms. Vertigo with a sensation as if something rolling around the head. Vertigo as if intoxicated. Vertigo as if every object were in motion. Vertigo as if suspended in air.

Vision - Black spots, points, before the eyes. Amaurosis, with contracted pupils. He- miopia. Vision was dimmed from sexual excess, masturbation or uterine diseases. Vanishing of sight during menses, better lying. Flashes of light when closing eyes. Sparks, veil, streaks before the eyes. Intolerance of reflected light from bright objects.

COMMENTS - Historically, physicians used the flesh, the eggs or even the only bone that constitutes the skeleton of this animal, for "leucorrhea, gonorrhea, catarrh of the bladder, gravel, spasms of the bladder, baldness, freckles and certain kinds of tetters which is sufficiently remarkable in the light of the provings."

Sep. acts on the vital forces as well as on organic tissues. The sphincters and all non-striated muscles are weakened. Sep. disturbs the circulation, causing flushes and other irregularities, throbbings all over, hot hands and cold feet or vice versa. The flushes run upward and end in sweat with a faint, weak feeling. Nosebleed may occur from a blow, from being in a warm room, or from suppressed menses. Low thyroid with hormonal components.

Grimmer stated "This remedy has cured cancer of rectum and uterus, it acts strongly on the sexual organs of both sexes and a great many symptoms and conditions are manifested in this sphere. Young people of both sexes frequently have ailments calling for this medicine, women during the pregnant state after childbirth, men who have been addicted to drinking and sexual excesses are often helped by this remedy. Sex aggravates it in both sexes."

Difficulty with hormonal changes, associated with headaches, constipation, hemorrhoids and irritability. Never well since puberty (Puls.), childbirth, miscarriage, abortion, menopause. Ailments from the birth control pill, hormonal creams or patches.

Premenstrual syndrome, with irritability, headache, generally fastidious before menses. Irregular menses, painful, may have a heavy flow. Low energy, bloating, irritability and sensitivity before period.

May crave chocolate. Somewhat offensive, yellowish-green leucorrhea.

Prolapse or induration of uterus and cervix. Engorgement of the uterus going on to induration. Prolapse or retroversion. Bearing-down pains of great intensity, in the abdomen, back, extending into thighs, and sometimes even seem to interfere with breathing. Bearing down worse standing or walking.

Constant sense of pressing into vagina, compelling the patient to cross the limbs to prevent prolapse. Uterine symptoms with hysteria, weakness, palpitation, orgasm of blood, faintness.

Loss of sex drive. Aversion to sex, to affection, or being touched and held since hormonal change. Aversion to the smells of their partner. Aloofness, disgust for sex. May fake orgasms, have sex out of a feeling of duty, obligation. Anorgasmie or may take a long time to orgasm. Ailments from rape, with emotional and sexual shutdown (Staph, has anger). Drained of love and affection for all loved ones. Empty, sinking feeling.

Morning sickness with aversion to sight, smell, thought of foods. Vomiting of food, bile and milky fluid, in the morning. Strains so that blood comes up. "The thought of food sickens her with sense of a great weight in anus." Hypersensitive to odors, delusions of odors. Disgusted feeling. May want to back out of pregnancy.

May have a history of many childbirths or miscarriages. Miscarriage from sex, causes contractions. Tendency to miscarriage. Hering is reported to have said "All women prone to miscarriage should take Sep. or Zinc."

Physical affects from abortions (Nat-m. for emotional trauma).

Difficulty making decisions, confusion, anger during pregnancy. Sinking sensation in pregnancy. Premature delivery or false labor pains associated with low energy or depression. Traumatic, loss of blood and energy. Long and exhausting labor.

Postpartum depression. Emotionally shutdown after childbirth. Loss of mothering instincts. Aversion to

breastfeeding. Ill effects of breastfeeding. Weight gain since pregnancy (Calc.). Depression with meno-

Sepia succus pause. Hot flashes, low sex drive, depression after a hysterectomy.

Indifference to loved ones. Aloof and detached, insensitive. Critical, cold hearted, tendency to nag and complain, especially with hormonal changes. Easily upset, frustrated (Ign.), from hormonal imbalance. Ailments from grief (Nat-m.). Impulse to do violence.

Fits of weeping, without knowing why. Fear of not understanding their emotions. Worse from consolation, desires to be left alone. Lack of mental thought, of emotional feeling. Mind becomes dull, struggle to thing. Weak, dragged feeling.

Venous stasis, weak veins. Slowed circulation, better from vigorous exercise. Raynaud's disease. Tendency to bruise easily. Cold hands and feet. Varicose veins (Phos.), during or since pregnancy. Weakened uterine tissues, bearing down feeling. Lack of tone and weakness leading to congestion, then to bearing down pain. Hemorrhoids, ever since childbirth. Hemorrhoids with menses. Prolapsed rectum in cases of hemorrhoids.

Sensation of emptiness, sometimes connected with the pelvic bearing down. Empty sensation in the epigastrium and throughout the abdomen. Lump sensation in the throat and rectum. "Ball" sensation in inner parts, most notably in rectum, not relieved by stool. Clarke has cured both constipation and diarrhea when that symptom was present. Upward stitches in rectum and vagina.

Portal stasis. Fullness, soreness and stitches in liver region, as well as stitches in left hypochondrium. Diabetes with a hormonal component. Low blood sugar. Dyspepsia, from injury, by over-lifting. Severe constipation (Alum., Calc.), or constipation during pregnancy. Craves chocolate, bitter, sour and tart foods, particularly during pregnancy. Tendency to stimulate their taste buds. Strong aversion to fat.

Irritation of the urinary tract. Catarrh of bladder and urethra. Frequent strong urging to urinate. Stitches along the urethra. Relaxed sphincters. Bedwetting, "The bed is wet almost as soon as the child goes to sleep, always during the first sleep." Discharge of urine may be difficult even with urgent desire. Gonorrhea after the acute stage has subsided. Gleet and gonorrheal warts.

Delicate skin, the least injury tends to ulceration. Itching, which often changes to burning when scratched. Soreness of skin, humid places on bends of knees. Painful eruption on tip of nose. Herpetic eruption on lips and about mouth.

Skin condition relating to hormonal changes. Tendency to dry skin from low estrogen. Severe dryness of the vagina (Nat-m.). Chloasma. Liver spots, brown spots. Hair falls out after childbirth or with menopause. Acne, mole growth, freckles related to hormonal change, including puberty, childbirth, or birth control pills. Brittle nails. Addison's disease.

Psoriasis, skin funguses (Thuj.), ringworm (Thuj., Bac., Tell.). Ringworm-like eruptions, pityriasis, every spring on different parts of body. Herpes circinatus. Round, yellow spots. Nettle rash, appears on going into open air, better in warm room. Desperate itching, especially when it affects the genitals and anus.

Bursitis from kneeling and scrubbing the floors, overwork. Patient is worn out from domestic duties. Arthritis, worse cold, wet (Calc.), packache (Bry., Nat-m.). Stiffness of limbs worse after sleep. Stiffness of uterine region. "Involuntary jerking of head backward and forward, especially at forenoon when sitting." Jerking in hysteria. Open fontanelles in children.

Vertigo with sensation of something "rolling round" in the head. "Faints easily," after getting wet, from extremes of heat and cold, riding in a carriage, kneeling at church.

Chronic nasal catarrh. Inflamed tonsils from colds, tending to suppuration. Nash had a case in which the discharge was thick, bland and copious. Puls, relieved the catarrh but increased the menstrual flow too much. Sep. cured both.

Whooping cough when it has lasted eight weeks or longer and the paroxysms, though reduced in number and virulence, do not disappear and occur especially before midnight. The patients are reduced in strength, dyspeptic, irritable, tearful, easily angered or apathetic.

Symptoms are generally left-sided. Worse standing, kneeling, on the left. Very chilly, sensitive to cold. Better deep pressure but worse light touch. Irritable in the mornings from toxicity in the liver (Nux-v.). Need movement, but worse from exertion. Cheerful with thunderstorms.

Kunkel reported a case of pulmonary affection in a boy, 14, who had been under treatment five weeks for cough and hoarseness. Hoarseness was worse evening, cough with purulent sputa during the day. Slept well but dreamed when he lay on left side. Emaciated. Phos. IOx produced little change.

There was remarkable tightness of the chest on breathing with inclination to take a deep breath, this was better in open air, on motion, while at work, worse while in the house and at rest. Though the weather was bad he had a constant desire to be out of doors. Sep. IOx made a rapid cure.

Boenninghausen recommended Sep. in cases of cough, either with or without expectoration with blood-

streaked, purulent, yellow greenish or stinking sputa, and especially in tuberculosis.

Nash mentioned a case of cholera infantum that he cured with Sep. on the indication "always worse after taking milk." He compared it with Ant-c. for moisture oozing from the anus, which has the first place.

Bahr said Sep. afforded considerable help in a certain condition of the system that had only been noticed in females. After the exacerbation of a chronic gastric catarrh has lasted a few days with intolerable burning pains, the kidney region becomes painful, more particularly the left side.

Violent burning pain in the kidney region and a quantity of saturated, highly-colored urine is discharged. Urine deposits copious quantities of urates, or else a clear urine with copious sandy sediment, coated with uric acid. After the discharge, the pains generally abate and only return if the stomach has not been restored to its normal condition.

Hering noted its usefulness for "condylomata completely surrounding head of penis."

Clarke cured a crop of small, velvety warts completely encircling the mouth of the prepuce. Thuja had failed. Clarke also cured with Sep. 3x a large horn-like wart on the abdomen of a woman. It was as large as a crown-piece but shaped like a bean and raised a quarter of an inch from the surface.

Clarke confirmed the experience of Dr. Swallow, who found the fresh preparation of Sep. to possess a wider range than the ordinary preparation and to act as an "organ remedy" in a great variety of uterine disorders not definitely indicated by the pathogenesis. Clarke used it in potencies from the 5c to 30c.

RELATIONS - Antidoted by: Smelling Nit-s-d., by vegetable acids, Aeon., Ant-c., Ant-t., Rhus-t. **It antidotes:** Calc., Chin., Merc., Nat-m., Nat-p., Phos., Sars., Sulph. **Compare:** (1) Nat-m., Bell-p., Lil-t., Murx., Sil., Sulph. (2) Vesicular eruptions and ulcers about joints, Bor., Mez. (3) Indifferent to his occupation, Fl-ac., Ph-ac. (4) Sensation of ball in inner parts, Lach. (5) Ringworm in isolated spots, Bac., Calc., Tell. (6) Psoriasis, Ars., Ars-i. (7) Chloasma, Lyc., Nux-v., Sulph., Cur. (8) Constipation during pregnancy, Alum. ***SEQUOIA SEMPERVIRENS

(Redwood Tree)

PHARMACY-seq-s. Sequoia sempervirens. Redwood. N. O. Taxodiaceae. **Historical dose:** All potencies.

CLINICAL - Asthma. **Constipation.** Edema. Flatulence. Headache. Lungs, collapsed. **Nausea.** Pneumonia. Polyuria. Rheumatism. Salivation. **Sneezing.**

HOMEOPATHIC - Birch and Rockwell, wrote, in A Homoeopathic Proving of Sequoia sempervirens, 1994, "The tree grows in the fog where it is damp and wet, it also grows near the ocean.

"The source of the remedy is the burl, a growth on the tree from which new life sprouts. If one were to study the logging industry, one would find that in man's greed and desire for more, bigger and better, he shows no restraint from destroying the last few virginal growths of these incredible giants.

"It seems to affect some people in one way, while in others the effects are opposite. In the lungs there is ease of breath or there is difficulty of breath. In the heart we find pressure, shooting pains and symptoms from grief, or absence of symptoms and complete happiness. Blurry vision or clarity of vision."

Seq-s. is a sycotic remedy. Hydrogenoid propensity, overproduction of mucus, voracious appetite, rheumatic complaints. Wandering pains. Pains gripping, constrictive, aching. Stiff and tight feeling in body (Guai.).

Feeling of well-being. Great exhaustion. Voracious appetite. Strong desire for whatever is available. Increased salivation. Fluid retention Absence of fluid being collected. Vision extremely clear. Blurred vision, worse wind. Worse lying, sitting, continued motion.

MIND - **Clarity of thought**, as if a fog or haze had lifted in the mind. Feeling of well-being. Feels new and rejuvenated. Relaxed, in tense situations. Difficult concentration. Confusion. Confused by simple tasks.

Overwhelming feeling of being old

(Gink.). Feels cut down. Desires solitude. Aversion to company, desire to go somewhere where no one will bother. Sadness, hard to raise oneself to get up and go in the day. Sympathetic, takes on other peoples sufferings, only feels good while rescuing someone.

Irritability, about trifles, about noises. Desire to scream that gets suppressed. Delusion of being fragile, as if she would emotionally fall apart. Delusion of being unappreciated. Delusion as if she is falling in love, of having a broken heart, as if his wife of many years never loves him. Time appeared to be slowed down.

Abdomen - Burning pain in abdomen. Gripping pain in abdomen, worse after eating, motion, better after sleep.

Back - Pain extending down to hips and knees.

Bladder - Pressing pain in bladder. Polyuria. Desire to urinate even after having just done so.

Chest - Limp feeling in chest. Short sharp pain in right side of chest. Shooting pain in heart from being heart broken. Band of tightness in diaphragm, desire to stretch, which causes soreness.

Ears - Outward pressing pain.

Face - Looks much older. Sensation of fullness, as if more fluid were under the skin. Obstruction of facial sinuses. Pressing pain in maxillary area.

Female - Menses starts and stops; copious.

Head - Headache between the eyes.

Heart - Feeling as if he would die from a broken heart. Sensation of a wall of bricks and stones fall away from the heart and a yellow and white light encompass the heart.

Limbs - Sharp pain in elbows, shoulders and feet. Sensation of tightness in hands and feet.

Lungs - History of collapsed lungs, pneumonia. Feeling as though one couldn't get enough air into lungs, breathing deeper and deeper yet still wanted more. Asthmatic respiration, worse night, better steam and fresh air. Sore pain in lungs. Coughing up thick mucus. Feeling as if lungs are hyper-clear, as if more air can move in and out of the lungs.

Male - Sexual desire diminished.

Mouth - Salivation increased. Bitter taste. Sensation of stiffness in jaws. Hard to articulate words that require more motion of the jaw.

Nose - **Burning pain in nasal passages. Sneezing.**

Rectum - **Constipation during menses.** Flatulence, frequent, like rotten eggs. Loose and putrid stool.

Skin - Eruptions, raised circular or oval bumps of a light brown discoloration. Itching, worse night.

Sleep - Sleepiness in the afternoon. **Deep sleep**, refreshing. Dreams, of being happy and finding someone who really loves them. Dreams of responsibility, of rescuing some children by the side of the road. Wakes unrefreshed; wakes in a sweat.

Stomach - **Nausea.** Thirst diminished.

Teeth - Desire to clench teeth, to scratch teeth.

Throat - Nausea felt in pit of throat.

Vision - Objects have a haze to them. Edges of objects seem to swim. Vision, as if on a hallucinogenic drug.

RELATIONS - **Compare:** (1) Lyc.

REFERENCES - Birch. Rockwell.

***SEROTONIN

PHARMACY - serot. Serotonin. A brain neurotransmitter. **Historical dose:** All potencies.

CLINICAL - **Alcoholism.** Alzheimer's disease. Anxiety. Autism. Bipolar disorder. Bulimia. Clumsiness. **Compulsive disorders. Depression.** Drowsiness. Edema. Insomnia. **Learning, disorders.** Migraine. Nightmares. Palpitations. Restlessness. Schizophrenia. Suicidal. Twitching. Vertigo.

HOMEOPATHIC - Serotonin is a neurotransmitter produced in the brain known to influence the functioning of the cardiovascular, renal, immune, and gastrointestinal systems. In the nervous system, serotonin is believed to play an important role in the regulation of mood, sleep, vomiting, sexuality and appetite. Serotonin has been thought to play a part in many disorders, notably as part of the biochemistry of depression, migraine, bipolar disorder and anxiety. Recent research suggests that serotonin also plays an important role in liver regeneration.

It is well known that abnormal serotonin levels can cause various types of sexual dysfunction such as anorgasmia, erectile dysfunction, and diminished libido. Serotonin also causes problems such as insomnia, depression, obesity, eating disorders, premenstrual syndrome, panic attacks, alcoholism, anxiety disorders, and bulimia.

Serotonin, at increasing levels, stimulates nervous tension, drowsiness, heart palpitations, water retention and inability to concentrate and perform.

Any disruption in the synthesis, metabolism or uptake of this neurotransmitter has been found to be responsible for certain manifestations of **schizophrenia, depression, compulsive disorders and learning problems.** Increase in brain levels of either of neurotransmitter, serotonin, produces a **craving for alcohol, anger, or anxiety**, especially for those who have a history of alcoholism.

Drowsiness. Tiredness. Sustained rapid eye movement. Overreaction of the reflexes. Rapid muscle contraction and relaxation in the ankle causing abnormal movements of the foot. Clumsiness. Muscle contraction and relaxation in the jaw. Twitching of the muscles. Rigidity. High body temperature. Sweating.

MIND - Euphoric feelings. Feelings of intoxication. Substance abuse. Impulsive behavior, recklessness,

exhibitionism. Restlessness. Hostility, argumentative behavior. Violence, violent nightmares. Insomnia. Depression, anxiety, suicidal tendency. Psychosis. Schizophrenia, mood disorders. Organic brain disease, mental retardation, autism and Alzheimer's.

RELATIONS - Compare: Melat.

REFERENCES - Murphy.

***SERUM ANGUILLAE

(Eel Serum)

PHARMACY - ser-ang. Serum anguillae. Eel serum. Freshwater Eel Serum. *Anguilla anguillae*. Ichthyotoxinum. Potencies are made with glycerine or distilled water. **Historical dose:** All potencies.

CLINICAL-Albuminuria. Anuria. Dyspnea. Edema. Elephantiasis. Heart, disorders. Hemoglobinuria. Hematuria. **Hypertension.** Kidney, disorders. **Kidney, failure.** **Lympha- edema.** Mitral, insufficiency. **Nephritis. Oliguria.** Uremia.

HOMEOPATHIC - Jousset considered Ser- ang. a specific in disorders of the heart and kidneys without much edema. Ser-ang. affects the kidneys, which becomes acutely affected, either from cold, infection or intoxication. The attack is characterized by **oliguria, anuria and albuminuria.**

Jousset's experiments have demonstrated the rapid hematuria, albuminuria and oliguria caused by it. But its really specific indication seems to be for sub-acute and **acute nephritis.** Repressed kidney function and sexuality. Acute nephritis with threatening uremia. Diuresis. Albuminuria. **Kidney failure.**

Cardiac uremia. Hypertension and oliguria without edema. Heart diseases in cases of failure of compensation and impending asystole. Functional heart diseases. Mitral insufficiency. Asystole with or without edema, dyspnea and difficult urinary secretion.

Warm-blooded. Chilliness when tired. Desire for warm room. **Lymphoedema** after operation on breast tumor. Elephantiasis. Faintness and nausea.

MIND - Indifference and lack of will power. Irresolution. Every effort is too much. Aversion to change. Irritability and dissatisfaction with oneself. Nervousness. Restlessness. Sensitive to noises and odors. Anger from noise. Mental dullness. Difficult concentration. Memory weakness. Brain fatigue. Mental and physical symptoms better from appearance of menses.

Abdomen - Pain in abdomen when retaining urine.

Eyes - Sudden sparks before the eyes.

Food - Appetite increased or decreased. Ravenous appetite in evening. Appetite decreased, thirst increased or vice versa. Desire for salty and pungent foods. Desire for coffee.

Head - Congestive headaches, often onesided. Pressing sensation in head. Sensation as if head enlarged. Sudden heat in face and head.

Heart - Consciousness of heart. Oppression. Constriction. Stitches in heart. Palpitations. **Cardiac uremia.** Heart diseases with failure of compensation and impending asystole. Mitral insufficiency. **Hypertension and oliguria without edema.**

Kidneys - Kidney failure. Repressed kidney function. Acute nephritis. Uremia. Hematuria, albuminuria and oliguria.

Limbs - Wandering joints pains. Pains wander from fingers to elbows and shoulders. Pains wander from toes to knees and hips. Restless legs, impossible to remain seated, must move.

Modalities - Aversion to warm room. Worse deep inspiration, swallowing, bending head backward. Worse from noises and odors.

Perspiration - Sweat smells sweetish.

Sleep - Dreams of traveling, of black snakes. Erotic dreams of naked women.

Stomach - Eructations better after eating. Nausea concomitant with heart or kidney diseases.

Throat - Dry feeling in pharynx.

Vertigo - Dizziness on rising. Faintness and nausea.

COMMENTS - The serum of the eel has a toxic action on the blood, rapidly destroying its globules. The presence of albumin and kidney elements in the urine, the hemoglobinuria. the prolonged anuria (24 and 26 hours), together with the results of the autopsy, plainly demonstrate its elective action on the kidneys. Secondly, the liver and the heart are affected and the alteration observed are those usually present in infectious diseases.

Boericke wrote, "When during the course of heart disease, the kidney, previously working well, should suddenly become af

ected and its function inhibited and when besides we observe cardia irregularities and a marked state of asystole, we may yet expect good results from this serum. But to determine here the choice of this remedy is

not an easy matter.”

RELATIONS - Vip. **Compare:** (1) Dig., Lach., Apis.

REFERENCES - Boericke. Rohrer.

***SILICA MARINA

(Sea Sand)

PHARMACY - sil-mar. Silica marina. Sea sand. Silica maritima. Trituration. **Historical dose:** All potencies.

CLINICAL - Abscess. Constipation. Glands, enlargement. Glands, suppuration. Gonorrhea. Tartar.

HOMEOPATHIC - **W. B. Clarke** of India napolis told of the use of Sil-mar. as a remedy for constipation. He used it in patients of all ages with excellent results, giving it in crude doses.

W. B. Clarke's preparation was taken from the beach, just as it was left by the tide, on a pan of the coast many miles distant from a river estuary or a drained town. He preferred the rather coarse sand taken from a river sand-bar. He thought a finer variety may be better for younger patients.

This was thoroughly washed and baked in an oven. The sand is taken plain or enclosed in capsules or made into pills. In either case it is washed down with water and water is to be drunk freely during the treatment.

Sil-mar. has Sil. and Nat-m. symptoms. **Inflamed glands** and suppuration. Constipation.

W. B. Clarke mentioned this case as the hardest he had encountered: a man, 60, had suffered for thirty years with severe constipation often sitting at stool for an hour and nearly fainting. He took a teaspoonful after dinner daily for a week without particular effect.

Then he took it three times a day for a week. After this he was able to return to the one dose a day and soon required it but once a week. "The peculiarity of this treatment is the ease with which evacuation is accomplished after the first impression is made, the discharges being soft, mushy and yellow and the regular habit then seems established, for the treatment can then be discontinued."

If there is any return of the trouble, a dose or two more will be sufficient to put it right. This experience is of great value and interest as Sil. in the potencies (as well as Nat-m.) is a great constipation remedy. W. B. Clarke never observed any ill effects of the treatment.

In the case of a child, age 4 to whom Cooper gave Sil-mar. 6x "a thick mass of tartar which had accumulated behind the front teeth came away in flakes.

COMMENTS - Clarke had a specimen triturated and run up to the 30c potency. He had not long to wait for an opportunity of testing it. A tall, fair young man of 24, a violinist, presented himself with a mass of scrofulous glands on the right side of the neck softening at one point.,

Clarke gave him Sil-mar. 3c, three or four times a day and warned him not to poultice. The mass of glands soon began to diminish. The abscess matured and discharged itself through a minute opening and eventually healed without leaving a perceptible scar. The rest of the glands, in the meantime, disappeared.

Sil-mar. 3c, three times a day, rapidly cured a case of gonorrhea in a patient who had many previous attacks, as well as stricture which had been treated with cauterizations and strong silver nitrate.

It was this history which partly led Clarke to give the remedy on account of the Nairn. element contained in it. The discharge was creamy and there was tenderness in the middle of the urethra.

For three days after commencing the Sil-mar. there was a sharp aggravation, the discharge became very profuse, was worse at night and accompanied by painful erections.

Burnett told an interesting experience of his in which he was consulted about a boy who persisted in spite of punishment in eating sand when playing on the beach. Burnett

Silica marina advised the parents to let the boy eat as much as he liked. He kept it up for a fortnight, at the end of which time he was vastly improved in health and he neither wanted nor ate any more sand from that day.

REFERENCES - Boericke. Clarke.

***SILICA TERRA

(Pure Flint)

PHARMACY - sil. Silica terra. Pure Flint. Silex. Silicic anhydride. Silicon dioxide. Trituration of pure, precipitated silica. **Historical dose:** All potencies.

CLINICAL-Abscess. Acne. Anemia. Ankles, weak. Anus, fissures, fistula. Appetite, depraved. Back, weakness. Bedwetting. **Boils.** Bones, necrosis. Brain, concussion. Brain-fag. Breast, abscess. Breast-feeding, disorders. **Bunions.** **Cachexia.** Cancer. Carbuncle. Cataract. Cellulitis. **Cephalohe- matoma.** Chin, eruptions. Circulation, poor. Coccyx, pains. Conjunctivitis. **Constipation.** Convulsions. Coryza. Cough. **Cysts.** Debility. Diabetes. Ear, disorders. Elephantiasis. **Emaciation.** **Emphysema.** Enchondroma. Epilepsy. Eruptions. Excrescences. Eyes, disorders. Feet, burning. Fester. Fibroma. Fistula. **Foot sweat, suppressed.** **Foreign**

bodies. Fractures. Ganglion. Gastric, catarrh. Glandular, swellings. Headaches. Hernia. Hip joint, disease. Homesickness. Housemaid's, knee. Hydrocele. Hypopion. Iritis. Jaw, bone, decay. **Keloids.** Keratitis. Kyphosis. Lachrymal, fistula. Locomotor ataxia. **Malnutrition.** Mania. Ménière's disease. Meningitis. Metritis. Metrorrhagia. Migraines. Miner's, disease. Miscarriage. Molluscum, contagiosum. Morphinism. Morvan's disease. **Nails, problems.** Nails, splitting. Necrosis. Neuralgias. Nodes. Panaritium. **Perspiration, offensive.** Phimosi. Pleurisy. Potts' disease. Psoas, abscess. Pyorrhea. Rheumatism, chronic. Rickets. **Scars.** Sinuses. Sleepwalking. Spermatorrhea. Spina bifida. **Spinal, curvature.** Spinal, irritation. Strains. Strangury. **Styes.** **Suppurations.** Synovitis. Teeth, decay. Tenesmus. **Tumors.** Ulcers. Urethra, stricture. Urethritis. Urine, incontinence. **Vaccination, effects.** Vagina, spasms. Vertigo. Walking, late. Whitlow. Worms. Writer's cramp. Wounds.

HOMEOPATHIC - Outside homeopathy, flint is practically unknown as an internal remedy. Hahnemann introduced it into medicine and it was his method of attenuating insoluble substances that enabled him to discover its powers. Sil. forms one of the most important remedies for chronic diseases.

Want of grit, moral or physical. Proud flesh. Prostration of mind and body. **Tendency to easy exhaustion** and abnormal **sweats.** **Defective nutrition** due to imperfect assimilation, especially in children. **Emaciation.** **Arrested development.**

Enlarged glands. Slow, incomplete inflammation of glands, cellular tissue and skin, then induration. Edema in morning. Cancer. Contracted sphincters. Cerebral softening. Diseases of bones and cartilages, decay and necrosis, softening of bones. Exostosis.

Skin is unhealthy, every injury festers. **Suppurative processes,** stubborn, fistulous openings, abscesses. Pustulous burrowings. Ripens abscesses, promotes suppuration. Ailments attended with **pusformation.** Discharges offensive, pus, sweat, stools etc.

Sil. can stimulate the organism to reabsorb fibrotic conditions and scar-tissue. Scars indurated, hard, nodular, shiny, glassy, tender with shooting pain. **Keloid** growth. J. Weir noted that it must be used with care in cases of tuberculosis as it may cause the absorption of scar tissue and liberate the disease. **Removes foreign bodies.**

Neurasthenic states with increased susceptibility to nervous stimuli and exaggerated reflexes. Epilepsy, aura in the solar plexus creeping into the chest and stomach. Convulsions begin in the solar plexus, after vaccination. Feeling of coldness before spasms or epileptic attacks.

Spinal curvature. Nervous disorders after spinal injury, especially when pressure on spine causes pain in remote parts. Hysteria, paralysis and obstinate neuralgias caused by dissipation, hard work with close confinement. Progressive locomotor ataxia.

Organic changes, it is deep and slow in action. Periodical states. Ascending effects. Pains are violent and sticking, localized in ears, throat, ulcers etc. Parts lain on to go to sleep. Sensation as if she were divided into halves and left side does not belong to her. Sensation of a hair on tongue, in trachea.

Generally cold, chilly, hugs the fire, wants plenty warm clothing, hates drafts, hands and feet cold, worse in winter. **Want of vital heat** even when exercising. **Intolerance of alcoholic stimulants.** Sensitive to pain, noise, starts at least noise. Restless, fidgety.

Ill effects of vaccination. Scrofulous, rickety children with large heads, open fontanelles and sutures, distended hot and hard abdomen, slow in walking and wasted in body, especially legs. Children crawl nervously or are dragged in on their mother's arms, on running they become pale. Cachectic and senile patients, persons of fair, clear complexion.

MIND - Complaints from anticipation. **Faint hearted, anxious.** Nervous and excitable. **Loss of self-confidence.** Anticipates failure. Performance anxiety. Fear of speaking in front of a group (Arg-n., Gel., Lyc., Nairn.). **Timidity about appearing in public.** Irresolution. **Bashful.** Worries about their mind and its ability to perform. Undertakes nothing lest he fail.

Mental acuteness with physical weakness and torpidity. Cannot express himself correctly. Mental confusion. Abstracted. **Conscience about trifles.** Fastidious for details. Inconstancy. Forgetfulness better after eating. Restlessness while sitting, on waking.

Procrastinates, dread at any mental effort. Intellect lacks stability and clarity. Poor concentration, inability to focus, poor memory. Brain-fag of businessmen, lawyers, preachers and students. Brain exhaustion (Sulph., Cann., Arg-n., Lyc., Pic-ac.). Fear of literary work. Prostration of mind after writing.

Can overexert their minds. Avoid things that take away their energy. Tendency to monitor energy function. Afraid of draining activities. Anxiety about health, worse during menopause. Fear of injury. Fear of becoming weak. Fear of being incapable.

Sensitive to all impressions. Starts from slight noise. **Timidity.** Fidgety. Sensitive weeping mood. Cries when spoken to kindly. **Yielding disposition.** Lacks courage. Homesickness. Longing for his relations and home.

Obstinate, stubborn, headstrong, in children. Mental dullness in children.

Hopeless. Sad. Sullen. Disgust for life, wishes to drown herself. Melancholy and weariness of life during menses. Worse from mental exertion, talking, nervous excitement.

Mild and yielding when calm but irritable and irascible when aroused. Intolerant of contradiction. Indisposed to talk loud. Screaming violently, groaning, in epilepsy. Fixed ideas. ***Fear of needles, pins and sharp objects.*** Thinks only of pins, searches for them, and counts them. Somnambulism during increase of moon.

Abdomen - Hard, bloated. Distended, hard and hot, with thin legs, especially in children. Abdomen feels thick and heavy like a weight. Clothing across abdomen feels too tight, after eating. Tightness transversely across abdomen. Pain or painful cold feeling in abdomen, better external heat. Soreness of abdominal walls. Cracks on abdominal wall. Much rumbling in bowels. Flatulence with much rumbling. Ascites with great effusion, with frequent attacks of watery diarrhea. Flatulence incarcerated with constipation. Colic, cutting pain with constipation. Colic from worms. Inguinal glands swollen and painful. Inguinal hernia.

Back - Constant aching in center of spine. Spinal irritation after injuries to spine. Spine, weak, very sensitive to drafts on back. Spina bifida. ***Spinal curvature.*** Painful kyphosis. Pott's disease. Decay of vertebrae. Diseases of bones of spine. Backache as from riding in carriages for a long time. Burning in back, when body is being heated, after walking in open air. Rheumatism. Aching, beating, throbbing, in lumbosacral region. Coccyx hurts after riding. Painful coccyx. Lameness in region of sacrum. Stiff neck with headache. Haid, cold swelling of cervical glands. Boils or carbuncles.

Bladder - Pressure in bladder during urination. Burning and soreness in urethra during urination. Frequent urination with tenesmus. Chronic urethritis, foul discharge from urethra, thick, curdy, purulent, bloody. Chronic urethritis with twisting pain. Continuous urging with scanty discharge, or without emission. Renal and vesical calculi. Involuntary urination. Nocturnal bedwetting in children with worms.

Breasts - Milk suppressed. Sharp pain in breasts and uterus. Breasts swollen, hard and painful. Great itching of swollen breasts. Scirrhus with itching. Darting, burning, in left nipple. Nipples very sore, ulcerated easily. Nipples drawn in like a funnel. Fistula in breasts. Fistulous ulcers of breast (Phos.). Threatened abscess of breast. Hard lumps in breast (Con.). Breast cancer.

Causations - Ill effects ***of suppressed sweat, especially of feet.*** Stone-cutting. Loss of fluids. Injury, strains.

Vaccinations. Splinters, foreign objects in tissue. Overwork, mental or physical.

Chest - General sensation of weakness in chest, can hardly speak (Stann.). Can't breathe deeply without chest pain. Sticking pain in chest on inspiration. Bruised pain in chest on coughing. Stitches in chest, through the back. Painless throbbing in sternum. Tight feeling around chest, as if tied in with tape. Pressure at lower sternum as from a stone. Eruption like varicella, covering chest and itching violently. Axillary glands swollen, enlarged. Offensive axillary sweat.

Constitutions - Demineralized constitution. Constitutions that suffer from deficient nutrition due to lack of assimilating power, oversensitive physically and mentally. Children with large heads, open fontanelles and sutures, much sweating about the head, which must be kept warm. Distended abdomen, weak ankles, slow in learning to walk. Nervous, irritable persons with dry skin, profuse saliva, diarrhea, and night sweats. Weakly persons,

fine skin, pale face, light complexion, lax muscles. Scrofulous children who have worm diseases during dentition. Stonecutters' ailments, chest disorders and total loss of strength.

Cough - Cough and sore throat. Cough with expectoration in day, bloody or purulent. Loose cough day and night. ***Violent cough when lying down with a thick, yellow lumpy expectoration,*** suppurative stage of expectoration (Bals-p.). Cough gagging, shaking, retching, worse cold drinks, talking, lying and after waking. Dry cough at night, waking patient from sleep. Dry, hacking cough with hoarseness.

Ears - Earaches. Abscess. Boils. ***Otorrhea, fetid discharge.*** Crusty formations in ears. ***Perforated eardrum.*** Itching in ears when swallowing. Itching of outer ears. Shooting pain in left ear. Feeling of stoppage in the ear, better when yawning or swallowing. Decay of mastoid process. Child bores into its ears with fingers when asleep, causing a discharge of pus and blood. Sensitive to noise. Ménière's ***disease.*** ***Hissing, roaring in ears.*** Hissing in perforated ear. Ringing in the ears or loss of hearing. Loud pistol-like report. Deafness, hears again with a loud report or on blowing the nose and coughing, worse full moon.

Eyes - Eyestrain and headaches. Keratitis, pustular, perforating. Iritis and irido-choroiditis with pus in anterior chamber. ***Perforating or sloughing ulcer of cornea.*** Abscess in cornea after traumatic injury. Opacities of the cornea after smallpox. Cataracts and weak vision, from over use. Cataract in office workers after suppressed foot sweat. Inflammation of eyes. Sharp pain through eyes. Eyes tender to touch, worse when closed.

Swelling of lachrymal duct. Stricture of lachrymal duct. Hypopyon. Angles of eyes affected. Affections of canthi, tear-ducts. ***Styes.*** Encysted tumors of lids. Aversion to light, especially daylight, it produces dazzling. Amblyopia from abuse of stimulants.

Face - Pale, cachectic, waxy. Red spots on cheeks with burning heat. Lupus. Burning about mouth. Skin of face cracks. Cracks

in lips, on skin of face. Indurated fissures at the corners of lips. Cancer of lower lip. Comedones. Eruptions on chin. Herpes on chin. Rheumatic pain in jaw and decayed teeth. Swelling of jaw. Swelling of maxillary **glands**. **Parotid glands swollen** (Bell., Rhus-t., Calc.), enlarged. Facial neuralgia, throbbing, tearing, face red, worse cold damp. Boring, tearing pains.

Female - Amenorrhea. Watery discharge instead of menses. Early, scanty menses. Increased menses with paroxysms of **icy coldness over whole body**. Menses strong-smelling, acrid. Discharge of blood between menstrual periods. Discharge of blood from vagina every time child is nursed. Leucorrhea milky (Calc., Puls., Sep.). Leucorrhea acrid gushing, worse during urination. Burning and soreness about vulva. Cutting pain around the navel with leucorrhea. Cutting upward in vagina, worse urinating. **Vaginal cysts** (Lyc., Puls., Rhod.). Abscess of labia. Itching of vulva and vagina, very sensitive. Pressing-down feeling in vagina. Prolapsus uteri in consequence of myelitis. Salpingitis with accumulation of pus or serum that escapes from uterus from time to time. Nausea during sex. Nymphomania. Sterility. Miscarriage or no conception due to weakness. Too violent motion of fetus. After-pains felt in hips. Promotes expulsion of moles.

Food - Want of appetite, thirst excessive. Loss of appetite and of taste. Voracious appetite, but disappears on attempting to eat or loathing of food. **Desires only cold things**, ice cream, ice water, feels comfortable when it is in stomach. Aversion to cooked or warm food and meat. **Disgust for meat and warm food, milk**. Pain in head better while eating. Worse after eating. Aversion to mother's milk, child vomits as soon as it nurses. Milk, aggravates, causes diarrhea and vomiting. Drinking cold water causes dry cough. Warm drinks improves cough, causes sweat about head and face. Water tastes badly. Intolerance of alcoholic stimulants.

Head - Chronic, periodical headaches since some severe disease. Migraines. **Headaches located over one eye**. Headache as if vertex will burst. Vertex throbs. **Sick headaches** as if coming from spine or occiput. Headache, then blindness. Headache while fasting or when not eating at proper time. Headache worse by exertion, study noise, motion, jar, light, cold air, talking and straining at stools. Headache better by wrapping warmly, binding and pressure. Profuse urination, relieves the headache. Swelling filled with grumous fluid between scalp and bone. **Must keep head covered or catches a cold**. Lumps on scalp. **Profuse sweats on head**. Moist crusty eruptions on the scalp. **Premature falling of hair, baldness**. Swelling of glabella. **Cephalohematoma**. Fontanelles open with distended abdomen.

Heart - Circulation easily agitated. Heart troubles from nervous exhaustion. Throbbing all over the body, when sitting or while in motion. Palpitations while sitting, with trembling of hand. Violent hammering palpitation, after every quick or violent motion. Orgasm of blood at night, throbbing in all vessels. Pulse small, hard, rapid. Pulse irregular and then slow. Pulse imperceptible.

Kidneys - Chronic urethritis, foul discharge from urethra, thick, curdy, purulent, bloody. Frequent urination with tenesmus. Profuse urination, better headache. Urine is bloody, with red or yellow sediment. Pus in urine. Kidney and bladder stones. Nightly incontinence after a blow upon the head. Nocturnal bedwetting in children from worms.

Limbs - Pott's disease. Psoas abscess. Felons, deep-seated pain. Axillary glands swollen, enlarged. Ulcers around the joints. Sciatica, pains through the hips, legs and feet. **The parts lain on go to sleep**. Limbs distorted during convulsion. Slovenly gait. Legs feel paralyzed, trembling while walking. Loss of power in legs. Pain in knee, as if tightly bound. Calves **tense and contacted**. **Cram in calves and soles**. Weak ankles and feet. **Icy cold and sweaty feet**. Voluptuous tingling in soles.

Soreness in feet from instep through to the sole (Ruta.). Pain beneath toes. Bunions. Soft corns in between toes. Distorted ingrown, yellow nails. **Affections of fingernails**, especially if white spots on nails. Nails, splitting. Nails, rough, yellow, crippled, brittle, white spots, blue in fever. Fingertips, as if suppurating, painful, dry, at night. Tremulous hands when using them. Paralytic weakness of forearm. Panaritium. Arms (left) shake before epilepsy.

Liver - Throbbing ulcerative pain in the region of liver. Abscess of liver. Beating soreness in liver, worse motion, walking, lying on right side.

Lungs - Weak lungs. **Shortness of breath**, from manual labor, walking fast. Deep sighing. Dyspnea when lying on back, when stooping, running, coughing. Dyspnea from draft on neck. Breathing so difficult that eyes seemed to protrude. Neglected pneumonia. Pneumonia resulting in suppuration. Slow recovery after pneumonia. **Emphysema**. Emphysema after pleurisy. Stone-cutter's disorders. **Miner's disease**. Sycotic asthma worse lying down. Asthma with spasm of larynx. Hay asthma coming on about the last of August. Asthma, can't bear a draft of air on back of neck. Chronic colds that settle in chest and bring on asthmatic attacks after being overheated or exertion. Colds fail to yield, sputum persistently muco-purulent and profuse. Rattling in chest. Profuse foul, yellow, lumpy sputum, granular, offensive when broken.

Male - Burning and soreness of genitals. Squeezing pain in testes. Sharp pricking pain in penis. Itching moist spots on scrotum. Elephantiasis of scrotum. Hydrocele. Painful eruptions in pubic region. Chronic urethritis with twisting pain. Prostate gland enlarged. Discharge of prostatic fluid when straining at stool. Burning in prepuce after stool. Sexual desire increases or decreases. Sexual weakness, nocturnal emissions **Extreme exhaustion after sex, takes 8 to 10 days to recover. Worse after sex**, sensation on right side of head as if paralyzed. Chronic gonorrhea with thick, foul, urethral discharge.

Modalities - Better warmth, warm room, warm wraps, especially around head. Better summer, wet or humid weather. Better from profuse urination. Better magnetism and electricity. Worse from change of weather. **Worse cold, air, drafts**, damp. Worse lying down, lying on left side. Worse uncovering, bathing, washing during menses. Worse jarring of spine, touch, pressure. Worse combing hair. Worse mental exertion, talking, nervous excitement. Worse light, noise. Worse alcohol. **Worse suppressed perspiration, especially of feet**. Worse from moon changes, new moon, increasing moon and full moon. Worse night, in morning. **Worse from vaccinations**.

Mouth - Saliva runs out of mouth. Inflammation and suppuration of salivary glands. Offensive odor from mouth in morning. Water tastes badly, vomits after drinking. Dryness of mouth. **Sores in mouth**. Sore mouth, gangrenous with perforating ulcer of palate. Abscess at the root of the teeth. Pyorrhea. **Boils on gums** (Merc-c.). Gums sensitive to cold air. Sensitive to cold water.

Nose - Obstinate colds, with ear affections. Sinusitis. Chronic catarrh and coryza. Coryza with nosebleed. Frothy nasal discharge. Acrid, excoriating discharge. Sneezing in morning. Obstructed and loss of smell. Burning, shooting pain. Drawing pain in root of nose and right malar bone. Nose, dry, cold. Sore, sensitive nasal bones. Itching at tip of nose. Herpetic eruption around nostrils and lips. Ulcers high up in nose. Cracks in nostrils. Perforation of septum. Dry, hard crusts form, **bleeding when loosened**. Nosebleed in infants. Dryness and stoppage after suppressed foot sweat.

Perspiration - Debilitating at night. Profuse sweats at night, worse towards morning. Foul, acrid sweat, as soon as he falls asleep. Sweats on upper part of the body, head or affected parts. Wetting pillow. **Offensive sweat**, hand and axilla. **Profuse sweat of head** offensive and extends to neck. **Offensive sweat on feet**, itching, acrid, destroying shoes, suppressed. Warm sweat after epilepsy. Sweats from least exertion. Sour and offensive sweats.

Rectum - Feels as if rectum is paralyzed. Constant but ineffectual desire for stool. Straining with soft stools, with exhaustion. Great straining, rectum stings, closes upon stool. Feces remain a long time in rectum. Itching in rectum and anus during stool. Moist anus, foul flatus. Chronic diarrhea. Diarrhea after milk. Diarrhea of cadaverous odor. **Constipation always before and during menses**. Burning, smarting and pressing in anus, after stool. Pain in anus as if constricted during stool. Painful spasms of sphincter. Cutting, cramping pain in rectum extending to testes, worse sex. **Fistula in anus** (Berb., Lach.), alternating with chest symptoms. **Painful hemorrhoids**, protrude during stool. Sensation as of a heavy lump in anus during menses. Tapeworm. **Sensations** - As if she would die. As if beaten all over. As if he had lain in an uncomfortable position. As if gradually losing senses. As if feeling for pins. Sensation as if she were divided into halves and that the left side does not belong to her. As if head would burst with throbbing in it internal and external at same time. As if forehead would be torn asunder, as from a heavy weight over eyes. As if head were forced asunder. As of a splinter in finger. As if a panaritium would form in index finger. As if fingertips were suppurating. As if finger were thick and bone enlarged. As if joints of fingers were being pulled out of sockets. Nails as if decayed.

Skin - Delicate, palp, waxy skin. **Unhealthy skin, every injury suppurates**. Rosecolored blotches. Coppery spots. Acne, eruption itches and burns. Acne rosacea. Carbuncles. **Felons, abscesses, old scars, ulcers**. Boils and pustules everywhere. Boils come in crops. Long lasting suppuration and fistulous tracts. **Impetigo**. Psoriasis inveterata. Herpes zoster. **Promotes expulsion of foreign bodies from tissues**. Abscesses after vaccination. Acuminate eruptions. Eruptions itch only in daytime and evening. Proud flesh forms in ulcers. Ulcers, painfully sensitive, foul, spongy, on feet, toes, and nails, better heat. Sensation of coldness in ulcers. Offensive pus. Bursitis. Elephantiasis. Leprous nodes. Indurated tumors. Painless swelling of 'taə.læ^te'xj '«'SJ&.'H'S^ 'JSWJNS. Gooseflesh. **Crippled and brittle nails**. Dry, cracked fingertips. **Keloids**. Scars suddenly become painful.

Sleep - Sleepiness all day. Great sleepiness after eating, and in evening. Excessive yawning. Sleepy but cannot sleep. Sleeplessness with great orgasm of blood and heat in head. Restless, unrefreshing sleep. Unrefreshed sleep, wishes to remain in bed. Talks in sleep loudly, whines or laughs. Whining and laughing during sleep, loud talking. **Sleepwalking** at new and full moon. Frequent starts in sleep. Lascivious dreams. Dreams of his youth, past events. Anxious, frightful dreams, wakes with trembling of the whole body. Nightmares of murders, horrid things, corpses and dead persons. Dreams of some one choking her.

Stomach - Anguish in pit of stomach, with attacks of melancholy. Pit of stomach painful to pressure. Gnawing, twisting pain in epigastrium, worse by pressure. Sensation as if a cold stone were in stomach. Sensation of emptiness in stomach, with nausea. Induration of pylorus. Slow and painful digestion. Gripping in stomach after eating. Screwing, pressing, twisting pain in stomach after drinking. Swallowing food easily gets into posterior sinuses. Burning or throbbing in pit. Intense heartburn. Sour belchings after eating (Sep., Calc.). Nausea, with good appetite. Nausea during sex in females. Nausea and vomiting during pregnancy. Vomiting after drinking (Ars., Bism., Verat.). Sour vomiting. Vomiting of food at night. Water brash with chilliness.

Stool - Stools comes out with difficulty *when partly expelled, recedes again*. Stools retained for fear of pain. Stools offensive, painless, lienteric, of cadaverous odor. Stool composed of hard lumps, light-colored and very hard.

Teeth - Teeth feel too large and too long

Silica terra for the mouth. Tearing pain at night. Constant aching in all teeth. Teeth break down, lose their enamel, become rough, carious. Stinging toothache, preventing sleep. Toothache during menses. **Abscess** & **tM>l ojt AMitig** on gums anú roo) of mouth after extraction of teeth. **Pyorrhea** (Merc-c.). **Boils on gums** (Merc-c.). Cold feeling in upper gums. Gums sensitive to cold air and to cold water. Difficult dentition, teething delayed.

Temperature - Chilly, worse lying in bed, exertion. **Chilliness**, very sensitive to cold air. **Always chilly**, even when exercising. Shuddering all over body whole day, before menses. Icy chills. Creeping, shivering over the whole body. **Suffering parts feel cold**. Cold limbs, feet, even in a warm room. Hectic fever in debilitated persons, worse after meals. Hectic fever during long suppurative processes. Intermittent fever heat predominating. Spotted fever. Typhoid fever with desire to be magnetized. Fever during dentition.

Throat - Sore throat. Burning in throat. Chronic pharyngitis. Periodical quinsy. Colds settle in throat. Tonsillitis. Tonsils swollen, suppurating. **Pricking as of a pin in tonsil**. Enlarged thyroid gland. Right lobe of thyroid gland swollen, having the appearance of an elastic cyst. Swallowing is painful, stinging, difficult, hysterical. Sticking pain on swallowing or on touch. Food is ejected through nose, when swallowing. Swelling of larynx. Roughness and soreness in larynx. Tickling in larynx causes slight cough and hoarseness. Foreign bodies in larynx. Hawks foul lumps. Bitter taste. Husky voice, worse mornings with chronic coryza. Hoarseness.

Tongue - **Sensation of a hair on tongue**. Tongue feels sore. One sided swelling of tongue. Tongue coated with brownish mucus. Indurations in tongue.

Vertigo - Vertigo when closing eyes. Vertigo from excessive use of eyes. Vertigo as if drunk. Vertigo with nausea, sleepiness. Vertigo from looking up. *when lying on left side* (Mag-m., Stront.). Vertigo with tendency to fall backward. Vertigo **better wrapping up warmly**, must sit down. Vertigo in neurasthenia and epilepsy. Ménière's disease.

Vision - Vision is confused, letters run together on reading. Spotted vision. Objects appear pale. Objects as if in a fog. Black spots. Day blindness, with sudden appearance of furuncles. Momentary loss of sight. Foggy vision, better wiping eyes. Lightning-like flashes during headache. Dim vision and flickering, worse after headache. Dim vision after suppressed foot sweat.

COMMENTS - Sea sand (Sil-mar.) is mainly composed of silica. The spicules of many sponges are made up of silica. Silicates are taken up by plants and silica is often deposited on the surface or in the interior of their stems. The strength of straw is due to silica. Equisetum generally contains as much as 18 percent silica. Flint supplies the "grit" of the earth's crust, of plant life and to a large extent of animal life also.

Schussler, who was a homeopath before he was a biochemist, noted that silicic acid, from the tissue remedy point of view, is a constituent of the cells of the connective tissue or the epidermis, the hair and the nails.

It may be used if a suppurative center is formed either in the connective tissue or in a portion of the skin. These cells are thereby enabled to throw off inimical substances (the pus). In consequences, the pus is either absorbed by the lymphatics or it is cast out. In the latter case there is a breaking open of the suppurative center. Sil. may also cause an effusion of blood in any tissue to be absorbed through the lymphatics.

Teste put Sil. in his Puls, group of remedies, the other members of it being Calc., Hep., Graph., and Phos. According to Teste, Sil. is the "chronic" of Puls. Sil. corresponds to the chronic form of such diseases as Puls, cures when acute, including rush of blood to the head, especially to the right temple and vertex, headache every day, photophobia, lachrymation, loss of taste, and aversion to fat food with rancid or oily taste in the mouth.

The symptoms of Sil. differ from those of Puls., being more constant, more deep-seated and lasting longer. For instance, the mucus

Silica terra secretions of Puls, easily become purulent under the action of Sil.

Sil. is useful for chronic arthritic or rheumatic affections as it forms a soluble combination (sodium silicate) with the soda of the urate of soda, this combination is then absorbed and removed through the lymphatics. For the

same reason it may also be used in kidney gravel.

"Sensitive to noise and anxiety therefrom. Sensitive, weeping mood. Yielding, faint-hearted. Children become obstinate, headstrong, cry when kindly spoken to." "Fixed ideas: the patient thinks only of pins, fears them, searches for them and counts them carefully."

Nice, sensitive, timid and shy (Sil., Phos. Nat-m.). Obstinate, strong will power but lack of energy. Poor confidence (Lyc.), due to lack of strength. Afraid of falling apart. Feeling of fragility. Yielding and mild. Arguing drains them. Irresolution. Lack firmness. Aristocratic, sophisticated. Aggravated by a coarse environment or people. Well behaved because they lack stamina, energy. Overwhelmed and drained from conflicts and confrontations. Startled and upset easily.

Poor stamina, poor endurance, easily exhausted. Brain fog, worse mental or physical exertion. Chronic fatigue. Aversion to exerting themselves. Mental, emotional and physical weakness.

Premature babies with a failure to thrive (Calc-p.). Fontanelles that have slow closures. Slow learning to walk. Delayed development. Weak and malnourished children. Malnutrition. Protein deficiency, mineral imbalances, poor assimilation and poor deposition of minerals. Difficulty breast-feeding, tendency to regurgitate milk and have colic and diarrhea from breast milk (Calc-p.).

Weak muscles and bone structures. Easily injured, weak joints and ligaments, especially when tired. Shin splints, bones don't heal well. Curvature of the spine. Stooped shoulders, generally weak. Brittle nails with white spots. Fragile, brittle hair and nails. Crippled nails, produces inflammation around and under them. "Sensation as if the finger-tips were suppurating."

Unhealthy skin, every little injury ulcerates. Inflammation, swelling and suppuration of all the lymphatic glands and the glands of the skin. Tendency to form scars and keloids. Boils or cysts. Deep scars with unhealthy skin. Matures abscesses and reduces excessive suppuration. For indurations after suppuration, particularly in tonsils which refuse to heal after the pus has been evacuated and in abscesses which leave sinuses and fistula.

Useful to expel foreign objects, especially in the eyes. For splinters under the nails (Hyper.). In the provings, Sil. produced a sensation of a "splinter in the finger," of "a pin in the throat." For foreign bodies embedded in the tissues. Sil. will cause suppuration and expulsion of necrosed tissues caused from embedded objects. Sil. should be used with caution as the expulsion of harmless, encysted objects might risk the patient's life.

For restoring the perspiration of the feet when this has been suppressed, thus it is an indirect remedy in diseases arising in consequence of such suppression (e.g., amblyopia, cataract, paralysis, etc.). In such a case, the meatus is dry and enlarged.

Athlete's foot from suppression of sweat. Heavy foot sweats, foul odor, sweat eats away at their socks. Pungent, penetrating odor, sour, carrion-like. Sweat on hands and feet. The feet may give off an intolerable odor without any sweat. Offensive head sweat. Symptoms are better from sweat.

Keynote sensitiveness. Over-susceptibility to nervous stimuli. The senses are hypersensitive. The surface is tender and the least touch is painful. Brain and spine cannot bear even ordinary vibrations. This condition may be caused by losses of fluids as in spermatorrhea, or by over-worked brain.

Tendency to paralysis. Paralytic weakness from defective nutrition of nerves, brain, and spinal cord. Constipation with paralytic weakness. Epileptic convulsions, starting from the solar plexus, worse at full and new moon, and worse from any overstrain of mind or emotions.

Locomotor ataxia when the fingers feel stiff, with loss of power in them. Spinal irritation. The neck is stiff, causing headache. The small of the back aches as if beaten. The part of the body lain on goes to sleep. Sciatica, numbness and tingling around the legs. Worse lifting and straining. Arthritis, worse cold, damp.

Chronic headaches, which may owe their origin to some severe disease of youth. Headaches ascend from the nape of the neck to the vertex, as if coming from the spine and locate in one eye, especially the right. Headaches worse from draft of air or uncovering head, better pressure and wrapping head up warmly, better profuse urination. Headaches from over study (Calc., Nat-m., Phos., Ign.). Head injuries that lead to exhaustion and convulsions.

Vertigo, ascends from the back of the neck, as if one would fall forward (sometimes backward), worse looking up, closing eyes, lying on left side. Sleepwalking (Puls.).

Asthma, worse change of weather with yellow mucus. Asthma from exertion. Asthma is worse physical exertion, worse change of weather and worse cold, damp. Sinusitis, allergies, from low resistance. Shortness of breath, particularly in the elderly. Emphysema, particularly in those who inhale particulate matter. Problems with changes in altitude.

"Discharge of blood from the vagina every time the child takes the breast." "Nipple is drawn in like a funnel." Cysts and nodules in the breast. Constipation before and during menses. Prostration after sex.

Constipation, difficult stool. As from inactivity of rectum with great straining, as if rectum was paralyzed. Bashful

stool, when partly expelled, recedes again. Feces remain a long time in rectum. Cracking and dryness around the anus. Hemorrhoids. Fistulas and fissures, particularly in the anus, rectum and breasts.

Sensitivity to food. Aversion to milk, meat, fatty foods, sometimes sweets. Thirsty for cold drinks but not for ice (Phos. would want ice). Desires eggs, cold food. Aggravated by coffee, alcohol.

Weakness after vaccinations. Worse since vaccination (Thuj.) or never well since vaccinations. Epilepsy, asthma, headaches, chronic infections, abscesses, lack of stamina, loss of weight, excessive sleep, after vaccinations.

Worse from excessive stress, from pregnancy or surgery. Exhaustion and stress lead to physical ailments. Worse thinking about problems. Sensitive to noise and pain. Want of vital heat, even exercise will not get up any warmth. Heated and chilled easily. Chilly, but worse heat and stuffy rooms. Sensitive to cold, damp and changes of weather. Aggravated from drafts, from getting wet. Sensitive to the moon (Calc.).

Rushmore verified a peculiar symptom of Sil. in a woman suffering from scirrhus of her left breast. She had a feeling of dryness in her fingertips, as if made of paper, at night. Ant-t. and Sil. have this symptom, but only Sil. in afternoon. Sil. removed this and took away sharp, stinging pains in the tumor as well.

Clarke recorded a case of recurrent keloids, "Eleanor W., 14, had a growth on left temple. Five months previous she was an inmate in St. Bartholomew's Hospital and had a tumor removed from the spot, the tumor having existed for two years.

"A month after the operation a new growth appeared on the scar. Two months later this was removed. But it rapidly recurred and when I saw her there was a linear elevation an inch long, three lines wide and raised about two lines. It was red, shiny and slightly modulated, was tender to touch and the seat of shooting pain. Before the first operation there had been no pain and no discoloration of the skin.

"Hahnemann gives this symptom in the proving of Sil. "Stitching, aching pain in the spot where an ulcer had been formerly on the leg." Sil. 3c, night and morning, was prescribed.

"There was no further increase in the size of the growth, though it was still painful, the pain being apparently somewhat increased. In three months there was evident diminution in size and from that time the pain began to diminish. In seven months the growth had entirely disappeared."

RELATIONS -Antidotedby: Camph., Hell., Fl-ac. **It antidotes:** Merc-c., Sulph. **Compare:** (1) Gunpowder - abscesses, boils, carbuncles, limb purple. Wounds that refuse to heal, ailments from bad food or water. (2) Hep., Kali-p., Pic-ac., Calc., Phos. (3) Nat-sil. - tumors, hemophilia, arthritis, dose, three drops three times daily in milk. (4) Ferr-cy. - epilepsy, neuroses with irritable weakness and hyper-sensitiveness, especially of a periodical character. (5) Sil-mar. (6) Head-sweat and open fontanelles, Calc. (7) Head must be kept warm, Sanie., Mag-m. (8) Ailments from suppressed foot-sweat, Cup., Graph., Psor. (8) Want of vital heat. Led., Sep. (9) Vertigo as if one would fall forward from looking up, Puls. (10) Chronic sick-headaches since some severe disease of youth, Psor. Headache better pressure and wrapping up warmly, Mag-m., (11) Fistula in ano alternates with chest complaints, Berb.. Calc-p. (12) Somnambulism, Luna, Kali- br. (13) Vaccination ill effects, erysipelas, convulsions, diarrhea, Thuj. Apis, Sulph., Maland. (14) Scars, fissure of anus. Graph. **Complementary:** Thuj., Sanie., Puls., Fl-ac. Sil. is the chronic of Puls. **Follows well:** Bell., Bry., Calc., Calc-p., Cina, Graph., Hep., Ign., Nit-ac., **Phos. Followed well by:** Hep., Fl-ac., Lach., Lyc., Sep. **Incompatible:** Merc, and Sil. do not follow each other well.

***SILICONE

PHARMACY - silic. **Silicone. Historicaldose:** All potencies.

CLINICAL - Anemia. Arthritis. Autoimmune, disease. Fatigue. Fibromyalgia. Headaches. Lupus. Lymphadenopathy. Neuropathy. Pericarditis. Pleurisy. Rheumatism. Scleroderma. Sleep disturbance.

HOMEOPATHIC - Autoimmune disease. Chronic rheumatism, producing a painful thickening and contraction of the fibrous structures, interfering with motion and causing deformity. Neuropathy. Diseases involving the cranial or spinal nerves. Connective tissue diseases. Systemic lupus erythematosus, polyarteritis, scleroderma. Dermatosclerosis, hide-bound or skin-bound disease. Thickening of the skin caused by swelling and thickening of fibrous tissue, with eventual atrophy of the epidermis.

Rheumatoid arthritis. Inflammation or degeneration of connective tissue, accompanied by deposition of fibrinous material. Collagen disease. Fibromyalgia, aching, soreness, stiffness, with fatigue, sleep disturbance, headaches. Muscular rheumatism.

Diffuse erythematous skin lesions on the face, neck, or upper extremities, with liquefaction degeneration of the basal layer and epidermal atrophy. Lymphadenopathy (enlarged lymph nodes). Pleurisy or pericarditis. Glomerular lesions of the capillaries. Anemia, hyperglobulenemia.

***SILPHIUM LACINIATUM

(Rosin-weed)

PHARMACY - silphu. Silphium laciniatum. Rosin-weed. Rosin-wood. Compass plant. Pilot weed. Polar plant. Turpentine-weed. N. O. Compositae. Tincture of fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Asthma. Bladder, catarrh. Bronchitis. Cachexia. Cancer. Dysentery. Influenza. Nausea. Tuberculosis.

HOMEOPATHIC - The leaves of this plant, when they first come up, present their faces uniformly north and south, later on, when the leaves become heavy, the winds carry them in different directions and the polarity is not to be observed. The stem of the plant exudes an abundance of resin, as some of its names indicate.

Cooper used Silphu. in single doses of tincture with notable effect in cases of cancer of the throat and mouth. The great "sensation of emptiness" of the proving shows a relation to the cancer cachexia.

Hale mentioned that Silphu. has been used in all forms of asthma and in chronic bronchitis with large quantities of stringy,

Silphium laciniatum frothy, light-colored mucus and in catarrh of the bladder. Catarrhal influenza. Dysentery, attack preceded by constipated stools covered with white mucus.

Chest - Constriction and tightness of chest. Hacking, spasmodic cough.

Kidneys - Frequent urination with sense of heat or burning at meatus during urination. Urine, high-colored, scanty.

Lungs - Constriction of lungs. Catarrh with copious, stringy, mucus discharges. Irritation of posterior sinuses involving mucus membranes of nasal passages with constriction of supra-orbital region. Cough with expectoration, **profuse**, stringy, frothy, light-colored. Excited by sense of mucus rattling in chest and worse by drafts of air.

Mouth - Tongue, whitish slimy coat, with dry sensation as if burned with hot soup.

Nose - Irritation extends from throat up posterior sinuses to nose causing sneezing, followed by discharge of limpid, acrid mucus. Constriction and pressure in supra-orbital region.

Rectum - Stool natural, but covered with slimy mucus.

Stomach - Nausea, sick, faint feeling and a sense of emptiness in epigastrium.

Throat - Scraping, tickling and irritation of fauces and throat. Desire to hawk and scrape throat and throw off a thin viscid mucus. Engorgement and thickening of mucus membrane of throat extending down.

COMMENTS - Hale gave the case of Mr. H., 55, who had tuberculosis for twenty years. On the slightest exposure or cold he would have congestion of mucus surfaces, followed by copious expectoration of stringy, frothy, light-colored mucus (from one to three pints in twenty-four hours). Rapid exhaustion, at times keeping him in bed for weeks. Silphu. 2x trituration was used, 2 grains every two hours.

During the next night, less than a tea cupful of mucus was raised and its sudden decrease alarmed the patient so much that he left off the remedy until his doctor assured him that he was very much better and that the remedy had been more successful than he himself had expected.

RELATIONS - Compare: (1) Aral., Cop., Just., Tereb., Cub., Samb. (2) Silpho. - tuberculosis pulmonum with incessant cough, profuse night-sweats, emaciation. (3) Polyg-a. has been found useful in tuberculosis, when given in material doses of the mother tincture, salvia tickling cough. (4) Arum-d. - loose cough at night on lying down. (5) Just. - bronchial catarrh, hoarseness, oversensitive.

***SIMARUBA AMARA

(Mountain Damson)

PHARMACY - sima. Simaruba amara. Mountain damson. Simaruba officinalis. Simaruba glauca. N. O. Simarubaceae. West Indies and tropical America. Tincture of the dried root-bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Diarrhea. Dysentery. Snakebite. Worms.

HERBAL - Simaruba bark is used as a bitter tonic and as a local remedy for dysentery and diarrhea. The part used is the bark, which is really the rind of the root of which, domestically, a decoction is made. "In large doses," said the Treasury of Botany, "it is said to act as an emetic, purgative and diaphoretic."

Simaruba versicolor, a Brazilian species, has similar properties. The fruits and bark are used as anthelmintics, an infusion of the latter is employed in cases of snakebite. The plant is so bitter that insects will not attack it, on which account the powdered root has been used to kill vermin.

Simaruba glauca, a native of Cuba, furnishes a glutinous juice which is employed in certain cases of skin-

disease. And it is well to remember that Cedrón, which is “Simaba Cedrón,” belongs to the same order.

COMMENTS - Clarke's first practical acquaintance with Sima, as a homeopathic remedy was in the case of a traveling patient who suffered from a chronic tendency to looseness of the bowels. He had stools like yellow ochre, for which Gamb. had been very helpful.

When in the south of France, he consulted

Simaruba amara

a homeopath who prescribed Sima, with excellent effect. Since then, Clarke used it in similar cases.

H. H. Beamish said that for dysentery the simaruba bark is boiled and, by way of strengthening the astringent effect. Alum is added to the decoction. But Simaruba is the specific agent.

RELATIONS - Compare: (1) Cedr., Ail., Chap., Quas. (2) Vac., Chin., Rheum. Gamb.

REFERENCES-Clarke.

*****SINAPIS ALBA**

(White Mustard)

PHARMACY - sin-a. Sinapis alba. White mustard. Brassica alba. Senescent. N. O. Cru- ciferae. Trituration and tincture of the seeds. **Historical dose:** Tincture and all potencies.

CLINICAL - Anus, disorders. Backaches. Breast-feeding, disorders. Chills. Colic. Dyspepsia. Esophagus. Flatus. Gastric ulcers. Gastritis. Headaches. Heartburn. Mouth, inflammation. Pregnancy, problems. Salivation. **Threadworms.** Vomiting. Worms.

HERBAL - Sin-a., like Sin-n., is indigenous to Great Britain. The Treasury of Botany reported that “Its seeds are larger than those of Black Mustard and of a yellow color externally. Chemically they differ in containing a crystalline substance known as sulpho-sinapisin.

Moreover, its myrosine yields with water a pungent oil of a different character from the Volatile Oil of Mustard. The seed-leaves or cotyledons of Sin-a. furnish the “mustard” of “mustard and cress,” the “cress” being *Lepidium sativum*.

HOMEOPATHIC - Bojanus proved Sin-a., taking substantial doses of the triturated seeds and of a tincture made therefrom.

Under Sin-a. the prover, who had no sign of threadworms since his thirteenth year, passed many both living and dead and had all the usual rectal symptoms which accompany their presence. The urine too, was turbid, as is often the case in helminthiasis.

Marked throat symptoms, especially **pressure and burning with obstruction in esophagus**, sensation of a lump in esophagus behind the sternum and with eructations, similar symptoms in rectum.

The well-known emetic effects of mustard were produced by it and also its “**burning**” sensations in many parts, notably anus, stomach and esophagus. Flatulence. Headache, (better walking in open air. worse in warm room). Salivation.

MIND - Distracted in mind, while reading must make great efforts to keep thoughts from wandering.

Abdomen - Movements in abdomen. Heaviness as of a weight, fullness and distention in abdomen. Rumbling and gurgling with emission of odorless flatus. Emission of offensive flatus. Gripping colic.

Back - Pains in small of back and coccyx, as if sprained and bruised with urging to stool.

Chest - Oppression of chest, compelling frequent deep breathing. Burning beneath sternum.

Eyes - Sudden sensation of warmth with stitching in left eye compelling winking, eye fills with tears, after which the sensation disappears.

Food - Thirst.

Head - Sensation as if head hollow. Rush of blood to head. Headache better in open air worse in warm room. Heaviness in the forehead, as from intoxication or too great warmth of room. Pain in left frontal eminence, paroxysmal, pressive in the evening. Pressive pain in right frontal eminence worse moving head back and forth. Dullness with obscured vision, especially of forehead over eyes, worse walking.

Kidneys - Urine dark yellow, soon forming transparent cloud, bright golden yellow, dark brown like beer. Many grains of red sand deposited and iridescent film on surface. Thick, fatty pellicle. Cloud remains suspended in urine. Sediment white, like chalk and containing grains of white sand.

Limbs - Heaviness in lower limbs.

Male - Emissions without lascivious dreams.

Modalities - Better rest, open air. Worse by touch, pressure, motion, warm room. Crawling in anus worse swallowing.

Sensation of hard substance in stomach worse after eating.

Mouth - Root of tongue thickly coated yellow, on rising in morning, later extends along sides, especially left.

Profuse salivation with nausea, nausea better at rest, worse walking about. Saliva frothy, salt.

Pulse - Pulse full and hard.

Rectum - Burning, itching in anus, obliging to scratch. Crawling biting in anus. Violent, sudden pain in anus. Spasmodic griping in anus, worse after swallowing anything. Sensation as though a hard substance were lying in anus and could not be evacuated, not better by stool. Stools, black, hard, covered with mucus. Stools, small, thin, soft, greenish, copious, pasty, partly hard partly soft, sour, fermented, yellowish gray. Stools with dead threadworms.

Sensations - As if head hollow. As of a plug in throat of hard substance high up in esophagus under sternum, something hard lying in stomach after a moderate meal, hard substance in rectum not better by stool.

Sleep - Sleeps in afternoon with vivid dreams, aftereating. Vivid dreams of dead people and of death. Dreams confused and unremembered of foreign countries and dangerous expeditions.

Stomach - Burning, pressure, fullness and distention in pit of stomach. Thirst without heartburn, drinking water causes sensation of heaviness and fullness in abdomen as after eating. Belchings are tasteless and odorless. Belchings of acid liquid with griping scalding in pharynx, tasting of food. Nausea, qualmishness inclination to vomit, salivation. Nausea better at rest, worse by movement. Retching and vomiting of water. Vomits flakes of mucus with black streaks, yellow, odorless, tasteless matter with much tenacious, jelly-like mucus. After vomiting, scraping in throat and burning rising from stomach.

Temperature - Creeping chills on moving about, over whole body after vomiting with coldness of hands and feet and frequent belchings of gas. Inclined to perspire.

Throat - Scraping in fauces, provoking frequent hawking. Burning in pharynx in esophagus rising up from stomach like heartburn and pressure in esophagus. Sensation of hard body high up in esophagus, worse swallowing hard food and on empty swallowing in afternoon seems as if a plug sticking in pharynx (this sensation alternated with biting and crawling in anus). Sensation of constriction on swallowing hard food. Sensation as if a large morsel of food had been swallowed.

COMMENTS - A. L. Fisher said that for twenty years Sin-a. has had a prominent place in his armamentarium. He used it on the indications of the proving and he found that the states of pregnancy and breast-feeding seem to favor development of the conditions calling for it.

He verified "Excessive accumulation of watery saliva or mucus." "Acute bruised pain, even on slight pressure, just beneath ensiform cartilage." "Vomiting, ejecta consisting of flakes of mucus with black veins like clots of blood." "Crawling and burning in anus with griping in abdomen." "Spasmodic griping in anus, appearing at intervals and especially noticed after swallowing anything."

He cured with Sin-a. "Sore mouth with intensely red mucus membrane, dotted with minute white ulcers, the least food, even of blandest character increasing the burning that is present all the time and also in the throat." Bojanus noticed an alternation between the symptoms of the anus and those of the pharynx.

Clarke cured with Sin-a. "Sharp, shooting pain in right frontal eminence, worse in warm room, better moving about and in open air."

RELATIONS - An overdose of table mustard, which contains both Sin-a. and Sin-n. with starch is immediately antidoted by smelling bread. **Compare:** (1) Sin-n. - plug sensation. (2) Anae. - ball in anus, Sep. lump in stomach. (3) Bry., Abies-n., Nux-v., Puls. (4) Cina, Sant., Teucr., Napht., Scirr., - worms, helminthiasis.

REFERENCES-Clarke.

***SINAPIS NIGRA

(Black Mustard)

PHARMACY - sin-n. Sinapis nigra. Black mustard. Brassica nigra. N. O. Cruciferae. Trituration and tincture of seeds. **Historical dose:** Tincture and all potencies.

CLINICAL -Allergies. Amenorrhea. Asthma. Catarrh. Chlorosis. Chordee. Chorea. Colds. Constipation. **Coryza.** Coughs. Diarrhea. **Hay fever.** Headache. Heartburn. Hemorrhoids. Hiccoughs. Intermittents. Menses, premature. Mucous, fever. **Pharyngitis.** Post-nasal catarrh. Priapism. Scurvy. Strokes. Variola.

HERBAL - Sin-n. yields the greater part of the condiment so generally used in England. The plant is indigenous, but is nevertheless largely cultivated in Yorkshire and Durham.

Like many other Cracifers, Sin-n. has antiscorbutic properties and it has cured cases of ague, mucus fever, catarrh of bladder of stomach and of air passages. It has been most used in the treatment of hay fever.

Cooper suggested the use of Sin-n. as an aperient. He considered that the chief agent in effecting dislodgement of feces in constipated states is flatus. His method of producing this is as follows:

A tumblerful of hot water is to be taken in sips in the early morning, the same at breakfast time with some plain brown bread or with no solid food at all. At 11 a.m. one or two capsules of pure mustard, each containing about five grains of the powder to be taken, followed by half a tumbler of hot water.

"This last is most important, as the water drives on the capsule and prevents its staying about the cardiac orifice of the stomach and consequent distress to the patient. It also causes contraction of the walls of the stomach and consequent expulsion of flatus into the duodenum."

HOMEOPATHIC - Sin-n. is of use in **hay fever, coryza and pharyngitis**. Mucus membrane dry and hot, no discharge, worse afternoon and evening, either nostril may be affected alone or they may be affected alternately. Dry sinuses and pharynx with thick, lumpy secretion.

Mucus hawked or coughed from posterior sinuses felt cold. "Sweat on upper lip and forehead." Smallpox.

During the proving, symptoms were noted including "It seemed to double him up, could hardly stand, tears ran from eyes intense pain across epigastric region. Rose late, feeling sore and stiff all over. Weakness in all muscles."

MIND - Mind worked rapidly. Better by study or mental diversion. Irritable, difficult to think and study. Unreasonably cross.

Abdomen - Dull pain in left hypochondriac region. Heavy, dull pain as from weight below umbilical region. Severe twisting in umbilical region. Pain from left of umbilical region to left iliac region, later to right side, ascending colon. Accumulation of flatus with twinges of pain about umbilicus. Rumbling. Left inguinal gland swollen and painful. Sharp pain in right inguinal gland. Dull pain in right inguinal region better by pressure.

Back - Rheumatic pain in intercostal and lumbar muscles, sleeplessness from pain in back and hips. Severe, dull, pulsating pain under inferior angle of left scapula. Slight backache, becoming intolerable towards bedtime, better motion.

Bladder - Pain in bladder. Frequent **copious** urine flow day and night. Desire frequent, flow increased. Urine, pale, straw colored without sediment.

Causations - Damp weather, summer.

Chest - Wandering pains in chest. Pain in left side of chest in region of heart. Sensation in right chest as if heart were on right side. Respiration at base of left lung roughened.

Eyes - Eyes feel weak, pressure causes pricking in them. Pressing feeling in eyes.

Face - Shrunken features. Burning prickling in face. **Sweat on upper lip and forehead**. Lips dry and feel as if tissues were stiff. Red around mouth with smarting of lips. Sensation as if cheek were bulged outward by bubble of air, just below malar bone in afternoon.

Female - Menses appear long before the proper time. Amenorrhea and chlorosis.

Food - Appetite good. All food tastes of

Sinapis nigra horseradish, later tasteless. Aversion to sweets.

Head - Headache over right eye worse stooping. Head dull, heavy, better when mind occupied by study, shutting eyes, in open air, worse in warm room, when thinking of it. Frontal headache, most over bridge of nose and around edge of orbits. Forehead hot and dry. Sensation as if scalp were adherent to bones. Scalp hot and itches.

Heart - Dull, continual pain in heart toward apex in evening, seemingly in heart substance. Heart pains return daily. Sensation as if heart were on right side. Pulse accelerated, full.

Limbs - Dull, heavy ache in legs. Weariness in limbs, with cramps in calves. Weakness in calf-muscles. Constant pain in ankles and calves. Occasional dull pain in left shoulder joint.

Lungs - Allergies. Asphyxia. Pituitous asthma. Asthmatic breathing. Loud coughing-spells with barking expiration. Cough is relieved by lying down. Cough mostly dry or with expectoration of lumps of mucus worse in cold air, better lying down. Expectoration from posterior sinuses much mucus, which felt cold, white in tenacious masses.

Male - Violent erections during day and night, obstinate, painful and continued. Awakening him at night with lascivious thoughts, dreams and emissions at night.

Modalities - Better by study or mental diversion. Better sitting erect, shutting eyes. Better hearty meal. Better lying down at night, except dreams. Worse by touch and pressure. Worse motion, leaning forward, stooping. Worse thinking of symptoms. Worse warm room, July, August, damp weather. Worse evening, 4 p.m. to 6 p.m., 7 p.m. to 9 p.m. Laughing causes cough.

Mouth - **Offensive breath**, smelling like onions (Asaf., Coch.). Taste of garlic, causing nausea of horseradish. Profuse saliva. Dry, burning, extending to stomach. Tongue feels blistered. Black tongue. Tongue fissured in middle, dirty white coat, sore, raw. Teeth sensitive to warm drinks and cold air, especially stopped teeth. Swollen bleeding gums.

Nose - **Severe colds. Allergies. Hayfever**. Mucus from posterior sinuses. Scanty, **acid** discharges, making skin smart. **Stoppage of left nostril all day** or in afternoon and evening. **Nostrils alternately stopped**. Dry, hot with lachrymation, sneezing, hacking cough, better lying down. Dryness in both nostrils. Scurvy with copious and frequent nosebleed.

Rectum - Before stool uneasy feeling in rectum after stool, smarting cutting low down in rectum and anus. Desire for a stool without passage. Constipated, stools hard like balls. Diarrhea. First stool normal, second loose. Stools offensive. Smarting, cutting pain low down in anus after a stool.

Sensations - Vertex as if empty. As if she had taken cold. As if scalp was adherent to bones. As of pins sticking in eyeballs. Eyeballs as if pressed on from above. As if nostrils stopped up. As if movements impeded all around the chest. As if something heavy oppressed her on all sides from neck to diaphragm. As if cheeks were bulged out by a bubble of air below malar bone. Skin of lips as if stiff. As if blisters on tip of tongue. As if a load on stomach. Pain as if heart were on right side. As of hot water in blood vessels.

Skin - Burning heat and stitches in skin. Skin turns red. Ecchymosis. Chronic eczema. Smallpox. Ulcers on legs. Frightful suppuration and gangrenous inflammation reaching down to sternum (fatal effects of mustard applied to swollen glands of neck).

Sleep - Sleepiness during day, sleepless at night. Sleeps little at night, but does not feel loss of sleep. Restless sleep from pains in back and hips. Vivid or lascivious dreams.

Stomach - Burning in stomach, extending up esophagus, throat and mouth, which is full of canker sores. Ulceration of stomach and intestines. Pressure in epigastric region. Pain in region of stomach with sensation of faintness compelling to bend forward,

which relieves. Hiccough. Heartburn and belching. Hot sour belchings. ***Colic, pains come on while bentforward, better sitting up straight.*** Sweat relieves when nausea comes on.

Temperature - Severe chills, chattering of teeth, sensation of general coldness with shrunken feeling (from mustard bath). Heat through whole body, especially down spine. Quartan ague and inflammatory fever. Sweat and feeling of hot water in all blood vessels, better when menses came on. Sweat general, especially on forehead and upper lip. Sweat free from mental or physical exertion, from external heat.

Throat - Hoarseness, evening from 4 p.m. Feels scalded, hot inflamed. Dry sensation back of nose and throat. Throat sore, left side, on swallowing saliva. Whole throat behind uvula injected light red. Sore throat right side extending to left.

Vertigo - Vertigo of old people, violent attacks with hard hearing after eating heavy food, fat.

COMMENTS - Hansen added "Acute coryza with thin, watery, excoriating discharge, lachrymation, sneezing. Hacking coughs, better from lying down. Acute pharyngitis, throat feels scalded, hot inflamed. Loud coughing spells with barking expiration, heard at a great distance."

RELATIONS - Antidoted by: Smelling bread (immediate effects of taking excess of condiment): Nux-v., Rhus-t., or when blistering has been produced by a mustard poultice, soap is the remedy. **Compare:** (1) Sin-a., Thiosin., Coch. (2) Scalded sensation on tongue, Sang. (3) Cough worse laughing, Arg-n., Phos. (4) Cough, better lying down, Ferr., Mang. (5) Worse from 4 p.m. to 6 p.m., Lyc. (6) Amenorrhea, Sulph., Puls. (7) As if hot water in blood vessels (Rhus-t. as if blood running cold). (8) Sulph., Caps., Coloc. (9) Sin-a.. (10) Mustard oil by inhalation - acts on the sensory nerve endings of the trigeminal. Relieves pain in middle ear disease and in painful conditions of nose, nasal cavities and tonsils.

REFERENCES - Boericke. Clarke.

***SIUM LATIFOLIUM

(Water Parsnip)

PHARMACY - sium. Sium latifolium. Water parsnip. N. O. Umbelliferae. Tincture of root. **Historical dose:** Tincture and all potencies.

CLINICAL - Convulsions. Dizziness. Opisthotonos. Spasms. Tetanus.

HOMEOPATHIC - Knowledge of water parsnip is derived from cases of poisoning through eating the root. The Sium, symptoms bear a strong resemblance to those of the other poisonous Umbelliferae.

The most pronounced features of the convulsions were the drawing of the arms to the middle of the body, flexure of the fingers and the preponderance of the contractions on the left side.

Opisthotonos. Spasms, at first violently clonic, diminishing with each succeeding convulsion until they became little more than tremors. Loss of voluntary motion. Lack of mental energy (Aeth.).

MIND - Mentally excited. Lack of mental activity. Fear of death.

Abdomen - Sense of swelling and flatulence about bowels.

Eyes - Pupils dilated, responded steadily to bright light.

Head - Dizziness, headache.

Lungs - Breathing slow and stertorous.

Stomach - Nausea and vomiting, followed by a convulsion.

Temperature - Skin cold and clammy. Head hot, rest of body cold. Wet with perspiration.

Throat - Burning along digestive tract, especially esophagus.

REFERENCES - Clarke.

***SISYRINCHIUM GLAXOIDES

(Blue-eyed Grass)

PHARMACY - sisy. Sisyrinchium glaxoides. Blue-eyed grass. N. O. Iridaceae. The fresh root is macerated in twice its weight of alcohol. **Historical dose:** Tincture and all potencies.

CLINICAL - Coma. Delirium. Snakebites. Wounds.

HERBAL - Sisyrinchium was one of the old "Thompsonian remedies." Dr. W. U. Reed of Indiana contributed the following in 1892 to the Hom. Recorder, concerning this little known remedy.

"The roots of Sisyrinchium are used in the treatment of snake bites. A tincture is made from the roots, it is said to have been used by the Indians in treating snake bites, by bruising and moistening the roots and applying to the wound."

The symptoms of the snake bites cured with Sisy. are bluish black colored skin, as if dreadfully bruised. The whole body becomes very red, hot and dry, face dark red. The leg and foot are enormously swollen and of the same general appearance. The foot, calf of the leg and thigh turn black. Patient delirious but would cry out if touched. Wild delirium all night. Unconscious. Pulse quick and hard.

COMMENTS - Dr. W. U. Reed stated* We have growing in our woods and fields a small plant, which I believe to be a specific for the treatment of persons or animals bitten by the rattlesnake. From my own experience and observation in the use of this remedy, I believe it to be a positive cure in all cases if exhibited in any reasonable time.

"I have never known it to fail in a single instance, even where the alcoholic treatment and many other kinds had failed. I am not aware of its ever having been used as a medicine by the profession and, so far as I know, I am the first to prepare and use it in the form of a tincture."

Dr. Reed gave these cases: "(1) Bessie A., aged six years, while playing in the yard on a farm, some twelve miles in the country, was bitten in the hand by a rattlesnake which was killed a moment after by the mother of the little girl who was attracted by the screams of the child.

"Sixteen hours after I arrived, everything having been done in the meantime that had ever been heard of by the parents, even to applying a poultice the wound with entrails of a black chicken.

"The little sufferer was indeed, an object of pity. The hand and arm were swollen almost to bursting, the swelling extending to the shoulder and spine, being of a bluish black color as if dreadfully bruised. This discoloration extended over the back to the hips. Skin hot and dry, face flushed, pulse quick and hard. Child unconscious.

"I felt that the case was hopeless. But, through the earnest entreaties of the mother, I proceeded to do what I could. Saturating a piece of cotton with the tincture I had prepared, I bound it on the wound, then dropping twelve drops in a glass of water I directed that a teaspoonful be given every hour, the compress to be renewed every hour also, until my return.

"I confess I had little hope of seeing my little patient alive again but on my return the following day I was much rejoiced to find a decided change for the better in the condition of the little sufferer. The swelling was not nearly so tense, the fever had subsided, the delirium gone and the danger seemed past. The treatment was continued and a speedy and permanent recovery followed.

"(2) Burt Whitten, aged ten, while out in a marsh with a number of older boys gathering huckleberries, was bitten in the right ankle by a rattler. He was so frightened when he saw the snake, as it bit him, that he ran all the way home, a distance of nearly a mile, although the day was very hot.

"This patient came to my hands after the usual alcoholic treatment for twenty four hours by an allopathic physician with the patient growing worse all the time. I found this patient in about the same condition as the first.

"The leg and foot were enormously swollen and of the same general appearance, the foot, calf of the leg and thigh were black, the whole body was very red, hot and dry, face dark red, pulse quick and hard, patient delirious but would cry out if touched.

"Fifteen drops in a glass of water. Teaspoonful every hour with cotton saturated with the tincture applied to the wound. In this case the change, I was informed by the father, was quite noticeable in two hours.

"The boy had been in a wild delirium all night and up to the time he received the first dose of Sisy. After the second dose he

became quiet and in two hours the delirium had passed away. Under this treatment the patient was able to be out on the streets again in four days, though the discoloration did not disappear for some time after.

"Many more cases might be given where this remedy has been given to both man and beast with the same results."

REFERENCES - Anshutz.

***SKATOLUM

(Skatol)

PHARMACY - skat. Skatolum. Skatol. Methyl-indol. Minerals, carbon compounds. **Historical dose:** All potencies.

CLINICAL - Acne. **Belching.** Dyspepsia. Headaches.

HOMEOPATHIC - Skatol represents the ultimate end of protein decomposition and is a constituent of human feces. Sluggishness with no ambition. Acne with auto-intoxication dependent upon intestinal decomposition. Stomach, abdominal symptoms and frontal headache.

MIND - Lack of concentration, impossible to study, **despondent.** Lack of ambition. Desire to be with people. Irritable. Felt mean towards everyone. Desire to curse and swear.

Food - Appetite increased.

Head - Frontal headache, worse over left eye in the evening, **better by short step.**

Kidneys - Frequent, scanty, burning, difficult.

Mouth - Tongue coated. **Foul taste.** Salty taste to all cereals.

Sleep - Increased desire to sleep, wakes unrefreshed, half doped feeling.

Stomach - **Belching.**

Stool - Light, yellow, narrow, **very offensive stool.** Intestinal dyspepsia.

RELATIONS - **Compare:** (1) Indol., Bapt., Sulph.

REFERENCES Boericke.

*****SKOOKUM CHUCK AQUA** (Mineral Springs) **PHARMACY** - skook. Skookum chuck aqua. Mineral springs. Skookum limechen chuck. Medical lake. Strong Medicine Water. Salts of water from Medical Lake near Spokane, Wash. A lake in Western USA containing in grains per gallon: sodic carbonate 63.54, sodic chloride 16.37, sodic silicate 10.63, potassic chloride 9.24, ferrous carbonate. 526, Mag-c. 237, Calc. 186, aluminic oxide. 175 with traces of lithic carbonate, Bor. and potassic sulphate. Trituration of the dried salt. **Historical dose:** Tincture and all potencies, third trituration.

CLINICAL - Allergies. Breast, tumor. **Catarrh.** Coryza. **Eczema. Hayfever.** Lithemia. Otitis media. Ozaena. Rheumatism. **Skin, disorders.** Urticaria. Vaccination, effects.

HOMEOPATHIC - The medical and curative properties of this remarkable lake were known to the Native Americans of the northwest; they have many legends and tribal history concerning the lake, and it was held in much reverence by them.

The country around this lake was called "Sahala Lyee Illihe," or "Sacred Grounds," and no matter how hostile the tribes were to each other no members journeying to or from the "Skookum Limechen Chuck," or "strong medicine water," were ever molested.

"In the Skookum Chuck we have a remedy for all our ailments. We only have to bathe in and drink its water and we are made well. If we sign the treaty we will forever offend the Great Spirit, we will sign away our mother and she will cry. Her tears will dry up these lakes and we will be hungry and sick. We will go the Skookum Chuck only to find that its water have disappeared."

It is an anti-psoric remedy. Affinity for the skin and mucus membranes. **Skin disorders. Eczema.** Urticaria. Lithemia. Vaccinal eczema. **Dry skin. Hay fever.** Profuse coryza and constant sneezing. **Catarrh.** Profuse, ichorous, cadaverously smelling discharge. Otitis media.

Back - Heaviness in sacrum.

Food - Appetite increased.

Limbs - Severe rheumatic pains in limbs.

Nose - Profuse coryza with constant sneezing as in hay fever.

Skin - **Eczema.** Urticaria. **Dry skin.**

COMMENTS - In the U. S. Med. Investigator, 1889, Dr. W. D. Gentry told the story of a Frenchman passing by the lake, before the properties of the water became known to the white men, with a drove of sheep afflicted with a skin disease called "the scab."

As soon as the sheep saw the water they ran to it. but would not drink. They stood in the water for some time, and in a few days they were well of the "scab." The Frenchman was suffering with rheumatism and decided to try the water for his disease. He was steadily cured.

Stories of marvelous cures were reported by the Native Americans and by seeing those who had been taken there on litter, appearing at the point of death, return in health and vigor.

The cure of many cases of inveterate skin disease is on record, the external use of Skook. soap or ointment has been employed as well as the internal administration.

W. D. Ingalls reported the case of Mrs. D., 48, who had eczema of her feet. Fissured skin, exuding an acrid secretion. So excessively sore that the patient had not been able to wear shoes or walk any distance for two years.

Skook. 2x was given internally, an ointment of a drachm to the ounce of vaseline applied and Skookum soap used for washing. In two months the patient was able to wear shoes and in three months the feet were well.

Mrs. H., 23, had a benign growth in left breast, noticed eight months. No history of tuberculosis or cancer in family. Skook. was given for the first week, one grain of 1x every four hours, for the second week, two grains of Skook. 2x every four hours, for the next seven weeks, five-grain powders of Skook. 3x, when the patient was cured.

Mr. J., had chronic nasal catarrh, discharge greenish yellow having odor of ozaena, was greatly relieved and apparently on the way to cure.

B. F. Bailey reported the cure of Mrs.

X., 40 of lithemic diathesis, never free from eczematous trouble for years. At times much rheumatism. Not infrequently the rheumatism disappears and is immediately followed by styes on the eyelids.

Formerly treated allopathically and also homeopathically. Skook. 3x every four hours. Improvement soon showed itself and the patient was well in three months and remained so.

Mrs. Y., 26, lithemic with flushed face and yellowish background. Urine, 1030 and with marked uric acid deposits. Much difficulty of digestion. Great dryness of skin, especially of scalp. Hair falling out to such an extent that baldness was feared.

Skook. 3x was given every four hours. Hair ceased to fall out. The heated, congested feeling of head and face disappeared and the patient became well.

RELATIONS - Antidoted by: Tab. **Compare:** (1) Nat-c., Nat-m. (2) Skin disorders, Graph., Med., Maland., Vac. (3) Saxon. - appears has remarkable cleansing, deodorizing and soothing properties for the skin. Eczema, scalds, burns, sores and hemorrhoids.

REFERENCES - Anshutz. Boericke. Clarke. Phatak.

***SLAG

(Pulverized Slag)

PHARMACY - slag. Slag. Pulverized slag. Blast-iron-furnace cinder. Slag silica. Silico-sulphocalcite of alumina. Slag was analyzed and found to contain the following: Silica, Alumina, Calcium, Sulphur, part of these occur as Calc-s., Ferrum, Phosphorus, Magnesium, Manganum. **Historical dose:** Tincture and all potencies.

CLINICAL - Constipation. Debility. Diarrhea. Flatulence. Headache. Hemorrhoids. Housemaid's knee. Lumbago. Spleen, disorders. Tuberculosis.

HOMEOPATHIC - Slag was introduced into medicine by J. Meredith who gave the 6x trituration to a patient suffering from housemaid's knee and in addition to relieving this it took away "a dreadful anal itching, hemorrhoids and constipation as if by magic."

Meredith confirmed the rectal power of Slag by experiments on his own person. Acting on Meredith's suggestion, George Herring instituted a proving with the 3x on himself and others.

Herring's only symptom was a creeping irritation of the skin or under the skin in the umbilical region, sufficiently severe to keep him awake.

Drowsiness in evening. Digestive weakness and flatulence. **Soreness of the anus.** Constipation and diarrhea. Hemorrhoids with anal itching and soreness. Tuberculosis.

Housemaid's knee. Lumbago. Spleen disorders. Spleen pain and stitches in heart. A pain (dull, heavy sensation) alternated between inter-scapular region and spleen. Stiffness at back of head, neck and pain between shoulders. Dull, stupefying frontal headache.

COMMENTS - One prover, in which Slag produced no symptoms, was cured of flatulent distention in the evening and an oppressive feeling over the heart. Another prover had constipation relieved, but Slag produced "soreness of anus."

In a delicate woman of tubercular history, took Slag 3x twice a day, and experienced diarrhea, debility, quick pulse, lumbago with pain in back, distention of stomach, so that she had to loosen her dress, profuse night-sweat, cough and expectoration. Phos., Ph-ac., Carb. v. were given to this patient in succession and all helped. Another proving of Slag was made by F. C. B. The prover was age 33, rather dark, nervo-bilious, had chronically enlarged tonsils and tendency to colds in the head. He took Slag by way of experiment, hoping to cure his tonsils.

RELATIONS - Effects were relieved by: Phos., Ph-ac., Carb-v. **Compare:** (1) Constipation, flatulence, Lyc., Carb-v., Sulph. (2) Anal symptoms, Graph., Nit-ac. (3) Intolerance of tight clothing, Lach. (4) Housemaid's knee, Stict., Apis., Sep.

***SOL

(Sunlight)

PHARMACY - sol. Sol. Sunlight. Lactose is exposed to concentrated sun's rays and stirred with a glass rod until saturated. Potencies made by Fincke. **Historical dose:** All potencies.

CLINICAL - Allergies. Backache. Burns. Cancer. Cataracts. **Chills.** Constipation. Dermatitis. Faintness. **Freckles. Headaches.** Heat, stroke. Lupus. Menses, premature. Paralysis. Photophobia. Radiation, sickness. **Skin, cancers.** Skin, disorders. Snowblindness. **Sunburns.** Sunstroke.

HOMEOPATHIC - Dr. Finsen, of Copenhagen, revived and confirmed much of the ancient light-therapy. O. V. Thayer published, in 1893, a series of cases in which he had used concentrated rays of sunlight (solar cautery) including cases of skin cancer, rodent ulcer, parasitic diseases, moles, small wens, and birthmarks.

H. T. Webster gave details of a case of epithelioma in which the growth was removed by solar cautery and a scarcely perceptible scar left. Sunlight has cured **skin cancers** and lupus in the hands of Finsen.

Potentized sunlight has been used for sun dermatitis, heat stroke, cancer and radiation. Chronic sun headaches (Verat., Glon., Nat- c, Nat-m.). Violent headache from vertex down to forehead with hot sensation in face. Keynote photophobia. Very sensitive to sunshine.

Sunburns easily. **Never well since severe sunburn.** Sunlight damage of the eyes, from over-exposure, snow-blindness, sunblindness. Cataracts. Radiation exposure with nausea, vomiting, hair loss, emaciation (Cadm-s., X-ray.).

Mental excitement and anxiousness, at first with trembling of the heart, finally remaining in the stomach pit. Faintness, prostration and general stiffening up of the whole system, the body strength seems more equalized. Spasm coming with sunrise and ceasing with sunset. Some spasms appearing at sunset.

MIND-Decisiveness and assertive. Impatient to make decisions. Cheerful. Urge to be healthy, to eat fruit.

Mental restlessness. In control, then out of control. Irresolution. Light headed and mentally disorientated. Loses his way in well-known streets.

Depression, tearful. Sensitive. Suspicious. Irritable, impatient and frustrated. Irritability over trifles. Fastidious. Argumentative and angry. Nasty. Desire to bang head and scream. Escapism.

Excitement. Anxiety with trembling in heart. Anxiety in solar plexus. Anxiety if somebody comes towards her. Nervous, as if all the nerves were trembling. Very sensitive and easily frightened. Frightened on the approach of anyone coming toward them. Delusion of being pursued.

Abdomen - Anxiety in solar plexus. Swollen sensation on right side. Distention and hardness. Abdominal cramps with menses. Cramping pain on right side, better bending double. Gripping pain, like diarrhea. Foul flatulence. Sensation as after childbirth or at conception (with great excitement).

Back - Backaches. Pain in left side of back, hip joint area. Heat rash, red blobs, on back. Spots on back during menses. Itchiness, worse evening and in bed, better scratching.

Breasts - Tender, swollen breasts, before menses. Sharp pain in left breast.

Chest - Sensation as if a weight on chest. Chest very tight with wheezing. Armpits perspired without exertion. Sharp pain, top of rib cage.

Ears - Sharp shooting pain from left ear to nose, continued at intervals for some time. Partial deafness.

Eyes - Painful eyes from glare of sunlight. Photophobia. Light offends eyes. Snow-blindness. Diminished sensitivity of eyes, odd-blindness. Blurry vision with headaches. Suffusion of veins, of sclerotics. Cataracts.

Stinging pains. Sensation of swelling, as if eyes would force themselves out of sockets. Puffiness around the eyes.

Face - Jaws rigidly set as in trismus. Painful large spot on cheek. Pressing pain with sensation of heat in face. Perspiration on face, warm and tingly. Hot sweat on face, cold to touch. Dripping perspiration.

Female - Achy and bloated before menses. Diarrhea before menses, on going to bed. Menses six to seven days too soon. Menses, bright red blood. Menses slow, spotting. Very heavy menses, bright red blood, occasional clots, abdominal cramps. Sharp pain in uterus which turned to cramp, worse bending forward. Spots on back during menses. Green leucorrhea at night, with yellow-brown diarrhea. Itching genitalia, some discharge.

Food - Diminished appetite and thirst. Loss of appetite first thing in the morning. Desire for hot chocolate. Desire for juicy, refreshing things, oranges and grapefruit. Desire for cheese and salty foods. Desire for meat, prawns. Thirst, desires cold sweet drinks, lime juice. Thirstless, sips lemon squash, which relieves the throat.

Head - Light headed and mentally disorientated. Violent headache from vertex down to forehead. Headache

with the excitement and anxiousness at stomach pit. Left sided headache. Pain in forehead, as if forehead would crush itself down upon the eyes. **Headache from sunshine on bare head**, better by laying a glass of water on solar plexus. **Very sensitive to sunshine on the vertex**. Extreme painfulness if the sunshine strikes the bare head. Violent stitches in brain. Stitching pain if she does not gain the shade, stomachache and nausea follow. Sensation of undulating or floating in head after mental excitement. Instantaneous shock to brain, followed by prostration and a scalding sensation on top of head. Excessive perspiration of head and neck.

Heart - Anxiety with trembling in heart. Weakness about heart.

Kidneys - Increased urine though drinking less, night as well as day. Polyuria, urinates five times in night. Nocturia. Urine and stool invariably suspended.

Limbs - Drawing through all his limbs after rising. Right side, arm and foot, weak as from partial paralysis. Pain in left elbow. **Hands and feet cold**. The back of hand

exposed to sunshine feels warm, while at same time a coolness appears in palm and runs up whole arm into temple. Cool, refreshed sensations. Pains as if bruised. Pain like toothache deep inside left hip, better as day progressed, better walking. Fingers numb with cold, chilled to bone.

Lungs - Wheezing, difficulty in breathing, before bedtime. Wheezing on exhalation and inhalation. Coughs on talking. Coughed up green catarrh and blood, worse evening.

Male - Loss of libido. Increased libido.

Modalities - Ameliorated by cloudy weather. **Better hot bath**, when chilled to bone. **Better short naps**, sleep. Better bending double, sitting down. Eyes better hot flannel. Throat better cold sweet drinks. Headaches better pressure, cold application, orange juice. Worse sunlight (Nat-m.), from sunrise to sunset. Spasms coming with sunrise and ceasing with sunset. Worse from standing. Eyes are worse from wind.

Mouth - Offensive breath. Brown tongue, unpleasant taste on tongue. Food tastes like something she cannot tell. Food is more palatable if put in the sunshine. Dry mouth in morning. Sore gum, right side, top of mouth. Nail biting. Stupid, cannot articulate a word. Articulates with difficulty.

Nose - Sneezing with a little sore throat, as if she had taken cold. Stopped up, right nostril blocked completely.

Perspiration - Perspiration streaming out of stomach pit over whole body. Perspiration under armpits with no exertion.

Rectum - Constipation. Pale colored stool. Diarrhea at night in bed, yellow/brown, painless with green leucorrhea. Diarrhea on going to bed just before menses. Loose stools. Pains better stool. Hemorrhoids.

Skin - Freckles. Itching, red skin. Red blotches from sunlight. **Skin sensitive to sunlight**. Sunburns easily. **Never well since severe sunburn. Skin cancer**. Dermatitis, often with cold limbs, degenerates into megrim. Nevi. Painful spot on cheek. Spots on back during menses. Peeling of skin on left hand.

Sleep - Sleeplessness until 3 a.m. to 4 a.m. Head very much excited, could not sleep for hours. Great sleepiness all through the head and not merely in the eyes, heavy, sound sleep all through night. Sound sleep, oversleeping. Dreams of being lost, of travel. Tired on waking. Tired all day with irritability, worse early evening, better sleeping. Sleepiness, better short naps.

Stomach - Anxiety in solar plexus. Heat in pit of stomach. Empty feeling in stomach, as if she had not eaten anything substantial yesterday and today. Sensation of faintness and vacuity in stomach pit. Nausea, no hunger, desires cold drinks. Nausea on waking, worse as morning progressed. Nausea after lunch. Slight inclination to vomit, or actual vomiting. Desire to vomit but unable to.

Teeth - Grinding of teeth as in helminthic spasms.

Temperature - Cold shivers with aching neck glands. **Chilled to bone, very cold**. An agreeable coolness extends over whole body. **Chills**. Running chills of increasing sensation of cold in all limbs from holding wires partially exposed to the sun. **Shivering**. Felt cold in night, drew up more cover and perspired. Congestive chill from exposure to sun right after drinking cold water freely.

Throat - Swollen glands. Yellow ulcer on right side of throat, no pain. Swollen throat, white pus on left side. Sore, achy throat, on waking, desire for cold drinks. Sore throat better eating, worse after dinner. Catch in throat after sudden dry mouth in morning. Sensation of loose skin flopping on back of throat on swallowing. Catarrh.

Vertigo - Vertigo on waking at 6 am, better lying, worse closing eyes. Dizziness with nausea, worse standing, sitting. Dizziness with nausea, much better lying, sleeping.

COMMENTS - In 1880, Swan published a pathogenesis which contained information obtained from four provers and from Reichenbach's experiences from hypersensitives. The common effects of strong sunlight, such as sneezing, freckling and sunstroke, may be added to the list.

Dr. Thayer, in 1893 in southern California, wrote a paper on sunlight for a homeopathic journal. He described how to "Concentrate the sun rays to a diseased part until slightly burned or charred and then wait until it heals and then repeat the procedure."

He claimed to have cured all kinds of cancers, removed birthmarks, tattoos, warts, sebaceous cysts, ulcers, varicose veins and all other types of benign growths. "Unlike other caustics, it can be applied upon the most delicate of tissues and it causes only slight irritation and most heal with only the slightest scar."

Dr. Thayer coined the term "solar cauterization." A magnifying glass was used and the sunbeam was focused right on the skin cancer, until a burning sensation was felt, then stopped. This would be repeated once or twice a day. After a week or ten days the melanoma would fall off and it would heal without a scar.

Thayer had a whole practice based on the magnifying glass and focusing the sunlight in 1893 and very few homeopaths used his methods.

Dr. Foubister revived interest in Sol in its potentized form as an antidote for radiation poisoning from radiation therapy with cancer patients.

RELATIONS - Antidoted by: Aeon., Bell., Glon., Gels, and other sunstroke remedies. **Compare:** (1) Luna, Elect., M-aust., X-ray.

(2) Cadm-s., radiation poisoning. (2) Dislike of sun, Lach., Nat-c., Nat-m., Glon.

REFERENCES - Clarke. Daws. Foubister. Murphy. Scriven.

***SOLANINUM ACETICUM

PHARMACY - solin. Solaninum aceticum. Solanium aceticum aut purum. An alkaloid obtained from various Solanums, especially dulcamara and nigrum, also from the potato plant. Trituration. Solution. **Historical dose:** Tincture and all potencies.

CLINICAL - Lungs, paralysis. Tetanus. Ticklishness.

HOMEOPATHIC - Solin. is obtained from many of the Solanaceae. and especially from Dulc. It exists in potatoes, and under certain conditions of germination, potatoes may contain a poisonous amount.

An accident of that kind occurred in soldiers at Pfuhl who were supplied with potatoes containing about 24 percent Solin. Sixty-six soldiers had marked poisoning symptom including shivering, fever, vomiting, syncope and in one case convulsions. Skin and conjunctiva were tinged yellow.

Clarke's first acquaintance with Solin. was through seeing the effect of Solin. 2c in solution given by Dr. Hughes to a diabetic and semi-paralytic man of 60 who had frequent threat of respiratory paralysis with accumulations of mucus which he was unable to expel. Solin., more than any other remedy, rescued him from danger and prolonged his life.

Solin. was proved by Clarus and Schroff, among others. Slowed and oppressed respiration was a marked feature. Respiration was slowed in inverse proportion to the increase in the pulse rate.

Cerebrospinal irritation, hyperesthesia and convulsions, worse by touch. Fainting. Weakness. Sensitiveness to light, noise and touch. Skin more easily tickled than usual. In animals, the hind limbs were rigid and paralyzed and in the pro vers the lower limbs were weakened.

MIND - Stupefaction without previous excitement. Fainting.

Abdomen - Rumbling in abdomen.

Chest - Convulsions of thorax, which were associated tonic spasms of limbs.

Eyes - Pupils slightly contracted.

Head - Vertigo. Cerebrospinal meningitis.

Head hot. heavy, dull, painful. Pain in occiput.

Heart - Pulse increased in rapidity, weak, thready. Pulse and respiration slowed. Increased pulse rate with slowed respiration.

Kidneys - Albumen in urine.

Limbs - Weakness of lower limbs. Slight tonic spasms of lower limbs.

Lungs - Hoarseness. Breathing is slow, superficial, difficult and oppressed, distressed, especially on inspiration. Moist rattle during inspiration. Frequent violent outcry. Masses of mucus in larger air passages. Paralysis of respiration.

Mouth - Salivation. Bitter taste. The pure alkaloid has a cooling, acid and salt taste and when chewed causes a glutinous sensation in pharynx and throat with scraping which extends to stomach, where it becomes a peculiar sticking pain.

Skin - Yellow discoloration of skin. Skin dry. Hyperesthesia, creeping along spine when touching the skin, more easily tickled than natural. Itching.

Sleep - Frequent yawning. Great sleepiness with inability to sleep. Sleep restless, frequently disturbed by frightful dreams. Sleep frequently interrupted, without dreams.

Stomach - Constant belchings. Nausea and diarrhea and vomiting. Nausea, violent ineffectual efforts to vomit. About 5 p.m., vomiting three times without previous nausea or pain or any intestinal symptoms.

Temperature - Limbs cold. Shivering, fever, vomiting and syncope. Profuse perspiration without weakness.

Throat - Scraping in throat.

RELATIONS - Compare: (1) Dulc., Bell., Sol-c., Sol-nig., Sol-tub. or Sol-t-ae. (2) In respiratory paralysis, Dulc., Bell. (3) Sleepy but cannot sleep, Bell. (4) Hyperesthesia, Nux-v, Tetox.

REFERENCES - Clarke.

***SOLANUM ARREBENTA

PHARMACY - sol-a. Solanum arrebenta. Solanum acleatissimum. Solanum rebenta. Arrebenta cevallos, the Brazilian name. Tincture of the leaves. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC - Mure, who proved Sol-a., said of it, "The bush grows spontaneously in the provinces of Rio Janeiro, along roads and in cultivated places. It is from ten to sixteen inches high."

Sol-a. has been used for strokes, boils. "Redness of face and rush of blood to brain" (Bell.). Swelling of the glands. Swelling and pains in breasts (Bell.). Urticaria and vertigo.

REFERENCES-Clarke.

***SOLANUM CAROLINENSE

(Horse-nettle)

PHARMACY - sol-c. Solanum carolinense. Horse-nettle. N. O. Solanaceae. The fresh, ripe berries are macerated in twice their weight of alcohol. **Historical dose:** Tincture and all potencies.

HERBAL - In 1889 Dr. Napier called attention to Solanum carolinense as a remedy for the treatment of epilepsy, stating that it was used as a domestic remedy in for convulsions and "that he had successfully prescribed it in his practice."

HOMEOPATHIC - Sol-c. has **convulsions and epilepsy**, twenty to forty-drop doses is of great value in grand mal of **idiopathic epilepsy**, where the disease has begun beyond age of childhood, hystero-epilepsy, also in whooping cough.

COMMENTS - Dr. Charles S. Potts of the University of Pennsylvania, contributed a paper to The Gazette, Dec., 1895, on the remedy, giving several cases.

H. T., male, aged thirteen years. Idiopathic epilepsy, had his first spell five years ago, averaged one paroxysm daily. Sol-c. was first given in 10 drops doses without effect. When increased to 25 drops, the spells were lighter in severity, but occurred about as often.

The dose was finally increased to a teaspoonful four times daily. After being put upon this dose he was under observation six weeks during which time he had six seizures much lighter in severity.

T. H., male, aged twenty-eight years. He had epileptic seizures for three years, following an injury to the head which rendered him unconscious, but produced no other visible injury. Since this, however, had almost constant headache. The first spell was six months after the injury and have been frequent after, averaging three to four weekly, of an ordinary type.

Sol-c. in 40-drops doses three times daily was given, the spells at once decreased in frequency and severity. During the last six weeks he was under observation he only had three spells, very mild in type.

A. N., male, aged thirty years. First spell

one year ago, have since occurred every two weeks, good deal of headache. Sol-c. 30c drops three times a day. No spells for one month and headache ceased. He then stopped attendance.

J. D., female, aged eighteen years. First spell when thirteen years old, had one spell a month at the time of her menstrual period. About a week before her next period, she was given Sol-c. 40 drops three times a day and escaped the usual spell. The following month however, she had one.

I. K., female, aged twenty-five years. Nocturnal epilepsy forpast three years, about one spell a month. While using Sol-c. 40 drops three times a day, went three weeks longer than usual without a spell. The dose was then increased to 1 fluid drachm, she then ceased her visit.

F. S., female, aged twelve years. First spell five weeks before her visit, had been having them daily since. Sol-c. 30 drops ordered, this dose was gradually increased to 1 fluid drachm. During the three months that she was under observation her spells averaged in number about one a week.

H. B., male, aged eighteen years. First convulsion at age of ten years, then had none until three months before visit, had general convulsions about once daily since. Sol-c. 40 drops ordered. He was only under observation nine days, having during that time four spells, much milder in character.

A. C., female, aged fifteen years. First convulsion one year before, they had been increasing in frequency, up to one about every three days. During the three weeks she was taking Sol-c. 30 drops three times a day she had one spell, occurring during the third week.

H. K., male, aged eighteen years. First spell when fourteen years old. Every three or four days had several attacks in succession, an average of about one daily. While taking Sol-c. 40 drops, afterwards increased to

teaspoonful-doses, he had twelve in thirty-eight days, an average of a little less than one in three days, going six without having any.

REFERENCES - Anshutz. Boericke.

*****SOLANUM MAMMOSUM**

(Apple of Sodom)

PHARMACY - sol-m. Solanum mammosum. Apple of sodom. N. O. Solanaceae. Tincture of fresh ripe fruit.

Historical dose: Tincture and all potencies.

CLINICAL - Coxalgia. Coughing. Hemoptysis. Imtabi lity. Sleep, abnormal. Thought, difficult. Tobacco, effects. Twitching.

HOMEOPATHIC - Hering is the authority for Sol-m. The chief symptoms are irritability and inability to think. Uneasiness and inability to keep quiet. Sleepiness without being able to sleep, a kind a stupor worse at time of flood tide, at the full moon, better with ebb tide. Hawking, of blood-streaked mucus. Sensitiveness to tobacco (Ign.).

MIND - Irritability. Becomes exasperated at what he thinks may happen. Mental confusion. Inability for continuous thought. Difficulty expressing ideas.

Back - Twitching of large muscle below right scapula, as if the flesh were pinched up by the hand and shaken back and forth.

Limbs - Sticking pain in left hip joint that made him quite lame, frequently during and after walking, disappearing after standing and sitting down.

Lungs - Mucus hawked from the larynx contains streaks of bright blood.

Rectum - No stool, stool occurred later than usual and after much pressure.

Skin - Causes blotches over whole body from poisoning.

Sleep - Great weariness and desire to sleep without ability to sleep, followed by slumbering without real sleep. Deep sleep, from which he awoke and could not collect his senses for a long time and remained long in an irresolute condition. Sleepy in evening and sleeps well all night, even after afternoon sleeping. Dreams of death with violent weeping.

REFERENCES - Clarke.

*****SOLANUM NIGRUM**

(Black Nightshade)

PHARMACY - sol-n. Solanum nigrum. Black nightshade. N. O. Solanaceae. Tincture of fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Amaurosis. Blindness. Chorea. Convulsion. **Coryza.** Delirium. **Headaches.** Heartburn. Hydrocephalus. Mania. **Meningitis.** Night-terrors. Parotiditis. Peritonitis. Psoriasis. Puerperal convulsions. Scarletina. Skin, disorders. Smallpox. Stammering speech. Tetanus. Trismus. Tympanitis. Typhoid fever. Ulcers. Varicose veins. Vertigo.

HERBAL - Sol-n. is a common weed found in waste places. It has white flowers and black berries.

Green's Herbal recorded that "The leaves applied externally ease the pain and abate inflammation. Too large aquantity occasions violent sickness and headaches, giddiness, drowsiness and other dangerous symptoms. The Arabs apply the leaves to burns and ulcers, skin diseases and scrofulous and cancerous affections, they are diaphoretic, diuretic and purgative."

HOMEOPATHIC - Hale said some country practitioners used Sol-n. with much success under the impression that it was "an indigenous Belladonna," having been misled by the name "nightshade."

Hale verified its use in meningitis and headache. Also in scarlatina when the eruption is blotchy. He justly pointed out the close affinity of Sol-n. with Bell.: Delirium, headache, flushed face, sparkling eyes, pains coming and going suddenly, fiery rashes, burning skin and sweat.

"Frightful" headaches. Splitting, throbbing, bursting, piercing headaches, worse by least movement of head, least movement after sitting, light, noise, stooping. Headache is worse in a warm room and better in open air. Great sensitiveness to cold air.

Marked action on head and eyes. Brain irritation during dentition. Restlessness of a violent and convulsive nature. Formication with contraction of limbs. Ergotism with tetanic spasms and stiffness of whole body with mania. Black appearance, bruised feeling all over the body. Chronic intestinal toxemia.

MIND - Mania. Furious delirium, characterized by the cephalic cry, efforts to escape and stammering speech. Night-terrors. Complete cessation of the mental faculties due to headaches.

Chest - **Pain in left side**, sore to touch.

Eyes - Pain over both eyes. Alternate dilatation and contraction of pupils, weak sight, floating spots.

Head - Terrible headaches and complete cessation of the mental faculties. **Congestive headaches** (Bell.). Splitting, throbbing, bursting, piercing pains. Headaches at 10 a.m. Headache causes him to close eyes. Headaches, worse by least movement of head, light, noise, stooping.

Lungs - Constrictive feeling in chest with difficult breathing, cough with tickling in throat. **Expectoration thick, yellow.**

Modalities - Better closing eyes. Worse by touch, motion. Worse moving head, beginning to move after sitting. Worse walking (inclines to left), misstep. Worse swallowing. Worse morning on waking, light. Worse bright sunshine (eyes).

Nose - Acute coryza, profuse, watery discharge from right nostril, left stopped up with chilly sensation, alternating with heat.

Sensations - Brain as if swimming. As if things moving in a circle, when stooping. As if brain shaking about in skull, on moving head. As if head would split. As from a blow on forehead. As if sand in eyes. As if splinter in right tonsil. Tongue as if scalded. Pains come and go suddenly. Symptoms extend upward. Right upper, left lower. Alternate coldness and heat.

Sleep - Night terrors.

Temperature - Alternation of coldness and heat. Scarlet fever, eruption in spots, large and vivid.

Vertigo - Vertigo with a terrible headache and complete cessation of the mental faculties. The vertigo is worse on moving the head. Sensation as if the bed was being rapidly turned in a circle. Inclines to left on walking.

COMMENTS - The provings and symptoms of poisoning cases are unusually distinctive. Tendency to blackness of the skin. Painful swelling, it enlarges, becomes shiny, hard and deep red and in several places, quite black.

Marked dilatation of the pupils (Bell.). Dryness of mouth and throat. Spasms, convulsions and tetanic rigidity of the whole body. "In the midst of these convulsions the children frequently stretch out their little hands, then carry them eagerly to their mouths and go through the motions of chewing and swallowing."

A patient of Cooper's, after one dose of the tincture, patches of psoriasis on the knees, elbows and forehead, scaly with red irritating spots at roots of hair disappeared. The day after taking a single dose of tincture, another patient of Cooper's had, "Head feels full across forehead, eyes heavy and forehead burns, could not apply himself to work."

RELATIONS - Compare: (1) Bell. (2) Sol- m. - pain in left hip joint. (3) Sol-t. - cramps in calves and contraction of fingers, spitting through closed teeth. (4) Sol-v. recommended in facial paralysis. (5) Sol-a. - threatening paralysis of the lungs in the course of bronchitis in the aged and children must cough a long time before able to raise expectoration. (6) Sol-ps. - acute pains in lower abdomen, Sol-t. (7) Aegrotans - diseased potato. (8) Sol-t. Potato berries - cramps in the calves of the legs and fingers.

REFERENCES - Boericke. Clarke.

*****SOLANUM OLERACEUM**

(Juquerioba)

PHARMACY - sol-o. Solanum oleraceum. Juquerioba. N. O. Solanaceae. Tincture of flowers. **Historical dose:** Tincture and all potencies.

CLINICAL - Breast-milk, profuse. Breasts, swelling. Catarrh. Glands, swelling. Herpes Leucorrhea. Pustules. Sleep excessive. Styes. Urticaria.

HOMEOPATHIC - Mure reported that this plant is herbaceous, stem somewhat woody, the upper branches being covered with short and crooked thorns. It grows on the shores around Rio Janeiro in damp and shady places.

The most remarkable symptom of the proving was "**swelling of the breasts with profuse effusion of milk**" occurring in a woman of 60. "Pain and swelling of face and throat with inflammation." "Cold feeling in left chest after drinking." Drowsiness with headache. The generally deranged sleep of the other Solanaceae.

REFERENCES - Boericke. Clarke.

*****SOLANUM TUBEROSUM**

(Potato)

PHARMACY - sol-t. Solanum tuberosum. Potato. N. O. Solanaceae. Tincture of the berries. Tincture of green potatoes. Tincture of fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Amaurosis. Colic. Cramps. Diarrhea. Faintness. Headache. Iritis, rheumatic. Stammering. Trismus. Tumors. Vomiting.

HOMEOPATHIC - The poisonous properties of the berries and leaves of the potato plant are well known, and the tubers are popularly believed to have anti-scorbutic properties when eaten as food. Under some conditions

the tubers have been known to contain poisonous quantities of Solanin.

The symptoms are the result of eating new potatoes, green potatoes, an extract and the berries. The last proved fatal in a number of instances. Sickness and diarrhea with tenesmus, giddiness, dilated pupils and indistinct vision. Tossing to and fro in bed. A paralytic condition of the tongue, cramps and tetanic spasms. General rigidity. Patient is exceedingly weak. Faintness.

MIND - Almost lost consciousness.

Abdomen - Violent colic and vomiting. Pain in bowels. Tumors.

Eyes - Eyes deep in sockets. Pupils dilated. Staring look. Vision indistinct.

Face - Hippocratic face. Anxious expression.

Female - Tumors around cervix, uterus.

Limbs - Cramps, especially in calves with spasmodic contractions of fingers and thumbs.

Lungs - Difficult breathing. Respiration is hurried, irregular, at times suppressed, usually short and incomplete, only seldom slow and sighing.

Mouth - Constantly spitting through the closed teeth, viscid, frothy phlegm. Tongue covered with brown, moist fur. Tongue is heavy and difficult to move, hardly able to articulate. Speech thick. Speechless.

Pulse - Pulse small, rapid, scarcely perceptible.

Rectum - Diarrhea with tenesmus. Tends to relax bowels.

Skin - Skin livid.

Stomach - Epigastric region sensitive to pressure. Felt sick, a darkness over her eyes, skin cold, cramped all over. Violent retching followed by vomiting and diarrhea.

Temperature - Skin cold. Face, chest and limbs cold. Skin beaded with cold, clammy sweat.

Vertigo - Vertigo, headache, stupor.

COMMENTS - Cooper relieved with a single dose of Sol-t. tincture a case of rheumatic iritis.

Burnett cured a case of tumors feeling like masses of potatoes in the abdomen with Sol-t. It also assisted him in the cure of a case of tumors all around the cervix uterus. Urt-u. finished this cure.

RELATIONS - Compare: (1) Solin. (2) In paralysis of tongue, Caust., Dulc. (3) Iritis, Bell. (4) Stammering speech, Merc., Stram.

Clarke.

***SOLANUM TUBEROSUM AEGROTANS

(Rotten Potato)

PHARMACY - sol-t-ae. Solanum tuberosum aegrotans. Rotten potato. Diseased potato due to several fungi. Tincture of the affected tubers. **Historical dose:** All potencies.

CLINICAL -Anal, prolapse. Breasts, painful. Constipation. Nosebleed. Headache. Ileus. Menses interrupted. Noma. Pruritus vulva. **Rectal, prolapse.** Scalp, painful. Sciatica. Scurvy. Tenesmus. Tongue cracked. Vertebra, pain, pulsation.

HOMEOPATHIC - According to the Treasury of Botany, the "potato murrain" is characterized by "the rapid putrescence of the leaves and haulm, which is first indicated by the presence of a little mold, Peronospora infestans, which preys upon the tissues, spreading rapidly in every direction. The tubers also exhibit brown spots on their surface and within their tissues and according to circumstances decay with greater or less rapidity."

In 1846, the sudden inroad of this disease led to the famine in Ireland, resulting in the death of thousands.

Mure made the first proving of Sol-t-ae., using a potato "in an entire state of decomposition without, however, being completely rotten." Effects of eating diseased potatoes, some of them fatal, have been observed and these have been added to Mure's.

Dark skin. Breath and odor of body are offensive. Excruciating muscular pains. Cold water causes shock. The urine has an oily pellicle. **Prolapse of the rectum and anus.** Tumors of rectum look like decayed potato. Dreams of pools of blood. Irritability.

MIND - Quarrelsome, irritable mood. Bad temper. Dread of work. Hypochondriac mood. Fancies she is miserable, and dwells much on the future. Wants to enjoy a change of scenery. Crowd of ideas. Attention is easily disturbed by other things. Confusion of mind.

Abdomen - Painfulness of abdomen to contact along the median line. Belly hard, swollen, dropsical. Pain after eating, spasmodic pains, as though the bowels became twisted together, rumbling. Pain, as if sprained, in right groin. Stitch in right groin near inguinal ring. Flatulence.

Back - Violent beating in spine, early, when lying. Prickling sensation in spine. Stinging pain. Sensation of weariness in whole back. Stiffness in muscles of back. Tingling in sacrum. Prickling in psoas muscles. Pain in

lumbar vertebra, impeding walking. Swelling of muscles of neck.

Breasts - Breasts are painful, especially when raising arm.

Chest - Oppression in chest. Congestions to chest. Tearing in chest. Prickling as from a thousand pins on the inner surface of sternum. Violent stitching pain above right breast. Acute pain in the sides like a stitch.

Ears - Ringing in the left ear.

Eyes - Congestion of the conjunctiva. Prickling and burning in eyes. Profuse lachrymation, on waking. Burning in lids. Prickling about the lids, the surface of which is red. Spasmodic contraction and twitching of left upper lid.

Face - Face pale, bloodless. Swollen, especially about eyelids, nearly closing them. Face hot and red. Red pimples on cheeks. Desquamation of face. Bluish-black, fetid ulcer of left cheek. Upper lip is bleeding, cracked.

Female - Suppression of the menses. Menstrual blood rose-colored. Menses smelling of foul fish. Small pimples and intolerable itching of labia. Burning and itching in vagina. Flatulence presses on uterus. Spasmodic pains in uterus. Twisting pains through uterus. Feeling of dislocation in hip joint with pain in womb after a slight exertion.

Food - Canine hunger. Salt taste. Taste of raw potatoes. Food tastes as bitter as gall. Great desire for spirits and oranges. Burning thirst.

Head - Heat in head, evening. Heaviness of head. Catarrhal dullness. Lancinations, as if brain would burst open. Headache at noon, worse by the smell of spirits. Sensation of water splashing in head. Painful sensitiveness of scalp and roots of hair, cannot bear combing.

Heart - Weight and pain in heart region. Lancinations in heart. Palpitations of heart. Pulse is irregular, sometimes weak, hard and tense.

Kidneys - Region of bladder distended. Difficult urination. Urine reddish, mingled with mucus. Urine is very thick, soapy, turbid, of a dingy yellow with copious white sediment. Constant urination while at stool. Heat and pain in urethra after urinating.

Limbs - Sense of weariness in all the limbs. Inclination to stretch. Joints swollen and very painful. Acute pains in hip joint caused by least motion. Feeling of dislocation of hip joint. Legs edematous. Shuddering in right leg. Heat in hands.

Lungs - Constriction and difficulty breathing. Constant involuntary sighing. In trachea, tearing, prickling with cough. Cough with expectoration of yellow mucus, at night. Dry cough, day and night. Expectoration of lumps of black blood, early in the morning. After eating choking and difficult breathing caused by dryness of mouth. Hoarseness on walking.

Male - Weight in right testicle all day.

Modalities - Worse by touch, pressure, walking. Worse from smell of alcohol. Worse at 5 p.m., sleeping. Headache is worse on waking, from working.

Mouth - Dry mouth. Breath horribly fetid. Tongue pale, coated white or yellowish white. Tongue yellowish along the median line. Tongue swollen, cracked, early in the morning. Prickling in right half of tongue.

Nose - Repeated sneezing, followed by feeble cough. Pressure at root of nose. Nosebleeds. Smell of blood.

Rectum - Alternate protrusion and retraction of rectum during stool. Contraction of anal sphincter. **Prolapsed rectum and anus.** Acute pain in anus. Great heat in anus. Frequent urging to stool. Has to strain until tears come. Hard, large, lumpy stool, with violent burning in anus and rectum. Constipation. Copious greenish-yellow diarrhea. Violent colic previous to stool.

Sensations - Of water splashing on head, as if brain were leaping in skull (on stooping). As of something sticking in throat. As if there were a fleshy growth in throat. As if a spring unrolled in left hypochondrium. As if a hollow body were turning rapidly in chest. Of stoppage in trachea. Of something becoming detached from sacrum.

Skin - Skin is tender. Rose-colored patches appear and as suddenly vanish. Small red pimples cause violent itching.

Sleep - Irresistible drowsiness. Sleepless. Restless sleep. Starting from sleep, as in a fright. Amorous dreams. Dreams about men who become transformed to talking animals. Confused dreams, about fires, revolution, corpses, thieves.

Stomach - Pain in stomach, with red face, after breakfast. Spasmodic pains, griping- tearing at night. Acidity, bitterness, and gulping-up, after eating. Belchings followed by rumbling in stomach. Sour belchings causing a cough.

Teeth - Teeth covered with white mucus. Swelling of mucus membrane of the inner margin of the two incisors. Teeth loose and very painful. Gums, especially lower, spongy, oozing blood.

Temperature - Chilliness and sensation of internal coldness. Alternate burning heat and chilliness, at night. Sweat all over, early in morning, in bed, cold night sweat. The sweat makes the bed smell of potatoes. Heat all

over with sweat. Fever, afterwards dropsical appearance. Violent paroxysms of heat.

Throat - Feeling as of a fleshy growth in throat. Feeling as if something sticking in throat. Mucus accumulates in throat. Fauces and mouth inflamed, ulcerated in patches. Inflamed fauces, unable to swallow saliva.

COMMENTS - The symptoms of the Sol-tae. proving were severe, and one of the most important, prolapse of the rectum, has been confirmed by the poisoning cases.

A man and three children ate boiled diseased potatoes and among their symptoms were "Pain of an acute character was referred to the region of the anus, which on examination was found perfectly patulous and exquisitely tender to the touch.

Two of the four patients had prolapsed anus, which was probably caused by the violent and ineffectual efforts to discharge the contents of the rectum.

There had not been an evacuation of the bowels, nor had they passed water, except in drops and with extreme suffering, for six days. On introducing the finger into the rectum, which caused acute pain, it was found that the intestine was completely

filled to within an inch of the orifice with a solid substance."

The foul odor of the diseased potato is reproduced in the breath and body odor of the patients. Lips cracked and raw, gums bleeding tongue coated, thick, cracked, throat inflamed and ulcerated with sensation of something sticking in it or a fleshy growth.

In one poisoning case a condition of noma of left cheek was induced.

*****SOLANUM XANTHOCARPUS**

(Kantikari)

PHARMACY - sol-x. Solanum xanthocarpus. Kantikari. N. O. Solanaceae. Root, bark, fruit and flower.

Historical dose: Tincture and all potencies.

CLINICAL-Abscesses. Asthma. Boils. Bronchitis. Buboes. Cough. Cystitis. Dropsy. Dysuria. Hemorrhoids. Hoarseness. Kidney, disorders. Kidney, stones. Lung, disorders. Ophthalmia. Pneumonia. Smallpox. Teeth, decay. Urinary, stricture. Vomiting.

HERBAL - Ayurvedic physicians prized Sol-x. as an excellent remedy for cough, respiratory troubles, cough associated with hoarseness, ophthalmia, stone or calculus, stricture, and retention or suppression of urine.

Sol-x. is an aperient, carminative, expectorant, and diuretic. It is given in asthma, cough, catarrhal affections of the lungs, fever, flatulent and pain in the chest. As a diuretic, the decoction is given in dysuria, cystitis, calculi and dropsy, also given in costiveness.

A paste of the seeds is locally applied to promote suppuration of boils, buboes, and other indolent chronic abscesses. Fumigation of the fruit is largely used by natives

as sialogogue and applied for the relief of pain in carious teeth.

Charaka recommended Sol-x. in hemorrhoids, cough, delirium tremens, urinary difficulties, stone and calculus. Shushruta found it efficacious in ophthalmia, respiratory troubles, cough, urinary difficulties and troubles and stricture.

Chakradatta said that Sol-x. is useful in cough, stricture, and urinary troubles. Bangasena has recommended it in the cough of children.

Sol-x. is used by them separately or as a principal ingredient in their compound medicines for the above mentioned complaints.

HOMEOPATHIC - Hoarseness (Caust., Phos., Sei.), associated with cough. Bronchitis, pneumonia, or bronco-pneumonia associated with voice loss. Asthma.

Fevers associated with thirst, vomiting, aversion to food, burning sensation felt over the body and pains felt over the collective body of the ribs. Stricture, suppression or retention of urine and kidney stone.

Preventive against smallpox. The Ayurvedic physicians also used it against smallpox, dose being 1/8 tola of its root (white variety) to be given in the morning in empty stomach.

RELATIONS - Compare: In the cure of kidney maladies it can be compared with Berb., Canth., Sars. and Lyc.

*****SOLIDAGO VIRGAUREA**

(Goldenrod)

PHARMACY - solid. Solidago virgaurea. Goldenrod. N. O. Compositae, Tribe, Corymbifere. Tincture of whole

fresh plant. Tincture of flowers. The fresh blossoms are macerated in twice their weight of alcohol. Infusion of dry leaves and flowers. **Historical dose:** Tincture and all potencies.

CLINICAL - Albuminuria. Allergies. Asthma. Backache. Bright's disease. Bronchitis. Calculus. **Colds.** Conjunctivitis. Coughs. Croup. Cystitis. Deafness. Dysentery. Dysuria. Eczema. Edema. Eruptions. Gangrene. Gout. Hay fever. Hemorrhages. **Kidney, disorders.** Leucorrhea. **Nephritis.** Ophthalmia, scrofulous. Phosphaturia. Prostate, enlarged. Prostate, weak. Rheumatic fever. Rheumatism. Sciatica. Scrofula. Tuberculosis. **Urine, suppressed**

HERBAL - The common golden rod is the only British species of Solidago. It is common in woods and healthy thickets. "This herb," said Rademacher, "is a very old and good kidney medicine. It is a specific for kidneys and brings the patients back to the normal condition."

HOMEOPATHIC - Solid, has helped diseases arising from or complicated with defective functions of kidneys. It affects the digestive tract, lower limbs and blood. Hemorrhages. **Feeling of weakness,** chilliness alternating with heat.

Homeopathic replacement for the catheter. Pain in region of kidneys with dysuria. **Kidneys sensitive to pressure.** Bright's disease. Chronic nephritis. Uremic asthma. "Clear, stinking urine" is an indication of Cooper's.

Hay fever when golden rod is the exciting cause. **Takes cold easily.** Inhalation of the pollen has caused hemorrhage from the lungs in tuberculosis. **Repeated colds of tuberculosis.** Naso-pharyngeal catarrh, burning in throat, pains in limbs and thoracic oppression.

Abdomen - Costiveness, sensation of pain in the abdomen on both sides of the navel, upon deep pressure, gas. Severe pricking in both hypochondria to the region of the kidneys, reaching to the lower limbs.

Back - Backache. Lumbar ache, makes her sick all over.

Bladder - Cystitis. Catarrh of the bladder. Obstructed flow of urine. Scanty urine. Nightly dysuria. Catheterizing of bladder.

Chest - Rheumatism of the inter-costal muscles.

Constitutions - Especially suited to scrofulous subjects.

Ears - Sudden deafness with ringing in the ears and albuminous urine.

Eyes - Conjunctivitis. Scrofulous, herpetic inflammation. Red with enlarged prostate gland.

Female - Uterine enlargement organ pressed down upon the bladder. Fibroid tumors. Hemorrhage. Chronic leucorrhea in connection with copious, watery urine and sediments of mucus particles and uriniferous tubules, epithelium.

Kidneys - Kidneys, sore and tender, ache, feel distended. Pain in kidneys extends forward to abdomen, bladder, down the thighs. **Chronic nephritis.** Urine, voided with difficulty.

Limbs - Chronic pains in the loins. Rheumatic pains in the leg. Pains in the thighs, the leg can be moved horizontally. When limbs are moved perpendicularly they feel lame. Limping, dragging gait.

Lungs - Oppressed breathing. Continuous dyspnea. Allergies. Asthma. Periodical asthma with nightly dysuria. Bronchitis. Chronic catarrh of the lungs. Cough with much purulent expectoration blood- streaked. Heavy expectoration in coughing, croup and diminished urine.

Male - Enlarged prostate gland, obstructing flow of urine or inflammation. Weak prostate gland.

Modalities - Better from profuse urination. Worse from pressure, at night.

Mouth - Continuous bitter taste. Tongue heavily coated, clears when urine becomes normal. Flat ulcers in the mouth and throat.

Nose - Allergies and hay fever. Dry, inner surface of the nose covered with blood crust, scalding and very scanty urine. Paroxysms of sneezing with abundant mucus discharge.

Rectum - Chronic catarrh of the bowels. Dysentery, diarrhea. Profuse involuntary mucus stools.

Skin - Petechiae, on lower limbs with edema and itching, Gangrene, diabetic. Eczema worse from suppressed urine. Scrofulous rash, little blotches on hands and feet. Very obstinate, itching exanthemas. Exanthema of the lower limbs without swelling of the inguinal glands, but with disturbance in urinating.

Sleep - Insomnia.

Temperature - Rheumatic fever, very frequent pulse, high fever.

Urine - Dark urine, especially at night with very scanty brown and sour urine. Scalding and very scanty urine. Urine, dark and scanty or clear, stinking. Urine, voided with difficulty. Urine, albuminous, mucous, phosphatic.

COMMENTS - Anshutz wrote, "A lady, by administering, morning and evening, an infusion of the dry leaves and flowers of Golden Rod (*Solidago virgaurea*) tells me that she cured her husband of an affection of the bladder which had compelled him to use a catheter for a year or more.

"A friend of homeopathy desired to test the energetics of this plant. He had the first dilution of its tincture to be taken three times a day by seven patients. From forty-two to seventy-four years of age. They had been obliged

to catheterize themselves for weeks, months and years.

"Homeopathy cured them so thoroughly that they had no relapses. Surgeons who spend much time in catheterizing such patients for months and years could often cure them much more rapidly by prescribing for them the remedy just mentioned."

Gallavardin told of a woman who cured her husband, who had been compelled to use the catheter for more than a year, by administering an infusion of the dried leaves and flowers of Solid, morning and evening.

Dr. White said "I have used it in several other cases where it seemed indicated by the tenderness in kidney region and the inability to control the water from whatever cause, always the perfect satisfaction to patient and myself."

Gucken confirmed Rademacher's clinical observations and quoted further confirmations and cures by Dr. Buck of Wurtemberg.

The grand keynote of this remedy lies in the condition and the action of the kidneys and the quality of their secretions. Diseases arising from or complicated with defective action of the kidneys are very likely to be benefited by Solid.

Pain and tenderness in kidney region, pains extending from kidneys to abdomen, bladder and down limbs, urine dark, red-

brown, scanty, thick, voided with difficulty, albuminous, mucus and phosphatic urine. Affections of any other parts or organs complicated with these symptoms will probably find their remedy in Solid.

Buck mentioned scrofulous inflammation of the eyes. Clarke saw very sharp attack of conjunctivitis produced in a patient who was taking Solid. Also for prostatic troubles.

Buck noted several cases, including that of a boy, age 8, who had severe membranous diphtheria with scarlet rash, which was removed by Merc-cy. and Bell., but a fever of the typhoid type remained. The urine was albuminous and scanty, pulse weak and intermittent, feet swollen. Kali-ar. 4c was given, but the symptoms grew worse.

A thorough examination of the patient showed great sensitiveness of the kidneys to pressure in spite of the otherwise apathetic condition. Solid. 3x was given and in one day the urine became more profuse with corresponding improvement in the general condition. The body peeled and recovered completely.

A clerk, 45, had sleeplessness and pain in the back. He casually mentioned that it took him a long time to urinate for want of the necessary pressure. This he attributed to gonorrhea, which he had years before. No sleep until 3 a.m. when he got some sleep, which was not refreshing.

On rising, tired, especially upper part of thighs, then would begin the pain in the back, which extended to the loins and lasted until bedtime. Nux-v. did not relieve. The urine was found dark, slimy, reddish, slightly acid, not albuminous. Kidneys sensitive to pressure.

Solid. 3x, taken steadily for three months, cured. A year afterwards there was a relapse, but this time it took the form of sciatica and *Solid, again proved to be the remedy.*

Mrs. F., 53, wife of a farmer, stout, freshlooking, had her present trouble twenty-six years. After her confinement, which was difficult and followed by prolapse uterus, still existing. Her legs began to swell and an itching rash broke out by degrees.

Menstruation had always come on at

the proper time, but suddenly stopped six months before Buck saw her. Since then the itching had been almost intolerable, the legs more swollen and always cold.

Appetite very poor, constant bitter taste in mouth tongue thickly coated, at the same time a rising from the stomach as if she would suffocate and at the least exertion she lost her breath. Urinated very little and mostly at night.

No pains in the back, but the kidneys were sensitive to pressure. "The appearance of the lower limbs of this patient," said Buck, "frightened me. From knee to heel they formed a bluish-red mass in the shape of a stove-pipe and were covered with little blotches and crusts."

The prolonged use of Solid. 3x, though it did not effect a cure, produced a mitigation of the whole body, so that the woman induced her eldest son to consult the doctor.

This man had also trouble in his lower limbs not unlike his mother's. A year before he had some severe throat trouble after which his lower limbs began to swell and itch. They were also tinted blue-red and covered with vesicles, his urine was scanty and his kidneys sensitive to pressure. Solid. 3x cured him in a few months.

REFERENCES - Boericke. Clarke. Phatak.

***SPHINGURUS MARTINI

(Porcupine Tree)

PHARMACY - sphing. Sphingurus martini. Porcupine tree. Spiggurus martini. Hystrix prehensis. N. O. Sphingurinae. Trituration of prickles taken from one of the sides. **Historical dose:** Trituration and all potencies.

CLINICAL - Hair, loss. Jaw, pains. Stammering. Zygoma, pain.

HOMEOPATHIC - The old world porcupines have the name Histricinae, those of the new world, Sphingurinae. Mure proved the 3x trituration of the prickles.

The most noteworthy symptoms were falling out of the hair, especially of whiskers. Itching of the pubes after taking tea. Pain in the jaw-joint and right zygoma. Embarrassed speech. Nausea at sight of food.

Modalities - Better walking on open air. after dinner. Worse lying down, after tea.

REFERENCES - Clarke.

***SPIGELIA ANTHELMINTICA

(Pinkroot)

PHARMACY - spig. Spigelia anthelmintica. Pinkroot. Demerara. N. O. Loganiaceae. Middle and South America. Tincture of dried herb. **Historical dose:** Tincture and all potencies.

CLINICAL - Adenoids. Amaurosis. **Angina pectoris.** Anorexia. **Anxiety.** Ascarides. Bulimia. **Ciliary, neuralgia.** Colds. Colic. Concussions. Constipation. Depression. Diaphragm, stitches. **Dyspnea.** Exophthalmic, goiter. **Eyes, pains.** **Face, pains.** Gastric, catarrh. Glaucoma. Headaches. **Heart, disorders.** Hernia, inguinal. Iritis. Jaw, pain. **Migraines.** Nausea. **Neuralgias.** Otalgia. **Palpitations.** Pericarditis. Photophobia. Post-nasal, catarrh. **Prosopalgia.** Prostatorrhea. Pterygium. Rectum, cancer. Rheumatism. Scarletina. Sigmoid flexure, cancer. Stammering, speech. Strabismus. Tinnitus. Tobacco habit. Toothache. Vertigo. **Worms.**

HERBAL - Spigelia anthelmia is a common weed in South America. Spigelia Mary- landica, "**Pink-root**" or "**Worm-grass,**" is a native of the southern states of North America. Spig. was known in Europe in Hahnemann's time as an anthelmintic, the drug properties were learned from the natives of the Antilles.

HOMEOPATHIC - Spig. markedly affects the nerves, trifacial, heart, eyes, teeth, fibrous tissue and left side. Useful for pericarditis and other diseases of the heart. **Heart disorders and neuralgias.** It produces combined heart and eye symptoms, or the latter as an accompaniment.

Affected by the sun. Headache beginning at sunrise, at its height at noon, declining to sunset. Pains of neuralgias and headaches increases and declines with sun. Sun pains.

Neuralgia of the fifth nerve. Stabbing pains. **Pains are violent, burning like hot needles or wires,** jerking, tearing, stitching, radiating to other parts. **Very sensitive to touch. Parts feel chilly, send shudder through frame.** Body feels light while walking, heavy and sore when rising from a seat. Moves very carefully.

A remedy for stitches due to the presence of worms. **Child refers to the navel as the most painful part** (Gran., Nux-v., Plb., Mosch.).

MIND - Mental exertion difficult. Weakness of memory. Absence of ideas. Difficulty of thinking. Unfit for intellectual labor. Confusion on stooping. Sadness and discouragement. Stammering, repeats first syllable three or four times. Sits as if lost in thought, stares at a single object.

Agitation and anxiety, with restlessness. Anxiety about future. Restless and anxious. So nervous he can't control himself, feels as if he must run. Anxiety on seeing any one move quickly, on breathing deeply. **Afraid of sharp, pointed things, pins, needles** (Sil., Apis.). **Delusions about pins.** Excitement after sadness. Irritability during chill.

Mental irritability. Easily offended. Very restless and anxious. **Cannot tolerate thinking of pain.** Can become suicidal because the pain is too severe. Gloomy, suicidal mood. Desires death during chill. Great dejection in evening, he could have killed himself. Timidity.

Abdomen - Abdomen hard and painfully tight. Contact and pressure of clothes is unbearable. Colic with pinching pains in the umbilical region. Expulsion of fetid flatus.

Back - Neck stiff, pains into right temple or pain from left shoulder to neck. Cutting about the left scapula.

Causations - Concussions. Worms, ascarides and lumbrici. Sunlight. Tobacco.

Chest - Aching at the chest with painful oppression. **Angina pectoris.** Contraction of chest with anguish and obstructed respiration. Stitches in diaphragm with dyspnea. Craving for hot water which

Spigelia anthelmintica relieves chest pain.

Constitutions - Adapted to anemic, debilitated, rheumatic and scrofulous subjects. Suited to persons with light hair, pale, thin, bloated, weak with wrinkled, yellow, earthy skin. Children afflicted with worms, ascarides and lumbrici.

Ears - Roaring, buzzing and pulsation in ears. Stoppage of ears. Periodical deafness, ears feel as if stuffed.

Eyes - Pupils dilated. Rheumatic ophthalmia. Feel too large, **pressive pain on turning the eyes. Severe pain**

in and around the eyes, extending deep into socket, worse thinking of them. **Ciliary neuralgia**, neuritis. As if needles were thrust in. Profuse lachrymation, from affected side, tears acid. Eyes, red, sore, drawing ache. Yellow rings about the eyes. Difficulty in raising the eyelids with painful sensation of stiffness. Everted eyelids. Inclination to wink. Difficult to fit glasses, no settled focus, no fixed vision, latent errors of vision. Pricking in lids. Squints with worms. Photophobia.

Face - Prosopalgia involving eye, zygoma, cheek, teeth, temples. Worse from touch, stooping, from morning until sunset, drinking tea, suddenly going and coming.

Food - Ravenous hunger. Anorexia with violent thirst. Bulimia, sometimes with nausea and thirst. Putrid, fetid taste. Aversion to coffee, tobacco smoke and snuff. Craving for hot water which relieves chest pain.

Head - Feels too large. Migraines. **Awn from beneath frontal eminence and temples, extending to eyes** (Onos.). Semi-lateral involving left eye, pain violent, throbbing, worse making a false step. Pain as if a band around head (Carb-ac., Cact., Gels.). Pain from left occiput to over left eye, worse stooping, making a false step, opening mouth. Supra-orbital neuralgia.

Heart - Violent sticking or compressive pains, radiating to throat, arms, scapula, worse least motion or bending double. Soreness, purring, cracking in the region of heart. **Angina pectoris**. Neuralgia extending to arm or both arms. Craving for hot water which relieves. **Violent palpitations**, audible, attending other symptoms. Frequent attacks of palpitations, especially with foul odor from mouth. Throbbing of carotids and subclavian arteries. Precordial pain and great aggravation from movement. Pericarditis. Rheumatic carditis, trembling pulse, whole left side sore. Pulse intermittent with palpitations, weak tremulous irregular.

Kidneys - Frequent want to urinate with profuse emission, even at night. Sudden and involuntary dribbling of urine with burning sensation in anterior part of urethra. Urine with whitish sediment.

Limbs - Fatigue. Drawing, tearing, twitching pains in limbs and joints. Left arm numb. Pulsation in patellae. The limbs are affected mostly when walking.

Lungs - Dyspnea, must lie on right side with head high, worse moving in bed, raising arms. Hydrothorax. Trembling in chest. Stitches in chest worse least motion or when breathing.

Male - Discharge of prostatic fluid from the urethra.

Modalities - Better from rest, lying on right side with head high. Better inspiring, steady pressure, warmth. Pressure helps the neuralgia, cold application helps temporarily. Better while eating, worse immediately after. Worse light touch but better firm pressure. Worse motion, jar. Worse turning, rising, raising arms, stooping, bending forward. Worse from sex. Worse slightest draft, cold, damp, rainy, stormy weather, cold air, cold washing. Worse with the sun (Nat-m.). Worse morning, on waking. Worse blowing nose, expiration, tobacco. Worse noise. Worse thinking of problems.

Mouth - Foul odor from mouth. Offensive taste. Tongue, coated yellow or white, cracked, with burning or stitching pain. Tongue fissured, painful. Opening mouth aggravates headache.

Nose - Tickling and itching of nose. Forepart of nose always dry. **Chronic catarrh** with post-nasal drip of bland mucus. **Discharge through posterior sinuses**. Flow of water during prosopalgia.

Rectum - Constipation and diarrhea. Frequent, ineffectual urging to stool. Faints at stool. Stools of large lumps of mucous. Itching, tickling and crawling in anus and rectum. **Worms**, ascarides.

Sensations - As if he would fall. As if intoxicated. As if head would burst. As of a band around head, as if head tightly bound. As if electric sparks in temples. Brain as if loose. As if eye would be pushed out of head. As if hairs or feathers on lashes. Face feels as if it had been scorched. As if heart compressed or squeezed with a hand. As if everything in chest were too short, loose and wobbling about. As if something tearing in chest.

Skin - Pale, wrinkled skin of body. Painful sensibility when touched. Painful glandular swellings. Red pimples with pain when touched, as from excoriation.

Stomach - Pressure in stomach. Accumulation of mucus in the stomach. Sour risings. Nausea with sensation of a worm rising in throat. Nausea when fasting.

Teeth - Tearing pains, worse after eating, cold, and when thinking of it. Toothache with facial pain, better by warmth or the warmth of the bed. Nerve toothache. Toothache, worse cold drinks (Mag-p., better warm drinks.), better by smoking tobacco.

Temperature - Chilliness on the slightest motion. Cold, offensive sweat on upper part of the body, on hands. Heat, flushes at night in back.

Throat - Sore throat with lacerations and swelling in palate. Discharge of mucus from fauces all day, most from posterior sinuses. Swollen cervical glands.

Vertigo - Vertigo on stooping with heat of head. Vertigo as if they are drunk. Vertigo, the feet as if higher than head. Vertigo worse looking down, must look straight ahead, worse standing, walking. Vertigo, hearing exalted.

COMMENTS - Hahnemann said Spig. has the peculiarity that the primary action of a single unrepeatd dose usually increases somewhat daily during the first seven to ten days. Experiments should be conducted with

caution, seeing that 60, 80 to 100 drops of the tincture produce violent effects even in robust persons.

Keynote violence. More left-sided than right, but by no means exclusively left-sided. Primarily affects the head, eyes, face, teeth and heart. Sensitivity to cold, wet and stormy weather.

Produces intense pains in all parts. Hypersensitive to all pain. Burning, jerking, tearing, pressing and stitching pains, radiate and extend to other parts. Pains are largely out-pressing and proceed from within outward and below upward. Pains are worse by noise, jar, movement, change of weather, especially stormy weather. The pains were worse night and morning and in damp weather. Sensitive to pain remedies (Cham., Nux-v., Ign., Hep.).

Darting and aching pains in head, nose and eyes and similar pains about the heart with slow, irregular action, but no murmur. Sudden pains at bottom of back. The body is painfully sensitive to touch. Pain feels like shiver in the body, eye or face. The part touched feels chilly. Touch sends a shudder through the whole frame. Pain radiates from a spot, not in a straight line. Darting pain. Pain will transfix (Bry.).

Neuralgia, especially facial neuralgias. Pains over the left eye or the left side of the face, trigeminal neuralgias. Neuralgias with burning sensations or electric-like sensations. Intercostal neuralgias (Ran-b.). Often with neuralgia, their whole left face consists of tearing pain as if someone is cutting their face or tearing the skin off their face.

Neuralgias and inflammation of the eye, amaurotic conditions, and glaucoma. Exophthalmic goiter. Intolerable pressive pains, worse on motion. Stabbing pains through eye backwards into brain. Uveitis. Ciliary neuralgia or affection to the optic nerve with cutting, stabbing pain, the eye becomes inflamed and watery. Sensation as if eye would burst. Deep pain in eye socket.

Dilated pupils, can see sparks and rays of light. Severe photophobia, especially with headache, they want to be in the dark with a hand covering their left side and making no noise and staying from noise.

Migraine, from occiput, settling in or over left eye (Sang, starts at the occiput and settles in the right eye; Sil. and Gels, are from occiput to forehead.). Occiput feels numb and stiff.

Heart attack, aching pain. Acute heart attacks with sharp, stabbing, burning pains down the left arm (Lat-m.), or it feels as if a hot, red, burning knife is stuck into the heart and turned. The heart feels as if squeezed or compressed, sense of suffocation. Palpitation as if the whole chest will shake. Violent palpitation, can hear or see the heart beating. Irregular heartbeat. Left-sided angina.

Suffocative attacks, can become anguished, think they are going to die. Chest pain, worse during deep breathing (Bry.). The movement of the rib cage aggravates. Stitching pains synchronous with the pulse. Heart disorders from rheumatism. Rheumatism.

Abdominal ailments with worms. Masses of lumbrici have been expelled and also threadworms. Itching of anus and nose, colic and borborygmus. Fetid breath and fetid flatus.

In one prover, the accustomed evening smoke caused violent toothache. Clarke cured a case of cardiac neuralgia caused by tobacco. He saw cardiac murmurs appearing in acute rheumatism disappear under Spig. Hochecker related the case of Miss O., 27, who was blonde, tall, and robust, and had neuralgia for several weeks without traceable cause. Pains came suddenly, twitching and tearing of left side of face, now in ear, then in lower jaw, particularly worse by mastication. Whenever the pains were about to commence a diarrhea set in. A single powder of Spig. 6c cured.

Hochecker also cured with Spig. 3c, 6c, 10c and 20c a case of tic douloureux of the right side that had lasted fifteen months. In this case, each lower potency, after first relieving, caused an aggravation. So the potencies were successively raised. Spig. 20c completed the cure. This patient had dark hair and dark complexion. She attributed her trouble to taking cold in a draft when heated by dancing.

A patient Clarke successfully treated for a serious heart affection with Spig. 3c said that under the treatment he had lost a pain in the right knee that he had for eighteen months and which he had not mentioned at first. The pain was as if dislocated, unable to rise from kneeling, could not find an easy position often for hours at night.

Clarke found it especially useful in heart cases where constipation has been a troublesome complication.

Hering gave this case, "Helminthiasis: dilated pupils, strabismus, putrid smell from mouth, itching of nose, griping pain in belly, throat inflamed, swallows often, pale redness in throat and swelling of mucus membrane, palpitation."

Meninger had a severe case of nausea during pregnancy that he cured with Spig. The only leading symptom in the case was that she was afraid of pointed things and asked her husband to take away a fork, crochet-needle, etc. Sil. has a somewhat similar symptom, but the Sil. patient hunts for pins although afraid of them.

RELATIONS - Antidoted by: Camph., Aur. (restlessness in limbs), Cocc., Puls. **Antidote to:** Merc., Colch. (heart). **Compare:** (1) Spig-m., Nux-v., Ign., Cur. (2) Aeon., Cact., - Cimic., (3) Arn., Spig. is a chronic Arn. (4)

***SPIGELIA MARYLANDICA

(Worm Grass)

PHARMACY - spig-m. Spigelia marylandica. Worm grass. N. O. Loganiaceae. Tincture of dried root. **Historical dose:** Tincture and all potencies.

CLINICAL - Mania. Strabismus. Vertigo.

HOMEOPATHIC - The symptoms of Spig- m. are mainly from overdosing. A state of mania was induced in a boy from large and frequent doses of a decoction of the root. Strabismus of right eye was noted in one case. On attempting to assume erect position, seized with general tremor lasting a few seconds and leaving her exhausted.

Maniacal excitement, paroxysmal laughing and crying, loud, disconnected talking, vertigo, dilated pupils, congestions. On attempting to assume erect position, seized with general tremor lasting a few seconds and leaving her exhausted.

MIND - Suddenly affected with complete mental derangement(Stram.). Countenancedistorted, running and skipping. Fits of laughing and crying. Wild and incoherent talking.

Eyes - Pupils greatly dilated. Irregular movement of adductors and abductors of eyes. Strabismus of right eye. Pain in and about the eyes. Sensation of stiffness of eyelids.

Face - Wild, staring, ludicrous expression. Swelling of face and about eyes. Face flushed.

Heart - Pulse is accelerated, irregular. **Mouth** - Tongue pointed and tremulous. **Skin** - Hot and dry.

Sleep - Drowsiness.

Vertigo - Dizziness.

***SPILANTHES ACMELLA

(Toothache Plant)

PHARMACY - spil. Spilanthes acmella. Toothache plant. Paracress. N. O. Aster- aceae. Paraguay cress. Brazil. Tincture of freshleaves, root and flower **heads. Historical dose:** Tincture and all potencies.

CLINICAL - Allergies. Bacteria, infections. Candida. Colds. Dysentery. Fungal, infections. Glands, swollen. Gum, disease. Herpes. Influenza. Lyme disease. Malaria. Parasites. Ringworm. Salivation. Sore throats. Toothaches. Viral, infections. Wounds.

HERBAL - Also known as "Toothache Plant" or "Paracress," Spilanthes acmella is a flowering herb in the Asteraceae family. Its leaves and flower heads contain an analgesic agent that may be used to numb toothaches. It is native to the tropics of Brazil, though it is grown as an ornamental (and occasionally as a medicinal) in various parts of the world.

Chewing on one of the flower buds will numb your mouth and make you salivate. The leaves may be used topically to treat bacterial and fungal skin diseases such as ringworm. Leaf decoction is used as diuretic and lithotriptic. Root decoction is used as purgative. The whole plant is used in treatment of dysentery.

Useful for enhancing the immune system's resistance to infections. It stimulates wound healing, protects the individual from colds and flu. Decreases allergic symptoms. Antibacterial. Inhibits the yeast/fungal organism Candida albicans.

Indicated for swollen glands, gum disease and all manner of acute bacterial, viral and fungal infections. Herpes. Sore throats. Useful against blood parasites, particularly malarial spirochetes, either as a prophylactic or as a treatment for malarial paroxysms. Lyme disease.

Because of their high isobutylamide content, both Spilanthes and Prickly Ash have similar stimulating and therapeutic actions.

REFERENCES - Murphy.

***SPIRAEA ULMARIA (Meadow-sweet) **PHARMACY** - spirae. Spiraea ulmaria. Meadow-sweet. Hardback.

Queen of the Meadows. N. O. Rosacea. Tincture of fresh root. **Historical dose:** Tincture and all potencies.

CLINICAL - Bites. Conscientiousness, morbid. Convulsions. Eclampsia. Epilepsy. Esophagus, stricture. Eyelids, disorders. Gleet. Hydrophobia. Prostatorrhea. Ptosis. Rabies. Urine, deposits.

HOMEOPATHIC - Bojanus proved *Spiraea ulmaria*, taking substantial doses. A leading symptom was the production of general and local heat. Heat in throat in esophagus, under sternum, under ensiform cartilage. Bojanus was seized with remorse, a kind of morbid conscientiousness. Fullness and heaviness of head. Washing with cold water was very unpleasant and caused a feeling as if the head were too large.

A scurfy condition of eyelids and heaviness of lids after afternoon sleep were noted. The urine was turbid as if mixed with clay and deposited red sand, had an oily film on the surface.

The burning in esophagus was better by eating and drinking but not by empty swallowing. Burning and pressure in esophagus, feels contracted but not made worse by swallowing.

Relieves irritation of the urinary passages influences the prostate gland. Checks gleet and prostatorrhea. Bites of mad animals. Heat in various parts.

Hansen mentioned that *Spiraea* was recommended in hydrophobia, epilepsy and eclampsia.

MIND - Restlessness, obliged to rise and walk about. **Morbid conscientiousness.** Remorse over a long-past slight indiscretion. Fearful qualms of conscience. Loathing of himself. Hydrophobia.

Abdomen - Sensation of heaviness in the lower part of the abdomen. Very offensive flatus. Odorless flatus.

Bladder - Burning in the urethra while urinating.

Eyes - Sclera is bright red. Sensation as if something hot in the eyes. Eyes filled with mucus. Lachrymation with smarting and increased sensation of warmth. Indistinct vision, as through a mist, relieved by blinking and rubbing the eyes. Heaviness of the eyelids with headache.

Face - Redness of the face. Sensation of heat in the face and eyes.

Head - Headache on shaking the head. Pulsations. Dullness and heaviness in the head. Pain as if a ring were tightened about the head. Sensation as if the brain wobbled to and fro.

Food - Hunger disappeared. No relish for smoking.

Limbs - Heaviness in all the limbs.

Lungs - Dry cough. Cold feeling in lungs on inspiration.

Male - In the morning, in bed, violent erections, with great sexual desire.

Modalities - Better moving about. Better in open air. **Worse leftside.** Worse indoors. Worse moving head, sneezing.

Mouth - Drawing pain. Toothache in back teeth.

Rectum - Sensation as if drawn rectum inward. Sensation as if the anus would not open sufficiently. Prickling constrictive sensation in the anus. Crawling and prickling in the rectum. Frequent desire for stool, that suddenly disappeared. Hard stool. Feces lumpy, like balls of rabbit's dung, without being hard.

Sleep - Overpowering sleepiness. Restless sleep, frequent waking and tossing about. Sleep full of vivid dreams. Lascivious dreams and emission.

Stomach - Cold sensation in the esophagus. Burning pressure in the esophagus, better belching. Heartburn. Frequent eructations of odorless gas.

Throat - Sensation of increased warmth in the pharynx.

Urine - Urine turbid. Bright lemon yellow urine, almost straw-colored. Cloudy urine with an iridescent film. Looks like red sand, brick-dust powder.

RELATIONS - Compare: (1) Salicylic acid is in *Spiraea*. (2) Bell.

REFERENCES - Allen. Boericke. Clarke.

***SPIRANTHES AUTUMNALIS

(Lady's Tresses)

PHARMACY - *Spiraea*. *Spiranthes autumnalis*. Lady's tresses. N. O. Orchidaceae. Tincture of the root. **Historical dose:** Tincture and all potencies.

CLINICAL - Acidity. Belching. Breasts, painful. Breath, putrid. Bums. Colic. Coryza. Dyspareunia. Eczema. Hysteria. Jaundice. Kidneys, pain. Lumbago. Milk, excessive. Nausea. Nosebleed. Rash. Rheumatism. Skin, disorders. Toothache. Vision, dimness. Vomiting.

HERBAL - The Treasury of Botany reported that the genus to which this orchid belongs received its name from the spiral arrangement of flowers. *Spiranthes* is an anti-phlogistic remedy akin to Aeon. Its symptoms showing congestion and inflammation. The tuberous roots of *Spiraea*, were formerly esteemed as an aphrodisiac.

HOMEOPATHIC - *Spiraea*, has been used for milk-flow in nursing women, lumbago and rheumatism. Pulsations in arteries over whole body. Acidity and burning in esophagus with eructation. Colic with drowsiness and spasmodic yawning. Appears intoxicated. Lies on left side rather than right.

MIND - Melancholy. Complaining and sobbing. Ill-humor. Confusion of ideas. Indolence and boredom. Worse from mental effort. The least emotion or excitement causes palpitations.

Abdomen - Intermittent pressure in umbilical region. Pain, weakness, tympanites after a meal. Borbory gmi. Desire to tighten clothes. Piercing, sharp insupportable pain in colon, on becoming erect. Laughing heat in lower abdomen. Eruption in groin.

Back - Cramp-like pain in neck at night compelling change of position. Lumbago preventing walking. Pain in center of scapula. Pain in scapula, when standing, worse walking.

Bladder - Bladder, pain on urinating, pain and burning after waking. Urine, abundant, scanty, decomposes rapidly. Urine, deposits a gelatinous red sediment.

Breasts - Pain in breast on raising it. Burning on tips of breasts, especially the left. Milk abundant, more in left breast.

Chest - Sensation of weakness of lungs. Sensation of dilatation of left lung. Pleuritic and intercostal pains, worse left side.

Ears - Pain in left auditory canal. Itching in ear, externally and internally.

Eyes - Eyes brilliant, fixed. Pain in eyes on looking up. Burning in eyes with lachrymation. Eyes hot inflamed. Vision dim, obscured with sleepiness instantaneously lost, objects at a distance seem to move, on closing lids, sees wheels of fire. Lids swollen. Heaviness of brows.

Face - Swollen, red and hot, black, pale. Fixed, meditative expression. Burning in upper lip. Chin is red with pain. Burning itching in left cheek near mouth.

Female - Pressing pain in uterus. Dryness of vagina. Itching, red vulva and burning in vagina. Burning pain in vagina during sex. Bloody discharge from vagina. Yellowish leucorrhea.

Food - Loss of appetite. Desire for acid, sour foods. Constant thirst.

Head - Brain troubles, worse bending or raising arm. Heaviness and heat in brain. Sensation of band tied about head. Weight on forehead. Pain in forehead and nasal bone. Pain in roots of hair. Hair falls out.

Heart - Pain in heart. Palpitations with difficult respiration from least emotional excitement. Pulse full and hard at beginning of proving afterwards small and quiet.

Kidneys - Cramp-like pain at night in kidneys, obliging change of position. Burning pain preventing stooping, worse going up stairs, better lying on back, coldness *and* heat.

Limbs - Trembling in limbs, weakness. Sciatic pain, especially right side. Pain in shoulders. Swelling of veins of hands. Pain in all articulation of hands. Coldness of feet and toes.

Liver - Pain in liver and spleen, on pressure.

Lungs - Breathing difficult, short, panting on walking. Hacking cough, caused by tickling in larynx. Dry cough at night with burning in throat.

Male - Constant erections, on waking. Great desire for or repugnance to sex. Pricking pain in cords.

Modalities - Better lying on left side, on back. Worse by touch, stooping. Worse bending or raising arm, raising breast. Rheumatism of shoulders worse when bending over. Laughing causes heat in lower abdomen.

Mouth - Putrid odor from mouth. Taste acid, sweetish like nitre, bitter in morning. Salivation with dryness of mouth. Irritation of sublingual glands. Numerous small excrescences on palate, which was bloody. Gums red and burning. Sensation of coldness in teeth. Pain and elongation of teeth. Toothache only at night.

Nose - Pain in right nasal bones. Burning, itching at root of nose. Itching of right nostril. Dry coryza. Dripping of water from nose. Nosebleed in clots. Smell very acute.

Rectum - Burning and itching in anus, worse during evacuation. Stool preceded and followed by prickling and itching in anus. Diarrhea or constipation, stools sour in children.

Sensations - Sensation of a band tied around head. Sensation of a foreign body in throat. Coldness of teeth. Coldness of the affected part. Pulsation in arteries over whole body. Preference for lying on left side or else on back. Pain followed by numbness.

Skin - Dryness of skin. Jaundice. Yellow spots. Whole skin red, red in spots. Miliary rash. Eruption of red points on buttocks with itching and heat. Blisters as from a burn with purulent secretion. Pricking over whole body. Itching in axilla in *pubes*, *scrotum*, *forearms at night*, *backs* of hands.

Sleep - Incomplete yawning. Sleeping during day. Late falling to sleep in evening. Sleeplessness in infants. Starting up during sleep. Lascivious dreams with emissions.

Stomach - Epigastrium distended, intolerant of touch, painful after a meal, the pain corresponding to the pain in loins. Heat rising from stomach to head. Regurgitations. Belchings preceded by heat in lower abdomen and lancinations in colon, acid, bitter, difficult, empty. Nausea after eating. Vomiting of food right after eating.

Temperature - Alternations of cold and heat. Hands alternately hot and cold. Coldness, evening, especially of hands. Affected part colder than rest of body. Coldness of feet and toes. Heat of whole skin, flushes of heat in

head, followed by sensation of cold. Flushes of heat. Fever, followed by thirst. Fever at night, sweat in morning. Hands very hot. Sweat of palms.

Throat - Globus rising from lower abdomen to esophagus. Burning in larynx. Sensation of foreign body in throat. Incessant desire to clear throat, caused by a thick mucus. Burning in pit of throat. Irritation of tonsils. Tickling in throat, provoking cough. Sensation of acidity and burning in esophagus. Incarceration of air in esophagus. Pain on swallowing.

Vertigo - Vertigo, obliged to lean head against wall, on rising from bed, worse sitting or lying.

COMMENTS - The tincture of the root was proved by Dr. Patti Chagon, Duc de Sorentino, who said of it, "The action of this drug begins with decided symptoms of inflammation of the eyes, chin, chest, which become red and hot, the whole skin is dry and hot, the hands are burning, the limbs of the feet are cold most of the time, there is a sensation of oppression and heat with palpitation and a desire to uncover.

"This condition lasted two hours and gave place to others including desire to meditate and complain, vertigo, pains in shoulders, boredom, loss of appetite.

"The last symptoms to appear are: pains in scalp, on vertex, distress in kidneys and intestinal troubles after eating. The secretions of urine and milk were first diminished afterwards increased.

"The aphrodisiac property of Spira, was shown in some of the symptoms of the proving and this bears on the increased secretion of milk. A number of symptoms appear in the lower abdomen. The globus hystericus rises from thence to esophagus.

Heat in lower abdomen, preceding belchings, caused by laughing."

RELATIONS - Compare: (1) Cypr. (2) Skin and mucus membranes, Arum-t. (3) Desire for tight clothing, dryness of vagina, Nat-m. (4) Pain followed by numbness, Gnaph.

REFERENCES - Boericke. Clarke.

***SPONGIA TOSTA

(Roasted Sponge)

PHARMACY - spong. Spongiatosta. Roasted sponge. Common Sponge. Porifera. Radiata. N. O. Coelenterata. Tincture of the powdered sponge after toasting. **Historical dose:** Tincture and all potencies.

CLINICAL - Amenorrhea. Aneurysm. Angina, pectoris. Asthma. Bronchitis. Catalepsy. Chin, disorders. Clumsiness. Colds. Constipation. **Coughs. Croup.** Diphtheria. Diplopia. Dyspnea. Endocarditis. Epididymitis. **Exhaustion.** Exophthalmos. Fainting. Gland, disorders. **Goiter, exophthalmic.** Headache. **Heart, hypertrophy.** Hernia. Hyperthyroid. Jaw joint, pain. Laryngismus. Laryngitis. Lung, disorders. Myopia. **Orchitis.** Rheumatic, fever. Rheumatism. Somnambulism. Testicles, disorders. **Thyroid, disorders.** Tuberculosis. Varicose, veins. **Whooping cough.** Worms.

HOMEOPATHIC - According to Hahnemann, toasted sponge was first mentioned as a specific for goiter by the alchemist Arnold Von Villanova in the thirteenth century, but it was generally given mixed with other substances and had fallen into disuse when Hahnemann proved it.

The virtues of Spong, have been attributed to the iodine contained in it and partially liberated by the presence of roasting. But Spong, contains many other elements besides iodine and has a distinctive action of its own.

Affects the **heart valves**, larynx, trachea and glands, especially ductless. Useful for the symptoms of the respiratory organs, cough, croup, heart disorders and tubercular diathesis.

Keynote **dryness of mucus membranes**, of tongue, pharynx, larynx, and trachea. Cough is caused by dryness, hacking, crowing, **"dry as a bone,"** sounding like a saw being driven through a pine board. Cough is excited by talking, by **dry, cold winds**, better by eating or drinking, swallowing, especially from warm food.

Dry, chronic, sympathetic cough of organic heart disease. Anxiety with pain in the region of heart or dyspnea. **Hypertrophy of the heart.** The right heart is affected, with asthmatic symptoms.

Anxiety and difficult breathing, terrible sinking sensation. Dry asthma. In laryngismus, croup and asthma the patient rouses up generally after midnight with **fear of suffocation and death.** Contraction of larynx as if suddenly grasped. The larynx is sensitive, but has not the hyperesthesia of Lach. The sputa cannot be raised, must be swallowed, swallowing relieves.

Exhaustion and heaviness of the body with slight exertion, he must lie down with orgasms of blood to chest, face etc. Feels stuffed up. Hard swelling of glands, thyroid. As if everything were shaking and moving about in goiter.

Clothes feel uncomfortable. Numbness of lower half of the body. Stiff without ability to move. Faint, when losing her breath, on raising hands above head. Worse after sleep (Lach.). Rises up in sleep as if in a great fright.

MIND - Timidity. **Anxiety and difficult breathing.** Fear of future. Terror. Anxiety with pain in the region of heart or dyspnea. Aggravated from excitement and thinking of symptoms. Every excitement increases the cough. **Starting from sleep.** Starting from trifles.

Fear of death from suffocation (Puls., Aeon, Phos., Stram.), wakes frightened and anxious. Fear of dying. Anxiety about his heart, fear of heart disease. Attacks of anguish and pain with fear. Anxiety during flushes of heat.

Obstinate and improper behavior. Abusive. Quarrelsome. Tired of life. Despair during fever. Apprehension of a fatal termination of his disease. Inconsolable.

Despondent about loss of sexual power. Suicidal disposition during perspiration. Weeps with dreams, whooping cough, fever, sweat.

Ill humor, crying, indifference to everything, during croup. Taciturn and discontented mood, not disposed to talk. Indifference to everything. Cheerful alternating with aversion to work. Irresistible desire to sing with excessive mirth, followed by sadness. Singing alternating with distraction.

Abdomen - Violent action of abdominal muscles during inspiration. Viscera drawn up against diaphragm. Pain in abdomen instead of menses.

Back - Neck as if a cord about. Pain in sacrum instead of menses. Cramps in the muscles of neck. Coldness in back, not better by warmth of stove.

Chest - Oppression and heat of chest with sudden weakness. Chest weak, can scarcely talk, choking on falling to sleep. Fullness and obstruction in chest. A fixed, sharp and pressive pain. Spasmodic, constrictive pains. Shootings in chest. Burning, rawness, soreness in chest.

Constitutions - Suited to blue-eyed, fair-haired patients (Iod. acts best on brunettes). Children with a fair complexion, lax fiber, swollen glands. Suited to scrofulous disorders.

Cough - **Dry, barking, croupy** cough, larynx sensitive to touch. Deep, resonating coughs. Foghorn coughs. **Croup, worse during inspiration and before midnight.** Asthmatic cough. **Cough abates after eating or drinking**, especially warm drinks. Irrepressible cough from a spot deep in chest, as if raw and sore. **Dry, chronic, sympathetic cough of organic heart disease.** Cough is caused by dryness, hacking, crowing, **“dry as a bone,”** sounding like a saw being driven through a pine board. Cough is excited by talking. Cough worse **by dry, cold winds**, better by eating or drinking, swallowing, especially from warm food. **Whooping cough.**

Ears - Otagia with contractive pain. Ulceration of external ear. Boils on left ear painful to touch. Inflamed nodule in left concha. Heat, pressure in ears. Hard of hearing. Dull ringing in ears.

Eyes - Protrude, staring. Red with lachrymation and burning. Watery, gummy or mucus discharge. Diplopia, better lying down.

Face - Terrified, anxious expression. Blue lips. Pale from exercise instead of ruddy glow. Cold sweat on chin. Chin numb.

Female - Hunger and palpitations of heart before menses. Pain in sacrum before menses or instead of menses. Awakes with suffocative spells during menses (Cupr., Iod., Lach.). Amenorrhea with asthma (Puls.).

Food - Excessive **úúist. great hunger.** Desire for dainties, sweets aggravate.

Glands - Glands painful on pressure. **Swelling and induration of glands.** Cervical glands swollen with tensive pain on turning head. **Thyroid disorders.** Hyperthyroid. Thyroid gland swollen, even with the chin. Exophthalmic goiter. Goiter with suffocative spells, worse touching neck or pressure or pains with heart.

Head - Rush of blood, bursting headache, worse forehead. Throbbing, pulsation, heaviness and fullness of head. Headache with lachrymation. Pressing headache. Sensation as if hair were standing on end, on vertex. Violent itching in scalp.

Heart - Angina pectoris, faintness and anxious sweat. **Surging of heart into chest, as if it would force out upward.** Blood surging up to neck, head and face with closure of eyelids and tears. **Hypertrophy of heart**, especially right, with asthmatic symptoms. Valvular insufficiency. Aneurysm of the aorta. Rheumatic endocarditis. Pulse frequent, hard, full or feeble. Rapid and violent palpitations with dyspnea, cannot lie down, feels best resting in horizontal position. **Awakened suddenly after midnight with pain and suffocation**, flushed, hot and frightened to death (Aeon.). Dry, chronic sympathetic cough of organic heart disease (Naja.).

Limbs - Fingers numb. Numbness of lower half of the body. Thighs, numb and cold. Pain in the knees, when rising from kneeling. Thickening of joints after rheumatic fever.

Lungs - **Great dryness of all air-passages.** Noisy, whistling inspiration on falling to sleep. **Suffocation**, as from a plug, valve or leaf. Anxious, gasping breathing. As if breathing through a dry sponge. Respiration short, panting, difficult. Asthma, must throw head back, worse full moon. **Croup, worse during inspiration and before midnight.** Bronchial catarrh with wheezing, asthmatic cough, worse cold air with profuse expectoration and suffocation.

Male - Screwing, squeezing or stitches up into cord and testes. **Orchitis.** Testes hard and swollen. **Swelling of spermatic cord and testicles** with pain and tenderness. Epididymitis. Fistulous opening in scrotum with little, thick, white discharge. Genitals hot.

Modalities - Better descending. Better lying with head low, resting in horizontal position. Better eating or

drinking warm food or drink. Frosty weather helps the cough. **Worse from dry, cold, wind.** Worse warm room. Worse from sweets. Worse from exertion, motion, walking, stooping, rising, raising arms, ascending. Worse talking, singing. Worse touch, pressure. Worse lying on the right side. Worse at night, before midnight, full moon, after sleep.

Mouth - Sweetish taste. Salivation. Tongue dry and brown. Mouth and edge of tongue covered with vesicles. Burning pain. Speech difficult.

Nose - Nose pinched, cold. Chronic dryness. Dry, nasal catarrh. Dry coryza, nose feels stuffed up. Fluent coryza, alternating with stoppage. Nostrils wide open, fan like motion.

Rectum - Hard and retarded evacuations. Loose, whitish evacuations. Tenesmus in the anus during the evacuation. Itching, smarting and pain as from excoriation in anus. Passage of ascarides from rectum and tingling in rectum. Diarrhea with ascarides.

Sensations - As if head would fall to one side. As if tipsy. As if skull would burst. As if hair were standing on end. Eyes as if twisted around. As if a battery of guns were discharged in ears. Stitches as if passing through tympanum. As if skin of neck were compressed between fingers. As if air were passing up and down thyroid and cervical glands.

Skin - Sensitive to touch. Biting, itching of the whole body. Red, itching blotches. Herpes. Ringworm. Ulcers with scanty discharge. Erysipelas, erythema. Pricking, itching during fever. Measles. Itching in swollen glands.

Sleep - Sleeplessness with fantastic dreams and delirium on going to sleep. Generally worse after sleep or sleeps into an aggravation (Lach.). **Awakes in a fright and feels as if suffocating** with terror and fear.

Starting from sleep. Sad, anxious, frightful dreams. Somnambulism.

Stomach - Cannot bear tight clothing. Stomach feels flaccid as if standing open. Chill in pit of stomach. Sour regurgitations. Frequent hiccup. Nausea with acidity in mouth. Vomiting after having partaken of milk.

Temperature -Attacks of heat with anxiety. Heat, redness of face, perspiration. Heat in flushes with anxiety, cardiac pain, would rather die, with cold moist thighs, worse thinking of it. Heat and sudden weakness after walking in open air, must lie down.

Throat - Burning and stinging. Stitches and dryness. Bitter taste. **Sensation as if plug in larynx.** Diphtheria. Larynx, painful, dry, constricted worse touch, singing, talking or swallowing, he grasps it. Laryngeal tuberculosis. Sore throat, worse eating sweet things. Clears throat constantly. Throat symptoms better lying on back. Swallows water in small quantity and with difficulty. Numb externally. **Hoarseness** with many complaints, cough, coryza. Voice gives way when singing or talking.

Vertigo - Vertigo with giddiness to such an extent as to fall. Vertigo with a sensation as if head were about to fall on one side. Vertigo with nausea, on waking at night.

COMMENTS - The action of Spong, on the respiratory organs is closely connected with its action on the glandular system,

Spongia tosta the lymphatics. The thyroid and testes are indurated. The blood, heart and veins are also involved and, with the protruding eyes, a perfect picture of exophthalmic goiter is produced.

Tuberculosis of the larynx. Tuberculosis of apices, with commencing solidification, tubercles spreading downwards. Tuberculosis of the lungs with weakness of the voice and a chronic, dry, hacking cough. Congestion of chest coming on when the patient is moving about, with sudden weakness as if he would fall. Croup (Aeon., Hep., Samb., Brom., and Iod.), of the larynx. Croupy deposits on the valves of the heart.

Chronic bronchitis with a deep, resonating cough, especially in the elderly, worse excitement or exertion, with constant dryness, hacking. Must sit up and lean forward. Respiratory symptoms in excited children. Dry asthma with asthmatic cough, wheezing and whistling. Laryngitis with change of voice, the throat feels plugged up, like the larynx was grabbed.

Rapid and suffocative breathing with a deep, resonating cough. Slow and deep breathing. Paralyzed with dryness and constriction, must breathe slowly. Sensation of a sponge in the throat, as though they had to breathe through a sponge. Wakes up at night suffocating (Aeon., Lach.), with dryness. Fear of suffocation.

General dryness of the mucus membranes (Bry., Alum., Nux-m.). Suffocating, constricting dryness. Dry nasal passages with dry cough, worse in a cold, dry wind (Aeon.). Chronic sore throat, especially with swollen glands and cough. Dry, hacking coughs (Bry., Rumx.). Deep, resonating coughs. Foghorn coughs with a shrill at the end, peaks at the end. Burning and rawness in the chest with the coughing. As though the chest would burst because of all the coughing.

Cough is worse in cold, dry weather, wind, warm and stuffy rooms. Cough worse from exertion. Tobacco aggravates the cough. Worse lying down and with head lowered. Talking aggravates, can't talk during attacks. Desires warm fluids.

Hypertrophy of the heart with asthma. Sensation as though the heart will burst. In a heart attack the heart feels bigger and bigger (Cact. feels smaller and smaller.). Constriction of the chest and the heart (Cact.). Stinging,

pressing pain in the heart with violent gasping.

Excitement of the nerves, tendency to start, twitching of muscles with fever. Stiff, without ability to move. "Conscious but unable to act on her limbs" as in a cataleptic state. Clumsiness of the body. Faint when losing breath. Feeling of numbness of lower half of body.

Thyroid problems (Calc-i., Fuc., Sep., Nat-m., Thy.). Hyperthyroid. Goiter. Exophthalmic goiter, protruding eyes, staring, headaches and enlarged thyroid. Keynote sensation of something alive in the goiter, as if something moving there. Swollen and hard glands, causes difficulty in breathing, suffocative dryness. There may be tingling or shooting pain in the thyroid.

Testicular problems. Metastasis of mumps to the testes (Puls., Carb-v.), or to the breast. Hard, swollen, indurated testicles. Pressing, squeezing or sharp pains in the testicles. The testicles are swollen and very painful (Clem., Aur., and Puls.). Orchitis, with heaviness and screw-like squeezing pain in cord and testicles. Orchitis from suppressed gonorrhea (Thuj.).

Chill usually commences across the back, cannot be warmed. Chill, followed by heat, extending over the whole body except the thighs, which remain numb and chilly. Frequent flashes of heat. Skin is hot and dry. Etiology of exposure to cold, dry wind (Aeon.), but takes a day or so to come out.

Worse after sleep, or sleeps into the aggravation (Lach.). Worse when thinking of the symptoms (Ox-ac.). Aversion to tobacco and aggravated from it. Problems may start on the right and go to the left.

Kent gave the indication "Rheumatic fever after having been over-heated with arising heart complications."

Nash gave the keynote of Spong, in valvular diseases^ "Awakes out of sleep from a sense of suffocation with violent, loud cough, great alarm, agitation, anxiety and difficult respiration." Nash said it is better than Lach., and relieves the "dry, chronic, sympathetic cough of organic heart disease" more frequently and more permanently than Naja. Psor. also meets thickening of joints after rheumatic fever.

Boenninghausen's croup powders consisted of a sequence of Aeon., Spong., and Hep., given in that order. Spong, is dry. Hep. rattling, Spong, worse before midnight, Hep. worse after midnight.

RELATIONS - Antidoted by: Camph. **Compare:** (1) Aeon., Hep., Brom. (2) Iod. - goiter. Hep. (3) Lach., Merc., Prot. (4) Laryngitis, Samb., Lach. (5) Cough better by eating, Anae. (6) Dry tongue, Nux-m. (7) Better warm drinks, Ars., Alum., Lyc., Nux-v. (8) Heart, Naja, Sep., Kalm., Lach. (9) Orchitis, Gels., Puls., Ham. (10) Jawjoint as if dislocated, Rhus-t. (11) Worse thinking of symptoms, Ox-ac., Pip-m. (12) Tubercular diathesis, Bac., Tub., Dros. **Follows well:** Aeon., Hep. **Followed well by:** Brom., Carb-v.

***SQUILLA MARITIMA

(Sea Onion)

PHARMACY - squil. Squilla maritima. Sea onion. Squill. N. O. Liliaceae. Red variety. Hyacinthaceae. Tincture of fresh bulb. **His- iorical dose:** Tincture and all potencies.

CLINICAL - Angina, pectoris. Ascites. Asthma. Bright's, disease. **Bronchitis. Broncho-pneumonia.** Conjunctivitis, phlyctenular. Coryza. **Cough, caiarrhaL** Diabetes, insipidus. Dropsy, splenic. **Dyspnea.** Eyes, disorders. Fidgets. Heart, palpitations. Hydrothorax. **Lungs, disorders.** Measles. **Pleurisy. Pneumonia.** Spleen, disorders. Toothaches. Urine, excessive. Whooping cough. Worms.

HERBAL - Squilla maritima grows on the shores of the Mediterranean Sea and has had a place in medicine from the most ancient time. The genus Squillais distinguished from Allium by having the flowers inserted one above the other on the scape, and from Ornithogalum by having the petals deciduous. Green's Herbal noted that Squil. promotes expectoration and urine in large doses, vomiting and purging. "Its cardiac action is exactly the same as that of Digitalis." An old rule runs "Put squills in every coughmixture."

Mile recorded "Diuretic, expectorant, emetic, cathartic and a narcotic-acrid poison in large doses it produces inflammation of the alimentary and urinary canals and a dose of 24 grains has proved fatal."

According to Hamilton, Avicenna employed Squil. "in complaints of the gums in inveterate coughs in diseases of the spleen in dropsy and jaundice and forbids its use in ulceration of the viscera," the last caution also being mentioned by Celsus.

HOMEOPATHIC - Cooper noted that Squil., if much handled, irritates the skin, and in large doses excites nausea, strangury, bloody urine and hemorrhoids. Fatal inflammation, gangrene of stomach and bowels in small doses. The continuous use of squills seems to cause teeth and gums to ache.

The reputation of Squil. as a splenic was revived by Rademacher, whom Burnett quoted, "I have found it quickly and surely helpful in painful spleen diseases disorders painful and beyond any doubt in and of the spleen. In those dull pains on the border of the left hypochondriac and epigastric regions, there being no signs of any liver affection, I have used Squil. as a remedy with advantage."

Rademacher also mentioned as cured by Squil. those so-called "**stomachpains**" that are made much better

by lying on the left side and probably in reality splenic, one case of asthma from a splenic affection with nocturnal exacerbation, and possibly splenic dropsy.

Burnett improved on Rademacher's teachings and applied Squil. successfully in cases of spleen-cough. Hahnemann's proving brought out many symptoms, apparently arising from the spleen, notably stitches under the free ribs of the left side.

Squil. affects the serous and mucus membranes of the respiratory and digestive tract and acts also on the kidneys, heart and

Squilla maritima spleen. Slow acting, useful for those condition which require several days to reach their maximum. Persistent, dull, rheumatic pains throughout the body.

A **spleen remedy**, stitches under left free ribs. Heart and kidney ailments. **Bronchopneumonia**. Valuable in chronic bronchitis of old people with mucus rales, dyspnea and scanty urine.

Exudations and profuse secretions. Dropsy with profuse urine. Gurglings. Cardio-urinary effects. Action is like Dig.; follows Dig. when it fails to relieve dropsical conditions.

MIND - Great anxiety of the mind. Angry about trifles. Malicious. Haughty. Aversion to mental and bodily labor. Inclination to sit, aversion to bed. Confusion after sleeping, on walking. Delirium after hemorrhage. Fear of death.

Abdomen - Painful diseases of the spleen. Aching in hypochondria. Cutting pain in abdomen. Rumbling and gurgling in paroxysms above pubic region, better eating. Bubbling sensation in muscles of right side. Frequent discharge of fetid flatulence. Ascites with scanty urine.

Back - Stiffness of nape of neck. Bubbling beneath scapula. Painful jerking above left scapula. Drawing in left scapula.

Chest - Stitches in chest. Perspiration in armpit.

Ears - Tearing behind left ear. Tearing pains in both ears.

Eyes - Left eye looks much smaller than right. Child rubs eyes and face much, as if to relieve itching in brain affections, measles. As if swimming in cold water. Tears with cough. Staring look, eyes wide open.

Face - Changeable expression and color of face. Distorted countenance. Child rubs the face with fist during cough. Lips twitch and are covered with yellow crusts. Humid, spreading eruption on upper lip. Black, cracked lips and black teeth.

Female - Atony of the cervix, uterus. Hemorrhage from uterus.

Food - Insatiable appetite. Longing for acids. The food tastes bitter, especially bread. Tastes sweet, especially soup and meat. Tastelessness of tobacco when smoked. Thirst for cold drinks. Drinks in sips during dyspnea.

Head - Stinging headache. Headache in morning on waking, with pressing pains. Painful sensitiveness of vertex every morning. Pulsation in head when raising it.

Heart - A cardiac stimulant affecting the peripheral vessels and coronary arteries. Pulse small and slow, slightly hard.

Kidneys - Great urging, **much watery urine, involuntary** spurting of urine when coughing (Caust., Puls.). Frequent calls to urinate at night, passing large quantities (Ph-ac.). Bloody urine. Feces escape when urinating.

Limbs - Hands and feet cold, body hot (Meny.). Feet get sore from standing. Nails become brittle and split.

Lungs - Wheezing. Splenic asthma. **Dyspnea and stitches in chest** and painful contraction of abdominal muscles. Sneezing, throat irritated, short, dry cough, must take a deep breath. Pleurisy. Bronchopneumonia. Fluent coryza, margins of nostrils feel sore. **Sneezing with coughing**. Cough, stubborn, dry, rattling, disturbs sleep. **Child rubs face with fist during cough** (Caust., Puls.). **Violent**, exhausting cough with much mucus, **with involuntary spurting of urine and sneezing**. Expectoration, easy, heavy, difficult in small round balls of sweetish taste, white or reddish offensive. Profuse, salty, and a slimy expectoration. Cough provoked by taking a deep breath or cold drinks from exertion. Cough changes from warm to cold air. Cough of measles.

Male - Erotic pollutions. Dull stitches in glans causing anxiety. Compressive pain in testicles.

Modalities - Better from rest, lying down in bed, sitting up, wrapping warmly. Better expectoration even a small quantity. Worse early morning. Worse motion, exertion, ascending. Worse inspiration, coughing, cold air, uncovering. Drinking cold water causes cough.

Mouth - Taste, sweet of food, especially soup and meat. Bitter taste to bread. In-

Squilla maritima creased saliva. Open, dry mouth. Scraping, burning on palate. Vesicles on tongue. Black spots on teeth.

Nose - Violent sneezing with fluent acrid coryza. Sneezing during cough. Copious running worse in morning. Coryza with ulcerated nostrils. Humid eruptions under nose with itching.

Rectum - Stitches in anus when walking. Itching in anus. Painless constipation. Stools dark, brown, frothy, very offensive. Diarrhea, stool very offensive, watery. Passes thread worms and white tissues with tenesmus.

Sensations - Prominent stitches, in teeth, in chest, in head. Eyes as if swimming in cold water. Nostrils as if

sore. As if chest too tight. Tickling creeping in chest. As if intestines would burst through abdomen. As if diarrhea would set in.

Skin - Handling the fresh squills caused blisters. Eruptions like itch, with burningitching. Small red spots all over the body with pricking pain. Soreness in the bends of the joints. Hard swellings. Gangrene.

Sleep - Frequent yawning without sleepiness. Restless sleep, with much tossing about. Dreamed that his body was excessively swollen.

Stomach - Pressure in stomach as from a stone. Stomach pains are better lying on left side. Constant nausea in pit of stomach. Nausea during the morning cough.

Temperature - Chill internally at night with external heat. Heat with aversion to uncover. Heat, dry, burning, internally predominates. Whenever he uncovers himself during the fever he suffers from chilliness and pain. Perspiration wanting, even during the violent burning heat.

Throat - Dryness in throat. Burning in mouth and throat. Irritation in throat causing constant cough. Pain in submaxillary glands.

Vertigo - Vertigo in the morning with nausea. Vertigo as if he would fall sideways on rising from bed. Cloudy dizziness.

COMMENTS - Burnett used the Acetum Squil. and Clarke gave this (five drops of in water three times a day) with excellent effect in the case of an elderly woman, very gouty, who had a distressing paroxysmal cough with a pain extending from splenic region into the throat. The cough caused sneezing, flow of tears, spurting of urine and even involuntary stools.

The kidneys are acted on by Squil. and many of the traditional uses of the drug have been with the idea of eliminating dropsical effusions by reproducing a great flow of urine. Hahnemann pointed out that the excessive flow of urine accompanying dropsy and other complaints was one of the best indications for its use.

Boger added the heart to the organs primarily affected by Squil. He gave three cases. Mr. B. suffered from angina pectoris, forcible cardiac contractions, profuse urine, much loose mucus in throat and trachea, heart pain indefinite but very severe. Squil. 30c relieved in a few hours and kept him free from an attack for three months.

Miss L., pleuro-pneumonia, pulse 132, temperature 103 F, respiration 30, must sit erect in bed. Stitching pains in left chest, constant hacking cough. Frequent, hot, scanty urine, great weakness and anorexia. Squil. 100,000c cured.

A boy, 7, hay fever for third year in succession. Teeth show black marks, constantly rubs eyes and sneezes, bloated about eyes and face, loose cough. Under Squil. there was complete relief in two days and no further trouble that season.

Boger mentioned that Lippe noted "black teeth" as a symptom of Squil. Boger added that the nails become brittle and split and that veterinarians use Squil. for cracked hoof in horses.

The use of Squil. as an "expectorant" depends on its power of producing free secretion from the respiratory mucus membranes; in homeopathy this free secretion is one of the leading indications.

Hering said Squil. is suited to the pleurisy and pneumonia that follow blood-letting.

RELATIONS - Antidoted by: Camph. **Compare:** (1/Headache, worse motion, chest symptoms, Bry. (2) Bry. cough is worse change to warm, Squil. cough worse change to cold air. (3) Stitches, swollen upper eyelids, Kali-c.

(4) Cold drink causes or worse cough, Lyc., Sil. (better by cough, Caust.). (5) Expectoration sweetish and offensive, Calc., Stann. (6) Spurting of urine when coughing, Caust., Alum., Con., Nat-m., Puls. (7) Dig., Stroph., Apoc., Bry., Kali-c. **Compatible after:** Bry. Squil. follows Dig., if this fails to relieve water-logged cases.

REFERENCES - Boericke. Clarke. Phatak.

***STACHYS BETONICA

(Wood Betony)

PHARMACY - stach. Stacnys betónica. Wood betony. N. O. Labiate. Tincture of whole fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Belching. Colds. Diaphragm, paralysis. Headaches. Vertigo.

HOMEOPATHIC - Berridge published the proving of Stach. made by Croker and himself with some others. Pains in various parts, dizziness, fullness in head and eyes with disposition to take cold.

Tired, especially in legs. Great sensitiveness to take cold. A feeling of oppressed breathing as from paralysis of diaphragm. Stach. has been used in eye-waters and as a remedy for headaches.

MIND - Inability to concentrate mind. Distracted easily. Mental dullness.

Abdomen - Pains in abdomen, hepatic region and of transverse colon, also in gallbladder and right inguinal region and spermatic cords.

Ears - Slight earache.

Eyes - Heavy, sleepy feeling in eyes. Pain in eyeballs as if too tense, worse looking at light, reading, thinking, bending head down.

Head - Stitches in right temple. Fullness over and in eyes as if they would burst. Dull, heavy action in frontal region better walking about in room.

Kidneys - Woke with desire to urinate in night. Urine high-colored, ammoniacal.

Limbs - Shooting pain in back of both wrist joints. Wrist drops. Pain in right popliteal space down leg, which feels paralyzed.

Liver - Pains in hepatic region and gallbladder.

Lungs - Breathing oppressed as from paralysis of diaphragm, constriction just behind ensiform cartilage, on walking up hill must keep mouth open.

Nose - Frequent sneezing, increased nasal mucus on going indoors from open air.

Stomach - Warmth in stomach increasing to sharp cutting pain. Weight in stomach with feeling of sickness. Belchings, tasting of drug.

Temperature - Free perspiration. In night profuse sweat, limited to head, neck and chest.

Vertigo - Dizziness better open air, worse closing eyes or moving head.

RELATIONS - Compare: (6) Lycps. and the Labiate.

REFERENCES - Boericke. Clarke.

***STANNUM IODATUM

(Tin Iodide)

PHARMACY - stann-i. Stannum iodatum. Tin iodide. Trituration. **Historical dose:** All potencies.

CLINICAL - Coughs. Lung, disorders. **Tuberculosis.**

HOMEOPATHIC - Stann-i. is valuable in chronic chest diseases characterized by tissue changes, with persistent inclination to cough. It is indicated in cases that **'hang fire'** and need an alternative.

Stann-i. has been used in preference to Stann. in some tubercular cases in which the general features of Stann. were present.

Persistent inclination to cough, excited by tickling dry spot in the throat, apparently at root of tongue. Dryness of throat. Tracheal and bronchial irritation of smokers. Pulmonary symptoms, cough, loud, hollow, ending with expectoration (Phel.). Purulent infiltration.

Stonham noted that in **advanced tuberculosis** when Stann-i. has not taken effect, an additional dose of iodine in milk caused the drug to have its usual beneficial effect.

Chest - Feeling of dryness, weakness in chest and throat and increased oppression.

Lungs - Persistent cough, excited by tickling, dry spot in the throat. Cough beginning with a weak sounding cough with short breath, soon gathers strength and sound. Coughs up a copious, pale yellowish expectoration. Consolidation in middle of right lung.

COMMENTS - O. S. Haines considered Stann-i. especially indicated where the patient "has a clear complexion and long eyelashes and where the progress of the disease is rapid." He used the 2x trituration.

M. D. Youngman found it a deeply acting drug, chiefly of value in chronic chest diseases characterized by plastic tissue changes. Stann-i. is indicated in cases that "hang fire" and need an "alterative."

Youngman gave the keynote, "A persistent inclination to cough. Cough excited by a tickling dry spot in the throat, sometimes in one place, sometimes in another often apparently at root of tongue."

This cough, which begins as a weak- sounding cough, accompanied by shortness of breath. The cough soon gathers strength and sound and induces raising of a free, copious, pale yellowish expectoration, which at first aggravates. But is soon followed by a feeling of dryness, weakness in throat and chest and increased oppression.

An inveterate smoker, who had a cough of this kind, said it came from his throat and ascribed it to his smoking. Youngman found consolidation areas in the middle of the right lung. There was weak feeling in chest after coughing.

Stann-i. 3x trituration, greatly relieved. The man was sent to a high altitude, where he enjoyed perfect health and was freed from his smoking habit.

REFERENCES-Clarke.

***STANNUM METALLICUM

(Tin Metal)

PHARMACY - stann. Stannum metallicum. Tin metal. (Sn, At. Wt. 118.102). Trituration of the pure metal.

Historical dose: All potencies.

CLINICAL - Anemia. Asthma. **Bronchitis. Chest, weakness.** Chilblains. Colic. Convulsions. Cramps. **Debility.** Dentition. Diaphragm, pains. Dyspepsia. Ears, ulceration. Epilepsy. Gastralgia. Hematemesis. Hemoptysis. Headaches. Hectic, fever. Hemiplegia. Hypochondriasis. Hysteria. Lachrymal fistula. **Lungs, weak.** Milk, altered, Nails, splitting. Neuralgias. Neurasthenia. Nosebleeds. Opisthotonos. Paralysis. Ptosis. Sleeplessness. **Sore, throat.** Styes. Tapeworms. Trachitis. **Tuberculosis.** Uterus, prolapsed. Vagina, prolapse. **Voice, weak. Weakness.** Worms.

HOMEOPATHIC - Stannum is the Jupiter of the alchemists. "The ancients have recorded wonderful cures of the most serious diseases with Tin," said Hahnemann, but in his day, until he proved it, its main use was as a vermifuge. The chief action centers on the nervous system, respiratory organs, and liver.

Marked **debility.** Debility in chronic bronchial and pulmonary conditions, characterized by profuse mucopurulent discharges upon tuberculosis basis. **Talking causes a very weak feeling in the throat and chest.**

Extreme weakness in the chest, throat, stomach, upper arms and thighs. The patient is unable even to talk, drops into a chair instead of sitting down, trembles on moving. Weakness is felt much more on going downstairs than going up. **Paralytic heaviness or weakness.** Paralysis from worms after spasms, emotions, onanism. Hemiplegia, part constantly moist.

Pains increase gradually and gradually subside. Pressive drawing pains. Spasms with pain in abdomen and diaphragm. Epileptic spasms with tossing of limbs, clenching of thumbs, opisthotonos, unconsciousness and sexual complications.

Cramps, hysteria. Neuralgia, diaphragmatic, suppressed.

Affections of mucus membranes produces yellow, muco-purulent secretions. Bland secretions. Emaciation. Girdle sensation with yawning. Trembling more from slow motion or exercise. Child wants to be carried across shoulders.

MIND - Depressed and hopeless with lung problems. Low spirited, despondent and without hope, feels like crying all the time, but crying aggravates. **Anxious,** nervous, sad, worse before menses. Miserable. **Sad and discouraged.**

Discontented with everything. Uneasy, knows not what to do with himself. Forgetful and absent-minded. Forgetful on waking in morning. Thinking makes her feel wretched. Cannot get rid of an idea once fixed in her mind.

Taciturn and dislike to society. Dread of seeing people. Fear in a crowd. Fear of men, during pregnancy. Suspicious. Aversion to certain persons (Nat-c.). Child wants to be carried across shoulders. Very sensitive as to what others say about her. Changeable mood. Sudden fits of passion. Can't answer questions from weakness.

Abdomen - Abdomen painfully distended and sensitive to touch. Incarceration of flatus. Cutting, pinching, cramp-like colic, around navel. Colic with hunger, diarrhea and a feeling of emptiness, exhausting, **relieved by hard pressure.** Colic in children, better by carrying them on shoulder. Spasmodic pain in abdomen, hysterical.

Back - Stitches in back, small of back, and into limbs. Opisthotonos. Weakness of the muscles of the nape of the neck.

Breasts - A child leaves the breast of its mother and will not nurse (Sil.).

Causations - Ill effects of emotions, fright, masturbation, dentition, using voice.

Chest - Oppression of chest when coughing, with emptiness in pit of stomach. Oppression as if chest were internally constricted. Tension across upper part of chest with emptiness in lower. Weak, empty sensation in chest, is constantly obliged to stop and take a breath. **Chest feels weak, can hardly talk.** Chest feels raw or hollow. Aching in chest from reading aloud. Diaphragmatic neuralgia, hysterical. Soreness. Stitches in left side of chest, when breathing or lying on that side. Knife-like pains, below left axilla. Itching, tickling in chest. Sharp pains in chest and sides hinder respiration. Sharp, cutting stitches in left side of chest, worse stooping. Gnawing pain at middle of sternum.

Constitutions - Tubercular constitutions.

Cough - Cannot walk, cannot do anything without coughing. Short breath from every effort, must loosen clothes. Hemoptysis with copious expectoration. Concussive, in paroxysms of three coughs. Violent, dry cough in evening until midnight. **Cough excited by laughing,** singing, talking. Cough worse lying on right side. Influenza cough from noon to midnight with scanty expectoration. Hoarse, mucus expelled by forcible cough. Cough during day, with copious green, sweetish expectoration, most profuse in morning. Retching with coughing.

Ears - Cracking, shrieking noise in ear when blowing nose. Tinkling, ringing in ears, particularly the left. Earache with drawing tearings. Ulceration of holes pierced for earrings.

Eyes - Sunken, dull, clouded eyes. Pupils contracted. Eyes sore. Itching, smarting and burning sensation in

eyes. Great sensitiveness to light during headache. Jerking and quivering of eyes. Burning lancinations in lids. Agglutination of eyelids at night. Pustular swelling of left inner canthus. Blenorrhea. Ptosis. Styes.

Face - Face pale, sickly-looking, flushing easily on exertion. One cheek hot and red. Painful swelling of submaxillary glands. Swelling of cheeks and upper jaw. Spasm in jaw. Prosopalgia, pains increase and decrease gradually. Drawing pains in malar bones. Malar neuralgia, at menses.

Female - Strong body odor during menses. **Menses early and profuse. Bearing-down sensation.** Gushing leucorrhea, yellowwhite or transparent mucus, with much debility. Prolapse uterus and vagina, worse stools. Prolapse with **weak, sink**

ing feeling in stomach (Sep.). Uterine symptoms with a weak, drawn sensation in the chest. Pain in vagina upward and back to spine. Scratching of distant parts (of arms) produce an intolerable sensation of pleasure in genital organs producing orgasm. Increased sexual desire, early orgasm.

Food - Increased hunger, which cannot be satisfied. Increased thirst. Bitter taste of all food. Bitter, herbaceous taste of beer. **Smell of cooking causes vomiting.** Excessive weakness of digestion. Nausea and vomiting after a meal.

Head - Severe, painful constriction in forehead and temples. Pressive and stupefying headache. Migraine of cerebral origin, better by vomiting. Aching in temples and forehead. Pains worse motion, **gradually increasing and decreasing.** Violent, glowing, beating pains, as if the head would burst with inward blows. Jarring of walking resounds painfully in head. Drawing pains in malar bones and orbits. Ulceration of hole in lobe of ear. Obstinate acute coryza and influenza with cough.

Heart - Pain in precordial region and hiccough. Pulse frequent and small.

Kidneys - Dull stitches inward in kidney region. Insensibility of the bladder, only the sense of fullness indicates the necessity to urinate. Atony of bladder. Retention of urine. Blister on margin of meatus.

Limbs - Paralytic weakness, drops things. Limbs suddenly **give out when attempting to sit down.** Tremulous knees. Swelling of the hands and ankles. Spasmodic twitching of muscles of forearm and hand. Cramps in hands, cannot let go the broom. Fingers jerk when holding pen. Typist's paralysis. Contraction of fingers, retraction of thumbs. Neuritis. Aching in deltoid from reading.

Liver - Pressure and burning sensation in hepatic region. Weak liver, poor digestion. Bitter and sour taste.

Lungs - Asthma. Emphysema. Pneumonia. Bronchiectasis. Takes deep breaths. Shortness of breath on exertion. Short, oppressive respiration, stitches in left side when breathing and lying on same side. **Lungs feels weak, can hardly talk.** Sharp pains in lungs which hinder respiration. Much mucus in trachea. **Copious green, sweetish** expectoration. Easy expectoration, quantities of sweet, salty, sour, putrid or bright yellow pus or ball of mucus. **Catarrhal tuberculosis.** Last-stage tuberculosis remedy, used for tuberculosis epidemics. Last stages of respiratory illnesses heading toward lung failure.

Male - Increased sexual desire. Voluptuous feeling in genitals ending in emission, which exhausts. Frequent pollutions with excessive prostration.

Modalities - Pains are better walking, but must soon rest. Better by pressure, lying across something hard, bending double. Better rapid motion. Better coughing, expectorating and open air. **Worse using voice,** laughing, talking, singing. Worse going down stairs, ascending. Worse lying, gentle motion, touch. Worse from weakness of chest. Worse from cold, warm drinks. Worse during stool. Worse at 10 a.m.

Mouth - Sweet, sour, **bitter taste,** for all food except water. Fetid exhalation from mouth. Flow of acid saliva. Tickling at the root of the tongue. Tongue coated with a yellowish mucus. Tongue red or yellow. Difficult, weak speech, occasioned by weakness.

Nose - Oversensitive to smells. Heaviness and sensation of obstruction. Stuffed feeling and heaviness high up in nostrils. Burning sensation in nose. Dry coryza on one side only. Obstinate coryza and influenza with cough. Nosebleed on moving, on rising from bed.

Perspiration - Heat in evening, **exhausting night sweats,** towards the morning. Perspiration at 4 a.m. Debilitating perspiration, principally on forehead and nape of neck. Sweat smelling musty or offensive.

Rectum - Burning in anus, constant itching. Constipation. Monday constipation, occurring after working days. Frequent ineffectual want to evacuate. Hard, dry, knotty feces or else scanty and greenish. Stools are green, curdy with colic. Passes worms.

Sensations - As if all objects were too far off. As if she would faint. As if forehead were shattered. As if forehead would be pressed inward. Tickling as from soreness in trachea. Inclination to hawk as if mucus were in chest. Chest, as if eviscerated, as if internally constricted. As of a heavy load in affected arm and side of chest. Epigastric region as if beaten. As if limbs beaten. As if sweat would break out.

Skin - Itching, burning, shootings over skin of whole body. Itching pimples on face, sore to touch or on washing. Chilblains. Flaws in nails. Painful hangnails.

Sleep - Nocturnal agitation and many vivid dreams, anxious or lascivious. Moaning, weeping and plaintive

lamentations while sleeping. Sleeps with one leg drawn up, the other stretched out.

Stomach - Pain better pressure, but sore to touch. Sensation of **emptiness in stomach**. Uneasy feeling. Smell of cooking causes nausea and vomiting. Bitter taste. Vomiting, violent of blood or bile, early in the morning with odor of ingesta.

Teeth - Sensation of elongation and looseness in teeth. Toothache after a meal with jerking pain and heat in the face. Ulcer on gums with swelling of cheeks.

Temperature - Chill 10 a.m. with numb fingertips. Hectic fever. Burning palms and soles. Heat in evening, **exhausting night sweats**, towards the morning.

Throat - Throat dry and stings. Sore throat, as from an internal swelling. Rawness in larynx. Cutting in pharynx and esophagus on swallowing. Nausea in throat. Adhesive mucus, difficult to detach, efforts to detach cause nausea. Voice deep, hollow, hoarse, better hawking mucus. **Hoarseness with weakness of voice**. Laryngitis.

Vertigo - Dizziness and weakness when **descending**. Vertigo, all objects seem too far off. Vertigo on sitting down, with loss of ideas.

COMMENTS - Hahnemann's Stann. proving appears in his *Materia Medica Pura* and in his *Chronic Diseases*. A number of worm symptoms appeared, including a sinking, empty, all-gone feeling, and diaphragmatic and abdominal pains. Tendency to excessive mucus secretions. Pale, sunken, sickly countenance with dark rings around the eyes. Convulsions. Hectic fever.

Compressive and cramp-like pains. Cramps and spasms. Opisthotonic convulsions, thumbs are drawn in, particularly in teething children, in children who masturbate, or who have worms.

Pains associated with the hypochondriac or hysterical mental state. Pains begin lightly, increase gradually to the highest point and then gradually decline, particularly in headaches, facial and dental neuralgias, abdominal and other pains. Diaphragmatic neuralgia.

Characteristic weakness, exhaustion of mind and body. Nervous weakness with trembling. Neurasthenia. Depressed and hopeless with lung problems. Low spirited, despondent and without hope. Trembling of arms and legs, limbs as heavy as lead. Palpitations and anxiety occur from slightest exertion.

The chest is so weak as to make talking impossible. Weakness in the throat in singers and speakers. Weakness and aching of the deltoid and arm, felt when using the voice. The patient will drop into a chair instead of sitting down. Must sit down several times to rest while dressing in the morning. Weakness felt more going down stairs than on going up. Weak, empty, sinking sensation felt at the epigastrium.

Characteristic respiratory or lung weakness. Last-stage tuberculosis remedy, used historically tuberculosis epidemics. Last stages of respiratory illnesses heading toward lung failure. Emphysema. Pneumonia. Hoarseness, laryngitis, hollow voice.

Keynote weakness in the lungs and breathing. Patient talks extremely weakly, must put ear to patient's mouth to hear. Weak, empty feeling in the chest, in tubercular conditions. Stitches in the chest. Shortness of breath on exertion.

Deep, hollow, shattering cough (Spong.). Deep, husky, hollow voice, better by hawking or expectorating mucus. Profuse expectoration, like an egg white (Nairn.), sweetish, salty, sour, putrid, musty, yellow-green pus. Thick globs of green

sputum. Coughs up green pus and globs of green mucus (Kali-b.). Yellow secretions, including sputa, leucorrhea and coating on the tongue.

Dyspepsia, with nausea and vomiting from the smell of cooking. Stomach pain compels the patient to walk about for relief, yet the weakness is so great that he is soon compelled to rest. Colic, better by hard pressure, as by laying the child with its abdomen across the knee or on the point of the shoulder.

Menses are early and profuse. Uterine and vaginal prolapse, worse during stool, especially during pressure. Labor pains are spasmodic and put the patient out of breath. The milk of nursing woman is changed and the child rejects it.

Sexual excitement in both sexes. Emissions with excessive prostration. Orgasm is easily produced, "Scratching arm produces an intolerable sensation of pleasure in genital organs which extends to uterus and produces orgasm."

Clinique quoted a typical case of a neuralgia cured by Stann. A man, 30, suffered for eight years off and on and for some months continuously with neuralgic headache. Pain centered over one or the other eye (usually the right) and extended over whole or part of head and was at times unbearable.

It began in the early morning (4 to 5 a.m.), increased gradually to noon, when it gradually declined to sunset, reappearing again the following morning. Two doses of Stann. cured in a fortnight.

Hering gave as cured by Stann. "Monday constipation," that is, constipation occurring on days following rest-days. Stann. has marked periodicity.

T. H. Urquhart cured an affection of the nails characterized by breaking and splitting, and a sequel of scurvy, with an application of Stannum oleate on a narrow flannel bandage. All symptoms were cured in two months. Alston obtained indirectly from "a woman of Leith in Scotland" this prescription of which he had witnessed the efficacy in a case of tapeworm: "Take an ounce and a half of Tin, (pewter metal) and grind it small to powder, mix it with sugar syrup and take, on a Friday before the change of the moon, one-half of it, the following day the half of the remainder and the Sunday following the rest, but on the Monday a purgative."

Alston also noted in his Materia Medica that he had seen hematemesis cured by this remedy.

RELATIONS - Antidoted by: Puls., Phos. **Compare:** (1) Stann-i., Phos., Caust., Calc., Sil., Tub., Bac., Melon. ***STAPHYLOCOCCINUM

(Staphylococcus Nosode)

PHARMACY - staphycoc. Staphy lococcinum. Staphylococcus bacteria. Nosodes. **Historical dose:** All potencies.

CLINICAL - Abscesses. Acne. Adenitis. Allergies. Anthrax. Aortitis. Blepharitis. **Boils.** Carbuncle. Cellulitis. Conjunctivitis. Dacrocystitis. Edema. Endocarditis. Empyema. Fever. Folliculitis. Furuncle. Impetigo. Kidney, disorders. Lymphadenitis. Mastitis. Mastoiditis. Meibomian cysts. Meningitis. Myelitis. Osteomyelitis. Parotiditis. Pemphigus. Phlebitis. Prostatitis. Pyelonephritis. Pyemia. Radiculitis. **Septicemia.** Staphylococcal, infections. Styes. Sycosis. Thrombophlebitis. Whitlow.

HOMEOPATHIC - Staphycoc. is used for diseases where the staphylococcus bacteria is the chief bacterial factor, such as acne, abscess, furuncle, empyema, impetigo, and endocarditis. Morbid conditions where the staphylococcus pyogenes aureus or albus or citreus is notably symbiotic or is the direct and chief bacterial factor.

Julian wrote that the main indications for Staphycoc. are chronic illnesses in which staphylococci are present, e.g. in boils, impetigo, blepharitis, styes, Meibomian cysts, osteomyelitis, whitlow, but possibly also in perinephritic abscess, malignant staphylococcal infections of the face, acne vulgaris, cystic acne, thrombophlebitis, and possibly also in anthrax.

Psoric and sycotic. Allergic conditions. Pre-diabetic conditions. Syndrome of acute **septicemia**. Oscillating fever with great chill, general condition is weakened, an enlarged spleen. Radiculitis. Myelitis. Meningitis. Abscess of the brain.

Heart - Endocarditis. Pericarditis.

Kidneys - Pyelonephritis. Prostatitis. Acute prostatic abscess.

Limbs - Spondylitis. Osteitis. Osteomyelitis.

Lungs - Pulmonary abscesses.

Skin - Abscess. Purpura vesicles, pustular. Follicular pustule. Folliculitis of the integument. Sycosis of the mustache. Adenitis of the armpits. Anthrax. Ecthyma. Panaris. Onyxia. Perionyxis.

COMMENTS - Dr. P. W. Shedd of New York noted that Staphycoc. is made from the Staph, alb. aur. citreus, a species whose variations in color are dependent upon what the plant gets as nourishment.

The attenuations of this nosode are prepared from the washings of cultures of staphylococci. While preparing this particular remedy, the maker was compelled to get out of the room several times because of a decided, though indefinite, malaise.

The odor, aroma or effluvium was ambrosia compared to the atmosphere of the dissecting room with its lumps of putrefaction, but it had much greater expulsive power, not nauseating, but sickening and chemically probably due to some of the fatty acids.

Anshutz wrote, "In the human economy the staphylococcus does best where weakness of the protective mechanism or debility due to other than bacterial agencies, e.g., overwork, worry, lack of proper food, heredity, excess, etc., is prominent."

Staphycoc. may be of value in conditions due to damage from staphylococcal toxins. Auto-immune diseases of all kinds, in which staphylococci were involved. Myocardial lesions, nephritis, hepatic lesions, connective tissue lesions and thyroid illnesses.

RELATIONS - Compare: Strept., Ars., Bapt., Sil., Pyrog.

REFERENCES - Anshutz. Boericke. Clarke.

***STAPHYSAGRIA

(Stavesacre)

PHARMACY - staph. Staphysagria. Stavesacre. Delphinium staphysagria. N. O. Ranunculaceae. Southern Europe. Tincture of the dried seeds. **Historical dose:** All potencies.

CLINICAL - Adenoids. **Anger, suppressed.** Anus, itching. Backaches. Blepharitis. Bones, diseases. Cauliflower, excrescences. **Chalazion. Colic. Colitis.** Condylomata. Cough. **Cystitis. Cystocele.** Cysts. Dentition. Dysentery. **Dyspareunia.** Eczema. Eyes, tumors. Fistula, dentalis. Gastralgia. Glands, disorders. Hip joint, disease. **Humiliation.** Hypochondriasis. Impotency. Iritis. Jaw, dislocation. **Lice.** Lumbar, abscess. Mania. Masturbation, effects. Nausea. Neuralgias. Night-sweats. Nymphomania. Ovaries, disorders. Perspiration, offensive. Prostate, disorders. Psoas, abscess, Ranula. **Rape.** Rheumatism. Sciatica. Scurvy. Seasickness. Seborrhea. **Self-abuse.** Sexual, abuse. **Sexual, excesses.** Spermatic cords, disorders. Spermatorrhea. Steatoma. Stiff, neck. **Styes. Surgery.** Swallowing, constantly. Teeth, decay. Testicles, disorders. Tibia, pains. Tobacco, effects. Toenail, ingrown. Tonsillitis. Toothaches. Tumors. Warts. Wounds.

HERBAL - Dioscorides used the seed of Stavesacre to producing vomiting and salivation and to cure a toothache, "the origin of which application," said Hahnemann, "was evidently domestic practice."

HOMEOPATHIC - Diseases of the genitourinary tract and skin. Acts on teeth, urinary organs, fibrous tissue of lids, tarsi, skin, glands and right deltoid.

Sphincters, lacerated and stretched. **Lacerated tissue,** perineum (Calen., Hyper.). **Pains, remaining after surgery.** Squeezing or stinging smarting pains, as if cut. Whole body painful with feeling of weakness. Compressive pains. Sensation of squeezing between stones or in a vice in intestines, testes, head. Pains that move into teeth. Pain and nervousness after extraction of teeth.

Painful swelling of glands. Exostosis. Swelling and suppuration of bones of periosteum. Hemiplegia after anger. Arthritic nodosities on joints. Stiffness and sensation of fatigue in all joints. Warts. Condylomata.

Marked nervous disorders with trembling, irritability. Ill effects of **anger and humiliation.** Physical and moral sexual disturbances. Provokes excesses and irregular sexual appetites. High or low sex drive. Suppressed sexual desire, tendency to fear sex because it makes them feel out of control. Deep, sexual fears.

Sexual excesses. Insomnia due to sexual fantasies. Vivid sexual fantasies at night. Headaches after sex. Guilt and depression with the headaches. A tendency to masturbation and ailments from masturbation. **Rape or a history of sexual abuse.**

MIND - Great indignation about the things done by others or by himself, grieves about the consequences.

Humiliation, deep guilt and shame. Believes he will lose his fortune, his wife will leave him. Sadness without any cause with irritability. Want of self-control. Hypochondriacal. Poor memory.

Violent **outbursts of passion.** Always angry. Gloomy and petulant, throws things. Peevish. Child cries for many things and refuses them when offered. **Rape or sexual abuse.** Dwells on sexual matters, prefers solitude. Unsatisfied sexual urge in widows. Irritable, nervous, excitable and violent.

Morbidly sensitive, the least word that seems wrong, hurts her very much. Very sensitive as to what others say about her. Imagines insults. Special senses become irritable, cannot tolerate touch. Sensitive to odor, noise, taste. Everything is painfully sensitive. Fear of his shadow.

History of verbal, sexual or physical abuse, mortification, humiliation (Lyc., Anae., Nat-m.). History of being put down by someone, verbally or physically abusive (Lyc.). **Ailments from shame, punishment, vexation and suppressed anger.** Effects of reserved or **suppressed anger.** Ill effects after scolding or punishment in children. Fears of being punished, abandoned, hurt, failing, of not being good enough, of being unlovable.

Overly nice, timid. Passive, pathological desire to please (Puls.), but anger underneath. Fears the person, but still loves them, turns them passive. Difficulty resisting others, defenseless. Feels guilty, reproach themselves. Feels trapped. **Self-pity, resignation.**

Hurt easily. Very poor confidence, low self-esteem. Deep feelings of worthlessness (Aur.), severe depression. Manic depression. Easily offended, take things to heart (Nat-m.). Cries easily (Puls.), and worse consolation (Ign.).

Acute anger. **Speechless when angry.** They act out their anger in a dream or fantasy. Afraid of their anger. Tendency to suppress anger, with periodic rages, tendency to throw or break things. Grief with anger (Caust.), sense of an injustice done to them. Acute and chronic griefs, particularly over broken relationships.

Abdomen - Severe pain following abdominal operations (Calen.). Feeling of weakness in abdomen, as if it would drop, wants to hold it up. Spasmodic cutting in abdomen after eating and drinking. Swollen abdomen in children with much flatus. Incarcerated flatus, hot, smells like rotten eggs. Colic with pelvic tenesmus. Colic,

pain after anger. Colic of pot-bellied children. Colic with urging to stool or urging to urinate. Dysentery in weak, ailing, pot-bellied children.

Back - *Backache, worse in morning, before rising.* Pain in small of the back, as after over lifting. Backache worse sex

Staphysagria and rising from a seat. Back feels broken. Rheumatic drawing pains. Violent stitches move upward in back. Stiffness. Itching pimples on nape.

Bladder - Honeymoon cystitis, worse after sex. ***Irritable bladder in young married women.*** Cystitis after too much sex. Cystitis in lying-in patients. ***Cystocele.*** Pain after use of catheter. Frequent urging to urinate with scanty or profuse discharge of watery urine. Urinates in thin stream or drop by drop. ***Sensation as if a drop of urine were rolling continuously along the channel.*** Burning in urethra during ***urination.*** ***Burningpain when not urinating*** (Thuj., Sabal, Ferr-pic.). ***Pain after urinating.*** Pressure upon bladder, feels as if it did not empty.

Causations - *Ailments from shame, punishment, vexation and suppressed anger.* Effects of suppressed or reserved anger. ***Humiliation. Rape,*** sexual abuse. Ailments after sex, sex excesses, masturbation. ***Surgery,*** cutting wounds, injury, falls. Tobacco, mercury, dentition.

Chest - Soreness and rawness in chest on coughing. Muscles of chest as if bruised. Sticking pain in lower part of chest and diaphragm. Sticking pain, itching between costal cartilages. Tightly adherent mucus in chest. Itching, sharp pain in axilla.

Ears - Shootings in ears. Tensive stitches in left ear. Eruption behind ears. Tinkling in ears. Sensations as if wind blew into ears. Roaring in ears during headache. Ringing in ears on moving head. Impaired hearing in children from enlarged tonsils or from adenoids.

Eyes - Eyes sunken with blue rings. Dryness and pressure in eyeballs and eyelids. Lacerated or incised wounds of cornea. Bursting, burning pain in eyeballs of syphilitic iritis. Heat in eyeballs, dims spectacles. Pupils dilated. Dry eyes with lachrymation. Hot tears run from eyes on looking at sun. Margin of eyelids itch. Affections of angles of eye. particularly the inner. Blepharitis. Steatoma of upper lid. ***Chalazion*** (Platan.). Nodes on eyelids. ***Recurrent stytes.*** Styte doesn't suppurate and break, but remains a hard nodule.

Face - Brown and blue color of face when getting angry. Sickly, peaked, nose. Easy dislocation of jaw. Neuralgia from tooth decay, pains go into the eyes. Painful submaxillary glands, with or without swelling, abscess. Prosopalgia, pain starts from lips over face, worse mastication. Sharp, burning stitches in left cheek, which provoke scratching. Submaxillary glands painful with or without swelling.

Female - Menses irregular, late and profuse. Menses first of pale blood, then dark and clotted. Menses, regular with loss of power in limbs. Amenorrhea from indignation. Leucorrhea. ***Painful sensitiveness*** of genital organs, worse sitting down (Berb., Kreos.). Itching or sensitive vulva. Granular growths of vagina. Salpingitis. Prolapse with sinking in the abdomen, aching around the hips. Ovarian pains, going into thighs, worse pressure, sex. First sex is very painful, causing acute mental and bodily suffering. Nymphomania. Sexual desire increased, mind dwells too much on sexual subjects. Unsatisfied sexual urge in widows. ***History of rape, sexual abuse victims.***

Food - Canine hunger, even when stomach is full. Hunger before and after chill. Sleepy after eating. Thirstlessness. Food tastes bitter. Desire for bread and milk. ***Craving for tobacco,*** stimulants, wine, brandy. Desire for soup, sweets, meat. Aversion to ***milk,*** cheese, solid food. Worse meat, bread, smoking. Worse from drinking cold water. Cold drinks aggravates pain in roots and in hollow teeth.

Head - Compressive, stupefying headache, better much yawning or leaning head against something. Burning in left temple. Pressing, stinging and tearing pains. Brain feels squeezed or torn. Dullness in middle of forehead. As of a heavy load or of a round ball in forehead. Brain feels numb and occiput feels hollow. As if back of brain were made of wood and couldn't think. Dandruff. ***Head lice.*** Hair falls off from occiput and around ears. Moist, foul, eroding milk crusts, worse occiput. Itching eruption above and behind ears (Olean.). Neuralgia of scalp.

Heart - Heart feels weak. Stitching pains in heart. Trembling beating of heart. Visible palpitation, shaking the whole body. Palpitations from emotional excitement. Palpitations when listening to music.

Kidneys - Itching, needle-like stitches in region of kidneys. Constant darting pains in region of left kidney, worse cold, lying in cold bed, better heat, becoming warm in bed. Weak kidneys from sexual excesses. Nephritis. Urging and pain after urinating. Pain after lithotomy.

Limbs - Limbs feel beaten and painful. Muscles, especially of calves, feel bruised. Joints stiff. ***Crural neuralgia.*** Fine tearing or numb fingertips. Bones of fingers imperfectly developed, osteitis of fingers. Arthritic nodes on finger joints. Buttocks ache while sitting. Knees weak. Shuffling gait. Suppurating swelling in psoas muscles.

Lungs - Dyspnea with constriction. Dyspnea at close of sex or after seminal emission. Dyspnea, with

oppression of chest and fear of suffocation, after becoming angry. Cough, worse cleaning teeth, eating meat or alternating with sciatica. Cough worse tobacco smoking.

Male - Persistent dwelling on sexual subjects, especially after self-abuse. Masturbation. Priapism. Seminal emissions followed by great prostration. Impotence with irritability of bladder and urethra, brought on by sexual excess. Sexual neurasthenia. Spermatorrhea with sunken features, guilty look, emissions with backache and weakness. Dyspnea, worse during or after sex. Prostate troubles. **Prostatitis**, pain extends from anus to urethra. Chronic prostatitis in old men. Enlarged prostate and hemorrhoids. Soft humid excrescences behind corona glandis. Orchitis from mumps. Atrophy of testicles. Voluptuous itching of scrotum. **Modalities** - Better at night, from rest, after breakfast. Better warmth, sex. Worse from anger, indignation, grief, mortification. Worse night, new moon, before full moon. Worse loss of fluids, onanism, sexual excesses. Worse touch, least touch on affected parts. Worse stretching parts. Worse from lacerations. Worse cold drinks, tobacco. Worse after urinating, when not urinating.

Mouth - Salivation with pale, spongy, bleeding gums (Merc., Kreos.). Pyorrhea (Plant.). Musty taste. Thrush. Swollen submaxillary glands. Stomatitis. Canker sores with a bluish-red or yellowish bottom.

Nose - Coryza now thick, now thin, with ulcerations. Violent coryza, one nostril is stuffed up. Coryza with much sneezing and lachrymation. Coryza with nasal voice. Nasal voice from stoppage of posterior nares. Frequent sneezing without coryza. Scratching in choanae. Nose ulcerated with scabs, deep in interior.

Perspiration - Profuse, cold sweats. Perspiration smelling like rotten eggs. Perspiration with a desire to uncover. Sweats easily during day, even when sitting. Cold sweat on forehead and feet. Fetid sweat at night. Inability to sweat.

Rectum - Itching in anus, while sitting. Discharge of hot flatus during stool. Flatus hot, smells like rotten eggs.

Constipation. Stool hard, round, dry. Diarrhea after drinking cold water, with tenesmus. Dysentery in weak, ailing, pot-bellied children. Dysenteric stools, worse after the least food or drink. Gripping and dysenteric stools after least food or drink. Stool yellowish, slimy. Stool hot, excoriating. Stool smelling like rotten eggs. Hemorrhoids with enlarged prostate, very sensitive worse by touch. Worms.

Sensations - As if stupefied. As of a round ball in forehead. As if head would burst. As if brain were compressed. As if something were loose in pit of stomach. As if chest were bruised. As if small of back were broken to pieces. As if bones would be pressed out. As if legs would go under him. As if done up after much hard work.

Skin - Skin unhealthy, doesn't heal. Biting pain and itching. Dry herpes, with scabs on joints. Dry, scurfy eruption in joints. Frequent boils. Ulcers, new growths extremely sensitive to touch, may bring on convulsions. Eczema of head, ears, face and body. Eczema with yellow, acrid moisture oozing from under the crusts.

Itching eruptions, burning after scratching. **Scratching changes location of itching.** Dry, thick scabs, itch violently. Fig-warts pedunculated (Thuj.). Arthritic nodes. Inflammation of phalanges. Night sweats. Pain that precedes shingles. Skin symptoms alternating with joint pains.

Sleep - Violent yawning and stretching bring tears to the eyes. Yawning, as if he had not slept enough. Body aches all over. Sleepy all day, awake all night. Goes to sleep late from activity of mind. Amorous dreams with emissions. Unpleasant dreams. Child wakes as from frightful dreams. Child wakes, pushes everything away and wants everybody to go out, calls for mother often.

Stomach - Canine hunger, even when stomach is full. Stomach pains after becoming angry. Sensation as if stomach were hanging down relaxed. Flabby and weak. Heartburn after indignation. Heartburn after eating, with frequent nausea and constipation. Bread causes heartburn. Bitter eructations after sour food. Bitter or salty eructations after eating meat. Frequent hiccoughs. Hiccough while smoking. Nausea and salty-bitter eructations after becoming angry. Nausea, especially after operations. Nausea from vertigo, as in seasickness.

Teeth - Teeth loose, show black streaks, better hard pressure and heat. **Teeth black and crumbling.** Decayed teeth exceedingly tender. Fistula dentalis. **Teeth decay** as soon as they erupt. Tearing pain in gums of lower incisors, and their roots when eating. **Toothache** if slightest food remains in cavities of hollow teeth. Violent pain goes into roots. Toothache during menses. Decay of teeth during pregnancy. Cold drinks seem to penetrate teeth, as if they were hollow. Gum painfully sore. Pyorrhea [Plan.]. Gums white, swollen, ulcerating. Gums receding. Gums bleed when pressed upon and on cleaning teeth. Caries of lower jaw, following osteitis, latter being brought about after extraction of decayed tooth. **Dentition**, child very sensitive to mental or physical impressions.

Temperature - Predominating chilliness and coldness, without thirst. Exercising in open air improves chills. Chills in evening, with heat in face. Ascending chills from neck over head. Chills running down back. More chills in a warm room. Intermittent fever paroxysm, consisting mostly of coldness, preceded by unnatural hunger. Tertian fever with symptoms of scurvy, constipation

Throat - Swallows continuously while talking. Constriction and pressure in throat-pit after anger, worse

swallowing. **Sharp pains flying to the ear on swallowing, especially left.** Roughness and painful soreness on talking and on swallowing. Induration and hypertrophy of tonsils, with nasal voice. Chronic tonsillitis. Scratching in throat from belching, followed by cough.

Vertigo - Vertigo when sitting, better by walking about in a circle. Vertigo turning rapidly on heels. Vertigo on stooping and turning head rapidly.

COMMENTS - J. H. Schultze, when suffering from toothache, took some of the Staphysagria seed in his mouth, but it gave him such a violent exacerbation that he thought he should go mad.

Brunton noted that the seed was called "an exterminator of vermin" by the Greeks and as such it enters into the composition of an ointment (unguentum pediculosum). This last is the only use of Staph, known to orthodox medicine.

Teste remarked that Staph., like Cocc., is used in some countries for the purpose of stupefying fish. Teste found Staph. 6c, like Cocc., useful as a remedy for seasickness. To be successful, Staph, had to be taken at the moment when dizziness and nausea commenced, before vomiting set in and it always helped "nervous persons, not over fat and disposed to sadness."

Staph, produced in Teste a "long lasting vertigo, accompanied by continued nausea as in sea-sickness" and "vertigo, which ceases on rapidly turning round on one's heel."

This corresponds with one of Hahnemann's symptoms, "wheeling vertigo, especially while sitting, better by walking about in a circle."

It is noteworthy that Staph, and Cocc. are both head remedies and both effective against head lice. Both also affect the genitals, Staph, more so, and are remedies for crab lice.

An application of one part a dilution of the tincture to four parts water will destroy the parasites, although concurrent internal treatment (probably with a dilution of the same remedy) increases success.

In Teste's experience, Staph, was no less effective in nausea during pregnancy than nausea caused by seasickness. Tab. is another remedy for sickness and Teste cured with Staph, effects of tobacco smoking (excoriated tongue, stomach pain) and the habit of "swallowing the tobacco smoke."

For anger and for the effects of anger, especially if the indignation cannot have its natural expression. "Was insulted, being too dignified to fight, swallowed his wrath and went home sick, trembling and exhausted."

Great sensitiveness to the least impression, "the least word that seems wrong, hurts her very much." Sensitive to criticism. Irritated by trifles. Sudden, violent outbreaks provoked by mere trivial causes. Want of self-control and self-confidence. Fears, afraid of his shadow.

"Apathy, weak memory, caused by sexual excesses or constantly dwelling on sexual subjects." Weak memory after multiple abortions. Inability to make decisions, spaciness.

Sycotic and syphilitic condylomata. Seed warts. Keynote styas (Puls., Thuj.), tendency to get styas. Ulcers are generally very painful and sensitive. Pressing, stinging, tearing pains in periosteum. Exostoses and gouty nodes on fingers and toes. Dry, scaly eruptions over the ends of bones. Eruptions are foul smelling when moist. "Inability to perspire." Sweat smells of rotten eggs. Chilly. Shortness of breath.

Effects of "wounds made by clean-cutting instruments." Ailments from surgery and scars (Calen.). Stab wounds.

"Teeth turn black and have dark streaks through them, cannot be kept clean, crumble: decay on edges, scorbutic cachexia." Toothache during menses, affects sound as well as decayed teeth, worse from touch of food or drink, but not from biting or chewing. Toothache worse drawing cold air into mouth, worse from cold drinks and after eating.

Extreme "sinking" sensation. The stomach and abdomen feel as if hanging down relaxed. There is extreme hunger even when the stomach is full. Ravenous hunger for days before an attack of fever.

Feels guilty and depressed, turns to food, then feels guilty about food (Puls., Ign.). Bulimia. Tendency to binge on sweets, custards, creamy things. Thirstless, worse warm stuffy rooms. Craving for tobacco, cough excited by tobacco smoke. They may like milk or be aggravated by milk.

Colic from anger. "Colic of screaming, ugly, pot-bellied children, especially if they suffer much from their teeth, which turn black with tender, spongy gums, sensitive and painful." Colitis cases, Crohn's disease, inflammations of the colon from anger. Colic, vomiting, or dysentery, all worse from least food or drink. Colic after an operation on the ovaries or intestines.

Cystitis from anger. Burning in the urethra when not urinating. Urinary difficulties after severe labors. Prolapse of bladder. Prostatitis with pain running from the anus along urethra, inflamed testicles with shooting and drawing in the cords, stitching towards groin and testicles.

Vaginismus. Vaginitis. Fibroids, ovarian cysts or tumors. In one female prover, Staph, brought on the menses a year after they had ceased, at the new moon. The symptom did not recur the following month, which led Hahnemann to conclude that this "was only the primary action of the drug."

A tendency to masturbation, ailments from masturbation. Staph, is one of Gallavardin's chief remedies for removing the habit of masturbation in children and for removing improper appetites in adults.

Worse from sex. Dyspnea occurring during or after sex, dyspnea and prostration after an emission. Genitals are sensitive, itching, stinging, stitching, shooting pain, worse by touch. In women, sex is painful because the external parts are excessively sensitive. Impotence. Acute for rape. Ailments after rape, anger after rape. Fear from sexual abuse or rape, images may come back during sex (Op.).

Clarke had known Staph, to have an impulse to throw things at persons who had caused a trifling or imaginary irritation.

P. C. Majumdar gives two cases in which loss of memory following masturbation and seminal emissions was cured with Staph. 30c. The first case was a student, naturally robust and intelligent, who lost his memory when he contracted the habit of masturbation. His symptoms included a vacant countenance, with no aptitude or inclination for mental work. Despair of the future, great languor and weakness. Occasional nocturnal emissions, or constipation.

When he read anything he forgot it the next moment. Heaviness, headache and vertigo after the least mental exertion. Staph. 30c was given morning and evening. Improvement began at once and the cure was complete in a month.

The second case involved another student who had constant involuntary emissions, weak memory, languor, headache every morning on rising, no appetite, constipation. Staph. 30c, once a day, cured.

Clarke saw Staph. 30c give relief to complaints in newly married women. "Constant urging to urinate in young married women." Honeymoon cystitis. Clarke saw cystocele relieved by Staph.

Bibby used Staph, tincture with much success, three drops in two ounces of water, a teaspoonful every two hours in cases of night sweat in patients bordering on tuberculosis.

RELATIONS-Antidote: Camph. **Compare:** (1) Coloc., Cham., Caust., Ign. (2) Ph-ac., Calad. (3) Ferr-py. - tarsal cysts. (4) Nux- v., Calc-p. **Complementary:** Caust., Coloc. **Inimical:** Ran-b.

***STAR OF BETHLEHEM

(Bach Flower Essence)

PHARMACY - star-b-b. Star of Bethlehem. Ornithogalum umbellatum. The flower heads are boiled for half an hour. Subsequently, the water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Star-b-b. is listed in Bach's group **of Despondency and Despair**, with Crb-a-b., Oak-b., Will-b., Sw-ch-b., Elm-b., Pine-b. and Lar-b. States of grief and shock. Post-traumatic stress disorder (Rck-r-b.). Ailments after accidents.

Lack of appetite, digestive problems, shock and collapse. Ulcerative colitis and Crohn's disease. The diaphragm is known to tighten during grief and impair breathing, leading to frequent sighing.

MIND - Shock and grief. Sadness, heart wrenching impact, deepest pain and despair. Despondency and hopelessness. Fear, shame, frustration, and guilt. Anger and prolonged outrage (Holly-b.).

Thoughts of nihilism and meaninglessness (Sw-ch-b.). Internal numbing or taking lightly those things that cannot be changed. Hidden internal agony (Agri-b.). Hides inner feelings from others (Must-b.).

REFERENCES-Bach.

***STELLARIA MEDIA

(Chickweed)

PHARMACY - stel. Stellaria media. Chickweed. N. O. Caryophyllaceae. Tincture of whole fresh plant in bloom. **Historical dose:** Tincture and all potencies.

CLINICAL - Constipation. Gout. Liver, inflammation. **Rheumatism.** Psoriasis. **Synovitis.** Vomiting.

HOMEOPATHIC - The first mention of Stel. by F. H. Brett recounted an experience in the case of his wife in which the tincture

was applied externally to enlarged, inflamed gouty fingers-joints, and in his own case to painful, aching great toes.

In each case a few applications removed the trouble. Brett was led to this use by having heard a rumor that "chickweed poultices" were good for gouty joints.

F. Kopp published a proving of the tincture on himself. Kopp took frequently repeated doses of the tincture and also chewed some of the weed. The pains induced were of a rheumatic character and were so severe that

they had to be antidoted with Nux-v. and Bry.

Kopp confirmed Brett's observations in the value of external applications of Stel. Internally, he gave Stel. 2x. Stasis, congestion and sluggishness of all functions. Pain, swelling and soreness of the liver, better by motion and accompanied by soreness. **Rheumatism**, darting pains in almost every part, stiffness of joints, parts sore to touch, worse motion. **Chronic rheumatism. Shiftingpains** (Puls., Kali-s.). Psoriasis. Enlarged and inflamed gouty finger joints. Morning aggravation.

MIND - General irritability. Lassitude, indisposition to work.

Abdomen - Bowels sore, worse by touch.

Burning pressure in region of liver. Bilious feeling. Pains in right groin.

Back - Dull pain under right scapula. Rheumatic pains across small of back, worse bending. Loins stiff and sore.

Chest - Constriction, oppression, heat. Tickling in upper part.

Eyes - Right eyeball sore to touch. Darting pain in right eye. Smarting and burning in eyes, feel protruded. Flushes of heat below right lid. Vision dim.

Face - Neuralgic pains in right side of face. Burning on lower lips.

Head - Dull, frontal headache, worse in morning and left side with sleepiness. Neck muscles stiff and sore. Eyes feel protruded.

Kidneys - Kidney region sore to touch.

Limbs - Rheumatoid pains in different parts of the body. Bruised feeling. Joints stiff. **Synovitis**. Sharp pain in small of back, over kidneys in gluteal region, extending down thigh. Rheumatic pains in calves of legs. Pain in shoulders and arms.

Liver - Hepatic torpor. Burning pains all over liver. **Liver engorged, swollen with stitching pain and sensitive to pressure**. Sensation as if liver too large for body.

Lungs - Short cough from tickling on upper chest, worse deep inspiration. Hawking of viscid, salty mucus.

Modalities - Better evenings, cold air. Better motion. Worse mornings, warmth, tobacco.

Mouth - Persistent taste of the drug with slight acrid feeling. Heat and dryness of mouth, numbness of lower gums and tip of tongue. Sensation as if incisors set on edge.

Nose - Dryness of nostrils.

Rectum - Constipation or alternating constipation and diarrhea. Stools loose, dark brown, attended with slight pain. Clay-colored stools.

Sleep - Sleeps well but unrefreshed on waking.

Stomach - Slight nausea with frequent belchings, tasting of the drug. Sharp pains in stomach.

Throat - Numbness and dryness in throat, followed by sharp stitches in left tonsil.

COMMENTS - Bellairs published the case of E. B., 18, who had rheumatic fever which had left him in a hopeless state of chronic "shifting" rheumatism, pains now in ankle, now in knee, now in arm, wrist or fingers. Stel. 2x, was taken three times a day, completely cured in a month. Bellairs suggested that "shifting-pains" may be a keynote and Kopp confirmed this.

Brett cured himself with Stel. 1c of a violent attack of sickness with sharp pains in stomach increasing in violence and culminating in an explosive vomit. The liver was much enlarged, hard to the touch. The pain began in the region of the gallbladder. Vomiting ceased after the first dose and the liver enlargement quickly subsided.

Cooper gave much relief with a single dose of in the case of a woman, 55, who had psoriasis, dating from twenty-one years back with irritation in the spots, chiefly on flexures of joints with much irritation of

Stellaria media scalp and soreness of eyeballs.

RELATIONS - Compare: (1) Puls. - similar in rheumatism, pains shifting, worse rest, warmth, better cold air.

REFERENCES - Boericke. Clarke.

***STICTA PULMONARIA

(Lung-wort)

PHARMACY - stict. Sticta pulmonaria. Lungwort. Lobaria pulmonaria. N. O. Lichenes. Tincture of dried lichen.

Historical dose: Tincture and all potencies.

CLINICAL - Allergies. Angina pectoris. Anus, pain. Asthma. **Bronchitis**. Catarrh. Chorea. Clergyman's sore throat. Colds. Conjunctivitis. Coryza. **Coughs**. Diabetes. Diarrhea. Glands, swollen. **Hay fever**. Headaches. Hemoptysis. **Housemaid's knee**. Hysteria. Influenza. Laryngitis. **Lung, disorders**. Measles, cough. Migraine. Milk, scanty. Neuralgias. Ozaena. Post-nasal catarrh. Pott's disease. **Rheumatism**. Rhinitis. Seminal, emissions. Sick, headache. Sleeplessness. Syphilis. **Tracheitis**. Tuberculosis.

HERBAL - Sticta pulmonaria received its name, lungwort, from the likeness of the plant to lung tissue. It was

a popular remedy of great repute in catarrhs and coughs when Hale introduced it to homeopathy.

HOMEOPATHIC-S. P. Burdock, C. H. Lutes and S. Lilienthal proved it and elicited some very remarkable and valuable symptoms. Hering added many clinical symptoms.

Stict. is a remedy for coryza, bronchial catarrh, nervous and rheumatic disturbances. Influenza, better in open air. Painful dry mucus membranes. **Coughing aggravates** cough, the more he coughs, the more he wants to. Cough worse nights, comparatively free from it during day.

Rheumatic stiffness of neck. Diagonal pains (Lac-c.). **Nervous and rheumatic disturbances.** Nervous, sense of levitation of different parts. General feeling of dullness and malaise, as when a cold is coming on, dull, heavy pressure in forehead, catarrhal conjunctivitis, etc. Hysteria, chorea after loss of blood.

MIND - Confusion of ideas. Inability to concentrate. **Patient must talk.** Lively, kicks her heels up. **Feels as if floating in air** (Dat-a., Lac-c.). Horror of night, when he suffers the most.

Abdomen - Dull pains in the right hypochondrium. Feeling of fullness in left hypochondriac region. Rumbling as if full of yeast.

Back - Rheumatism. Red spots on affected joints. Chorea like spasms. Cold moist limbs. Sore stiff neck, pains to shoulder. Legs as if floating in the air. Bursitis, especially about the knee. Profuse sweat on hands. Restless hands and feet.

Breasts - Absence of milk after delivery. Scanty flow of milk.

Causations - Ill effects of falls or hemorrhages.

Chest - Pulsation from right side of sternum down to abdomen. Oppression of chest and feeling a hard mass there. Pain from sternum to spine, worse motion. Pain through chest from sternum to spinal column.

Constitutions - Suited to neuralgic, rheumatic, gouty individuals.

Coughs - Barking cough, worse night and morning, when tired. Dry, **hacking cough during night, worse inspiration**, prevents sleep. Loose cough in morning. Cough from cold, damp weather. Cough after measles (Sang.), after influenza, after whooping cough.

Ears - Acute neuralgic pains in mastoid apophysis, rather deep in.

Eyes - Burning in eyes and soreness of eyeballs. Burning of eyelids on closing lids or turning eyes.

Face - Darting pains in side of face and in lower jaw.

Female - Uneasiness in the pelvis. Menses more abundant and paler than usual.

Head - Heaviness in the forehead. Dull headache with dull heavy pressure in forehead and **root of nose.** **Catarrhal headache before discharge appears.** Sensation as if scalp were too small.

Heart - Attacks of anxiety about heart. Dull, oppressive pain in cardiac region.

Kidneys - Profuse urination with sore painful bladder.

Limbs - Swelling, heat, redness of joints. **Spot of inflammation and redness over affected joint.** Pain severe and drawing. Chorea-like spasms, legs feel floating in air. **Housemaid's knee** (Sep., Rhus-t., Kali-hp., Slag.). Shooting pains in knees. Joints and neighboring muscles red, swollen, painful. Rheumatic pain in right shoulder joint, deltoid and biceps. Rheumatic pains precede catarrhal symptoms.

Lungs - Bronchitis. Tracheitis, facilitates expectoration. Tickling high up in pharynx. Air passages numb. Expectoration, scanty, whitish or frothy. Expectoration, entirely absent.

Modalities - Better from free discharges. Better open air, pressure. Worse as day advances, lasting all day. Worse at night, lying down. Worse sudden changes of temperature. Worse by touch, motion.

Nose - Fullness at the root of the nose (Nux-v.). Obstruction of nose, worse at night, preventing sleep, better open air. Tingling in right side of nose. Painful **dryness** of mucus membranes. Atrophic rhinitis (Calc-f.). **Hay fever**, incessant sneezing (Sabad.). Coryza from slightest cold. Coryza which dries up soon, forming scabs, difficult to dislodge, particularly at night. **Constant need to blow the nose, but no discharge.** Loss of smell.

Rectum - Diarrhea, stools profuse, frothy. Diarrhea worse in morning.

Sensations - As if she cannot keep her tongue still. Throat and mouth burn as if scalded. As if hard mass collected in lungs. As if stomach full of yeast. As if floating in air. The right side is more prominently affected.

Sleep - Sleepless from nervousness from cough after surgical operations.

Throat - Dryness. Clergyman's sore throat with great dryness of mucus membranes. Tracheitis. Tickling in throat causes cough. Raw throat, dripping of mucus posteriorly.

COMMENTS - Hale said, "It was first used for severe harassing cough," and such good results accrued that provings were made to ascertain its full value. Dewey conducted a proving on several persons which further enriched the pathogenesis.

Severe coryza with violent sneezing intense headache and conjunctivitis. Attacks preceded or followed by rheumatic pains and swelling of the small joints.

Dry cough, worse evening and night, can neither sleep nor lie down, must sit up. Coughs left by measles, whooping cough, or influenza. Hard, dry barking coughs following colds. Obstructive catarrh. Discharge dries

quickly and forms crusts or scurf. Constant need to blow the nose, but no discharge comes on account of dryness.

"Dull, heavy pressure or stuffed feeling in root of nose" in catarrh and headaches. "A deep-in headache" (Bac.). Rheumatism, related to catarrh. Tuberculosis and hemoptysis. "Oppression at chest, sensation as if a hard mass on it. Sudden pain from sternum to spine, constant, worse on movement."

Sleeplessness, due to nervousness or cough. Hysterical chorea coming on after profuse hemorrhage. Sensation of levitation, the legs feel as if floating in the air, head as if floating off, as if the body and limbs did not touch the bed.

P. C. Majumdar cured two cases of whooping cough with Stict. 6x. The cough began just after sunset and went on until vomiting occurred and all the contents of the stomach were thrown off.

M. D. Youngman related a number of cases of catarrhal and pulmonary disorders cured with Stic., with harsh coughing, racking incessant, "unprofitable" cough of spasmodic type. Youngman considered it especially suited to neuralgic, rheumatic, gouty individuals.

Youngman noted the case of Mrs. H., 42, who had an attack of bronchitis in January and when seen, on March 20th, she had a harsh, racking cough with pain all through chest on coughing. Spongy state of mucus membrane of pharynx, which bled easily.

She had several attacks of asthma, hay fever every August, paroxysms of cough often ended in convulsive sneezing, which she dreaded because it was followed by asthmatic symptoms.

"She takes cold in her head, which in a day or so goes down in her throat and thence into her chest." Every cold she got did this. Stict., 1x gave relief in five days.

Hale said Stict. is indispensable in February, March and April in the American climate.

O. Rogers prescribed Stict. for a patient with the cough of the remedy, at the time she was nursing her seventh child. She had always been annoyed because of a lack of milk, it had been occasionally suppressed. While taking Stict. the flow became ample and remained so as long as an occasional dose was being taken. Rogers subsequently verified this effect in a number of cases.

Elias C. Price related the case of a boy, 8, who had acute rheumatism with inflammation and redness of one knee, ankle toes, wrist and fingers, valvular heart disease from a previous attack. Aeon, and Sulph. failed to relieve.

Stict. 1x was given every hour. The next day, there was a considerable quantity of fluid in the knee joint, apparently an aggravation by Stict., but otherwise the boy was better. Stict. was continued. The next day, half the fluid was gone, and the third day it was all gone. The boy was cured in nine days.

Price remarked that he had noticed one symptom so frequently present in the cases he cured with Stict. that he began to regard it as a characteristic although it was not in the provings: a spot of inflammation and redness on the affected joint like the hectic flush on the cheeks in tuberculosis. In housemaid's knee, Stict. comes as near being a specific as a remedy ever can.

***STIGMATA MAYDIS

(Corn-silk)

PHARMACY - stigm. Stigmata maydis. Cornsilk. Zea mays. Maize. Indian Com. N. O. Gramineae, Tribe, Phalarideae. (1) Stigmata maydis. Green pistils. Tincture: One part, by weight, of the com silk to two parts of alcohol. Fluid Extract. (2) Shucks. Decoction or tincture of the husks of maize after the removal of the grain.

Historical dose: Tincture and all potencies.

CLINICAL - Albuminuria. Bladder, disorders. Cystitis. Dropsy. Dysuria. Edema. Gonorrhea, chronic. Heart, disorders. Heart, failure. Malaria. Kidney, colic. Kidney, stones. Pyelitis. Urine, retained. Urine, suppressed.

HERBAL - The grain in bulk appears to be capable of generating a poisonous gas, as four men were suffocated, one fatally, on opening a cargo of maize for the purpose of discharging it in the London docks.

Generally, two parts of maize have been used in medicine, the pistils and the husks, but Clarke thought it best to take them together. Dr. E. C. Lowe, of England, used a decoction of com shucks for chronic malaria, teaspoonful doses freely.

Irritable conditions of the urinary tract, ureters, bladder, urethra. A powerful diuretic in kidney disorders unconnected with cardiac involvement. Heart and urinary conditions combined.

HOMEOPATHIC - Marked urinary symptoms. Organic heart disease with much edema of lower limbs and scanty urination. Enlarged prostate and retention of urine. Uric and phosphatic. Gonorrhea. Cystitis. Hansen confirmed the value of Stigm. in 20 drop doses of the fluid extract in organic heart disease with dropsy, much edema of lower limbs and scanty urination. He mentioned also as suitable cases kidney stones with nephritic ulcer and discharge of small stones, red sand and blood.

Chronic pyelitis from catarrh. Chronic retention of urine with great tenesmus after urinating. Suppression of urine with lack of solids and low specific gravity. Bladder catarrh, tenesmus of neck of bladder, ammoniacal urine, much mucus. Chronic gonorrhea, prostate involved, painful urination.

Bladder - Cystitis. Tenesmus after urinating. Bladder catarrh. Gonorrhea.

Kidneys - Kidney stones, nephritic colic. Suppression and **retention of urine**. Dysuria. Blood and red sand in urine.

COMMENTS - J. H. Cook gave an account of Stigm. in the Med. Cent. He quoted the results of Dumont's investigation of its action on the heart: "It makes the heart's action slower and stronger. Regulates its rhythm. Its diuretic action is manifested first. Its action is more powerful and evident in cardiac disorders with dropsy. With the disappearance of the dropsy arterial tension increases and venous tension diminishes."

Cook gave the case of Mr. X., 63, florid, robust, temperature, had been many months under treatment with intense prostration, intermittent pulse, and dyspnea, traced originally to cooling off too rapidly when perspiring. The urine contained much albumen, mucus and some blood, specific gravity 1010. Great tenderness over entire abdomen, especially in region of ureters. Under remedies he would improve for a few days, when a slight chill would be followed by fever and the symptoms would come back in full force.

The microscope revealed pus cells and granular epithelial cells in abundance. Stigm. was then given, a teaspoonful of the fluid extract every four hours. In less than a week there was visible improvement. The constant calls to urinate ceased and the patient could go through the night without being disturbed more than once or twice.

The specific gravity of the urine increased and pus, blood and albumen disappeared. Only a little abdominal tenderness remained, which did not prevent the patient from attending to his business and enjoying life.

Another use of Stigm. was communicated to the profession by Dr. J. W. Pruitt. Pruitt's son took a chill in the Arkansas river bottom. The chills were stopped with the usual remedies, Chin., Fen., Pipe., but every fourteen days would come back with increased severity.

Presently gastric symptoms set in with anemia and other symptoms of chronic - ity. "Shuck tea" was recommended by a lay friend and was taken for one day only. There was never a chill after. Pruitt thence forward used Stigm. largely and he found it was only in the chronic cases that it was beneficial.

RELATIONS - Compare: (1) In bladder affections, Equis., Tritic., Sabal. (2) Kidney colic - Oci., Berb. (3) Heart - Dig., Crat., Stroph.

***STILLINGIA SYLVATICA

(Queen's Root)

PHARMACY - still. *Stillingia sylvatica*. Queen's root. Queen's delight. Pine barrens. N. O. Euphorbiaceae. Pine barrens grows from Virginia to Florida. Tincture of the root after flowering. **Historical dose:** Tincture and all potencies.

CLINICAL - Bones, diseases. Clergyman's, sore throat. Elephantiasis. Headaches, catarrhal. Headaches, syphilitic. Hemorrhoids. Hipjoint, disease. Influenza. Larynx, disorders. Liver, disorders. Nodes. Periostitis. Psoriasis. Rheumatism. Scrofula. Sore throat. Syphilis.

HERBAL - *Stillingia* has long been a popular remedy for syphilis in the southern states of North America. T. Y. Simons introduced it into medicine and Hale to homeopathy.

HOMEOPATHIC H. R. Frost, A. B. Nichols, J. M. Cunningham and others proved it, chewing the root or taking the tincture. One prover chewed the bark.

The Still, proving shows an action closely parallel with that of syphilis, attacking the genito-urinary organs, throat, pharynx, larynx and trachea, mouth, head and bones. It has a popular repute in scrofula, skin affections, liver diseases and rheumatism, confirmed in the provings.

One prover was cured of a pustular eruption. In chronic rheumatism, Hale classed it with Phyt. and Kali-i. Chronic periosteal rheumatism, syphilitic and scrofulous disorders. Well marked respiratory symptoms. Torpor of lymphatics torpid liver with jaundice and constipation.

MIND - **Gloomy forebodings**, depressed. Fear that something bad will happen.

Abdomen - Heavy pain in hypogastric region. Severe cramps in both hypochondria. Sharp darting in left hypochondrium, followed by passage of flatus. Borborygmi. Colic, periodical.

Back - Aching in back and down thighs and legs. While sitting, pain in left lumbar region, darting forwards.

Bones - Bones, diseases. Nodes.

Chest - Oppression of chest. Darting pain in thorax. Raw feeling in chest, whole length of sternum.

Constitutions - Hydrogenoid constitution.

Ears - Burning in left ear in evening, next morning a vesicular eruption.

Eyes - Eyes inflamed and watery. Sharp, darting pain over left eye. Lachrymation of both eyes after reading.

Face - Stinging, darting pains in face with frontal headache. Periostitis of facial bones.

Female - Both ovaries pained very severely. Copious muco-purulent leucorrhea with rheumatic pains.

Food - Appetite increased, then lost.

Head - Persistent dull headache in vertex.

Sharp darting pains in right occipital protuberance. Bone swellings in head and forehead in latter size of hen's eggs.

Heart - Boring pains about region of heart with irregular pulse. Pulse weak and very irregular.

Kidneys - Dull pain in region of kidneys. Incontinence of urine. **Deposits white sediment.** Urine colorless, milky and thick.

Limbs - Aching pains in bones of limbs and back.

Liver - Torpidity of liver with jaundice, great depression, constipation.

Lungs - Dry, spasmodic cough. Larynx constricted with stinging in fauces. Trachea feels sore when pressed. Croup. Cough deep and loose.

Male - Slight drawing up in right testes. Dull tearing pain in left testes. Gonorrhea.

Modalities - Better in morning, dry air. Warmth helps itching of legs. Worse in afternoon. Worse by movement, walking. Worse exposure to cold or to air, damp air.

Mouth - Heat in mouth and fauces. Taste salty, bitter in morning. Increased flow of saliva. Tongue coated heavily yellowish white. Tongue feels rough and sore. Scalded sensation on tongue with soreness in region of larynx. Paroxysms of neuralgic toothache.

Nose - Catarrhal discharge, first watery then muco-purulent. Influenza. Necrosis of bones of nose.

Rectum - Severe attack of hemorrhoids. Burning and tenesmus. Constipation, stools delayed. Bowels loose and irregular. Stools copious, acid, frothy, bilious, papescent, white like curds, dysenteric.

Sensations - As of a heavy substance pressing on brain. Tongue as if scalded. As if room were too warm.

Skin - Ulcers, chronic eruptions on hands and fingers. Ulcers with unhealthy skin. Leprosy. Itching and burning. Exostosis. Vesicular eruption on ears. Scrofulous, venereal and other skin diseases. **Enlarged cervical glands.** Elephantiasis.

Sleep - Unusual drowsiness all day with general malaise and headache. Very sleepy after eating.

Stomach - Faint, empty sensation in stomach. Distress, griping, cramps in stomach. Sickness and salivation. Regurgitation and vomiting of ingesta. Nausea with constipation.

Throat - Laryngitis. **Hoarseness** and chronic laryngeal disorders of public speakers. Smarting, stinging, dryness and rawness of fauces. Intense burning in fauces and throat. Constriction of throat.

Stillingia sylvatica who was taking Still. 1c. complained that the medicine made his legs and feet feel tired and his feet feel sore.

Still, attacks the periosteum and produces pain in the bone. Nodes on the forehead, tibia and elsewhere. Decay of the nasal bones. Pain in the cranial bones and the headaches of syphilis, though it is not confined to syphilitic cases. Pains are sharp, shooting, darting. The cartilages of larynx and trachea are sore and feel bruised. Dryness.

Hale quoted a case of secondary syphilis treated by Preston, one of the provers. The patient, a man, suffered extreme torture from bone pains. After receiving Still, he slept well.

The immense nodes disappeared from head and legs and "from the most deplorable, down-hearted, sometimes almost raving from derangement, miserable, thin-looking object, he changed into a buoyant, joking, rotund-looking fellow."

COMMENTS - Clarke cured with Still, syphilitic cough of the hoarse, barking type. In one case of secondary syphilis the patient,

RELATIONS - **Antidote to:** Merc. **Antidoted by:** Ip. - nausea from the fumes. **Compare:** (1) In syphilis, Syph., Med., Merc., Kali-i. (2) Chronic rheumatism, Guai., Phyt. (3) Nodes, Mang., Corydalis, Staph. (4) Hip disease, Nat-s. (5) Still, secondary or inherited syphilis, pains in and through hip, worse night, worse wet weather, Nat-s. (6) the hydrogenoid constitution, pains Worse night rouse patient from sleep, better turning over in bed.

REFERENCES - Boericke. Clarke.

*****STRAMONIUM**

(Jimson Weed)

PHARMACY - stram. Stramonium. Jimson weed. Thornapple. Datura stramonium. Jamestown-weed. Stink-weed. N. O. Solanaceae. Grows in vicinity of cultivation on rank soil where refuse is deposited in all parts of the world. Tincture of fresh plant in flower and fruit. **Historical dose:** All potencies.

CLINICAL - Alcoholism. Anasarca. Aphasia. Bedwetting. Bums. Catalepsy. Chordee. **Chorea. Delirium. Delirium tremens. Delusions.** Ecstasy. Epilepsy. Esophagus, spasms. Eyes disorders. **Fever.** Headache, sun. Hiccoughs. Hysteria. Injuries. **Insanity.** Lochia offensive. Locomotor ataxia. **Mania.** Meningitis. Nymphomania. Parkinson's disease. **Rabies.** Sexual mania. Scarletina. Schizophrenia. Stammering speech. Starting. Strabismus. Strokes. Sunstroke. Tetanus. Thirst. Tremors. Trismus. Typhus.

HOMEOPATHIC - According to Teste, Stoerck, one of Hahnemann's predecessors, was the first to use Stram. in modern times. Stoerck first tried it in mental alienation, because it was supposed to produce "a marked and persistent disorder of the mental faculties."

Hahnemann proved it and introduced it into the Homeopathic Materia Medica. In his introduction to the remedy he pointed out that, although it produces many symptoms, it does not in its primary effects cause actual pain. Hahnemann attached a good deal of importance to this. Hahnemann said "Stram. allays some spasmodic movements and restores suppressed excretions in several cases in which absence of pain is a prominent symptom."

Teste specifically mentioned its usefulness in some kinds of mania, particularly in nymphomania of lying-in women.

Marked and persistent disorder of the mental faculty. Hysteria, weeping, laughing with sexual excitement. Certain forms of religious mania in exaggerated and ridiculous scruple of conscience. Fixed notion that some unpardonable sin has been committed which

the patient is unable to remember. Notion that he is possessed of the devil.

Hallucinations. Delusions as to size and distance. Sensation as if limbs were separated from the body. Delirium tremens. Suppressed secretions and excretions, including urine and stool.

Absence of pain and muscular mobility especially of muscles of expression and of locomotion. Gyratory and graceful motions. Increases the mobility of the muscles of expression and of locomotion, the motions may be graceful, rhythmic or disorderly of head and arms.

Parkinson's disease. Trembling of limbs. Nervous tremors. Convulsions, spasms worse at night after masturbation. Tonic and clonic spasms alternately. Paralysis of one side, convulsions of the other side or unilateral paralysis with twitching. General paralysis of the insane. Chorea, epilepsy from fright. Catalepsy, limbs can be moved by others. Traumatic neuritis.

MIND - Hallucinations, fixed notions, terrifying delirium etc. Active variable delirium, delirium tremens. **Delirium with desire to escape** (Bell., Bry., Rhus-t.). **Raving mania** with cold sweat. Maniac, curses, tears ones clothes with teeth. **Devout, earnest, beseeching and ceaseless talking.** Violent and lewd speech.

Paranoid. Schizophrenia. Manic-depression. Religious insanity. Wants to kill people or himself. Exposes himself. Rapid changes from joy to sadness. Wife thinks husband neglecting her. Man thinks his wife faithless. Stupid, imbecile.

Fearful hallucinations that terrify the patient, sees ghosts, vividly brilliant or hideous phantoms, animals, jumping sideways out of ground or running to him. Wildly excited, as in night terrors. Hears voices, talks with spirits. Delusions about his identity, thinks himself tall, double, a part missing.

Terrors, cannot bear solitude or darkness, **must have light and company. Dread of darkness** and has a horror of shining objects. Fear and anxiety on hearing water run. Sight of water or anything glittering brings on spasms. **Anxiety when going**

Abdomen - Abdomen inflated, hard, distended. Contusive pain in abdomen during movement. Violent pains in abdomen, as if navel were being torn out. Hysterical spasms in abdomen. Borborygmi with fermentation in abdomen. Expulsion of much flatus. Swelling of inguinal glands.

Back - Neck stiff, cannot bend it backwards. Drawing pain in the back. Spine sensitive, slightest pressure causes outcries and ravings. Opisthotonos.

Causations - Ill effects of shock, fright, sun, childbirth. Dog bites. High fever. Head injury. Hydrophobia.

Chest - Constrictive oppression on chest with dyspnea. Pressure on chest, worse by speaking. Spasm in pectoral muscles. Red rash on chest.

Constitutions - Suited to ailments of young, plethoric persons, especially of children (chorea, mania, fever, delirium).

Ears - Sensation as if air rushing out of ear. Deafness. Hallucinations of hearing.

Eyes - Fixed, sparkling, **staring wide open.** Half open in sleep. Pupils dilated. Lachrymation with headache, fever, otalgia. Diplopia. Night-blindness. Green vision. Hallucinations in which everything looks jumbled. An

objects look black, crooked, small, large. Parts of the body seem enormously swollen. **Small objects look large.** Loss of vision, complains that it is dark and **calls for more light.** All objects look black. Squint in brain disorders during convulsions, worse terror, fear. Strabismus.

Face - Pale face. Red, bloated, hot, circumscribed redness of cheeks. Blood rushes to face, distorted. **Expression of terror.** Expression rapidly changing, now flushed, now pale, a sardonic grin, then expression of terror. Thinks face elongated. Forehead wrinkled, frowning in brain diseases. Lips, dry, glued together. Chewing motion. Lockjaw.

Female - Excessive menstrual flow, preceded by sexual excitement. Menses have strong smell as of semen. Loquacity and singing during menses. Sobs and moans after menses. **Uterine bleeding with loquacity.** Hands constantly kept on genitals. Nymphomania, lewd talking, sings obscene songs. Puerperal, convulsions, mania with mental symptoms and profuse sweating. Convulsions after childbirth.

Food - Food tastes bitter, like straw. **Aversion to all fluids.** Violent thirst. Great desire for acids, citric acid better. Lemon juice ameliorates.

Head - Headache with tendency to speak incoherently. Pain in forehead and over eyebrows, beginning at 9 a.m., worse until noon. Boring pain, preceded by obscure **vision.** **Headache from sun.** Rush of blood to head, staggers with tendency to fall forward and to the left. **Meningitis** from suppressed ear discharge. **Raises head frequently from the pillow** and drops it again during unconsciousness, delirium, puerperal fever.

Heart - Pressure about heart. Heart disorders with constrictions of the chest and mental symptoms. Angina pectoris. Palpitations. Feeble, pulse irregular.

Kidneys - Suppression of urine, especially during typhoid, bladder empty. Loss of power of bladder in the aged, stream flows slowly, cannot make haste. Rigor during urination. Bladder empty.

Limbs - **Chorea**, spasms partial, constantly changing. Convulsions of upper limbs and of isolated groups of muscles. **Graceful and rhythmic motions.** Clasps hands over head. Hands open and shut. Wringing of hands. Staggering gait. Misses step of stairs while descending. Heels numb, sometimes painful. **Violent pain in left hip.** Abscess of left hip joint with violent pain. Trembling of limbs. Inside of right thigh red and swollen. Hemiplegia with convulsions in unparalyzed parts.

Lungs - Inspiration slow, expiration quick. Nervous asthma. Cough with jerking of lower limbs, when sitting. Cough worse looking at light, fire or bright objects. The spasmodic cough of alcoholics, whooping.

Male - **Sexual passion exalted** with indecent speech and action. Hands constantly kept on genitals.

Modalities - **Better from bright light,**

company, warmth. Worse from shining objects, mirror, surface of water. Worse from fright, when alone. Worse sun, cloudy days, in dark room. Worse suppressions, intemperance, after sleep. Worse by touch, pressure, swallowing.

Mouth - Dry, dribbling of viscid saliva. Constantly spits saliva. Cannot swallow on account of spasm. Chewing motion. Grinding of the teeth. Fine red dots on tongue. Tongue, dry, parched, swollen, hangs out of the mouth. **Stammering.** Aphasia. Risus sardonicus.

Nose - Alae nasi white with a red face. Obstruction of the nose. Nasal discharge yellow, bad-smelling. Nose feels obstructed and dry, though she is able to breathe through it.

Rectum - Putrid, dark, painless involuntary diarrhea with a squint and pale face. Cholera infantum. Stools suppressed.

Sensations - As if spinning or weaving. As if objects were smaller than they really are. As if dizzy. As if drunk. As if he was seeking something. As if he had no limbs. As if bones were sawed through. Head as if drawn backward. As if pins and needles were in forehead. As if nose were shifted. As if front teeth would fall out. Teeth as if pressed together.

Skin - Fiery red patches on skin. Shining red flush. Burns and scalds. Crawling as of many bugs. Chronic abscesses, fistulae. Abscesses and tumors with severe pain. Non-appearance of exanthemata. **Effects of suppressed eruption in scarlatina** with delirium.

Sleep - Sleepy, but cannot sleep (Bell.). Sleepless in darkness. Deep snoring sleep. Lies on back with thighs and knees flexed. **Frightful dreams.** Weeping in dreams. Laughs, screams, starts during sleep. Awakes terrified, knows no one, screams with fright, clings to those near him (child). Comatose.

Stomach - Hiccough obstinate. Nausea. Vomiting of mucus **and green bile.** Watery vomiting with colic and diarrhea.

Temperature - Profuse sweat which does not relieve. Cold sweat during spasms. Violent fever. Heat over whole body with red face and perspiration. Heat with anxiety and redness of cheeks or else with thirst and vomiting. Retention of urine in any fever.

Throat - Dry with great thirst, yet dreads water, it chokes him. Spasms, twitching of larynx. Up and down

movement of larynx as in swallowing. Swallowing, difficult, hasty. As if boiling water rising in throat. Voice hoarse and croaking, suddenly fails in higher tones.

Vertigo - Vertigo, worse walking in dark or with eyes closed. Head bent backwards in vertigo, supports head with hands while bending or rising after sunstroke.

COMMENTS - J. Emmons Briggs recorded a case of poisoning. Briggs had an urgent call to see James M., 4, in "convulsions." He found him lying on the bed in a state of wild delirium, requiring the constant combined efforts of two people to keep him in bed.

Face was exceedingly flushed, expression rapidly alternated between pleasant and anxious. Pupils widely dilated, iris scarcely visible, giving the eye a very brilliant appearance.

Marked convergent strabismus, skin hot and dry, resembling scarlatina eruption. Abdomen tense. The most alarming symptom was rapidly recurring convulsions with twitching of the arms and lower limbs. Clonic spasms and contractions.

Grasped at imaginary objects before the eyes, when expression frequently became anxious, as if the patient was trying to ward off imaginary foes. At times the mind was very active and the patient talked rapidly and incoherently. Between the spasms, laughter and crying frequently occurred.

The boy, it transpired, had been chewing a thorn apple. When he came home he seemed rather dazed, and vomited. He then threw himself on the sofa and slept very soundly until he awoke in the convulsions. The boy recovered under Kali-br. in five-grain doses, though it was with great difficulty that he was made to swallow.

Schizophrenia (Lach., Anae.). Paranoid schizophrenia. Religious mania. Insanity, mania, and dementia. Violent mania (Lach., Hyos. has a passive mania), rages, and wild violence. Loquacious (Lach.).

Characteristic wild, animal-like look in the eyes. Clinical possession, they talk in other languages, other voices, violent speech, rages and ravings. Primitive instincts and fears. Vithoukas described it as an "uncontrolled eruption of the unconsciousness."

May have a history of frights, strokes, head injuries or meningitis leading to mania. Fear of dogs and wolves, often hallucinate that they see dogs attacking them. Visions of animals. Claustrophobia. Fear of the dark, of tunnels. Fears of mirrors and crosses. Afraid of shiny objects, fire. Hydrophobia, rabies (Bell., Lyss.). Cries as if from sight of hideous objects.

Terrifying delirium. Delirium tremens. Delirium with high fever, hallucinations. High fevers with sudden onset, flushed face, dilated pupils, rashes, hallucinations (Bell.). Scarlet like scarlatina, petechiae, vésications, and spots on the arms like flea bites. Burns and scalds. Mania after exposure to the sun (Bell.).

Absence of pain. Epilepsy and convulsions. Extreme muscular mobility. Movements are generally gyratory and graceful when they occur in the arms. Continually jerks head up from pillow, head bent back, boring head into pillow. Twitchings of single muscles, squint. Chorea. Moving fingers as if searching for something. Coxalgia and morbus cox., with severe pain.

Characteristic difficulty swallowing, with intense thirst, delirium and hallucinations. Suppressed secretions, menses, lochia, sweat, or eruptions. Discharges are foul, even cadaverous.

Congestions without actual inflammation, but with high mental exaltation and furious delirium and little or no fever without pain but with some coma. Constriction of the chest, asthmatic symptoms and cough of the whooping cough type. The common practice of smoking stramonium leaves for asthma is roughly homeopathic.

Clarke had a case of severe pleuropneumonia of right side, supervening on scarlatina, in which the patient, a young man, said he saw a large black dog about the room. This led Clarke to give Stram., which rapidly altered the whole case for the better including the pneumonia, and resolved the situation.

Nash reported a case of a woman, 30, with acute mania after being overheated in the sun. She called Nash for 6 days straight to come watch her die. She imagined herself eternally lost and begged everyone to pray for her. Talked day and night. Thought her head was as big as a bushel, her legs as large as a church. Nash cured with Stram. 6c after Glon., Lach., and Nat-c. failed. All symptoms and any traces of mania were gone after 24 hours.

S. A. Jones related the case of a little girl with brain symptoms for whom he had prescribed aremedy. The report was brought late at night that the patient was much worse. "She vomits," said the father, "if she even raises her head from the pillow."

The vomit was green. Jones found this under Stram., which he gave, and the next morning the case was entirely changed for the better. Acting on this analog, Jones also cured a "vomiting of green stuff always induced by bright light."

RELATIONS -Antidotes: Bell., Tab., Nux-v. **Antidoted by:** Lemon juice, Vinegar tobacco injections, Senn, for cerebral symptoms, Bell., Hyos., Nux-v. and **"Particularly Camphor"** (Teste). **Antidote to:** Merc., Plb. **Compare:** (1) Hyos. and Bell. It has less fever than Bell., but more than Hyos. It causes more functional

excitement of the brain, but never approaches the true inflammatory condition of Bell. (1) Metrorrhagia, from retained placenta with characteristic delirium, Sec. (2) Pyrog. with fever and septic tendency. (3) Delirium, Bell., Lach., Agar., Cupr., Zinc. (4) Illusions of shape, Bapt., Petr., Thuj. (5) Erysipelas, Bell., Rhus-t. (6) Stuttering, unable to combine consonants with vowels, Bov. Bright light causes convulsions, Kali-br. (7) Better light, Stront. (8) Hears voices from far off talking to him, behind him, Anae. ***STREPTOCOCCINUM

(Streptococcus Nosode)

PHARMACY - strept. Streptococcinum. Streptococcinum bacteria. Nosodes. Made from streptococcus pyogenes and marcy. **Historical dose:** All potencies.

CLINICAL - Adenitis. **Arthritis.** Bronchitis. Cellulitis. Chorea. **Colds. Debility.** Ear, pain. Epilepsy. Fevers. Fibrositis. Infections. Mastoiditis. Otagia. Otitis media. Psoriasis. Rheumatism. Scarlatina. Sinusitis. **Sore, throats.** Tonsillitis.

HOMEOPATHIC - Strept. should be considered in chronic disease where there is a history of acute streptococcal infection, including severe infection in the mother during pregnancy. Especially when the streptococcal infection immediately precedes chronic illness or when it is an outstanding event in the history of the patient.

Rapid action, especially in its effect on temperature. Anti-febrile action. Chilliness. Oversensitive. Intolerance to the least current of air caused by the moving of a person. Intolerance to noise, light.

Chronic sore throats and streptococcal infections. Severe or repeated tonsillitis or quinsy. **Susceptible to catching colds and sore throats.** Acute sinusitis. Severe influenza, pneumonia, bronchitis, pleurisy.

Debility after streptococcal infections. Septic symptoms in infectious diseases. Puerperal sepsis. Epileptiform attacks. Chorea-like movements. Acute rheumatism. Retarded growth in delicate children.

Erysipelas. Otitis media. Meningitis. Dental caries. Acute parenchymatous nephritis. Peritonitis and cholecystitis. Intestinal toxemia, sometimes with amebic dysentery or other intestinal infection.

Scarlet fever has its own nosode, but Sept. is often effective when Scarl. fails.

MIND - Depressed. Weeping without reason.

Streptococcinum weeps on being given sympathy. Despair of recovery. Oversensitive. Highly strung, emotional, apprehensive. Exaggerated obsequiousness. Tormenting thoughts and anxiety. Obsessions. Thinks that he will become mad. Auditory hallucinations, hears cry for help.

Abdomen - While lying down cannot bear the weight of hand on the abdomen. Pain in the appendix.

Back - Pain of the backbone. Acute pain on the clavicles. Sensation of vibrations in the vertebral column and in the limbs.

Causations - Streptococcal infections. Ailments after tonsillectomy.

Ears - Otitis and mastoiditis. Otagia specially if the person is lying down on the left. Intermittent puffs of wind in the ear. Auditory hallucinations, hears cry for help.

Eyes - Troubles of vision with ocular hypertension. Eye fatigue with the need of wearing glasses. Visual hallucination, sees the room full of flies.

Head - Tenacious migraine with vomiting of bile. Pain of the whole head as if it is going to burst.

Heart - Sensation of weakness of the heart. Pain of the point of the heart. Cramping pain in the precordial region.

Limbs - Muscular pain. Rheumatism of small articulations of the wrist, of the hand, with local redness, sometimes with hydro-arthritis. Paresthesia of lower limbs. Cold feet.

Modalities - Better from movement, in open air. **Worse by consolation.** Worse by humid weather, wet weather. Worse on beginning to move, better from subsequent movement.

Mouth - Feeling of having salty lips. White tongue with the tip red, without papilla in the front and in the back part. Gums painful when chewing.

Nose - Serous nasal discharge, mucopurulent with nasal crusts. Sinusitis with headache.

Skin - Vesicular and pustulous eruptions. Cellulitis. Exanthema. Erysipelatoid patches of the limbs. Fibrinous dermatitis, edema of the face. Scarlatina. Recurrent suppuration. Abortive pus formation.

Loss of hair.

Sleep - Agitated sleep. Dreams of violence, scuffles.

Stomach - Sudden pains in the esophagus after meals. Dull, deep pain in the epigastric region. Nausea with

vertigo and vomiting of bile.

Throat - Persistent pain and redness of the throat. Acute and chronic laryngitis. Red angina. Adenopathy of the neck. Big, infected, purulent tonsils.

Vertigo - Vertigo while rising and while lying down.

COMMENTS - When there has been a number of severe acute illnesses, Dr. Gordon, of Edinburgh, maintained that the best results can be obtained by antidoting the most recent infection first by its appropriate nosode, proceeding backwards and thus "curing in layers."

Another view is that, other things being equal, the first lapse from health is of greatest importance and that this should be antidoted first to undermine the superstructure and then deal with the case according to the remaining symptoms.

Ghose wrote, "I have used Streptococcin with very remarkable results in acute Bacillary dysentery with excessive hemorrhage and high rise of temperature with toxemia. The more the blood the more it is indicated like Mercurius, but there is no tenesmus or urinary complications of Mercurius in Streptococcin.

"In very bad cases of bacillary dysentery, very bad complications will follow and take a very long time to cure if it cannot be checked in the very beginning. In chronic cases of Dysentery where blood with mucopurulent discharge does not respond to indicated remedies or recurs and prolongs unduly. I have seen it to stop the bloody and mucopurulent discharge within a very short time with a dose of Streptococcin 200c."

RELATIONS - Compare: (1) Bell., Pyrog, Rhus-t. (2) Staphycoc., Scarl.

***STRONTIUM BROMATUM

(Strontium Bromide)

PHARMACY - stront-br. Strontium bromatum. Strontium bromide. Trituration. Solution. **Historical dose:** All potencies.

CLINICAL - Cellulitis. Dyspepsia. Gravel. Indigestion. Legs, swollen. Phlebitis. Varicose veins. Urine, offensive. Vomiting.

HOMEOPATHIC - Stront-br. often gives excellent results where a bromide is indicated. Anti-fermentative and neutralizes excessive acidity. Nervous dyspepsia. Vomiting of pregnancy.

COMMENTS - Cooper gave several experiences with Stront-br., including the case of a woman, 40, who had tenderness of her limbs and veins of legs showed up and were inclined to inflame. Chronic cellulitis, left ankle inclined to swell, vertigo, at times darkness comes over sight, appetite not good, bowels regular, menses every three weeks, cannot keep awake in evening.

Great relief came from Stront-br. 3x, but after taking it for ten days, severe ardor urine with constant bedwetting day and night set in, which yielded to Ferr-p. 6x. after failure with other remedies.

Woman, 60, had left leg and left foot swollen, hard and tender, red and pitting. The right also but less in degree. Indigestion with pain after food and sickness after food. For seven or eight years has been rheumatic and has had sciatica off and on. For two years, bowels confined, sleep very restless generally.

Stront-br. 3x was given and in two weeks the legs had gone down very much and she felt altogether better. Urine had become clear, but though ravenous for food had to stop eating and felt more sick and the bowels were more confined. After this, the patient got quite well without further medicine.

Stront-br. 30 gave great relief to a woman broken down by sorrow who could not digest food. Stront-br. 6x produced in a woman, 70, thick and offensive urine, dark-looking with grains of red sand.

REFERENCES - Boericke. Clarke.

***STRONTIUM CARBONICUM

(Strontium Carbonate)

PHARMACY - stront-c. Strontium carbonicum. Strontium carbonate. Strontianite. Trituration. **Historical dose:** All potencies.

CLINICAL - Angina pectoris. **Ankle, sprains.** Anus, burning. Arteriosclerosis. Bedwetting. **Bones, diseases.** Cardialgia. Constipation. Cramp. Diarrhea. Emaciation. Feet, cold. Femur, decay. Headaches. Heart, disorders. Hemorrhoids. Hiccoughs. Hoarseness. Leucorrhea. Menses, disorders. **Neuritis.** Phlebitis. **Photophobia.** Sciatica. **Shock. Sprains.** Sternum, pains. Strokes. Sycotic, eruptions. Varicose, veins. Vision disorders.

HOMEOPATHIC - Strontianite was first discovered in the lead mines of Strontain in Argyllshire, from which it received its name. It occurs in massive, fibrous, stellated, rarely ortho-rhombic, crystals. The metal strontium is dark yellow. Strontium carbonate varies in color from white to yellow and pale green.

Stront-c. was proved by Nenning, Schreter, Seidel, Trincks and Woost. It affects the circulation, causing a

congestive feeling of tension. The heart, kidneys, marrow, ankles and right side are also affected.

Rheumatic pains, chronic sprains and stenosis of esophagus. Pains make patient faint or sick all over. Pain and itching alternate. Pains are fleeting, can hardly tell where they are, seemingly felt in marrow of bones. Pains increase and decrease gradually or make the patient faint and sick all over. Burning, gnawing. Right side most affected.

For the shock after surgical operations. Chronic *sequelae of hemorrhages*, after operations with much oozing of blood and coldness and prostration.

Arteriosclerosis. High blood pressure, with flushed face pulsating arteries, threatened strokes. Edema, especially about the ankles as a concomitant. Numbness. Soreness. Restlessness at night, smothering feeling. Affections of bones, especially femur.

Violent involuntary starts. Immobility of one side. Sense of paralytic weakness.

Formication in limbs. **Neuritis**, worse cold. Coldness in spots, on calves. Pressure in stomach is better by eating and worse after a meal. Emaciation.

MIND - Depression of spirits. Excessive forgetfulness. Inquietude and anguish. Apprehension as from bad conscience. Irritable, suddenly becomes angry, beats anything that comes in his way. Peevishness with tendency to fly into a rage.

Abdomen - Sticking in the abdominal ring. Uncomfortable fullness and swelling of abdomen. Colic in umbilical region.

Back - Pain, as of a fracture in loins and back. Drawing pain in back and lumbar region.

Causations - Hemorrhages, chronic sequelae. Injuries, sprains. Shock. **Surgical shock after blood loss.** Great exhaustion after surgery.

Chest - Pressure at chest in sternum. Constriction, pressive pain, worse walking. Drawing pain in muscles of chest. Angina pectoris.

Constitutions - Suited to bone disorders of scrofulous children when associated with diarrhea.

Ears - Tearing in front of right ear as if in the bone. Sticking in front of left ear in frequent paroxysms. Humming in the ears.

Eyes - Burning and redness of eyes. Pain and lachrymation on using eyes, with dancing and alternation of colors of objects looked at. **Photophobia**, remaining after operation, especially when objects appear covered with blood. Green spots before the eyes in the dark.

Face - Flushed face, worse from exertion. Violent, pulsating flushes in face. Red with burning heat or very pale, every time the patient walks. Red face, burns, itches.

Female - Flushes of heat, worse during menopause. Profuse perspiration at night, menopausal.

Food - Loss of appetite, food tasteless. Craving for bread, beer. Aversion to meat.

Head - Aches into upper jaw with vertigo and nausea. Headaches from nape of neck, spreading upwards, better wrapping head up warmly (Sil.). Distensive pressure on head. Aching eyebrows. Supra-orbital neuralgia, pains increase and decrease slowly (Stann.).

Heart - Heart feels smothered. Heart block. Dull, intermitting pressure in precordial region. Violent beating of arteries and of heart.

Kidneys - Pale urine with strong smell of ammonia. Increased secretion of a yellow, deep-colored urine. Diminished secretion of urine. Nocturnal emission of urine.

Limbs - Rheumatic pain, in joints, in right shoulder. Rheumatism with diarrhea. Sciatica with edema of ankle. Immobility of the limbs of one side only, like paralysis. Gnawing as if in marrow of the bones. Chronic sprained joints. **Ankles sprained or swollen.** Swelling of ankle remaining after a sprain. **Weakness of ankles.** Chronic spasms, especially of ankle joints. Cramps in calves and soles. Icy-cold feet. Veins of hands engorged. Hands numb.

Lungs - Pressure, as of a load on chest. Pain in the left breast, with oppression, worse after meals. Dry cough, excited by irritation in trachea, worse at night. Dyspnea, when walking with heat and redness of face.

Modalities - Aversion to darkness. Better from light, heat, and sun. **Better immersing in hot water.** Better wraps, hot bath, covering, warm stove. Worse change of weather. **Worse cold**, uncovering, drafts. Worse evening, night and early morning. Worse 2 a.m. or 3 a.m., from being quiet. Worse when beginning to move, **walking**, stooping. Worse sprains, bleeding. Worse touch, rubbing, scratching.

Mouth - Feels numb and dry on waking. Bad odor from mouth. Teeth as screwed together.

Nose - Itching, redness and burning of nose. Bloody crusts in nose. Blowing of dark scabs from nose. Quivering on one side of nose. Twitching of left side of nose.

Rectum - Exhausting diarrhea with **constant urging** of yellow water with gripping, worse at night, better towards morning. Periodical diarrhea. Burning in anus lasts a long time after stool (Rat.). Hard, knotty

Strontium carbonicum stools, evacuated slowly with much effort, then burning in anus lasting for a long time.

Sensations - As if head were expanded from within. As if scalp were too tight. As if tendons of neck were drawn up. As if a load on chest. As if all power had left right arm. As if bruised in back and sacrum. Gnawing as if in marrow of bones. Symptoms as if in marrow of bones. Symptoms like phantoms, difficult to locate.

Skin - Sprains of ankle joint with edema.

Moist, itching, burning eruption, better in open air, especially warm sunshine. Violent perspiration at night.

Sleep - Retarded sleep. Jerking in body and starts when sleeping. Frequent waking at night, principally caused by a dry cough. Many fantastic dreams.

Stomach - Pressure in stomach during digestion. Heartburn. Belchings after eating. Violent hiccough causes chest pains, cardialgia. Nausea, with burning heat in face.

Temperature - Flushes of heat in face, with aversion to uncovering. Profuse perspiration at night, menopausal.

Throat - Hoarseness and roughness in throat, which excites a cough.

Vertigo - Vertigo with **headache and nausea.**

COMMENTS - Congested state. Flushing in the face and violent pulsation of the arteries, congestion to heart, lungs and head. Symptoms better by warmth and wrapping up and worse by cold. All complaints are worse walking, particularly headache, leucorrhea, dyspnea and pressure in the sternum.

Headaches are boring, pressive and tensive. Tension from vertex to upper jaw, as if head were expanded from within and as if scalp were too tight, worse in evening, when lying with head low, slowly increasing and decreasing, better from heat. Tension in the nape, as if the tendons were drawn up. Tensive drawing in dorsal and lumbar muscles. External soreness, numbness.

Venous tension in the arms. "The veins of the arms and hands are injected and tense with great prostration and ill-humor." Phlebitis, varicose veins. Angina pectoris.

Predisposition toward strokes and high blood pressure. Surgical shock after blood loss. Great exhaustion after surgery.

Pressure in the stomach, better by eating and worse by walking. Pressure after eating. Diarrhea and constipation. Stools are accompanied and followed by burning in the rectum. Diarrhea is worse at night, urgent, with yellow stools. Emaciation.

Calcification, osteoporosis. Weak and brittle bones that break easily. Bony growths and enlargements. Bone pains, especially the femur, the thighbone. Bone disorders, particularly the femur. Bone disorders in scrofulous children when associated with diarrhea.

Characteristic weak ankles (Nat-c.). Chronic sprains of the ankle with edema. Sciatica associated with weak ankles. Ice cold feet. Leg and foot cramps (Calc.).

C. M. Boger cured a sciatica accompanied by edema of left ankle with Stront-c. after other remedies had failed.

A. P. Bowie cured a case occurring after a tedious labor. The stools were large and hard, expelled with great effort, followed by great pain in anus, burning, lasting a long time and compelling patient to lie down. Anus violently contracted after stool. Complained of coldness in spots on calves of legs. Stront-c. 6c entirely relieved.

RELATIONS - Antidoted by: Camph. **Compare:** (1) Arn., Ruta, Sil., Bar-c., Chin. (2) Stront-br., Stront-n., Stront-i. - Arteriosclerosis.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***STRONTIUM NITRICUM

(Strontium Nitrate)

PHARMACY - stront-n. Strontium nitricum. Strontium nitrate. Solution. **Historical dose:** All potencies.

HOMEOPATHIC - C. M. Boger had a case in a menopausal woman of passive congestion of the kidneys completely relieved by Stront-n. The menses, which were usually exceedingly scanty, became profuse.

Morbid cravings. Eczema behind ears.

Headaches. Kidney congestion. Menses scanty. ,

COMMENTS - Boger recorded the following case of Miss D., 18, brunette, who had dull pains over eyes worse by sunlight, motion, loss of sleep, sewing, reading. Pains were better after stool, with headache, swelling of upper lids, worse in morning. Bad taste in mouth.

Menses irregular, profuse, dark. Felt tired and weak. Addicted to eating cloves. In hot weather, sweats profusely and easily about head and chest, staining yellow. Very susceptible to cold. Cough provoked by oppression of breathing and talking.

Formerly had catarrh, followed by rightsided deafness. She had typhoid fever two years before and during the fever was allowed unlimited quantities of ice. Preceding the fever she had a post auricular eczema suppressed by salves, now is anemic and bloated. Urine contained epithelium, excess of chlorides, calcium oxalate and a trace of albumen (due probably to the clove habit).

Glou. helped the case, but for a time only. Stront-n. was chosen because Stront. irritates the kidneys and Nit-

ac. corresponds to the vasomotor disturbance besides having cravings for odd things.

Stront-n. 6x was given and in a few days the headache vanished. At the end of a month the post-auricular eruption had reappeared. Five months later there had been no return of headache or palpebral edema, the craving for cloves had gone, the patient had taken on good flesh and color. The eruption had not all gone.

REFERENCES - Boericke. Clarke.

***STROPHANTHUS HISPIDUS

(Kombe Seed)

PHARMACY - stroph. *Strophanthus hispidus*. Kombe seed. *Strophanthus gratus*. Inee. Onaye. Onage. Poison of Pahonias. N. O. Apocynaceae. Tincture of the **seeds**. **Historical dose:** Tincture and all potencies.

CLINICAL-Alcoholism. Anasarca. Anemia. Arteriosclerosis. Colitis. Cough. Cystitis. Diplopia. Dropsy, cardiac. Edema. Exophthalmia goiter. Faintness. **Heart, disorders. Hemoptysis. Hives.** Levitation. Nausea, obesity. Pneumonia. Urticaria.

HOMEOPATHIC - *Strophanthus* is an ornamental, evergreen and a climbing shrub, native of tropical Africa and Asia. The mother tincture comes from the seeds of the plant. It is used as an arrow-poison by natives of Africa. Among the alkaloids is strophanthin.

Stroph. occasions no gastric distress, diuretic. It has no cumulative action, safe for corpulent, aged persons with rigid arteries, as it does not affect the vaso-motors. Restores tone to a **weak tissue**, especially of the heart muscle and valves.

Stroph. increases the contractile power of all striped muscles, especially the heart, increasing the systole and diminishing the rapidity. Acts on the heart **increasing the systole and diminishes the rapidity**. Tones the heart and run off dropsical effusions.

Especially useful in failing compensation dependent upon fatty heart. After the long use of stimulants. Arteriosclerosis, rigid arteries of aged. Precordial anxiety. Retrosternal pain. Functional disturbances of heart from alcohol, tobacco, tea.

In small doses for weak heart, that feels enlarged. In mitral regurgitation, where edema and dropsy have supervened (Dig.). Severe prostration from hemorrhage after operations and acute diseases.

Anemia with palpitations and loss of breath. Faintness. Pneumonia. Rapid alternations of symptoms with slow pulse. Undulating sensation in whole body. Throbbings. Stitching pains. Twitchings of the muscles.

Obesity. Increased secretions. Nausea with special disgust for alcohol. **Alcoholism**, with drop doses of *Stroph-h.* tincture. Hives. Exophthalmia goiter.

MIND - Worse from strong emotions. Irritable. Anxiety and fear. Fear of ordeals. Feels lifted up during sleep. Precociously talkative children.

Abdomen - Abdomen distended, painful, especially in the umbilical and inguinal regions. Rumbling and pinching at navel. Shooting pains in right hypochondrium. Stitches in region of sigmoid flexure.

Acute entero-colitis. Colic.

Back - Joint and muscular pains in the limbs, back and lumbar region with stiffness, muscular weakness, coldness at the limbs.

Causations - Alcohol, tea, tobacco.

Chest - Pressive pain in middle of right third rib on anterior half, worse by pressure. Thoracic pain on left side. Constrictive, cramping pain behind the sternum, crushed, gnawing, needle-like sensation.

Eyes - Pupils quivering, dilating and contracting alternately. Eyes brilliant. Glimmering in vision. Impaired sight of left eye with nausea and faintness. Double vision.

Face - Flushed, red spots. Lips scarlet.

Female - Uterine hemorrhage. Uterus heavily congested.

Food - **Craving for alcohol**, tea, coffee, stimulants. Nausea with special disgust for alcohol. Loss of appetite. Loathing of food, followed by choking and vomiting after eating.

Head - Temporal pains with double vision, impaired sight, brilliant eyes, flushed face. Violent, pulsating headache, aggravated by movement.

Heart - Weak heart with aching or anguish. Heart's action weak, rapid, irregular, due to muscular **debility and insufficiency**. Cardiac pain and dyspnea. Chronic, nervous palpitations and arrest of breathing. Violent palpitations, worse by emotion and exercise. Sense of lively action. Mitral regurgitation. Stitches and twitches at apex beat. Pulse, rapid, alternating with slow, weak, small irregular.

Kidneys - Kidneys become hyperemic. Cystitis. Urinary tract infections. No urine passed for hours. Frequent urination. Urine increased secretion or scanty albuminous. Urine strong, odor is fruity or like horse urine, pale.

Limbs - Swollen, dropsical. Anasarca. Swelling of legs. Itching and stitching in both feet. Dorsum of foot painful and tense. Muscular and joint pains with stiffness and coldness of the limbs. The pains are aggravated by

movement. Heaviness and pain in forearms and the fingers.

Liver - Pressure in liver region.

Lungs - Edema of lungs. Bronchial and cardiac asthma. Breathing deep, difficult, thirsty for air, feeling of dryness in the mucus membranes, aggravated by movement. Cough worse by lying down. Expectoration of bright red blood.

Modalities - Better from rest, lying down. Worse from exertion, exercise, standing. Worse tobacco, tea, alcohol. Worse from emotions.

Mouth - Dryness of tongue and fauces.

Rectum - Stool with burning and tenesmus in anus. Diarrhea with burning and tenesmus in anus. Frequent diarrhea with violent colic but good appetite. Infectious or toxic diarrhea.

Skin - Hives, chronic, receding. Urticaria, especially more chronic forms.

Stomach - Bulky feeling in the stomach. Twitching in stomach. Burning in esophagus and stomach with loss of appetite and extreme gastric distress. Cramping, acrid stomachache with belching and nausea. Eructation and hiccup. Nausea with special disgust for alcohol.

Temperature - Coldness of limbs. Temperature raised, skin dry. Profuse sweat.

Throat - Seems dry, constricted. Burning in throat and esophagus to stomach, compelling empty swallowing.

Vertigo - Vertigo with swimming vision. Senile vertigo. Undulations in head.

COMMENTS-The homeopathic proving was conducted by Templeton on five provers, using 2x, 3x, 6c, 12c, 30c and by O' Hanlon on twelve provers, using 6c, 12c and 30c.

Piedvache proved the tincture, but only with reference to the pulse. Gise vius proved Stroph-h. tincture, beginning with 5 drops increasing to 80 drops during the five days of his proving. Matthes proved Stroph-h. tincture in 10 drops doses.

Some well-marked symptoms were produced on two chemists from preparing the tincture. Other effects curative and pathogenetic have been observed on patients taking the drug. Stroph-h. disorders the digestion, causes burning in the esophagus and stomach, nausea, vomiting and diarrhea.

A. P. Skworzow gave an infusion of Stroph. to an alcoholic, 63, for weak heart and intermittent pulse, 7 drop doses three times a day. The first dose caused nausea and a repugnance to alcohol which proved to be permanent. The man entirely discontinued the habit.

On this hint, Stroph. was given to two other alcoholics with the same result of abolishing the taste for alcohol. It caused nausea and profuse sweating and the sudden withdrawal of alcohol was not attended with delirium. A case of Clarke's illustrates the gastric and cardiac action of the remedy. W. G., 16, a delicate-looking boy, was admitted to a hospital. He had rheumatic pains for three months and an attack of rheumatic fever two years previously. He had been laid up a month before admission and a week before was taken with cough, shivering and occasional vomiting.

When admitted, he had a frequent, short, dry cough, worse lying down, had to be propped up in bed, had edema of feet, especially left. Tongue white, unable to retain any food for three days, no pain after food, but much flatulence, belchings giving much relief.

Heart greatly dilated, pulsation diffused, double mitral bruit. Dullness at bases of both lungs, moist rales, halfway up right lung. Expectoration of bright blood for seven days.

Stroph. tincture, one drop every four hours, was given. Improvement in all the symptoms was immediate, sickness, cough, hemoptysis and dropsy all disappeared and the heart sounds had cleared up to a large extent when the boy went home, less than three weeks after admission.

Hamer mentioned that Stroph. cured "functional disturbance of the heart from alcohol tobacco and tea." This agrees with the relation of Stroph. to alcoholism and symptoms of indigestion.

A writer gave his experience with Stroph. : a woman had constant outbursts of urticarial rash dating from exposure to an offensive effluvium from a dead whale cast on the sands. The attacks would recur after drinking a glass of table beer. Stroph-h. cured.

Any accompanying cardiac weakness would be an additional indication. The same writer considered Stroph. of great service in the anemia of young girls when palpitation and breathlessness are marked features.

An accidental proving on a girl of five was made through the mother giving twenty drops of the tincture by mistake. Some half an hour later her face was flushed, lips scarlet, eyes brilliant, temperature raised, skin dry, tongue normal. Pupils quivering, dilating and contracting every few seconds. Pulse 140, arteries distended.

Heart sounds vigorous, slight regurgitant mitral murmur. Intellect clear, precociously loquacious during the five hours the poisonous symptoms lasted. An ipecac emetic was administered. No urine passed for ten hours after the dose.

RELATIONS - Compare: (1) Heart dropsy, Apoc. (2) Heart, Dig. is cumulative, Stroph-h. is not. (3) Crat.,

Phase., Cact. (4) Anemia, Ferr. (5) Alcoholism, Chin., Nux-v., Aven., Querc. (6) Kali-c. - heart weakness, fatigue, chill, acute stinging pains, aggravated by the cold and at 2 a.m. (7) Aeon. - Sharp intolerable pains, much more agitated with fear of death. (8) Lach. - worse left-side, aggravated on waking, hyperesthesia of the skin, tendency to hemorrhage. (9) Sarcoc.- Pains and muscular weakness, extreme asthenia, aggravated by the slightest movement. (10) movement, feeling of fullness in the epigastrium, constipation. **Compatible:** Ferr. in anemia.

REFERENCES - Boericke. Clarke. Phatak.

***STRYCHNIA PHOSPHORICUM

(Strychnine Phosphate)

PHARMACY - stry-p. Strychnia phosphoricum. Strychnine phosphate. Alkaloid obtained from several species of Strychnos. Solution. Trituration. **Historical dose:** All potencies.

CLINICAL - Atelectasis. Heart, disorders. Headache. Paralysis. Pulse, irregular. Spinal cord, disorders. Tachycardia.

HOMEOPATHIC - Stry-p. is useful in chorea, hysteria, acute asthenia after acute fevers. **Hands and axilla covered with clammy perspiration.** Cold and clammy feet. Better rest and in open air, worse from motion. Acts through the cerebro-spinal system upon muscles, causing twitching, stiffness, weakness and loss of power. Anemia of spinal cord, paralysis, burning, aching and weakness of spine, pain extends to front of chest, tenderness on pressure in mid-dorsal region.

Atelectasis and break in the compensation of a hypertrophied heart, the beginning of fatty degeneration of the heart muscle. Tachycardia. Irregular pulse. Rapid and weak pulse.

MIND - Affects upon the mind, producing lack of control, **uncontrollable desire to laugh** and disinclination to use the brain.

COMMENTS - A woman to whom Clarke gave Stry-p. 3x in five-drop doses twenty minutes before meals, felt at once constriction of the throat and after each meal violent headache in forehead over the eyes. The choking sensations were a constant feature in provings and poisonings.

REFERENCES - Boericke. Clarke. Royal.

***STRYCHNINUM

(Strychnine)

PHARMACY - stry. Strychninum. Strychnine. Alkaloid obtained from several species of Nux vomica, Loganiaceae. Trituration. Solution. **Historical dose:** All potencies.

CLINICAL - Amaurosis. Aorta, pain. Aphonia. Asthma. Athetosis. Bedwetting. Bladder, paralysis, pains. Breasts, pains. Coughs. Cramps. Diaphragm, spasms. Emphysema. Exophthalmos. Eye, disorders. Headaches. Hemiplegia. Influenza. Joints, stiffness. Laryngeal, crises. Locomotor, ataxia. Malar, bones, pains. Neurasthenia. Night-blindness. Paraplegia. Proctalgia. Rheumatism. Scrotum, abscess. Spinal irritation. **Tetanus.**

HOMEOPATHIC - Liquor Strychnie is responsible for many of the poisonings, the powdered crystals, either pure or mixed in pills or rat-poison, for others. Strychnia itself is very sparingly soluble in cold water (1 in 5760). A homeopathic proving of Stry. was made by Henry Robinson on two provers, a man and a woman.

The man took 900 drops in twenty-three days, the woman 445 drops in fifty-three days. These have furnished the most distinctive symptoms. Extreme nervous excitability. Visions of an ugly face. Fits of laughing with light. Idiotic-like chuckle. Confusion of ideas, stupor and weariness were some of the mental symptoms. Swimming sensation in the head and giddiness involuntary.

Stimulates the motor centers and the reflex action of the spinal cord. Stimulates the central nervous system, mental activities, special senses rendered more acute. All reflexes are made more active.

Spasmodic rigidity. Spasms of muscles, cramps from an undue reflex excitability of the cord, spasms of the bladder, etc. Stiffness in muscles and face and neck. Athetosis. Tetanus with violent jerking, twitching and trembling.

Tetanic convulsions with opisthotonos. The muscles relax between paroxysms, worse slightest touch, sound, odor. Influences more directly the spinal cord and is less appropriate in visceral derangements than Nux-v.

Explosive nervousness. The **pains and sensations come suddenly** and return at **intervals**. Darting, pinching lancinating, fulgurating, electric pains. Spine is cold. Gushing sweat from head and chest.

Drowsiness, with headache. Frontal headaches, momentary dartings like electric shocks. Respiration increased. Inability to take deep breath, fixation of chest walls. Sudden palpitations.

The direct "tonic" action of Stry. was shown in one of Robinson's provers, who had "unusually good appetite,

she enjoys her food amazingly.”

Stry. is an antidote to chloral, used in asphyxia from gas and chloroform and early stages of opium poisoning.

Abdomen - Sharp pain in abdominal muscles, griping pain in bowels.

Back - **Rigidity of cervical muscles.** Sharp pain in nape and down spine. **Back stiff**, violent jerks in spinal column. **Icy sensation down spine.**

Ears - Hearing very acute, burning, itching and roaring in ears.

Eyes - Hot, painful, protruding, staring. Pupils dilated. Spasmodic contraction of ocular muscles, twitching and trembling of lids. Sparks before eyes.

Face - Pale, anxious, livid. Jaws stiffened, lower jaw spasmodically closed.

Female - Desire for sex increased (Plat.). Any touch on body excites a voluptuous sensation.

Head - **Over irritability.** Restless. Full and bursting headache with heat in eyes. Vertigo with roaring in ears. Jerking of head forwards. Scalp sore. Itching of scalp and nape.

Limbs - **Cramp-like pains.** Rheumatism with stiff joints. Limbs stiff. **Violent jerking, twitching and trembling.** Tetanic convulsions and opisthotonos, spasms provoked by slightest touch and attempt to move. Shocks in the muscles.

Lungs - **Spasm of muscles** about larynx. Sharp, contractive pains in muscles of chest. Excessive dyspnea. Persistent cough, recurring after influenza.

Modalities - Better from lying on back. Worse morning, after meals. Worse touch, noise, motion, exertion, walking.

Rectum - Very obstinate constipation. Feces discharged involuntarily during spasms.

Sensations - Feeling as if head and face were enlarged, after affects of debauches (Nux-v.). As if an iron cap were on head. Paralyzed feeling in left half of head and face. Scalp sore, as if hair had been pulled. As if nerves suddenly pulled out of teeth. As of a lump in throat. As if water dripped off right elbow, at intervals and off right shoulder. As if chopped in half at waist, at night.

Skin - Itching of whole body, especially nose. Icy sensation down the spine.

Stomach - Constant retching. Violent vomiting. Nausea of pregnancy.

Temperature - Cold chills down spine. Perspiration in a stream down head and chest. Lower limbs cold.

Throat - Dry, contracted, feeling of a lump. Swallowing impossible. Burning along and spasms of esophagus. Violent itching in roof of mouth.

COMMENTS - Innumerable poisonings with strychnine are on record, the symptoms being convulsions of a tetanic nature, in the fatal cases ending in asphyxia. The spasms are intermittent and the least touch or movement is sufficient to induce an attack. Lying on the back is the only tolerable position.

“Lying on her back, body rigid, jaws set, arms and hands flexed, the thumbs nearly touching across the chest and the whole muscular system convulsed with shortjerky spasms. Which would continue for about a minute and then remit, the muscles remaining contracted and as hard as wood during the intervals between the paroxysms.”

The convulsions generally take the form of opisthotonos, cries, terror, hippocratic countenance and frothing at the mouth are common occurrences.

Meyhoffer experimented with Stry. on himself and two other persons, one of whom was a woman of lymphatic temperament.

“It always brought on electric shocks, occurring whenever the prover was touched or whenever any one lightly shook the bed on which he or she was lying. This happened to all, only the woman (lymphatic and feeble) needed a stronger dose.” Any touch on any part of the body caused a voluptuous sensation.

Gamper of St. Petersburg experimented with Stry-n. on healthy young hospital assistants and found that it increased the amount of gastric juice secreted, the general acidity and the quantity of free acid in the secretion. It hastened the absorption from the stomach and strengthened mechanical movements. The effects continued some time after the administration was stopped.

Marked action on the rectum and genitourinary organs (Ign. and Nux-v.). The male prover had his left testicle and cord swollen and an abscess of the scrotum developed and discharged.

“Gurgling noise in rectum with electric darts” is a symptom of one prover. Many pains center about the lips and eyes. Pains and chills occur in the occiput and nape and run down whole length of spine. Stiffness is a leading note of Stry. and Cooper gave “rheumatism with stiff joints” as an indication.

Itching of the whole body and “violent itching in roof of mouth.” Jerkings, twitchings and shocks in all parts. Increased activity of the spinal senses. Dread of touch, shrinks from drafts.

Clarke found Cooper’s suggestion that many cases of persistent cough recurring after influenza are met by Stry. to be correct. The influenza cough has in it a strong spasmodic and asthmatic element, whether dry or not, and this seems to give one point of correspondence.

C. W. Lawson related the case of a medical man who took continuously for two years, Stry. hydrochlor., 5 to 10 minims, thrice daily with a little sal volatile. He was at first benefited, but afterwards experienced a desire to take deep inspirations. "He felt that to do so would overcome the inhibitory power over the lung, probably the action of the diaphragm."

One morning after a dose of Stry., he was taking such an inspiration and from that moment experienced the sensations complained of an inability to take a deep breath. Fixation of chest walls compelled him to stoop, weakness on exertion, great confusion of thought and memory, occasional clay-colored feces, usually greater in amount than ordinary.

After six months, the apex beat descended to the 6th interspace and headache and drowsiness became marked. He traveled for six months without benefit. All attempts to act on the heart with drugs increased the headache. Lawson then found the heart dilated, wide sub-costal angle, chest emphysematous, moving en masse.

After a full year of treatment with Hyos. tincture at bedtime, which proved strikingly beneficial, drowsiness ceased entirely and improvement in all other respects followed.

Hale mentioned the following uses of Stry. and its salts as observed by him and others. Stry. 6c. in the tetanic spasms of cerebrospinal meningitis. Amaurosis from atony of retina. Diplopia and night-blindness. Stry-s., and in one case when all other Stry. preparations had failed, Stry-val. cured facial neuralgia and neuralgic headache.

Spasms of esophagus in an hysterical woman. Stry-val. 2x. cured brain exhaustion of women in whom high nervous weakness exists. Stry. 12c or 30c for chorea, when the convulsions do not cease during sleep.

RELATIONS - Compare: (1) Eucal. - neutralizes ill effects of strychnine. (2) Cic., Arn. (tetanus). (3) Stry. ars. - Paresis in the aged, relaxed musculature. Prostration. Psoriasis, chronic diarrhea with paralytic symptoms. Compensatory hypertrophy of heart with beginning fatty degeneration. Stry-ar. - Marked dyspnea when lying down, edema of lower limbs, urine scanty, high specific gravity, heavily loaded with glucose. Diabetes, use the 6x trituration. (4) Stry-f-c. - chlorotic and paralytic conditions, dyspepsia with vomiting of ingesta, 2x and 3x trituration. (5) Stry-n. - 2x and 3x. Said to remove craving for alcohol. Use for two weeks. (6) Stry-s. - Gastric atony. (7) Stry-val. - exhaustion of brain-power, women of high nervous weakness, 2x trituration.

***STRYCHNOS GAULTHERIANA

(Hoang Nan)

PHARMACY - strychn-g. Strychnos gaultheri- ana. Hoang nan. Tropical Bind-weed. N. O. Loganiaceae. Tincture of dried bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Albuminuria. Boils. Cancer. Carbuncles. Colic. Convulsions. Diarrhea. Eczema. Fatigue. Hydrophobia. Leprosy. Paralysis. Prurigo. Pustules. Rabies. Snakebites. Syphilis. Ulcers. Vertigo.

HERBAL - The Strychn-g. plant is indigenous to Tonquin, where it has a great reputation as a remedy for leprosy, hydrophobia, snakebites and diseases of the skin. The red dust of the bark contains the most active properties.

HOMEOPATHIC - The native method of

Strychnos gaultheriana preparing the medicine is by moistening the mixture of the three powders with a little vinegar and forming the paste into pills of about a centimeter in diameter.

When taken by a healthy person these pills cause fatigue, general indisposition, vertigo, tingling of the hands and feet involuntary movements of jaw. When a person is bitten by a poisonous animal, a dose of three or four grams is administered in vinegar.

If none of these symptoms appear it is understood that the medicine is antagonized and the dose is increased until some of the symptoms manifest themselves, when the poison is considered to be destroyed. The use of alcohol is forbidden while a patient is taking this medicine. Vinegar appears to modify its virulence.

In animals poisoned with it, tetanic convulsions always begin in the hind legs and spread all over the body. Brain, liver, kidneys and lungs were found congested post mortem.

Generally improves nutrition, especially in constitutional syphilis. Exhaustion with vertigo, numbness and tingling in hands and feet involuntary action of lower jaw. Tetanic convulsions beginning in legs and spreading over body.

Eczema, prurigo. Pustules and boils. Old ulcers. Leprosy. Snakebites. Tertiary syphilis and paralysis. Glandular disorders. Cancer of glandular structures. Removes fetor and hemorrhage in cancer, revives the healing process.

MIND - Apathy. Lassitude, indisposition to make mental effort.

Abdomen - Colic and diarrhea.

Head - Vertigo, headache.

Kidneys - Albuminuria. Mucus casts.

Skin - Malignant ulcers, pustular eczema, boils, carbuncles, leprosy.

COMMENTS - In 1883 a proving of Strych-g. was made by seven people, producing a few symptoms. According to Hansen, there is prurigo, pustular eczema in parts well supplied with sebaceous glands (face, neck, genitals).

General malnutrition. Glandular cancer. Boils, carbuncles, constitutional syphilis. The dose of which is 5 to 30 drops of the tincture three times a day.

RELATIONS - Compare: Nux-v., Cur., Ang., Bruc., Hyde. Follows well after Ars.

REFERENCES - Boericke. Clarke.

***SUCCINUM ACIDUM

(Succinic Acid)

PHARMACY - succ-ac. Succinum acidum. Succinic acid. Amber oil. A mineralized fossil resin not to be confounded with Ambergris, Ambra. Trituration. Solution of the non-rectified oil prepared by dry distillation of Amber. Solution of Succinic acid. **Historical dose:** All potencies. Drop doses of the oil.

CLINICAL - Asthma. Fears. Globus. Hay fever. Hiccough. Hysteria. Leucocythemia splenica. Spleen disorders.

HOMEOPATHIC - Dr. Morris Weiner tested Succ-ac., which he prepared himself from amber by dry distillation. The fumes of the crude acid, he said, are inflammable and produce asthma, cough, sneezing, weeping, dropping of watery mucus from nostrils, pain in chest and headache.

On this indication, he treated thirty people suffering from hay fever and cured them all, saving them the necessity of making an annual exodus. He gave one or two grains of the 3x trituration of Succ. diluted in twelve teaspoonfuls of water, a teaspoonful every two hours.

Burnett wrote in Diseases of Spleen, that the non-rectified oil is used as an organ remedy in spleen affections, especially when accompanied by nervous and hysterical phenomena. The crude oil is a thick brown liquid having a strong empyreumatic odor. It is a powerful local irritant and has been used with success as such in lumbago, rheumatism and sciatica.

Succ-ac. enters into the composition of "Roche's Embrocation," and "Haarlem Oil," and has a popular reputation as a remedy for whooping cough, the directions being for it to be rubbed into the spine night and morning.

Succ-ac. produces many nervous and hysterical symptoms. Asthma. Fear of trains and closed places. Affections of spleen.

Burnett noted it for hysterical convulsions in women.

MIND - Fear of trains and closed places.

Eyes - Lachrymation.

Head - Headaches.

Lungs - Pains in chest. Asthma. Incipient tuberculosis. Chronic bronchitis. Whooping cough.

Nose - Sneezing, dropping of watery mucus from nostrils.

Stomach - Persistent hiccough. Violent vomiting.

Throat - Globus.

COMMENTS - A tablespoonful dose, said Murrell, has caused persistent vomiting, diarrhea and symptoms of collapse and the patient aborted. He gave the oil, six ounces of acorn-water added half a scruple of the oil. They do not mix chemically, but by shaking each time a dose is taken the required division and potency is attained.

Burnett's keynote was "Painful spleen disorders where there are convulsive attacks such as the hysterical and hypochondriacal often have."

Burnett related in his book a most remarkable case of "chronic enlargement of the spleen with hyperesthesia, head pain, Dyspnea orthopnea, convulsions" in a young woman "towards the end of her teens."

After years of treatment, Burnett concluded from Rademacher's account of Succ-ac. that it might provide the remedy. It was given in five-drop doses three times a day. In forty-eight hours the convulsive attacks ceased and all the phenomena slowly disappeared.

A keynote of Burnett's is "Fear of trains and close places." His dose is five drops of the oil three times a day.

RELATIONS - Compare: (1) Amber gemstone. Succinum purum. (2) Ars-i. - Hay fever. Paroxysmal sneezing, dropping of watery mucus from nostrils, asthma. Inflammation through respiratory tract, causing asthma, chest pains, etc., itching of eyelids and canthi and nose worse drafts. (3) Arund., Wye., Sabad, Sinapis nigra.

REFERENCES - Boericke. Clarke. Phatak.

***SULFANILAMIDE

PHARMACY - sulfa. Sulfanilamide. Para- amino-phenylsulfamide. Allopathic drug. *Historical dose:* All potencies.

CLINICAL - Addison's disease. Anemia. Audio-visual, disorders. Boils. Cataract. Coma. Cyanosis. Delirium. Dermatitis. Goiter. Hypoglycemia. Jaundice. Ménière's disease. Muscular, atrophy. Myxedema. Nephritis. Schizophrenia. Thyroid, deficiency.

HOMEOPATHIC - In medicine, Sulfanilamide is known in one form as Exoseptoplix. It was the active part in the decomposition of prontosil which was used in experiments by Domagk in 1935. The homeopathic proving of sulfanilamide was conducted by Sutherland, who used the 3x, 6x and the 200th potency.

Sulfa, has a slowing down of all physical and mental functions. Halt in development and puberty comes late in the child. Myxedema. Fatigue, general weariness. Indefinable discomfort with giddiness or vertigo, with apathy. Febrile condition with rash, aching, conjunctivitis, which may be accompanied by fever with shivering, pain in the joints increase in leucocytes with granulocytosis. Paresis and muscular atrophy of the feet and hands. Cramping pains in the hypogastric region. Oliguria and kidney colic. Hypoglycemic conditions.

Heart rhythmic anomaly, cyanosis and comatose condition. Cyanosis with violet or livid coloring of the lips, nose, ears, fingertips. Vesicular eruptions. Goiter. Thyroid deficiency and congestion of the thyroid gland.

MIND - Mental backwardness. Clouded mental state. Idea association complaints. Concentration complaints. Difficulty in determining contrasts and shapes. Loss of memory for graphic movements and for sounds and words. Loss of memory with diminution in auditory acuity. Physical and mental apraxia.

Alternating psychological condition. Cyclical moods. At times happy, joyful, then sad and dejected. Indolence, apathy, state of confusion. Attacks of delirium.

Schizophrenia.

Abdomen - Sensation of fullness. Pain in the hypogastric region. Cramping abdominal pains. Congestion of the liver with alternate constipation and diarrhea. Gastric and duodenal ulcer. Jaundice.

Blood - Anemia. Aplastic anemia. Hemolytic anemia. Chronic leukemia. Thrombopenia. Acetone elimination in the urine or excessive nitrogen in the blood. Agranulocytosis syndrome with fever, leucopenia, necrotic angina and light hemorrhaging of the skin and mucus membranes.

Chest - Pain and heat in the chest.

Ears - Pustules and papules on the outer ear. Buzzing in the ears, as if produced by a bell. Bilateral diminution in auditory acuity. Deafness through atrophy of the auditory nerve. Ménière's disease. Boils in the auditory canal.

Eyes - Chemosis of the left eye. Cloudiness of the crystalline lens or capsule. Cataract. Hemorrhaging of the retina. Optic neuritis. Stye on the lower left eyelid. Eruption of yellow pustules on the edge of the eyelids.

Face - Acne of the chin.

Food - Hypoglycemic syndrome with condition of weakness, sweating, hunger pangs and tendency to faint with or without convulsions. Loss of appetite.

Head - Frontal or occipital headache increasing towards evening.

Heart - Rhythmic anomaly, especially in elderly people.

Kidneys - Chronic interstitial nephritis. Kidney colic. Kidney stones. Paresis of the bladder with retention of urine. Slow urination, urinary stream weak. Urine cloudy. Oliguria. Presence of porphyrin in the urine. Hematuria. Uremia.

Limbs - Severe muscular pains. Acute rheumatism. Sciatica. Neuritic, especially sciatic pains. Progressive symmetrical muscular atrophy, beginning in the hands. Paresis or paralysis of the feet with muscular atrophy and absence of the Achilles' reflex. Acrocyanosis with formication and numbing of the limbs of the legs. Pain in the right leg. Pain and weakness in the small muscles of the feet and hands.

Lungs - Dyspnea, difficulty in breathing deeply. Bronchial asthma.

Male - Inhibition of the production of spermatozoa. Sterility.

Modalities - Better from hot compresses, discharges.

Nose - Pustules in the left nasal fold. Sneezing. Boils.

Rectum - Alternate constipation and diarrhea.

Skin - Burns. Acne of the chin. Burning papular and pustular eruptions. Dermatitis. Sycosis of the beard. Chronic eczema. Pityriasis rubra. Erythema. Pigmentation disorders of the skin. Vesicular eruptions on uncovered areas exposed to the sun. Dermatitis from photosensitization. Measles-type, urticarial eruptions. Eruptions ameliorated by hot compresses and by discharges.

Stomach - Nausea, vomiting.

Temperature - Basal metabolism reduced.

Vertigo - Vertigo with nausea, ameliorated in the open air and by leaning forwards.

RELATIONS - Compare: (1) Ars. - Anxiety and agitation, especially between 1 a.m. and 3 a.m. Burning pains. Edema of the lower eyelids. Thirsty for small amounts of iced water. Vomiting and diarrhea with severe prostration. Oppression. Scaly, burning eruptions and itching, worse between 1 a.m. and 3 a.m. (2) Cresol. - Asthenia with euphoria. Loquacious mood, talks non-stop. Paresis of the lower legs with ataxia. Hypertrophy of the muscles in the hands. Hypertension and oliguria. Hardening of the cartilages. Thickening and hardening of the skin. Itching, pigmented erythema of the skin. (3) Cic. - Convulsions, contraction of the muscles of the entire body. Pupils dilated. Pustular eruptions with thick, yellow scabs.

REFERENCES - Julian.

***SULFONALUM

(Sulfonal)

PHARMACY - sulfon. Sulfonalum. Sulfonal. Diethylsulphone dimethyl methane. Coal tar product. Trituration.

Historical dose: All potencies.

CLINICAL - Albuminuria. Chorea. Constipation. Cramps. Cyanosis. Diarrhea. Epilepsy. Headaches. Heart failure. Hematoporphyria. Insomnia. Locomotor ataxia. Nausea. Paralysis, ascending. Ptosis. Reflexes, abolished. Tinnitus. Twitching. Vertigo. Vomiting. **Weakness.**

HOMEOPATHIC - Sulfonal was at first regarded as one of the safest of hypnotics, but many cases of poisoning by medicinal doses have occurred and the schema is made up of reported effects produced on patients.

Sulfon. is a coal tar product which produces ataxic symptoms, staggering gait, anesthesia of legs with absence of knee jerks. Chorea. Cerebellar disease. Vertigo of cerebral origin. The symptoms disappear slowly.

Reflexes abolished. Epilepsy, with overexcitability of the cortical substance. Twitching of muscles, especially of face and flexors, worse by voluntary movement, but always present in sleep. Muscular incoordination. Paralysis of body, better by cold water, and cold douches. Great prostration. Paralysis progressive sometimes with hyperesthesia and abnormal sensation, affecting first legs, then arms.

Profound weakness, faint feeling and despondency. Fainted and vomited. Loss of control of sphincter. Livid, especially the face. Cyanosis. Death by respiratory failure preceded by unconsciousness.

MIND - Mental confusion, incoherence, illusions, apathetic. **Alternation of happy, hopeful states with depression and weakness.** Extreme irritability. Stupidity. Unconscious with dilated and fixed pupils, profuse sweat.

Abdomen - Spleen enlarged, hyperemic. **Back** - Chronic leptomeningitis.

Ears - Tinnitus.

Eyes - Pupils dilated and fixed. **Eyes bloodshot and restless.** Ptosis, heavy look about eyes. Double vision.

Face - Livid.

Head - Headache and tinnitus aurium. Pain on attempting to raise head.

Heart - Heart failure and edema of lungs. Heart's action feeble, occasionally intermittent.

Kidneys - Constant desire to urinate. Retention of urine, had to be drawn off, dark colored. Urine very scanty, albuminous, almost solid when cooled, with casts. Pink color. Urine cherry-color, later like dark port wine. Hematoporphyria, urine oscillated between deep claret and light claret color. Dark brown urine.

Limbs - Restlessness, muscular twitchings. Ataxic movements, **staggering gait**, cold, weak, trembling, legs seem too heavy. Knee-jerks. Plantar reflex deficient. Cramps of legs and single muscles. Stiffness and paralysis of both legs. Anesthesia of legs.

Lungs - Congestion of lungs, stertorous breathing. Sighing dyspnea. Edema of lungs. Signs of bronchopneumonia.

Male - Erythema on prepuce.

Mouth - Breath smells of onions. **Tongue as if paralyzed.**

Rectum - Diarrhea and vomiting. Great constipation.

Skin - Itching, bluish purpura. Discolored patches like purpura on skin. Erythematous measles-like eruption.

Sleep - Insomnia. Fidgety, wakeful, drowsy. Sleepiness and weariness with unsteady gait. Stupor. Heaviness and drowsiness.

Stomach - Constant retching, vomiting and soreness over epigastrium. Vomiting, diarrhea and violent chills. Great disturbance of digestion with scanty urine.

Temperature - Violent chills.

Throat - Aphasia, dysphagia, difficult speech.

Vertigo - Vertigo of cerebral origin, unable to rise from seat.

COMMENTS - Ataxic gait and diminished or abolished reflexes. Locomotor ataxia. Ascending paralysis. Stupor. Headache with noises in ears. Rashes on the skin, purpura, erythematous, etc. Vomiting and diarrhea.

Urine retained or secretion arrested, claretcolored, containing albumen, porphyrin. Weak

Sulfonalum heart, fainting occurs and death takes place by heart failure.

One man observed uniform skin effects every time he took Sulfon., more intense the larger the dose. This occurred from 5 grains: patches of erythema appeared first on inner side of first phalanx of right little finger, next over proximal ends of metacarpal bones of left thumb and index, on posterior surface of left forearm a little below elbow, fourth on prepuce. The symptoms were better by cold douches.

RELATIONS - Compare: (1) Trion. - insomnia associated with physical excitement, vertigo, loss of equilibrium, ataxia, nausea, vomiting. Diarrhea, stertorous breathing, cyanosis, tinnitus, hallucination.

REFERENCES - Boericke. Clarke. Phatak.

***SULPHUR

(Brimstone)

PHARMACY - sulph. Sulphur. Brimstone. Sulphur lotum. Sulphur sublimatum. Sulphur (At. Wt. 31.98). Trituration of Flowers of Sulphur. A saturated solution of Sulphur in absolute alcohol constitutes the tincture. A trituration of amorphous Sulphur has also been used. Sulphur prepared by precipitation from a solution of Calc-s. with hydrochloric acid, are included. **Historical dose;** All potencies.

CLINICAL - Acne. Adenoids. **Alcoholism.** Allergies. Amaurosis. Amenorrhea. Anemia. Anus, prolapsed. Asthma. Atelectasis. Backache. Bedsore. Belching. Biliouness. **Boils.** Brain, congestion. Bright's disease. Bronchitis. Cataract. Catarrh. Chancre. Chest, pains. Chilblains. Chloasma. Colds. Constipation. Corns. Cough. Crusta, serpigiosa. Dental fistula. Diabetes. **Diarrhea. Eczema.** Epilepsy. **Eruptions.** Esophagus, constriction. Eyes, disorders. **Faintness. Feet, burning.** Fever. Freckles. Ganglion. Glands, disorders. Gleet. Globus hystericus. Gonorrhea. Gout. Headache. Head, congestion. **Hemorrhoids.** Herpes. Hydrocele. Hydrocephalus. Hydrothorax. Hypochondriasis. Impotence. Influenza. Intermittents. Irritation. **Itching.** Jaundice. Keloids. Laryngitis. Leucorrhea. Lichen.

Liver, disorders. **Lumbago.** Lungs disorders. Mania. Masturbation. Measles. **Memory, weak.** Meningitis. Menstruation, disorders. Miscarriage. Molluscum. **Nettle rash.** Neuralgia. Nipples, sore. Nosebleed. Ophthalmia. Phimosis. Phlegmasia dolens. Peritonitis. Pleurisy. **Pneumonia.** Pregnancy, disorders. Prostatorrhea. **Psoriasis. Rectal disorders.** Rheumatic fever. Rheumatism. Ringworm. **Scabies.** Sciatica. **Senile, dementia. Skin, disorders.** Sleep, disorders. Smell, illusions. Spinal curvature. Spleen, pain. Stomatitis. Taste, illusions. Tenesmus. Tonsillitis. Toothache. Trachea. Tuberculosis. Ulcers. **Urticaria.** Uterus, prolapsed. Vaccination. Varicocele. Varicose veins. **Vertigo.** Warts. Worms.

HOMEOPATHIC - Sulphur is an elementary substance, occurring in nature as a brittle crystalline solid, burning in the air with a blue flame, being oxidized to Sulphur dioxide (Sulphurous acid).

Sulphur is a product of volcanic eruptions, found free in nature and was used from ancient times to remove skin disorders. The reputation of Sulphur as a remedy is perhaps as old as medicine. "As early as 2,000 years ago," said Hahnemann, "Sulph. had been used as the most powerful specific against the scabies.

"The itch with which the workers in wool are so much affected, causes an intolerably agreeable, tingling, itching, gnawing as of vermin. Some designate it as an intolerably voluptuous titillating itching, ceasing as soon as the parts are scratched and commencing to burn, which burning continues after the scratching.

"Sulph. frequently produces in healthy persons burning-itching pimples and vesicles resembling the itch vesicles and especially itching in the joints and in the night."

The domestic use of Sulph. as a "Spring medicine" is based on its anti-psoric properties. "It is one of the most popular diaphoretics of the day," said Milne, "few old women failing to use it when any eruption is supposed to be struggling through the skin."

The specific power of Sulph. to cure itch can be abused if applied externally as baths and ointments. Instead of being cured, the skin affection can be repelled and a host of secondary disorders will appear in its place.

Sulph. is a major anti-psoric. A great reabsorbent and is frequently needed after acute illnesses which do not entirely clear up. **Complaints that relapse. When carefully selected remedies fail to act, especially in acute diseases.** It is often of great use in beginning the treatment of chronic diseases and in finishing acute ones or when the **reaction is deficient.**

Irregular distribution of circulation, causing **local burning, throbbing or congestion,** flushes of heat, rush of blood to head, chest, heart. Its action is centrifugal from within outward. **Ascending effects.**

Affinity for the skin, where it produces heat and **burning** with itching, made worse by heat of the bed. **Dry, unhealthy hair and skin.** Very red lips and face, flushing easily. **Redness of orifices** or of single parts is another prominent feature due to irregular circulation, **lips,** ears, nose, eyelids, **anus,** vulva.

Weak faint spells, frequently during the day after nursing or night watching with great sleepiness. Empty, sinking feeling, in stomach. Sensation of fullness, roughness or numbness. Inertia and relaxation of fiber,

characteristic feebleness of tone.

Chorea, chronic after suppressed eruptions. Epilepsy with a feeling that mouse is running up arms to back, before the fit. Child jumps, starts and screams fearfully. As if swinging or standing on wavering ground.

Nutrition is affected on account of defective assimilation in spite of voracious appetite, the patient emaciates (especially children). Thin and weak, even with good appetite. Hungry and always tired. Cat-nap sleep.

Glandular swelling indurated and suppurating. Mucus discharges and exhalations are acrid, blood streaked offensive and cause itching. Serous effusions or deposits are absorbed slowly.

General offensive character of discharge and exhalations. Body offensive in spite of washing. Aversion to being washed, always worse after the bath. Aversion to water.

Child looks dried, a little old man, big head, big belly with emaciated limbs. Dirty, filthy people, prone to skin disorders. Patient is unable to walk erect, **stoop shouldered, unwashed, tall and lean, untidy**. Coal miner's disorders. Ragged philosopher.

MIND - Absent-minded. Dullness of mind. Brain fatigue. Difficult thinking. Very forgetful. Weak memory, especially for names. Misplaces things, words, cannot find proper words when talking or writing. Scatter-brained, burntout brains (Sil., Ph-ac., Med., Cann.). Repeats everything said to him on account of difficult comprehension.

Awkwardness at his work. Aversion to do mental or physical work. **Bored easily.** Lazy, cannot arouse himself. Lazy, hungry and always tired. Averse to business, or busy all the time. Workaholics, ambitious, aggressive (Nux-v.).

Often irritable, depressed. Irritated greatly by least advice. Dislikes having anyone near him. Quarrelsome and impatient nothing pleases. Impatience about trifles. Censorious, critical. Despises literary people and education. Anger over his mistakes. **Alcoholism.**

Melancholy. Sadness from injuries of head. Sadness during labor. Tired of life. Strong impulsive tendency to suicide by drowning or leaping from a window. Imagines giving wrong things to people, causing their death.

Worried by trifles. Anxiety about others, imagination leads them to worry. Anxiety from pressure on chest.

Anxiety about friends at home. Fear of failure, or poverty, of starving. Fear of ghosts at night, of robbers. Childish peevishness in adults. Moaning and complaining day and night, with wringing of hands.

Anxiety with an overactive mind, preventing sleep. Restlessness at night. **Persistent thoughts, expressions** and words heard recur to his mind. Absorbed in thoughts in evening. Obsessive, curious. Intellectuals.

Haughty. Egotistical and obstinate. **Very selfish**, no regard for others. Indifference to the welfare of others. Megalomania. Delusions of grandeur. Foolish happiness and pride. **Imagines himself a great person.** Fear of not being recognized. Insecurity, poor self-confidence. **Indifference to personal appearance.**

Monomania. Strong tendency to **philosophical or religious reveries** with fixed ideas. Makes many plans and theories. **Philosophical mania**, wants to know who made this or that and how. Racks his brain about metaphysical subtleties. **Ragged philosophers.** Religious melancholy. Religious aversion to opposite sex. Indisposition to play in children. Religious affections in children.

Laughing over serious matters. Thinks himself in possession of beautiful things, everything looks pretty. Senility. **Senile dementia.**

Abdomen - Sore, very sensitive to pressure, internal feeling of rawness and soreness. Abdomen heavy, as of a lump. Movements as of something alive (Croc., Thuj.), as of the fist of a child. Stitches in region of spleen, worse coughing or deep inspiration. Intestines feel as if strung in knots, worse bending forward. Bearing down against rectum. Colic after eating or drinking, obliging one to bend double, worse sweet things. Colic after drinking. Colicky babies. Big belly, emaciated limbs in children. Eczema about navel.

Back - Curvature of spine. Drawing pain between shoulders. Neck stiff. Muscles of neck weak, child cannot hold head. Boils on neck. Sensation as if the vertebrae glide over each other or crack on bending backwards. Aching between scapulae. Lumbar pains to stomach, walks bent from pain in the back, can only straighten up after moving. Supports weight on hands when sitting. Coccyx pains during stools. Aching in small of back, worse when urinating.

Breasts - Sharp burning in breasts. Nipples, cracked, around the base, smart, burn, bleed after nursing, pain extends to back. Cancer of breast or uterus. Breast and uterus develops imperfectly.

Causations - Suppressions. Alcohol. Sun. Chills. Sprains, over-exertion, reaching high. Falls, blows. Bedsores.

Chest - Burning sensation in chest. **Oppression, as of a load on chest.** Shooting pains in chest extending to back worse coughing, lying on back and deep breathing. Pain backward from left nipple. As of a band or load on chest. Red, brown spots all over chest. Heat, throughout chest. Sensation of burning or coldness in chest, extending to face. Feeling of weakness in chest, while talking.

Constitutions - Suited to lean, stoopshouldered persons, who walk and sit stooped, standing is the most uncomfortable position. Persons of psoric temperament, nervous, quick-motoned, quick-tempered, plethoric, skin excessively sensitive to atmospheric changes. Dirty, filthy people with greasy skin and long, straight, matted hair, prone to skin disorders. Children who cannot bear to be washed or bathed, emaciated, big-bellied, restless, hot, kick off clothes at night, have worms. Persons of scrofulous diathesis, subject to congestions, especially of portal system. Lymphatic temperaments, nervous constitutions disposed to hemorrhoids with constipation or morning diarrhea, diseases caused especially by suppressed eruptions. Emaciated children, old-looking faces, big bellies, dry, flabby skin. Full-blooded persons with great irritability, restlessness and hastiness. Old people. People with hot, sweaty hands. **"Ragged philosophers,"** dirty-looking persons who are always speculating on religious or philosophical subjects.

Ears - Purulent, offensive otorrhea, catarrhal discharge even on the eighth day. Bad effects from the suppression of an otorrhea. Very red ears in children. Sensation as if sounds do not come through the ear but through forehead. Whizzing in ears. Swashing as of water. Deafness preceded by exceedingly sensitive hearing, catarrhal deafness.

Eyes - Painful inflammation of eye from presence of foreign body. Cutting as from sand. Heat and **burning in eyes** (Ars., Bell.). Bursting pain in eyeballs. Trembling of eyes, quivering of eyelids. Chronic ophthalmia with much burning and itching. First stage of ulceration of cornea. Photophobia. Parenchymatous keratitis. Keratitis, cornea like ground glass. Retinitis caused by overuse of eyes. Oily tears. **Burning** ulceration of margin of lids. Agglutination of lids. Styes and tarsal tumors. Eczema of lids. Trachoma. Opacities of vitreous. Obscuration of vision like black gauze or motes before eyes. Halo around lamplight. Objects seem more distant than they are.

Face - Pale, sickly and **old looking**. Circumscribed redness of cheeks. Lips, bright red, swollen (upper), dry, rough, cracked, burning, twitching or trembling. Freckled, spotted. Acne. Mumps. Swollen veins on forehead.

Female - Amenorrhea. Suppression of menses from excitement. Menses preceded by headache. Menses too late, short, scanty and difficult, thick, black, **acid, making parts sore**. Leucorrhea of yellow mucous, burning, excoriating. Weak feeling in genitals. Offensive genitals with offensive sweat on thighs. Pudenda **itches**. **Vagina and vulva burn**, itch and sore, worse sitting is scarcely able to keep still. Sore feeling in vagina during sex. Bearing down in pelvis towards genitals, worse standing. Puerperal sepsis with high fever, profuse sweat of whole body, tenderness of abdomen and drowsiness. Prolapse of uterus from reaching high. Cancer of uterus. Uterus develops imperfectly.

Food - Complete loss of appetite or ravenous appetite. Feels hungry, but when comes to the table, he loathes the food, turns away from it. Eats anything and everything. Headache or feels tired if he does not eat often. Food tastes too salty. Aversion to meat. Desire for sweets (Arg-n.), for raw food. Sweets, **milk disagrees**. Water fills the patient up. Drinks much, eats little.

Head - Hot head with cold feet. Constant **heat on top of head** (Cupr., Graph.). Hot, throbbing, heavy, sore vertex. Heaviness and fullness, pressure in temples. As of a band about or pain deep in brain. Beating headache, worse stooping and with vertigo. Sick headaches recurring periodically, on every Sunday, preceded by photopsia. Head bent forward when walking. Fontanelles remain open too long. Hydrocephalus with convulsions, red face and pupils dilated. Tinea capitis, dry form. **Itching, scratching causes burning**. **Scalp dry**. Sweaty scalp. Hair, dry, cold, hard, falling off, worse washing.

Heart - Heart feels too large. Pericarditis with effusion. Sharp pains go through chest to between shoulders. Palpitations, worse lying at night in bed, going up an ascent. **Pulse more rapid in morning** than in evening.

Kidneys - Painful, ineffectual efforts to urinate, retention. Itching, burning in urethra during urination, lasting long after. **Parts sore over which it passes**. Thin stream, intermits. **Great quantities of colorless urine**, greasy particles, mucus and pus in it. Sudden call to urinate, must hurry. Urination involuntary while passing flatus or on coughing. Frequent urination, especially at night. **Bedwetting**, especially in scrofulous, untidy children. Every cold settles in the bladder.

Limbs - Heaviness, paretic feeling in limbs. Jerks one limb on dropping to sleep. Rheumatic gout with itching. Swelling of the joints with hydro-arthritis. Joints stiff, especially knees and ankles. Tense hamstring (left). Cramp in calf (left). **Soles, burn, wants them uncovered**, at night, cold in bed, dry. Poplitea tight on stooping. Tuberculosis of the knee and hip joints. Unsteady gait. Ganglion. Cannot walk erect, **stoop-shouldered**. Heavy shoulders. Rheumatic pain in left shoulder. Left arm numb, worse lying. Numb fingers. Tremulous sensation in hands, when writing. Palms, dry, burn, crack, peel, eczema on, warts on. Ulcers around the nails. Whitlow with rapid swelling of the finger, redness, stiffness and excessive burning stitching. Involuntary contraction of hands as if about to grasp something.

Hot, sweaty hands. Sweat in armpits, smelling like garlic.

Liver - Pain and soreness of liver. Stitches in region of liver. Gallbladder colic and chronic jaundice. Relapsing jaundice.

Lungs - *Difficult respiration, wants windows open*, nightly suffocative air hunger. *Dyspnea* in middle of night, relieved by sitting up. Irregular breathing. Asthma preceded by colds. Loose cough, worse from talking, morning, greenish, purulent, sweetish expectoration. *Much rattling of mucus* and heat in chest, worse 11 a.m. *Pleuritic exudations*. Cough, violent in two or three incomplete bouts, tickling as from down in larynx. Greenish, sweetish and purulent expectoration. Violent cough with headache worse lying on back. As of rivet through upper third of left lung. Neglected pneumonia.

Male - Hydrocele. Testes hang low. Induration of testes. Discharge of prostatic fluid after urination and stool. Stitches in penis. Penis cold. Prepuce stiff, hard like leather with copious smegma, causes itches. Fetid sweat on genitals. Itching of genitals when going to bed. Organs cold, relaxed and powerless. Involuntary elissions. Seminal emission on touching a woman. Seminal emission with burning in urethra. Semen, odorless, watery. Sexual power weak, impotence. Exhaustion in the morning after seminal emission. Backache and weakness of the limbs after sex, with sadness and irritability.

Modalities - *Better dry, warm weather*, dry heat. Better open air, motion. Better sweating, walking. Better lying on right side, drawing up affected limbs. *Standing* is the most uncomfortable position. Worse at rest, stooping, reaching high. Worse talking, looking down. Worse crossing . running water, washing, bathing. Worse in morning, 11 a.m., at night. Worse full moon, atmospheric changes. Worse from alcoholic stimulants. Worse periodically. *Worse from suppressions, milk*, sweets. *Worse warmth, over-exertion in bed*. Worse woolens. Worse vaccinations. Worse suppressed hemorrhoids. Worse menopause.

Mouth - Bitter taste in morning. Sour, sweetish, foul taste. Food tastes like straw or too salty. Profuse saliva, with nauseous taste. Nursing sore mouth. Aphthae, thrush. Tongue white with red tip and borders. Dry, tremulous tongue. Sensitive, tender teeth. Jerking, shooting, throbbing pains in teeth. Grinding of the teeth. Gums bleeding. Swelling of gums, throbbing pain. Lips dry, *bright red*, burning.

Nose-Pale, red and scabby. Fluent burning coryza, worse outdoors, stopped indoors. Frequent sneezing. Obstructed on alternate sides. *Chronic dry catarrh, dry scabs and readily bleeding*. Nosebleeds, worse at night, on lying on right side. Polyps and adenoids. Herpes across the nose. Freckles and black pores on nose. Tip of nose or alae nasi red, swollen, worse cold. Sensitive to smell. Imaginary odors.

Rectum - *Redness around the anus* with itching. Pain, urging and burning in rectum. Involuntary stools on sneezing or laughing with emission of flatus. *Morning diarrhea, drives out of bed* with prolapsed rectum. *Painless diarrhea*, changing, mushy, foul, painless, watery, grayish, frothy worse milk. Stools flat and thin. Diarrhea of infants with profuse sweating, drowsiness, suppression of urine and the child wakes up screaming. Children afraid, hold stools back on account of pain. Diarrhea alternating with constipation. Habitual constipation. Frequent, unsuccessful desire, hard, knotty, insufficient. Odor of stool follows him as if he had soiled himself. Hemorrhoids, oozing and belching. External and internal hemorrhoids, great bunches that are sore, tender, raw, burn, bleed and smart. Hemorrhoids during pregnancy.

Sensations - As if a band were tied tightly around forehead or cranium. Vertigo as if swinging. As if one stood on wavering ground. As if hair on vertex stood on end. As if hernia would form. As if lungs came in contact with back. Heart as if enlarged. Like a weight on shoulder. As if something heavy hanging on upper arm. Arms as if beaten. As of a mouse running up arms and back. Thigh as if broken. As if too short in popliteal space. As if bed were not large enough to hold him.

Skin - Skin as if denuded and sore. *Unhealthy skin, breaks out*, dry, scaly. Skin festers and would not heal, *every little injury suppurates*. Excoriation, especially in folds (Lyc.). Voluptuous, violent *itching*, worse at night, heat of bed, scratching and washing. *Burning when scratched*, painfully sensitive to air, wind, washing. *Itching, especially from warmth* in evening, often recurs in spring, in damp weather. Pimply eruption, pustules, cracks, hangnails. Freckles. Crops of boils. *Scabies*. Cracks. Eczema. Ulcers. Creeping erysipelas. Suppuration with air bubbles. Varicose veins, ulcerate, rupture and bleed. Eruptions, can alternate with other complaints, asthma etc. Skin disorders after local medication. Feeling of a band around bones.

Sleep - Drowsy, then migraine. Sleeps in *catnaps*, slightest noise awakens. Drowsy by day, wakeful at night. Heavy, unrefreshing. Talks, jerks and twitches during sleep. Awakes with starts or screams. Sings during sleep or wakes up singing. Vivid dreams, remain impressed on the memory. Wakes frequently and becomes wide awake suddenly. Cannot sleep between 2 and 5 a.m.

Stomach - Burning, painful, weight-like pressure. Heaviness in stomach. *Very weak and faint about 11 a.m.*, must have something to eat. *Great acidity*, sour eructation. Belchings on pressing on stomach. Putrid belchings tasting like bad eggs, worse eating or at night. Milk causes sourtaste and sour belchings. Vomiting of undigested food or sour vomiting. Nausea during pregnancy.

Temperature - Dry skin and great thirst. Chill spreading up back. Flushes of heat. Feels too hot. *Frequent flashes of heat, violent ebullitions of heat throughout entire body*. Heat with general throbbing, between scapulae. Sweat on single parts in axilla, hands and feet. Profuse sweat at night with sulphur odor. Night

sweat, on nape and occiput. Sweat without relief. Sweat may occur on one side of the body only or on neck only. Remittent fever. Septic, puerperal fever.

Throat - Burning, redness and dryness. External redness. Sensation, as of a lump, hair or splinter or as of a vapor rising in. Ball seems to rise and close the pharynx. As if swollen. Dry, exciting cough. Deep, hoarse voice. Aphonia.

Vertigo - Vertigo in forehead, worse when crossing a river, stooping with headache.

COMMENTS - Sulph. is used in various countries for allaying pain in a variety of forms. A piece of stick Sulph. carried in the pocket is commonly used in England to ward off rheumatism. Natives of South America apply Sulph. in solid form to painful parts and allow it to act for an hour before result is effected. For lumbago and chronic rheumatic pains a bag filled with Flowers of Sulphur, heated and applied to the part, immediately relieves the pain.

An experienced sea captain testified to the extreme frequency of rheumatism among his sailors, but, he added, when carrying cargoes of Sulph., he had never had a case of acute rheumatism on board.

Dr. Laugardiere of Toulouse, reported to the Academy of Medicine that he had discovered a cure for croup: a tablespoonful of Flowers of Sulphur dissolved in a tumbler of water. After three days of this treatment his patients were rescued from imminent death and fully recovered. Many practitioners spoke highly of a local application of Sulph. to the fauces in the treatment of croup and diphtheria.

Nettle rash is often relieved by a little Flowers of Sulphur, water and Sulph. mixed with sea sand and rubbed over itch vesicles destroys the acarus at once. In the early days of vaccination it was found that the action of Sulph. was adverse to the receptivity of vaccine. According to Dr. Tierney, Dr. Jenner failed in vaccinating thirty soldiers, all under treatment by Sulph.

Cooper noted that operatives in sulphur mines enjoy an immunity against ague when prevalent in surrounding districts, and that, before going on hunting expeditions in malarious districts, men in Ethiopia sub-

Sulphur mit themselves to fumigations with Sulph. and find it an efficient prevention of ague. Cooper thought there was a great probability of Sulph. having a power of destroying the organisms in the blood of ague patients.

Hahnemann found in Sulph. the homeopathic counterpart of the peculiar constitutional weakness which tends to manifest in itch-like eruptions and which he named Psora. Sulph. is the chief of the anti-psoric remedies. It is this property of Sulph. to divert to the surface constitutional irritants which renders it the chief of Hahnemann's anti-psorics.

Sulph. has also an anti-psoric action independently of its power of "bringing out" rashes. The psoric poison may be present and active in a case of disease and "apparently well-indicated remedies may fail to act" in consequence.

In such cases, one or two doses of Sulph. will frequently antidote the psora and either clear up the case or open the way for the action of other remedies. In such cases there will almost certainly be some Sulph. indications present.

Sulph. is a potent antiseptic and is one of the most certain destroyers of scabies. The exact relation of acarus itch to psora and other itching eruptions need not be considered, but as Sulph. has the power of repressing constitutional eruptions when locally applied, as well as the power of destroying the acarus, it is best to use other means (e.g., oil of lavender) for the latter purpose and give Sulph. or other indicated remedies internally. The symptoms of latent psora are detailed in Hahnemann's Chronic Diseases. They are, for the most part, almost exact reproductions of the symptoms of Sulph. But while Sulph. is the chief of anti-psorics, it is only one of many and Sulph. is in no way limited in its uses to cases of latent or declared psora.

When well-selected remedies fail to act or act too short a time because of the patient's feeble reactive powers, Sulph. will often build up the vital powers of the patient to effect the cure. It will clear the way by removing the psoric miasm to permit other similar remedies on their indications to cure the patient.

Useful for complaints that are always relapsing (menses, leucorrhea, etc.), patient seems to get almost well when the disease returns again and again.

Irregular distribution of the circulation, flushes of heat, rush of blood to the head, chest, and heart. Plethora from suddenly suppressed eruptions, hemorrhoids, discharges. Heat and burning sensation of all parts or coldness, and sweating of many parts.

Hot flushes during the day with weak, faint spells, passing off with a little moisture. Sensation of burning on vertex, of vesicles in mouth, and dryness of throat. Smarting in eyes, cutting, stabbing pain in right eye. Congestions to single parts, eye, nose, chest, abdomen, ovaries, arms, legs or any organ of the body, marking the onset of tumors or malignant growths, at menopause.

First right, then left in stomach, in rectum, in anus and itching. Heat in chest rising to face and skin, with hot flushes in spots below scapulae. Burning soles, must find a cool place for them at night. Hot head with cold

feet. Lutze found that Sulph. 1,000c will make feet that have been cold for years comfortably warm.

Irregularities may go on to actual inflammation with effusions and to fever of intermittent or other types. Will cause absorption of effusions from pleuritis, hydrocephalus or synovial.

Periodical headaches, headaches occurring every week, every month. Sick headaches. Headaches are accompanied by red face and hot head, are better in warm room, at rest, worse in open air, worse from stooping. Headache on coughing. Clarke cured a severe occipital headache worse on coughing with Sulph. 30c.

Stopped catarrh, nose obstructed indoors, better outdoors. Nasal catarrh where the nose is stopped indoors and free out of doors. White, frothy expectoration. Asthma. Alternation between skin irritation and asthma.

Tuberculosis with marasmus, with hunger at 11 a.m., sore, red orifices, flushes of heat. Tuberculosis of the lungs when the "body feels too hot." Must have windows open.

Rheumatism and sciatica, better morning and worse at night in bed. Rheumatism, begins below and spreads upwards.

Unhealthy skin, tendencies to eczema, psoriasis. Burning and heat. Voluptuous itching, worse scratching, scratching causes burning, worse from heat of bed, soreness infolds. Red blotches. Sores that don't heal well. Boils, coming in crops in various parts or a single boil is succeeded by another as soon as the first is healed. Offensive odor of body despite frequent washing. Aversion to bathing. Aggravated by water (Petrol.), with itching and burning. Poor hygiene or poverty (Psor.). Unkempt appearance. Allergic to wool. Skin disorders that have been treated by medicated soaps or creams, hemorrhoids that have been treated by ointments.

Redness of orifices and parts near orifices. Red ears, eyelids and borders around eyelids. Brilliant red lips, bright red anus in children, red meatus of urethra, red vulva. Red nose, worse by cold, the colder the redder. Orifices are red, congested, sore and hypersensitive. The passage of all discharges or excretions is painful.

Feeling of emptiness. "Faint, sinking, allgone sensation at 11 a.m." Empty sensation in head, heart, stomach, abdomen. "Must have something between breakfast and dinner-time." Low blood sugar. Ravenous hunger. Defective assimilation, hungry yet emaciated. Poor breakfast eaters.

Poor dietary habits. Toxicity. Ulcers and burning in the stomach. Dyspepsia from suppressed eruptions, from farinaceous food. After eating, dyspeptic patients feel puffed up, heavy, sluggish, and low-spirited.

Cannot take milk, vomits it at once. Sour vomit with undigested food. Crave sweets, fats, spicy foods, wine, beer and marijuana. Alcoholism (Nux-v.). They crave beer, and marijuana. Aversion to eggs.

Dyspepsia of alcoholics. Craving for alcohol. Chronic alcoholism, dropsy and other ailments in alcoholics, they reform but are continually relapsing. Gallavardin cured many apparently hopeless alcoholics with Sulph. 1,000c.

Scalding urine like fire. Portal congestion. Constipation with ineffectual urging, constipation alternating with diarrhea. Stools are hard, dry, knotty, as if burnt, large, painful.

Child is afraid to have stool on account of pain, or pain compels child to desist on first effort, alternating with diarrhea. Diarrhea, after midnight, painless, driving out of bed early in morning, as if bowels were too weak to contain their contents. Hemorrhoids with burning and itching.

Drowsy in afternoon, after sunset, wakeful the whole night. Chronic insomnia from an overactive mind. Nightly suffocative attacks, wants doors and windows open. Becomes suddenly wide awake at night. Happy dreams, wakes up singing. Cramp in calves and soles at night. Will stick their feet out from the covers to cool down the body at night in bed.

"Worse by heat," by warmth of the bed, humidity. Worse at night, 11 a.m. Aversion to being washed, always worse after a bath. Not well since vaccinations, especially skin problems. Ailments from the abuse of metals. Taken altogether there are more symptoms on the left side than the right. It acts strongly on the left side of the chest. "Sharp stitching pains through left lung to back, worse lying on back, worse by least motion."

The child looks dried up, a little old man, skin hanging in folds, yellowish, wrinkled, flabby. Head large in proportion to body. Lymphatic glands enlarged.

Clarke frequently cured ganglion of the wrist with Sulph. given on general indications. Sulph. 30c rescued a patient from a condition that seemed desperate in a case of left pleuro-pneumonia following a violent hemoptysis.

Lippe cured a case of menorrhagia with "a single dose of Sulph. at new moon," the patient had not been well since her last miscarriage.

Skinner gave a single dose of Sulph. 100,000c with instructions to take it on a certain date (when the moon was full) to a man who had paresis of the lower limbs.

The man recovered suddenly.

Cooper used it to keep his regiment of sepoys in India healthy when many others were in the hospital with fever.

One writer treated nine cases with the pilules and arrested the fever in twenty-four hours. One of the cases was a particularly obstinate one and had been pronounced by the doctors to be complicated with liver affection. Quinine had been tried before to Sulph. cured.

Cooper, in a case of "Charges fever" of West Indies, which had lasted three months, ordered a Sulphur bath as well as the Sulph. pilules. That single bath seemed to alter the whole condition and the patient, an unhealthy, anemic, bilious-looking man, rapidly became the picture of health.

RELATIONS-Antidoted by: Aeon., Camph., Cham., Chin., Merc., Puls., Rhus, Sep., Thuj. **Antidote to:** Aeon., Aloe., Chi., Iod., Merc., Nit-ac., Olean., Rhus, Sep., Thu., ailments from abuse of metals generally. **Compare:** (1) Aeon., Ars. - Sulph. often follows in acute diseases. (2) Merc. and Calc., Lyc., Sep., Sars., Puls. (3) Tann-ac. - nasal hemorrhage, elongated uvula, gargle, constipation. (4) Pyrar. - a fish caught in the Amazon, clinically used for various skin affections, leprosy, tuberculosis, syphilis, varicosities, etc. (5) Meningitis, Apis. (6) Early-morning diarrhea, Bry. (as soon as he moves), Nat-s. (with much flatus), Podo, (stools changeable, go on all day, though worse at noon, Sul. raw, sore anus), (7) Defective reaction, Psor., Op., Care. ***SULPHUR HYDROGENISATUM

(Sulfuretted Hydrogen)

PHARMACY - sul-h. Sulphur hydrogenisatum. Sulfuretted hydrogen. Solution of the gas. **Historical dose:** All potencies.

CLINICAL - Asphyxia. Asthma. **Blood, poisoning.** Convulsions. Delirium. Fever. Headache. Mania. Prostration. Tetanus. Typhoid fever.

HOMEOPATHIC - Sul-h. is a colorless inflammable gas, having a sweetish taste and an exceedingly fetid smell resembling rotten eggs. It is extremely poisonous when inhaled. It is evolved when animal or vegetable tissues containing sulphur decay. It also occurs in mineral springs, being liberated by the reduction of gypsum or other sulphates through the action of a microbe.

Sulph-h. is one of the remedies which help "**blood poisoning**" especially when bad smells are encountered. Asphyxia, tetanus, delirium, low continued fever have been observed as resulting from the gas.

COMMENTS - J. Wigglesworth recorded two cases of insanity, one certainly and both probably, due to inhaling the gas. The first concerned R. H., 32, an engine man at chemical works, who had been kept at home with an attack of bronchitis for ten days. A few days after his return to work he became "gassed" (i.e., accidentally inhaled Sul-h.).

This caused headache, stupor, prostration, compelling him to stay at home for a few days, when he became wildly delirious. He passed into a very excited state, shouting and gesticulating, said he was Jesus Christ.

He tried to bury his head in the floor and to raise his feet above his head. Three days later he was admitted to Rainhill Asylum and there was still very violent and excited, gesticulating and talking incoherently, chiefly on religious subjects. At the end of a month there was some improvement and he was discharged, he recovered five months after admission.

In the other case, that of a laborer at chemical works, Wigglesworth is not quite certain that Sul-h. was the poison inhaled. This patient was greatly excited, threw his arms about, shouted and laughed by turns, was excited and talkative. He remained permanently insane.

REFERENCES - Clarke.

***SULPHUR IODATUM

(Sulphur Iodide)

PHARMACY - sul-i. Sulphur iodatum. Sulphur iodide. Trituration. **Historical dose:** All potencies, third trituration.

CLINICAL - **Acne.** Allergies. Asthma. **Barber's itch.** Coryza. Ears, noises. Eczema, weeping. Gonorrhea. Hay fever. Influenza. Kidneys, pain. Lichen planus. Lips, eruption. Parotid glands, hypertrophy, prostate disorders. Scalp, soreness. Spine, weakness. Stricture, urethral. Tongue, thickening. Tonsils, chronic hypertrophy.

HOMEOPATHIC - Sul-i. was proved by Kelsall on himself and some others. Hale used it in "obstinate skin diseases, notably barber's itch, for which it is almost a specific." The provings indicate this in "pustular eruption on upper lip" and "erythema on chin."

Hale also noted it for large and painful suppurating acne. Weeping eczema. He used the 3x trituration, internally and applied a cerate of one or two grains of Sul-i. to an ounce of Cosmoline.

Useful for psoric, allergic constitutions. Obstinate skin affections. Suppuration. Acrid discharges. Painless enlargement of glands and infiltration of tissues with thickening and induration after inflammation.

Weakness, as from the influenza. Prostration, sensitive to everything. Faint and sick. Raw burning heat internally with external coldness. Single parts, fingers etc. turn white and insensible.

MIND - Doubtful. Dread of exertion. Incapacity for business. Feverish excitement. Hurried, impatient, sad. Restlessness at night. Starting, frightened on waking.

Abdomen - Mesenteric disease.

Eyes - Zigzag before vision.

Face - Acne. Suppurating pimples. Parotid hypertrophy after mumps.

Female - Irregular menses. Copious thick, burning, leucorrhea worse before and after menses.

Food - Anorexia. Appetite increased in marasmus of children. Desire for acids.

Head - Headache better sundown. Hair seems erect.

Kidneys - Urine, scanty, purulent, with brown sand. Urine smells like raspberries. Stricture after gonorrhea, painful urination, stream twisted. Burning at the end of penis, dull pain in prostate.

Limbs - Aching soreness below knees. Soles of feet ache, bum and sore, when standing.

Lungs - Chest constricted, dropsy of pleura and eruptions on chest. Breathing asthmatic, irregular, rattling and suffocative. Cough worse a.m., spasmodic. Expectoration greenish, purulent, copious, viscid and yellow.

Male - Testes soft. Prepuce cracked. Hydrocele of small boys. Deficient erections.

Modalities - Better by expectoration. Better from cool air, winter. Better standing. Worse from exertion, even slight. Worse lying on right side, leaning forward, stooping, ascending stairs, rising. Worse before storms. Worse night, in morning.

Mouth - Raw, dry, wants to moisten it. Cold sores on lips. Tongue is glazed, thickened after inflammation. Teeth feel soft. Parotid hypertrophied.

Rectum - Stubborn constipation. Bright yellow stools. Foul anal discharge.

Sensations - Hair feels as if erect. As if a band across forehead. As if heat in heart.

Skin - Moist eczema. **Suppurating acne**. Barber's itch. Lichen planus. Papular eruption on face. Itching. Ulcers. Itching on ears, nose and in urethra. Arms covered with itching rash. Boils on neck. Hair feels as if erect.

Stomach - Tremors in epigastrium on exertion.

Throat - Raw, dry, painful in swallowing. Uvula and tonsils enlarged and red. Swollen.

Vertigo - Vertigo worse stooping, binding of the hair, fasting, before and during menses.

COMMENTS - Dr. Berlin treated with Sul-i. two cases of "weeping eczema" associated with varicose veins of the leg and pronounced itching. Also a child with eczema of arms. The keynote was "dark red, swollen and sweeping eczematous surface which itches terribly." Sul-i. 3x trituration, was given. Hansen mentioned, among the therapeutic uses of Sul-i., thickness of tongue remaining after glossitis. Hypertrophy of parotids after parotiditis. Chronic hypertrophy of tonsils. Lichen planus, chronic and simple. Bradford reported a case of burning at the end of penis, dull pain in prostatic region, weakness across kidneys. Frequent desire to urinate with slight flow, eats very little, does not go out of doors is much discouraged about himself. Sul-i. 3x cured.

Violent attack of pain in kidney region with shootings down ureters, pain and weakness about kidneys, constant desire to urinate, urine thick and whitish with creamy sediment. Sul-i. 3x and 6x cured.

Stricture after gonorrhea, chordee, very painful urination, twisted stream. Yellow discharge. Sul-i. cured.

RELATIONS - Compare: (1) Band across forehead, Mane. (2) Difficult expectoration, Kali-bi. (3) Heat in heart, Lachn., Rhod. (4) Sleepy by day, restless at night, Staph. (5) Acne, Bell-p., Kali-br.

REFERENCES - Boericke. Clarke. Phatak.

*****SULPHUR TEREBINTHINATUM** (Terebinthinated Sulphur) **PHARMACY** - sul-ter. Sulphur terebinthinatum. Terebinthinated sulphur. One part of purified Sulphur is dissolved by heating in one hundred parts of Turpentine. Dilutions. **Historical dose:** All potencies.

CLINICAL - Chorea. Rheumatoid, arthritis. St. Vitus's dance.

HOMEOPATHIC - Sul-ter. is referred to in the Hon. Robert Boyle's works. A Sul-ter. 1x dilution cured a most obstinate case of St. Vitus's dance and has often relieved pain in chronic rheumatic arthritis.

REFERENCES - Clarke. Cooper.

*****SULPHURICUM ACIDUM**

(Sulphuric Acid)

PHARMACY - sul-ac. Sulphuricum acidum. Sulphuric acid. Vitriol. Dilution. **Historical dose:** All potencies.

CLINICAL - Acidity. Alcoholism. Alopecia. **Aphthae.** Backaches. Back. pain. Bedsores. Brain, concussions. Breath, offensive. **Bruises. Burns.** Cachexia. Cancer. Can- crum, oris. Chafing. Chilblains. Constipation. Corns. **Debility.** Diabetes. Diarrhea. Diphtheria. Dyspepsia. Erythema nodosum. Esophagitis. **Gangrene.** Gastritis. Glossitis. Hair, **loss. Heartburn.** Hemorrhoids. Hernia, inguinal. Hiccoughs. **Hot, flushes.** Impotence. Infertility. Injuries. Intermittent fever. Irritation. Lead, poisoning. Liver disorders. Menopausal. Menorrhagia. Metrorrhagia. Myopia. Nephritis. Nightmares. Paralysis. Perspiration, great. Pneumonia. Pregnancy, sickness. **Purpura hemorrhagica.** Pyorrhea. Rheumatism. Scurvy. Spleen, disorders. **Thrush.** Tuberculosis. **Ulcers.** Uterus, prolapse. Vagina, prolapsed. Varicose, veins. Warts. **Weakness.** Wounds. Writer's cramp.

HOMEOPATHIC - Known as vitriol to the Alchemists., Sul-ac. was a favorite remedy of the Middle Ages. It was used extensively in dilution for scrofulous, phagedenic, cancerous and venereal ulcers, as a gargle and mouthwash for aphthae, ulceration of the gums and diphtheria. It was given as "Mineral Lemonade" in cases of lead poisoning. Clarke verified this last use by giving water acidulated with the 3x.

The "Acid Soap" of Achard was prescribed as a dissolvent in scirrhus of the breast and nephritis, obstinate intermittent fevers, visceral obstructions, dropsy jaundice, cachexia and "certain tumors of the feet."

Elixir of vitriol is a mixture of the sulphuric acid, alcohol and water. It was a popular remedy for nervous weakness in women. Dippel, Haller and others each had an "Elixir," differing only in the proportions of the chief ingredients.

The elixirs were used in intermittent, putrid, malignant, contagious, comatose

Sulphuricum acidum and petechial fevers, scarlatina, confluent and malignant variola, dysentery, plague, leprosy, itch and other skin diseases, nocturnal emissions, suppression of menses and hemorrhoids, nephritis and gout, tuberculosis, and chorea.

Grimmer stated that patients needing this remedy are weak and exhausted, yet mentally impatient and hurried. Prone to suffer from ulcerations, both externally and internally, that readily tend to become gangrenous or cancerous. Ulcers become red, blue and painful. Gangrene following mechanical injuries. Profuse, acrid or stringy discharges.

Hemorrhages of dark blood, from lungs, stomach, uterus and rectum. Violent hemorrhages of thin, black blood from all the orifices. Veins (of feet) distended. Purpura hemorrhagica. Removes long lasting black and blue spots with soreness and stiffness of the part after trauma (follows Arn.).

Weakness or debility, especially in the **digestive tract**, giving a very relaxed feeling in the stomach. **Tremor and weakness**, everything must be done in a hurry. **Trembling internal**, wants to be held. Weakness is out of proportion to the disease, from some deep seated dyscrasia. **Hot flushes**, followed by perspiration with trembling.

Stomach pain and hypochlorhydria. Sour stomach. **Craving for alcoholic stimulants.** Inflammatory ulcerations and malignancy of the stomach occur in those who are chronic users of alcohol to excess.

Parts feel stiff and tight. Pains increase gradually and end abruptly. As of a blunt plug being driven in. Great painfulness. Pains felt during sleep. Disappear on waking. Gnawing pains. Burning, darting pains. Shocks as from pain. Writer's cramp. Lead poisoning.

MIND - Irritable, impatience about trifles. Fretful, impatient. **Hurried feeling.** Must do everything in great hurry. **Hurried while walking, movements**, eating, in writing, occupation. Sullen, impatient, angry because things move so slowly. Nervous fatigue and tendency to take fright.

Changeable mood during perspiration. Vacillating and morose. Disheartened. Constant crying or weeping. Unwilling to answer questions, says yes or no with difficulty. Speech monosyllabic. Extreme mental dejection, unfit for work, would sit and weep whole day long.

Abdomen - Colic with sensation **as if hernia would protrude**, especially left side. Spleen enlarged, hard, painful, on coughing. Sinking sense in abdomen after stools.

Back - Weak feeling with dragging into the hips and small of back. Weakness of spine, cannot sit or stand. Large abscess on right side of neck.

Causations - Burns. Mechanical injuries. Falls, bruises, concussion of brain. Chafing. Surgical operations. Sprains, wounds.

Chest - Great weakness in the chest with difficult speech.

Constitutions - Suited to toppers, old persons, especially women in menopausal years, weak children with no other complaint. Light-haired people. Sour babies. When some deep-seated dyscrasia prevails. Cases where the weakness is out of proportion to the disease.

Ears - Feeling as of a leaf lying before the ear. Tearing and shaking in right ear. Violent tickling. Rhythmical

roaring in ears. Ringing of bells before ears. Humming in ears in evening.

Eyes - Intra-ocular hemorrhage, following trauma. Great chemosis of conjunctiva with aching and sharp pain. Eyes, smart, burn and lachrymation, while reading. Feeling as of a lump in outer canthi, moves to inner canthi on closing eye and returns to outer on opening. Eyelids difficult to open.

Face - Deathly pale or wrinkled. Feels as if the white of an egg had dried on it.

Female - Distressing nightmares before menses or after menses. Menses too early and too profuse. Acrid, burning leucorrhea often of bloody mucus. Prolapse of vagina and uterus from weakness. Gangrene of vagina after prolapse. Erosion of cervix in the aged, easily bleeding. **Hot flushes.**

Flushes of heat, followed by sweat and a feeling of tremors all over the body during menopausal.

Food - Averse to smell of coffee. **Craves alcohol**, brandy. Desires fruits, fresh food. Wine aggravates. Worse drinking cold water. Sweats after eating, especially warm food.

Head - Concussion of brain where skin is cold, body bathed in cold sweat. Sensation as if brain was loose in forehead and falling from side to side (Bell., Rhus-t.). Compressive pain in occiput, **better by holding the hand near head**. Electric like shocks in forehead, temples. Right-sided neuralgia, painful shocks, skin feels pinched. **Thrust in right temple as if plug were pressed in**. Pain of outer parts, as if there were subcutaneous ulceration, painful to touch. Hair falls out, turns gray.

Kidneys - Pain in the bladder if urging for urinating is not attended to. Diminished secretion of urine. Slimy sediment in the urine. Hematuria. Diabetes with lassitude, debility, despondency.

Limbs - Cramp-like paralytic contraction in arms, hands. Jerking of the tendons. Fingers jerk while writing, sleeping. Writers' cramp. Knees, ankles weak, cannot walk.

Lungs - Rapid respiration. Bronchitis in children with short, teasing cough. Cough, then belchings or vomiting. Larynx moves up and down violently, rapid motion of alae nasi during dyspnea, better hanging down legs. Bloody expectoration during menopause.

Modalities - Better from warmth, moderate temperature, hot drinks. Better lying on affected side, hands near head, rest. Worse from excessive heat, open air. Worse cold, **drinking cold water. Worse alcohol, odor of coffee**. Worse towards evening. Worse from touch, pressure. Worse lifting arms. Worse injuries, sprains, surgical operations. Worse concussion of brain. Worse during menopausal period.

Mouth - Offensive breath. Bloody saliva from mouth. Aphthae during protracted disease, especially in children with marasmus. Ulcers spread rapidly. Gums bleed easily. Pyorrhea. Destruction of teeth in diabetes mellitus.

Nose - Dry coryza with loss of smell and taste. Coryza with thin, lemon-colored discharge. Flow of water from nose. Nosebleed in evening. Oozing of dark, thin blood, worse odor of coffee, of old people. Pimples on side of nose

Rectum - Diarrhea with sour odor of body and empty, faint feeling in abdomen. Diarrhea, very foul, green, black or of hacked stools orange yellow, from unripe fruit and oysters, from least indigestion. Hemorrhoids, with oozing moisture. Hemorrhoids prevent stools. Rectum feels as if it has a big ball.

Sensations - As if brain were loose and falling from side to side. As if one side of head filled with smoke. As if a plug were thrust quickly into head. As from subcutaneous ulceration in scalp. As if white of egg had dried on face. As if skin of cheek and chin were pinched. As of want of elasticity of vocal organs. As if there were a lump in throat. As if rectum were torn to pieces during stool. As if hernia would protrude. As if menses would come on.

Skin - Bad effects from mechanical injuries, - with bruises and livid skin. Petechia. Livid, red, itching blotches. **Purpura hemorrhagica**. Hemorrhage of black blood from all outlets. Ecchymosis. Nodular urticaria. Carbuncles, boils and other staphylococcic and streptococcic infections. Itching all over the body. Scars turn red and blue, become painful. Chilblains with gangrenous tendency. Bed sores, abscesses.

Sleep - Sleeplessness from mental excitement. Sleepiness. Retarded sleep and early waking. Jerkings during sleep. Anxious dreams, nightmares before menses.

Stomach - **Weak, relaxed feeling at stomach**, worse after stools. Coldness of stomach relieved by applied heat. Heartburn, **sourbelchings, sets teeth on edge** (Rob.). Drinks chill the stomach and rejected unless mixed with liquor. Nausea with chilliness. Sour vomiting, **hiccough of alcoholics**, nausea with shivering. Vomits mucus instead of food. Coughs before vomiting during pregnancy.

Temperature - **Hotflushes**, then trembling or cold sweat, worse after warm ingesta, worse upper parts, better motion. Drenching sweats. Disproportionate weakness during fevers like typhoid.

Throat - Sore. Liquids regurgitate, on swallowing. **Larynx moves up and down violently**. Throat looks whitewashed. Stringy lemon-yellow mucus hangs from posterior sinuses in diphtheria.

Vertigo - Vertigo when sitting down, disappearing in the open air. Vertigo in room, better open air. Vertigo, must lie down, as soon as he raises himself dizziness returns.

COMMENTS - Hahnemann noted that Sul- ac. is useful for disorders characterized by “tension in the eyelids in the morning, shortsightedness, hardness of hearing inguinal hernia, chronic looseness of the bowels, roughness in the throat, asthma, profuse menses, metrorrhagia, swelling of the feet, coldness of the feet.” Hahnemann’s proving with homeopathic experience confirmed many of the ancient uses of Sul-ac.

Characteristic weakness and prostration. Suited to cases where the weakness is out of proportion to the disease. Weakness that seems to come from deep-seated dyscrasia. General internal trembling, as if trembling from head to foot, but without visible trembling.

Symptoms often appear on right side, but the left cheek and left parotid are most affected. Pain travels from left to right around hypochondria. Pains felt during sleep and disappearing on waking. Jerking on falling asleep. Neuralgic pains increase gradually and end abruptly. Dull pain, pressure as of a plug thrust in. External soreness and sensitiveness. Severe pain over the whole left side of the head, face and neck, coming on from exposure to draft.

Agues and periodic neuralgias. Concussion, with cold sweats and great fatigue after the head injury. Easy sweating, mostly on upper body. Sour body odor, cannot be washed off, particularly in children. Severe hot flashes with profuse perspiration.

Trauma. Hemorrhage. Keynote of black blood (Croc.). Easily bleeding ulcers. Easily bruised. Extensive bruising (Arn., Ham.), when bruises turn black or very dark blue. Purpura hemorrhagica. Bruises of soft parts (Arn.), glands (Con.), and bones (Ruta.). Bruising pains. Long-lasting black and blue spots with soreness and stiffness of the parts. Scars turn black or dark blue. Gangrene after injury. Boils, bedsores. Blotches.

Menses are too early, too profuse, may cause infertility. Menses with oozing of dark thin blood. Prolapse of vagina and uterus, weakness. Flushing, with sweat, particularly during menopause. Cervicitis where the cervix has been eroding and bleeding. Cervix bleeds when touched, friable.

Bloody saliva. Throat is filled with ulcers. Aphthous ulcer with pinpoint bleeding. Thrush in nursing infants.

Heartburn, burning in the stomach, with sour belchings that set the teeth on edge. “Vomiting in morning, acidity in stomach, burning is esophagus and stomach, sour, acrid or foul belchings.”

Pain in bladder unless call to pass water is immediately attended to. Cholera, diarrhea. Diarrhea in emaciated children. External hemorrhoids, sensitive to touch, accompanied by itching.

Thirsty, but water is not tolerated. Water chills the stomach unless qualified with alcohol. Uncontrollable craving for alcohol (Lach.). Cirrhosis of the liver in alcoholics. Vomiting after alcohol.

For inebriates who are “on their last legs,” long after Nux-v. had ceased to help. Hering said the craving for liquor has been subdued by taking for two or four weeks, thrice daily, ten to fifteen drops of a mixture of one part of Sul-ac. with three parts of alcohol.

Cooper contended that many ague cases, supposed to have been cured with Chin-s., were really cured by the sulphuric acid used in dissolving it. “Moreover,” said Cooper, “in all epidemic diseases influenza, cholera, small-pox, etc.”

With Sul-ac. 30c, a dose every night, Clarke gave great help to a delicate woman who had nightmare, waking in a fright,

Sulphuricum acidum before each menstrual period.

A chemist in Covent Garden used a lotion of Sulphuric acid, well diluted, for all the cases of itch that came before him.

RELATIONS - Antidoted by: Puls. **Antidote to:** Lead poisoning. **Compare:** (1) Arn., Calen., Led., Sep., Calc.

Complementary: Puls. **Follows well:** In injuries, Arn., Con., Ruta.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***SULPHUROSUM ACIDUM

(Sulphur Dioxide)

PHARMACY - sulo-ac. Sulphurosum acidum. Sulphur dioxide. Sulphurous acid. Sulphurous anhydride. The remedy is obtained by dissolving sulphur dioxide in water. **Historical dose:** All potencies.

CLINICAL - Acne rosacea. Allergies. Colds. Constipation. Croup. Diphtheria. Eczema. Epidemics. Favus. Hands, chapped. Heartburn. **Infections.** Influenza. Nipples, sore. Pityriasis versicolor. Stomatitis, ulcerative. Tuberculosis.

HOMEOPATHIC - Sulo-ac. is soluble in water, it produces an acid solution containing sulphurous acid. In this way, relatively weak solutions are obtained.

Gutman carried out a clinical study, and taking as a base the results obtained, he drew up acinical symptomatology in 1968. Julian completed Gutman’s description with reference to the symptom data which resulted from acute and chronic poisoning cases.

Sulo-ac. irritates any mucus membrane with which it comes into contact and by becoming oxidized, it is

transformed into sulphurous acid and then into sulfuric acid. Acting on the upper respiratory tract, it is known even to create retro-sternal constriction and phenomena such as anoxia ischemia and myocarditis.

Predisposition to pulmonary tuberculosis. Chronic, purulent hyper secretion of bronchial mucus in the young without dilatation of the bronchi. Need for fresh air, vertigo. Irritation of the nose, pharynx and larynx.

Dyspnea, wheezing, coughing and retrosternal constriction. Pulmonary tumors. Cold in the head, influenza. Asthma, bronchitis, croup. Chronic tuberculosis. Clergyman's sore throat.

Dyspepsia with ptialism and gastric acidity. Keratitis and conjunctivitis. Chilblains, chapped hands. Diphtheria. Scarletina malign. Typhoid fever. Sensitivity to infections.

Chest - Angina pectoris. Constriction behind the sternum.

Eyes - Irritation of both conjunctivae and cornea. Tension of the artery of the retina. Change in the reaction of the pupil. Conjunctivitis. Superficial epidemic spotted keratitis. Herpes of the cornea. Chronic glaucoma. Choroiditis. Dacryocystitis. Blepharitis. Edema of the eyelids.

Heart - Rapid pulse, cold sweating. Accentuation of the second pulmonary sound. Systolic pulsation in the pit of the stomach. Inflammation of the coronary arteries.

Limbs - Chilliness at the limbs.

Lungs - Feeling of suffocation and cyanosed face. Wheezing and rhonchi widespread in the chest. Bronchiectasis. Emphysema, asthma. Chronic pulmonary tuberculosis. Chronic bronchitis. Oppression, sneezing and spasmodic coughing. Expectoration of dirty-gray or bloodstained mucous.

Mouth - Brownish stains on the teeth, especially on the incisors. Dental caries. Ptyalism, gingivitis. Ptyalism in pregnant women.

Nose - Burning sensation in the nose and discharge of a viscous liquid. Mucopurulent rhinitis. Nasal polyps.

Skin - Eruption of vesicles and edema. Brownish coloring of the skin. Eczematic eruption, very sensitive. Leucoderma. Urticaria.

Stomach - Acrid dyspepsia. Dyspepsia and hyperchlorhydria.

Temperature - Septic fevers of all kinds. Epidemic influenza. Typhoid fever. Tuberculosis. Smallpox. Plague.

Throat - Burning sensation in the throat. Feeling of tightness around the throat. Lingering huskiness of voice. Scratching in the throat and chest.

COMMENTS - Some forty years ago, when the germ theory of disease in its present form was in its infancy, Dewar of Fife, conceived the idea that sulphurous acid was an innocent and at the same time universal germ destroyer and consequently universal remedy. His views met with cordial acceptance and inhalation of sulphurous acid given off from burning sulphur became the fashion.

Dewar's method was simple. A few red cinders were put in a kitchen shovel, this was placed in the center of a room and flowers of sulphur sprinkled thereon. In a very short time every person in the room was sneezing violently, coughing and wheezing and running at the eyes and nose.

Dewar also used the ordinary solution and a spray. Wounds, sore nipples, bruises were also amenable to its local use. For erysipelas, a local application of equal parts of the acid and glycerine.

Sulo-ac. doubtless shares the anti-septic properties of Sulph. The symptoms' are from observations of the effects on workmen in mines from air contaminated with Sulo-ac.

Milne summed up its virtues, "Anti-septic, disinfectant, a powerful deoxidizer and destroyer of vegetable life." As a gargle it is used in the strength of one to six. In parasitic skin disorders the B. P. solution is used and is effective.

Ringer said that ten to fifteen minims taken ten minutes before each meal will remedy heartburn in most instances. It prevents flatulence and fermentations and that "the solution, either strong or diluted in varying proportions, speedily removes thrush." In potencies, it has cured ulcerative inflammation of the mouth. Headache, better by vomiting.

C. Wootton tasted the acid with this result it at once stopped the mucus secretion of the bowels. The constipation was so severe that he was in misery for nine months, until he took Hydr., which cured. The use of Sulo- ac. as a hair-wash at a later time produced the same result.

RELATIONS -Antidotedby: Hydr. (constipation). **Compare:** (1) Sulph. in ulcerated sore mouth, Nat-m., Caps., Sul-ac. (2) The effects on the back recorded by Hahnemann as from the fumes of burning Sulph. were antidoted by electricity. (3) Brom. - Persistent, excoriating cold in the head, huskiness worse in the evening. dry cough and attacks of suffocation. (4) Kali-i. - Streaming, burning, excoriating, cold in the head, with violent cough and soapy, salty, greenish expectoration. (5) Tub. - Emaciation, varying pains, chronic swelling of the tonsils, palpitations, perspiration, very sensitive to the cold, coughing hoarseness.

REFERENCES - Clarke. Julian.

*****SUMBULUS MOSCHATUS**

(Musk Root)

PHARMACY - sumb. Sumbulus moschatus. Musk root. Sumbul. Ferula sumbul. N. O. Umbelliferae. Tincture of the powdered root. **Historical dose:** Tincture and all potencies.

CLINICAL - Acne. Ascarides. Asthma. Breasts, pains. Chorea. Diarrhea. Epilepsy. Fainting. Heart, disorders. Pneumonia. Hysteria. **Insomnia.** Neuralgias. **Numbness. Palpitations.** Spermatorrhea. Throat, catarrh. Throat, spasms. Typhoid fever. Worms.

HOMEOPATHIC - Sumbul, as its name, "Musk-root," implies, has an odor resembling that of musk. The resemblance is so close that Sumbul is used to adulterate musk. Sumb. was proved by Lembke, Cattell and others.

The symptoms are as like to those of Mosch, as the physical resemblance would imply. Hysterical and nervous disorders. Easy fainting, nervous palpitations. Nervous, irritable and sleepless.

Anomalous, functional, cardiac disorders. Sclerosed arteries. Menopausal flushings. Asthma. Yellow tenacious discharges. The left side was more affected than the right.

Neuralgia. Chorea, constant jerking of the head and limbs with protrusion of the tongue. **Numbness on becoming cold**, on left side. **Insomnia** of delirium tremens (fifteen drops of tincture). Sensation as if water dropped down spine. As of a hot water flowing through part. Early senility.

MIND - Emotional and fidgety. Mistakes in writing and adding. Weeps and laughs by turns. Fear of becoming insane. Faintness from hearing music.

Abdomen - Abdomen full, distended and painful.

Back - Trickling along spine.

Breasts - Pulling like a string in right breast. Neuralgia around left breast and left hypochondriac region.

Face - Neuralgia. As of a hair or cobweb on face. Idiotic expression.

Female - Ovarian neuralgia. Screwing pain in left side of uterus. Sexual excitability. Menopausal flushes.

Head - Dull in morning, clear in evening.

Heart - Nervous palpitations in hysterical subjects or at menopause, worse least exertion and thinking of it. As if heart beating in water. Neuralgia around left breast simulating angina pectoris. High blood pressure due to arteriosclerosis. **Cardiac asthma.** Aching in left arm, heavy, numb and weary. Pulse irregular.

Kidneys - Oily pellicle on surface of urine.

Limbs - Left arm aching, heavy, numb, weary.

Lungs - Asthma, cardiac, hysterical. Oppressed tightness in left chest, as if clogged. Loses breath on any exertion.

Modalities - Better from gentle motion, warmth. Worse from cold, inspiration. Worse menopausal. Worse motion, active exercise. Worse left side, after sitting. Worse thinking of symptoms. Worse in morning. Music causes faintness.

Mouth - Tongue feels rough as if scraped.

Nose - Comedones. Tenacious yellow mucus from nose.

Sensations - Tongue as if scraped. Clogged sensation in left chest. As if heart beating in water. Like a string pulling in right breast. Corkscrew pains in (left) uterus and appendages.

Skin - Pale, cold. Internal itching.

Sleep - Dreams of falling, of sex, followed by profuse, sudden emission.

Stomach - Burning water brash. Belching of gas from stomach.

Throat - Choking constriction, with constant swallowing. Hysterical. Spasm of pharyngeal muscles. Tenacious mucus in throat.

COMMENTS - Hale gave indications for Sumb. including nasal and pharyngeal catarrh with nervousness, sleeplessness and tendency to spasms (especially in children), discharge of tenacious, yellow mucus.

Catarrhal, spasmodic or cardiac asthma. Ascarides with bloated, drum-like abdomen and constipation, picking nose cured with Sumb. 15c. Oily pellicle in urine. Pain in left uterine region. Menopausal flushings.

Neuralgia, facial or ovarian in women of quick and lively nervous constitutions. Neuralgia of the left hypochondrium, simulating angina pectoris with palpitation in nervous women. Insomnia of chronic alcoholism.

RELATIONS - Compare: (1) Asaf., Mosch. (2) Mosch., Asaf., Melit., Med., Mez. (3) Oily pellicle on urine, Sulph., Puls., Petr. (4) Tenacious, yellow mucus, Hydr. (5) Infra-breast pain, Cimic., Puls., Lil-t. (6) Worse thinking of symptoms, Ox-ac., Pip-m.

REFERENCES - Boericke. Clarke. Phatak.

***SWEET CHESTNUT

(Bach Flower Essence)

PHARMACY - sw-ch-b. Sweet chestnut. Castanea sativa. Flowering sprigs with both male and female flowers

are boiled for half an hour. The water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle, (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Sw-ch-b. belongs to Bach's **group of Despondency and Despair** with Crb- a-b., Oak-b., Will-b., Star-b-b., Elm-b., Pine-b. and Lar-b. States of apathy and anguish.

Severe and prolonged physical suffering, leading to anguish. Suffering seems to be unbearable. Physical side effects of deep depression. Morbid preoccupation and depression (Must-b.). Existential doubt, despair. Suicidal.

MIND- Anguish. Apathy, faithlessness, nihilism and despair. Religious despair with loss of faith. The "dark night of the soul." Depressive disorders (Must-b.), especially when suicide is threatened with deep-seated despair. Morbid preoccupation with death.

Void of emotional life. Despair and despondent. Sense of meaninglessness of life may lead to carelessness of attitude. Lack of aspirations and meaningful purpose.

REFERENCES - Bach.

***SWERTIA CHIRATA

PHARMACY - swer-ch. Swertia chirata. N. O. Gentianaceae. Tincture from the flowers and leaves. **Historical dose:** Tincture and all potencies.

CLINICAL - Acidity. Bilious. Boils. Cough. Dropsy. Dyspepsia. **Fevers.** Flatulence. Indigestion. Intermittent fever. Leprosy. Malaria. Typhoid fever. Worms.

HERBAL - Charaka recommended Swertia in hematemesis and dropsy. Habita found it efficacious in vomiting of pregnancy.

Ayurvedic physicians extolled its therapeutic virtues in typhoid and intermittent fevers, malarial fever, respiratory troubles, bilious troubles, impurities of blood, burning, cough, dropsy, thirst, leprosy, boils and worms.

Swertia is a well-known and well-tried febrifuge among these practitioners and they very often use it in all sorts of fevers. It has been in constant demand among the Kavirajas of India.

Like cinchona and other bitter tonics, it is bitter, stomachic, laxative, anthelmintic and febrifuge. It excites the appetite, strengthens digestion, but does not constipate. It diminishes flatulence and hyperacidity. Removes biliousness in atonic dyspepsia, liver troubles. Removes acidity of the stomach and flatulence, gout, intermittent and other fevers.

HOMEOPATHIC - Dr. Kali Kumar Bhat- tacharjea, of Gouripore, Assam, made a short proving of Swer-ch. An account of the proving and the symptoms developed therein were published in the Hahnemann of Falgoon. Dr. Bhattacharjea prepared a tincture from the flowers and leaves of the plant.

MIND - Dullness of mind, laziness, desire to lie down always.

Abdomen - Accumulation of wind in the abdomen.

Ears - Hissing sound in the ears.

Eyes - Severe burning sensation in the eyes.

Food - Desire for bitter substances and meat.

Head - Dull pain over both the temples, gradually extending to the whole of the head. Coldness is felt over the head.

Kidneys - Dull pain in the kidney, especially on the right side. Urine is of high red color. Burning while urinating.

Limbs - Aching pains in the hands and feet. Weakness of the legs, difficulty in walking.

Liver - Enlargement of both liver and spleen associated with pain.

Lungs - Hurried respiration during fever. Dry mucus, dry hacking cough. Dry cough in the bronchial region.

Male - Weakness of the male sexual organ, slight discharge of semen.

Mouth - Bad taste in the morning, offensive odor.

Nose - Flushes of heat come out of the nostrils.

Temperature - Stage of coldness lasts long, but there is no desire for drinking. Cold with nausea, bilious vomiting. Desire for hot water. Hot stage generally lasts for three hours, and afterwards sweating stage appears. Sweat only on chest, axilla and thighs. Slight thirst with heat. No fixity of the appearance of fever. Burning sensation in the eyes during fever.

Throat - In the morning and evening, pain is felt in the throat, not relieved by hot drinks.

Tongue - The middle of the tongue is enveloped with a thick yellowish coating. Heaviness of the tongue. Difficult speech.

COMMENTS - A noted febrifuge. Acute and chronic malarial fevers. Chronic fevers. Liver troubles after fever

has stopped. Debility after fevers. Long-lasting malarial

fever, turns into Kala-azar associated with enlarged spleen and liver.

The fever may come on at any time of the day and night; in chronic cases the fever appears usually in the afternoon. In the morning attacks, cold stage lasts for a long time, there is no appreciable thirst in this stage and if there be any, it is generally relieved by hot drinks.

Before the appearance of hot stage, nausea and bilious vomiting trouble the patient. The hot stage lasts for 3 to 4 hours and there is slight thirst. Severe burning sensation in the eyes, continues as long as the fever is present.

Indigestion, atonic dyspepsia. Flatulence. Loss of appetite. Troubles arising out of worms. Catarrhs, leprosy and some skin diseases.

RELATIONS - Compare: Chin., Ars.

REFERENCES - Ghose.

***SYCOTIC CO. BACILLUS

(Bowel Nosode)

PHARMACY - syc-co. Sycotic co. bacillus. Sycotic bacillus. Bowel nosode. Bacillus streptococcus faecalis. Sycotic co. from non-lactose fermenting cocci of intestinal tract. **Historical dose:** All potencies.

CLINICAL - Albuminuria. Allergies, food. Alopecia. Amenorrhea. Anemia. Arthritis. Asthma. Backaches. Bedwetting. **Conjunctivitis.** Cough. Cystitis. Deafness. Dysmenorrhea. Enteroptosis. **Fibrositis.** Food, poisoning. Gastroenteritis. Headaches. Indigestion. Leucorrhea. **Lumbosacral pain.** Menorrhagia. Metrorrhagia. Neuritis. **Otorrhea.** Photophobia. Polyps. Rheumatism. Sebaceous, cysts. Vaginitis. Warts.

HOMEOPATHIC - Characteristic **irritation**, particularly in relation to the mucus membranes. Catarrhal states of the respiratory tract, the bladder and the vagina. Asthma, sinusitis. Cough about 2 a.m., worse from change of atmosphere.

Irritation of synovial linings in rheumatism. Enlarged lymphoid tissue of tonsils and adenoids, glands. Meningeal irritation. Convulsions. Cold and sensitive to dampness. Warty growths. Ailments from vaccinations. Vulvo-vaginitis, leucorrhea. Gastroenteritis. Bedwetting, cystitis. Albuminuria. Stools are excoriating, loose and offensive with urgent call to stool on rising.

MIND - Nervous and tense. Ailments from anticipation. Bites the fingernails. Nervous irritability. **Cross, irritable and restless.** Quick tempered, outbursts of temper from resentment. Oversensitive. Shy, sensitive and fussy. Exhausted. Timidity. Weepy and depressed. Fears of dark, of being left alone, of animals and dogs.

Abdomen - Distended abdomen, colon.

Enteroptosis. Chronic irritation of whole digestive tract. Acute or chronic gastroenteritis in the child.

Back - Severe backache. Pain in morning on rising. Backache from damp weather. Stiff **Mover.** **Fibrositis,** myositis. Neuritis of head and neck. Sebaceous cyst back. **Lumbosacral pain.** Pain in sacral-iliac joints. Hips stiff.

Blood - Anemia and hydremia.

Chest - Pleurisy. Pleurodynia. Fibrositis of chest wall. Sudden pain at the base of right lung. Intercostal neuralgia. Pain in left shoulder blade.

Constitutions - Pale, sallow, flabby and soft with long eyelashes (Tub.), and sweat of the head.

Ears - Otorrhea. Excessive formation of wax. Deafness. Itching of meatus. Cracks under ears.

Eyes - Conjunctivitis. Vitreous opacities. Pain in eyeballs. Photophobia, hemiopia. Blinking. Tarsal cysts. Cystic tumors on eyelids. Swelling of upper eyelids.

Face - Puffy in morning, especially under eyes. Acne rosacea. Eruptions, herpes about mouth. Erythema. Vesicular eruption on cheeks. Malignant growth on right cheek. Hair on face and upper lip. Facial neuralgia. Twitching facial muscles.

Female - Amenorrhea. Pain left ovary at menstrual period. Menorrhagia. Metrorrhagia. Dysmenorrhea. Leucorrhea acrid, excoriating. Leucorrhea copious, yellow. Leucorrhea profuse, bland. Vaginal discharge, offensive, fishy. Pruritus vulvae, vulvo-vaginitis, balanitis. Tumors, ovarian cysts. Uterine polyps. Genital warts, herpes.

Food - Desires butter, fat, cheese. Desires sweets, milk and salt. Averse to breakfast. Aversion to egg, fat, cheese, milk, milk pudding, cream. Aversion to salt, vinegar, sugar, tea. Aversion to bread, potato, tomato, vegetables, meat. Aggravated by egg, causing nausea, vomiting, bilious attack and hay fever. Worse from fat, eggs, onion and oranges.

Head - Irritation of meninges, sub-acute or chronic. Headache from infection of sinuses. Aching pain deep in brain. Headache on left side. Frontal congestive headache which lasts for many days. Sick headache, worse at menstrual period. Throbbing, better heat and rest, worse noise. Sweating of head at night. Painful dry scalp

spots. Premature gray hair. Alopecia. Baldness.

Kidneys - Irritation of mucus membranes from kidney to urethra. Kidney pain. Nephritis, pyelitis, nephrosis, cystitis. Frequency and urgency. Urine corrosive. Albuminuria. Urinary tantrums.

Limbs - Fibrositis, shoulders. Muscular rheumatism of arms. Arthritis fingers, pain generally better dry day and hot water. Fingers deformed, nodules on fingers. Fingertips cracked. Fingers go dead, numb, with spasm of the fingers. Prickly feeling in hands. Nails brittle. Feet and legs painful when walking as if walking on loose cobble stones. Feet and legs painful at night. Pes planus. Rheumatism of knees. Ankles swollen and stiff. Feet swollen at night. Fidgety feet at night in bed. Soles of feet painful. Big toe joint painful.

Lungs - Dyspnea in morning on waking. Asthma and bronchitis, worse with damp and frost and better at the sea side. Frequent bronchial colds. Bronchitis in winter. Tracheitis. Wheeze and coughing at 2 to 3 a.m. Irritable cough of croupy nature at night, wakes from sleep. Coughs until sick. Chronic spasmodic persisting cough. Cough with tough sputum.

Male - Impotency. Genital warts and herpes.

Modalities - Worse from change of atmosphere, damp.

Mouth - Salivation increased. Bad taste, sense of taste lost. Pins and needle sensation on tongue. Pain like a splinter in tongue. Tongue sore, scalded, dry, fissured, furred. Tongue dry, sticks to roof of mouth. Warts on tongue. Deep ulcers on tongue. Ulcers in mouth. Lips dry and cracked. Cracks in angles of mouth. Herpes of mouth.

Neck - Fibrositis in neck, shoulders and back.

Nose - Nasal, post nasal catarrh. Catarrh extending to frontal sinuses. Turbinates congested, sinus infection. Vasomotor rhinorrhea. Hay fever. Coryza after eating eggs. Polyps. Nose dry, crusting and burning. Cracks at corners of nostrils. Nosebleed. Sense of smell lost.

Perspiration - Profuse perspiration at night during sleep.

Rectum - Condylomata around anus. Anal warts. Splinter pain. Distended feeling in rectum. Prolapse. Constipation or looseness. Stool pale, crumbly, bad odor. Loose, offensive stool, excoriating (Med.). Diarrhea from excitement of emotions. Diarrhea after eating, fatty food. Liquid motion after every meal. Urgent call to stool as soon as rising out of bed.

Skin - Sallow and oily skin. Impetigo. Warts large, flat and rugged. Herpes on face, neck and chest. Herpes groin. Varicellar eruption of limbs since immunization. Intertrigo breasts. Eczema of face in infants. Eczema on back of hands. Palmar dermatitis. Cracks on fingertips. Paronychia. Nails and toenails brittle and painful. Cracks on heels. Varicose eczema of ankles. Chilblains on feet.

Sleep - Insomnia. Restless sleep. Perspiration of head and body during sleep. Wheeze or cough. Can't sleep until 3 a.m. Wakes 2 to 3 a.m. Night terrors. Nightmares, of dead bodies.

Stomach - Anorexia. Burning pain in stomach. Pain and distention in the epigastrium. Flatulence. Acidosis attacks. Eructation acid, bilious attacks. Nausea from the smell of cooking. Nausea or sickness after eating eggs (Ferr.). Nocturnal vomiting, must empty stomach.

Throat - Fibrositis of neck and throat. Goiter. Glands enlarged. Enlargement of tonsils and adenoids. Tonsillitis, cheesy masses from tonsil. Quinsy. Throat feels raw, scorched, dry. Profuse mucus from throat in morning. Swallowing difficult, chokes easily.

COMMENTS - This organism of the intestinal tract is related morphologically and clinically to the gonococcus bacteria. Hahnemann related what he called "the Sycotic Miasm" to the disease, gonorrhea, but this disease is only one form of catarrhal infection of the mucus membrane of the urinary tract.

There are many non gonorrheal organisms associated with the symptom picture of "Catarrh" and according to Dr. John Paterson the miasm "Sycosis" may be considered synonymous with "Catarrh." Gonorrhea is an infection of mucus membrane, but catarrhal manifestations (sycotic) are not at all due to gonorrheal infection. Characteristic warty growths. Exanthema of chickenpox. Chronic and recurring cystitis, often treated several times with antibiotics. Usually additional remedies are required, particularly a constitutional prescription, but intercurrent doses of Syc-co. can be of great help.

Griggs noted it for human "flu," cat "flu," foul pest, foot and mouth disease and canine distemper are all the signs of Syc-co. Convulsions, meningitis or epileptic forms of seizures are to be found in the clinical picture and also chorea, though less frequently than in Dysentery Co.

Syc-co. 200c in nosebleeds of long standing in a girl without any apparent reasons, cured completely with a few doses at long intervals.

RELATIONS - Compare: (1) The related sycotic remedies are Thuja, Nit-ac., Nat-s. and Bac. (2) Vesicular type of rash related to Ant-t., Rhus-t., Bac., and Thuja. **Complementary:** Lyc., is often complementary to this nosode.

REFERENCES - Bach. Paterson.

***SYMPHORICARPUS RACEMOSUS

(Snowberry)

PHARMACY - sym-r. Symphoricarpus racemosus. Snowberry. N. O. Caprifoliaceae. Tincture of fresh ripe berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Constipation. Hematemesis. Indigestion. **Morning sickness.** Nausea. **Vomiting.** Water brash. **HOMEOPATHIC** - Prof. S. Burdick investigated the medicinal properties of many plants hitherto unused by the profession, including Symphoricarpus racemosa.

Useful for persistent **vomiting of pregnancy.** Nausea during menstruation. Nausea, **worse from any motion. Averse to all food,** better when lying on the back. Gastric disturbances, fickle appetite, nausea, water brash, bitter taste. Smell and thought of food repugnant. **Constipation.**

COMMENTS - When Burdick gave some of the Sym-r. to the first prover, a woman, she felt the marked nausea, and exclaimed, as soon as it was produced, "Doctor, this is precisely like the morning sickness I always experienced during pregnancy."

Dr. Burdick became more interested, repeated the experiment with other provers, and obtained almost uniform results, viz., a feeling varying from qualmishness to intense vomiting. It was given to female provers only and merely tested far enough to verify that symptom.

Upon this clue, Dr. Burdick gave Sym-r. in the higher potencies to patients suffering from the vomiting of pregnancy with the most satisfactory results. After a trial of many years, he found it so far superior to other remedies that he relied on it altogether with rarely any but entirely satisfactory results.

Burdick mentioned the drug in his course of lectures, so Moaffat bore it in mind waiting for a test case. Soon that came in the person of a young woman three months advanced in her first pregnancy.

She was suffering from a deathly nausea with vomiting and retching so prolonged and violent as to produce hematemesis. The smell or thought of food was repugnant in the extreme.

An examination disclosed no malposition or apparent cause for the trouble, so he procured some Sym-r. 200c from Dr. Burdick and gave her one dose in the midst of a violent paroxysm.

In a few minutes she stopped vomiting and said she felt soothed and quieted all over. In half an hour the nausea began again, but a few pellets checked it promptly and she fell asleep. Once during the night she awoke distressed and took a dose, but slept again quite soon.

For a month or so she felt very well until after over-exerting herself she became nauseated once more, but it was promptly checked, nor did it return during her pregnancy. The indications have been observed in cases of pregnancy with a feeling of qualmishness, with indifference to food.

In more severe cases, there is a deathly nausea, the vomiting is continuous, violent retching. Sym-r. does not seem to be confined to any particular morning aggravation, a prominent symptom is the disgust at the sight, smell or thought of food.

In one case, the patient was comparatively comfortable while lying on the back, but would be nauseated by the slightest motion of the arms, particularly raising them. The case was completely relieved by a few doses of Sym-r.

***SYMPHYTUM OFFICINALE

(Comfrey)

PHARMACY - symph. Symphytum officinale. Comfrey. Knit-bone. Healing herb. N. O. Boraginaceae. Tincture of fresh root-stock collected before flowering and in autumn. Tincture of fresh plant. **Historical dose:** Tincture and all potencies. Tincture, externally as a dressing for sores and ulcers and itching of anus.

CLINICAL - Abscess. Amputation. Backache. Bone, cancer. **Bone, fractures. Bone, injuries.** Breasts, sore. **Eyes, injuries.** Fractures. Gingivitis. Glands, enlarged. **Gunshot wounds.** Hernia. Menses, suppressed. Osteoporosis. Periosteum, painful. Periostitis. Psoas, abscess. Sexual excess. Sprains. **Stump, pain.** Tennis elbow. Wounds.

HERBAL - Symphytum is also called consolida, and the word comfrey is derived from confirmare. The common name, knit-bone or bone-set, gives the indication for this remedy. The root contains a crystalline solid that stimulates the growth of bone cells and epithelium on ulcerated surfaces.

The glutinous juice of the root seems, according to Gerarde, to have given the key to its action as a vulnerary. Symphytum may be considered the orthopedic specific of herbal medicine.

HOMEOPATHIC - Symph. is above remedy. It may be administered internally in the treatment of gastric and duodenal ulcers, and in stomach pain, and externally for anal itching. External application disposes the swelling, due to injury or other growths.

Wounds penetrating to perineum and bones. **Injuries to bones,** cartilages, ligaments, joints, tendons and the

periosteum, with excessive pain. **Pricking pain** and soreness of periosteum. Pricking, sticking, jaggings pains. **Fractures, broken bones.** Painful bone at point of fracture. Pricking, stitching pains, remaining after wound is healed, worse touch. **Non-union of fractures.** Painful, irritable stump after amputation. Painful old injuries. Bruises, sprains and inflammation of bones, diseased spinous processes. Deficient callus. Acts on joints generally. Neuralgia or arthralgia of the knee. Sore breasts. Psoas abscess. Sarcoma.

Abdomen - Pain about navel, worse sitting.

Pains across epigastrium from one side to the other, when sitting. Gripping pain.

Back - Backaches from excessive sexual indulgence, or from violent motion. Low back pain from injury, overexertion, or excess sexual activity. Spinal injury. **Pain in back from a fall.** Pott's disease from a fall. Decay of vertebrae. Caries of spinal and other bones.

Breasts - Sore breasts.

Causations - Broken bones. Injures to eye, bone, periosteum. Falls. Blows from blunt instruments. Sexual excess.

Ears - Cannot hear well, feels as if ears were stopped up. Inflamed ears.

Eyes - Injuries to the eyes from blunt instruments, blows, knocks, to the eyeball, eye socket, or sclera. Black eyes (Arn., Led.). Bleeding inside the eye after injury. Retinal bleeding. Traumatic conjunctivitis. Long-lasting pain or soreness in the eye after injury. Eyelids spasmodically closed.

Face - Facial injuries. Inflammation of inferior maxillary bone, hard, red swelling. Cancer, tumor of antrum. Cancer of jaw bone.

Female - Menses stopped. Leucorrhea.

Head - Headache in occiput, in top of head, in forehead, changing places. Pain comes down bone of nose. Inflammation of inferior maxillary bone, hard, red, swelling. Skull fracture or head injury (Hyper., Nat-s.).

Kidneys - Stricture of urethra.

Limbs - Bone fractures. Comminuted fracture. **Non-union of bones.** Accelerates the formation of callus. Reduces healing. Prickling, stitching pains. Bruises. Injuries from blunt instruments. Pain in area of bony protuberances, elbow, epicondyles, ankles. **Injury to periosteum.** Injury to hard tissue, shins. Bone inflammation, periostitis with pain and soreness. Osteoporosis. Brittle bones. Knee arthralgia. Tennis elbow. Psoas abscess. Bone cancers. Pain at the site of old wounds or fractures, past injury to cartilage or bone. Post-surgical pain at the site of amputation or bone puncture.

Male - Testicles become painful and tender, prevent walking. Backache from excessive sexual indulgence, with spermatorrhea.

Modalities - Better gentle motion, warmth. Worse **from injuries.** Worse sexual excess. Worse touch, motion, pressure. Stooping causes weight in forehead. Sitting causes pain about navel. Walking causes pain opposite spleen.

Nose - Pain comes down bone of nose and sometimes down both sides of nose.

Rectum - Dysentery. Inflamed and bleeding hemorrhoids.

Sensations - As if upper lid passed over an elevation on closing eye. As if ears were stopped up.

Skin - Cold.

Stomach - Ulcers of the stomach.

Teeth - Periodontal disease. Toothache after injury. Jaw swollen and painful after dental work. Pain worse after tooth extraction.

COMMENTS - Grimmer noted that, though the proving was meager, there was a rich clinical history.

According to Gerarde, "The roots of Comfrey stamped and the juice drunk with wine, help those that spit blood and heal all inward wounds and bursting. The same bruised and laid to in manner of a plaster, do heal all fresh and green wounds and are so glutinous, that it will solder and glue together meat that is chopped in pieces, seething in a pot and make it in one lump."

Gerarde added that it eases pains in the back from violent motion such as wrestling or from excessive sexual indulgence (Arn.), even when spermatorrhea has been induced thereby.

Peter Squire gave, as the medicinal properties of Symph., "Astringent, mucilaginous, glutinous, useful to form cases for injured limbs. The black rind of the root is scraped off and the mucilaginous root is then scraped carefully into a nice even pulp. This spread upon cambric or old muslin in wrapped round the limb and bandaged over, it shortly stiffens and forms a casing superior to starch, giving support and strength to the part."

Squire knew a bonesetter who rendered himself famous for setting compound fractures with this root, which he kept secret. He never removed the bandage after the first dressing until the limb was well.

Sir Wm. Thomson of Dublin related a case of malignant tumor of the face that had extended to the nose. Microscopic examination proved it to be round-celled sarcoma. The patient, a man, refused advice at the time,

and was examined by Felix Semon, who saw the man later. After still further delay, Thomson performed the operation in the month of May, 1896.

A month later the growth began to show again, increased rapidly, closed the right eye, was blue, tense, firm, lobulated, but did not break. Thomson declined to operate again. Early in October, the man walked into Thomson's study well. "The tumor had completely disappeared from the face and I could not identify any trace of it in the mouth." The man had applied poultices of comfrey root and the swelling disappeared.

Comfrey's therapeutic history is rich with clinical cures of round-cell sarcoma of the antrum and many cases of bone cancer. It seems to have special curative action on the periosteum and bony structures, facilitating the formation of callus in fractures, bringing about union, even in compound fractures, and in cases of slow or delayed union.

Curative in injuries to the eyeball by blows etc. It follows Arn. in such cases, as well as in injuries to and bruising of the testicles. Backaches after strains and from sexual excesses. Pott's disease, psoriasis and abscesses from a fall. One case of inguinal hernia has been cured with the topical application of the tincture of the root.

H. C. Allen referred to the following indications for Symph. given by Lippe: when the bone or periosteum has been injured and the soft parts have recovered from the bruised soreness under Arn., the remaining pain and soreness of periosteum may be promptly relieved by Symph.

Symph. was the only remedy Lippe had seen which was efficient in traumatic injuries of bone or periosteum. He cured many cases after others had used Arn. and failed.

H. C. Allen gave the following cure, reported by Fowler. Mrs. J. stepped on the edge of a scantling, which rolled and she turned her ankle. In a few minutes the ankle began to swell and become painful, pain increased rapidly, so that in hour or two the patient was in great agony.

She declared that her leg was broken, she "could feel the rough ends of the broken bones jutting into the flesh." She could not bear any one to approach her for fear of being hurt. She was promptly relieved, so that she went about her usual duties in forty-eight hours.

Allen regarded pricking pain as a guiding symptom. He noted its usefulness, next to bone injuries, for injuries to the eyeball. "I have long since ceased to use Arn. in injuries of the globe of the eye, Symph. having given such prompt and permanent relief."

Croserio was one of the first to use Symph. in the potencies for fractures. "Injuries of the bones are healed most promptly with Symph. 30c internally, once a day."

Wells gave cases of his own, including the case of a boy, 14, who broke the bone of his forearm at the junction of middle and lower thirds, two years before. He had twice repeated the fracture by slight falls. The ends were now slightly movable on each other, and the arm was of little use. Three doses of Symph. 30c made a perfect cure and the boy became robust and much better in health than he had ever been before.

Wells also recorded the case of a boy, 8, with a fractured humerus near the junction of condyles and shaft. Arn. 30c immediately arrested the spasmodic jerks of muscles of the injured arm. Arn. was continued three days, by which time all traumatic fever had subsided. Symph. 3c was given, one drop in half a tumbler of water, a teaspoonful morning and evening. The splints were removed the ninth day and the bone was found to be consolidated. The cure was entirely without pain.

F. H. Brett cured himself of inguinal rupture by rubbing the part with tincture of the root. On another occasion, a blow on the lower part of the back from a fall resulted in a secondary affection of the spine in the mid-dorsal region, a protuberance as if from a light dislocation appearing at the spot. Again Symph. was applied. The tenderness at the point subsided after three applications, and in a few days the protuberance disappeared. Brett mentioned a case he had heard of a diseased arm that had begun to mortify. It was dressed with a poultice of comfrey root and this "drew off the mortified substance. The arm became sound again."

Cooper noted that one patient, just before her marriage, had a dangerous attack of scarlatina, leaving abscesses on both sides

of the neck and great internal swelling, so that she could swallow only liquids and those with great difficulty.

The external swelling extended from ear to chin and was hard and very painful. Poultices of comfrey root were applied. The pain was immediately relieved and her abscesses decreased rapidly until they were entirely absorbed without external opening so far as the patient could remark.

For bone tumors, osteomyelitis, bone ulcers. Sarcomas. Bone cancers of the jaw or bones (Hecla.). Bone cancer, even if there is no bone injury (Calc-p., Hecla.). Non-union of fractures. Broken bones that don't heal well. Acutely for osteoporosis, or osteogenesis imperfecta (Calc., or Calc-p. chronically). Stump pain after amputation of a limb (Hyper., All-c., Coff., Calen.), strong aching pains.

Spinal diseases after trauma and injury. Injuries that result in a lump or tumor. For swellings, nodules and tumors in bones and limbs after an injury (Bell-p. and Con. after injury to soft tissue). Tailbone injuries (Arn., Hyper.), with an aching pains.

Blows to the eyes (Led., Arn.). Corneal abrasions. Hernias (Nux-v., Calc., Lyc.). As a compress for mastitis. In tincture for stomach ulcers.

RELATIONS - Antidote to: Canth. **Compare:** (1) Arn., Bry., Calc-p. - fractures. (2) injuries, Arn., soft parts, Symph., hard, Arn., sore, bruised lame, Symph., pricking, stitching jagging pains. (3) Calen., Fl-ac., Hep., Sil., Staph., Led., Rhus-t., Hyper. (4) Effects of sexual excess, Am. (5) Calc., Calc-f. **Follows well:** Am. - for pricking pains and after the bruising of the soft parts is healed.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***SYPHILINUM

(Syphilis Nosode)

PHARMACY - syph. Syphilinum. Syphilis nosode. Luesinum. Lueticum. **Historical dose:** All potencies.

CLINICAL - Abscesses. Alcoholism. Anus, fissures. Aphasia. Asthma. Baldness. **Bone, disorders.** Breasts, sensitive. Bubo. Cachexia. Cancer, Chancres. Constipation. Deafness. **Debility.** Deltoid rheumatism. Dentition. Diplopia. Dysmenorrhea. Epilepsy. **Hair, loss.** Headache, syphilitic. Hoarseness. Hodgkin's disease. **Insomnia.** Iritis. **Leucorrhea.** Mouth, ulcers. Myopia. **Nerve, disorders.** Neuralgia. Night-sweats. Ophthalmia. Otorrhea. Ovaries, disorders. Ozaena. **Pains, severe.** Paralysis. Pemphigus. **Prostration.** Psoas, abscess. Ptosis. Rectum, stricture. Rheumatism. Sciatic pain. **Sleeplessness.** Spine, decay. Strabismus. Strictures. Sunstroke. **Syphilis. Teeth, decay.** Throat, ulcerated. Tibia, pains. Tongue, cracked. Tongue, ulcerated. Tuberculosis. Ulcers. Whitlow.

HOMEOPATHIC - The syphilis nosode is mainly used on the general symptomatology with the family and personal history of the patient. Its **nightly aggravation** of complaints, with extreme mental and physical restlessness, together with its intense irritability, are striking indications for its use.

It's frequently used to great advantage as an intercurrent remedy in the course of treatment in chronic disease, prior to or following the apparently indicated remedy when the patient's response to that remedy is feebly or nil.

Syph. has been used in cancer, tuberculosis, severe types of neuro-arthritis, mental disturbances or various forms of paralysis. Syphilitic disorders. Especially useful when there is hereditary tendency to **alcoholism** or a **syphilitic miasm**.

Affects the nerves, mucus membranes and bones. Utter **prostration and debility in the morning**. Great weakness with very few symptoms.

Shifting rheumatic pains. Chronic eruptions and rheumatism. Persistent pains in

Syphilinum any part of the body. Cold pains. **Pains from darkness to daylight**, decrease and increase gradually. Violent or linear pains. Knots in muscles. Pains in bones. Bones, sore, decay, curvature. Exostoses.

Ulceration of mouth, nose, genitals, skin. Stubborn **ulcerations. Succession of abscesses.** Fetid discharges, foul or green pus. Foul odor of the body. Ichthyosis Slowly advancing hemiplegia. Glands enlarged. Hodgkin's disease. Epilepsy, worse after menses. As of hot water in blood vessels.

Crying infants, who begin crying immediately after birth. Dwarfed, shriveled up, old looking babies and children, bald head, pouting lips and big belly.

MIND - Loss of memory, but remembers everything previous to his disease. Difficulty in making arithmetical calculations.

Apathetic. Severe insomnia and suicidal depression (Aur.), especially during extreme attacks of pain. Sad and lamenting. Antisocial, aversion to company. Cross, irritable, peevish. Does not want to be soothed.

Anxiety about health. Great restlessness and paces the floor at night. **Hopelessness. Despair of recovery.** Fear of suffering and pains. Desperate, can't take the pain or suffering anymore. Fear of dying. **Fears the night.** Fears from exhaustion.

Very nervous. Fastidious. Fear of germs, of catching an infection. **Always washing or wringing the hands.** Causeless weeping. Laughs or weeps without cause. Nightly delirium. Senile dementia. **Feels as if going insane or being paralyzed. Insanity**, syphilitic insanity.

Abdomen - Pain or distress deep in abdomen as if in omentum. Feeling of heat internally in hypogastric region. Pain in right groin followed by swelling of glands. Large, painless bubo in right groin, opened and discharged freely.

Back - Neck feels short. Pain at coccyx with sensation as if it is swollen, worse sitting. Pain in the back in the region of kidney, worse after urinating.

Breasts - Sensitive to touch, feel sore during menses and other times.

Causations - Sun. Syphilis. Damp weather, thunderstorms.

Chest - Soreness of chest. Rattling in chest and throat. Oppression of chest to such an extent as almost to arrest breathing. Sensation of pressure under upper part of sternum.

Constitutions - Syphilitic.

Ears - Deafness without any obvious cause, nervous with cachexia. Abscess of the middle ear. Calcareous deposit on tympanum. Decay of ossicles in ear, of syphilitic origin.

Eyes - Ophthalmia, neonatorum. Tubercular iritis. Amaurosis, atrophy of optic nerve. Spots on cornea. **Chronic, recurrent, inflammation of cornea.** Successive crops of phlyctenules and abrasions of epithelial layer of cornea. **Intense pain at night.** Feeling of cold air blowing on eye (Fl-ac.). Photophobia and profuse lachrymation. Glimmering vision. Diplopia. Vertical diplopia. Squints. Ptosis. Lids swollen, especially upper eyelids. Eyelids glued together.

Face - **Pale, wrinkled, old looking.** Pain over eyes (right) worse protruding tongue. Paralysis of one side with difficult speech, mastication and twitching of eyes, lids. Twitching of muscles.

Female - Menses, with putrid meat-like odor. **Leucorrhea profuse, thin, watery, acrid** with sharp, knife-like pain in ovaries. Yellow, offensive, acrid leucorrhea, so profuse it soaks through napkins and runs to the heels, with itching of the genitals. Ulcers on labia. Ulcers on the vulva with ovarian pain, sensitive to touch. Cutting pain in ovary during sex, at the moment of orgasm. Habitual abortion.

Food - Capricious appetite. No food agrees or satisfies him. Total loss of appetite for months. **Craves alcoholic drinks.** Aversion to meat.

Head - Stupefying headaches. Pain in bones of head. **Deep, crushing headpains across the base of temples.** Linear pains from temples across, or from eyes backward, cause sleeplessness and delirium at night. Beats head against the wall. Feels pulled back. Top of head feels as if coming off. Cerebral softening. **Falling of the hair.** Tubercles all over the scalp.

Heart - Large, soft pulse. Valvular disease of heart. Sharp pains in heart from base to apex (Med. has reverse), at night. As if hot water flowing in the veins.

Kidneys - Urine frothy, scanty, yellow. Urinates only once a day, but profuse. Passes urine better while standing. Nocturnal bedwetting.

Limbs - Muscles contracted in hard knots. Indolent ulcers. Sciatica, worse at night, better about daybreak. Bones pain as if sawed. Bilateral exostoses sore and painful. Osteo-sarcoma in center of tibia. Cold pain in legs. Shin bones painful, better pouring cold water on them. Soles painful with feeling of contraction, worse standing on them. Cannot sit on low chair or squat. Redness and rawness between toes (Sil.). Rheumatism of shoulder joint, at insertion of deltoid, worse from raising arm laterally or in front. Itching eruptions about elbows. Affections of middle fingers. **Always washing the hands.**

Lungs - Asthma with wheezing and rattling (Ant-t.). Chronic asthma, worse in summer, during thunderstorms, at night, humid weather. Dry cough, worse lying on right side, worse at night, windpipe sensitive to touch (Lach.). Sharp pains from base of heart to apex at night.

Male - Nodular formation in testes, spermatic cord and scrotum. Chancres. Aching of genitals, cannot sit still.

Modalities - Better inland, mountains, high altitude. Better during day, from applied heat. Better continued or slow motion. Better changing positions. **Worse at night, from sundown to sunrise.** Worse full moon. Worse damp, thunderstorms. Worse extreme heat or cold, winter, summer. Worse at the seashore. Worse in any position, squatting. Worse motion, raising arms laterally. Worse protruding tongue.

Mouth - **Excessive flow of saliva, it runs out of mouth when sleeping.** Putrid taste, before epileptic fit. Ulcers, smart and burn. Tongue, coated, indented, deep longitudinal cracks along center. Paralysis of tongue. Aphasia.

Nose - Decay of nasal bones, hard palate and septum with perforation. Ozaena offensive, thick yellow-green discharge. Attacks of fluent coryza. Snuffles. Green lumps from posterior sinuses. Sinuses, painful, from inhaled air. Saddle across the bridge of the nose (Sep.). Itching nostrils.

Perspiration - Perspires at night, with exhaustion. Sweats at night, most marked between scapulae and down to waist. Peculiar disagreeable odor from body.

Rectum - Fissures in anus and rectum, prolapsed. Feels tied up with strictures. Obstinate constipation. Diarrhea, bilious, painless worse seashore, drives her out of bed about 5 a.m. Water from enema escapes, with pain.

Sensations - A seething feeling as if hot water or hot oil running through all veins of the body, all night long. A far-away feeling with apathy. As if going insane or about to be paralyzed. As if top of head were coming off. As if teeth were loose. Tongue feels as if paralyzed. Fluttering as of something alive in teeth. As if throat tearing to pieces. As of a nervous chill commencing in anus and running down legs. Palms and soles as if pricked by needles. As if bitten by bugs.

Skin - Extreme emaciation. Reddish-brown eruption with a disagreeable odor. Swollen and blotched. Biting as from bugs. Wandering erysipelas. Conical crusts. Bullae. White or pockmark scars. Coppery spots. Distorted nails.

Sleep - Sleeplessness. Great restlessness at night, impossible to keep leg in one position. Wakes soon after midnight and cannot sleep again until 6 a.m.

Stomach - Nausea. Vomiting for weeks or months due to erosion from superficial ulceration of lining of viscous. Heartburn with pain and rawness from stomach to throat pit, often with cough.

Temperature - Chilly. Nervous chills preceded by pains in head. Fever dry, hot, shortly after going to bed, parted lips, great thirst. Sweats at night with exhaustion.

Throat - Aphonia before the menses. Continuous pain in the larynx, worse touch. Sore, right to left, worse cold drinks. Chronic hypertrophy of tonsils with syphilitic taint.

Teeth - Teeth feel sticky, as of a worm in. Feeling as if teeth had all got out of place. Teeth decay at the edge of gums. Toothache better pressing them together, worse hot or cold things. Teeth cupped in children.

Vertigo - Vertigo on looking up, seems to be caused by heat.

COMMENTS - Syph. is useful for ailments since syphilis, or a history of syphilis in the family. Pains get worse or better gradually, are shifting and require frequent change of position. Unbearable pains (Aur.). Linear pain. Ulcers and bone pains (Merc.).

Characteristic aggravated by night, pains from darkness to daylight, begin with twilight and end with daylight. All symptoms are worse at night. Terrible dread of night, because of mental and physical exhaustion on waking. Neuralgia and headache, asthma, coughs worse from sunset to sunrise, whether syphilitic or not. Sleeplessness (Sulph.).

Epilepsy. Parkinson's disease. Facial paralysis. Hemiplegia, "persistent pains in any part of the body." Neurotic behavior, especially wringing and washing of the hands. AIDS, dementia, sleeplessness, anxiety, fear of infection, and neurotic behavior.

Ulceration, affecting the mouth, nose, genitals or skin. Ulcers have grayish bases. Abscesses with foul secretions. Fetid pus formations. Succession of abscesses. Eruptions with copper-colored spots. Pemphigus. Ozaena with discharge of fetid clinkers. Catarrhal and nerve deafness. Itching of nostrils. Fetid discharges from the ear. Alopecia universalis. Dark purple lines between alae nasi and cheeks. Itching, scabby eruptions on face or breast, singly or in clusters, looking like herpes. Pain and pressure behind sternum.

Ophthalmia neonatorum, the lids adhere during sleep, pains worse 2 to 5 a.m., profuse pus, better cold bathing. Iritis, syphilitic or rheumatic. Diplopia, one image seen below the other. Ptosis, sleepy look from drooping lids. Teeth decay at the edge of the gums and break off. Cupped teeth, serrated edges, dwarfed in size and converge at their tips. Deformities of the teeth. The teeth come in rotten and deformed (Calc-f., Kreos.). Paralysis of tongue. Aphasia.

Craving for alcohol in any form. Hereditary tendency to alcoholism. Impaired nutrition, emaciation. Burnett recorded many instances of Syph. helping stunted children. Progeria. Babies that never stop crying and screaming ever since they were born (Jal., Aeon.).

Leucorrhea, profuse, soaking through napkins and running to heels. Rectal pain. "Obstinate constipation for years, rectum seems tied up with strictures, when enema was used the agony of passage was like labor."

H. C. Allen said "Syphilitics or patients who have had chancre treated by local means and as a result have suffered from throat and skin troubles for years, are nearly benefited by this remedy at commencement of treatment unless some other remedy is clearly indicated."

; Thomas Wildes noted that, in his experience with Syph., the chancre increases for the first two weeks and then gradually fades away, not being followed by secondaries.

Wildes cured a bookkeeper who, for many months, had a piercing, pressing, excruciating headache over his right eye extending deep into his brain. It was so severe, he was losing continuity of thought and memory.

Under Syph. 1,000c every night, the headache disappeared entirely in ten days and his mental faculties were fully restored. But in six weeks the whole eyebrow on that side broke out into a sickly, yellow, syphilitic eczema with a red, angry and oozing base extending under the arch to the lid, from canthus to canthus, up into forehead and down the side of the nose.

The cure of this was tedious; Wildes attributed it to his change of remedy instead of continuing with Syph. This man had syphilis a few years before.

In 1879 a woman, 26, extremely bright and intelligent, came to Wildes with a dreadful

Syphilinum ozaena. She also had a spinal curvature and congestion of right ovary. She had always been delicate.

Syph. cured the ozaena and improved her health, but it "drove out a saddle to which the Sepia saddle is but a shadow." A furious inflammatory mass of syphilitic sores, scabs and eczema, red and angry with a fiery base extending from one malar prominence to the other, across nose up to eyes and forehead. This took eighteen months to cure. The ozaena never returned.

A boy, age 4, had an obstinate rash, a combination of prurigo and herpes, on his chin, lips, cheekbone, forehead and hairy scalp, on arms, chest, back, bends of joints and on the joints and on fingers and hands, nowhere profuse. In spite of authorities to the contrary, Wildes maintained that syphilitic rashes may itch and that prurigo is infectious and is one of the initial stages of leprosy.

This boy had a spot of eruption on the left thigh the size of the top joint of a man's thumb. This was distinctly a leper spot. Syph. 1,000c caused the rash to come out strongly all over the body in patches, the face was one-third covered with a thick, yellow, scabby eruption. The remedy was continued and the boy got well, wonderfully improved in health, was no longer nervous, grew well, slept well, with good appetite.

A girl, 16, had measles a year before which did not come out properly. A year and a half prior she was subject to neuralgic headaches. She had been ailing about two years, very despondent, wanted to die, headaches growing more violent.

During the headaches, the temple veins stood out, had pains all over the body, was very irritable, restless, walked about much of the time, did not wish to be soothed, violent on being opposed, had tremors and seemed on the verge of convulsions, dazed, absentminded and almost insane. Always washed her hands. She was formerly constipated, but now subject to "a kind of diarrhea."

Menses never came on properly and for the past year had been very irregular, much delayed, scanty and always extremely painful. Often feverish. Anxious sleep, distressed and often wakeful and violently restless. The symptoms indicated Syph. and under this she steadily recovered.

A young woman contracted "leprosy-syphilis" from vaccination. She had a blood-boil on her arm that would not heal. Face broken out with a fiery rash. With Syph. 1,000c at bedtime she recovered rapidly. The arm healed quickly and her face became free from eruption.

A boy, 3, had a cluster of yellow blotches on his fingers and roots of nails, distorting the nails. The boy's father was epileptic. The boy was helped with Fl-ac. and cured with Syph., the nails became straight.

G. H. Carr related the case of an old man who had been troubled for two or three winters with an intense cold pain in both legs. It came on every night on lying down and lasted all night, the only relief was from getting up and walking.

Magnetic leggings had given the most relief. Syph. 1,000c, one dose daily, was given. He lost the pain for six weeks, when it returned in milder form. Syph. 100,000C was given and he had no more pains all the winter. The medicine, he said "made his genitals ache so that he couldn't sit still." This lasted over a month.

Syph. 100,000c cured a woman of "asthma" that she had for twenty-five years, the attack coming on only at night after lying down or during a thunderstorm.

Swan said he gave crying infants one dose of Syph. 100,000c, when they developed the propensity immediately after birth and did not cease, and it was difficult to make them cry after that.

Yingling reported the case of Rev. D., 30, who was dark and free from venereal disease. Haggard look. He had a constant dull, heavy ache above inner angle of right eye, very distressing with an occasional thrust as of an iron rod from the same spot through to lower part of occiput. This thrust was excruciating.

He was due to preach the next day, but the pain quite incapacitated him, which led him to appeal for help. Syph. 100,000c, one dose,

was given. He was free from pain before he reached home, and was perfectly well the next morning.

***SYZYGIUM AROMATICUM

(Clove Oil)

PHARMACY - eug-c. Syzygium aromaticum. Clove oil. Eugeniacyrophallata. **Historical dose:** Tincture and all potencies.

CLINICAL - Arthritis. Asthma. Bronchitis. Rheumatism. Sprains. Strains. **Toothache.**

HERBAL - The clove plant originated in the lowlands, valleys, and hillsides of the southern Philippine islands. The essential clove oil, the most popular clove product, is extracted from the flower of the clove.

Clove oil constituents include eugenol, eugenyl acetate, caryophyllene and iocaryophyllene.

Clove oil is used in connection with respiratory ailments such as asthma and bronchitis, muscle aches, sprains and strains, arthritis and rheumatism. Many individuals use clove oil for its analgesic effects for body pain.

Clove oil is considered by many to be an effective antibiotic, antiseptic, antiviral, analgesic, antioxidant, carminative, expectorant, antifungal, anti-parasitic, spasmodic, and stimulant.

***SYZYGIUM JAMBOLANUM

(Jambol Seeds)

PHARMACY - syzyg. Syzygiumjambolanum. Jambol seeds. Syzygium cumini. Eugenia jambolana. Jumbul. N. O. Myrtaceae. India. Trituration of the seeds. Tincture of the powdered fruit-stones. **Historical dose:** Tincture and all potencies.

CLINICAL - Diabetes. Glycosuria. Pimples. Prickly heat. Ulcers.

HERBAL - Syzygiumjambolanum is a native of India. It has an edible fruit, the powdered stones of which have a popular use in India as a remedy for diabetes. Syzyg. has an immediate effect of increasing the blood sugar, glycosuriaresults. The dose is five to ten grains of the powdered stones three times a day, also, the tincture.

HOMEOPATHIC - Syzyg. is a most useful remedy in diabetes mellitus. Dudgeon used Syzyg. in the lower homeopathic potencies with marked success, which has been repeated by many others.

Diminution and disappearance of sugar in the urine. Great thirst, weakness, emaciation. Very large amounts of urine, specific gravity high. **Prickly heat in upper part of the body**, small red pimples itch violently. Hansen mentioned "old ulcers of skin, probably of a diabetic foundation" as having been cured with Syzyg.

COMMENTS - Dudgeon related the case of a scientific man, 56, who complained of "prickly heat" all over upper part of body and arms. The skin was covered with small, red papules, which itched so intensely he could get no rest.

There was much thirst and great flow of urine, which he was obliged to pass every two hours, night and day, mouth very dry. Urine 1036, very saccharine.

Syzyg. tincture, mixed with three times the quantity of alcohol, was given of this two drops every three hours. The specific gravity of the urine steadily declined, sugar disappeared and all the symptoms passed off. This in spite of the fact that the dietetic rules were relaxed.

RELATIONS - Compare: (1) Insulin. - an aqueous solution of an active principle from pancreas which affects sugar metabolism. If administered at suitable intervals in diabetes mellitus, the blood sugar is maintained at a normal level and the urine remains free of sugar. Overdosage is followed by weakness and fatigue and tremulousness and profuse sweating.

***TABACUM FUMUS

(Tobacco Smoke)

PHARMACY - tab-fum. Tabacum fumus. Tobacco smoke. **Historical dose:** Tincture and all potencies.

CLINICAL - Allergies. Asthma. Bronchitis. Coughs. Lung, disorders. Tobacco, addiction.

HOMEOPATHIC - Tab-fiim. is made by blowing cigarette smoke into a bottle of water, which is then mixed and potentized. A homeopathic proving of Tab-fum. was done by Chachanidze. It has been used to reduce the cravings for smoking of cigarettes. Allergies to cigarette smoke, headaches and irritability from smell of tobacco. Asthma in cigarette smokers.

MIND - Concentration difficult during study. Anxiety, which comes from the heart. Anticipation as if something bad will happen. Irritability in the crowd, desire to escape. Dullness. Indifference to habitual deeds. Sensation as if one has a disease of throat (fixed idea).

Eyes - Burning, itching and lachrymation, worse in the right eye.

Face - Aching of the left upper jaw-bone in the morning after awaking, as if it is toothache. It is extending to the left eye- socket and left side of the nose bone, lasts whole day. Pain goes to the forehead and nose in the evening.

Head - Sensation of emptiness in the right half of the head with the nausea. Dull pain in the head. Headache, aggravation from the sun. Heaviness in the occiput, more in the left side, began in the morning awaking after. Heaviness of the whole head. Sensation as if head is bursting. As if all bones of the skull are aching, especially along the sutures. Nausea and emptiness in the head. Amelioration from the stool.

Lungs - Shortness of breath even after slight physical exertion, worse ascending stairs. Hoarseness, burning of throat and weakness of voice. Dry cough, as if would choke.

Mouth - Tickling. Heat in the mouth, as if hot air go out from mouth. Sensation that mouth is dirty. Desire to

clean teeth. Sensation of loosening of teeth with bitter saliva. Salivation. Pressure of parotid glands as if after sour lemon. Desire to make massage with tongue of gums. As if toothache in upper incisors. Ache in the root of the tooth of upper jaw-bone. Sensation as if teeth are unnecessary. Desire to rub gums and teeth. Pain like from little nail. Stretching pain in the right submaxillary region. Sensation of swelling of the inner cheek. Little white ulcer on inner cheek.

Nose - Sensation of smell of smoke. Stuffed-up nose, amelioration in open air. Discharge of mucus to the postnasal region.

Sensations - Sensation as if faint, as if body is like cotton wool.

Sleep - Drowsy from 7 to 8 p.m. Dreams of heavy shower, rain, flood, dirty water. Dreams of being dirty, desire to take a shower.

Stomach - Hunger, burning in stomach as if hot water is pouring, in the morning. **Increased** appetite with impatience. Hunger after eating. Desire chocolate.

Tongue - Sensation of coating at the root of the tongue. Tickling and itching of tongue. Pricking in tip of tongue. As if beating of electricity to the tip of tongue. Dryness, burning of tongue. Shooting pain in the root of tongue extending to the right Eustachian tube and to the right ear.

Throat - Sensation of coating at the throat and at the postnasal region. Numbness of posterior part of gullet and of throat and hoarseness. Sensation feel like tissues are hanging from the gullet. Sensation as if ulcers on gullet.

Vertigo - Sensation of vertigo, as if falling to the right. Vertigo with palpitations during walking.

REFERENCES - Chachanidze. Murphy.

***TABACUM NICOTIANA

(Tobacco)

PHARMACY - tab. *Tabacum nicotiana*. Tobacco. *Nicotiana tabacum*. N. O. Solanaceae. Tincture of the fresh leaves collected before the flowers are developed. **Historical dose:** Tincture and all potencies.

CLINICAL - **Amaurosis**. Anemia. Angina, pectoris. Anus, prolapse. Asthma. Backaches. Brain, anemia. Brain-fag. Catalepsy. Cholera. Cholera, infantum. Color-blindness. Constipation. Diarrhea. Epilepsy. Esophagus, stricture. **Fainting**. Freckles. **Giddiness**. Glands, enlarged. Heartbeats, disorders. Heartburn. Hernia. Hiccough. Idiocy. Itching. Legjerking. Lip, cancer. Lung, **disorders**. **Masturbation, effects**. Ménière's disease. Morning sickness. **Motion, sickness**. **Nausea**. Optic, neuritis. Pregnancy, disorders. Prostatorrhea. Rectum, paralysis. **Seasickness**. Speech, disorders. Strabismus. Strokes. Tetanus. Toothache. Varicocele. **Vertigo**. **Vomiting**.

HERBAL - When Columbus and his followers landed in Cuba in 1492, the practice of smoking tobacco was in common use among the natives throughout the island and also throughout the continent of America. On their return to Spain, the practice rapidly spread throughout the Peninsula.

Nicotiana tabacum received its specific name from Jean Nicot, the French ambassador to Portugal, who was the means of introducing the tobacco plant into France about 1560.

Sir Walter Raleigh and his companions introduced the practice into England in 1586. From that time, the cultivation, manufacture and use of tobacco, either by smoking, snuffing or chewing, rapidly became popular.

HOMEOPATHIC - Tab. has **nausea, giddiness, deathly sinking**, vomiting, icy coldness and sweat, with intermittent pulse. Complete prostration of the entire muscular system. Collapse. **Seasickness**.

Marked anti-septic qualities, antidotal to cholera germs. Cholera infantum, cold, but **wants abdomen uncovered**. Vigorous peristaltic activity. Diarrhea.

Produces high tension and arteriosclerosis of the coronary arteries. Angina pectoris with coronary sclerosis and high tension. Constriction of throat, chest, bladder and rectum. Pallor, breathlessness, hard cord-like pulse. Vagus, sympathetic, cerebro-spinal nerves and heart are prominently affected.

Complete prostration and relaxation of the entire muscular system with free secretions, vomiting, profuse sweat, lachrymation, salivation etc. Constriction of the muscles of hollow organs, throat, bladder, rectum, chest etc. Cramps, then paralysis of bowels, heart etc. Convulsions, head firmly drawn back. Jerking throughout the body. Trembling.

Pains are worse from heat. Excessive emaciation, especially of the muscles of back and cheeks. Gait slow and shuffling, unsteady, difficulty in ascending stairs. Faintness. Tetanus. Paralysis of sphincters. Slides in bed. Coughing causes hiccough, stitches in pit of stomach. Symptoms come in paroxysms, are periodical. Gastralgia, enteralgia.

MIND - Mental confusion and fatigue. Confusion from motion. Brain fag. Idiotic, epileptic idiocy. Slow perception. Forgetful. Indifferent. Desire for company in evening and at night.

Morose, sensation of extreme wretchedness. Feels wretched during menopause period and menses. **Feels**

very despondent. Discontented. Apathetic, indifferent. Sadness is better after complaining. Sadness with impeded respiration. Weeping ameliorates symptoms. Suicidal disposition but lacks courage. Nervous and restlessness. Anguish when walking in open air. Sudden anxiety, with angina pectoris or oppression of chest, driving him from place to place. Anxiety from thinking about it. Anxiety better after crying. Anxiety at night. Fear after eating food. Fear from noises. Cheerful, merry and talkative. Sings all day. Silly talk. Talks nonsense. Talks to himself. Delusions, preventing sleep. Feels as if someone were coming to arrest him or murder him. Doesn't recognize his relatives. Unconsciousness, as in a trance, better when cold water poured over head.

Abdomen - Coldness in abdomen. **Wants abdomen uncovered**, it lessens the nausea and vomiting. Sinking feeling in epigastrium with dreadful faint sense. Retraction of navel, abdominal muscles contracted. Violent burning in abdomen, extorting cries. Painful distentions. Intestinal obstruction. Incarcerated hernia. Strangulated hernia. Gurgling in bowels. Horrible colic, must shriek, with weakness. Colic during stool.

Back - Emaciation of the muscles of back. Pain in the small of back worse lying, better while walking. Heat down spine. Throbbing in sacral region. Red eruption on back. Pustules on nape and upper limbs. Violent pain, in lumbar region. Neck stiff. Neuralgia of neck, with tightness of throat. Head drawn back in convulsions.

Causations - Effects of sunstroke. Bee-sings and mosquito bites.

Chest - Angina pectoris. Tightness of chest, better inspiration. Violent constriction of chest. Oppression of the chest with anguish. Pain radiates from the center of sternum. Sticking under sternum with inability to take a deep breath. Nocturnal attacks of tightness across chest. Tuberculosis is said to make less rapid progress among tobacco workers.

Cough - Cough dry, teasing, must take a swallow of cold water (Caust., Phos.). Cough followed by hiccough. Cough and hiccough at the same time. Suffocative cough from irritation in throat and larynx, worse at night. Dry cough, cardiac in origin. Coughing causes stitches in pit of stomach.

Ears - Burning heat and redness of the ears. Hyperesthesia to music and loud talking. Hearing music causes pain in the ears. Ménière's disease with feeling of seasickness. Sensation as if ears were closed. Nerve deafness.

Eyes - Sunken eyes, blue around them. Heat and burning in eyes. Pupils dilated. Retina retains the image too long. Eyeballs injected, cornea covered with mucus, must wipe it off. Contraction of eyelids. Strabismus.

Face - Emaciation of face. Deathly pale, blue, pinched, sunken, collapsed, covered with cold sweat (Ars., Verat.). One cheek hot and glowing, other pale. Freckles. Miliary rash on cheeks. Violent tearing in facial bones and teeth, worse evening. Pain in maxillary joint, worse laughing. Spasms of the lower jaw.

Female - Retarded and profuse menses. Leucorrhea of serous fluid, worse after menses. During menopause and menses, subjective coldness, epigastric sinking, palpitation, slight diarrhea, muscular relaxation. Excessive sense of wretchedness during menopausal period and menses. **Morning sickness** of pregnancy, nausea and vomiting, patient dreads least movement. Severe itching of the whole body during pregnancy.

Food -. Thirstlessness. Great thirst, worse at night, in cholera infantum. Complete loss of appetite. Constant hunger, nausea if stomach is not satisfied. Incessant nausea, worse smell of tobacco smoke. Desires sweets, ice cream, salt. Immoderate smoking of cigars causes vertigo.

Head - Head drawn back in convulsions. **Sick headache with deathly nausea.** Periodical headache from fatigue or excitement. Headache better in the open air. **Headache with nausea and vertigo.** Tight feeling as from a band. Heaviness sensation with heat of head, better open air. Sensation as if head would burst, or as if brain were being bored out. Sudden pain as if struck by a hammer, worse while passing urine. Hair falls out. Secretion from eyes, nose and mouth increased.

Heart - Angina pectoris, pain in precordial region. Angina pectoris with nausea, cold sweat and collapse. Shooting pain from heart down left arm or up into neck. Pain radiates from center of sternum. Bradycardia. Tachycardia. **Acute dilatation** of heart caused by shock or violent physical exertion. Twisting about the heart. Unsteady heartbeat. Precordial oppression with palpitations and pain between shoulders. Violent beating of heart and carotids. Violent palpitations, worse lying on left side (Phos.). Palpitations due to tobacco. Pulse rapid and small. Pulse thready, intermittent, hard, cord like, imperceptible.

Kidneys - Kidney pain with cold sweat, deathly nausea. Kidney colic, violent pain along ureter, left side. Renal region sensitive to pressure. Paralysis of sphincters, urine dribbles. Enuresis. Urine increased, or scanty high-colored urine. Urine yellowish-red with increased secretion. Inflammation of the orifice of the urethra. Bedwetting.

Limbs - Formication. Feebleness of arms. Fingertips fuzzy. Cramps in single fingers, worse washing. Legs and hands icy cold, limbs tremble. Paralysis following a stroke (Plb.). Cramps in legs. Gait shuffling, unsteady. Can't walk with angina pectoris. Tremor and disabling weakness of feet.

Liver - Stitches in liver. Pressure in liver region as from a heavy body. Hepatic region sensitive to pressure.

Lungs - Difficult, violent constriction of chest. Dyspnea with tingling down left arm when lying on left side. Difficult breathing, worse ascending, with distress in heart and palpitations. Paroxysms of suffocation. Hurried, anxious, irregular breathing. Inability to take a deep breath, from sticking under sternum. Periodical attacks of asthma, sits up in bed, suffering with extreme dyspnea. Asthma with blueness of face and swelling of jugular veins.

Male - Frequent erections. Nocturnal emissions. Impotency. Genital organs flabby, no erections or little sexual desire. Masturbation and its consequences. Discharge of prostatic fluid. Hyperesthesia and neuralgia of penis. Varicocele.

Modalities - Better when uncovering abdomen. Better cold, open fresh air, cold applications. Better walking. Better weeping, vomiting. **Worse from motion of boat**, riding in cars. Worse extremes of heat and cold, being indoors. Worse stimulants. Worse motion, pressure. Worse in evening, rising up, opening eyes. Worse lying on left side, causes palpitations. Music causes pains in ears.

Mouth - Profuse salivation. Salivation with burning in mouth and throat, tickling, dryness, rawness. Spits much with other complaints. Frothing from the mouth. Mouth full of white tenacious mucus. Dryness of the mouth and tongue with violent thirst. Tongue feels swollen. Swelling of glands under tongue. Drawling, monotonous style of reading. Lips retracted. Lips cracked, swollen, covered with a brown crust. Speech difficult. Weak, interrupted speech.

Nose - Burning sensation and tingling in the nose. Paroxysms of sneezing. Secretion increased. Dryness and obstruction of nose. Nasal catarrh with crawling sensation in nostrils. Naso-pharyngitis and tracheitis.

Perspiration - **Cold sweats**. Sudden cold sweats with chill, angina pectoris, kidney colic etc. Perspiration at night. Cold, clammy sweats at night on hands, forehead and face.

Rectum - Habitual constipation. Constipation with rectum paralyzed, prolapsed. Rectal tenesmus. Involuntary stool, watery or thick curdled stools like sour milk. Sudden diarrhea, watery with nausea and vomiting, prostration and cold sweat. Cholera infantum, warmth of body with icy-cold hands. Watery diarrhea, urgent, painless in morning. Evacuations like cholera, with deathly faintness, cold skin, irregular pulse. Sudden, papescent, yellow-green or greenish, slimy stools.

Sensations - As if struck by a hammer on right side of head. As if a band around head. As if brains were being bored out. As if black dots filled visual field. As if ears were closed. As if a plug in esophagus. As if throat influenced by a hand. As if chest too tight. As if a crowbar were twisted around the heart. As if seasick. As if stomach were relaxed.

Skin - Skin swollen, yellow, hot and dry. Itching over the whole body, as from flea or insect bites. Eruption of itching pimples or vesicles with yellow serum and red areola. Red spots on face and on right shoulder, burning when touched. Violent itching of whole surface. Dark, color of skin. Vesicles containing yellow serum and surrounded by red areola. Cold skin in cholera, livid, with angina pectoris. Jaundice.

Sleep - Drowsiness, better in open air. Urgent inclination to sleep, especially after a meal and towards evening with frequent yawnings. Insomnia with dilated heart with cold, clammy skin and anxiety. Disturbed sleep at night with fright. Nightmares. Stupefying sleep at night.

Smell - Diminished power of smell. Sensitive to smell of wine. **Smell of tobacco, aggravates** (Ign.). Patient tormented by smell of tobacco.

Stomach - Coldness in stomach, with nausea. Shocks in stomach, at night while sleeping. Gastralgia, pain from cardiac end extending to left arm. Frequent fluttering sensation in pit, with heartburn. Acidity. Burning in stomach. Eructations, sour, hot, of small amounts of food, loud, noisy. Sense of relaxation of stomach with nausea (Ip.). **Terrible faint, sinking feeling in pit of stomach**. Incessant nausea, worse smell of tobacco smoke (Phos.). Deathly nausea and violent vomiting, worse least motion, better uncovering abdomen. **Seasickness, motion sickness**. Morning sickness. **Nausea during pregnancy, with much spitting**. Retching. Vomiting of fecal matter.

Temperature - Icy cold skin. **Chills with cold sweat**. Coldness and shivering, sometimes with chattering of teeth. Chilliness after eating and drinking. Heat down spine, of one cheek, internal. Body warm, with icy coldness of hands and legs.

Throat - Throat dry, can hardly swallow. Much viscid mucus in throat. Nasopharyngitis and tracheitis. **Hemming cough**. Morning cough, sometimes with vomiting. Hoarseness of public speakers. Violent constriction of throat in angina pectoris. Swallowing difficult on account of spasms of pharynx. Scraping in larynx causes frequent hawking and coughing. Laryngismus stridulus.

Vertigo - **Vertigo with seasickness**. Excessive vertigo, with copious cold sweat, worse opening eyes. **Vertigo on open**

ing eyes, in sick headache with deathly nausea, periodical. **Vertigo on rising or looking upward**. Vertigo with nausea, worse indoors, better open air. **Vertigo and fainting, loss of consciousness**. Vertigo followed by vomiting of food and tremulous weakness. Ménière's disease with feeling of seasickness.

Vision - Amaurosis. Muscae volitantes. Central scotoma. Retina retains image too long. Diplopia. Dim and confused, as if black dots filled visual field. Sudden loss of vision without lesion, followed by atrophy of optic nerve. Loss of sight on looking steadily at any white object. Strabismus. **COMMENTS** - M. E. Douglass, in the Homeopathic News of 1897, wrote about the "medicinal uses" of tobacco and it seems that it was regarded as a perfect panacea by the Virginians for diseases of men and cattle.

Douglass mentioned its palliative use for bee stings and mosquito bites. A portion of a leaf was moistened with vinegar and applied to the part. Ip., one of the antidotes of Tab., has a similar reputation. Strong tobaccojuice is the most effectual destroyer of the burrowing-flea, Chigoe.

Leaves of tobacco are moistened with vinegar or camphor solution and applied to the forehead and nape for headaches. The pain is allayed and sleep induced. The local application over the pit of the stomach relieves nausea.

Douglass used small doses of vinegar for the acute symptoms of nicotine poisoning, either chewing or smoking, with excellent results. Nothing, he said, relieves the sensation of constriction of the esophagus as quickly as vinegar. There is violent rectal tenesmus, paralysis, and prolapsed anus. The bladder sphincter is paralyzed, debility of urine, and bedwetting. Cholera.

The power of Tab. to paralyze sphincters and morbid constrictions accounts for its traditional use in cases of strangulated hernia and obstruction of the bowels. Kidney colic comes under the same heading. Impotency in males, prostate discharges (Calad.), and constant dribbling of the urine.

The same pair of opposites, relaxation and constriction are seen in the weakness, paralysis, and convulsions. All shades of nervous tremors, faintings, cramps, jerkings and restlessness. Tab. holds its place in society by its power of antidoting such conditions. Intermittent heartbeats and arrhythmias, especially in elderly people. Central nervous action that can lead to degeneration of nerve tissue, as seen in tobacco blindness. Amaurosis, optic nerve degeneration following blindness (Phos.). Tab. also produces a condition like brainfog, an inability to concentrate thoughts that may even go on to a state of idiocy. Silly talking in boys.

Profoundly influences nutrition, retards growth in children. Characteristic deathly, sinking nausea. It is no doubt by virtue of this, acting homeopathically, that Tab. enables persons who cannot have proper meals endure starvation better than they otherwise would.

Terrible faint, sinking feeling at pit of stomach. Pallor, coldness, icy cold surface, covered with cold sweat. Motion sickness (Cocc.). Morning sickness with cold sweats, sinking nausea and dizziness. Violent vomiting, as soon as he began to move, better on deck and in fresh air.

Keynote better by uncovering abdomen. Child wants abdomen uncovered, it helps the nausea and vomiting. There may be a coldness of the abdomen at the same time. Skin affections with itching.

Teste cured with it several cases of freckles, he repeated the remedy and gave it for weeks at a time : "A country girl had her face and hands covered with freckles, two-thirds of which disappeared completely [under Tab.] in summer, the season in which they are most frequent and obstinate."

Terry cured a case of seasickness, with heat along the spine from the nape down, cold sweat, then vomit. He also cured a case of Meniere's disease with a feeling as if seasick.

Boger cured, with Tab. 100,000c, a persistent backache, worse lying down, better walking, with a history of anginalike attacks.

Burnett noted that an infusion of tobacco is a popular German remedy for scrofulous glands. Cooper gives as an indication, "intermittent heart in old people."

C. W. was troubled with spasm of lower jaw, worse outdoors. No remedy worked until he remained one evening with two friends who were smoking and saturated himself with the smoke. That cured him. Slight subsequent returns were always removed by Tab.

J. W. Scott observed a case of epileptiform convulsions brought on by tobacco. For five months the patient had two attacks weekly and they grew worse in spite of treatment until the tobacco habit was discontinued.

RELATIONS - Antidote: Vinegar, sour apples. Camphor in the physiological antagonist. **Compare**: (1) Calad., Daph., Lob. and Plan. - cause aversion to tobacco. (2) Nicot. (3) Ars. - chewing tobacco. (4) Ign. - aversion to tobacco smoke. (5) Sep. - neuralgia and dyspepsia, Lyc. impotency. (6) Nux-v. - bad taste due to tobacco. (7) Phos. - tobacco heart, sexual weakness. (8) Hydrobr-ac., Camph., Verat., Ars.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

*****TABERNANTHE IBOGA**

(Iboga Bark)

PHARMACY - tab-ib. Tabernanthe iboga. Iboga bark. Black bugbane. Bitter grass. N. O. Apocynaceae. Bark and root. **Historical dose:** Tincture and all potencies.

CLINICAL - Addictions. Alcoholism. Delirium tremens. Drug, abuse. Fatigue. Heroin, habit. Tobacco, habit.

HERBAL - Tabernanthe iboga, also known as black bugbane, is a perennial rainforest shrub and hallucinogen, native to western Africa. Iboga stimulates the central nervous system when taken in small doses and induces visions in larger doses.

Ibogaine is the active chemical in the African root. It is a strong, long-lasting psychedelic used traditionally in a coming of age ritual, but also known for its modern use in treating heroin addiction.

Tabernanthe iboga

The drug's story as an anti-addictive began in 1962, when college dropout and heroin addict Howard Lotsof obtained a dose from a chemist friend. Iboga relieved him of all cravings for heroin.

In 1986, Lotsof began to supply ibogaine to a clinic for addicts in Holland. The clinic found that ibogaine works in three stages. First the addict has about four hours of waking dreams in which he seems to confront inner demons.

This is followed by an eight- to 10-hour "cognitive evaluation period," during which the user analyzes the waking dream. Then comes a sleepless day or two, which Lotsof calls the "residual stimulation phase."

Lotsof said ibogaine allows addicts, especially heroin users, to put aside their fears of withdrawal and begin the process of detoxification.

One methadone patient said that in just four days he reached a state that normally would have taken him three months, but without the agony.

The heroin addiction therapy may last several days and upon completion the subject is generally no longer physically dependent. Research suggests that ibogaine may also help to treat addictions to alcohol and nicotine.

Ibogaine breaks down in the liver into a metabolite called nor-ibogaine. This metabolite has been shown in clinical research to prevent cravings for several weeks after a single dose in some individuals.

Others have observed Iboga having some undesirable side effects regarding blood pressure and heartbeat.

COMMENTS - The Iboga was brought back from Gabon in 1864 by Dr. Griffon du Bel- lay, a navy surgeon. He wrote, "The root of this plant is the part that the Gabonese eat. They say that it is inebriating, aphrodisiac, and, with it, they claim that they feel no need for sleep."

However, as early as 1885, Father Henri Neu had written in a manuscript entitled "Le Gabon" (Neu 1885), "The natives use an infusion of iboga root scrapings as a potent philter that enables one to discover hidden

Tabernanthe iboga things and to tell the future. The one who drinks it falls into a deep sleep during which he is obsessed by uninterrupted dreams which, until the time that he awakens, he takes to be actual events."

*****TAMARINDUS INDICA**

(Tamarind)

PHARMACY - tama. Tamarindus indica. Tamarind. N.O. Leguminosae. Tamari- caceae. Africa. India. Tincture of the fruit. **Historical dose:** Tincture and all potencies.

CLINICAL - Acidity. Asthma. Boils. Constipation. Rheumatism. Spleen, disorders. **Tobacco, habit.**

HERBAL - People in India use tamarind as a souring agent like vinegar. It is used in common preparations like chutneys. It is also eaten as a fruit by those who have a craving for sour things. Tamarind flavored beverages are popular in Italy and Latin America.

Patients suffering from rheumatic problems are said to be aggravated from tamarind.

MIND - Indifference, apathy. Indolence. Lethargy, no desire to work, even if it is important and requires immediate attention. Mental dullness, sluggishness. Difficulty thinking and comprehending. Forgetfulness.

Restlessness, nervousness. Starting easily. Fear of his own shadow. Fear of passing stool, on account of pain. Irritability from trifles. Tolerance in persons normally easily annoyed and irritated. Quiet disposition. Involuntary sighing. Weeping, tearful mood. Dreams of talking to deceased grandfather.

Back - Pain in one spot under right scapula, worse lying on back.

Eyes - Lachrymation, especially in left eye.

Food - Increase thirst. Desires ice-cold water, cold drinks, ice cream, tamarind, sour foods, spicy foods.

Craves tobacco. Worse from spicy foods and tobacco.

Head - Heaviness of head.

Modalities - Better drinking cold water, worse from spicy foods and tobacco. Worse morning. Worse from the sun. **Mouth** - Dryness of mouth, lips and throat.

Stringy saliva.

Nose - Obstruction of nose.

Rectum - Ineffectual urging with unsatisfactory stools. Constipation. Rectal pain worse passing stools, walking, sitting, squatting.

COMMENTS - Vakil stated, "People consuming tobacco in any form, chewing or smoking, are especially affected. Tamarindus may be useful to give up the habit of tobacco chewing or smoking. Provers addicted to tobacco developed some unbearable symptoms of tobacco, e.g. vertigo. One prover who had stopped smoking one year back, developed increased desire for smoking again and now he is not able to give it up."

Joseph Miller, in Potter's Cyclopaedia, wrote about Tamarindus, "They are accounted specific for all disorders of the Spleen, as being believed to lessen it much; nay they used to drink out of cups made of this wood to cure those illnesses."

RELATIONS - Compare: Phos., Ph-ac., Mangi, Sulph.

REFERENCES - Murphy. Vakil.

***TAMUS COMMUNIS

(Ladies Seal)

PHARMACY - tarn. Tamus communis. Ladies seal. Black bryony. Black bryonia. Blackeye root. Tamus crética. N. O. Dioscoreaceae. Tincture of fresh root. Tincture of the berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Broken, bones. Bruises. Chilblains. Splinters.

HERBAL - The Greeks used the young suckers like asparagus, which they resemble.

Tamus is a popular remedy for removing discoloration caused by bruises. The fresh root is scraped and the pulp rubbed into parts affected by gout, rheumatism, or paralysis. It is also reputed as a diuretic. The fruits steeped in gin are a popular remedy for chilblains. The tincture also has a reputation for curing chilblains when applied externally.

The root-plaster of Tamus has been used to removed scars and deformities and it softens harden tissues (Thiosin.). It draws forth splinters and heals broken bones, dissolves congealed blood. If laid on hip or knuckles or any other part where there is great pain, it takes away the pain speedily.

COMMENTS - Gerarde reported, "The root is very great and thick oftentimes as big as a man's leg, black without and very clammy or slimy within, which having been scraped with a knife, it seems to be a matter fit to be spread upon cloth or leather in manner of a plaster of sear-cloth."

Dioscorides, according to Gerarde, said the fruit or berries take away sun-burns and other blemishes of the skin, and Gerarde added that these, "very quickly waste and consume away black and blue marks that come of bruises and dry beatings: which thing also the roots perform being laid upon them."

Joseph Miller stated, "A cataplasm of the root with vinegar and cow-dung, helps the gout" and he added significantly, "It is but rarely used."

***TANACETUM VULGARE

(Tansy)

PHARMACY - tanac. Tanacetum vulgare. Tansy. Chrysanthemum vulgare. N. O. Compositae. Tincture of the fresh plant in flower. Potencies of the oil. **Historical dose:** Tincture and all potencies.

CLINICAL - Abortion. Abscess. Amenorrhea. Chorea. Convulsions. **Dysentery.** Dysmenorrhea. Epilepsy. Eyes, inflamed. Eyes, sclerotica. Hallucinations. Hydrophobia. Labia, abscess. Menorrhagia. Paralysis. Poison ivy. Strabismus. **Worms.**

HERBAL - The word "tansy" is derived from immortality with its deep-yellow button-like flowers, a close companion of the Ragwort (Senecio jacobea). In olden times puddings were made containing tansy leaves and these puddings were called "tansies" also.

Gerarde also said that the seeds kill and **expel worms** of every sort, the root is good in gout, and being drunk with wine relieves pain in the bladder and dysuria when a man is only able to urinate by drops.

HOMEOPATHIC - Hale noted it for amenorrhea, dysmenorrhea, menorrhagia, uterine cramps and metritis. In one instance it caused a large abscess of the labia majora. Hale said acryalline acid identical with Santonin has been isolated from it.

Abnormal lassitude, a nervous and tired feeling. "Half dead, half alive feeling" all over. It is of use in chorea and reflex spasms due to worms. Tanac. is said to be a specific against effects of poison ivy.

Tanac. induces all the cardinal features of rabies, including abundant salivation, excitability, tendency to bite. Hoarse cry. Hallucinations. Diminished sensibility and mobility, momentary paralysis. Frothy, bloody mucus in the air passages. Convulsions, without loss of consciousness. Opisthotonos. Spasms of pharynx, larynx and

the thorax.

MIND - Mental fatigue, nausea and vertigo, worse in a closed room. Inability to think coherently. Confusion of thought. Dullness of all the senses. Fatigue of the mind after the least exertion. Ambitious. Wants to stand on his head, stretches and draws up his feet, and says, "it does me good."

Sadness, with desire to be let entirely alone. Irritable, sensitive to noise. Irritable and lazy. Very nervous and low spirited, annoyed by trifles; noise of the children almost unbearable. Extremely sensitive to noise. Coma and violent convulsions.

Abdomen - Dull pains in the right hypochondrium, sharp in left. Sharp, sticking pains in whole umbilical region.

Back - Severe attack of lumbago. Constant dull ache in loins.

Ears - Stitches in internal ear. **Ears seem to close up suddenly.** Roaring, ringing in ears. Her own voice sounds strange in her ears.

Eyes - Eyes open, very brilliant, pupils equal, widely dilated, immovable. Pupils contracted. Sclerotic congested, dark purple, glassy-looking. Dull aching in eyeballs. Slight inward squint, right eye. Lids agglutinated in morning.

Face - Features seemed fixed, giving an expression of deep solemnity. Face dusky, flushed, cheeks bright red. Fullness of head and face.

Female - Menses suppressed, later, profuse. Dysmenorrhea with bearing-down pains, tenderness, drawing in groins. Miscarriage in the early months of pregnancy.

Head - Weariness in head. Heavy, dull, confused. Dull, frontal headache with cutting in temples. Headache with least exertion.

Heart - Feeble heart-action and all signs of impending dissolution. Pulse increased in force and frequency, feeble.

Kidneys - Constant desire. First suppression, then profuse flow. Marked diuresis, must rise in night to urinate. Urine is very fetid, high-colored increased. Urine caused slight scalding.

Limbs - Numbness and sensation as though arms and legs were suddenly swelling. Prickling, coming and going, over limbs and along spine with flashes of heat. Cold numbness over limbs, going on to paralysis.

Lungs - Breathing laborious. Hurried, stertorous respiration. Frothy mucus obstructs the air-passages.

Modalities - Worse at night, at 4 a.m. Suddenness is a characteristic of a number of the symptoms.

Mouth - Flat insipid taste. Tongue white coated, feels rough. Mouth, blood-stained, frothy.

Nose - Profuse secretion of mucus in nose with fluent coryza. Dryness of nostrils.

Rectum - Pain in bowels, relieved by stool. **Dysentery.** Desire for stool immediately after eating.

Sensations - As if something closed the ears very suddenly. His own voice sounds strange in his ears. Sensation like a thrill all through body. As though arms and legs suddenly swollen.

Stomach - Thirst. Drawing, cutting pains in epigastrium. Faint and sick at stomach. Constant belchings, tasting of the oil. Belchings of sour air at night. Nausea and vomiting.

Temperature - Surface cool and moist.

Cold, clammy sweat. Feeling of warmth diffused over whole abdomen.

Throat - Roughness of throat. Feeling in throat as if one could cough all the time. Unable to swallow.

COMMENTS - Like Senec., Tanac. has an action on the female generative organs and a large proportion of the observations with it have been on women who have taken it to procure abortion. Other effects are from its use as a vermifuge, and in addition to these are provings by Burt and others.

In Russia, Tanac. has a reputation as a remedy for hydrophobia. M. Peyraud even used Tanac. as a substitute for Pasteurian "vaccinations," and reported success.

W. H. Pierson observed a woman who took two drachms of the oil to procure abortion. The attempt failed, but throughout her pregnancy she suffered from mixed tonic and clonic convulsions. Frothing at the mouth, clenched hands, thumbs turned in, followed by exhaustion and a short coma. Since then, Pierson treated every case of epilepsy which came to him with drop doses of the fluid extract of Tanac. four times a day, with marked success.

RELATIONS - Compare: (1) In uterine symptoms, Sabin., Tereb., Hedeo., Ruta. (2) In convulsions, Stram., Cic., Cupr. (3) Worm symptoms, convulsions, paralysis, Sant., Cina, Chen-a. (4) Abscess on labium majus, Stry., abscess of scrotum. **Follows well:** Cimic., Cina, Absin., Nux-v.

REFERENCES - Boericke. Clarke. Hale.

***TANGHINIA VENENIFERA

PHARMACY - tang. Tanghinia venenifera. N. O. Apocynaceae. Trituration of the seed. **Historical dose:** All potencies.

CLINICAL - Anxiety. Debility. Delirium. Numbness. Paralysis. Stupor. Vomiting. Weakness.

HERBAL - Tanghinia, the Tanghin or Tanquen of Madagascar is the only representative of its genus of Apocynaceae. The fruit of the tree is ellipsoid, between two and three inches long, having a smooth, purplish skin tinged with green, containing a hard stone surrounded by

Tanghinia venenifera a thick fibrous flesh.

HOMEOPATHIC - Intense and distressing vomiting, accompanied by anxiety and weakness. Great debility and anxiety with the vomiting. General weakness. Numbness, over whole body, especially of the hands. Staggers if attempts to walk, is unable to support his own weight and falls down helpless and paralyzed. Complete paralysis. Death, preceded by spasmodic movements of fingers and toes.

MIND - Anxiety, with the vomiting. Stupor. Lies as if asleep and when roused answers like a drowsy man and then relapses into former condition. Delirium.

Limbs - Hands numb. Spasmodic movements of the fingers and toes.

Mouth - Numbness, tingling in mouth and fauces.

Rectum - Purging and urination.

Stomach - Vomiting intense, distressing and repeated, first of contents of stomach, then of bile and mucus.

Vertigo - Giddy, staggers.

COMMENTS - The seed has been used as an "ordeal" test for those thought to have committed a crime. The seed is pounded and a small piece is swallowed by the person to be tried. Those in whom it causes vomiting escape punishment. Those whose stomachs retain it are thought to have been proven guilty, and are quickly killed.

***TANNICUM ACIDUM

(Tannic Acid)

PHARMACY - tann-ac. Tannicum acidum. Tannic acid. Tanninum. There are two forms of tannic acid, Gallo-tannic acid, derived from nut-galls. Also querc-tannic acid, derived from healthy leaves and bark of the oak. The former is the most used. Trituration. Solution in rectified spirit. One-half percent solution. **Historical dose:** All potencies.

CLINICAL - Colic. Conjunctivitis. Constipation. Hematuria. Ileus. Nosebleed. Ophthalmia. Palpitations. Vomiting. Weakness.

HOMEOPATHIC - Tannin, or tannic acid, of which gallic acid is a derivative, has produced effects on healthy persons and on those taking it for diarrhea. Mostly used locally against excessive secretion of mucus membranes to contract tissue and check hemorrhage.

Leathery dryness of mouth and intestinal canal, a condition like ileus and a very aggravated state of constipation. Obstinate constipation. Typhoid fever and dysentery. Intestines can be felt like cylindrical enlargements. Pain in abdomen, sensitive to pressure. Diabetes. Hematuria. Ulcerated tissues. Fetor of the perspiration. Weakness. Chronic nervous coughs.

Abdomen - Abdomen is sensitive to pressure but not distended. Irritable bowel. Intestines could be felt like cylindrical enlargements through walls of abdomen. Ileus. Colic. Ulceration of bowels. Hemorrhage.

Eyes - Acute and chronic conjunctivitis. Granular lids and vascular cornea. Chemosis and pannus. Ophthalmia. Purulent ophthalmia of infants.

Female - Sore breasts and nipples. Uterine bleeding. Syphilitic ulceration of the cervix.

Food - Loss of appetite. Thirst.

Heart - Palpitations.

Kidneys - Dysuria. Urine scanty, darkcolored. Albuminuria. Hematuria.

Lungs - Tuberculosis. Bronchial catarrh. Nervous coughs. Whooping cough.

Mouth - Leathery dryness of mucus membrane of mouth and intestinal canal. Hemorrhage and sponginess of the gums. Mercurial salivation. Toothache.

Nose - Nosebleeds. Chronic catarrh and coryza.

Rectum - Obstinate constipation. Chronic diarrhea. Painless and bloody discharge from bowels. Foul stools. Prolapsed rectum. Hemorrhoids.

Skin - Ulcers with copious discharges.

Stomach - Painful sensation in epigastric region and abdomen. Violent pains in stomach. Dyspepsia. Obstinate vomiting of bilious substances.

Tongue - Tongue white, dry.

RELATIONS - Compare: (1) Querc., Gall-ac., Op., Plb.

REFERENCES - Boericke. Clarke.

***TARAXACUM OFFICINALE

(Dandelion)

PHARMACY - tarax. Taraxacum officinale. Dandelion. Leontodum taraxacum. Taraxacum dens-leonis. N. O. Compositae. The tincture from the whole plant when in flower. **Historical dose:** Tincture and all potencies.

CLINICAL - Ague. **Bilious.** Cancerous, conditions. Debility. Diabetes. Flatulence. **Gallstones. Headaches.** Hepatitis. Jaundice. **Liver, disorders.** Liver, weakness. Neuralgias. **Night, sweats.** Rheumatism. **Tongue, mapped.** Typhoid fever.

HERBAL - Taraxacum's chief traditional uses are as a remedy for jaundice, liver obstruction in dysentery, involuntary emissions and in difficulties in passing water.

The young leaves of the dandelion are sometimes eaten in salads. They have a bitter chicory like taste, as does the root. Children may eat the flowers, although they are supposed to cause bedwetting.

HOMEOPATHIC - The first provings were done by Hahnemann and his pupils. Hahnemann's provings brought out the leading symptoms "painless urging to urinate," and "frequent urging to urinate with copious discharge of urine."

Hahnemann pointed out that the urging to urinate with thirst may indicate Tarax. in some cases of diabetes. Hahnemann's dosage was a single drop of the tincture.

Langhammer noted the "**mapped tongue.**" The tongue is coated white and clears off in patches, leaving dark red, very sensitive spots.

Affinity for the liver and bladder. A **bilious** remedy. Pains in both splenic and liver regions. Heaviness in the liver region. Gastric headaches, bilious attacks with mapped tongue and jaundiced skin. Jaundice with enlarged, indurated liver. Disorders of the liver, sour taste, darting pains in outer parts. **Hysterical tympanites.** Flatulence. Cancer of bladder.

Hands and nose cold at 8 p.m. **Cold fingertips.** Feeling of sickness and exhaustion, inclined to sit or lie down. Muscular pains with shuddering and muscular prickling. Stitching pains. Affections in left upper side, right lower side, back of foot, sole of foot. Almost all symptoms appear while the patient is seated and are dissipated by walking.

MIND - Depressive, morose, sad condition. Memory weak. Apathy, lack of reactions. Dislike for labor, but after beginning works well. **Impatient and irritable.** Anxiety while sitting. Restlessness on waking. Irrresolution. Constant muttering to himself. Inclined to talk, laugh and be merry. Loquacity during perspiration. Unconsciousness.

Abdomen - Stinging abdominal pains. Sharp stitches in left side. Grumbling and movements in abdomen. Sensation of bubbles bursting in bowels. Hysterical tympanites. Pinching in abdomen. Pressive shootings in abdomen and sides of abdomen, in left side of the hypogastrium.

Back - Tearing pain from ear down to neck. **Sternomastoid muscle** very painful to touch. Pressive jerkings and shootings in muscles of neck, throat and nape. Pressive and tensive shootings in back and loins, when lying down with obstructed respiration. Pressing, stinging in spine and sacrum with dyspnea. Vibration and quivering in right scapula.

Chest - Pressure at chest. Shootings in chest and sides of chest. Jerkings in muscles.

Ears - Shootings in ears. Drawing pain in external ear. Stinging, rending pains in the ears.

Eyes - Pain in eyes, as if a grain of sand were in internal canthus. Burning and stinging pains in the eyes. Inflammation of eyes. Lachrymation and photophobia. Nocturnal agglutination of lids. Aversion to light.

Face - Hot and red face. Sensation of heat and redness in face. Shootings and pressure in cheeks. Upper lip **cracked. Pusale** in right corner of lips. Purulent pimples on face, cheeks, alae nasi and lips.

Female - Suppressed menses.

Food - Loss of appetite. **Food tastes sour.** Salt or acid taste of food. Butter and meat taste salty. Bitter taste after eating. Tobacco smoke is very disagreeable, causes heartburn and interrupts respiration. Great **Taraxacum officinale** chilliness after drinking creating. No thirst during fever. Thirst during sweat.

Head - Heavy and numbing headache. Stinging pains in the head and face. Neuralgic headaches. **Headaches due to liver disturbances.** Headaches, as from contraction or expansion of brain. Violent headache, felt only when standing or walking. Sensation of great heat in vertex. Drawing pain in left temple while sitting, ceasing when walking or standing. Tearing pain in occiput. Lancinations in forehead and temples. Tension of scalp.

Kidneys - Bladder weakness. **Frequent desire to urinate** with copious urine. Urination with painless urging. Bedwetting during sleep.

Limbs - Muscular pains with shuddering and prickling in the muscles. Restless limbs. Limbs painful, tenderness of all limbs when touched. Tearing pains in limbs. Dull, joint pains. **Fingertips cold.** Pressive pains in loins. Heaviness of the legs, ameliorated by walking. **Neuralgia of knee,** better pressure. Jerking pain in calf (right) better on touch. Toes burning.

Liver - Pain in the region of liver and spleen. Liver enlarged and indurated. Sensation of heaviness in the liver region. **Deficiency of the liver.** Liver weakness. Chronic cholecystitis. **Gallstones.** Jaundice. Hepatitis with jaundice.

Lungs - Cough after eating.

Male - Pain in testes. Permanent erections. Frequent pollutions, on alternate nights.

Modalities - Better from touch. Better moving, walking, open air. Burning in throat is better by drinking. Worse while lying down, resting, at night. Worse from fat food.

Mouth - **Sour, bitter taste.** Acid saliva in mouth. Salivation with sensation as if **larynx was pressed shut** **Biller laste**, rising from pharynx into mouth. Smarting, burning and rawness in mouth and fauces. Accumulation of sour water in mouth. Tough, ropy, sour-tasting saliva.

Nose - Cold nose. Nosebleeds.

Perspiration - Very debilitating perspiration, causing biting on the skin. Sweat on falling asleep. **Profuse night sweats**, mostly before midnight, when just going to sleep.

Rectum - Stools white. Inefficient urging to go to stool. Evacuations often, but accomplished with difficulty, even if stool is soft. Feces of the consistence of pap, followed by tenesmus. Bilious diarrhea. Constipation following an abundant expulsion of feces. Voluptuous itching in perineum.

Sensations - As if brain was constricted. As if teeth were set on edge. As if larynx were compressed. As if bubbles were forming and bursting in abdomen. As of rolling and gurgling in right scapula. As if limbs were bound or powerless.

Skin - Stinging on skin. Unhealthy, pimply, sycotic skin. Eruptions over body and limbs, itching severely and appears to be a mixture of lichen and urticaria. **Profuse night sweats**, biting in skin with sweat.

Sleep - Irresistible drowsiness after meals. Sleepiness in daytime and yawning while sitting. Sleepiness and going to sleep while listening to a scientific discourse. Vivid, unremembered dreams, frequent waking and tossing.

Stomach - Gastric bilious attacks. Bitter taste, risings, belchings and hiccough. Empty belching after drinking. Nausea, as after an excess of greasy food. Nausea with inclination to vomit or vomiting from very fat food, with anxiety and pressive headache, better in open air. Nausea, with headache, anxiety, after fat food.

Teeth - Toothache with drawing pain in carious teeth, extending to eyebrows. Pressive pains in teeth. Teeth set on edge as from acids. Flow of acid blood from decayed teeth. Blunt teeth. Hawking up of sour mucus, causing teeth to feel dull.

Temperature - Chill in open air. Chilliness after eating and drinking. Chilliness, shiverings, all over with pressive headache. **Fingertips cold.** Heat at night on waking, especially on face and hands. Heat without thirst, in face **or toes.**

Throat - Hawking up of acid mucus. Sore throat with pressive pain, as from internal swelling. Dryness, shootings and bitter mucus in the throat. Burning in throat from smoking, better drinking.

Tongue - **Tongue, coated, mapped.** Tongue covered with a white film. Tongue feels raw, comes off in patches, leaving **red. sensitive spots.** Tongue dry, loaded with a brown coating on waking in morning.

Vertigo - Vertigo with giddiness and staggering when walking in the open air. Vertigo with unsteady gait, falls to either side.

COMMENTS - The Treasury of Botany noted that "the bright-yellow flowers of Taraxacum open in the morning between 5 a.m. and 6 a.m. and close in the evening between 8 p.m. and 9 p.m. Hence this was one of the plants selected by Linneus to form his floral clock."

Cooper noted the case of an old Indian officer who, when in India, suffered from gallstones and was advised to take dandelion infusion every day. He did so and soon the symptoms left him and he remained free from them for over twenty years.

Gastric and bilious attacks, especially gastric headaches. The headaches are: generally pressive. Pains in both splenic and liver regions. Jaundice with enlarged, indurated liver.

Pressure in lower occiput after lying down. Debility, loss of appetite, profuse night sweats, especially when convalescing from bilious or typhoid fever. Restlessness of limbs in typhoid. Sweat between toes.

RELATIONS - Compare: (1) In gastric and bilious affections, Card-m., Bry., Chel., Hydr., Lyc., Nux-v. (2) Mapped tongue, Ars., Nat-m., Merc., Ran-s. (3) Restlessness of limbs with tearing pains, Rhus-t. (4) Chel.-Tongue dry, yellowish with red edges, retains the imprint of the teeth. Epigastric pain, spreading to the lower corner of the right shoulder blade. Pressing sensation in the hepatic region. (5) Bry. - Dryness of the mucus membranes, acute, stinging pains, aggravated by movement. Intense thirst, stubborn constipation. (6) Nux-v. - Impatient, sleepy after meals, sensation of a weight in the stomach, constipation with empty urging.

Compatible: Ars. - Night-sweats.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

*****TARENTULA CUBENSIS**

(Cuban Tarentula)

PHARMACY - tarent-c. Tarentula cubensis. Cuban tarantula. Mygale cubensis. Aranea peluda. N. O. Araneidae. Tincture of whole decomposed spider. Tincture of whole spider. **Historical dose:** All potencies.

CLINICAL-Atasses. Anthrax. Bites, insect. Boils. **Bubonic plague.** **Carbuncles.** Chills. Chorea. Convulsions. Delirium. Diarrhea. Diphtheria. Felon. Fever. Gangrene. Headaches. Intermittent, **fever. Itching.** Meningitis. Paralysis. Pruritus, vulvae. Scirrhus. **Senile, ulcers.**

HOMEOPATHIC - Tarent-c. affects the cellular tissues. It is useful in septic conditions, when incubation is slow, but further progress is rapid with alarming prostration, atrocious burning or sharp stinging pains, board like **hardness of affected part** and copious sweat.

Intermittent septic chills. Severe types of inflammation and pain. Purplish hue and burning, stinging pains. **Itching, especially about genitals.** Diphtheria with intense fever and numb aching pains.

Various forms of malignant suppuration. Gangrene. **Bluish abscesses, painful.** Felon. **Carbuncles.** Bubo. **Bubonic plague,** as a curative and preventive remedy especially during the period of invasion.

Early and persistent prostration. Restless feet. Paralysis then convulsions. Tarent-c. is a **remedy for the pain of death, soothes the last agony.**

MIND - Nervous restlessness. Sensitive to others. Anxiety. Excessive hyperesthesia. **Hysteria.** Lacks emotional control. Delirium due to pains. Agony of pains, compels the patient to walk on the floor for nights. Keeps hands busy, picks fingers.

Back - Itches across kidney region. **Female** - Pruritus vulvae.

Head - Dull ache on top of head. Fullness in head. Headaches. Shooting pain through left eye across frontal region. Meningitis.

Kidneys - Retention of urine. Urine hot, thick. Cannot hold urine on coughing.

Limbs - Hands tremble, turgid with blood. Fidgety feet. Unsteady gait.

Lungs - Spasmodic difficulty of breathing. Shattering cough, whooping cough.

Modalities - Better from tobacco smoking. Worse from cold drinks. Worse exertion. Worse at night.

Rectum - Diarrhea.

Skin - Feels puffed all over. Pungent burning, stinging pains. Red spots and pimples. Purple discoloration. **Carbuncles.** Abscesses, where pain and inflammation predominate. **"Senile ulcers."** **Gangrene.** Anthrax. Scirrhus of breasts.

Sleep - Drowsiness. Sleep restless, prevented by harsh cough.

Stomach - Feels hard, sore. Loss of appetite, except for breakfast. Tendency to vomit.

Temperature - Pungent heat of surface.

Vertigo - Dizziness after heat and hot perspiration.

COMMENTS - Hering stated "The Mygale Cubensis, which may be called the Cuban Tarentula, also found in South Carolina and Texas is a larger spider of a dark brown color, less poisonous and covered with more hairs than the Tarentula Hispanica."

Tarent-c. seems to be a toxemic remedy, acting directly on the blood, and is in this way an analogue of Crot-h., Apis, Ars., etc.

The bite is painless. The person is not sensible of it until next day. Then an inflamed pimple is found surrounded by a scarlet areola. From the pimple to some other part of the body a red erysipelatous line is seen, which marks the line followed by the spider over the skin after biting.

The pimple swells, the inflamed areola spreads, chills and fever set in with copious sweat and retention of urine, the pimple becomes a hard, large. Exceedingly painful abscess, ending by mortification of the tissues over it and having several small openings.

Discharging a thick, bloody matter containing pieces of tissue, fascia and tendons. The openings grow, run into one another, forming a large cavity. At this period the fever takes the intermittent type with evening exacerbations.

In two cases in delicate children, the bite proved fatal, but the majority recover in from three to six weeks.

A case of chorea in a girl of twelve was reported cured with Tarent-c. 6c. The movements were confined to the left side and occurred chiefly at night, when Tarent-c. was prescribed.

Dr. Burt related the case of Don M. B. Aet. 72, good constitution, with an abscess in the back of his neck, whose burning, excruciating pain had completely banished sleep for six or seven nights.

Fever, with great thirst and prostration. On examination, it was found to be anthrax, with all the accompanying train of symptoms. Burt gave Tarent-c., 6c one dose every two hours; after the second dose, the pain was

greatly relieved, and that very night the patient was able to sleep through the whole night. Under the use of this remedy, the patient recovered without using any other, except Sil. to aid cicatrization.

Carbuncle, even to sloughing with great prostration and diarrhea. Intermittent fever with evening exacerbation. Atrocious pains.

RELATIONS - Compare: (1) Ars., Pyrog., Crot-h., Echi., Anthr., Bell., Apis. (2) in intermittents, Aran-d. (3) Carbuncle, Anthr., Lach., Sil.

REFERENCES - Boericke. Clarke.

***TARENTULA HISPANICA

(Spanish Tarentula)

PHARMACY - tarent. Tarentula hispánica. Spanish tarantula. Wolf spider. Lycosa tarentula. Lycosa fasciiventris. N. O. Araneidae. Italy and Spain. Tincture of the whole spiders. **Historical dose:** All potencies.

CLINICAL - Angina, pectoris. Bites, spider. Boils. Callosities. Cancer. **Chorea.Coccyx**, pain. Cornea, opacity. Cystitis. Depression. Diabetes mellitus. Diphtheria. Dysmenorrhea. Dyspnea. Fibroids. Headaches. Hiccough. **Hysteria. Insanity.** Intermittent fevers. Kleptomania. Leucorrhea. Levitation. Locomotor, ataxia. Mania. Ménière's disease. Migraine. Multiple sclerosis. **Nervous, disorders.** Noma. Nosebleeds.

Numbness. Onanism. Ovaries, enlarged. Parkinson's disease. Photophobia. Phyma. Proctalgia. Pruritus, pudendi. **Pruritus, vulvae.** Quinsy. Septic, fever. Sexual, mania. Spinal, irritation. Spinal, sclerosis. **Suffocation.** Tonsillitis. Tumors. **Twitching.** Uterus, cancer. Uterus, neuralgia. Vertebrae, tumors. Vertigo. **Violent, pains.**

HOMEOPATHIC - The name tarantula covers a number of poisonous spiders, but in homeopathy, unless distinguished, it refers to Tarentula hispánica. Nunez instigated the proving and collected much outside information bearing on the action of the poison.

"Tarantella" is a dance named from the city of Tarentum. "Tarantism" is a dancing mania, set up in persons bitten by the tarantula or in those who imagine themselves bitten. The cure is music and dancing. These symptoms give a keynote indication to this remedy.

Affects the nerves, which are highly strung, producing remarkable **nervous symptoms, hysteria** with chlorosis, **chorea.** often reflexive from generative sphere. The heart, spine, respiration and right side are also prominently affected.

Extreme restlessness, fidgety, hurried, must keep in constant motion even though walking aggravates. **Music causes excitement.** Rolls on ground from side to side or strikes vehemently with his feet or rolls the head and rubs it to relieve her distress. Chorea with arm symptoms. Irregular movements. Can run better than walk.

Symptoms appear suddenly, with violence. Quivering, jerking, trembling, twitchings. **Violent pains,** neuralgias, as if thousands of needles were pricking. Joint pains. Headache with pain in uterus, throat with eye pains, face pain with stomach pain, pain in the ear with hiccough. Tickling, burning, scorching and numbness with pricking. Palliates the **death pains and agony of dying process.**

Nervous phenomena, dysmenorrhea, spinal irritability. Bladder tenesmus. **Constriction sensation.** Deep septic conditions, abscess, evacuates pus rapidly. Noma. Emaciation, as if the flesh fairly fell off the bones, worse in the face. Cancer, fibrous tumors. Hysterical epilepsy.

Intense sexual excitement, causing pain. Fornication. Diabetes mellitus with great prostration and pain as if whole body were bruised.

MIND - Adroit. Crafty, sly, cunning. Instability of intelligence. **Obstinacy.** Selfish and demanding. Very impatient and irritable with others. Hateful. **Destructive impulses.** Throws things away. Kleptomania. Desire to strike herself or others. Angry with despair. Discontented. Melancholy.

Intolerant to any criticism. Averse to company, but wants someone present. Ungrateful. Conceited and deceptive behavior. **Feigns fainting, insensibility.** When there are no observers, there is no hysteria, when attention is directed to her. she begins to twitch.

Suddenly changing moods, fancies or strength. **Lacks emotional control. Erratic. Impulsive.** Fits of nervous laughter then screaming. Moral depravity. **Restlessness and compelled to walk. Tormenting and intense behavior.** Anxious and full of fears.

Erratic moods. Sometimes a sweet cheerfulness and gaiety, **while at other times,** anger, irritability. Quarrelsome, excitable, exhilarated or sad. Self-indulgence. Hysterical emotions. Intense sexual excitements, lasciviousness. **Mania,** very excitable.

Sensitive to music. Dances up and down. Laughs, mocks, runs, dances, makes gestures and jokes. Cries and sings until hoarse or exhausted. Aversion to colors, black, red, yellow, green. Mental symptoms better in evening after eating. Refuses to eat.

Delirium, mania, shrieking, singing, erotic mania. Stupefaction. Indisposed to talk. Sensation of being small

(contrast to Aur., Plat., Stram.). Weeping, causeless, during sleep. Palliates the **agony and pains of the dying process**.

Abdomen - Violent burning in abdomen.

Burning in hypogastrium with great weight, interferes with walking. Hepatic region painful to touch. Pain in hepatic region, with nausea and vomiting, worse before paroxysm of malaria. Sharp pain in umbilical region.

Back - Painfully sensitive spine, touch excites pains in chest, heart etc. Coccy-

Tarentula hispánica godynia, better standing, worse slightest movement, touch. Tumors around vertebral column. Painfully sensitive spine.

Bladder - Bladder seems swollen and hard, during cystitis. Pains in region of bladder. Very painful, frequent urination, worse at night. Incontinence when coughing, laughing, or making any effort whatever. Urine foul, with sandy sediment.

Causations - Ill effects of unrequited love, bad news, scolding, punishment, falls, sepsis.

Chest - Panting with oppression of the chest. Sensations of oppression of chest when raising arms or lying on left side. Rheumatic pains in chest. Angina pectoris.

Constitutions - Suited to nervous, hysterical patients subject to chorea disorders; to persons of foxy, mischievous and destructive tendency. Suited to chorea disorders when whole body or right arm and left leg are involved.

Ears - Snapping, cracking in ears (right), with pain and hiccough. Noises, ringing as of bells, worse on waking in the morning. **Singing, like** a tea-kettle, in left ear.

Eyes - Itching of the eyes with thick tears. Stitching in eyes as sand or thorn. One pupil dilated, other contracted. Eyes are wide open spasmodically and staring. Photophobia. Squinting of eyes which remain open during epileptic attack.

Face - Acne in face since menopause. Fiery red, bloated. Expression of terror. Wrinkled. Pains in angles of lower jaw.

Female - Menses early. Profuse menstruation with frequent erotic spasms. Dysmenorrhea with very sensitive ovaries. Dysmenorrhea better during warm weather, when outdoors, worse during cold weather. **Pruritus vulvae** after menses. Leucorrhea alternating with bloody discharge. Leucorrhea of clear acrid, sticky lumps. Dry, hot raw, itching vulva and vagina, worse scratching. Great sexual desire. **Violent nymphomania**, worse sex. Sensation of motion in uterus like a fetus. Sensation of burning. Expulsion of gas from vagina. Strong bearing-down pelvic pains. Displacement of uterus. Neuralgia of uterus, with sadness and despair. Violent tearing pains in uterus. Fibroid tumors of uterus with bearingdown pains. Ovaries, sensitive to pressure. Cancer of cervix.

Food - Loss of appetite. **Refuses to eat**. Food tastes sour. Mental symptoms better evening, after eating. Craving for sand or raw food. Craving for raw food during pregnancy. Desires highly seasoned food, salty things. Desires ashes, cuttlefish, smoking. Aversion to meat, bread. Thirst for cold water. Thirst often and for large quantities.

Head - Intense pain, as if thousands of needles were pricking into brain. Heavy pain in temples, extending to face and neck with nausea and impatience. Violent crushing headaches. Migraine, can't open eyes, with tendency of head to incline backward. Fullness in head with throbbing carotids, better nosebleed. Burning heat in occiput with pricking and itching over whole body. Neuralgia in temples. Meningitis. Wants hair, brushed, pulled or head rubbed. As if cold water were poured on head and body.

Heart - Diseases of heart, worse by wetting hands in cold water. Angina pectoris. Palpitations, precordial anguish. Trembling and thumping of heart as from bad news or fright. Sensations as if heart twisted and turned around. Heart takes sudden jumps. Pulse, hard infrequent, irregular. Heart suddenly ceases to beat, patient fears to die. Heart as if squeezed or compressed.

Kidneys - Foul urine with sandy sediment. Incontinence on laughing, coughing etc. Diabetes mellitus. Polyuria with violent pains in lumbar region and paralysis of lower limbs.

Limbs - Multiple sclerosis with trembling. **Chorea movements. Twitching and jerking**. Extraordinary contractions and movements. Legs restless, impulse to walk. Can run better than walk. Numbness of legs. Weak legs, cannot plant them firmly, do not obey. Yawning with uneasiness of legs, must move them constantly. Festination. Kneeling difficult. Soles itching. Cold, moist feet and hands. Restless arms, keeps hands busy, picks fingers.

Lungs - **Attacks of suffocation**, with crying, screaming and restlessness, must have fresh air, worse coughing. Panting with oppression of the chest. Cough when expectorating, gagging, fatiguing. Cough worse after sex, noise, better smoking.

Male - Sensitive genitals. **Extreme sexual excitement**. Lasciviousness almost to insanity, worse sex. Prostatic ailments after masturbation. Seminal emission hot, bloody. Indolent tumors of testicles.

Modalities - Better open air, sun. Better bright colors. **Better from music.** Better pressure, rubbing affected parts. Better relaxation. Better warm water, sweating, smoking. Better riding in a carriage. Motion improves headache but aggravates uterine pains and pains in coccyx. Worse from rest, touch, contact, motion. Worse noises. Worse seeing others in trouble. Worse damp, cold, washing head or putting hands in cold water. Worse after menses. Worse at night, evening. Worse periodically, yearly, at the same hour. **Worse after sex:** sadness, difficult respiration, cough, and general weakness specifically increased by sexual excitement.

Mouth - Dry mouth and teeth. Tongue drawn backward, preventing speech. Pain in lower jaw, as if teeth would fall out. Grinding of teeth.

Nose - Catarrh, dryness, burning, sneezing and bleeding, worse right side. Nosebleed better throbbing carotids and fullness in head.

Perspiration - Profuse excoriating sweat. Copious perspiration, worse after excitement.

Rectum - Weakness of anal sphincter. Violent burning in abdomen and rectum. Burning pain with profuse, dark, fetid, bloody stools and violent urging. Severe constipation, not relieved by purgatives or enema. Constipation with involuntary passing of urine on coughing or any effort.

Sensations - As if thousands of needles were pricking into brain. As of needles sticking into muscle of neck when touched. As of insects creeping and crawling. As if occiput were struck with a hammer. As of a hair in eye. As if lower teeth were going to fall out. As if heart turned and twisted around.

Skin - Purplish skin. Ecchymosed spots. Cold spots or as of a cold matter flowing or dropping on part. **Boils, burning and painful.** Carbuncle. Deep abscesses. Helps evacuation of pus. Dry eczema (Ars., Sulph.). Miliary eruptions and furuncles, with diabetes. Itching, as of insects creeping and crawling.

Sleep - Sleepless before midnight from excitement. Sad dreams, with weeping.

Stomach - Gastric symptoms, worse at onset of fever. Gastric disturbances, accompanied by pains in head, face, teeth etc. Bitter belchings, hysterical. Vomits all food eaten. Vomiting during pregnancy.

Stools - Stools oily, black offensive, worse by washing head. Very dark, fetid, partly formed stools, containing much mucus, expelled with difficulty. Stools followed by smarting and burning in anus, but no tenesmus.

Temperature - Alternate chill and heat. General heat with cold feet. Septic fever. Sweat profuse, excoriating. Intense chill all over before convulsions.

Throat - Tonsils greatly swollen, with offensive odor. Diphtheria both tonsils covered by a firm membrane, color of pearl.

Vertigo - Vertigo after breakfast, with bad taste in mouth. Vertigo when fixing sight on any object. Vertigo at night, when descending stairs. Vertigo before or following epileptic attack. Vertigo, worse carrying burden on head, then spasms.

Vision - Sees ghosts, faces, flashes. As if a cloud before left eye, before epileptiform fits.

COMMENTS - Clarke recorded two cases of poisoning. The first was the case of a girl, three months old, who was bitten by a tarantula. She appeared at first uneasy, then exhibited dyspnea and complained. Showed signs of suffocation, vomited. She was agitated and convulsed. Music was played, movements of the limbs were set up, resulting in a profuse sweat, followed by sleep and complete recovery.

Clarke also noted the case of Francis Mustek a peasant, who was bitten by a tarantula on the left hand about the middle of July as he was gathering corn. He went home with his companions but on the way fell as if struck by a stroke. Dyspnea followed and his face, hands and feet became dark. Knowing the remedy, his companions fetched musicians.

When the patient heard their playing he began to revive, to sigh, to move first his feet, then his hands and then the whole body. At last getting on his feet he took to dancing violently with sighing so labored that the bystanders were almost frightened.

At times he rolled himself on the ground and struck it vehemently with his feet. Two hours after the music began the blackness of his face and hands went off, he perspired freely and regained perfect health.

Every succeeding year at the same season the pain and attending symptoms returned, but less violently and they could always be averted by music. But if the imminent paroxysm was not averted in time, he was found by his friends struck down as at first and was restored in the same way.

Hysterical hyperesthesia. The least excitement irritates, followed by languid sadness. Great excitability of nerve endings. Fingertips are extremely sensitive. Sore and bruised feeling all over, worse moving about. Spinal irritation, slightest touch along spine causes spasmodic pain in chest and heart regions. Hypersensitive to the least touch.

Neuralgias, particularly in the head, "as if thousands of needles were pricking to the brain." Worse by noise touch, strong light. Better by rubbing head against pillow. Keynote better by rubbing. "Ends of nerves become so irritated. That some kind of friction is necessary in order to obtain relief."

Chorea (Ign., Staph.), most marked on right side. Characteristic unceasing movements, twitching, jerking, and

dancing. Restlessness, particularly in the lower limbs, with desire to cry. Must keep moving about though all symptoms are worse walking.

Farrington noted that "When there are no observers there is no hysteria, when attention is directed to her she begins to twitch," and "cunning attempts to feign paroxysms of wild dancing."

Mental symptoms in connection with sexual disorders. Sighing, yawning, laughing and crying. Joking and profound melancholy. Insanity. Better by music. Music at first excites then it subsequently relieves.

Dark red or purplish coloration and swelling of skin and tissue. Septic boils that turn really blue and painful. Spider bites in general (Hyper., Led.). Periodicity, deep action returning annually on the date of the bite.

Diphtheria tonsillitis, threatening suffocation. Apparent imminent choking. Cystitis. Septic and intermittent fevers. Constrictive headache with pain in uterus.

P. C. Majumdar reported the case of a woman, 18, who had oppression of the chest, with a suffocating sensation. She had continuous jerking and movement of her hands. Foam at mouth. Complete insensibility. Profuse and delaying menses. Very sleepy. Hysterical epilepsy was diagnosed. Ign. 30c did nothing. Tarent., 200c, brought her out of the fit and restored her completely in a few minutes.

C. M. Boger cured a case of irritative cough with Tarent. 30c. Mr. B., 41, was sore all over, throat felt dry. Coughed when lying down at night and in morning after rising. Dry with tearing pain in chest. Excited by pressure of phlegm in chest. Felt short of breath for at least an hour after each coughing attack. Only better from smoking. Bad taste in the evening. Three doses cured.

In Med. Ad., a case of hyperesthesia of the fingertips was mentioned. The patient, a woman, 33, could not dress herself without gloves. The irritation caused a sensation in the teeth as if set on edge by a strong acid. The pain was not in the fingers. Tarent, gave relief after Asar., Gels, and Sul-ac. had failed.

Farrington related a case of typhoid in a child cured by Tarent. The child rolled its head and bit its nightgown. Apis, and Agn. improved. Tarent, slightly aggravated at first, then rapidly improved.

RELATIONS - Tarent.'s action is similar to Ars. in many symptoms, therefore when Ars. seems indicated but fails, it is better to give Tarent. **Antidote to:** Lach. **Antidotes:** Puls., Mag-c., Mosch., Cupr., Chel., Gels., Bov., Carb-v. **Compare:** (1) Agar., Ars., Cupr., Mag. phos. (2) Kali-br. - Irritation of periphery of nerves better exercising and rubbing. (3) Chorea, Mygal.. Cimic., Agar., Stram. (4) Desire to jump, Stram., Croc., Nat-m., Stict., Asar., Agar., Hyos.. Cic. (5) Bores head in pillow, Bell. (Tarent, is more rubbing). (6) Croc. (7) As if occiput struck with a hammer, Naja. (8) Deep-in headache, Bac. (9) Extreme joy, Coff. (10) Unfortunate love, Ph-ac. (11) Ménière's disease, ague, Chin-s. (12) Sees faces, Sulph.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

***TARTARICUM ACIDUM

(Tartaric Acid)

PHARMACY - tart-ac. Tartaricum acidum. Tartaric acid. Trituration. Solution. **Historical dose:** All potencies.

CLINICAL - Convulsions. Debility. Gastritis. Heels, pain. Paralysis.

HOMEOPATHIC - Found in grapes, pineapple, sorrel and other fruits. Tart-ac. is an anti-scor- butic anti-septic, stimulating the mucus and salivary secretions.

Extreme weakness. In evening feels very tired, can scarcely drag himself along. General bruised sensation, especially of lower limbs. Convulsions just before death.

Abdomen - Pain around umbilicus and region of loins. Pinching below navel with emission of flatulence, cold feeling in abdomen.

Face - Face instantly became red as fire and having exclaimed that he was poisoned, became speechless, died on tenth day (drank 2 oz. in solution). Lips, turn brown and black on their inner edges. Constant dryness of lips, must moisten them continually. Burning of lips.

Food - Excessive, very urgent thirst.

Heart - Very weak action of the heart. Feeble pulse.

Limbs - Sharp pain in region of loins. Paralysis of thighs and legs. Tearing pains at soles, near the heel, which prevents him setting his foot on the ground after luncheon.

Lungs - Breathing accelerated, then laborious and slow.

Modalities - Better in open air. Pasty taste is better after eating.

Mouth - Teeth set on edge. Brown and dry tongue. Taste, pasty in morning, ceases on eating.

Rectum - Many stools during night. Stools like color of coffee grounds.

Sleep - Frequent yawning and stretching.

Stomach - Dyspepsia with copious secretion of mucus. Belchings. Nausea. Vomiting is repeated and almost continuous. Continued vomiting with burning in throat and stomach. Vomited deep green matter.

Temperature - General cold feeling, evening in bed.

Throat - Hoarseness and scraping in larynx. Burning sensation in throat and stomach as if on fire.

Vertigo - Confusion in head, dizziness.

COMMENTS - A proving by Nenning and some poisonings have furnished the pathogenesis of Tart-ac. One of the most marked symptoms was intense burning in throat and stomach, feeling "as if on fire." Tongue brown and dry. Almost constant vomiting, vomited matter of deep green color. Feces coffee-ground color. Dullness and lassitude. Paralytic debility. "Weakness in the evening, can scarcely drag himself along." Difficult respiration. Great weakness with diarrhea with dry and brown tongue. "Tearing pain on the soles of the feet, near the heel, which prevents him putting his foot on the ground after luncheon" (Phyt.).

***TAXOL

(Alkaloid of Pacific Yew Tree)

PHARMACY - taxol. Taxol. Alkaloid of Pacific Yew Tree, (Taxus brevifolia). Taxol is an anti-cancer chemotherapy drug. N. O. Taxaceae. **Historical dose:** All potencies.

CLINICAL - Allergic reactions. Anemia. Arthritis. Breast, cancer. **Cancer.** Chemotherapy, effects. Chills. Diarrhea. Dyspnea. Edema. **Fatigue.** Fever. Hair loss. Hypersensitivity. Hypotension. Hives. Kaposi's sarcoma. Liver problems. Lung, cancer. Lung, disorders. **Mouth, sores.** Nail, discoloration. Nausea. Ovarian, cancer. **Peripheral neuropathy.** Radiation, effects. Rheumatism. Stomach, disorders. Skin, disorders. Tumors. Ulcers. Vertigo. Vomiting. Weight, gain.

HERBAL - The Taxol compound belongs to a family of compounds called Taxanes that are unique to the Yew species. During the Taxol studies, several yew taxanes in addition to the Taxol taxane were found to exert anti-cancer properties. Other Pacific Yew taxanes (also called diterpenes) are known by various names such as baccatin 111, brevixin, brevifolin and cephalomannine, as well as variations of taxol compounds. Taxol is only one of hundreds of organic compounds in Taxus brevifolia.

Taxol was originally approved for use as a treatment for ovarian cancer, ongoing research was showing its efficacy in other arenas such as cancers of the lung, breast, bladder, prostate, testes, esophagus, head and neck, cervix, and endometrium. Also used to treat Kaposi's sarcoma and melanoma.

HOMEOPATHIC - The homeopathic indications for prescribing Taxol can be determined from the side effects of Taxol cancer therapy. Homeopathic potencies of Taxol maybe given to lessen the toxic side effects of the treatment.

The following Taxol side effects are common for patients taking Taxol: Low blood counts. White and red blood cells and platelets may become decreased. Hair loss. Pain in the joints and muscles. Peripheral neuropathy, numbness and tingling of the hands and feet. Nausea and vomiting. Diarrhea. Mouth sores. Hypersensitivity reaction with fever, facial flushing, chills, shortness of breath, or hives after Taxol is given.

The following are less common side effects for patients receiving Taxol: Swelling of the feet or ankles (edema). Liver problems. Low blood pressure. Darkening of the skin where previous radiation treatment has been given. Nail changes, discoloration of nail beds.

Fever, chills. Shortness of breath, wheezing, difficulty breathing, closing up of the throat, swelling of facial features, hives. Allergic reaction. Redness or pain at the site of injection. Nausea. Vomiting. Diarrhea. Unusual bleeding or bruising. Black or tarry stools. Blood in stools or urine

Extreme fatigue. Mouth sores, painful redness, swelling or ulcers. Yellowing of the skin or eyes. Swelling of the feet or ankles. Sudden weight gain. Signs of infection such as redness or swelling, pain on swallowing, coughing up mucus, or painful urination.

RELATIONS - Compare: Taxus brevifolia (Pacific Yew) belongs to the botanical family Taxaceae, which is a small family with one main genus - Taxus. Species include Taxus baccata (European Yew), Taxus cuspidata (Japanese Yew), Taxus globosa (Mexican Yew) and Taxus canadensis (Canadian Yew).

REFERENCES - Murphy.

***TAXUS BACCATA

(Yew Bark)

PHARMACY - tax. Taxus baccata. Yew bark. N. O. Coniferae. Tincture of the fresh young shoots. Tincture of the **bemes.** **Historical dose:** All potencies.

CLINICAL - Abscess. **Cancer.** Chemotherapy, effects. Ciliary, neuralgia. Collapse. Convulsions. Cystitis. Delirium. Digestion, quick. Dysuria. Ear, polyps. Eruptions. Fainting. Gout. Hair, loss. Headaches. Heart, disorders. Kidneys, disorders. Knees, abscess. Lachrymation. Nose, eruptions. Rheumatism. Purpura. Spermatorrhoea. Strangury. Stupor. Trembling. Uterine, tumors. Vision, dim.

HERBAL - The poisonous properties of the

yew have been recognized and disputed from ancient times. Gerarde said that in his school days he and his companions ate their fill of yew berries and slept not only under its shade, but on its branches without any ill effect, but there is plenty of evidence on the other side.

In the Med. Press, May 29, 1901, a patient of Mullingar Asylum died suddenly from eating the leaves. Some years ago a correspondence in the Times brought to light instances of the lethal effects of yew leaves on cattle. One correspondent, Mr. James Simmons of Haslemere, mentioned an observation made by himself and others, that yew leaves are more poisonous some time after they have been cut than when fresh.

"Yew cropped green from the tree has no fatal effect," and animals do not eat it fresh, they prefer grass, but if Yew has been cut and allowed to wither cattle will eat it in large quantities and in that state it is deadly poison." "My people," said Mr. Simmons, "once buried some Yew cuttings deep in the dung of a farmyard, a number of large hogs dug it up, ate it and all died."

HOMEOPATHIC - Tax. is for pustular diseases of skin and night-sweats. Gout and chronic rheumatism. Pains in the knees, elbows and back. Slight tremor over whole frame. Trembling. Convulsions. Fainting and collapse. Relaxation of muscles. **Cancer**, chemotherapy effects.

MIND - Impatience, which unfits the patient for mental application. Delirium. Stupor.

Abdomen - Tension in abdomen, as if the stomach were overloaded. Squeezing and tension across abdomen. Aching in umbilical region. Borborygmi.

Back - Drawing pain in muscles of neck (left). Constant pain in back. Sacral pains, which allow no rest either in a standing or sitting posture and which compel the *patient to remain in bed*. *Incisive pain in sacrum*. Pain in shoulder blade, which subsequently removes to loins.

Chest - Oppression, when stomach is either too full or too empty or else with pain below xiphoid cartilage. Sharp pain in left side. Chest full and hot. Lungs engorged.

Ears - Polyps in the ears.

Eyes - Pupils widely dilated. Drawing with lachrymation and pressure. Lachrymation of left eye. Itching of external angle of left eye. Burning itching in eyelids. Vision dim.

Head - Supra-orbital and temporal pain on right side with lachrymation.

Heart - Irregular action of heart. Pulse rapid, slow, feeble, small, wiry, almost imperceptible.

Face - Puffy and pale. Looks ill. Face livid, convulsed. Lips are purplish, livid, black brown, especially upper. Frothing at mouth.

Female - Uterine cancer and tumors.

Food - Violent hunger. Frequent want to eat with activity of digestive functions.

Kidneys - Cutting pain at base of kidneys which allows him neither to sit still nor stand up and even prevents turning in bed. Urinary tenesmus. Frequent want to urinate with difficult emission in a fine stream. Strangury, urine red.

Limbs - Numbness of limbs and paralysis after several sweats. Sharp, transient, wandering pains. Contusive and incisive pain, which hinders walking. Abscess at right knee. Violent pinching in left calf. Tingling crawling sensation in whole left foot. Lancinations in hand. Burning dryness of palms of hands. Dull pain in joints of fingers. Rheumatic pain in fingers.

Lungs - Violent and fatiguing cough. Short cough after every meal, excited by full inspirations with oppression.

Male - Flow of semen without erection or sexual pleasure for several successive nights. Great excitement during sex. After sex, weakness and great oppression.

Modalities - Worse by pressure, by application of liquids. Worse before and after each meal. Worse after sex. Coughing causes headache. Deep breathing causes cough. Rubbing improves the itching of eyelids.

Mouth - Sensation of coldness in teeth. Mouth dry. Burning pricking on tongue. Tongue excoriated, moist, tremulous. **Saliva hot**, acrid. Saliva increased, extremely viscid, acrid. Bitter taste like that

Taxus baccata of Cinchona.

Nose - A round spot of a reddish-brown color, on the end of the nose with desquamation of skin.

Rectum - Hard, difficult, dry evacuations. Occasionally a stool which is soft or of a natural consistence. Diarrhea with insupportable tenesmus and burning at every evacuation.

Skin - Large, flat, itching pustules. Badly smelling and offensive night-sweats. Peculiarly offensive sweat with eruption of vesicles. Podagra. Erysipelas. All hairy parts become denuded. Black jaundice. Skin red. Body covered with pustules. Miliary eruption. Eruption of large pimples. Dry tetter causing much itching.

Sleep - Sleeplessness during whole night, yawning without inclination to sleep.

Stomach - **Feeling of emptiness**, must eat frequently. Violent hunger, soon after breakfast with general uneasiness and weakness in region of stomach. Aching, burning and pinching in region of stomach. Pain in pit of stomach and region of navel. After eating, cough. Feeling of pins and needles at pit of stomach. Nausea

with accumulation of saliva. Retching. Vomiting ending in death. Vomit, tenacious, containing bile.

Temperature - Perspiration from least exertion with great prostration of strength. Profuse night-sweats. Commencing with shivering followed by dry heat of hands and feet. Offensive viscid sweats with itching and redness.

COMMENTS - The symptoms of the Tax. pathogenesis are made up of poisonings by leaves and berries and also of provings by Gastier. Fainting is a very prominent feature with Tax. And, in the fatal cases there are convulsions, collapse and syncope.

Death from yew poisoning, said Cooper, is remarkably painless. "Empty feeling" in the stomach was prominent and it was noted that the digestion was very rapid. "Must eat frequently." Gastric catarrh is set up with vomiting of tenacious mucus. Increased saliva, viscid. Pustular skin affection. Large, flat, strongly itching pustules. Viscid sweat. Shooting pains in the toes. Gout. Irritation in the kidneys and bladder. Disturbed heart. Tax. has been recommended as a substitute for Dig., being considered superior to the latter in having no cumulative effect.

On the suggestion of Cooper, Clarke once gave a single dose of Tax. tincture in a case of ear polyps (bright red) with catarrh in a youth with the result that the polyps shriveled up to one-third of its former size.

RELATIONS -Antidotedby: Staph - prostration with oppression after an embrace. **Compare:** (1) Ars., Bell., Nux-v., Colch., Dulc., Kali phos., Lyc. (2) The Coniferae. (3) Load at stomach, Abies-n. (4) Rapid digestion, Sulph. (5) Podagra, Urt-u.

RÉFÉRENCES - Boericke. Clarke.

***TELA ARANEA

(Cobweb)

PHARMACY - tela. Tela araneae. Cobweb. Araneae tela. Spider's web. Araneorum tela. N. O. Arachnida. The cobweb of the black spider found in barns, cellars, dark places. Tincture or trituration. **Historical dose:** Tincture and all potencies.

CLINICAL - Aphthae. Asthma. Chills. Chorea. Coryza. Coughs. Delirium. Eczema. Fatigue. Headaches. Hectic fevers. Hiccoughs. Hydrothorax. Insomnia. Intermittent fever. Leucorrhoea. Nervous, weakness. Numbness. Sleeplessness. Tuberculosis. Urticaria.

HOMEOPATHIC - The spider's web has been used as a remedy since ancient times. Tela, has been experimented with on healthy persons; it very rapidly lowers the frequency of the pulse rate.

In some it produced "a calm and delightful state of feeling, followed by a disposition to sleep. The most delicious tranquility, resembling the action of opium and followed by no bad effects."

Twenty grains given to an old and infirm asthmatic produced "slight but pleasant delirium." Muscular energy is increased, could not be kept in bed, but danced and jumped about the room all night.

In cases of febrile depression, deficient animation or indifference to surrounding objects, the exhibition of eight or ten grains of cobwebs was often followed by exhilaration, the eyes sparkled.

The countenance assumed a temporary life and, though the course of the disease might not be changed or the danger averted, more respite was obtained than is gotten from wine, opium or anything else within my knowledge.

"In spasmodic disorders of various kinds in asthma in periodic headaches in general restlessness and muscular irritability, its good effects are often signal. The cobweb gives sleep, but not by narcotic power, tranquility and sleep here appear to be the simple consequence of release from pain and irritation."

Tela, acts on arterial system. The pulse is full, strong, and compressible. Lowers pulse rate frequency. Cardiac sleeplessness increased muscular energy. Excitement and nervous agitation in febrile states.

Dry asthma, harassing coughs, periodic headaches with extreme nervous weakness. Obstinate intermittents. Masked periodical diseases, hectic, broken down patients. Symptoms come on suddenly with cool, clammy skin. Numbness of hands and legs when at rest. Continued chilliness.

MIND- Absent-mindedness. Mental dullness, brain as if enveloped in a fog. Makes mistakes in spelling, time. Disoriented feeling. Spaced-out feeling. Thoughts, disconnected. Prostration of mind. Tranquility and a sense of well-being.

Sadness, despondency, depression with heaviness of body. Pities herself. Sighing. Offended easily by jokes. Censorious, critical. Cursing. Irritability. Aversion to being touched. Kleptomania. Anxiety with chest constriction. Anxiety about health. Fear of disease. Fear of being bitten. Bites himself.

Abdomen - Distension. Sensation of full

ness, heaviness. Abdomen sensitive to clothing. Stabbing pain in left hypochondria. Spasms and twisting in the bowels

Back - Heat flushes. Heaviness sensation. Pain in dorsal region, left scapulae. Stabbing, sensation of a knife

in the back. Pulling sensation. Burning pain in cervical region. Stiffness in cervical region. Stiffness of spine. Desire to stretch, neck region. Sensation as if stretched backwards.

Chest - Anxiety with chest constriction. Heaviness feeling. Stabbing pain. Stinging pain in sternum. Wave sensation, behind sternum. Pain in axilla. Perspiration in right axilla. Hydrothorax.

Ears - Boring pains. Heaviness sensation in ears. Heat sensation. Noises while eating. Sounds seem far away.

Eyes - Dryness of eyes. Heaviness sensation. Aching pain, better cold application. Eye inflammation, better from cold. Discharges are green. Pains, burning and sore. Injected, inner canthus. Lachrymation, in the wind.

Face - Fullness, heat sensations. Numbness, heaviness of jaw. Heat flushes. Aphthae on lips. Twitching of lips. Facial paralysis.

Female - Leucorrhea, offensive smell. Sexual desire decreased or increased.

Food - Appetite increased. Desires beets, chocolate, ginger, ice, warm soup. Fruit aggravates.

Head - Headaches with flushes of heat. Boring and pressing pains. Tingling pains in scalp.

Heart - Anxiety with constriction. Cardiac sleeplessness. Piercing pain, heart, region. Pulsation in heart region. Pulse is full, strong, and compressible. Lowers pulse rate frequency.

Kidneys - Pain at close of urination.

Limbs - Awkwardness. Chilliness. Heaviness sensation in limbs, hip. Numbness. Aching pains. Stitching pain in knee, patella. Eczema in the hollow of the knee. Urticaria on the leg, calf. Heat with alternating cold in feet. Weakness of legs during stool. Sharp pain in shoulders. Trembling of hand, right.

Lungs - Difficult breathing with palpitations, stabbing pains. Dry, irritating coughs.

Male - Stitching pains in penis.

Modalities - Aversion to air, drafts. Cold, better applications. Better when it rains.

Mouth - Metallic taste. Aphthae on the tongue. Biting sensation on tongue. Itching inside cheek. Mucus on teeth.

Nose - Coryza, as if about to get a cold or flu, with anxiety. Coryza with fever. Nosebleed during exercise. Twitching of nose.

Perspiration - Clammy, offensive sweat. Perspiration of hands, feet. Perspiration with fever.

Sleep - Sleeplessness with heat in feet. Cardiac sleeplessness.

Skin - Clammy skin. Eczema. Urticaria.

Stomach - Appetite increased. Indigestion.

Hiccoughs. Vomiting, with spasms and twisting.

Temperature - Fever alternating with chills.

Obstinate intermittents. Perspiration with fever, shivering, at night. Hectic fevers.

Throat - Constriction of throat. Dryness, sore pain, on waking. Congested. Sensation of a lump. Unsteady speech and voice.

Vertigo - Vertigo after exertion, exercising.

Vision - Focusing difficult. Vision is blurred, worse after eating chocolate.

COMMENTS - Dr. Chapman wrote of Tela., "I have cured some obstinate intermittents, suspended the paroxysm of hectic fevers. Overcome morbid vigilance from excessive nervous mobility and quieted irritation of the system from other causes and particularly as connected with protracted coughs and other chronic pectoral disorders."

Dr. Gillespie of Edinburgh reported, "I cured an obstinate intermittent with cobweb after other means had failed."

Dr. Jackson wrote, "I think I may venture to say that it prevents the recurrence of febrile paroxysms more abruptly and more effectively, than quinine bark or arsenic or any other remedy employed for that purpose with which I am acquainted: that like all other remedies of the kind, it is only effectual as applied under a certain conditions of habit, but that the condition of susceptibility for cobweb is at the same time of more latitude than for any other of the known remedies."

"If the cobweb," said Dr. Jackson, "was given in the time of perfect intermission, the return of paroxysm was prevented, if given under the first symptoms of a commencing paroxysm, the symptoms were suppressed and the course of the paroxysm was so much interrupted that the disease, for the most part, lost its characteristic symptoms."

"If it was not given until the paroxysm was advanced in progress the symptoms of irritation, viz., tremors, startings spasms and delirium, if such existed as forms of febrile action, were usually reduced in violence, sometimes entirely removed. In this case sleep, calm and refreshing, usually followed the sudden and perfect removal of pain and irritation."

"Vomiting, spasms and twisting in the bowels, appearing as modes of febrile irritation, were also usually allayed

by it, there was no effect from it where the vomiting or pain was connected with real inflammation."

Jackson noted particular changes induced on the existing state of the system, and characterized it as powerfully stimulant base on its affects.

Where the pulses of the arteries were quick, irregular and irritated, they became calm, regular and slow after the cobweb had passed into the stomach. The effect was accompanied, for the most part, with perspiration and perfect relaxation of the surface.

When the pulses were slow, regular and nearly natural, they usually became frequent small, irregular, sometimes intermitting.

Languor and depression characterize the disease, sensation of warmth and comfort are diffused about the stomach and increased animation is conspicuous in the appearance of the eye and countenance.

Dr. Jackson likewise effected perfect cures with it in some troublesome spasmodic disorders and gave it with the most marked benefit in dry, irritating coughs, usually termed nervous. In the advanced stage of tuberculosis it procured a respite beyond his expectation.

He also found it useful in restraining a troublesome hiccough. Remembering the fame of Mygale avicularia in chorea, this other spider to be of use "in some troublesome spasmodic affections."

Dr. Thatcher cited the following case from a paper of Dr. Jackson's: "W. Sands has been afflicted for many years a distressing asthma, which has proved fatal to his father and two sisters. The complaint being hereditary and aggravated by malformation of the thorax, no remedy gave any permanent relief, nor did change of climate procure any alleviation of symptoms.

"For a considerable time back he has never been able to lie down in bed on account of a sense of suffocation, but is obliged to be supported half sitting by pillows and is seldom able to sleep.

"He swallowed nearly a scruple of the spider's web, he swallowed it at bed time and to his utter astonishment enjoyed sound and uninterrupted sleep all night, a blessing to which he had been an entire stranger above six years.

"Since he began with the cobweb thinks his health is improved, the cough has entirely abated, but whenever the remedy is omitted the complaint returns."

Dr. Oliver found that by the use of this remedy a patient laboring under organic disease of the heart and hydrothorax obtained great relief and refreshing sleep, who had not before slept for three nights.

Another, under similar affection, experienced uncommon relief from the same prescription. To one suffering much pain from cancer, it afforded ease and comfortable sleep.

A patient in tuberculosis pulmonalis being affected with distressing agitation of mind and nervous irritation, it answered like a charm and soon induced great sleep like a moderate dose of opium.

***TELLURIUM METALLICUM

(Tellurium Metal)

PHARMACY - tell. Tellurium metallicum. Tellurium metal. An element (Te, At. Wt. 125). Trituration of the precipitated element. **Historical dose:** All potencies.

CLINICAL - Axilla, sweat. Backache. **Barber's itch.** Boils. Cataract. Cholecystitis. Conjunctivitis. Coryza. **Coughs.** Eczema. Entropion. Eruptions. Eye, inflammation. Deafness. Emphysema. Foot, sweat. Gastritis. Gleet. Gonorrhea. Heartburn. Hepatitis. **Herniated, disks.** Herpes. Hoarseness. **Injuries.** Insomnia. Levitation. Mastoiditis. Migraines. Numbness. **Offensive, sweat.** Otitis. Pityriasis, versicolor. Post-nasal, catarrh. Psoriasis. **Ringworm.** Scarlet fever. **Sacro-iliac, pain.** Sciatica. **Spinal, irritation.** Threadworms. Vertigo. Worms. Yawning.

HOMEOPATHIC - Tellurium occurs in the native state and in combination with gold, silver, lead and antimony. It resembles sulphur and selenium in its chemical reactions. Tellurium is an element situated between antimony and iodine; it was discovered in a gold mineral by the Austrian Muller in 1782.

The proving was conducted by Hering in about 1850 on fourteen provers, using the low potencies. A new proving was established by Raeside in London. He conducted a proving on seventeen provers, eleven women and six men. The provers took the remedy night and morning for fourteen days. The potencies 6x and 6c produced the maximum symptoms.

The most notable feature of the provings was the irritation of the skin, including the skin of the eyelids and ears, of the spinal column and of some nerves. Dryness of the skin and mucus membranes. Herpes circinatus, **ringworm**, especially of the face and body. Vesicular, burning, itching eruptions. Itching, urticarial or macular eruption.

Offensive discharges. Chronic fetid suppuration from the ear. Persistent fetid body odor. Heavy perspiration from the feet, extremely foul-smelling.

Restlessness and pains all over body. **Very sensitive back.** Pain in the cervical, right lumbar and sciatic regions. Sacral and sciatic pains. Slight amnesia with frontal headache. Lassitude. Afraid, cannot bear to be touched on sensitive areas. Slow development of symptoms (Rad-br.).

MIND - Rough and angular disposition. Excitable, disposed to fly into a passion. Afraid of any movement and of anyone approaching them. **Fear of being touched in sensitive places.**

Lassitude. Quiet disposition. Absentminded. Neglectful and forgetful, when **engaged** in doing one thing, forgets and neglects others. Incapable of mental activity. Amnesia, inability to fix the memory on immediate events. Depressed. Depressive psychosis. Serene and cheerful, then impatient and irritable.

Abdomen - Fullness and oppression in hypogastrium, clothing must be loosened. Pressing first left, then right side, as from wind. When lying on left side, throbbing under right ribs, and vice versa. Pinching in abdomen. Frequent spasmodic pains in bowels as from incarcerated wind, mostly from 5 to 9 p.m.

Back - Weak feeling in back. **Vertebral pain from last cervical to fifth dorsal vertebra**, very sensitive to pressure and touch (Chin-s., Phos.). **Herniated disks** (Aesc, Agar.). Sensitive spinal column with **coughing, straining**. Pressing ache in scapula. Numbness in nape and occiput. Pain in sacrum. Neck pain, spreading to the shoulder and between the scapulae. Lumbar pain spreading to the right thigh, ameliorated by walking. Afraid of any movement and of anyone approaching.

Breasts - Cutting around and in left nipple, through to scapula. Eruption about nipple.

Causations - Falls, injuries. Eating rice causes vomiting. Eating and drinking improves sore throat.

Chest - Pain in the sternum, aggravated by deep breaths and by bending. Pressure in middle of chest under sternum, better in open air. Shooting in left chest, fifth rib. Feeling as if some fluid is pressing downward in, from right lung.

Ears - Catarrh of middle ear. Chronic suppurating otitis. Otitis after scarlet fever. **Fetid, irritating discharge, smells of brine** from the ear, especially the left ear. Chronic mastoiditis. Itching, swelling, throbbing in meatus. Dull, throbbing pain in ears, day and night, thin, watery, excoriating discharge. Ache in the left ear. Vesicular eruption on the eardrum, suppurating and perforating. Eczema behind ears with formation of thick crusts. Deafness. Buzzing, ringing in the ears.

Eyes - Pustular conjunctivitis, with eczema on lids and much purulent discharge from eyes. Deposit of chalky-looking white mass on anterior surface of lens. Cataract, following ocular lesions. Aids the absorption of infiltrations in iris and choroid. Herpes conjunctivae, phlyctenules near edge of cornea, worse from crying. The eyelids are **thickened and inflamed**, with pustules, pale red, edematous and oozing. Feeling as if lashes of lower lid were turned in.

Face - Heat in face. Sudden flushes of redness over face. Distortion and twitching in left facial muscles, left corner of mouth drawn up when talking. **Ringworm on face. Barber's itch.** Pimples on face. Burning in lips.

Female - Shooting deep in pelvis across to left. Premenstrual colic in lower abdomen. Menses painful and late. Menses too early in menopausal years. Long intervals between menses.

Food - Craving for apples, fatty bacon, salt, bread during the evening, cold drinks, beer. Hungry at night. After meals, great drowsiness. Vomits after eating rice.

Head - Feeling of heat in the head. Heaviness and fullness of head in morning. Pain in left side of head and in forehead above left eye. Periodic headaches. Migraines. Sudden rush of blood to head. Congestion to head and nape of neck, followed by weakness and faintness in stomach. Brain feels as if beaten on slightest movement. Violent linear pain in small spot over left eye. Itching of scalp, red spots. Numbness of nape and occiput.

Heart - Dull pain in region of heart **when** lying on left side, better lying on back. Heart irregular when lying on the back or right side. Palpitations with throbbing through whole body and full pulse, followed by sweat. Palpitation with sensation of thoracic constriction and pain. Rapid pulse rate.

Kidneys - Painful soreness in kidneys, extending downward like a weight, worse morning, making her irritable. Increased, high-colored, acid urine.

Limbs - Aching all over, mostly in limbs, worse right side and in walking. Sciatica, right side, worse lying on affected side. Sciatica with sensitiveness of vertebral column. Weakness of the legs in the morning. Bruised pain in hip joints after walking. **Contraction of tendons in bends of knees.** Sharp, quick pains in elbows, ankles and other parts. Fetid sweat on feet, mostly on toes. Fingertips feel dead on stretching hand. Rheumatism of right little finger, worse moving it.

Liver - Hepatitis and gastritis. Chronic cholecystitis.

Lungs - Coughing on laughing, worse aching in small of back. Wakened by cough. Cough towards morning, looser after a few days. Wheezing, scraping cough with mucus. Emphysema.

Male - Herpes on scrotum and perineum. Secondary gonorrhea. A drop of viscid fluid in meatus. Increased sexual desire, followed by long-lasting indifference. Erections all night.

Modalities - Better lying on back. Worse while at rest, at night, lying on painful side. Worse in morning, on waking. Worse cold weather. Worse coughing, laughter. **Worse from touch**, friction. Spine sensitive to touch. Eating causes drowsiness.

Mouth - Dryness of the lips and mouth with raw, irritated areas. Ulcerations on the gums tongue, mouth, palate. Gums bleed easily and profusely. Tongue somewhat swollen, furred white, shows print of teeth. **Breath has odor of garlic**. Copious saliva. Tenacious mucus runs from mouth. Taste earthy, metallic. Coldness of mouth and pharynx on drawing in air.

Nose - Hawks dried yellowish-red phlegm from posterior sinuses, salty tasting, in mornings. Coryza, lachrymation and hoarseness, better in open air (All-c.). Nose obstructed, must breathe through mouth. Head cold with running of a blood- streaked liquid accompanied by tears and hoarseness, ameliorated in the open air. Nostrils itch. Boils.

Perspiration - **Offensive foot-sweat**. Heavy perspiration from the feet, extremely foul-smelling. Offensive sweat of armpits, smelling of garlic. Sweat on face, on spots.

Rectum - Very offensive flatus. Spasmodic pains with urging to stool. Stools soft at first, then hard. Copious stool with feeling of flatulence in bowels. Costive. Itching anus, rectum and perineum after stool. Tetter on perineum, itching. Passes many threadworms with stool.

Sensations - As if in air on going to sleep. Brain as if beaten. As if lashes were turned in. As if air whistled through left Eustachian tube. As if strapped together in epigastric region. As if fluid wanted to discharge in lobe of right lung.

Skin - Skin dry, hot. Stinging in skin. Barber's itch. Herpetic spots, **ringworm** (Tub.), worse lower limbs, on single parts. **Ring-shape lesions**. Circular patches of eczema. Small red pimples, very bright red and very sharply defined with minute vesicles upon them. Psoriasis. Scrofulous eczematous eruption. Eczema, back of ears and occiput. Itching of hands and feet. Itching worse in cool air. Offensive odors from affected parts. **Fetid exhalations** (Sulph.).

Sleep - Drowsy after a meal. Yawning and belching. Insomnia with unpleasant dreams. Sleepless, restless turning from weariness and bruised feeling. At night, pains all over. On going to sleep, feels as if in air, quick drawing towards feet wakens him. Wakes with a start during the night.

Stomach - Empty and weak feeling. Sensation of weakness, like faintness in the stomach after local congestion of blood to head and nape, also with chest symptoms.

Heartburn with warmth in stomach as from alcohol. Belching with taste of food eaten. Fullness in pit of stomach, must lie down after dinner. Constrictive feeling in stomach as if strapped together.

Temperature - Inner shivering and fever, fetid, repulsive sweating, forcing him to be alone. Chilly with pains. Sweat on face, on spots, with increased itching of these places, often throbbing through whole body, generally warm, while sitting in a cool breeze. Skin hot and dry, sensation as if overstrained, as if bruised, as if he had taken cold after severe exertion.

Throat - Hoarseness in morning with fluent coryza, a rough, pressing, tickling sensation in larynx. In morning, hawks pieces of salty, yellowish-reddish phlegm. Painful dryness of fauces. Rough, scratching sensation in throat, worse towards evening. Throat feels sore with a prickly, rough sensation evening and morning. Throat sore on swallowing, better after eating or drinking. Pain in throat extends into ear.

Vertigo - Vertigo, when going to sleep, morning after rising. Vertigo worse walking, sitting up or turning head. Vertigo better lying perfectly quiet and still.

COMMENTS - Ringworm, herpes. Offensive, garlic-like odor of the body and sweat. Fishy odors and discharges (Hep., Sanie). Offensive foot sweats (Sil.). Vesicating effect on the skin, hair-roots, breasts, perineum and anus. Acrid discharge, blisters any part of the skin it touches.

Otorrhea. Discharge of the ear smells of fish brine. Nash cured several cases of postscarlatina otorrhea using Tell. 6c, higher potencies had failed. Eyelids are inflamed. Phlyctenular conjunctivitis. Itching in the rectum after stool. Threadworms.

Great sensitiveness to touch. Neuralgic hypersensitive state of the spine. Painful spots along the spinal cord (Agar.). Injuries to the spine and pelvic bones. Radiating pain down both thighs from an injury to the sacroiliac area. Pains are sharp and radiating, or electric-like. Contractures. Pressing pain in the scapula. Neuralgic symptoms, especially on the right side.

Sciatica. Sciatic pain deep in the leg, behind the knee. Herniated disks (Aesc, Agar.). Sacro-iliac problems with radiating pains (Aesc, Hyper.). Worse lying on the affected part, from touch, worse in C7 to T5 and in the Sacro-iliac joint.

Many of the pains and symptoms come and go suddenly. The ears are suddenly stopped. Sudden rushes of blood to the head. Drowsiness. Yawning after retching, drowsy after eating.

Clarke once gave Tell, to a child for an eruption and cured it incidentally of constant yawning with which it had

been troubled. The eruption improved at the same time.

Clarke also cured with Tell, an Indian officer home on furlough whose body was covered over with a ringworm-like eruption.

Kent had a case in which a boy, 4, slid down banisters and struck his head on a tiled floor. He became unconscious and a surgeon was summoned, who found him unconscious with a clear, watery discharge from the ear, which the surgeon pronounced to be cerebrospinal fluid.

This condition lasted three days and the case had been pronounced hopeless when Kent first saw the boy. Kent noticed that the discharge was acrid and reddened whatever part it came in contact with. One dose of Tell, was given. In two hours the child vomited, a sign of reaction, and in two weeks was well.

Shelton related three cases using Tell. The first concerned a widow, 50, who had pain and soreness in the upper part of her back for a long time. She shrank from the slightest touch on the part. The sensitiveness was so acute that, when touched, the pain extended into the occiput and all over the upper region of the back. Tell. 6c cured in eighteen days.

The second case concerned Miss X., 45, who had a fall, striking a severe blow on the sacrum. She suffered for some weeks from concussion with one point of great soreness in the sacral region, just above the spot where the blow was received. She was kept in bed for some weeks and improved generally, but the painful spot remained and sensitiveness

appeared over the back, especially its upper third. Tell. 6c cured all completely.

The third case concerned Miss Y., 29, who had severe spinal meningitis ten years before, and consulted Shelton for a burning, pressing pain at base of brain. He diagnosed the condition as meningitis. The patient grew worse and gradually ptosis, and then right and then left hemiplegia set in.

Finally hyperesthesia of the back became so distressing that it was a question of finding any support that did not intensify the pain. She could not bear the slightest touch, complaining that it not only hurt her at the point of contact, but that she felt it in the head and in remote parts of the body. Tell, cleared up the case.

RELATIONS - Antidoted by: Nux-v. (epigastric oppression). **Compare:** (1) Rad-br., Berb., Hyper., Sei. (2) Tet. - coccygodynia, ulceration of nails, pains in hands in small spots, ankles, heels and Achilles tendon, (3) Sep., Ars., Rhus-t. (4) Restlessness, garlicky odor, Ars. (5) Coryza, All-c. (6) Otitis, Puls., Bell., Ter. (7) Ringworm, Bac., Sep., Nairn. (8) Ringworm in clusters Sep., Calc. (9) Threadworms. Teucr. (10) Pains come and go suddenly, Bell., Lyc. (11) Worse laughing, Phos. (12) Worse straining at stool ind. (13) Cough and skin, Osm.

***TEPLITZ AQUA

(Teplitz Mineral Springs)

PHARMACY - tep. Teplitz aqua. Teplitz Mineral Springs of Teplitz in Bohemia. Teplitz aqua, contains: Natrum carbonicum, Natrum muriaticum, Natrum fluorica, Natrum sili- cata, Kali sulphuricum. Kali muriaticum, Calcareo carbónica, Silica, etc. Dilutions. **Historical dose:** Tincture and all potencies.

CLINICAL - Amenorrhea. Bones disorders. Breast, tumors. Eruptions. Erysipelas. Flatulence. Gout. Hemorrhoids. Irritability. Leucorrhea. Metrorrhagia. Nosebleed. Paralysis. Rheumatism. Sciatica. Scurvy. Speech, difficult. Spine, pains. Tongue, paralysis. Toothache. Ulcers. Vertigo.

HOMEOPATHIC - The waters of Teplitz are chiefly in repute for the treatment of gouty patients, especially those suffering from atonic gout. The springs are alkaline and hot, and the temperature forms a leading feature in their action.

The symptoms of Tep. are from Perutz, who experimented on himself and several healthy individuals, together with symptoms by Hromada. Symptoms of Nat-c. and Nat-m. appear throughout. Tearfulness, low spirits and irritability were noted and giddiness of much intensity. "Giddiness, when she walks all the houses seem to move too."

Modalities - Better by friction. Better drinking cold water. The symptoms are worse at night, especially bone pains. Worse from motion.

COMMENTS - On moving head it seems as if something fell from one side to the other. Cold feelings in upper arm in foot. Increased sensitiveness to cold. Paralysis of tongue of limbs.

Vesicles in mouth and on tongue. Vesicular erysipelas. Burning sensation in many parts. Burning in stomach, better drinking cold water. Hemorrhage, nosebleed, hemorrhoids with stool, metrorrhagia. Better from hemorrhoid bleeding.

RELATIONS - Compare: (1) Nat-c., Nat-m., Kali-s., Mang., Lith., Sil., Alum.

REFERENCES - Clarke.

***TEREBINTHINIAE OLEUM

(Oil of Turpentine)

PHARMACY - ter. Terebinthinae oleum. Oil of Turpentine. Turpentine. Oleum terebinthine. Pinaceae. The oil distilled from the oleo-resin (turpentine) obtained from various species of Pinus, purified by repeated rectification with water. Solution in rectified spirit. Ozonized oil of Turpentine (prepared by exposure of the common oil to sun and air in a half-filled bottle and shaking from time to **time**). **Historical dose:** All potencies.

CLINICAL - Albuminuria. Amblyopia. Ascites. Asthma. Backache. **Bladder, irritable.** Brachial neuralgia. Bronchitis. **Chilblains.** Chordee. Chorea. Ciliary neu

ralgia. Coma. **Cystitis.** Dentition. Dropsy. Dysentery. Dysmenorrhea. Enteric, fever. Epilepsy. Erysipelas. Erythema. Fibroma. Gallstone, colic. Glands, swelling. Gleet. Gonorrhea. Headaches. **Hematuria. Hemorrhage.** Hemorrhoids. Hernia. Herpes. Hypochondriasis. Injuries. Insanity. Intestines, ulceration. Iritis. Jaundice. **Kidneys, disorders. Lumbago. Nephritis.** Neuralgias. Ovaries, dropsy. Ovaries, pains. Peritonitis. Pityriasis. Purpura hemorrhagica. Rabies. Scabies. Scarletina. Sciatica. Spermatorrhea. **Strangury.** Stricture. Tetanus. Tympanites. **Uremia.** Urethritis. **Urine, retention.** Worms.

HOMEOPATHIC - Ter. was introduced to homeopathy by Hartlaub. The symptoms have been added to from poisonings and overdosings in allopathic practice. According to Dr. Taylor, children are particularly sensitive to its action. Illness caused by sleeping in newly painted rooms is due in great part to the turpentine.

Milnes noted that Ter., as an internal remedy, is "A stimulant and tonic to the mucus membranes, especially of the bladder and urethra: it proves useful in leucorrhea and gleet."

Selective affinity for the mucus membranes of **kidneys**, bladder, respiration, bronchi, heart and blood.

Bleeding mucus surfaces, oozing hemorrhage of a passive, black offensive fluid. Purpura hemorrhagica.

Marked tympanites and urinary symptoms. **Inflammation of kidneys** with dark, passive, fetid hemorrhages. Affections of kidneys with rheumatism. Goullon indicated it for Bright's disease preceded by dropsy.

Aching, soreness and stiffness of the muscles. Even minor bumps cause bruises. **Unbroken chilblains.** Burning in various parts, tip of tongue, epigastrium, small of back, kidney, uterus etc. Exhausted, sensitive and tired. Disturbed sense of equilibrium. Drowsiness and strangury. Coma.

MIND - Anxiety on going to bed. Confusion of mind, better when urinating freely. Tired and difficult concentration of thoughts. Intense irritability, children fly into temper during dentition. Muttering delirium. Hydrophobia.

Despondent during nervous headache. Fear of apoplexy during fullness and pressure in head. Loathing of life. Suicidal disposition, by hanging. Comatose, can be roused only by shaking out of apparent stupor, but falls immediately into it again. Unconsciousness after stool.

Abdomen - Bruised soreness. Dropsy, pelvic peritonitis. **Enormous distention.** Tympanites. Ascites. Flatulence. Enterocolitis, hemorrhage and ulceration of bowels. Bowels were drawn towards spine. Bleeding ulcers in the intestine.

Back - Backache and soreness in kidney disorders. **Burning pain in region of kidneys.** Drawing in right kidney, extending to hip.

Causations - Ill effects of alcohol, falls, strains, tooth extraction, damp cellars.

Chest - Burning and tightness across chest.

Constitutions - Suited to children, dentition, nosebleed, worms. Complaints of elderly people, people of sedentary habits. Chronic rheumatism and gouty complaints. Bleeders. Nervous women with headaches, amenorrhea and dysmenorrhea. Hydrogenoid.

Ears - Disturbed sense of equilibrium. Own voice sounds unnatural, humming as of a seashell. Loud talking is very painful. Otalgia. Sensation in ears as of striking of a clock.

Eyes - Opens eyes when swallowing in coma. Eyes dark red, face red on affected side. Intense pain in eye and side of head. Ciliary neuralgia over right eye. Amblyopia from alcohol.

Face - Pale, earthly, sunken. Hot flushes followed by sweat.

Female - Intense **burning in uterine region.**

Metritis and puerperal peritonitis. Metrorrhagia with burning in uterus. Uterine diseases after wearing pessaries.

Food - Hunger and thirst with debility. Diminished appetite, loss of appetite, great thirst. Desire to eat more after a satisfying meal. Aversion to animal food.

Head - Dull pain like from a band around the head (Carb-ac.).

Heart - Warmth in heart while sitting in evening, obliged to yawn a great deal. Frightful oppression in precordial region. Palpitations. Rapid, small, thready, intermittent pulse.

Kidneys - Nephritis after exanthemata with violent bronchitis. Burning, drawing pain in region of kidney, along ureters. Cystitis. Urethritis with painful excretions (Canth.). Bleeding bladder. Constant tenesmus. **Strangury**

with bloody urine. Scanty, suppressed urine, **odor of violets.** Urine, smoky with coffee grounds or thick, yellow, slimy, muddy sediment. Pains alternate between navel and bladder, better walking.

Limbs - Brachial or sub-scapular neuralgia. Intense pain along the larger nerves, worse damp weather. Stiff muscles. Hands feel swollen. Cramps in knees. Stands with feet apart, has no power of balancing the body. As if pitched forward while walking. Walks bent like an old man.

Lungs - Dyspnea. Difficult breathing, the lungs feel distended, hemoptysis. Bronchitis of children with drowsiness and retention of urine. Bronchial asthma or catarrh with profuse expectoration. Bloody expectoration.

Modalities - Better from motion, stooping. Better belching and passing flatus. Loose stool better nausea. Burning in anus better cold water. Worse from dampness, cold. Worse at night, 1 a.m. to 3 a.m. Worse walking in open air. Worse lying, sitting. Worse pressure, touch. Worse by pressure in region of bladder it causes convulsions. Worse lying on left side, better turning to right. Pain in crest of ilium worse from motion and least jar. Damp dwellings aggravates. Damp cellar causes diarrhea. Damp weather causes neuralgia in legs.

Mouth - Foul, cold breath. **Dry, red, sore, shining,** smooth and glossy tongue, burning in tips with prominent papillae (Arg-n., Bell., Kali-b., Nux-m.). Choking sensation in throat; Aphthae from mouth to anus. Dentition.

Nose - Discharge of serum without coryza. Cold in head with sore nostrils, with disposition to bleed. Passive nosebleed in children.

Perspiration - Suddenly checked sweat causes neuralgia. Suppressed foot sweat causes rheumatic iritis. Cold sweat on legs. Cold, clammy, all over with prostration. Profuse sweat on legs in evenings in bed.

Rectum - Pain before flatus with and relief after stool. Fainting after every stool. Diarrhea with watery, greenish, fetid stool. Diarrhea with tetanic spasms. Bloody stools. Hemorrhage from bowels. Worms, lumbrici.

Sensations - As of a band around head. As if sand thrown violently in eye. As of a seashell sounding in left ear. Sound in ear as of a clock striking. As from hasty swallowing in epigastrium. As if he had swallowed a bullet, which had lodged in stomach. As if he would pitch forward on walking.

Skin - General sensibility increased. Acne. Erythema, itching pustular, vesicular eruption, urticaria. Purpura hemorrhagica, advancing. Ecchymosis, dropsies. Scarlatina. Chilblains with excessive itching and pulsative pains. Aching soreness of the muscles.

Sleep - Drowsiness with urine retention. Lethargy. Retarded sleep. Agitated sleep at night with tossing and frequent waking. Many dreams, nightmares. Wakes frightened at night, looks ghastly and shrieks.

Stomach - Rancid, flatulent, acrid belchings. Burning in epigastric region. Nausea and vomiting with intense burning. Nausea, better loose stool. Aversion to meat.

Temperature - Heat under the skin. Heat with violent thirst, dry tongue, profuse cold, clammy sweat. Cold sweat on legs. Typhoid fever with tympanites, hemorrhages, stupor, delirium. Prostration.

Vertigo - Vertigo with vanishing of vision, nausea. Disturbed sense of equilibrium. Vertigo as if intoxicated, as if he would fall forward, when walking.

COMMENTS - Brunton noted that Ter., when

applied to the skin, acts as an irritant and rubefacient, causing vesicles and a sensation of burning if applied for any length of time. Inhaled, it causes sneezing, tightness across the eyes and dyspnea.

Given internally, it causes burning in the mouth and salivation in stomach, sensation of heat or cold, gastro-enteritis with vomiting and diarrhea, and ulceration of the intestines. The pulse is sometimes slowed, sometimes quickened.

Respiration is quickened and spasmodic, the chemical is partly excreted by the lungs and acts on the mucus membrane, lessening its secretion. The temperature sometimes rises, or falls. Voluntary movement is diminished, reflex action lowered, blood pressure lowered and vessels dilated.

Acute and chronic nephritis. Kidney infections. Protein or blood in the urine. Albuminuria and hematuria after scarlatina and also to the consequent dropsy. Effects of chemical inhalation of exposure, particularly if there is kidney damage.

Diminished quantity of urine. Urine has an odor of violets. Lumbar pain, burning in urethra, painful urination. Hematuria with smoky, turbid urine depositing a sediment like coffee-grounds. Dull pain or burning pain in region of kidneys. Burning during urination.

Brunton mentioned its usefulness in treating gallstone colic, given in ether in the proportion of one part of the oil of turpentine to three of ether. Homeopaths have confirmed the value of this treatment.

Characteristic burning. Burning in gums, tongue, tip of tongue, mouth, throat, stomach, rectum and anus, kidneys, bladder and urethra, uterus, air passages, and chest. Burning in the sternum, particularly after warm drinks, the pain running along the sternum with the drink and spreading in the chest. Burning extends from kidneys along ureters.

"Burning in uterus." Peritonitis, metritis, metrorrhagia with burning. Passive, dark and fetid hemorrhages.

Hemorrhages from any orifice. Purpura hemorrhagica with fresh ecchymoses in great numbers from day to day. Smooth, glossy, red tongue, as

Terebinthinae oleum if deprived of papillae.

Drowsiness. Drowsiness with capillary bronchitis, in child. Stupor and great weakness, particularly in cases of typhus, typhoid, and uremic poisoning. "Drowsy with retention of urine."

Excessive tympanites, with extreme sensitiveness to touch. Sensitivity of the hypogastrium and pains in symphysis pubis with cystitis. Urogenital and rectal troubles. Pains go from left to right across bowels and then shoot upward.

Sense of anxiety and utter prostration about epigastrium. Umbilical region feels as if covered with a round, cold plate. Sprained pains, contusive pains and rheumatic pains appear, notably pressure and drawing pains. Irritation of the meninges and often ascarides or other intestinal worms. Maniacal fury. Cooper found Ter. indicated in children (especially teething children) when they fly into passions.

Lippe observed that this irritability manifests itself in some cases of spasms and convulsions. He had a case of a woman who had made her feet sore by walking and applied turpentine to them. This was followed by a state like hydrophobia, she had spasms whenever she saw water, heard it poured, or saw a bright object and also whenever she attempted to urinate.

Cooper noted the case of a woman, 35, who, from being exposed to the odor of turpentine, got pain as from pinchings in the throat with lifeless feeling in the tongue and dryness of the mouth, followed by pain in her right eyeball, which extended back to the same side of occiput.

S. H. Roberts maintained that Ter. had a specific effect in tonsillitis when applied externally.

Marc Jousset gave Ter. lx with marked benefit in two cases of bronchial asthma. He was led to give it in the first case by coincident hematuria, but this was not present in the second.

A young man who was badly poisoned by a low potency of Phos. got more relief from Ter. 3x than from any other remedy.

Brunton argued that it is only ozonized Ter. that is effective in such cases. Dr. Hering says the ozonized oil is recommended as a prophylactic in malarial and African fevers, a few drops being given daily on a lump of sugar.

George Royal gave three cases illustrating the action of Ter. The first concerned a man, 24, with typhoid in the third week. He had extreme distention, with a rapid, small and compressible pulse. Cold sweat in lower limbs. Ter. 6x was given, two drops in water every half-hour. Oil of Ter. was applied locally to the abdomen, mixed with lard. Later in the evening, when there was already slight improvement, an injection containing turpentine was administered. This relieved the patient of a large quantity of flatus and he began to recover the next morning.

The second case concerned pyemia after miscarriage at the third month, brought on by the patient herself. Enormous distention, lower limbs covered with cold sweat, lochia thin, scanty offensive.

Ter. given in another case brought about slow improvement for three days, when Chin. 30c was indicated and finished the cure.

The third case from Royal concerned a teamster, 36, who had severe nephritis after being out in cold rain. He had a constant desire to urinate, severe pain in back, down ureter to bladder, urine scanty, very high-colored. Temperature 102. Pulse weak, 130. Ter. 6x was given every half-hour and hot fomentations on kidneys greatly relieved. After three days he was able to leave his bed.

Royal considered cold sweat of lower limbs and rapid pulse with the distention, as leading indications. A keynote of Burnett's for Ter. is "Pains in the bowels which causes frequent urination."

RELATIONS-Antidoted by: Phos. **Antidote to:** Phos., Merc. **Compare:** (1) Alumn., Sec., Canth., Nit-ac. (2) Terebe. lx - chronic bronchitis and winter coughs, sub-acute stages of inflammation of respiratory tract. Loosens secretion, relieves tightened feeling, makes expectoration easy. Neurotic coughs. Huskiness of public speakers and singers. (3) Cystitis when urine is alkaline and offensive. (4) Onon. - Diuretic. Chronic nephritis, diuretic effects like Juniper, calculus, nosebleed, worse washing face. **Followed well by:** Merc-c.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

*****TERMINALIA ARJUNA**

PHARMACY - term-a. Terminaba arjuna. N. O. Combretaceae. Bark. **Historical dose:** Tincture and all potencies.

CLINICAL - Angina pectoris. Boils. Contusions. Diarrhea. Dysentery. Ecchymosis. Fractures. Gonorrhea. Heart, diseases. Hemorrhages. Palpitations. Spermatorrhea. Tuberculosis. Ulcers. Wounds.

HERBAL - Terminaba arjuna is a large, deciduous tree measuring a height of 60 to 80 feet. Sanskrit writers found the bark to be a cardiac tonic. Bagbhata was the first to prescribe the bark in heart diseases.

The ayurvedic physicians of India have been using this herb independently or as one of the ingredients in all sorts of heart diseases with marked success for a long time. They use it in both functional and organic diseases of the heart. Angina pectoris, palpitations of the heart, pain in the heart, weakness of the heart.

Fractures. Pains all over the body owing to a fall. Ecchymosis. Hemorrhages. Spermatorrhea and gonorrhea. Charaka used it in hematemesis. He prescribed equal quantities of the bark, pulverized red sandalwood, sugar and rice water. Its leaves are also used for boils.

Sushruta used a decoction of the bark with equal quantity of white sandalwood in spermatorrhea. Harita found it useful in gonorrhea.

Bangasena has recommended it in chronic diarrhea and dysentery. Bagbhata recommended its decoction for suppression and retention of urine. He also recommended an ointment prepared of the bark and honey in acne.

Chakradatta found it useful in bloody

Terminalia arjuna dysentery and in cardiac affections. He also recommended it in fractures. Bhavaprakasha recommended it for tuberculosis of the lungs and for suppression and retention of urine.

COMMENTS - R. N. Khory in his Materia Medica of India, vol. II, wrote, "Astringent ad tonic given in heart disease. Locally used as a wash for wounds, ulcers, contusions and specially used in promoting union of fractures and dispersion of ecchymosis. Internally, largely used by the natives in hemorrhagic and other fluxes and as a lithontriptic."

REFERENCES – Ghose

*****TERMINALIA CHEBULA**

(Myrobalans)

PHARMACY - term-c. Terminalia chebula. Myrobalans. **Historical dose:** Tincture and all potencies.

CLINICAL - Catarrh. Colds. Colic. Constipation. Cough. Delirium tremens. Diarrhea. Dropsy. Dysentery. Elephantiasis. Glands, enlarged. Hemorrhages. Hemorrhoids. Hiccoughs. Jaundice. Rheumatism. Salivation. Scorpion, sting. Spleen, enlarged. Stomach, disorders. Typhoid fever. Vomiting. Whitlow.

HERBAL - R. N. Khory. Materia Medica of India, vol. II, p. 260, said, "Purgative, astringent and alternative. The ripe fruits are generally purgative and the unripe ones astringent and aperient."

Lt. Col. R. N. Chopra, I. M.S., wrote in his book Indigenous Drugs of India, p. 532, "It is astringent, laxative, alternative; used in scorpion sting."

Charaka found it useful in bleeding piles, diseases of the stomach, chronic dysentery, jaundice due to cough, cold and catarrhs, and vomiting.

Sushruta recommended it in rheumatism, blind piles, elephantiasis, chronic enlargement of the spleen and glandular enlargement of the abdomen and hiccough.

Bagbhata prized it is an excellent remedy for piles, stone and calculus and throat affections ad as a tonic.

Harita recommended it in hemorrhages of the stomach and lungs and delirium tremens.

Chakradatta found it useful in rheumatism, dropsy and in several affections of the eye. Bhavaprakasha recommended it in typhoid fever, chronic diarrhea and dysentery and biliary colic.

Bangasena said that it is an excellent remedy in diarrhea associated with colicky pains and also in whitlow.

HOMEOPATHIC - Term-c. is an indigenous remedy, very much used in ayurvedic medicine. The symptoms for homeopathic use are ineffectual desire, hard stools, distended abdomen, and bleeding hemorrhoids.

Therapeutic action to clear the bowels. Constipation, chronic dysentery, dropsy, chronic diarrhea. Frequent in effectual desire to pass stools, but the patient passes only small quantity of feces with great force. Sweat breaks out during stool. For piles, some skin diseases.

Vertigo, relieved by cold bathing. Profuse salivation with great thirst which accompanies all affections. Offensive odor comes out of the mouth. Tongue is flabby, dry, and covered with a brown coating on tip of the tongue.

MIND - Mind indifferent. Single mindedness. Easily indisposed to yawn, constant yawning.

Abdomen - Rumbling and gurgling sounds in abdomen. Flatulence. Pain in right lower abdomen.

Back - Intense pain in back (right lumbar region and lower spinal column). Sitting is painful due to pain, often at intervals. Pain increased while sitting straight, and decreased altogether while lying on bed and during sleep. Pain in back of neck.

Chest - Intense pressive pain in right chest.

Food - Thirst for drinking cold water.

Head - Headache in occiput and right cranium with intense vertigo. Stitching pain in right temporal region and occipital suture.

Heart - Pressive pain in region of heart. Pulse is accelerated and quick in motion, irregular. Pulse for some

moments is rapid, hard and for some moments is

weak simultaneously. Some heartbeats are feeble or of low sound, some normal and some of loud sound, everything in successive order.

Limbs - Muscular pain in right upper hand. Pain in the region of deltoid muscle. Itching pains relieved by scratching.

Liver - Slight pain in the region of liver (large lobe). Pain better temporarily by external pressure.

Lungs - Hot deep breathing.

Modalities - Every complaint is better by cold bathing. Better dry, cold air. Better while eating. Better closing the eyes, sleeping, evening. Better during complete rest of mind and body.

Mouth - Fetid odor in mouth. Profuse salivation with intense thirst. Sensation of dryness in upper jaw. Gums of teeth swollen and hard.

Rectum - Sweats while passing stool. Pressive itching and full sensation in rectum. Constipation, stool hard, of small quantity, and slightly yellowish. Diarrhea, stools is liquid, and small in quantity. Feces mixed with some mucus, flatulence associated with burning sensation in the stomach.

Stomach - Sensation of fullness in stomach. Distension of stomach. Downward pain in stomach and epigastrium. Rumbling and gurgling sounds in stomach. Fetid eructation. In the morning constant acid, empty eructation.

Stool - Frequent ineffectual desire for passing stool, but passes very small quantity of feces with great force or sometimes with ineffectual action to pass stool. After much trying a little quantity of feces comes out with great force.

Tongue - Flabby, dry, tongue. Brown coating on tip of tongue. Sore and raw tongue.

Urine - Quantity of urine is slightly diminished. Frequency of urination is increased at night.

Vertigo - Vertigo remains all the day and night for hours. Vertigo is worse by hot sun's rays, hard pressure and motion. Vertigo is better by cold bathing, evening dry cold air and during sleep and eating. Intense vertigo begins in occiput and spreads to the whole right side of the head (right temporal region to right frontal region).

***TESTOSTERONE

PHARMACY - test. Testosterone. Male hormone. **Historical dose:** All potencies.

CLINICAL - Acne. Baldness. Bleeding. Cancer. Emaciation. Fatigue. Hepatitis. Im- potency. Jaundice. Menstrual, disorders.

HOMEOPATHIC - Low levels of Testosterone can cause symptoms of fatigue, malaise, loss of sex drive, and loss of muscle tissue.

Anabolic steroids are compounds related to testosterone. The most common side effects of using Testosterone in both men and women include increased facial and body hair, oily skin or acne, male pattern baldness, water retention joint stiffness, and soreness at the injection site. Lab tests may show increased levels of liver enzymes.

A deepened or hoarsened voice, growth of the clitoris, and menstrual irregularities have been reported in women. The masculinizing side effects may be irreversible in women, even with short term use.

At higher doses over longer periods, increased or decreased sex drive, mood swings, aggressive behavior, persistent painful erections, shrinking testicles, and breast growth have been reported in men. Long term use of high dose anabolics can damage the liver, causing jaundice, hepatitis, bleeding, or, possibly, cancer.

RELATIONS - Compare: Orch., Sep.

***TETRACYCLINE

(Antibiotic)

PHARMACY - tetra. Tetracycline. Antibiotic. The attenuations are prepared from the antibiotic, Tetracycline hydrochloride. Potentized allopathic drug. **Historical dose:** All potencies.

CLINICAL - Agranulocytosis. Allergies.

Tetracycline Anemia. Blood, disorders. Convalescence. **Diarrhea.** Dystonia. Headache. Hives. Nausea. Photophobia. Rash. Skin, disorders. Sores. Tinnitus. Vomiting.

HOMEOPATHIC - Protracted convalescence. Post-infectious anemia. Agranulocytosis. Blood disorders. Dizziness, light headed- ness. Headache, bulging soft spot on head (in infants). Blurred vision. Ringing in the ears. Muscle weakness.

Extreme allergic reactions. Rash. Skin peeling. Skin eruptions. Inflammation of the tongue, of the upper

digestive tract. Hives, inflammation of large bowel. Genital or anal sores or rash. Inflammation of the penis. Sore throat and inflammation. Sore mouth and perineal itching due to overgrowth of yeasts. Difficult or painful swallowing. Indigestion. Irritation of the gastrointestinal mucosa. Autonomic dystonia. Diarrhea or loose stools. Cramps or burning of the stomach. Abdominal pain, nausea and vomiting. Loss of appetite. Bone deformation. Discoloration of teeth. Swelling due to fluid accumulation. Liver poisoning. Photosensitivity. Prone to sunburns. Exaggerated sunburn.

RELATIONS - Compare: Ars., Fl-ac., Nit- ac.

REFERENCES - Murphy. Reckeweg.

***TETRADYMITUM

(Tetradymite)

PHARMACY - tet. Tetradymitum. Tetradymite. Rare Tetradymite crystals from North Carolina and Georgia, contain about 60 parts of bismuth, 33 of tellurium, 6 of sulphur and traces of selenium and iron. Triturations.

Historical dose: All potencies.

CLINICAL - Achilles tendon, pain. Coccyx, pain. Nails, ulceration ingrown. Urticaria.

HOMEOPATHIC - Hering proved Tet., taking about five grains of the first trituration. The most prominent symptoms were pains occurring in small spots, ulcerative pains about the nails and a sharp attack of urticaria from eating shell-fish. Pains in ankles, heels and Achilles tendons were also severe, worse rising from a seat.

REFERENCES - Clarke.

***TEUCRIUM MARUM VERUM

(Cat thyme)

PHARMACY-teucr. Teucriummarumverum. Cat-thyme. Marum verum. N. O. Labiatae. Tincture of whole fresh plant. **Historical dose:** Tincture and all potencies. Locally for polyps, dry powder.

CLINICAL - Anorexia. Anus, itching. **Ascarides.** Cachexia. Colic. Concussion. Eyelids, tumor. Fibroma. Hiccoughs. Ingrown, toenail. Nasal, catarrh. Otalgia. **Ozaena. Polyps.** Psoriasis. Rheumatism.

Threadworms. Urethra, excrescences. Uterine, fibroids. Worms.

HERBAL - The Germander group of the Labiatae, to which the Teucriums belong, had an important place in old herbal medicine, and homeopathy has placed Teucr. on a firm foundation. Stapf and others proved it.

HOMEOPATHIC - Worm infestations, irritation of anus and nose. **Threadworms.** Worms and polyps suggest a tubercular taint and Clarke has used both Teucr. and Teucr. scorod. in tubercular cases.

Nasal polyps. Guernsey noted "Polyps with stoppage of nose on side lain on. large red pimples under right nostril near septum, sore and smarting to touch."

Chronic nasal catarrh with atrophy, large offensive crusts and clinkers. **Ozaena. Loss of sense of smell.** Fibrous tumor of the eyelid.

Affections of children. Suitable after too much medicine has been taken. Over sensitiveness. **Desire to stretch.** Urethral granulations following gonorrhea and also uterine fibroids.

Abdomen - Pressure in abdomen. Expulsion of much flatus, having the smell of rotten eggs. Incarceration of flatus. Colic with tearing drawings. Cutting pain after drinking beer or water.

Back - Burning in left scapula. Rheumatic drawing and tension in back.

Causations - Concussion (brain). Injuries likely to set up tetanus.

Chest - Chest loaded, with sensation of dryness in trachea. Squeezing pressure in lower part of chest, with anxious uneasi-

ness, without affecting the breathing.

Constitutions - Suited to elderly persons and children. When too much medicine has produced an over-sensitive condition and remedies fail to act.

Ears - Otalgia. Shootings and tearings in ears. Hissing and ringing.

Eyes - Eyes red, inflamed. Smarting in canthi, lids red and puffy, tarsal tumor (Staph.).

Female - Smooth pedunculate, pear-shaped polypus of vagina, protruding three inches beyond hymen.

Food - Hunger in morning and evening. Appetite increased. Sensation of hunger, as if the food were unsatisfying and which hinders sleep. Bitter taste in gullet after dinner. Cuttings or nausea with inclination to vomit after drinking water.

Head - Excited, tremulous feeling. Frontal pain, worse stooping. Strengthens brain after delirium tremens.

Limbs - Tearing pains in arms and legs. Affection of fingertips and joints of toes. **Pain in toenails,** as if they had grown into flesh.

Lungs - Dry cough, excited by a tickling in trachea, as if dust had been inspired, worse by coughing. **Moldy taste in throat** when hawking up mucus, expectoration profuse.

Male - Sexual desire decreased. Drawing pain behind left side of root of penis, extending to left side of scrotum, became sore to touch. Pressive, drawing sensation from abdomen into cords and testes. Burning, pressing, biting in fore part of urethra when not urinating. Excrescences in urethra following gonorrhea.

Modalities - Desires exercise in open air, which does not fatigue. Moving improves. Worse by touch. Worse sitting, stooping, on side lain on. Disinclined for exertion. Worse warmth, warmth of bed, wet weather. Worse evening and at night.

Mouth - Foul breath. Mouth clammy. Much mucus in mouth. Smarting as from pepper, first on left, later also on right side. Smarting in root of the tongue.

Nose - Catarrhal condition of both anterior and posterior nostrils. **Mucus polyps**. Chronic catarrh, **Discharge of large, irregular clinkers**. **Crawling in nostrils** with lachrymation and sneezing. Coryza with stoppage of nostrils.

Rectum - **Itching of anus and constant irritation** in the evening in bed. Crawling in the rectum after stool. **Ascarides** with nightly restlessness. Swelling, itching, and creeping at anus as from ascarides. Frequent itching and tingling in anus, often after the evacuations. Copious fetid evacuations of the consistence of pap.

Sensations - As if air forced through mucus in ear. As if right nostril were partly stopped. Chill as from abdomen. Sensation as from flea bites. As if nail had grown into flesh of right great toe.

Skin - Very dry skin. Itching causes tossing about all night. Suppurating grooves in the nails.

Sleep - Sleep retarded in evening. Restless with twitching, choking and starting up frightened. Unrefreshing sleep and difficulty in waking in morning. Agitated sleep at night, from excessive excitement. Vivid dreams and frequent starts.

Stomach - Vomiting of large quantities of dark-green masses. Constant hiccough, attended with pain in back. Hiccough on eating after nursing.

Temperature - Shivering and shaking, often with icy coldness in hands, and frequent yawning. Chilliness after eating, and when talking about unpleasant things. Heat worse in evening, with exaltation and great loquacity. Frequent feeling of flushing in face, without external redness.

Throat - Sore throat with shooting pain and impeded deglutition. Pressure or drawing and tearing in throat. Frequent necessity to hawk. Hawking up of much mucus of a moldy taste.

COMMENTS - Clarke gave Teucr. tincture in five-drop doses three times a day to a man of 44 who had tuberculosis affecting the right lung with severe recurrent hemorrhages. Teucr. helped him, and with other remedies he got quite well. While taking Teucr. he noticed that he passed a large quantity of threadworms to which he was not at all subject.

C. M. Boger related a case of cough in which his patient had with the cough a moldy taste in the throat when hawking up mucus. Expectoration profuse. Rapid loss of weight and strength. Anorexia. A brother had died of tuberculosis four years before with very similar symptoms. Teucr. 3x helped and 20x finished the cure.

Teucr. has the craving hunger of the anti- psorics and worm remedies, it prevents sleep at night. Nervous, irritable, sensitive. Rheumatic and gouty symptoms and scapular pains, both in the bones and joints. Limbs go to sleep with tingling when sitting.

RELATIONS - **Antidoted by:** Camph. **Compare:** (1) Teucr-s. (2) Cina, Ign., Sang., Sil. **Compatible:** Chin., Puls., Sil.

REFERENCES - Boericke. Clarke.

***TEUCRIUM SCORODONIA

(Wood Sage)

PHARMACY - teucr-s. Teucium scorodonia. Wood sage. Wood germander. N. O. Labiatae. Tincture of whole fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL-Asthma. Bronchorrhea. **Catarrhs**. Coryza. Coughs. **Epidymitis**. Nasal, catarrh. Testicle, tuberculosis. Tuberculosis.

HERBAL - Teucium scorodonia is an extremely bitter plant with the smell and taste of hops, for which it has been substituted. Some have observed an alliaceous smell and Cazin said that it gives agarlicky taste to the milk of cows, goats and sheep which eat it.

HOMEOPATHIC - Teucr-s. has been used in tuberculosis with muco-purulent expectoration. Dropsy orchitis and **tuberculous epidymitis, especially in young**, thin individuals with tuberculosis of lungs, glands, bones and uro-genitals.

It is used as an adjuvant in severe afflictions of the lungs. Remarkable results have been observed in **chronic catarrhs** of the lungs and bronchi, in nasal catarrhs, coryza, cough and asthma bronchiale.

COMMENTS - Dr. Criquelion told how Dr. Martiny one day in the Ardennes, had occasion to examine a man of thirty who was apparently in the last stage of consumption and had a cavity in one apex. Martiny gave his

opinion that he had not long to live.

A year later, being in the same district, he called at the house and inquired of a man whom he saw there, apparently in perfect health, what had become of the invalid. "I am he," was the reply. It was the fact, though it took some time to convince Martiny of it.

An old woman had recommended him to make a tisane of the wood germander which grew abundantly about there. He had taken it daily and got well. "A similar case," said Cooper, "was told me by a distinguished scientist. Martiny introduced Teucr-s. into his practice and used a tisane of it with much success in bronchorrhea and consumptive disorders with tuberculous elements and muco-purulent expectoration. Clarke confirmed this, using the tincture in five or ten-drop doses two or three times a day.

Criquelion pointed out that Teucrine has been used as a subcutaneous injection in tubercular cases as a substitute for Koch's Tub. Criquelion had a patient, a farmer of scrofulous habit, high color, thick neck, who had for ten years an enlarged testicle the size of a quince, which he diagnosed to be tuberculous.

Teucr-s. 6c was given, one drop in four spoonfuls of water, a spoonful three-quarters of an hour before each meal. After three months the testicle was softer in six months it had almost returned to its proper size.

RELATIONS - Teucr-s. is allied to Marrubium vulgare (Common or White Horehound), a well-known cough remedy. Also to Nepeta glechoma (Ground Ivy), which was formerly much used with snail-jelly for chest affections." **Compare:** (1) Bac., Tub., Teucr., Helix.

REFERENCES - Clarke.

***THALAMUS

PHARMACY - thala. Thalamus. Gray nuclei around the encephalon. Nerve-hormonal tissue from brain. Sarcod. **Historical dose:** All potencies.

CLINICAL - Angina pectoris. Catatonia. Contractures. Cyanosis. Hebephrenia. Hyperthyroidism. Menopausal complaints.

Neuralgias. Pains. Parkinson's disease. Raynaud's syndrome. Sciatica. Vasomotor, complaints.

HOMEOPATHIC - Thala. belongs to the group of gray nuclei around the encephalon. It is a large ganglion, even and symmetrical. Situated in front of and outside the quadrigeminal bodies inside the striped bodies. Laterally bordering the third ventricle, surrounded on its convexity by the caudate nucleus. It is egg-shaped and the distal end is large.

Hardy conducted a clinical proving, but there is no homeopathic proving. Complaints of the psychological system, including spasmodic laughter and crying, consciousness disorders inner sensitivity disorders. Patient misinterprets his illnesses.

Pseudo-bulbar paralysis. Neuralgias, cervical and brachial, sciatica. Tabes. Painful stumps. Vasomotor disorders. Parkinson's disease. Pre-cancerous conditions, predominantly painful.

Paresthesia in the female during the menopause. Formication, painful numbness situated particularly in the arms and which keeps the patient awake. Tingling, which is always distal and which appears with no apparent cause. Neuralgia of the left cervical region and arm with formication.

Pains accompanied by phenomena of anguish, ill-defined feeling of uneasiness, painful discomfort. Spontaneous pains, appear suddenly and then immediately reach their peak intensity. The painful sensation is much greater than the stimulus. Exaggerated pain. Violent attacks of paroxysm. Pains reside in one half of the body, predominantly of the limbs. Pain accompanied by sweating.

MIND - Catatonic conditions. State of inertia, desire for solitude and peace, loss of initiative. The patient does not want to do anything. He sits in a corner, immobile. Condition of psychological strain, which causes the feeling of being ill at ease in his body. Hebephrenia.

Spasmodic laughing and crying without any real cause, expressed by involuntary, automatic contracture of the muscles in the face and by mimicry, which is either ill-timed or irrelevant or exaggerated.

Abdomen - Epigastric pain in a continuous transverse bar, not changed by eating, but aggravated by emotion. Pain is diffuse, badly localized. Accompanied by discomfort. Abdominal meteorism ameliorated by emission of wind. Abdominal pains with emission of soft stools.

Chest - He feels as though his thoracic cage were trapped inside an iron corset.

Constitutions - Psoric, syphilitic or tubercular disposition. Nervous, biliary and lymphatic temperament.

Ears - Hallucinations of hearing with feeling of strangeness and fright. Buzzing in the ears, sound of a bell in the fog or of a foghorn. Noises in the ears. Feeling of confusion in the ears.

Eyes - Sight becomes weaker on one side of the field of vision. Objects seem lost in a halo of light. Diminution of sight on one half of the field of vision.

Female - Frigidity. Libido disturbed, impotence, frigidity, sexual asthenia. Menopausal complaints with hot flashes, aggravated at night. Hyperthyroidism during the menopause with swelling at the base of the neck.

Head - Occipital headaches, worse on the left side, spreading to the entire left side of the body.

Heart - Vasomotor complaints. Vascular disorders, accompanied by pain. Pain in the left side of the thorax, which may spread to the arm, aggravated by physical exercise and capable of stimulating an attack of angina pectoris.

Limbs - Raynaud's syndrome. Cyanosis of the limbs with tingling and burning sensation. Movements badly coordinated for the upper as well as the lower limbs. Often drops things. Hands in a contracted state without total paralysis. Numbness of the hands with cyanosis and trembling. Numbness of the feet with cyanosis, formication, swelling and edema of the ankles. Copious perspiration from the feet. Spastic gait.

Lungs - Asthmatic dyspnea, the patient has difficulty in exhaling.

Male - Impotence with dwindling or libido and lack of orgasm. Sex painful with premature ejaculation.

Modalities - Better by fresh air and movement. The pains are better at night. Worse by the cold, heat. Worse from emotions, especially unhappy emotions.

Nose - Ozaena. Reduction in the olfactory sensitivity. Sensation of evil-smelling, unpleasant whiffs like sulphur. Smells are badly tolerated.

Skin - Dermographia. Burning sensation on the skin, aggravated by heat and cold. Excessive sweating, predominantly on one half of the body. Lesion caused by parasites, on the nails. Deformity of the nails, which are concave, ridged, breaking. Nails extremely fragile. Inflammation beneath the nails.

Stomach - Pains with nausea, worse after ingestion of food. Cramping stomachache, accompanied by nausea and meteorism.

Temperature - Vascular complaints, the skin is either very red or very pale, but always cold. Cyanosis and edema at the limbs, accompanied either by an increase in the local heat or, the opposite, by decrease in the heat.

RELATIONS - Compare: (1) Agar., Op., Hyos., (2) Hypoth., Pitu-gl.

REFERENCES - Julian.

***THALLIUM METALLICUM

(Thallium Metal)

PHARMACY - thal. Thallium metallicum. Thallium metal. Thallium aceticum. A Rare Metal. Trituration. Solution of the Sulphate. **Historical dose:** All potencies.

CLINICAL - Acne. **Alopecia.** Amenorrhea. Atherosclerosis. **Baldness.** Cachexia. Conjunctivitis. Cyanosis. Dysuria. Emaciation. Emphysema. Folliculitis. Glomerulonephritis. **Hair, loss.** Hematuria. Hyperthyroidism. Insomnia. Locomotor ataxia. Malaria. Muscular, atrophy. Myelitis. Neuritis. Night-sweats. Paraplegia. **Paralysis.** Pleurisy. Pneumoconiosis. Polyneuritis. Rheumatism. Sciatic pains. **Trembling.** Tremors. Tuberculosis.

HOMEOPATHIC - Thallium is a rare metal discovered by Crookes in 1861. He found it in the residue left from the distillation of selenium and named it thallium (a green shoot) from the green it gives in the spectrum. Thallium and its derivatives are toxic. Thallium has been experimented with by Lamy and Marme. The symptoms picture of Thallium were established in 1965-66 by Panos, Rogers and Stephenson, on seven male and nine female provers.

Combermale of Lille, used Thal, with success in the night-sweats of tuberculosis, but this treatment had the effect of causing profuse falling of the hair, so serious as to contraindicate its use. Huchard had patients become quite bald in several days. Hansen said Thal, relieves the violent pains of tabes dorsalis.

Horrible, neuralgic, spasmodic shooting pains. Pains like electric shocks. Muscular atrophy. Tremors. **Trembling.** Chorea-like movements. Locomotor ataxia with pain. **Paralysis of lower limbs.** Paraplegia. Polyneuritis. Neuritis. Trigeminal neuralgia. Spinal neurasthenia. Pseudo-bulbar paralysis. Intermittent paralysis. Muscular pains. Muscular atrophy. Numbness or formication starting in the fingers and toes, extending up to lower limbs and down to feet and involving lower abdomen and perineum. General emaciation with a lack of strength.

Hyperemia, swelling and excessive secretion. Night-sweats of tuberculosis. Dermatrophic lesions. **Alopecia, hair loss** following acute, exhausting diseases. Loss of body hair and hair of the head.

Influences the endocrine glands, especially the thyroid and adrenalin. Hyperthyroidism symptoms. Emaciation, hypotonia, chilliness.

Pains in the legs, aggravated when lying on the affected side. Unable to find a position in the bed which eases the pain. Pain in the right knee on bending or stretching it. Pain in the sciatic nerve.

Discomforts are of a periodic nature, recurring in strength, at the same hour and then disappearing again. Permanent state of jangled nerves. Trophic conditions of the nails.

MIND - Growing impatience. Extreme irritability and violence, uneasiness with insomnia. Extreme anxiety for

no reason.

Hysterical symptoms with hyperesthesia and then hypoesthesia.

State of jangled nerves of excitability and bewailing with weeping and shouting. Attacks of weeping, excitement. Bursts into tears for the least thing, only to blow up soon after. Stubborn. Indifferent resignation. Apathy. Depression.

Abdomen - Retraction or depression of abdomen. Distention of the abdomen. Heavy flatulence, even after a light meal. Spasmodic pain in the stomach and intestines with abdominal pains. Pain in intestinal canal.

Back - Formication on the back. Lumbar aching.

Blood - Attacks of hypertension with hyperthyroid phenomena. Bleeding from the capillary vessels. Atherosclerosis. Cyanosis. Increase of carbon dioxide in the blood plasma.

Chest - Painful, heavy feeling on the sternum. Retro-sternal pain in the esophagus. Neuralgia after herpes zoster.

Eyes - Dacryocystitis. Iritis. Blepharitis. Purulent conjunctivitis. Frequent conjunctivitis with abundant production of mucus. Muco-purulent discharge from the right eye, worse in the morning. Glittering spots in front of the eyes with formication on the face. Visual complaints with feeling of heaviness behind the eye. Scotoma. Eyebrows fall out.

Face - Facial neuralgia. Hair loss from beard.

Female - Menses prolonged with black blood. Amenorrhea. Loss of pubic hair.

Food - Thirst. Voracious appetite. Loss of appetite.

Head - Headaches. Pain in occiput in morning. **Alopecia**. Hair falls off with great rapidity. Falling out of hair after diseases. Hair falls off in handfuls. Hair loss in spots

Heart - Diminished frequency of pulse. Pulse rapid with precordial constriction.

Kidneys - Involuntary passing of urine. Casts in urine. Acute glomerulonephritis. Dysuria. Proteinuria. Hematuria.

Limbs - Sharp pains like electric shocks. Very tired. Disorders of movement coordination. Chorea-like movements and rapid movements like convulsions. Exaggerated reflexes and muscular atrophy. **Trembling. Paralytic feeling**. Chronic myelitis. Numbness in fingers and toes with extension up lower limbs involving lower abdomen and perineum. **Paralysis of lower limbs**. Cyanosis of limbs. Formication, beginning in fingers and extending through pelvis. Emaciation of fingertips. Deformed nails.

Liver - Gallbladder distended. Coating of liver white and granular-looking.

Lungs - Slow and difficult breathing. Dyspnea. Respiration difficult with pain all over the thoracic cage. Emphysema. Pleurisy. Pneumoconiosis. Cyanosis.

Male - Impotence. Loss of pubic hair.

Modalities - Better from walking. Worse at night. Worse from contact, pressure.

Mouth - Lips dry with thirsty feeling. Bad breath, irritation of the mucus membranes in the mouth with excessive salivation. Stomatitis. Aphthae. Gingivitis. Dental caries. Toothache. Numbness.

Rectum - Spasmodic, stubborn constipation, alternating with attacks of diarrhea and anal and rectal pains. Diarrhea, bloody stools.

Skin - Dryness of the skin. Red stripes after scratching. Acne. Folliculitis. Skin pigmentation disorders. **Loss of hair on the body** (axillary and pubic). Skin sensitive in particular areas, especially on the soles of the feet. Pustular formations. Trophic complaints of the nails, which are deformed. Inflammation beneath the nails. Deformed nails.

Sleep - Sleep is light, wakes often. Great difficulty in falling asleep again.

Stomach - Acrid dyspepsia. Bitterbelchings and bitter taste in the mouth. Feels nauseated but cannot vomit. Nausea and vomiting. Pain in stomach and bowels, terribly severe lacerations, following each other with the rapidity of electric shocks.

Temperature - Profuse sweating in cases of severe illness. Night-sweats of tuberculosis.

Throat - Goiter. Swollen thyroid gland.

RELATIONS - Thal, belongs to the Lead

group of metals and approaches Plb. closest in its symptoms. **Compare:** (1) Thal-s. Plb., Lath., Caust., Arg-n. (2) Baldness, Jab., Pilo., Petr. (3) Baldness and tuberculosis, Phos. (4) Aran. - Feeling of constant coldness. Periodic return of symptoms. Severe pain in the heels. (5) Cedr. - Periodicity of symptoms, supra-orbital neuralgia, periodic migraines. (6) Aran-ix.

REFERENCES - Boericke. Clarke. Julian. Phatak.

*****THALLIUM SULPHURICUM**

(Thallium Sulphate)

PHARMACY - thal-s. Thallium sulphuricum. Thallium sulphate. The attenuations are prepared from Thallium sulphate (T12SO4). **Historical dose:** All potencies.

HOMEOPATHIC - The main indications are falling of hair. Emaciation. Tremors. Paralytic states. Night-sweats in pulmonary tuberculosis.

RELATIONS - Compare: Thal.

REFERENCES - Reckeweg.

***THEA SINENSIS

(Chinese Tea)

PHARMACY - thea. Thea sinensis. Chinese tea. Camellia thea. N. O. Temstromiaceae, Theaceae. Tincture or infusion of dried leaves and flowers. Trituration of Theine. **Historical dose:** Tincture and all potencies.

CLINICAL - Delirium, tremens. Mania. Homicidal. Insanity. **Insomnia.** Kidney, disorders. Mania. Megrim. Nervousness. **Neuralgias.** Paralysis. Sleeplessness. Suicidal.

HERBAL - Tea contains an alkaloid, Thein, which is considered by some identical with caffeine, and both tea and coffee are used to stimulate the jaded faculties. The stimulation will enable persons to endure fatigue and get more enjoyment out of themselves than they could obtain by mere food.

Coffee and tea are different in their effects though they may be alike in their chemistry. The after-effect of all stimulation is reaction, unless it is kept off by a repetition of the stimulant as the effect of the last dose wears off.

The sign that the first dose of tea is wearing off is a nervous, restless, depressed, ill-tempered state, which is visible in persons who rely on tea, at about 5 p.m.

HOMEOPATHIC - Neuralgia and insomnia. All-gone, sinking sensation at the epigastrium. Nervous sleeplessness, heart troubles, palpitations and dyspepsia of old tea-drinkers. **Sensitive kidneys.** Sick headaches. Allen noted it was antidotal to Tab.

MIND - Nervousness and want of confidence. Great nervous excitability with exaltation of intellectual faculties. Ill-humored. Peevish. Disposition to quarrel at the most harmless speech.

Nocturnal fright, suicidal thoughts. Temporary mental exaltation. Delirium with ecstasy, laughed incessantly, talked in rhyme. Delirium tremens. Mania. Suicidal and homicidal. Impulses to kill. Impulse to jump out of the window.

Abdomen - Borborygmi. After lunch, stitch below ribs in paroxysms. Intestines relaxed. Liability to hernia.

Chest - Oppressed and constricted. Fluttering in left side and feeling of suffocation.

Ears - Neuralgic pains in cartilage of ears. Roaring in ears. Hallucinations of hearing.

Eyes - Eyes are unusually bright. Dilated pupils. Neuralgia of eyes. Sight is dim, dark before eyes, fiery lines, sparks.

Face - Wild, distressed expression. Face is pale, with congested redness, flushed.

Female - Soreness and tenderness in ovaries. Menses delayed, scanty with severe cramp-like pains. Uterine bearing down from beginning to end of period.

Food - Very hungry, but little satisfies. Thirst, but every mouthful of cold water affects the head like a shock. Craves acids, lemons.

Head - Rush of blood to head. Sick headache radiating from one point. Sleepless and restless. Hallucinations of hearing. Cold damp feeling at back of head. Scalp tender can scarcely comb hair.

Heart - Anxious oppression. Precordial distress. Palpitation, unable to lie on left side. Fluttering. Pulse rapid, irregular

Thea sinensis intermittent.

Kidneys - Very marked increase of urine. Must pass water immediately after drinking tea.

Limbs - Paralyzed numbness of limbs. Joints of hands and feet tender. Nervous excitability in wrists, hands, and feet. Hand trembled violently. Restlessness of feet. Neuralgic pains in outer hamstrings. Sensation as if the weight of a sheet even would crush toes.

Lungs - Edema of respiratory tract. Breathing increased in frequency and amplitude. Breathlessness on least exertion. Paroxysm of asphyxia. Cough is dry, severe and bloody expectoration.

Male - Erections. Unnatural excitement.

Modalities - Better warmth, warm bath, applying hand or warm clothes to occiput. Worse at night, from cold water, walking in open air. Worse after meals.

Mouth - Bitter taste in mouth. Much viscid saliva. Whole mouth cavity dry and sensitive. Tongue clean and pale. Tongue red, blistered, painful as if scalded. Teeth frequently decayed.

Nose - Dryness, soreness of nose. Sensation at root of nose as if nosebleed would occur. Nosebleed before menses.

Rectum - Swelling of lower end of rectum, with slight itching. Chronic relaxed bowels. worse by beer, better by port wine. Constipation.

Sensations - As if on the verge of fainting. As if a foreign body in throat. As if the stomach hung down relaxed in the body like an empty bag. As if the weight of a sheet on the feet would crush the toes. Cold sensations are prominent, cold, damp feeling at back of head with pain spreading thence to eyes, also dryness and swelling of mucus membrane.

Skin - Skin dry as if pores obstructed. Skin of fingertips peels from excessive dryness. Eruption of red, indolent pimples. Itching, crawling, prickling in different parts.

Sleep - Sleepy in daytime, sleepiness at night with vascular excitement and restlessness and dry skin. Horrible dreams cause no horror.

Stomach - A sinking sensation at the epigastrium. **Faint, gone feeling (Sep., Hydr., Olean.)**. Weakness about stomach. Sudden production of wind in large quantities. Nausea, and vomiting after eating. Vomits bile, when pain at its height.

Temperature - Intense coldness passing over whole head. Lowered temperature. Hands and face cold as marble. Beaded with chilly moisture. Excessive internal heat with flushes of heat on the surface, coming and going quickly. Disposition to perspire.

Throat - Scraping in larynx. Hoarseness. Diphtheria sore throat. Painless swelling of mucus membrane. Uneasy feeling in pharynx, as if obstructed by a foreign body.

Vertigo - Vertigo with darkness before eyes, sudden in open air.

COMMENTS - The symptoms are made up of observed effects of overdosing and some direct provings. A woman who was addicted to drinking tea showed very pronounced delirium tremens indistinguishable from that caused by alcohol, though there was no alcoholism in the case.

Another woman, who kept a pot of tea boiling on the stove and drank several bowls every day, developed both suicidal and homicidal mania, impulse to jump out of the window, to cut her baby's throat or throw it downstairs. Thea 100,000c, Fincke, cured.

A man who had been many years in the East and was used to one-story houses, on his return to the West had a curious impulse to jump out of the window, which he traced to tea-drinking and which disappeared when he left it off.

Teste noted that the homicidal impulse appeared in the dreams of one prover, who was so far from being horrified by his dreammurders that he even took pleasure in them after awaking. The talkativeness of Thea, is one of its chief allurements.

Among tea-tasters, who do not drink the tea they taste, but only hold it in the mouth a short time, yet long enough for the mouth to absorb some, there is sometimes developed what is known as tea-tasters' paralysis, affecting mostly the lower limbs with loss of sensation of both upper and lower.

A man, after drinking tea, had pain in his epigastrium going through to his back with a feeling as if he wanted to be sick and could not, better sitting down and stretching out. Thuj. 30c cured.

Guernsey gave these as indications for Thea, "Nervous sleeplessness, heart troubles, of old tea-drinkers, palpitations of the heart, can't lie down."

RELATIONS -Antidote: Thuj., Ferr., Kali-hp. - Material doses for tea-taster's cough. Anridoted **by:** Beer.

Compare: (1) Gone, faint feeling, sick-headache radiating from one point and pain in left ovary, Sep. (2) Averse to work, especially writing, Hydr. (3) Relaxed feeling in stomach. Ip. (4) Desire for acids, Verat., Sulph., Ant-c., Phos., Sabin.

***THERIDION CURASSAVICUM

(Orange Spider)

PHARMACY - ther. Theridion curassavicum. Orange spider. Latrodectus curassavicus. N. O. Arachnida. West-Indies. Tincture of the whole spider. **Historical dose:** All potencies.

CLINICAL - Angina pectoris. Anthrax, sheep. Bone, disorders. Decay. Menopause. Coughs. Dysmenorrhea. Eye-teeth, pains. Fainting. Headaches. Hysteria. Liver, disorder, abscess. Marasmus. Ménière's disease. Nausea. Necrosis. Nose, catarrh. Ozaena. Photophobia. Pregnancy, sickness. Rickets. Scrofulosis. Seasickness. Spinal, irritation. Tetanus. Toothache. **Tuberculosis.** Vertigo.

HOMEOPATHIC - Ther. was introduced and proved by Hering in 1832. The spider is found in the West Indies, chiefly in the island of Curacao. It is about the size of a cherry-stone and is found on orange-trees. It is velvety black when young with antero-posterior lines composed of white dots, on the posterior of the body there are three orange-red spots and on the belly a large square yellow spot.

The spider is very poisonous. It produces a highly sensitive, nervous condition with weakness, trembling, coldness, anxiety, faintness and easily excited cold sweat. Venom produces hypersensitiveness of the

***nerves. **Sensitive to noise, which penetrates the body.**

It affects the teeth, causes nausea, chills and pains all over, strikes the painful parts etc. Nervous hyperesthesia. Noises seem to strike on painful spots over the body.

Affinity for the **tubercular diathesis**. Tuberculosis, stitch high up in left apex (Anthr.). Where the indicated remedy does not hold long. Rickets, decay, necrosis. Vertigo, sick headache, peculiar pain around heart region, tuberculosis florida, and scrofula.

Spinal irritation. Decay and necrosis of the bones. Bones feel broken. Rickets. Burning pains. Water feels too cold. Bounding internally, as of a child. Sense of duality. Effects of sunstroke. Hysteria during puberty and at menopause. Infantile atrophy, glands enlarged with marasmus. Nodes on various parts especially buttocks. Seasickness. Left side most affected.

MIND - Restless, finds pleasure in nothing. Time passes too quickly. **Sensitive to slightest noise**. Startled by least thing. Confusion of mind, worse laughing. Insanity during menopause. Hysteria. Talkativeness and hilarity.

Wantofself confidence. Aversion to work. Joyful during headache. Depression during headache. Weeping from toothache. Feels and looks as if dying, but hears and understands all that is said.

Abdomen - Violent burning in liver region.

Abscess of liver. Pain in the groins after sex, motion and drawing up the limbs. Stinging pain on left side over anterior aspect of spleen.

Back - Stinging pains. Spine is sensitive to pressure and jar, sits sideways in a chair to avoid pressure. Sensitiveness between vertebra.

Causations - Seasickness. Washing clothes. Riding.

Chest - Stitches high up in chest, back through apex of left lung. Pain in upper left chest (Myrt., Pix., Anis.).

Pain in left floating ribs. Pinching in left pectoral muscle.

Constitutions - Tubercular diathesis.

Ears - Least noise, even sound penetrates her whole body, especially teeth. Rushing in both ears like a waterfall.

Eyes - Glittering vision, on stooping. Luminous vibrations before eyes. Blurred vision. Sensitive to light. Pressure behind eyeballs. Throbbing over left eye.

Face - Pale. Jaws immovable in the morning.

Female - Hysteria during puberty, at menopause. Menses suppressed.

Food - Constant desire to eat and drink but knows not for what. Craves oranges and bananas, acid fruits and drinks, wine, tobacco smoke.

Head - Head internally hot, oppressed and heavy. Head feels thick, thinks it belongs to another, that she can lift it off or she would like to remove it. Migraine. Headache, felt during sleep, worse jarring, with nausea and vomiting, at menopause. Headache worse after stool. Cannot lie down with headache. Pain worse anyone walking over floor.

Heart - **Cardiac anxiety and pain**. **Anxiety** about the heart, sharp pain radiates to arm and left shoulder. Pulse slow with vertigo.

Kidneys - Increased urination, at night, does not pass much during day.

Limbs - Burning in upper arm. Restless feeling in hands, wrings them. Stinging from elbow to shoulder. Lies or sits with feet crossed, cannot uncross them.

Lungs - Cough, jerks body together, head forward and knees upward. Too much air seems to enter the chest. Breathing difficult going up and down stairs, hysteria. Tuberculosis.

Male - Gonorrhea. Prostate enlarged, sense of a lump and heaviness in perineum, worse at even step. Seminal emission during afternoon sleep.

Modalities - Better from rest in horizontal position. Warm water improves nausea and retching. Warmth improves. **Worse touch, pressurerai, leftside. Worseleastmotion**, exertion, stooping, rising, walking, going up or down stairs. Worse sex, particularly groin pain. Worse on shipboard, riding in carriage. **Worse from noise**. Worse from cold, washing clothes, sunstroke. **Worse closing eyes**.

Mouth - Mouth feels furred, benumbed.

***Froth before the mouth with shaking chill. Teeth feel as if cold water is too cold. Bites tip of tongue during sleep. Lockjaw, morning on waking. Remains open involuntarily, cannot close.

Nose - Pain over root of nose. Ozaena. Chronic catarrh, yellow-green, thick offensive, discharge. Discharge

is yellowish and offensive. Post-nasal catarrh (Puls., Thuj.).

Sensations - As if her head was another strange head. As if vertex did not belong to her. Like a pressing pain in root of nose and about ears. As of a veil before eyes. As if something in esophagus were slipping towards epigastrium. Like labor pains in lower abdomen. As if a child were bounding in body. As if bones were broken and would fall asunder. As if dying.

Skin - *Stinging, stabs everywhere*. Itching sensations. Sensitive skin on the thighs.

Stomach - Seasickness. Nausea and vomiting when closing eyes and on motion (Tab.). Nausea worse least motion, looking steadily at one object from noise. Nausea and retching better drinking warm water.

Temperature - Shaking chill with foam at mouth. Internal coldness. Cold sweat easily excited.

Vertigo - Faints after washing clothes. Vertigo with nausea, worse stooping, kneeling. **Vertigo with nausea and vomiting on least motion**, worse when closing eyes.

COMMENTS - Grimmer stated. "The orange spider poison can cure when indicated on the totality of its symptoms. Decay of bones, abscesses and cancer of the liver and lungs. It acts profoundly on the nervous system, producing extreme sensitivity to noise the vibration penetrating to the teeth."

Keynotes extreme sensitiveness to noise, worse by least noise, "sounds penetrate the teeth." The sensitiveness extends to vibrations of any kind, jar of a step, riding in a carriage or in a boat.

"Worse closing eyes," especially in vertigo and symptoms of the head and stomach. Seasickness or sickness of pregnancy. Severe headaches, affecting the eyes, especially the left. The ears are highly sensitive. Intolerance of light.

Frequent cough, convulsive, head spasmodically jerked forward, knees jerked up to abdomen. Hallucinations of sight and hearing, luminous vibrations and rushing sounds. A kind of intoxication is induced, hilarity, talkativeness. "Time passes too slowly."

Burning pains and itching are common and a stitch high up in apex of left chest has proved a guiding symptom for Ther. in the cure of cases of tuberculosis. "Burning in liver region" led to the cure of abscess and even cancer of that organ.

H. C. Allen noted it for spinal irritation and disease of the spine and other bones. Decay, necrosis and scrofulous disease of bones have all been cured with it. "In scrofulosis when the best remedies fail to relieve."

Chackravarti related a case of headache cured with Ther. Mr. B., 35, well built of bilious temperament, had for three months severe headache with nausea and vomiting like seasickness and shaking chills. Dullness and fullness in the head with throbbing beginning in occiput, preceded by flickering before the eyes.

Head felt large and heavy. The pains began in the morning increase during the day and last until evening. Excessive irritation with loss of sustaining power. Worse from least overwork and motion, better by keeping quiet in horizontal position. Constipation, stools hard, small, dry.

Ther. 3x was given, one drop in water twice daily. The pain was much better the next day and was gone in less than a week.

RELATIONS - *Antidoted by*: Aeon, (sensitiveness to noises), Mosch, (nausea), Graph, (more chronic effects). Follows well: Sulph., Calc., Lyc. (scrofula). **Compare**: (1) Aran- d. and Spiders generally. (2) Hemicrania worse closing eyes, worse noise, Sep. (But Sep. worse from noise is less intense). (3) Vertigo and faintness on closing eyes, Lach. (4) Headache, nervousness, hysteria. Tarent. (5) Stooping down, violent stitch high up in left chest, thence to back, Myrt-c. through to left scapula. (6) Time passes too quickly (too slowly Cann-i., Arg-n., Nux-m.). (7) Vertigo

on closing eyes, Lach., Thuj. (on opening them, Tab., on looking up, Puls. Sil.). (8) Headache, worse lying down, Lach.

***THEVETIA NERIFOLIA

(Ahovai Tree)

PHARMACY - thev. Thevetia nerifolia. Ahovai tree. Cerbera thevetia. Ahovai tree of the Antilles. N. O. Apocynaceae. Tincture or trituration of the seeds. **Historical dose**: All potencies.

CLINICAL - Diarrhea. Somnolence. Throat, disorders. Vomiting.

HOMEOPATHIC - J. Balfour observed the effect of eating the seeds on two boys, age 7 and 8 years old. He noted "A tendency to sleep, disturbed every three to four minutes by irritation in the throat and the discharge of a mouthful of frothy mucus with a sort of gulp, then the child would lie down and close his eyes until again disturbed."

RELATIONS - *Compare*: (1) Apoc. Stroph. Upa.

REFERENCES - Clarke.

***THIOSINAMINUM

(Mustard Seed Oil)

PHARMACY - thiosin. Thiosinaminum. Mustard seed oil. Rhodallinum. Rhodallin. Cruciferae. Allyl sulphocarbamide, derived from Mustard seed oil. Trituration of the crystals. Solution in alcohol. **Historical dose:** Tincture and all potencies.

CLINICAL - Adenitis. Adhesions. Allergies. Alzheimer's disease. Ankylosis. Arteriosclerosis. Arthritis. Carpal tunnel syndrome. Cataract. Cicatrices. Contractures. Cornea, opacities. **Deafness.** Dupuytren's, contracture. Ectropion. Emphysema. Fibroids. Frozen, shoulder. Glands, enlarged. Glands, indurated. Indigestion. Indurations. **Keloids.** Lupus. Lymphatic glands, enlarged. Ménière's disease. Old, age. Otitis, media. **Otosclerosis.** Painful, adhesions. Premature, aging. Rectum, stricture. **Scar, tissue.** Scleroderma. Senile, dementia. Stiffness. Strictures. Tabes dorsalis. Tennis, elbow.

Tinnitus. Tumors. Urticaria. Uterine, tumors. Wounds.

HERBAL - Thiosinaminum belongs to the same chemical group as Urea. The colorless, bitter crystals are soluble in water, alcohol and ether.

HOMEOPATHIC - Thiosin. has been effective in curing adhesions, scars, lupus and enlarged lymphatic glands. It's a dissolvent, externally and internally, **for dissolving scar tissue, keloids.** It has been used for tumors, enlarged glands, lupus, strictures, adhesions. Inflamed, swollen glands, adenitis.

Ectropion, opacities of cornea, cataract, ankylosis, fibroids, scleroderma. Noises in ear. **Tinnitus aurium,** deafness. Gastric, vesicle and rectal crises. Strictures of rectum. Tumors of the uterus appendages.

For tabes dorsalis, improving the lightning pains. Sensation of heat and burning in affected parts. Increases body weight and reduces glandular swellings. Dr. A. S. Hard suggested Thiosin. for retarding old age.

MIND - Depression of spirits. Aversion to consolation. Moody, alternating moods. Alzheimer's disease. Senile dementia.

Abdomen - Flatulence. Internal adhesions after surgery, after hysterectomy, etc. Intestinal strictures.

Back - Torn ligaments in the shoulder. Frozen shoulder.

Ears - Ménière's syndrome, vertigo. Noises in ear. **Tinnitus** caused by fibrous bands. Formation of fibrous bands impeding free movement of the ossicles. **Otosclerosis.** Suppurative otitis media. **Thickened eardrum.** Catarrhal deafness with scar thickenings. Deafness due to some fibrous change in the nerve. Adhesions of the Eustachian tube. Eustachian tube catarrh.

Eyes - Cataract of the lens or cornea. Stricture of the lachrymal duct.

Female - Painful uterine adhesions, pelvic inflammation. Uterine tumors. Infertility-

Food - Increased appetite.

Kidneys - Strictures of the urethra and painful urination. Urine increased in quantity, no albumen or formed elements. Increased urination at night.

*****Limbs** - Locomotor ataxia. Stiffness of joints.

Lungs - Accelerated respiration. Emphysema.

Nose - Allergies.

Rectum - Stricture of rectum.

Skin - Wounds that are slow to heal. Wounds that form a lot of scar tissue. **Scar tissues.** Granulations, scars, keloids after burns, wounds. Inelasticity of the skin. Indurations. Urticaria. Lupus.

Stomach - Indigestion, flatulence of stomach and bowels, worse after eating. Pyloric stenosis. Stricture of esophagus.

Vertigo- Arteriosclerotic vertigo. Ménière's syndrome, vertigo.

COMMENTS - The mustard seeds of Sin-n. are of a reddish-brown color. Mixed with those of Sin-a., they are crushed between rollers and subsequently powdered and sifted at least twice. A fixed oil is obtained by pressure from the residue left on the sieve. The powdered mustard is mixed with a considerable quantity of wheaten flour and a small quantity of turmeric powder.

The Treasury of Botany noted that "The term 'flour of mustard' is not quite accurate, as the mustard seeds themselves contain little or no starchy material. The chemical ingredients are somewhat complex. Among them are a peculiar acid called Myronic acid, noticeable as containing a large proportion of Sulphur. When mixed with water and a peculiar substance called Myrosine, (analogous to albumen), also found in mustard seeds, yields a volatile Oil of Mustard.

"This has no separate existence in the seeds, but is formed artificially in the manner just stated. This oil is very acrid and has been used as a rubefacient. The fixed oil before mentioned as existing in the seed itself has little or no acidity and has been used as a purgative and vermifuge."

Scar tissue and adhesions. Ringing in the ears. Tinnitus or deafness in elderly people from otosclerosis. The

bones of the ears get calcium deposits. Scarred eardrums or eardrums that thicken and cause hearing difficulties. Chronic ruptured eardrums in children (Calen, acutely). Ménière's disease

Thiosinaminum (Chin-s.). Vertigo. Opacities of the cornea, cataracts.

Torn ligaments, especially in the shoulder. Painful adhesions affecting mobility of a joint. Internal adhesions of the uterus, adhesions after surgery. Strictures of the urethra and painful urination.

Dr. McCulloch found that it exerts a marked beneficial action on ear diseases accompanied by the formation of new connective tissue. He believed that this beneficial action was due to an increased pliability of this tissue. Its administration should always be accompanied by mechanical measures; better and more prompt results may be obtained in recent cases.

McCulloch also noted a beneficial action on vertigo and better results may be obtained with it in the relief of tinnitus aurium than with any drug used previously.

C. H. Pennoyer related the case of Mrs. C., 69, who had been ill for several years with gastric distress, sciatica, pains in hips down to knees, worse by motion. She had indigestion, flatulence of stomach and bowels, worse after eating. Pain in back. Inability to walk, much perspiration, depression of spirits and subnormal temperature. Her father had died at 69 of stomach trouble, mother at 58 of stricture of the bowel.

Examination showed stricture of the rectum two inches above the anus, there being a tense fibrous band forming a ring opening, which would not admit the index finger. Bougies and mechanical measures failed to relieve. Weakness was so great, the patient would faint at stool. Nutrition improved under general treatment, but the local condition was unchanged.

A year later the stricture was slightly increased. Thiosin. was then given, 2 grains, twice daily. The following year the patient was found to be much improved. Examination showed that the scar band had gone, the speculum could be introduced and the mucus membrane was normal in appearance, though not as elastic as a normal rectum should be.

W. Spencer applied this property of

***resolving scar tissues in cases of tinnitus aurium "where the ossicles are bound down and the function of the tympanic cavity so much impaired by fibrous bands or adhesions." In such cases he had encouraging success. Enlarged lymphatic glands have been reduced in the same way.

RELATIONS - Compare: (1) Sil., Calen., Sinapis and Cruciferae. (2) Uterine tumors, Thlaspi. (3) Diuresis - also chemical. (4) Urea. Lup., Tub. (5) Scars. Sil., Graph., Fl-ac. (6) Affections of rectum, Nit-ac., Graph., Scirr.

REFERENCES - Anshutz. Boericke. Clarke. Grimmer. Murphy. Phatak.

***THLASPI BURSA PASTORIS

(Shepherd's Purse)

PHARMACY - thlaspi. Thlaspi bursa pas- toris. Shepherd's purse. Bursa pastoris. Capsella bursa pastoris. N. O. Cruciferae. Tincture of fresh flowering **plant. Historical dose:** Tincture and all potencies.

CLINICAL - Albuminuria. Colic. **Cystitis.** Dropsy. Dysentery. Dysuria. Fibroma. Fibroids, uterine. Flatulence. Gallstones. Gonorrhea. Hematuria. **Hemorrhages.** Kidney, stones. Leucorrhea. Liver, disorders. Metrorrhagia. Miscarriage. Nausea. Nosebleed. Ranula. Strangury. Urethritis. **Uric acid, diathesis. Uterine, bleeding.** Uterus, cancer. Whitlow.

HERBAL - The Treasury of Botany noted that Thlaspi is "A native of Europe, it has accompanied Europeans in all their migrations and established itself wherever they have settled to until the soil." It does not refuse to grow in the poorest soils, but it luxuriates in the richest.

Burnett noticed that it flourished best in the neighborhood of dunghills and the odor of the tincture is much suggestive thereof. Some have seen in the seed-vessel the signature of the shape of the uterus.

Burnett found in it an organ remedy of vast importance. He said the tincture is the best thing to give for menses that have been checked, for uterine hemorrhages he preferred the potencies.

Thlaspi bursa pastoris HOMEOPATHIC - Hemorrhagic and **uric acid diathesis.** Hemorrhages are profuse, periodic, blood dark, clotted. Uterine hemorrhage with cramps and expulsion of clots. Hemorrhage from uterine fibroid with aching in back or general bruised soreness. Bleeding fibroids.

Bleeding between the menses. Tendencies to miscarriage. Bleeding at ovulation or postpartum hemorrhage of dark, red, oozing blood (Ham.). Passive bleeding. Hemorrhage with burning or a mild bladder problem.

Uterine hemorrhages concomitant with bladder infections. Albuminuria during pregnancy. Kidney and bladder irritation. Kidney stone formation (Sars., Lyc.). **Chronic cystitis.** Craves buttermilk. The toes are affected along with cramping pain in stomach. Chronic neuralgia. Aching between scapulae.

MIND - Impulse to walk far. Restless, goes from room to room. Agony because of pains. Spells of causeless weeping. Stupefied and dull, as if she had not slept enough.

Abdomen - Flatulence. Pain between end of sternum and umbilicus like needles or an electric shock. Cramping pain, better bending over. Bloated after eating, with loud emissions of flatus; bowels feel as if drawn down and out.

Back - Continued pain in small of back. Morning backache. Wakes with violent pain between the shoulders. Weakness between scapula. Weakness between shoulders on rising.

Breasts - Milky water from right nipple. Shooting pains in right breast.

Causations - Suppression of hemorrhages or vaginal discharges.

Chest - Pulsative pain in left chest. Pain, uneasiness, and pressure behind the sternum.

Ears - Deafness and pain in left ear. Sensation as if something pushing in right ear. Spasmodic drawing from right ear to right lower jaw. Dry eruptions behind the ears. Small vesicles, with yellow points, above right ear. Scaly eruptions behind ears, with fissures in the fold. Sensation as of an insect entering the left ear, making buzzing noise, relieved by boring in ear with fingers.

Eyes - Eyes puffy. Dusky eyes, shiny and with dilated pupils. Dull ache behind eyes on awaking in the morning with aching in nape. Blurred vision. Sensation as if eyes are swollen, as if the ball was pressed inward. Sensation as of dust in eyes, worse after sewing or using eyes.

Face - Eyes and face puffy. Face feels parched and dry. Miserable countenance.

Female - Menses bright red and profuse. Menses too frequent and copious. Every alternate period very profuse. Menstrual blood stains indelibly. Leucorrhea before and after menses, bloody, dark offensive.

Leucorrhea stains indelibly, smells foul, excites itching. Scarcely recovers from one period before another begins. Metrorrhagia. Cutting pain from side to side across pubes, worse by standing. **Sore pain in uterus on rising. Uterine bleeding with violent uterine colic.** Uterine fibroids with cramps and expulsion of clots. Sexual excitement.

Food - Aversion to the sight of food. Aversion to potatoes. Craves buttermilk, juicy fruits. Oat cakes are eaten with a relish. Desire for bread and butter, which does not taste good. Nausea better after strawberries.

Head - Headache, with great fullness. Frontal pain, worse toward evening. Pain from above eyes up over head to nape. Scaly eruption behind ears. Sharp pain over right eye, drawing eye upwards, behind right eye. Heaviness over eyes. Pressing pain in forehead. Stupefying pressing pain in forehead. Violent headache, lasting all night.

Heart - Feels large and sore, then throb- bings go up into back of neck. Stitching pains at the apex. Palpitations worse in the morning in bed. Palpitation ending with cough. Pain left side of apex.

Kidneys - Chronic cystitis. Kidney colic and stones. Urethritis, urine runs away in little jets. Frequent desire.

Urine heavy, phos- phatic. Accumulation of **gtavel,brick-dust sediment**. Hematuria. Albuminuria during pregnancy. Dysuria and spasmodic reten

tion, after forceps delivery. Dysuria in the elderly, with dribbling. Often replaces the use of the catheter.

Limbs - Weariness in lower limbs, can hardly stand. Drawing pain in left thigh like gout. Severe pain and stiffness in right knee cap. Tearing, gouty pains left leg, worse in forenoon. Strained pain in right shoulder. Gouty pain in arm. Tearing, gnawing pain from elbow to throat. Rheumatic pain in left arm and shoulder blade, extending to throat. Hands tremble when holding anything. Swelling of veins of hand and arm. Tearing, wrenching pain in left wrist. Redness around root of nails. Lame feeling in right forefinger. Pain in the periosteum.

Liver - Gallstone colic, liver affection being secondary to uterine condition.

Lungs - Accumulation of phlegm in lungs. Convulsive cough, relieved as soon as phlegm is loosened. Hemoptysis. Dry cough on lying down with aching under left breast. Cough with irritation behind sternum. Fits of coughing as if the sternum pressed inward.

Male - Spermatic cord sensitive to concussion of walking or riding. Stitching in penis, running through to anus. Soreness of prepuce with intense itching or cold sensation (Agar.).

Modalities - Better bending over. Better cold bathing, dampness, Better open air, rapid motion. Worse every other month. Worse toward night. Worse suppression of hemorrhages or vaginal discharges.

Mouth - Bitter, slimy taste with dryness of mouth. Taste like bad eggs. Scratchy feeling in the palate. Mouth feels raw, as if from smoking strong tobacco. Mouth cracked in right corner and sore. Upper lip cracked. Teeth sore on closing jaws. Gums sore, neuralgic feeling in teeth.

Nose - Dull pain at root of nose. Gnawing pain in nasal bones. Soreness in nose, with tenderness on touch. Dryness of nose, preceded by sensations of bleeding. Bruised feeling each side of bridge, with bleeding from nose. Frequent nosebleeds. Nosebleed after nasal operations. Especially passive hemorrhage. Free discharge of

blood and mucus from left nostril.

Perspiration - Sweat profuse at night.

Rectum - Passage of blood. Diarrhea mushy, brown, dark, urgent, and sometimes with nausea. Diarrhea yellowish color. Constipation. Slow and difficult stool. Obstinate slow stool with severe pressure and urging without effect. Hard, difficult, dry stool, leaving anus sore. Bleeding after hard stool. Troublesome itching and protrusion of hemorrhoids.

Sensations - Sensation as of needles or shocks between end of sternum and umbilicus. As if neck and left shoulder would break with pain.

Skin - Skin dry, hot, even to burning.

Sleep - Restless tossing about. Frequent wakening. Sleeplessness. Sleepy after eating or falls asleep while eating. Confused and unpleasant dreams when asleep.

Stomach - Sick, faint feeling in stomach. Emptiness feeling in stomach. Cramping pain in stomach, toes hurt as well as stomach. Flatulence. Sour rising like heartburn. Attacks of nausea. Nausea so severe, could hardly raise head from pillow. Tobacco smoke, of which she was fond, now nauseates her. Nausea in the forenoon. Nausea with loathing of food. Vomited brown, sourish blood in the afternoon. Vomiting and purging, with great debility.

Temperature - Alternate chill and sweat during headache. All night chills, with wakefulness and slight diarrhea with swelling of tonsils. Chill at 9 a.m. or from 7 p.m. to 9 p.m. Chilly when uncovering during fever. Chill worse from going into warm room during fever. Continued fever with quick pulse.

Throat - Hoarse in morning with slight sore throat. Soreness of upper part of throat. Swelling of throat and face, worse left side. Tonsils swollen. Dry throat on swallowing. Dryness of fauces, with sensation of constriction of the throat. Dry sensation and scraping. Violent sore throat. Sensation as if the throat was laced together.

Tongue - Tongue and palate feel as if scalded. Ranula, caused enlargement of submaxillary duct. Tongue white, coated.

Taste like bad eggs.

Vertigo - Vertigo with sensation as if drunk. Dizziness in the forehead, like seasickness. Vertigo, worse rising.

COMMENTS - "Shepherd's purse," said Gerarde, "stayeth bleeding in any part of the body, whether the juice or the decoction thereof be drunk or whether it be used poultice-wise or in both or any way else. In a clyster it cureth the bloody flux, it healeth green and bleeding wounds, it is marvelous good for inflammations new beginning and for all diseases which must be checked back and cooled."

Gerarde added that the decoction will stop diarrhea, blood-spitting, hematuria and all other fluxes of blood. Burnett noted it for the effects of suppressed uterine disease.

Burnett observed it cause sexual excitement like Canth. It aided him in the cure of an inveterate case of gallstones, the origin of which he traced to the uterus.

Dudgeon reported the case of a woman who had recovered from jaundice. She then had a peculiar discharge after the menses flux of a brownish-green blood which was attended with obscure abdominal pains. The cervix uterus was swollen and soft but not ulcerated.

Dudgeon failed to cure this, but Rafin- esque of Paris, after trying other remedies, succeeded with Thlaspi. 6c, which had an immediate positive effect. Rafinesque then gave the tincture, and then again the 6c, and in a few weeks the cure was complete.

Dudgeon, in an article on Thlaspi., quoted a case of Rademacher's showing the action of Thlaspi. on uric acid excretion.

A woman whom Rademacher had relieved ten years before of a large quantity of urinary sand, again presented herself; her abdominal cavity was full of water, extremely swollen and she was passing urine of a light red color with bloody sediment. Thlaspi. tincture, 30 drops five times a day, was given solely with the idea of stopping the hematuria. The result was a more copious discharge of urinary sand than ever before, the urine increased, the dropsy disappeared and the woman was cured.

Dudgeon's own cases are no less striking. One such case concerned a woman, 76, who had rheumatic muscular pains in various parts and an abundant secretion of uric acid, which passed away with every discharge of urine.

Sometimes small stones formed and there was much pain in their passage along the ureter, but generally it passed in the form of coarse sand, which formed a thick layer at the bottom of the utensil. This sand continued to pass after the cessation of the rheumatic pains, which lasted six or seven weeks. Puls., Pic-ac., and Lyc. had no effect. Thlaspi. 1c diminished the sand to an insignificant amount.

Dudgeon also noted the case of a man, 57, who, in addition to other dyspeptic symptoms, had unusually large discharges of coarse uric acid, coming away in masses as large as a big pin 's head but without pain. Thlaspi lx stopped this.

He also recorded the case of a woman, nearly 80, who suffered from the presence of a calculus in left ureter.

She had previously passed much sand. *Thlaspi. lx* caused a great discharge of sand and a speedy relief of her pain.

Dudgeon referred to a case of Harper's illustrating the action of *Thlaspi.* on the bowels. An elderly woman had suffered for years from a copious discharge of mucus, pus, sometimes mixed with blood, sometimes nearly all blood, which passed from the bowels after each evacuation. She had been under high homeopathy, oxygen treatment and for a long time under Harper's care, all without effect. He then gave *Thlaspi. tincture* in 5 drop doses and cured the case in a few days.

Clarke, with *Thlaspi. lx*, saved a woman who had been curetted several times with little success from a further curetting, which was advised as being essential to the cure. *Thlaspi.* stopped the hemorrhages, restored the periods to their proper term and the patient immediately began to recover her strength, which had been drained to the last degree. There was no return of the trouble.

RELATIONS - Compare: (1) *Urt-u.*, *Croc.*, *Trill.*, *Mill.* (2) *Cruciferae*, especially *Sinapis*. (3) *Thiosin.* - fibroma, uterine tumors. (4) *Matth.* - inspissated secretions, grows near sewage stream. (5) Kidney stones, *Oci.* (6) *Uric acid*, pain in shoulder, *Urt-u.* (7) Uterine hemorrhages, *Trill.*, *Vib.*, *Ust.*, *Senec.* (8) Hemorrhages from bowel, *Merc.*, *Nit-ac.*, *Sulph.*, *Caps.*, *Merc-c.*, *Phos.*

REFERENCES - Boericke. Clarke. Murphy.

***THUJA LOBBI

(Red Cedar of Alaska)

PHARMACY - *thuj-1.* *Thuja lobbi.* Red cedar of Alaska. *Thuja menziessi.* *Thuja plicata.* N. O. *Coniferae*. The tincture is prepared with the fresh leaves. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC-*ThujalobbiorRedCedaris atree* which is almost 50 meters high and which originates from Alaska. From the heart-wood are separated out the *Thuja plicines* with antibiotic, as well as anti-fungal properties. These substances also exist in *Thuja occidentalis*.

There is no homeopathic proving for this remedy, but Dano conducted a clinical proving with it in 1934. *Thuj-1.* has emaciation and constipation. Chilly and the limbs are cold.

MIND - Anxious melancholy. Weeps and moans easily. Indifferent to everything except for his obsessions with his own suicide. Depressive neurotic condition. Psychosis from anguish. Lack of will-power. Personality problems with those around him. Hebephrenia.

COMMENTS - If the development within the compass of homeopathic remedies is followed, according to Roy. *Thuja lobbi* can be situated on the line: *Aur.*, *Sep.*, *Thuja lobbi*.

The tendency to suicide, which is characteristic of *Aur.* and the indifferent psychological disposition which characterizes *Sep.*, can be anticipated in the development of a symptomatological picture for this remedy.

RELATIONS - Compare: (1) Tendency to suicide (*Aur.*) and indifferent disposition (*Sep.*, *Ph-ac.*).

REFERENCES - Julian.

***THUJA OCCIDENTALIS

(Arbor Vitae)

PHARMACY - *thuj.* *Thuja occidentalis.* *Arbor vitae.* N. O. *Coniferae*, Tribe, *Cu-presineae*. Tincture of the fresh green twigs. **Historical dose:** Tincture and all potencies. Locally, for warts and excrescences, tincture or cerate.

CLINICAL - Abdomen, distended. **Anal, warts.** Angina pectoris. Anus, fissure. **Asthma.** Balanitis. Bedwetting. Cancer. Catalepsy. Chorea. Clavus. Colic. **Condylomata.** Constipation. Convulsions. **Cysts.** Diarrhea. Dyspareunia. Dysmenorrhea. Ear, polyps. **Emaciation.** Epilepsy. Epulis. Eyes, inflammation. Eyes, tumors. Fatty, tumors. Feet, fetid. **Flatulence.** Fibroids. **Fig, warts.** Ganglion. **Gleet. Gonorrhea.** Hemorrhage. Hair, disorders. Headaches. Hemorrhoids. Hernia. Herpes zoster. Ichthyosis. Intussusception. Joints, cracking. **Leucorrhea.** Miscarriage. **Moles.** Morvan's, disease. Mucous, patches. Muscae, volitantes. Myopia. **Nevus. Nasal, catarrh.** Neck, stiff. Onanism. **Ovarian, cysts.** Ovary, pain. Ozaena. Neuralgias. Nose, catarrh, polyps. Paralysis. Pemphigus. **Polyps. Post-nasal, catarrh.** Pregnancy, imaginary. Prostate, disease. Ptosis. Ranula. Rheumatism. Rickets. Sciatica. Seminal, emissions. **Sinusitis.** Smallpox. **Sycosis.** Syphilis. Tea, effects. Teeth, decay. Tongue, ulcers. Toothache. Tumors. **Vaccination, effects. Vaccinosis.** Vaginismus. **Vaginitis.** Variola. **Venereal, warts. Warts.** Whooping cough.

HERBAL - *Thuja* was introduced to France from Canada during the reign of Francis I, and it now has an honored place in many gardens and shrubbery. The native habitat of *Thuja* is not without its importance in relation to therapeutics. It loves swamps, it is Hahnemann's typical anti-sycotic and *Grauvogl's* hydrogenoid.

HOMEOPATHIC - *Thuj.* is one of Hahnemann's discoveries. Most of the remedies of his *Materia Medica* had been known in a fashion before his time, but practically nothing was known of the therapeutic properties of

Thuj. until Hahnemann proved it. Old-

school observers found in Thuj. an efficient hemostatic, locally applied, especially after tooth extraction.

Hahnemann found Thuj. to be an antidote to the sycotic miasm, meaning the constitutional disease resulting from suppressed gonorrhea and having **warty growths** as its characteristic manifestation. Soft, spongy warts, emitting a fetid fluid with a sweetish odor something like herring brine. Warts that bleed readily and having the coxcomb or cauliflower form.

Thuj. acts chiefly on the mucus membranes of genito-urinary tract intestines, skin, mind, nerves, glands, occiput and left side. Acts on skin, blood, gastro-intestinal tract, kidneys and brain.

Wart-like growths on mucus and skin surfaces. Soft, exuberant, fungoid tissue, **polyps, condylomata, warts**, pediculated, black, suppressed. Spongy tumors, **jig warts**. bleeding fungus growths. Birthmarks. Moist mucus tubercles.

Antibacterial action, as in gonorrhea and vaccination. **Vaccinosis, never well since vaccination**, neuralgia, skin troubles etc. Variola, aborts the pustule and prevents the suppurating fever. **Suppressed gonorrhea**. Crying babies with a sycotic taint from the parents. Complaints from moonlight.

Burning, sticking, numbing, drawing or wandering pains worse warmth. Sycotic pains, tearing in muscles and joints, worse at rest, better in dry weather, worse damp humid atmosphere, lameness. Left-sided and chilly medicine.

Great prostration. **Rapid exhaustion and emaciation**. Neurasthenia, prostatic weakness. The patient is exhausted and soft, body feels thin and delicate, frail. Deadness of the affected part. Sensation of lightness of body when walking.

Flesh feels as if beaten off the bones. Edema about the joints. Pains keep extending from original site. Stitching, tearing pains in the glands as if they were being torn to pieces. Rheumatism. Paralysis. Jerking of the upper part of the body of spinal origin, chorea. Discharges are foul, acrid, musty, rancid or of sweetish odor. Oily, stools, skin, sweat. Trickling in urethra. Congenital inguinal hernia. Venous stasis. Aneurysm by anastomosis, swelling of the blood vessels.

MIND - Introverted and private. **Dullness of mind**. Cannot concentrate. Speech slow, hunts for words. Hurried with ill humor, talks hastily, swallows words. Makes mistakes in writing and talking. Uses wrong words or omits words and syllables.

Confusion in morning. Loses his way in well-known streets. Cretinism. Imbecility of mind and loss of speech after vaccination. Vanishing of thoughts while speaking. Disinclined to talk, worse on awaking mornings.

Sadness. Aversion to life. **Depression, feels isolated and alone**. Aversion to company. Feels isolated and different from everyone, that they do not belong. Avoids the sight of people. Mental depression after childbirth (Sep.). Irritable, jealous, quarrelsome towards husband or mother.

Self-contempt. Reproaches himself. **Thinks she is ugly or unclean**. Feels unlovable. Emotional sensitivity. Music causes weeping and trembling. When spoken to answers with tears and sobbing.

Anxiety about salvation. Anxiety about health. Anger from contradiction. Overexcited, angry or anxious about trifles. Restlessness with ill-humor. Walks in a circle in room. Talks hastily.

Fear of getting infections, diseases, germs. Despair of recovery. Fear of being incurable, of death. **Thinks his blood is dirty or poisoned**. Insane women who will not be touched or approached. Fear of the wind.

Fear of strangers. Nervous, begins to twitch at approach of strangers. Mistrustful, secretive and paranoid. Fear of being discovered, and their secrets will be revealed. Full of hidden plans and secrets. Tells lies to hide real intentions. Manipulates others. Controls herself among strangers and doctors. Fanaticism.

Indifference to opposite sex. **Fear of getting venereal diseases**. Religious fanatics. Religious aversion to sex (Puls.). Feels sex is

Thuja occidentalis dirty, shameful, sinful. **Sexual perversions**. Immoral sexual behavior. Secret and hidden sexual activities. Many sex partners. **Sexual desires excessive and strange**.

Fixed ideas and delusions, as if a strange person were at his side. Delusions as if soul and body were separated, as if something alive in abdomen (Croc.). Delusions, **as if body were fragile, made of glass**. Delusion as if being controlled by a stronger power. Imagines himself double or treble. Sudden impulse to kill herself. Time passes too quickly.

Abdomen - Distended. Indurations in abdomen. Intussusception of intestines. **Flatulence and distention, protruding here and there**. Colic. Gurgling in bowels. Rumbling, flatulence, upper part drawn in. Movements in abdomen, **as if something alive**, without pain (Croc.). Soreness of navel. Cutting and squeezing in hypogastrium. Ileus. Cutting, squeezing in hypogastrium, groin. Stinging as from needles. Hernia. Stitches in inguinal glands. Soreness of navel. Yellowish or brownish spots on abdomen. Herpes zoster.

Back - Cramp-like pains. Drawing pain, when sitting, in sacrum, coccyx. Burning in lumbar region. Pulsation in the back. Pressive, bruised sensation in back. Pressing pain over kidney region. Atrophy of long muscles.

Spine curved. Spinal curvature after vaccination. Stands bent forward. Boils on back. Blood boils. Steatomous tumors. Cervical glands swollen.

Bladder - Paralysis of sphincter of bladder. Bladder feels paralyzed, must wait for urination. Violent burning pain in fundus of bladder. Burning in urethra. Urethra swollen, inflamed. Cutting pains after urination (Sars.). Pain and burning felt near neck of bladder. Jerking, voluptuous sensation in fossa navicularis. Sensation as if a drop were running down urethra, after urination. **Urinary stream forked and small.** Frequent urging to urinate, with profuse flow. Frequent urination at night. Involuntary urination at night. Lithemia. Diabetes mellitus.

Breasts - Aching, pressing pains. Drawing pains, with swelling of both breasts. Sensitiveness and heaviness after the menses. Stinging and itching. Breast cysts, lumps and tumors. Indurations in left breast. Retracted nipples.

Causations - Suppressed sycosis. **Badly treated or suppressed gonorrhea.** Syphilis. **Vaccinations.** Sulphur, mercury. Sunstroke. **Sexual excess.** Tea, coffee, beer, tobacco. Sweets, fat meat, onions.

Chest - Stitches in chest, worse cold drinks. Chest pains take various directions. Pains radiating in various directions. Sensations as if falling drops in chest. Skin of clavicles blue. Brown spots on chest. Brown spots in axilla, like nevi. Skin on clavicles blue. Strong perspiration in axillae.

Constitutions - Suited to hydrogenoid constitutions. Strumous and sycotic pains. Lax muscles, light-haired adults and children. Lymphatic temperament in very fleshy persons, dark complexion, black hair, unhealthy skin.

Coughs Dry, hacking cough in afternoon, with pain in pit of stomach. Cough only during the day or worse as soon as he eats or drinks anything cold. Constant cough without difficulty in breathing. Cough in morning after rising. Cough evenings after lying down.

Dreams - Anxious dreams. Dreams of teeth breaking off. Dreams of falling, of misfortune. Dreams of dead people, of bodies, of dying.

Ears - Chronic otitis, purulent discharge. Watery, purulent, putrid otorrhea. Chronic otorrhea after vaccination. Ear discharge smells like putrid meat. Polyps. Cracking **in ears when empty swallowing.** **Noise in** ear as from boiling water. Inner ear as if swollen with hardness of hearing.

Eyes - Conjunctivitis after vaccination. Blood-red eyes, full of tears, stand open. Styes and tarsal tumors (Staph.). Eyelids agglutinated at night, dry, scaly. Burning and stinging of eyelids. Lids heavy as lead. Jagged iris. Ciliary neuralgia. Iritis. Acute and chronic inflammation of sclera. Chronic scleritis. Chronic keratitis, with excessive photophobia,

Thuja occidentalis after vaccination. Small brown spots on cornea. Exophthalmos from tumors behind eyeball. Large, flat phlyctenules, indolent. Constant ache in eye, worse bright light. Feels as if cold air were streaming out of the head through eye, better when warmly covered. Photopsies, beyond visual field. Floating green stripes. Eye symptoms better warmth and covering.

Face - Pale, waxy, shiny, dark under eyes. Greasy skin of face. Light brown, freckles on face. B. loaded. Edematous erysipelas of face. Eruptions leaves livid spots. Lips pale, swollen, peeling off. Twitching of lower lip. **Warts.** Tumor on cheek. Blood vessels of face and temples distended. Netted with spider-like veins. Boring in malar bones (left), better by touch. Face aches. Burning heat and redness of face. Neuralgia from suppressed gonorrhea or eczema of ear. Cracking of joint of jaw.

Female - Sweaty genitals before menses. Bearing down pain during menses. Menses too early, too short. Scanty, retarded menses. Burning in varicose veins of genitals during menses. **Leucorrhea**, profuse, thick, greenish leucorrhea, from one period to the next. **Vaginitis.** Vaginal itching. **Vagina very sensitive**, prevents sex (Staph., Plat.). **Venereal warts.** Fistula of rectum and vagina. Whitish ulcers on labium majorum. Warty growths on vulva and perineum. **Uterine polyps**, fleshy excrescences. Cauliflower excrescences, bleeding easily. **Ovarian cysts.** Severe pain in left ovary and left inguinal region. Chronic ovaritis after gonorrhea. Ovaritis, worse left side, at every menstrual period (Lach.). Erosion of cervix. Fetus moves **violently, awakes her.** **Prolapsed uterus.** Miscarriage in the third month. Labor pains weak or ceasing.

Food - Complete loss of appetite. Craving alternating with want of appetite. No appetite, with mental depression. Unable to eat breakfast. Aversion to fresh meat, potatoes, **onions and garlic.** Desires chocolate, cold food, drinks and salt. Worse from beer, wine, acids, tobacco, onion, sweets. Bread tastes dry and bitter. Tea-drinking dyspepsia. Thirst increased,

Thuja occidentalis _____ at night.

Glands - Adenitis. Tearing pains in glands. Enlarged, swollen glands.

Head - Left-sided headaches. **Pain as if pierced by a nail** (Coff., Ign.). Pressing in vertex, as from a nail. Tearing, jerking pain. Headache, worse sexual excess or tea, better bending head backwards. Feeling of numbness in brain. Sensation as if parietal bones were being knocked to pieces. Heaviness of occiput. Boring

through the temples. Meningitis. Neuralgia from tea (Sei.). Wants head wrapped up. Honey smelling sweat. White scaly dandruff. Dry hair, splits and falls out. Warts.

Heart - Anxious palpitations, on waking in the morning. Stitches in region of heart. Cramp in heart. Visible palpitations, without anxiety. Excitement and pulsation of arteries before menses. Palpitations during menses. Palpitations from ascending. Violent pulsations in evening. Pulse full and accelerated in evening. Pulse slow and weak in morning. Swelling of veins.

Kidneys - Nephritis with swollen feet. Pains from left kidney to epigastrium, worse motion. Lithemia. Diabetes mellitus. Cutting, squeezing in bladder and urethra. Urethra swollen, inflamed. Forward cutting in urethra on urinating. Desire sudden and urgent, but cannot be controlled. Frequent urination, with profuse flow, with pain in other parts. Urine burns, dribbles, foul, foamy. Sensation of trickling after urinating, as if drop running down urethra. Involuntary urination at night, when coughing.

Limbs - Cracking in joints when stretching them. Muscular twitchings, weakness and trembling. Limbs feel as if made of wood or glass and would break easily. Limbs feel paralyzed. Hip joints give way when walking. Restless knees. Coxalgia with tender soles. Pain in heels and Achilles tendon. Foul, acrid foot sweat. Ingrown toenails. **Nails brittle, ribbed, soft, distorted, discolored, crumbling.** Crawling or inflamed finger or toe tips. Trembling of hands and feet. Fingers cold, numb, as if dead, on waking at night.

Thuja occidentalis Lungs - Asthma with red face. **Asthma in children** (Ars., Nat-s.), especially vaccinated children, worse at night. Dyspnea from mucus in trachea. Short difficult breathing, worse from deep breathing and talking. Hemoptysis. Expectoration, easy when lying down, green. Expectoration tastes like old cheese. Loose expectoration and easy when he turns from left to right side.

Male - Balanitis. Burning between glans and prepuce. Itching in glans and prepuce. Inflammation, swelling of prepuce and glans, pain in penis. Moisture on glans. Glans very sensitive. Excrescences of prepuce and glans. **Condylomata**, fig warts. **Venereal warts.** Eczema on genitals. Whitish chancres with hard edges. Pain as from splinters in chancres. Herpes. **Gonorrhea**, scalding pain when urinating. **Impotency** after suppressed gonorrhea. Painful spermatic cords from suppressed gonorrhea. Rheumatism from suppressed gonorrhea. Prostatic enlargement and weakness (Sabal., Ferr-pic., Iod., Thiosin.). **Offensive smelling genitals**, sweetish smelling sweat on scrotum. Testes feel bruised, left drawn up. Chronic induration of testicles. Testes as if contused, worse walking. Chordee, worse at night. Jerking in penis. Masturbation habit. **Sexual desire increased** or decreased. **Sexual excesses.** Nightly painful erections causes sleeplessness. Nocturnal emissions followed by heaviness and ill-humor. Offensive semen.

Modalities - Better on left side, drawing up limbs, crossing limbs. Better motion. Better pressure, rubbing, scratching. Better wrapping, warmth, air, wind. Better free secretions, sneezing. **Worse from cold and dampness.** Worse sun, bright light. Worse at night, closing eyes, from heat of bed, left side. Worse from increasing moon, moonlight. Worse at 3 a.m. and 3 p.m. Worse periodically, yearly. Worse touch, stretching. Worse after breakfast, after eating, chewing. Worse during menses. Worse urinating, sex. **Worse after gonorrhea, after vaccinations, after suppressed warts.**

Mouth - Aphthae, ulcers in the mouth (Bor.). Varicose veins on tongue and mouth. Mouth becomes dry while chewing food. Mouth as if filled with blisters. Mouth as if it has been burnt. Sweetish taste with gonorrhea. Taste as of rotten eggs, in morning. Teeth decay at the edge of gums, crumble, turn yellow. Gnawing pain in teeth, worse cold, tea and blowing nose. Gums, very sensitive and retract. Pyorrhea alveolaris. Drinks fall audibly into stomach.

Nose - Warts on nose. Nose red and hot. Sinusitis. **Chronic sinus infections.** Chronic catarrh after measles, scarlatina, variola. **Chronic catarrh, thick, yellow-green mucus**, blood and pus. Coryza fluent outdoors, dry in room. Violent, sudden coryza. Dryness of nasal cavities. Painful pressure at root of nose. Pain in teeth on blowing nose. Soreness and ulceration of nostrils, worse pressure. Ulceration within the nostrils. Painful scabs in nostrils. Bloody scabs or briny odor in nose. Nosebleed, worse after being over-heated. Smell in nose as of fish-brine or sour beer.

Perspiration - Profuse, sour. Sweetish and strong, smelling like honey. Sweat is foul, oily, pungent, sweetish, sometimes garlicky. Staining brownish, yellow. Profuse sweats at night, staining clothes yellow. Profuse sweat on genitals, gushing, worse company. **Sweats only on uncovered parts** or all over except head, when sleeping. Cadaverous exhalation of skin. Profuse, oily sweats, after asthmatic attacks.

Rectum - Constipation with violent rectal pain, causing stool to recede (Sil., Sanie.). Chronic diarrhea, worse after breakfast. **Diarrhea after vaccination.** Diarrhea periodically returning at same hour. Noiseless emission of flatus. Moisture oozing from anus, moist perineum. Ana/fissure, painful to touch. **Anal warts.** Condylomata at anus. **Venereal warts.** Red blotches at anus like fig warts. Swollen hemorrhoids, pain worse sitting with stitching. Hemorrhoids sensitive to touch. Burning pains at the anus. Burning in perineum. Perineal fistula. Perineum moist.

Sensations - As if a strange person were at her side. As if under the influence of a superior power. As if soul and body were separated. As if whole body were very thin and delicate, as if its continuity would be dissolved, as if frail and easily broken, as if made of glass. As if a nail were pressing into vertex, as if a nail were driven from within outward in vertex. As if abdominal muscles were being pushed out by arm of a child. As if a living animal were in abdomen. Legs as if made of wood when walking. As if lower limbs were elongated. As from flea bites.

Skin - Skin very sensitive to touch. Skin as if pricked with needles. One side cold. Dirty, hairy, dry skin with **brown spots on hands and arms**. Freckles and blotches. Eruptions itch or burn violently, worse cold bathing. **Eruptions only on covered parts**, worse after scratching. Herpetic eruptions. Herpes zoster. **Polyps**. Ring-worm. Violent itching on different parts, as from fleabites. Pemphigus. Smallpox, useful during suppurative stage. Chickenpox. **Warts**. Warts in ano-genital region. Warts, large, seedy, pedunculated, oozing moisture and bleeding easily. **Impetigo, with itching**. Epithelioma. Sarcoma. Nevi, **Birthmarks**. Carbuncles and ulcers, in anal-genital region. Ulcers flat with bluish bottom. Foul pustules with sunken apices. Luxuriant growth of hair on parts otherwise not covered by hair. **Nails crippled**, brittle and soft.

Sleep - Persistent insomnia. Sleepless when lying on left side. Nocturnal sleeplessness with agitation and coldness of body. Sleeplessness after menses. Nightmare after menses. Dreams of death, of corpses or dead people. Dreams of falling from a height. Lascivious dreams without emission of semen with painful erections on waking. Awakens from too violent movements of fetus. Heavy sleep, can't get awake in morning.

Stomach - Cutting pain in epigastrium. Indurations in stomach. Sinking sensation in epigastrium before food, thirst. Flatulence, pain after food. Noisy swallowing, loud belchings. Gulping up of large quantities of acids. Eructations rancid or acrid. Eructations afford instant relief. Rancid belchings after fat food. Pressing in stomach, with retching, during menses. Vomiting of mucus, or of greasy substances.

Stools - Stools gurgle or pop out, hard, oily, black, lumps. Painless, grass green stools, mixed with gushing water. Stools hurried, explosive, gassy, spraying. Tenesmus of stool with rigidity of penis. Hard stool followed by soft stool. Hard balls. Large, hard stool coated with blood.

Teeth - Very sensitive teeth. Gnawing, in teeth, worse cold. Toothache before and after menses. Toothache on blowing nose. Teeth crumble, turn yellow. Teeth decay next to gums. Gums retracted. Gums swollen, inflamed, dark red. Pyorrhea alveolaris.

Temperature - Chilly from least change of weather. Shaking chill with yawning, worse urinating, not better by heat. Chill, beginning in thighs. Chill without thirst. Coldness of one side. General coldness during menses. Shivering from slightest uncovering in warm air. Heat rises into chest with icy cold hands, nosebleed or cough. Orgasm of blood in the evening with throbbing in the blood vessels. Intermittent fever with chronic gonorrheal contamination.

Throat - Throat dry and rough. Polyps of vocal cords. Papilloma of larynx. Chronic laryngitis. Much mucus in throat, hawked up with difficulty. Painful swallowing. Sensations as if constricted when swallowing. Sensations as if a skin in larynx. Much mucus in throat hawked up with difficulty. Mucus tubercles in fauces.

Tongue - Tip of tongue very painful. Tongue as if it has been burnt. **White blisters on side close to root, painfully sore**. Ranula, varicose veins on tongue and mouth. Frequently bites tongue, from swelling of tongue. Tongue swollen, worse right side. Ranula. Varicose veins on tongue and mouth.

Urine - Foamy urine. Split, small stream. **Urinary stream forked and small**. Discharge of glutinous moisture from urethra. **Weak stream**. Urine becomes

Thuja occidentalis cloudy after standing. Urine yellowish or wine-colored. Urine dark red in morning. Urine deposits abrown mucus. Urine with dark, cloudy sediment, in rheumatism. Urine highly colored and of strong smell. Urine profuse, light-yellow. Urine bums, dribbles, foul, foamy.

Vertigo - Vertigo as from motion of a swing. Vertigo everything seems to jump. Vertigo on closing eyes. Vertigo looking upwards or sideways. Reeling, as after turning in a circle. When rising from sitting; on stooping.

Vision - Shortsighted. Diplopia. Amblyopia with blurring, better rubbing. Misty or obscured, with dilated pupils. Dim vision as from mist or veil, in open air, with confusion of head. Flickering vision. Sees flames of light like fire-flies. Sees clouds and streaks. Muscae volitantes. Streaks of light or sparks passing downward. Objects appear smaller.

COMMENTS - Millspaugh noted that the American Arbor Vitae is a "spiry evergreen attaining a height of from 20 to 50 feet, though generally not above 40 and a diameter of about 10 to 20 feet through the greatest breadth of foliage. It assumes a conical form with such true lines as to appear 'clipped,' thus forming one of our most valued high-hedge trees.

"It abounds in the northern zones of North America from Pennsylvania northwards. There it "often forms what are commonly known as cedar-swamps. It grows upon the rocky banks of rivers and in low, swampy spots, blossoming from May until June and maturing its fruit in autumn."

Teste remarked that in the period when the doctrine of signatures prevailed, the “Resinous callosities of the stems and leaves of Thuja might have seemed an indication that the plant was the specific for sycosis and warts.” Teste dismissed this idea, but he did ask whether resinous substances that have the power of modifying vegetable juices in a peculiar way may not affect the animal fluids in the same manner.

He included *Castoreum canadense* in his Thuja. group and followed by giving an instance in which it acted on fig-warts.

Castoreum canadense is the product of an animal that subsists on the bark of resinous trees.

Hering described Thuja.'s action on fluids as “dissolution of fluids of the body, which become acrid, probably caused by Thuja perverting lymphatic secretions, disturbs digestion and sanguification.”

He went on to discuss Thuja's action in the vegetative sphere: “A surplus of producing life, nearly unlimited proliferation of pathological vegetations, condylomata, warty sycotic excrescences, spongy tumors and spongy pock exudates which organize hastily. All morbid manifestations are excessive, but appear quietly, so that the beginning of the diseased state is scarcely know.”

Boenninghausen found Thuja both preventive and curative during an epidemic of smallpox. It aborted the disease process and prevented pitting. In veterinary practice, Thuja has proved curative in farcy and in “grease.”

These clinical uses point to Thuja.'s affinity to vaccinations. No one has written more forcibly or lucidly on this than Burnett did in his book, *Vaccinosis and its Cure by Thuja*. “*Arbor Vitae*: nomen omen,” said Burnett on his title page. In his hands, Thuja. proved to be a tree of life to numberless sufferers from the vaccination miasm.

By “vaccinosis” Burnett meant the disease known as vaccinia, the result of vaccination, in addition to “that profound and often long-lasting morbid constitutional state engendered by the vaccine virus.” Thuja. is homeopathic to this state, and therefore curative and preventive of it.

Burnett made the observation, which Clarke confirmed, that the vaccination does not need to take in order to produce the vaccination miasm. Many people date their ill health from a so-called unsuccessful vaccination, so vaccinosis may exist apart from vaccinia. The anti-vaccinosis action of Thuja. is part of its anti-sycotic action, therefore vaccinosis is a sycotic disease.

Burnett noted the case of an infant, ten weeks old, whom he was called to see as it was supposed to be dying. He found it ghastly white and in collapse. There was ***Thuja occidentalis*** nothing to account for this except that the baby had its wet-nurse changed two or three days before.

The wet-nurse was questioned and declared herself quite well and looked it, but “her arm was a little painful.” She had been revaccinated in the Marylebone Workhouse the day before she took charge of the patient.

Burnett found the vaccine eruption just turning into the pustular stage. He concluded that the infant was sucking in the vaccine poison with its nurse's milk.

He gave Thuja. 6c to both infant and nurse. The baby gradually improved the same day and the next morning, though still pale, was practically well and the vaccine vesicles on the nurse's arm had withered.

Burnett quoted a case of vaccine rash in an infant following the vaccination of its mother, who was nursing it. The effects of chronic vaccinosis are protean. Prominent among them are asthma, neuralgias, skin disorders, indigestion and constipation, warts and new growths of many kinds. Emaciation, brain damage, epilepsy and blindness. Hyperactivity, attention deficit disorder and autism.

In these effects, a favorite method of Burnett's was to give a course of twenty- four numbered powders, only three or four of them medicated with Thuja. 30c, one to be taken at bedtime.

With the same prescription, he cured many cases of paralysis; his indications included paralysis of left side of body, very chilly, worse in morning, in wet weather and in cold. Burnett also found enlargements of the spleen to dissolve with these indications.

The first case Clarke treated homeopathically was one involving new growths. There was a cluster of small warts on the forehead of a boy that had lasted eighteen months, following a cat's scratch. Thuja. in small doses and tincture painted on permanently cured in three weeks.

A gentleman, about 50, consulted Clarke about a wart on the right side of his head. He was then bald and the wart developed in the same locality soon after and has since remained. The patient had been twice vaccinated. Clarke gave him Thuja. 30c, twenty-eight powders, one in seven medicated, one at bedtime. In one month there was much reduction, Thuja. was repeated and in little over two months the wart was goit.

Burnett suggested Thuja. for fatty tumors, which he regards as sycotic in nature. Thuja not only produces symptoms of the secondary stage of gonorrheal and vaccine affections, it also produces urethritis and a variolous eruption.

Dudgeon reported acute urethritis with yellow discharge lasting altogether a fortnight as the result of chewing a Thuja cone.

Goullon cured a lady who had a headache for a year. On waking, she felt as if a tight hoop enclosed her

forehead, not passing away until noon. Eyelids heavy as lead. Thuja. IOx, one dose at bedtime, permanently cured.

Robert Farley related the case of two children, age 5, who had what he graphically termed "urinary tantrums." Two hours after being put to bed they would wake kicking, crying and refusing to answer a question. This lasted an hour or more. Asked if they wanted to urinate they would refuse to answer, strike at attendant, or even say "No."

Finally it was found that if they were taken up and put on the closet they would urinate and then go to sleep readily. One of the children developed signs of incipient inflammation of the left hip joint. The totality led to the selection of Thuja., which was given in the 200c.

After the first night there were no more "tantrums," and in two months the child was perfectly well. This child's father had gonorrhea, treated by injection, some years before the patient was born. But the other child's father had not had gonorrhea. In the latter case, which was exactly like the former, the cure was immediate, in the former case relief occurred on the second night.

c. W. Roberts found Thuja. in five to seven drop doses at bedtime, to control nocturnal seminal emissions better than any other

remedy. "Nocturnal seminal emission" is an emphasized symptom.

Percy Wilde recorded the case of a young married woman who had a large epulis on her lower jaw, rapidly increasing in size, ulcerating on the surface, very painful and filling the mouth with an ill-smelling secretion. The entire tumor was removed by operation and also the subjoined bone.

Three weeks later the tumor was as large as before and increased daily. Thuja. lx was then given. The growth stopped immediately, ulceration ceased, and the pain disappeared. In three weeks the gum was healthy and remained so permanently.

Villers related a case of scalp tumor in a youth of seventeen. The tumor had existed for two years and had somewhat the appearance of a bean. It was situated about the posterior edge of the parietal bone, was devoid of sensation and the hair had disappeared from it, making it very conspicuous.

Thuja. 30c was given, a dose every twenty days. In four months the youth was almost cured, entirely so in five months, and the hair grew again completely covering the spot.

George Royal related a case of persistent cough cured with Thuja. Miss X., 19, fair, had for three months a painless, dry cough. The irritation was only in the throat. There were six small growths at the back of her throat and one near the vocal cord. She had never had a cough before. She also had green, excoriating leucorrhea and menses that were a little too early. Thuja. 30c cured the growths and the cough in about three weeks.

R. B. Johnstone offered some indications for Thuja. in hernia. He found it particularly useful for women with a sycotic history who have a tendency to left-side inguinal hernia after labor. When babies cry a lot, the umbilicus protrudes, growing red and sore, especially when the father has a sycotic history. Left inguinal hernia in infants, child cries all the time and is only quiet when the left inguinal region is relieved from pressure or the thigh is flexed on the abdomen.

Burnett recorded a case of lichen urticatus in a boy of 14, which came into his hands after a long course of treatment, external, internal and dietetic, at the hands of allopathic specialists without result.

The rash came periodically in warm weather; the patient literally tore himself because of the irritation. The rash was worse on the left (vaccinated) side. Thuja. 30c was given in infrequent doses. The spots continued to appear for a week and then disappeared. The skin remained clear in spite of the patient indulging in all kinds of previously forbidden foods.

Birthmarks and stains (Sep., Care.). Birthmarks and moles in children with a sycotic history. The skin is mottled and discolored, brown or red mottled spots, discoloration of the backs of the hands and feet. Tendency toward acne and greasy skin. Blood blisters. Spider hemangiomas. Benign tumor growths. Polyp formation, particularly on anus, rectum, or cervix.

Severe left ovarian pains, sometimes burning, extend down thigh. Pains worse from any attempt at exercise, especially walking. Pains occur with every menstrual period and are generally worse before and during the flow. The pain compels the patient to lie down, but lying on the left side aggravates.

Gonorrhea with yellow-green discharge. Vaginitis and cervicitis with yellow-green discharge (Puls.). Chronic sinusitis, yellowgreen or green mucus. White sinus discharge, with warts and a history of gonorrhea. Sweet smelling perspiration, sickly sweet.

Ailments due to vaccinations (Sil.), especially smallpox. Ailments from gonorrhea or suppressed gonorrhea. Sycotic gonorrhea miasm. AIDS.

Belief that they are somehow separate, that they are different (Nat-m.). Tendency to conceal themselves, cautious as a form of protecting themselves. Difficulty trusting or relying on other people. Self doubt, poor confidence. Don't trust themselves.

Elusive, changeable personality, often distorted. Evasive. Possessive, manipulative (Ars.). Calculating. Males tend to be more reserved, distant, aloof, and manipulative; while females are manipulative, but spacey and soft, with poor confidence.

Distorted sexual desires, often with high

Thuja occidentalis sex drive. Tendency to hide their sexual past or desires. Can have a history of sexual, physical (Anae., Staph.) or verbal abuse (Lyc., Nat-m.). Secret obsessions. Can be secret drinkers or drug users. Fixed, distorted ideas. Distorted perceptions (Med.).

Fear of going crazy, or losing control. Fear or sensation of leaving their bodies (Cann., Med.), fear they will not be able to get back into their bodies (Anae.). Can be fearful of demons, spirits or people who can control them or possess them. Idea that there is something bad or dirty in them. Afraid of own thoughts (Arg-n.), that if they think something negative, it will come true.

RELATIONS-Antidoted by: Cham, (nightly toothache): Cocc. (fever), Camph., Merc., Puls., Sulph. Teste: Colch. the best antidote in his experience. Aniido/e to: Merc., Sulph., Iod., Nux-v. **Compare:** (1) Med., Nat-s., Calc., Nit-ac., Sil., Psor., Sabin., Puls. (2) Cupre-aust. - sharp, prickling pain, general feeling of warmth, rheumatism and gonorrhea. (3) Cupre-1. - acts like Thuj., terrible pains in the stomach. (4) Sphingurus - falling out of hair from beard, pain in jaw-joint and zygoma. Sil. (5) Med. - suppressed gonorrhea. (6) Merc., Cinnb., Ter., Juni-c., Canth., Cann-i., Ant-t. ***THYMOLUM

(Thyme Camphor)

PHARMACY - Thymol. Thymolum. Thyme camphor. A phenol from the essences of many Labiatae, Lamiaceae or some Um- belliferae. **Historical dose:** Tincture and all potencies.

CLINICAL - Adenoma. Colitis. Diarrhea. Dyspnea. Enterocolitis. Fainting tendency. **Hookworms.** Laryngitis. Leucorrhea. Migraines. Neurasthenia. Sexual weakness. Whooping cough.

HERBAL - Thymol exists in the essences of certain plants belonging to the Labi atae family or to the Umbellifers. It is a phenol made up of para-isopropyl-metacresol. Thymol can be extracted from them by combining with alkaline lye (soda or potash). It is used therapeutically as an intestinal anti-septic and as vermifuge against tapeworm.

HOMEOPATHIC - The proving was conducted by Griggs, on eight pro vers, six males and two females, as well as one control using a placebo, in 1940-41. The experiment began by using 3x for two weeks, 2x for the next two weeks and 1x for about ten days.

The provings show an action limited to the sexual organs, producing a typical sexual neurasthenia. Thymol's general action is on the stomach, genital organs and to a small extent, on the central nervous system.

Genito urinary diseases. Pathological emissions, priapism and prostatorrhea. Nightly seminal discharge. Blood-streaked leucorrhea. Glairy or membranous diarrhea. **Hookworm disease** (Chen-a.).

General weakness with headaches. Constricting headache. Skin blue, cold. Spasmodic laryngeal cough. Excessive salivation with nausea. Frequent urination with compelling urging. Pains in the dorsal and lumbar region, spreading to the buttocks.

MIND - Irritable, arbitrary, must have his own way. Uneasy feeling and agitation. Nervous agitation, loquacity, mental confusion. Bewildered state. Craves company. Morose, sad, uneasy. Energy gone.

Abdomen - Enterocolitis.

Back - Tired, aching throughout lumbar region. Worse mental and physical labor.

Back pain during the headaches. Pain in the lumbar and sacral regions, spreading to the buttocks.

Ears - Noises in the ears. Buzzing in the ears. Sound like bells. Temporary deafness.

Female - Brown, blood-streaked, evilsmelling, watery leucorrhea. Menses thick, scanty, drawn-out. Pains before and during menses in the ovaries and uterus. Pain from hypogastric heaviness. Metritis of the cervix. Cancer of the uterus or cervix.

Head - Headache with sadness. Constricting pain in the temples, in women, ameliorated when lying down or from external heat. Bilateral temporal headache and at the occiput. Menstrual migraines.

Kidneys - Pains in the kidneys, spreading to the buttocks. Retention of urine. Frequent urination with urging.

Increased urination at night. Urinary burning and subsequent dribbling of urine. Urine copious, proteinuria, hematuria. Urates increased; phosphates decreased.

Limbs - Cyanosed limbs. Numbness at the limbs. Chronic lumbar rheumatism.

Lungs - Dyspnea. Irritating laryngeal and tracheal cough. Whooping cough.

Male - Increased sexual desire. Priapism. Seminal discharge when going to stool. Nightly seminal discharge. Profuse, nightly, seminal emissions with lascivious dreams of a perverted character. Ejaculation with erotic dreams. Prostatitis. Adenoma of the prostate gland. Cancer of the prostate.

Modalities - Better from eating. Worse mental and physical labor. Worse from tobacco.

Mouth - Salivation reduced when eating. Watery salivation with nausea. Ptyalism. Nauseating belchings.

Pulse - Pulse weak, slow or rapid.

Rectum - Hookworms. Diarrhea after constipation. Glairy or membranous diarrhea. Anal pain following diarrhea. Mucous, membranous stools, gray in color.

Skin - Skin blue and cold. Scarlet fever-like or pustulous exanthema.

Sleep - Awakes tired and unrefreshed. Lascivious and fantastic dreams. Erotic dreams.

Stomach - Acrid dyspepsia. Glairy belching with sensation of burning in the stomach, nausea and gastric heaviness. Nausea, ameliorated by eating. Vomiting.

Throat - Spasmodic laryngitis. Irritation of the larynx and trachea.

RELATIONS - Compare: (1) Carb-tcl. (2) Canth. - Irritation and inflammation of the digestive, urinary and cutaneous mucus membranes. Intense burning in the digestive passages with frequent, compelling need to urinate. (3) Merc-c. - Burning pains in the pharynx, painful, frequent urination, urine comes drop by drop, diarrhea with tenesmus. (4) Ter. - Irritation of the digestive and urinary mucus membranes with tendency to hemorrhage.

REFERENCES - Julian.

***THYMUS SERPYLLUM

(Wild Thyme)

PHARMACY - thymu. Thymus serpyllum. Wild thyme. N. O. Labiatae. Tincture of the whole plant. **Historical dose:** Tincture and all potencies.

CLINICAL-Asthma. Respiratory, infections. Whooping cough.

HERBAL - Thymus serpyllum belongs to the mint family; all the members have a marked action on the urinary organs and especially on the elimination of uric acid. It contains a volatile oil thymol, tannin, a gum and woody fiber. Thymol is a very powerful germicide, killing the germs of typhoid fever in thirty minutes.

HOMEOPATHIC - Respiratory infections of children, dry nervous asthma, whooping cough, severe spasms but little sputum. Ringing in ears with feeling of pressure in head. Burning in pharynx, sore throat worse empty swallowing, blood vessels distended, dark.

COMMENTS - Small doses of Thymu. act as a sedative and contra-stimulant, the depressive action being preceded by a period of excitation. Large doses dull the nerves and produce motor incoordination and sleep. Animals poisoned by Thymu. sleep standing and are insensible to the prick of a pin.

They have muscular contraction and tremors, vertigo and turning movements.

Increase of diarrhea, vomiting appears, prostration is extreme, the skin becomes cold and death sets in with all the symptoms of a depressant position and with complete anesthesia. These final symptoms are due to the thymic acid, which is a camphor.

REFERENCES - Anshutz. Boericke.

***THYROIDINUM

(Thyroid Gland Extract)

PHARMACY - thyr. Thyroidinum. Thyroid gland extract. Thyreoidinum. Thyroidea. Glándula thyroidea. Thyroidin. A sarcode. Trituration of the fresh or dried thyroid gland of sheep or calf. Potencies of a liquid extract of the gland. **Historical dose:** All potencies.

CLINICAL - Abscesses. Acromegaly. Albuminuria. Amblyopia. Amenorrhea. Anemia, pernicious. Angina pectoris. Backache. **Bedwetting. Breast, tumors.** Chilblains. Constipation. Convulsions, puerperal. **Cretinism. Cysts.** Diabetes. Diarrhea. Diuresis. Dropsy. Dysmenorrhea. Ear, disorders. **Eczema.** Edema. Epilepsy. Fainting. Fibroma. Fractures. **Goiter, exophthalmic.** Hair, loss. Heart, disorders. Hysteria. Ichthyosis. Idiocy. Leprosy. **Malnutrition.** Mania. Milk, deficiency. **Myxedema.** Neurasthenia. **Obesity.** Optic neuritis. Paralysis, hands and arms. Paraplegia. Pityriasis rubra. **Psoriasis.** Puerperal fever. Rupia. Scleroderma. Syphilis. Tetanus. **Tachycardia. Thyroid, disorders.** Tuberculosis. **Uterine, fibroids.**

Vomiting.

HOMEOPATHIC - Thyroidinum, also known as Thyroidea, is an organopathic. The sarcode is prepared from the dried thyroid gland taken from a sheep, ox or calf. The thyroid is closely connected with the heart and it exercises a general regulating influence on growth and development.

The homeopathic proving was established by M. Panos, R. Rogers, and J. Stephenson in 1963-64, using a double-blind method. The potencies 12x, 30x, 200c and 1000c were used. The symptomatology completes the work of Ghosh of Calcutta, which dates from 1963. Thy. symptoms are made up of the toxicological and clinical sources as well as the proving symptoms.

Thyr. affects the central nervous system, skin and left side. Metabolic disorders. **Goiter. Myxedema** with hair loss and cretinism. Diuretic action in myxedema and various types of edema.

Anemia, emaciation. Infantile wasting. Rickets. Arrested development of children. Acromegaly, delayed union of fractures. A state of puffiness and obesity. Excessive obesity. Great weakness and hunger, yet loses flesh. Craving for large quantities of sugar.

Rheumatoid arthritis. Nervous tremor of face and limbs. Tingling sensations. Paralysis. Hystero-epilepsy.

Tetany, worse cold. Muscular weakness. Sensation of faintness after acute diseases, weakness. Easy fatigue, weak pulse with a tendency to fainting, palpitations.

Increased heart rate. Dilates arterioles. **Tachycardia**. Low blood pressure. Cold hands and feet, chilliness and sensitive to cold. As of a cold wind blowing on the body. Sweating, headache. Exophthalmus and dilatation of pupils. Amblyopia. Weak memory. **Cretinism**. Psoriasis. **Nocturnal bedwetting**.

Breast tumors. Cystic tumors of the breast (2x trituration). **Lack of breastmilk. Vomiting of pregnancy. Uterine fibroids**. Said to be effective in **undescended testicles** in boys when given in half-grain doses twice a day over a considerable period.

Feels tired and sick, easy fatigue, wants to lie down. Fainting fits, tremors, nervous of face and limbs. Stabbing, splitting, clutching sensation. Choking. Convulsion in the nursing children, related to a febrile cutting of teeth.

MIND - Stupor, alternating with restless melancholy. Marked irritability of temper. Irritable, worse least opposition, goes into a rage over trifles. Grumbling, all the time. Irritable before menses.

Difficult concentration. Absent-minded. Nervous and apprehensive. Depression on waking. Depressed, inclined to cry. Weeps when undressing. Morose and sulky, wants

Thyroidinum to be left alone.

Euphoria. Laughing in a way peculiar to herself. Argues with family. Suspicious. Paranoia that they are being pursued or persecuted. Psychosis from anguish. Homicidal tendency. Insanity, puerperal insanity with fever. Nightmares.

Abdomen - Bearing and aching down through pelvis into anterior thigh. Acute cramping pains with cold sweating. Pain after eating. Pain midway between umbilicus and either anterior superior iliac spine. Sharp, cutting, colicky pains with fullness, worse on pressure and walking, better bending forward and after passage of flatus. Large quantities of flatus passed from bowels often smelling of hydrogen sulphate. Rolling flatulence with gurgling, then loose, gassy stool.

Back - Backache.

Breasts - Breasts tumors and cysts. Deficient in breast milk.

Chest - Angina pectoris. Anxiety about chest. **Chest feels as if constricted**.

Constitutions - Suited to the phosphoric or carbonic types, generally hyperthyroids. Nervous temperament. Psoric, tubercular and sycotic range of dispositions.

Ears - Sclerosis of ossicles. Difficult hearing. Pain on the right side. Pain in the left ear lobe.

Eyes - Progressive loss of sight with central scotoma (Carbn-s.). Conjunctivitis and chemosis, itching with weeping. Stinging pain in the right eye. Eyeballs prominent. Exophthalmic goiter. Irritation of the eyelids.

Face - Flushed. Dry, red lips, burn with free desquamation. Eruption of acne, worse on the right cheek. Sensation of something heavy, which falls from the cheeks.

Female - Amenorrhea in young girls. Pelvic congestion ameliorated by menses. Amelioration of premenstrual discomforts by the menses. Menses often too early. Metrorrhagia. Endometriosis. Gnawing in the uterus.

Uterine fibroids. Vomiting of pregnancy. Puerperal, convulsions insanity. Tendency to miscarriage or premature birth. Puerperal psychosis. Uterine atony after giving birth. Sterility.

Food - Insatiable appetite, always wants something more interesting to eat. Desire for sweets and thirst for cold water. Aversion to greasy foods.

Head - Feeling of lightness in brain. Fullness and heat. Persistent frontal headache, heaviness over eyes. Headaches ameliorated after menses. Heavy throbbing headache worse in the frontal region, worse from concentrating the mind, better out of doors, worse using the eyes. Fullness in the head with throbbing of the temporal arteries, worse morning and afternoon, from motion, physical or mental, from heat or indoors, better

in cool fresh air, often better from external pressure. Falling of hair.

Heart - Ready excitability of heart. Heart's action weak with numbness of fingers. **Tachycardia** (Naja.). Palpitations, worse least exertion, hammering, beats felt in ear. Heart pains radiate into axilla. Clutching, constricting pains, worse lying down, causing short breath. Severe heart pains. Angina pectoris. Hypertrophy after hard labor. As if blood were rushing downwards, through the body. Jumping sensation at heart. Large veins on arms and hands. Valvular diseases of heart (Naja). Weak, frequent pulse with inability to lie down.

Kidneys - Pressing urge to urinate. Frequent urination during the day. Burning along urethra, increase of uric acid. Increased flow of urine, polyuria, some albumen and sugar. Urine smells of violets. **Bedwetting in weakly children** who are nervous and irritable. Diabetes mellitus.

Limbs - Rheumatic arthritis with tendency to obesity, coldness and cramps of limbs. Aching pains. Trembling of limbs and entire body. Edema of legs. Numbness, left fingers then right leg. Itching without eruption, worse night. Peeling of skin of lower limbs. Cold limbs. Cold, clammy hands. Left hand icy cold. Abnormal growth of limbs due to excessive exertion.

Liver - Cutting pain in liver, worse deep breathing. Jaundice with itching, in the newborn child, accompanied by vomiting.

Lungs - Breathlessness better lying in recumbent position. Dry, painful cough with scanty, difficult expectoration and burning in pharynx. Cough on entering a warm room from cool air. Asthma. Allergies.

Modalities - Better after or during menses. Better evening, rest, lying on abdomen or reclining position. Worse in women, before and during menses. Worse least exertion, stooping. Worse cold. Heart worse lying down.

Mouth - Dryness of mouth. Bad taste, metallic, bitter and sour. Tongue, metallic taste at tip. Tongue coated grayish white in center with red edges or tip. Papillae enlarged and prominent. Tongue thickly coated. Swelling of the upper lip.

Nose - Dry mucus membrane indoors, fluent coryza, profuse, watery and bland outdoors. Dryness and sticking pain in posterior nares, worse on swallowing. Rhinitis with sneezing and edema of the nasal mucus membranes. Pain in the sinuses. Tickling sensation with headaches and dry throat.

Perspiration - Drenching sweats. Oily, musty sweat.

Rectum - Stools dark, fragmented with cadaverous or sulphurous smell. Stools soft, watery.

Skin - Eczema. Psoriasis associated with obesity. Very dry skin. Itching without eruption, worse night. **Brown swellings**. Swelling of glands of stony hardness. Symmetrical serpiginous eruptions. Jaundice with itching, in the newborn child, accompanied by vomiting. Urticaria. Ichthyosis. Lupus. Peeling skin of lower limbs. Scleroderma.

Sleep - Insomnia. Difficulty in falling asleep. Nightmares. Wakes for no reason.

Stomach - Increased appetite. Thirst for cold water. Pains, tenderness, aggravated by eating, ameliorated in the evening. Dyspepsia before menses. Flatulence, much flatus in abdomen. Nausea, worse riding in a car, better in cool air. Vomiting of pregnancy.

Temperature - Hot flushes, then chills or drenching sweats.

Throat - Dry larynx, congested, raw, burning, worse on left side. As of a splinter stuck across the throat. Pharynx congested, red and dry, with rawness and burning.

Vertigo - Vertigo, in the morning on rising, on leaning forwards.

COMMENTS - Thyr. has a profound action on the heart. Fatal syncope occurred in a number of cases under "thyroid feeding." Cyanosis was produced in many cases. Burnett gave a patient 3x, producing severe angina pectoris. The connection between the heart and the thyroid gland is very close, as seen in cases of exophthalmic goiter, of which many cases have been cured.

In a case of valvular heart disease following rheumatism in a man, 24, Thyr. 3x, thrice daily, quickly relieved a squeezing pain at the heart with inability to lie down, and hastened the patient's recovery.

Dr. F.C. Skinner cured a case of dysmenorrhea in a goiter subject with Thyr. 1,000c.

In myxedema, cachexia, cretinism and similar conditions, the thyroid gland is absent or defective and the idea is to supply a physiological want. As such, a state of puffiness and obesity may be regarded as a keynote indication for Thyr.

Clarke gave Thyr. 3x to a living skeleton of a child, 5, who looked not older than 2. He had been kept in a box in a cellar all his life until brought into the hospital, when he weighed only 14.25 pounds. Under Bac. 200c and careful feeding he gained .25 pounds per week. When Clarke commenced Thyr. he put on weekly .75 pound and gained the use of his legs, being able to stand by holding on to a chair.

In a case of universal and very aggravated psoriasis in a schoolboy, fair, very chilly, cold, clammy hands and feet, Thyr. 3x and later 30c completely cured after a prolonged course.

An obese lady, age 60, developed diabetes. Clarke cured her completely with Thyr. 3x and 30c. She then could take any kind of food.

H. O. Nicholson related a case of toxemia of pregnancy in a woman, 32, during her third pregnancy. She had a fit on October

3. Thyroid feeding was begun the next day. Marked improvement followed. Edema of face and body diminished. On October 23, the patient was about her usual duties. On November 6, she was delivered of a healthy boy without any untoward symptoms.

Pityriasis rubra, intense redness and scales of legs, and also with intense itching. Ichthyosis, syphilitic eruptions and scleroderma. Acromegaly. Myxedema with hair loss.

Increases the flow of milk in nursing women when the flow has been deficient. Insanity, puerperal insanity with fever. Paranoia that they are being pursued or persecuted. Nightmares.

Optic neuritis and accommodative asthenopia. Exophthalmic goiter, with bulging eyes. Weak heart, valvular problems, shortness of breath. Tachycardia. Operative and idiopathic tetany, worse from spasms by cold. Stitching, aching or heavy pains. Tingling sensations.

Thyr. has poor nutritional development in children. Low thyroid function, with skin problems. It can stimulate function of thyroid gland, or decrease the need for thyroid medications. Thyroid treatment nearly always raises the body heat.

RELATIONS - Compare: (1) Spong., Calc., Fuc., Lycps. (2) Thyri. (3) Thym-gl. extract - arthritis deformans, metabolic osteoarthritis, 5 grain tablets 3 times daily. High potencies very effective cases of exophthalmic goiter.

REFERENCES - Boericke. Clarke. Murphy. Phatak.

*****THYROIDINUM** (Iodothyrium) **PHARMACY** - thyri. Thyroidinum. Iodothyrium. The iodine exists in organic combination and Thyr. contains 0.003 parts of iodine to every gram. Trituration. **Historical dose:** All potencies.

CLINICAL - Emaciation. Dyspnea. Glycosuria. Goiter. Hoarseness. Obesity. Thyroid, disorders. Thyroid, nodules. Urine, increased. Weight, loss.

HOMEOPATHIC - Thyroidine is now more generally named Iodothyrene, but Clarke retained the former as more convenient.

Hoenigschmied said of it that it is present in only small quantities in the thyroid of sheep. It is completely free from albuminous substances, stable and directly assimilated. The general effects of the drug are increased secretion of urine and corresponding loss of flesh.

Thyri. is the active principle isolated from thyroid gland, a substance rich in iodine and nitrogen, affects metabolism, reducing weight, may produce glycosuria. It should be used cautiously in obesity, for a fatty heart may not be able to maintain the accelerated metabolic rhythm. Milk contains the internal secretion of the thyroid.

COMMENTS - Hoenigschmied gave some cases, including that of a laborer, 42, for several years had enlargement and induration of all lobes of thyroid, the enlargement caused compression of the structures of the neck, dyspnea, whistling respiration, hoarseness, short, dry cough, vertigo.

Thyri. was given, 5-grain tablets, one every evening, at the end of a week twice daily. After using twenty-five tablets, the gland was smaller and softer, the previously hard and resistant nodules were elastic after two more weeks only remnants of the goiter remained.

Another case, that of a man, 60, thyroid enlarged in all its lobes with a glandular cystic swelling in the right one, dyspnea, loud whistling breathing. Two, three and at last four tablets were given daily for two months, by which time the goiter had vanished, but the cyst was not changed.

A man, 45, medium height, sedentary, suffered from obesity, vertigo, dyspnea, weariness. Pulse feeble, 76, functions normal, appetite and sleep good, weight 230 pounds.

With increasing doses of Thyri., up to ten tablets daily the weight steadily went down to 160 pounds, activity increasing in proportion. When the dose had reached four tablets daily the urine became very abundant, but was free from albumen. The daily dose was

Thyroidinum increased one tablet every four days.

*****TILIA EUROPEA**

(Common Lime)

PHARMACY - til. Tilia europea. Common Lime. Linden. Tilia cordata. Tilia sylvestris. **N. O.** Tiliaceae. Tincture of fresh blossoms. **Historical dose:** Tincture and all potencies.

CLINICAL - Bedwetting. Dentition. Hemorrhages. Leucorrhea. Lichen. **Neuralgias.** Nosebleeds. Peritonitis. Puerperal, metritis. Rheumatism. Toothache. Urticaria. Uterus, prolapsed.

HERBAL - The sap of the linden contains sugar, and the flowers an abundance of honey, which makes the tree particularly attractive to bees.

HOMEOPATHIC - A tincture of the fresh blossoms was proved by the Austrian Society. The most striking characteristic is "an intense sore feeling about the abdomen and profuse warm sweat which gives no relief." This led to its successful use in cases of peritonitis.

In addition to this are marked bearing-down symptoms in the whole genito-urinary and rectal regions, especially in the uterus and these combined with the others have indicated Til. in puerperal metritis and other disorders of the female generative sphere.

Til. is of value in muscular weakness of the eye. Hemorrhages of thin, pale blood. Puerperal metritis. Disease of the antrum (Hydr., Chel.). Intense soreness of the abdomen, uterus. Bearing or dragging down pains in genito-urinary and rectal region. Bed feels too hard. Edema. Neuralgia. Rheumatism. ***The more he sweats the greater the pain.***

MIND - Love-sick. Dread of society. Melancholy, disposed to weep. Irritable. Disinclined to work.

Abdomen - Bloated abdomen, pains as from incarcerated flatulence, repeated noisy discharges of it, which aggravates. Peritonitis. Soreness with warm sweat which gives no relief.

Back - Tearing from nape to top of shoulder. Stitching, drawing, and heat in right back between liver and kidneys. Heaviness in sacral and dorsal region.

Chest - Oppression. Whole chest weak, acute pressure and pinching under sternum. Throbs as from a dull stitch from thorax to back. Bruised pain and swelling. Tearing from left pectoralis major to axilla.

Ears - Stinging in ears.

Eyes - Binocular vision imperfect. Sensation as of gauze or a veil before eyes (Calc., Caust., Nat-m.). As if a piece of cold iron pressed through right eye causing burning.

Face - Face pale, or flushed, frequent alternations. Cutting pains. Sensation of something alive under skin of face. Quivering of lips. Sprained pain in left jaw-point.

Female-Intense sorefeeling about uterus. Bearing-down pains with hot sweat, but without relief. Soreness and redness of external genitals (Thuj., Sulph.). Pelvic inflammation, tympanites, abdominal tenderness and hot sweat which does not relieve. Much slimy leucorrhea when walking (Bov., Carb-an., Graph.). Puerperal metritis.

Head - **Neuralgias**, first right, then left side, **with veil before eyes**. Confusion with dimness of vision. Much sneezing with fluent coryza. Bleeding from nose.

Kidneys - Heavy dragging pain in urethra. Constant painful pressure on bladder and urethra. Frequent, copious urination. Scanty urine.

Limbs - Trembling, weariness, bruised feeling in limbs. Paralytic heaviness of arms, especially upper arm. Heaviness and painful lameness in left shoulder. Drawing in small spot left hip while sitting. Cramp in left sole. Ulcerative pain in ball of left great toe.

Lungs - Cough from tickling in throat. Tickling, scraping, irritating, provoking slight cough, especially in left side of larynx. Fine stitches in larynx, worse talking. Hoarseness. Frequent sighing.

Modalities - Better in cool room. Better from motion, walking about in open air. Better closing eyes. Better from coffee. Worse talking, walking, stooping, sneezing. Worse in afternoon and evening. Worse cold water, drafts. **Worse from sweating**, warm room, heat of bed, after sleep. Skin symptoms worse heat of bed.

Mouth - Much mucus in mouth, causing fuzzy feeling, affecting speech. Taste bitter, bitter-slimy, pasty. Stinging pain in all the teeth, worse by cold water. Drawing pains in gums.

Nose - Tickling of nose. Much sneezing with fluent coryza. Nosebleeds, blood thin and pale, but coagulates quickly.

Perspiration - **Sweat warm and profuse** soon after falling asleep. Sweat increases as rheumatic pains increase.

Sensations - As if a piece of cold iron pierced through right eye, causing burning. Burning as if a piece of ice were drawn over ear and face. As if something living were under skin of face. Tearing in anterior muscles of thigh, as if they were too short.

Skin - Urticaria. Eruption of small, red itching pimples. Violent itching and burning like fire after scratching.

Sleep - Yawning, sleepy, exhausted, worse during pain. Sleeplessness with restlessness, Bed seems too hard. Vivid frightful dreams, bathed in perspiration. Sudden wakings.

Temperature - Profuse warm sweat, soon after falling asleep without relief.

Throat - Burning in throat. Sensation of swelling of the palate, with desire to swallow, and hoarse voice. Tickling in palate causing cough.

Vertigo - Vertigo, with staggering, and like gauze before the eyes. Intoxication.

COMMENTS - An intense facial neuralgia was developed in the proving and also a very aggravated condition of skin irritation with pimples of the lichen order. Pains above the root of the nose, nosebleed of thin, pale blood which coagulated quickly. The left side was most affected. Great sensitiveness to draft of air was induced.

RELATIONS - Compare: (1) Lil-t., Bell. (2) Puerperal metritis, Bell. (3) Uterine bearing down, Lil-t. (4) Sweat without improvement. Merc.

REFERENCES - Buericke. Clarke. Phatak.

***TILLANDSIA USNEOIDES

(Spanish Moss)

PHARMACY - till-u. Tillandsia usneoides. Spanish moss. Tree hair. Old mans beard. Florida moss. N. O. Bromeliaceae (Brome- liad or Pineapple family). **Historical dose:** Tincture and all potencies.

CLINICAL - Blood, sugar. Breast, milk. Childbirth. Diabetes. Epilepsy. Hemorrhages. Rheumatism.

HERBAL - Tillandsia is usually an epiphytic plant with reduced to absent stems. Found mostly in tropical to temperate Americas. Hangs in the trees and swamps of the southeast coastal plains.

Many Native American tribes used the moss while cooking to absorb unwanted liquids, for bedding, for tanning hides, and to rub on newborn babies heads for curly hair. It is also used as fodder for animals.

Colonial pickers harvested moss with long poles during the winter. The harvest hung for several months to cure in a moss yard. Curing loosened the outer gray scales making it ready for commercial ginning.

Medicinal use of Spanish moss has a long history. Extracts from it have been used in the treatment of diabetes and it has been used to help control blood sugar levels. Spanish moss was taken, while green, and brewed into tea for expectant mothers, supposedly to aid the flow of breast milk and make the delivery easier. Tea from the plant was also used as a folk remedy for rheumatism.

In Mexico, it has been used to treat infantile epilepsy. In the early 1950s. it was used as an estrogen substitute and scientists have found the plant exhibits anti-bacterial properties. In the West Indies it has been used to make a styptic ointment for the purpose of stopping bleeding.

COMMENTS - Dr. C. W Mayo reported that, in the Feb. 9, 1944 "Staff Meetings of the Mayo Clinic," the absorptive qualities of Spanish Moss for use in surgical dressings had been investigated with interesting results.

"The dried moss will retain its absorptive power better than a substance like cotton, as the liquid taken up is stored chiefly inside the leaves and cells, instead of merely being held between adjoining strands. Spanish moss will take up from six to ten times its dry weight of water."

REFERENCES - Buttner. Murphy.

***TINOSPORA CORDIFOLIA

(Gulantha)

PHARMACY - tinos. Tinospora cordifolia. Gulantha. N. O. Menispermaceae. **Historical dose:** Tincture and all potencies.

CLINICAL - Bilious. Cough. Dysuria. Elephantiasis. Fever. Flatulence. Gonorrhea. Hemorrhoids. Impetigo. **Intermittent, fever.** Jaundice. Malaria. Palpitations. Rheumatism. Skin, disorders. Syphilis. Urticaria. Vomiting. Worms.

HERBAL - The stem and root are used medicinally; they possess a bitter taste. The root and stem contain starchy extract, bitter principle and a trace of berberine. Fresh stem is more efficacious than the dry one and is a good substitute for Calumbu.

The Ayurvedic physicians used it as a febrifuge and named it "Indian quinine." They have found it to be bitter tonic and strength giving. It destroys wind, bile and phlegm. It is good for thirst, burning sensation, gonorrhea, cough.

Useful in enlarged spleen. Secondary syphilis, rheumatism, leprosy, skin diseases such as impetigo. Jaundice, torpidity of the liver, splenic affections. Leprosy, rheumatism. Acute and chronic fevers. Worms, vomiting, hemorrhoids, dysuria, flatulence and palpitations of the heart.

As a diuretic and demulcent it is given in dysuria, in scanty, high-colored urine due to catarrh of the bladder. It is stomachic, bitter, tonic, alternative, aphrodisiac, anti-periodic, and demulcent. It is given in dyspepsia and in debility caused by repeated attacks of fever.

HOMEOPATHIC - No proving of Tinos, has been made, but many Indian homeopaths have been using it clinically with excellent results.

Debility. Rheumatism. Skin diseases, leprosy, secondary syphilis. Jaundice, torpidity of the liver. Splenic affections. Acidity of urine, urinary diseases such as gonorrhea and dysuria.

Intermittent fevers. Acute and chronic malarial fevers, the temperature generally rises in the afternoon with

chilliness or shaking chill. Fevers with bilious vomiting associated with thirst and headache.

Chronic slow fevers, especially where there is a history of gonorrhea and weakness due to seminal emissions. Fever due to an excessive use or maladministration of quinine. Fever with burning sensation is felt in face, hands and feet, and enlargement of the liver and spleen, jaundice with yellow color of the eyes, no desire for food, and headache.

Vomiting, specially bilious vomiting. Decreased quantity of urine, passes it frequently, burning while urinating? The urine is mixed with pus-like discharges. Gonorrhea. Rheumatism, leprosy and skin diseases. Secondary syphilis.

Tonic, widely used as a stimulant remedy where the patient has become extremely weak owing to repeated attacks of fever and also to exhausting seminal emissions.

COMMENTS - R. N. Khory noted, in the *Materia Medica of India*, vol. II., that the juice of the *Tinospora* stem combined with *Pakanbhed* and honey is given in gonorrhea. The starchy extract is nutritious, largely used in native practice in cold fevers and seminal weakness, also in urinary affections.

W. Dymock, in the *Pharmacographia Indica*, vol. 1. noted that it is favorably spoken of by those who have tried it as a tonic, anti-periodic and diuretic. Charaka recommended it in chronic fevers, jaundice, bilious vomiting and some other diseases. He found it useful to purify the breast-milk after delivery.

Baghbhata spoke highly of it as an excellent tonic, and noted that it is generally used in chronic fevers and jaundice. Chakradatta reported that *Tinospora* is an excellent remedy in urticaria, fevers, leprosy, and elephantiasis.

Tinospora cordifolia

Bangasena recommended it in vomiting and flatulence associated with extreme palpitations of the heart. "It is useful in general and seminal debility, fever, jaundice, torpidity of the liver, skin diseases, secondary syphilis, rheumatism, acidity of urine and urinary diseases, some forms of dyspepsia, splenic affections, chronic gonorrhea, leucorrhea, etc."

Nadkarni wrote "In malaria *Tinospora* is sometimes more efficacious than quinine." R. N. Chopra, in the *Indigenous Drugs of India*, wrote "An infusion is prepared from the stem and root which is a valuable tonic in debilitating diseases, intermittent fever and dyspepsia."

RELATIONS - Compare: Chin., Chin-ars.

*****TITANIUM METALLICUM**

(Titanium Metal)

PHARMACY - titan. Titanium metallicum. Titanium metal. Trituration of the copper-red crystals obtained from the slag at the bottom of a blast iron furnace. Consisting of Titan, cyanide and Titan, nitride. Titanium is found in the bones and muscles. Apples contain 0.11 percent of Titan. **Historical dose:** All potencies.

CLINICAL - Bright's disease. Eczema. **Hemiopia.** Lupus. Nasal, catarrh. Premature, ejaculation. Rhinitis. Sexual, weakness.

HOMEOPATHIC - Titanium stands midway between silicon and tin in some of its relations and in other respects it is closely related to iron, chromium and aluminium.

The crystals were proved by Sharp who took 2 grains of the first trituration, daily for a week. It was believed to be the pure metal, but was proved later to be the cyanonitrid.

Titan, has been used in lupus and tuberculosis processes externally, also in skin diseases, nasal catarrh, etc. Giddiness with **verticalhemiopia**. Bright's disease. Eczema, lupus and rhinitis.

"Imperfect vision, the peculiarity being that **half an object only could be seen.** " Another symptom, which Burnett has turned to good account in cases of sexual

Titanium metallicum

weakness is "Too early ejaculation of semen during sex."

RELATIONS - Compare: (1) Half-sight, Nat-c., Lyc., Aur., Lith.

*****TONGO**

(Coumarouna Seeds)

PHARMACY - tong. Tongo. Coumarouna seeds. *Dipterix odorata*. Tonca. Tonka. Tonquin bean. N. O. Leguminosae. Papil- ionoideae. A tree in Guiana. Tincture of the dried beans. **Historical dose:** Tincture and all potencies.

CLINICAL - Hip, pain. Migraines. Neuralgias, face. Toothache. Whooping cough.

HERBAL - The fragrant seeds of Tongo is used by perfumers. *Dipteryx odorata*. which yields it, is a native of

Cayenne. The fruit is something like that of the almond tree.

HOMEOPATHIC - Tong, was proved by Nenning. In the proving Tong, produced "Risings with taste of bitter almonds." The chief uses have been in migraine and neuralgic disorders. Whooping cough.

Eyes - Trembling in right upper lid.

Head - Tearing pain in supra-orbital nerve with heat and throbbing pain in head.

Limbs - Tearing pains in hip joints, femur and knee, especially left side.

Modalities - Better by movement, pressure. Worse by rest, when seated.

Nose - Coryza, nose stopped, must breathe through mouth.

Vertigo - Confused, especially in the occiput with somnolence and a sort of intoxication.

RELATIONS - Antidoted by: Vinegar. Meli. **Compare:** (1) Hay fever, Trif-p., Napht., Sabad. (2) Antho., Asper. and Tong, contain Coumarin, the active principle.

***TOPAZ

(Gemstone)

PHARMACY - top. Topaz. Gemstone. $\text{Al}_2\text{SiO}_4(\text{F},\text{OH})_2 + \text{Cr}$. Hydroxy-fluoro- aluminum silicate. **Historical dose:** All

CLINICAL - Anxiety. Asthma. Blood, sugar. Depression. Diabetes. Exhaustion. Hemorrhages. Indigestion. Insomnia. Liver, disorders. Nightmares. Restlessness. Sexual, dysfunction. Sleepwalking. Tumors.

HOMEOPATHIC - Topaz has been said to cure insomnia, asthma, and hemorrhages. Depression, exhaustion, said to increase stamina. Mood swings, worries, fears, anxiety, stress. It was thought to cure cowardice. Insomnia, sleepwalking, nightmares. Restlessness.

Stomach, liver and pancreas disorders. Disturbed blood sugar. Indigestion. Diabetes. Tumors. Weak eyesight. Strengthens weak tissue and backbone. Said to be a powerful aphrodisiac and was often used to treat sexual dysfunction.

COMMENTS - Topaz occurs not only in the transparent yellow, yellow brown, orangey brown, and pinky brown colors most popularly associated with it, but also in a very light to medium red. In the past, almost any yellow stone was called topaz.

Yellow topaz is used for protective purposes, specifically against envy, jealousy, intrigue, disease, death, negativity and lunacy. Mounting in gold is said to enhance these properties; rings, wrist bracelets and necklaces with the stone next to the heart are thought to be the most projective.

Topaz was also said to change color in the presence of poisoned food or drink. Its curative powers waxed and waned with the phases of the moon. Supposedly helped to break up stagnation of energy within the body, and elimination of toxins.

Powdered and mixed with rosewater, topaz prevented bleeding. Nosebleeds could be stopped by pressing a stone against the side of the nose. It was believed that madness could be cured by a dose of topaz and wine.

REFERENCES - Murphy.

***TORULA CEREVISIAE

(Yeast Plant)

PHARMACY - torul. Torula cerevisiae. Yeast plant. Torula sacharomyces. **Historical dose:** Tincture and all potencies.

CLINICAL - Boils. **Constipation.** Eczema. Flatulence. Headaches. Indigestion. Nausea. Sneezing. Sycosis. Tinea versicolor. Wheezing.

HERBAL - Yeast poultices were much used in skin diseases by the ancient Egyptian physicians, for eczema, boils and swelling.

HOMEOPATHIC - Tor. was introduced into homeopathy by Drs. Lehman and Yingling. It has not been proved, but there are many verified clinical symptoms.

A sycotic remedy. Abdominal soreness. Rumbling, flatulence. Sour, yeasty, moldy odor from discharges. Headache. Pains shift around. Tinea versicolor. According to Yingling, useful for anaphylactic states produced by proteins and enzymes.

MIND - Irritable and nervous.

Back - Backache, tired and weak from elbows and knees down.

Head - Aching back of head and neck. Headache and sharp pains all over, worse from constipation.

Limbs - Hands cold like ice and go to sleep easily.

Nose - Sneezing and wheezing. Catarrhal discharge from posterior sinuses.

Rectum - **Constipation.**

Skin - Boils, recurrent. Itching eczema around ankles. Tinea versicolor.

Sleep - Disturbed with much restlessness. **Stomach** - Bad taste. Sense of fullness. Poor digestion. Belching of gas in stomach and abdomen. Nausea.

REFERENCES - Boericke.

***TOXICOPHIS PUGNAX

(Moccasin Snake)

PHARMACY - toxi. Toxicophis pugnax. Moccasin snake. N. O. Ophidia. Trituration. **Historical dose:** All potencies.

CLINICAL - Edema. Fever. Periodic neuralgia. Skin, dry. Snake, bites.

Toxicophis pugnax

HOMEOPATHIC - Some effects of bites with this snake have been recorded. A peculiar feature of the cases was that the symptoms of pain and fever recurred annually at exactly the same period for many years with decreasing intensity each year.

In one case, the pains spread to other parts after some years. The right leg became painful and swollen rapidly. For several years the pain was confined to the knee of the bitten limb, in a few years it left the knee and seized the hip and finally attacked the shoulder. Skin rather dry.

Pain and fever recur annually after a bite from this snake (Cedr., Lach.), but without swelling, decreasing in intensity each year. Pains will sometimes change location with disappearance of first symptoms. Unusual dryness of the skin. Edematous swellings and periodical neuralgia.

REFERENCES - Boericke. Clarke.

***TRACHINUS DRACO

(Sting-fish)

PHARMACY - trach. Trachinus draco. Stingfish. Trachinus radiatus. Trachinus vipera. Sting-bull. Great and Lesser Weever. Trituration of the poisonous fins. **Historical dose:** All potencies.

CLINICAL - Asthma. Blisters. Blood-poisoning. Delirium. Fever. Gangrene. Headache. Hydrophobia. Insomnia. Nausea. Neuralgia. Palpitations. Rabies. Suffocation. Ulcers. Vomiting.

HOMEOPATHIC - Some very serious effects have been recorded from wounds inflicted with the fins of the sting-fish. Trach. should be indicated in cases of acute blood-poisoning with intense pains.

Swelling of whole body, of wounded arm, then of head and chest. Acute blood poisoning and gangrene. Fever, delirium and the symptoms of hydrophobia.

Intolerable pains. Stinging, burning, throbbing pain increasing to unendurable intensity lasting an hour and then decreasing. Violent burning pain extending from wound to chest.

MIND - Anxiety, raving. Fear of death. Hydrophobia.

Head - Violent headache.

Heart - Palpitations.

Lungs - Paroxysms of suffocation.

Skin - Skin of whole body became yellowish green. Gangrenous blisters on arms.

Sleep - Sleeplessness.

Stomach - Violent thirst. Nausea. Green, bilious vomiting.

Temperature - Constant fever with irregular pulse. Cold, clammy sweat.

Vertigo - Dizzy.

REFERENCES - Boericke. Clarke.

***TRADESCANTIA DIURETICA

PHARMACY - trad. Tradescantia diurética. N. O. Commelynaceae. Tincture of fresh leaves. **Historical dose:** Tincture and all potencies.

CLINICAL - Gonorrhea. Hemorrhage. Orchitis. Vertigo.

HOMEOPATHIC - Mure proved Trad., which belongs to a genus of lily-like plants. Disorder of the genito-urinary organs, urethral discharge and inflammation of the scrotum. Embarrassed breathing. Hemorrhage from ear and upper air passages, painful urination, urethral discharge, scrotum inflamed.

Chest - Pain in left side of chest.

Kidneys - Whitish discharge from urethra. Pain when urinating. Stream thin. Urine is acid smelling, yellowish, copious, ashcolored sediment.

Lungs - Breathing is very painful, embarrassed, difficult. Sighing, as from want of air.

Male - Scrotum inflamed, painful and red.

REFERENCES - Boericke. Clarke.

***TRIBULUS TERRESTRIS (Ikshugandha)

PHARMACY - trib. Tribulus terrestris. Ikshugandha. Hygrophila spinosa. N. O. Acanthaceae. India. Tincture of root leaves and seeds. **Historical dose:** Tincture and all potencies.

CLINICAL - Apathy. Dropsy. Dysuria. Gonorrhea. Impotency. Incontinence. Insomnia. Kidney, stone. Leucorrhea. Malaria. Mas

turbation. Pimples. Prostatitis. Rheumatism. Sexual, weakness. Spermatorrhea. Strangury. Urticaria.

HERBAL - Ikshugandha is an East Indian remedy useful in urinary affections, especially dysuria, and in debilitated states of the sexual organs, as expressed in seminal weakness, early emissions and infertile semen.

The root is demulcent, diuretic, and given in dropsy, gonorrhea, hepatic obstruction, and in urinary affections. A paste of the seeds is applied to rheumatic joints. The seeds are used as an aphrodisiac.

HOMEOPATHIC -The Tribulus plant is full of thorns, which cause intolerable burning, swelling and redness. It produces small red pimples and eruptions which look like meals and eruptions due to prickly heat.

Malarial attacks associated with urticaria. Fevers appear in the morning, no chill or thirst, urticaria-like eruptions come on along with the rise of temperature, intense itching which is relieved by cold applications.

Sexual neurasthenia. Impotency. Ailments from masturbation, prostate emissions and spermatorrhea. Impotence caused by overindulgence of advancing age or when accompanied by urinary symptoms incontinence, painful urination, etc. Prostatitis. Leucorrhea. Gonorrhea.

Dropsy. Urinary affections. Urinary calculus. Kidney stones. Hepatic obstruction. Skin diseases, worse from heat and better from cold. Ulcers due to impurities of blood. Rheumatism. Insomnia.

COMMENTS - Charaka found it useful in stone, gravel and calculus in the bladder, and strangury. Sushruta recommended it as a great sexual tonic. Bagbhata recommended it for all skin diseases due to impurities of blood. Chakradatta thought that it could be effectively used in dropsy.

Bangasena acknowledged its efficacy in effecting safe delivery. Harita recommended it for sleeplessness. He also said that it can produce sound sleep if the root is placed on the head.

REFERENCES - Boericke. Clarke. Ghose.

***TRICHOSANTHES DIOICA

(Wild Snakegourd)

PHARMACY - trich-d. Trichosanthes dioica. Wild snakegourd. N. O. Cucurbitaceae. Roots and leaves. **Historical dose:** All potencies.

CLINICAL - Anasarca. Bilious. Catarrh. Chickenpox. Cholera. Diarrhea. Dropsy. Dysentery. Fever. Headache. Hemoptysis. Jaundice. Kala-azar. Nausea. Rheumatism. Smallpox. Synovitis. Vomiting. Water brash.

HERBAL - The leaves of Trichosanthes dioica are tonic, febrifuge. Fruits of the bitter variety are used in scorpion stings. The fruit is described by Sanskrit writers as febrifuge, laxative and anti-bilious.

Ayurvedic physicians of India found this drug to be of great use in multifarious complaints. Charaka found it to be a sovereign remedy in cases of dropsy, anasarca, bilious and catarrhal fevers, slow chronic fevers associated with hemoptysis and also in synovitis.

Chakradatta recommended it in bilious and catarrhal fevers and rheumatism. Su- shruta found it efficacious in hemoptysis and bilious fevers.

Bhavaprakasha recommended its use in smallpox with predominance of bilious symptoms. In the opinion of some Ayurvedic physicians, it is an excellent remedy in smallpox and chickenpox.

HOMEOPATHIC - The root-bark of Trichosanthes dioica possesses highly purgative properties. It causes purging to such a great extent that a little overdose may cause death.

At first the stool appears to be loose, gradually the patient passes bilious and mucous stools, and finally bloody stools and vomiting of blood appear producing the stage of collapse.

Useful for diarrhea, dysentery, cholera and cholera. Copious loose stools, of green or yellow color, may be mixed with bile and mucus. Prolapsed rectum. Burning in anus. Smarting after stool. Passage of involuntary and bloody stool.

Bloody stools appear without cessation and cause profound prostration and exhaustion. The stools may be mixed with particles of mucus. Frothy stool, during its passage no pain or uneasiness is felt, after stool, urging and straining continue for a long time.

Cholera where there are copious stools and vomiting associated with restlessness, thirst, burning, sweat, extreme weakness, coldness of extremities, pulselessness and other symptoms.

Pain and gurgling in stomach. Gurgling with copious yellow stools. Nausea before vomiting, water brash and

rumbling in abdomen. Nausea after drinking water. Constant water brash. Vomiting, copious stringy mucus which may be streaked with blood. Vomiting of bile.

Jaundice. Yellow eyes, with dropsy. Chronic fevers, with enlargement of the liver and spleen. Fevers with bilious symptoms, with headache, water brash, nausea, and especially bilious diarrhea.

Acute, chronic and malarial fevers and also in kala-azar. The fever comes on at 11 a.m. or 12 noon with chilliness, and thirst and headache exist. After this stage headache continues, but it increases with the rise of temperature. The fever may be of short duration one day and of longer duration the next day. Fever with vomiting (Ip.).

Trichosanthes bears a close resemblance to Podo, and it may be safely used in those cases where Podo, is indicated or where Podo, fails to do any good.

RELATIONS - Compare: Trich-d. may be a grand substitute for Ip. and Podo, or it may be employed where these two medicines fail to do any good.

REFERENCES - Ghose.

***TRIFOLIUM PRATENSE

(Red Clover)

PHARMACY - trif-p. Trifolium pratense. Red clover. N. O. Papilionoideae. Tincture of flower heads. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, catarrh. **Blood, disorders. Cancer. Cough. Crusta, lactea.** Diabetes.

Dysentery. Fainting. Fibroids, bleeding. Hemorrhages. **Hoarseness.** Menopause. Menorrhagia. Metrorrhagia. Tumors. **Whooping cough.** Writer's cramp.

HERBAL - Red clover is an herbal blood tonic and purifier. It has a reputation among herbalists in whooping cough and the coughs of measles and tuberculosis. Felter gave red clover to persons disposed to cancer. He found it retarded the progress of cancerous tumors and improves the general condition of the patient.

HOMEOPATHIC - T. C. Duncan and others proved it and elicited some very decided respiratory symptoms, dry, tickling cough, oppressed breathing with fever. One peculiar symptom was a cough followed by hiccough.

Marked salivation. Feeling of fullness with congestion of salivary glands, followed by increased flow of saliva.

Crusta lactea, dry, scaly crusts. Stiff neck. Feeling as if mumps were coming on. Preventive for mumps and cancer. Retards progress of cancerous tumors before ulceration has taken place. **Cancerous diathesis.**

MIND - Mental breakdown. Confusion of ideas, morning. Loss of memory.

Abdomen - Gripping pains in abdomen and headache. Colicky pains all day.

Back - Neck stiff, cramp in sterno-cleido muscles, relieved by heat and irritation.

Constitutions - Cancer diathesis.

Head - Confusion and headaches on awaking. Dullness in anterior brain.

Limbs - Hands and feet cold. Tingling in palms. Tibial ulcers.

Lungs - Sensation in lungs as if breathing hot air. Air feels as if full of impurities.

Mouth - Increased flow of saliva (Merc., Syph.).

Lungs - Hay fever. Coryza like that which precedes hay fever, thin mucus with much irritation. **Hoarse and choking, chills with cough at night.** Cough on coming into the open air. Spasmodic cough. **Whooping cough,** paroxysms, worse at night.

Throat - Sore throat with hoarseness.

COMMENTS - Trif-p. has many symptoms of congestion. Dull, stupid feeling generally.

The head and lungs feel full of blood. Sensation in lungs as if breathing hot air, as if air full of impurities. Persistent headache on waking. Unrefreshing sleep. Weak and intermittent pulse, later full and bounding.

Irritation of the pharynx and trachea. "Sharp pain through uvula causing tears to start." Dryness of trachea causing him to clear throat of some foreign substance. Secretion of urine increased.

Farrington noted "Hoarseness and choking spells at night with cough, the neck is stiff, cramps in sternomastoid muscle better by heat and friction."

Cooper said of Trif-p. that it causes salivation in horses and diarrhea if they eat much of it and that it cures mumps and disorders of the pancreas and salivary glands. Hale said it causes "heaves" in horses.

Felter noted "scaly and ulcerated conditions of the tibial region of the old." The symptoms are worse in close room, better in open air. "When I became very warm with the fever my breathing stopped, lungs felt as if breathing hot air." Worse after sleep.

RELATIONS - Compare: (1) Trif-r. **Complementary:** Calc-p. - menstrual and hemorrhagic affections.

REFERENCES - Boericke. Clarke.

***TRIFOLIUM REPENS

(White Clover)

PHARMACY - trif-r. Trifolium repens. White clover. N. O. Leguminosae. Papilionoideae. Trituration of tincture of flower heads. **Historical dose:** Tincture and all potencies.

CLINICAL - Mumps. Salivation.

HOMEOPATHIC - The proving of Trif-r. produced a specific action on the salivary glands. Hale said it produced marked salivation in horses. Feeling of fullness or congestion of all the salivary glands. Discomfort and even pain in glands followed by copious flow of saliva.

Feeling of congestion in salivary glands, pain and hardening, especially submaxillary, worse lying down. Mouth filled with watery saliva, **worse lying down**. Taste of blood in mouth and throat.

One prover felt just as if she had mumps coming on. Prophylactic against mumps. Sensation as if heart would stop with great fear, better sitting up or moving about, worse when alone with cold sweat on face.

RELATIONS - Compare: (1) Jab., Pilo.

REFERENCES - Boericke. Clarke.

***TRIGONELLA FOENUM GRAECUM

(Fenugreek)

PHARMACY - trig-f-g. Trigonella foenum graecum. Fenugreek. Foenumgraecum officinale. North Africa, India. N. O. Fabaceae. **Historical dose:** Tincture and all potencies.

CLINICAL - Abscesses. Baldness. Beriberi. Boils. Bronchitis. Burns. Cancer. Carbuncles. Cataracts. Cellulitis. Colic. Constipation. Convalescence. Cough. Cysts. Dermatitis. Diabetes. Diarrhea. Eczema. Gout. Hernia. High blood pressure. Hives. Hyperthyroidism. Hypoglycemia. Impotence. Indigestion. Infections. Leg, edema. Leukemia. Lice. Liver disease. Lymphadenitis. Menopausal symptoms. Muscle aches. Peptic ulcer. Rickets. Sores. Spleen, enlargement. Tuberculosis. Ulcers. Vaginal, dryness. Wounds.

HERBAL - Fenugreek is native to southern Europe, the Mediterranean region, and Western Asia. The words foenum - graecum mean Greek hay and arise because of the appearance of the plant which has long slender stems. Fenugreek seeds contain a high percentage of mucilage, a natural gummy substance present in the coatings of many seeds. Although it does not dissolve in water, mucilage forms a thick, gooey mass when exposed to fluids.

The resulting soft mass is not absorbed by the body, but instead passes through the intestines and also triggers intestinal muscle contractions. Both actions promote the emptying of intestinal contents. Therefore, fenugreek is a mild but effective laxative.

In addition, fenugreek seeds contain chemicals that slow down the time that food takes to go through the intestinal tract. As one result, sugars are absorbed from foods more slowly and blood sugar levels may not rise as high or fluctuate as much as

usual. Fenugreek may further affect blood sugar levels by decreasing the activity of an enzyme that is involved in releasing stored sugar from the liver into the blood.

Some evidence suggests that fenugreek may also have other medical uses. Fenugreek lowers cholesterol levels as well as blood sugar levels. It may reduce the amounts of calcium oxalate in the kidneys. Calcium oxalate often contributes to kidney stones.

Fenugreek also appeared to lessen the chance of developing colon cancer. It may have some ability to protect the liver against damage from alcohol and other chemicals. Fenugreek is a skin softener and is often an ingredient of soothing facial masks.

Fenugreek is also used for hair care as it prevents hair fall, cures dandruff, and promotes hair growth. A paste of fenugreek seeds is usually applied to the scalp at least 40 minutes before washing hair to help get rid of dandruff, and act as a remedy for hair loss.

The use of shampoo to wash hair can be skipped if fenugreek seed paste is applied on the scalp as the paste helps to remove oil and dirt from the hair and also makes the hair soft. The paste of fresh fenugreek leaves is also used to get rid of dandruff, increase the length of hair, soften the hair, and help preserve its natural color. Paste of the fresh leaves of fenugreek, applied on the face every night before going to bed and washed with warm water, prevents pimples, blackheads, dryness of the face, and early appearance of wrinkles. It improves complexion and leads to younger looking skin. Fenugreek paste made by grinding fenugreek seeds when used as a mask has a granular texture that helps remove blackheads.

The topical application of the gelatinous texture of fenugreek seed may also have some benefit for soothing skin that is irritated by eczema or other conditions. Fenugreek helps to remove excess oil from the skin. It has also been applied as a warm poultice to relieve muscle aches and gout pain.

A poultice of the leaves can be used for boils, cysts, burns, ulcers, hives, eczema, abscesses, carbuncles, etc. It is also used to treat cuts and sores. Excessive topical use of fenugreek on the same areas may cause itching,

redness, rash, or other reactions. Individuals who have allergies to peanuts or soybeans may also be allergic to fenugreek.

RELATIONS - Compare: Alf., Avena.

REFERENCES - Murphy.

***TRILLIUM PENDULUM

(Lamb's Quarter)

PHARMACY - tril. Trillium pendulum. Lamb's quarter. White bethroot. Trillium erectum. Purple trillium. Bethroot. Birthroot. Rattlesnake root. Wake Robin. Three-leaved nightshade. **N. O.** Smilacaceae or Trilliaceae of the Liliaceae. Tincture of the fresh root. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, catarrh. Menopause. Diabetes. Dysentery. **Fainting.** Fibroids, bleeding. Headache.

Hemorrhages. Menorrhagia. Metrorrhagia. **Nosebleeds.** Writer's cramp.

HERBAL - The chief uses of Trillium pendulum come to us from herbalists, who learned some of them from the Native Americans. The popular name Birth-root sufficiently ' indicates one part of its reputation.

HOMEOPATHIC - Tril. is a great hemorrhagic medicine. **Hemorrhage with great faintness and dizziness.**

Hemorrhages of all kinds with pregnancy. Hemorrhages after childbirth, menopause, from fibroid tumors, gushing, bright red. Uterine hemorrhage.

Threatened miscarriage. Cramp-like pains. Relaxation of pelvic region. Chronic diarrhea of bloody mucus. Tuberculosis with purulent and copious expectoration and spitting of blood.

MIND - Irritable. Anguish, agitation and tossing about, impossible to keep still. Repugnance to conversation. Melancholy with sadness.

Abdomen - Swelling of abdomen as in ascites. Much flatulence and grumbling.

Constitutions - Suited to women who bleed after every labor pain, flabby subjects.

Eyes - Feel too large and as if would fall out from their sockets. Vision blurred,

Trillium pendulum everything looks bluish.

Female - Leucorrhea is copious, yellow, and stringy (Hydr., Kali-bi., Sabin.). Menses every two weeks. Uterine hemorrhages with **sensation as though hips and back were falling to pieces**, better tight bandages.

Gushing of bright blood on least movement. Hemorrhage from fibroids (Calc., Thal., Spig., Phos., Ust.). Prolapsed uterus with great bearing-down. Metrorrhagia at menopausal. **Lochia suddenly becomes bloody.**

Profuse long-lasting bloody lochia. Varicose veins of pregnancy. Dribbling of urine after labor.

Head - Dull pain, worse noise, walking, coughing, better bending forward. Pain in forehead, worse noise. Headache worse by least noise, walking, coughing. Confused, eyeballs feel too large.

Heart - Palpitations with great anxiety.

Limbs - Cramping pains in muscles of arms and calves.

Lungs - Suffocative attack of irregular breathing with sneezing. Shooting pains through chest. Aching at end of sternum. Cough with spitting of blood. Copious and purulent expectoration. Hemoptysis.

Modalities - Better by exercise in open air. Better from a tight bandage, bending forward. Worse from motion, sitting erect. Worse menopause. Worse after eating. Motion aggravates the hemorrhages. Standing or walking causes bearing down in pelvis.

Mouth - Very offensive taste, especially on rising in morning. Greasy feeling on tongue and gums. Bleeding from gums. **Bleeding after tooth extraction.**

Nose - **Profuse nosebleed** (Mill., Meli.).

Rectum - Chronic diarrhea with bloody discharge. Dysentery with passing of almost pure blood. Diarrhea thin, watery, tinged with blood, painless. Constipation succeeded by thin, watery, very offensive diarrhea.

Sensations - As if eyes too large. As if a crumb were in larynx. As if the chest was tightly bound and could not be expanded. As if hips and small of back were falling to pieces. As if sacroiliac joint were falling apart, wants to be bound tightly. As if bones were broken. Left side most affected.

Skin - Skin hot and dry, with itching and burning, worse by scratching.

Stomach - Sickness, excessive pain, cramp of stomach. Faintness and sinking at stomach, with heat. Heat and burning stomach rising up in esophagus. Hematemesis.

Temperature - Feverish during pain in abdomen, on the subsidence of which a profuse perspiration broke out.

Vertigo - Vertigo on rising in morning.

COMMENTS - Millspaugh considered Tril. erectum as the proper source of the homeopathic tincture. According to Millspaugh, Tril. pendulum is the white variety of Tril. erectum. The Treasury of Botany gave the names as synonymous. The symptoms of H. Minton, the original prover, were given in Allen under Tril. cernuum.

Minton's proving of Tril. cernuum brought out the hemorrhagic property in the blood tinged diarrhea.

Copious hemorrhages, either active or passive, usually bright red and profuse. Hemorrhage, ante-partum and menopausal, fibroid tumors. Hemorrhage, with faintness and sinking at the stomach, also cold limbs and rapid, feeble pulse. "Flooding with fainting."

Hemorrhages with restlessness and exhaustion. Blue vision, craving for ice water. Tendency to putrescence of fluids. Tril. has been used as a local hemostatic in nosebleed and for bleeding after tooth extraction.

Minton's proving brought out "Sensation of emptiness in abdomen." He also noted extreme debility, palpitation and anxiety. Restless tossing agitation, fear of being sick, and great anguish were experienced by Minton.

RELATIONS - Compare: (1) Tril-c. - eye symptoms, everything looks bluish, greasy feeling in mouth. (2) Fic. - hemorrhages, menorrhagia, hematuria, nosebleed, hematemesis, bleeding hemorrhoids. (3) Hir., Leech - hemorrhages, bleeding from anus. (4) Ip., Sabin., Lach., Ham. **Complementary:** Calc-p. (menstrual and hemorrhagic affections).

REFERENCES - Boericke. Clarke.

***TRINITROTOLUENUM

(T.N.T.)

PHARMACY - trinit. Trinitrotoluenum. T.N.T. Trotyl. **Historical dose:** All potencies.

CLINICAL - Anemia. Cramps. Cyanosis. Depression. Dermatitis. Dyspnea. Faintness. Fatigue. Heart, disorders. **Hemorrhages.** Insomnia. Jaundice. Palpitations. Vertigo. Vesicles.

HOMEOPATHIC - TNT is a high explosive, obtained by nitrating toluene, a product of coal tar distillation. When the skin or hair is exposed to TNT by contact a characteristic yellow or tawny-orange stain is produced, which lasts for some weeks. Indicated in graver forms of anemia (pernicious) and jaundice. Produces fatal toxic jaundice.

Symptoms were noted in ammunition workers handling TNT who inhale and ingest it, and also absorb some through the skin. They were compiled by Dr. C. Wesselhoeft and published in the December, 1926 issue of the Journal of the American Institute of Homeopathy.

The destructive action of Trinit. on the red blood corpuscles is responsible for the anemia and the jaundice with their secondary symptoms. The hemoglobin is changed so it cannot act satisfactorily as an oxygen carrier and as a result there is breathlessness, dizziness. Headaches, faintness, and palpitations. Undue fatigue, muscle cramps and cyanosis, also drowsiness, depression and insomnia.

Later stages of the poisoning produce toxic jaundice and aplastic anemia. The jaundice is the result of cellular destruction in contrast to obstructive jaundice. Faintness, dizziness, mental sluggishness, delirium, convulsion, coma. Face very dark.

MIND - Depression. Apathetic and cries easily. Aversion to company. Mental sluggishness, delirium.

Food - Aversion to tea. Alcohol aggravates.

Head - Frontal headache and depression.

Heart - Palpitations, tachycardia and bradycardia. Intermittent pulse.

Kidneys - Sudden desire, incontinence and retention. High colored urine, burning on urination.

Lungs - Nose dry with stuffed sensation. Burning of trachea, choking weight on chest, dry, convulsive cough, raising mucus plugs.

Modalities - Worse alcohol, falls after one or two drinks of whisky.

Nose - Sneezing, coryza.

Skin - Tendency to hemorrhage under the skin and from the nose. Hands stained yellow. Dermatitis, nodular erythema, vesicles, itching and burning, puffiness. **Tired pain in back of knees.**

Stomach - Bitter taste, much thirst, sour regurgitation, dull burning behind the ensiform, nausea, vomiting, constipation followed by diarrhea with cramps.

RELATIONS - Compare: (1) Zinc., Phos., Cina, Ars., Plum.

***TRIOSTEUM PERFOLIATUM

(Fever-wort)

PHARMACY - trio. Triosteum perfoliatum. Fever-wort. Fever root. Wild coffee. Horsegentian. N. O. Caprifoliaceae, Tribe, Lonicereae. Tincture of fresh root. **Historical dose:** Tincture and all potencies.

CLINICAL - Adenoma. Angina pectoris. Arteritis. Asthma. Backaches. Biliousness. Blepharitis. Breast pain. Conjunctivitis. Coughs. Cystitis. Dyspepsia. Encephalitis. Erysipelas. Erythema. Fevers. Headache, bilious. Herpes zoster. Infections. **Influenza.** Joints, stiff. Measles. Menorrhagia. **Numbness.** Otitis. **Ozaena.** Pyelonephritis. Rheumatism. Scarlet, fever. Typhoid, fever. Typhus, fever. **Urticaria.** Vomiting.

HERBAL - The name "fever-wort" tells its traditional reputation. Hale said it is one of the ingredients of the

“fever powder” of the herbalists.

HOMEOPATHIC - Trio, is an energetically acting drug and has been proved by Williamson, Neidhard, Gatchell and other experienced provers. The symptoms were established by Raeside on fifteen provers (eight men and seven women) in 1959-60. Raeside used the 8c potency, at the rate of one dose every morning until the symptoms appeared.

Trio, is traditionally prescribed as a febrifuge. Above all, it causes vomiting, gastric pains, generalized pains, fever with agitation and insomnia. Talmadge, one of the provers, found it of great value in typhoid and gastric fevers. It produced acute rheumatic symptoms and an intense urticaria.

Biliousness. Gallbladder colic. Diarrhea attended with colicky pains and nausea. **Numbness of lower limbs after stool.** Increased flow of urine.

Dryness of the mucus membranes of the lips, mouth and throat. Dry cough. **Influenza with aching pains** all over with heat in the limbs. Acute encephalitis in infancy, especially after diphtheria, measles, whooping cough. Sudden weariness around 2 a.m. and 4 p.m. Sensation of sleeping standing up. Sensation of needles all over the body when hot. Generalized pain in the upper and lower limbs. Nervous symptoms (Coff., Hyos.).

Generalized itching, especially on the scalp and limbs of the upper and lower limbs. Erythema, eruption of flat, hard nodules, brown or purple in color, on the joints in the limbs.

MIND - Irritated by noise and in the evening. Irritability, difficulty in controlling himself. In the evening, feels in a rage, difficult to control himself. Tends to quarrel bitterly, argumentative.

Nervous and sleepy, cannot concentrate. Mental exhaustion. All mental activity requires a great effort. Euphoria, followed by a state of depression. Feels isolated, better when alone.

Abdomen - Distended and full of gas. Pain in the coccyx. Sharp pain in the left side of the groin. Epigastric pain spreading to the thorax and throat. Enterocolitis. Colic, especially in the right iliac fossa and the hypogastrium. Flatulence, after drinking milk.

Back - Painful stiffness of the back.

Chest - Angina pectoris. Pressing pain in the precordial region when lying on the left side. Dull ache all over the thorax, predominately in the retro-sternal region with thoracic constriction. Swollen glands in right axilla.

Ears - Otitis. Constant earache in the left ear and discharge. Itching around the ears. Buzzing noises, worse when lying down.

Eyes - Conjunctivitis. Smarting and hot, painful, especially when closed. Left eye swollen, red and hot. Eyes water, difficult to focus. Blepharitis. Eyelids irritated, especially the right side. Twitching of right eyelid in the evening.

Female - Irregular cycle, either late or early menses. Menses long and late. Menses painful, scanty. Menorrhagia.

Food - Loathing of food. Painful hungry feeling, aggravated around 11 a.m. and in the evening. Worse after drinking milk.

Head - Occipital pain with nausea on rising, followed by vomiting. Frontal headache. Dull pain, pulsating or pressing, located at the forehead, occiput or temples. Pressing headache at the left temple and occiput and on the right side of the forehead. Stinging, needle-like pain in the left orbital region. Painful tenderness of the scalp and hair when touched.

Heart - Angina pectoris. Arteritis of the coronary arteries. Pulse slow and weak.

Kidneys - Pyelonephritis. Cystitis. Frequent urination. Smell of ammonia in the urine. Adenoma of the prostate gland.

Limbs - Generalized pains in the upper and lower limbs. Stiffness of all joints, calves numbs, aching in the bones. Rheumatic pain in back. Pains in limbs. Numbness of the lower limbs after going to stool. Burning, pulsating pains in the right axilla, where the glands are swollen. Cramping pain in the left shoulder and arm in the two lower limbs and in the fingers of the right hand.

Lungs - Sensation of choking, has to grope for breath. Asthma. Bronchitis. Dry cough, caused by irritation of the larynx after eating. Cough, especially in the evening, aggravated in a warm room.

Modalities - Better from rest, solitude. Better fresh air, cold drinks. Worse early morning, 3 a.m. to 7 a.m. Worse in the

Triosteum perfoliatum evening, at night, lying, turning in bed, after sleep, rising from bed, waking. Worse sitting up, movement. Worse from heat, drinking cold water.

Mouth - Dry mouth and lips. Mouth like parchment, hot with paresthesia of the lips. Fissure on the lower lip, painful ulcerated areas on the mouth, palate and lips. Sensation of a bitter taste, upper teeth painful. Tongue white and seems swollen.

Nose - Spots on the nose. Dryness of the nose and ears. Dull, continual aching behind the root of the nose. Painful rightsided sinusitis and hyperesthesia of the left side of the face. Rhinitis. **Ozaena.** Sinusitis, spasmodic

coryza. Coryza with running nose, thick, green discharge with sneezing. Nosebleed and smell of blood in the nose.

Rectum - Proctitis. Constipated, great effort to pass stools, which produces small, hard stools. Stools followed by diarrhea and nauseating wind. Stools watery, frothy. Rectal pains, stabbing, aggravated by pushing to evacuate, worse after passing stools. Rectal burning with anal itching, especially at night. Hemorrhoids.

Skin - Erysipelas. Eczema. Itching welts. **Urticaria** from gastric derangement. Itching of the whole body. Itching, especially of the feet, scalp, palms of hands, where there is dry eruption. Erythematous eruption on the calves, back, scrotum and on the inside of the thighs. Soles of feet itchy in the evening and in bed. Itching eruption on the shoulders and between the scapulae. Patches of brown on the skin. Peeling of the skin on the abdomen. Hyperesthesia of the skin, profuse perspiration, worse at night and from exercise.

Stomach - Acrid dyspepsia. Loathing of food, nausea on rising, followed by vomiting and cramps. Nausea, worse after meals, thirsty for cold drinks, which soothe.

Throat - Painful, irritated, especially at night and on waking. Pharynx red, causing a sensation of constriction. Tickling feeling causes coughing, the left tonsil is painful. Better by drinking cold drinks, even though swallowing is painful. Hoarseness, aggravated when speaking and in fresh air. Tickling feeling at the back of the throat with constriction, stifling feeling, causing a dry cough.

COMMENTS - Talmadge said of the effect on himself, 'Trios, acted promptly and emphatically, causing aching pains in nearly every part of the body, especially of lower limbs and head.'

The right side of the head was more affected than the left. The stomach was very much disordered. Severe vomiting and pain in the stomach. Itching at the anus, exudation of mucus.

A peculiar concomitant of the evacuations was numbness of the lower limbs after stool. Many symptoms came on in the early morning hours. One prover, though sleepy, could not sleep after midnight.

RELATIONS - Compare: (1) Bapt. - Gastric fever. Digestive complaints, putrid excreta, exhaustion, muscle pain. (2) Rheumatism, Bry., Rhus-t. (3) Load at epigastrium, Abies-n. (4) Sleepy but cannot sleep, Bell. Bell. - Fever, heat, restlessness, thirst. (5) Aeon. - Skin dry, anxiety, extreme restlessness. (6) Ars. - Anxiety, restlessness, burning pains ameliorated by the heat. (7) Coff. - Palpitations insomnia, restlessness. (8) Lach. - Congestive rush of blood, pharyngeal constriction, worse on waking. (9) Lat-m. - Pre-sternal pains resembling angina. (10) Lyc. - Distention aggravated after 4 p.m. (11) Sulph. - Itching and heat on the feet, alternating with coldness.

REFERENCES - Boericke. Clarke.

***TRITICUM REPENS

(Couch Grass)

PHARMACY - tritic. Triticum repens. Couch grass. Agropyrum repens. Cooch-grass. Cutch-grass. Quitch grass. N. O. Gramineae. Tincture of fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, disorders. Cystitis. **Dysuria.** Gonorrhea. Incontinence. Prostate, enlarged. Pyelitis. Strangury.

HERBAL - Burnett told how he learned from an herbalist the use of Tritic.; the herbalist cured a patient of Burnett's with it, the man suffered from dysuria. Burnett found it no less valuable for women than for men.

"Frequently in dysuria from an inflamed state of the urethra, Tritic., ten drops in a little water, frequently repeated of prompt effect often giving complete relief in a few hours and if the ailment is primarily in the urethra the relief is an abiding cure, if from a tugging of the heavy womb, it is only relief."

HOMEOPATHIC - Excessive, chronic irritability of the bladder. Dysuria, cystitis and gonorrhea. Strangury, pyelitis. Enlarged prostate. Incontinence, constant desire.

Dysuria, frequent, difficult and painful urination (Pop.). Catarrhal and purulent discharges (Pareir.). Urine is filled with gravel and sediment which causes irritation of the mucous surfaces. Always blowing nose.

COMMENTS - Burnett gave the case of a widow who was suffering from a complete procidentia uterus and very bad hemorrhoidal bleeding. She wrote that she was driven almost mad with painful urination, the burning and straining were truly awful.

Tritic., as above, was ordered and brought a most grateful letter from the patient. She kept a supply always at hand.

RELATIONS - Compare: (1) Chim., Senec., Pop., Buchu, Uva., Trad. (2) Polytr. - Ground Moss - Painful urination of old people, dropsy, urinary obstruction and suppression).

REFERENCES - Boericke. Clarke.

***TROMBIDIUM MUSCAE DOMESTICAE

(Acarus)

PHARMACY - from. *Trombidium muscae domesticae*. Acarus. Red acarus of the fly. N. O. Acarudea, class, Arachnida. Tincture of the animals. **Historical dose:** All potencies.

CLINICAL - Anus, prolapsed. Diarrhea. **Dysentery.** Hip joint, pain. Liver, pain. Nose, catarrh. Sciatica. Tibia, pain. Toothache.

HOMEOPATHIC - Trom. is a parasite found singly or in groups upon the common house-fly of a bright red color, nearly circular in shape. The alcoholic tincture, a brilliant orange in color was prepared from specimens, about 115 in number, collected in Frankfort, Philadelphia in 1864.

The provings, under the supervision of Hering, were made with the 3x, 6x, 9c, 18c. and 30c potencies. Trom. has cured dysentery with brown, thin, bloody stools and tenesmus. Dysentery, **worse by food and drink.** Brown, thin, bloody stools, much pain before and after stools. Stools only after eating.

Mucus discharge from nose while eating dinner. Weakness. Felt better in evening, better in open air. Rising up causes fainting. Reading aloud causes toothache. Rheumatic pains in left shoulder, arm, knee, and region of heart. Inability to keep quiet.

MIND - Talkative during day. Disposed to be contrary. Constant disposition to gape. Inability to collect ideas. Absence of ideas. Loss of memory.

Abdomen - Congestion of the liver. Gripping in hypochondrium in morning. Much pain in abdomen before and after stool.

Chest - Cutting to right of lower part of sternum. Sharp pain in lower part of chest. Throbbing all over chest from 9 to 11 a.m.

Ears - Shooting in ears in afternoon, worse swallowing or blowing nose. Itching in ears after rising. Burning in ears in evening.

Eyes - Redness of internal part of conjunctiva, similar to a pterygium. Lachrymation in open air. Itching at right inner canthus.

Food - Appetite lost.

Head - Oppressive headache. Dullness of head in forenoon. Head heavy, sometimes sharp pains in temples.

Lungs - Hoarseness. Hacking cough from irritation in throat.

Modalities - Warm drink improves toothache. Open air improves coryza. **Worse from any food or drink,** after stool. Worse by touch, pressure. Worse shaking head, moving. Cold air aggravates toothache. Cold bath aggravates pain in abdomen.

Mouth - Tongue coated white.

Nose - Nose obstructed on rising. Fluent coryza in open air and on eating. Mucus discharge from nose, worse during dinner. Dryness of nose in evening, with scabs.

Nosebleed in morning, afternoon.

Rectum - Burning in anus. Sharp pain in left side, shooting downward during stool. Urgent, loose, stools on rising. Stool only after eating. Brown, thin, bloody stools with tenesmus.

Sensations - As if there were no weight in ear, lightness. As from incarcerated flatus in abdomen. As if excoriated after tenesmus. As if everything were coming out of anus. As if hot air blowing over lower abdomen and thigh. As if abdomen needed support. As if three toes on left foot would be twisted off. As if her breath were leaving her.

Skin - Pimples on nape in evening. Itching in spots on chin and among whiskers, in evening, and about neck.

Sleep - Constant inclination to gape through day, in afternoon. Sleepiness. Restless sleep. Lewd dreams. Wakefulness after 4 a.m., with restlessness.

Stomach - Gripping in pit of stomach, worse after dinner. Belching after meals, tasting of ingesta. Vomiting after breakfast, thought it was from drinking coffee.

Teeth - Toothache, better warm drinks. Aching in left decayed tooth, worse lying down, eating, talking, and cold air.

Temperature - Chilliness at night, worse morning on waking. Fever in afternoon, with pulsation in arteries of head and aching on occiput and small of back.

Throat - Throat sore on right side.

Vertigo - Lightness of head. Dizziness, on every attempt to rise from bed, with faintness.

COMMENTS - The grand keynote of Trom. is "worse by eating or drinking," in the nose, teeth or tonsils. On this indication, Clarke cured some of the worst cases of diarrhea and intestinal pains coming on when the patient eat or drinks.

"Much pain before and after stool, stool only after eating." Congested liver with urgent, loose stools on rising from bed. During stool, sharp pain in left side, shooting downward.

Skin symptoms, especially itching of scalp and in whiskers. Restlessness, inability to keep quiet. Fainting on rising up.

RELATIONS - Antidoted by: Staph, (toothache), Merc-c. (diarrhea), **Compare:** (1) Rheumatism, Led. (2) Diarrhea. Sulph. (3) Worse blowing nose. Cube, Thuja. (4) Stitches up anus, Ign., Nit-ac., Sul-ac. with prolapse, Podo.

REFERENCES - Boericke. Clarke.

***TROPAEOLUM MAJUS

(Indian Cress)

PHARMACY - trop. Tropaeolum majus. Indian cress. Garden Nasturtium. N. O. Tro- paeolaceae. Tincture of fresh plant. **Historical dose:** Tincture and all potencies.

HERBAL - Tropaeolum is a native of Peru. The taste of the leaves were considered like the taste of cress, and they have been used like cress in salads. The seeds make pickles and are used as a substitute for capers.

A patient to whom Cooper gave Trop, noted that it made the urine extremely fetid in smell. On this keynote, Cooper relieved several cases of urinary difficulty, giving single doses of the tincture.

REFERENCES - Clarke.

***TUBERCULINUM AVIAIRE

(Chicken Tuberculosis)

PHARMACY - tub-a. Tuberculinum aviaire. Chicken tuberculosis. Tuberculinum avis. Nosodes. A preparation of chicken tuberculosis. **Historical dose:** All potencies.

CLINICAL - **Bronchitis. Broncho-pneumonia. Chronic fatigue.** Colds. **Coughs.** Debility. Emaciation. **Influenza.** Lung, disorders. Measles. Pneumonia. Prostration. Tuberculosis. Weakness.

HOMEOPATHIC - Tub-a. is prepared from the infected liver of chickens. Dr. Cartier gave an account of this nosode in his paper read at the International Homeopathic Congress, 1896. The bacillus of avian tuberculosis has been identified with that of human tuberculosis. But the clinical properties of the two nosodes are not identical.

Tub-a. acts most prominently on the apices of the lungs and it corresponds most closely to the **bronchitis of influenza**, which simulates tuberculosis, having cured several hopeless-looking cases. It has also done **Tuberculinum aviaire** excellently in some cases of bronchitis following measles. H. D. Baker noted "Tub. aviaire has served me better than any remedy in the **long lasting prostration after the influenza.**"

Dr. Francois Cartier of France found it useful in **broncho-pneumonia of children** and persistent cough after influenza and measles.

Symptoms similar to tuberculosis, relieves the debility, diminishes the cough, improves the appetite and braces up the whole organism. Acute broncho-pulmonary diseases of children. Itching of palms and ears. **Coughs are irritating**, incessant and tickling, loss of strength and appetite. Emaciation (Hydr. to fatten patients after tuberculosis).

Acts on the mind, spinal nerves and branches, muscles, joints, bronchi and mucus membranes. **Influenza and its sequelae. Chronic fatigue.** Muscular or nerve pains are better by motion, but the patient tires easily. Pains and mental symptoms are better in the open air.

Relaxed, degraded conditions of tissues and secretion. Dingy, unhealthy, doughy or aged appearance and feeling of the skin and soft tissues and an old catarrhal aspect of mucus excretions. In acute conditions the rapidity of the emaciation is notable.

MIND - Depressed. Easily frightened. Mentally changeable in feeling and purpose. Desires change. Dissatisfied with present conditions and surroundings. Desperate, wicked feelings. Lack of moral sense. Restlessness, the desire for change is physical as well as mental.

COMMENTS - Anshutz related a case of a woman who entered the hospital suffering from influenza and who, a few days after a slight amelioration of her symptoms, was attacked with a pulmonary congestion, clearly localized in the top of the left lung and accompanied by all the clinical symptoms of tuberculosis.

Rales and moist crepitation, dullness, exaggeration of the thoracic vibration, expectoration, fever, perspiration, spitting of blood. Examination of the sputa showed distinctly the presence of Koch's bacilli.

Anshutz gave her Tub-a. and in three weeks all the symptoms had left. That woman left the hospital completely cured and a year later her health was still perfect. Anshutz noted ten cases of influenzal bronchitis with incessant coughs, fever and expectoration, rapidly cured by Tub-a.

It seems that Tub-a. does not act in diminishing the cough like an anodyne, but braces up the whole organism. The relief of debility and the return of appetite are the phenomena which was observed in conjunction with the diminution of the cough.

In contrast with Bac., Tub-a. has considerable cough and little dyspnea. It has an acute, irritating cough, such as one meets with in acute diseases or sub-acute disorders in young people. A cough which fatigues and

which leads to enfeeblement and loss of appetite, a suspicious cough.

Dr. R.E.S. Hayes made the following statement: "My experience has led me to select the Tub. Bovinum for patients presenting more pronounced localizations in the meninges, abdomen, skin, glands or joints. But the Tub. Aviare for patients who were affected by a more evident depreciation of quality in the entire person at the same time, such as occurs after influenza or similar crises. This observation is purely clinical.

"Recurrent influenza with long continued cough. Long continued, annoying, teasing cough remaining after the active symptoms of bronchitis or influenza, in a good many instances Tuberculinum aviare put an immediate end to this cough any related discomforts. Aviare has the usual characteristics of Tuberculinum plus its affinity to influenza and to nerve elements, both sympathetic and cerebro-spinal."

RELATIONS - Compare: (1) Bac., Bac-ts., Tub., Ars-i.

REFERENCES - Anshutz. Boericke. Clarke

***TUBERCULINUM BOVINUM

(Tuberculosis Nosode)

PHARMACY - tub. Tuberculinum bovinum. Tuberculosis nosode. Tuberculinum bovinum of Kent. Tuberculinum of Koch. Nosode is prepared either from tubercular abscess or from a glycerine extract of pure cultivation of human tubercular bacillus. Dilutions. **Historical dose:** Tincture and all potencies.

CLINICAL - Acne. Albuminuria. Allergies. Appendicitis. **Asthma. Bedwetting.** Bones, decay. **Breast, tumors.** Bronchitis. **Broncho-pneumonia.** Catarrh. Chilblains. Chilly. **Colds.** Cornea, opacity, ulceration. **Coughs.** Dentition. **Diarrhea. Dysmenorrhea.** Dyspnea. Ear, infections. Edema. Emaciation. Epilepsy. Erysipelas. Erythema. Glands swollen. Hematuria. Hemoptysis. Headache. Heart, disorders. Hyperactivity. Influenza. Leprosy. Leucorrhea. **Lungs, disorders.** Lupus. Mania. Menses, early. Nephritis. Neurasthenia. **Night sweats.** Night, terrors. Paralysis. Pleurisy. **Pneumonia. Throat, sore.** Tonsillitis. **Tuberculosis.**

HOMEOPATHIC - Clarke found no appreciable difference between the action of Tub. and that of Bac. His own impression was that they are practically identical and that one will answer to the indications of the other. The first provers were tuberculosis patients and only pathogenetic symptoms are recorded. Tub. 30c was used.

Tub. affects the mind, lungs, head, occiput, glands and larynx. When symptoms are constantly changing and well-selected remedies fail to improve. Relapsing states. Patient always tired, motion causes intense fatigue, aversion to work, wants constant changes.

Tubercular miasm. In tuberculosis where the symptoms are constantly changing and begin suddenly, ceasing suddenly or of obscure nature. Early stage tuberculosis.

Always tired, motion causes intense fatigue. Increasing exhaustion and lowered vitality. Weakness, emaciation with good appetite. Rapid breakdown of health. General exhaustion. Nervous weakness. Neurasthenia. Fainting. Trembling, quivering. Epilepsy. Nervous children. Mentally deficient children.

Tendency **to catch cold easily**, on slightest exposure, which ends in diarrhea. **Diarrhea in children** running for weeks, extreme wasting, bluish pallor, exhaustion. Chronic, enlargement of the glands, adenoids. Enlarged tonsils. Kidney disorders, chronic cystitis.

Bruised pain throughout the body. Bones painful. Formication. Skin affections, acute rheumatism. Arthritis. Clothes feel very damp. Very susceptible to changes of weather. Very sensitive mentally and physically. Sensitive to music.

MIND - Changing moods. Dissatisfied and restless, always wants a change. **Desire to travel**, does not want to remain in one place long. **Deep feeling of being unfulfilled.** Romantic longing to find inner contentment. Wants to do something different or even to find a new doctor.

Restlessness. Needs stimulating experiences. Constant fight against boredom. Compulsiveness. Desire to break things. **Impulse to run.** Reckless. Every trifle irritates, worse when waking. Anxious. Anxiety during fever. Children awake screaming with restlessness. Whimpers when spoken to. Whines and complaints with very little ailment. Precocious children.

Contradictory behavior, changing moods. Insomnia and sopor. **Depressed**, melancholy. Hopeless. Weary of life. **Sensitive to music.** Fear something will happen. **Fear of animals**, particularly averse to dogs and cats. Aversion to mental work. Confusion, everything in the room seems strange. Ritualistic. Superstitious.

Mania and melancholia. **Maliciousness** behavior and destructiveness. Abusive. Fits of violent temper, wants to fight, throws anything at anyone even without a cause. Destructive fantasies. Desire to use foul language, curse and swear.

Abdomen - Inguinal glands indurated and visible. Drum belly. Spleen region bulging out, stitching pain in sides after running. Stitching pain in sides after running. Tympanites. Tabes mesenterica.

Back - Tension in nape of neck and down spine. Chilliness between shoulders or up the back. Pain in the back with palpitations. Sensation as if damp clothes on back.

Breasts - Severe pain in breast at the beginning of menses. **Breast tumors**, benign. Retraction of nipples.

Causations - Tuberculosis.

Chest - Heat in chest. Sore spot, pressure in chest. Sticking pain on both sides of chest in back.

Constitutions - Tubercular constitutions. Lax fiber, low recuperative powers, very susceptible to changes in the weather. Mentally deficient children. Adapted to light complexioned, narrow-chested people.

Coughs - Hard, dry cough during sleep. Hard, hacking cough with profuse sweating and loss of weight, rales all over chest. Cough with chill and red face, worse evening.

Ears - Persistent offensive otorrhea. **Perforation in eardrum** with ragged edges. Sticking pain from pharynx to ears. Great aching in ears and teeth. Tinnitus. Rushing in ears with heavy head.

Eyes - Sore, bruised eyeballs, worse turning them. Eczema of margins of eyelids. Meningitis with squint.

Face - Old looking, edematous, pale. Black blisters on lips. Slight swelling and itching of lips. Aching in malar bones.

Female - Burning in genitals. Amenorrhea. Menses too early, too profuse, long- lasting. Menses soon after childbirth. **Dysmenorrhea, pains increase with the flow.** Severe pain in breast at beginning of menses. Benign breast tumors. Retraction of nipples.

Food - Loss of appetite, especially in morning. Aversion to all food, particularly meat. Ravenous hunger at night, driving out of bed. Craves alcohol, delicacies, sweets, **cold milk. Strong craving for smoked meats and fats**, bacon, ham, pork. Extreme thirst, day and night.

Head - Meningitis. Periodical headaches. Intense pain, as of an iron band around head. Deep violent head pains, tears hair or beats head with fist. Dashes against the wall or floor, worse motion. Shooting from over eyes (right) through the head to back of ear (left) or from right frontal protuberance to right occipital region. Headaches students, worse study or even slight mental exertion. Brain feels loose. Sensitive scalp. Plica polonica (Vine.).

Heart - Heaviness and pressure over the heart. Palpitations on taking a deep breath after evening meal.

Kidneys - Must strain at stool to pass urine. Sticky urinary sediment. **Bedwetting.**

Limbs - Acute articular rheumatism. Hands and arms feel lame, unable to write or raise a cup or a glass. Fingertips brown. Sensation of fatigue in limbs. Cold feet in bed. Limbs feel weak or as if paralyzed worse dinner. Rheumatism. Pains in ulnar nerve. Wandering pain in limbs and joints.

Lungs - Shortness of breath. **Sensation of suffocation**, even with plenty of fresh air. Longs for cold air. Asthma. **Pneumonia** after influenza. **Tuberculosis.** Deposits begin in apex of lung. **Broncho-pneumonia** in children. Profuse bronchorrhea. Hard, hacking cough, profuse sweating and loss of weight, rales all over chest. Dry, hard cough, more during sleep, worse dyspnea with chill and red face, worse evenings, worse raising arms. Thick, easy, profuse expectoration. Thick yellow or yellowgreen sputum. Mucus rattle in chest without expectoration.

Modalities - Better open air, cool wind. **Better dry mountain air, pineforests.** Better dry, warm weather. **Worse from close room. Worse change of weather**, before a storm, **cold, damp**, drafts. Worse motion, slightest exertion, standing. Worse noise and music. Worse periodically. Worse after dinner, evening, night, when beginning to sleep. **Worse on waking**, early morning, after sleep, from 10 a.m. to 3 p.m. Worse in the mornings, much purulent expectoration, sickness and nausea, loss of appetite, thirst, fatigue. Worse or better at seashore.

Mouth - Dryness, stickiness. Black blisters on lips. Grinding of teeth in sleep. Teeth sensitive to cold air. Sensation as if the teeth were all jammed together and there were too many teeth. Delayed dentition. **Nose** - Nose and lips somewhat swollen.

Sweat on nose. Crops of small boils, intensely painful, successively appear in the **nose.green, fetid pus.** Watery pimples, which, suppurating, form scabs. Dryness of posterior nares. Soreness inside of nose. Colds ending in diarrhea.

Perspiration - Clammy sweats. Sweat stains yellow. Offensive, of chest, axillae, palms, nose and feet. Profuse **night sweats.** Sweats from coughing, from slightest exertion. Sweats on hands, on upper parts.

Rectum - Constipation, stools large and hard, then diarrhea. Chronic diarrhea with excessive sweat. Early-morning, sudden diarrhea (Sulph.). Brown, foul, watery stools, discharged with much force. Diarrhea of children running for weeks with wasting, exhaustion and bluish pallor. Tearing pain in rectum on coughing. Tearing in rectum on coughing.

Sensations - As if the brain were squeezed with an iron ring. As if the teeth were jammed together and were too many for the mouth. Mucus in the throat of a tumor in the throat. Pressure in stomach going to throat as if the clothes were too tight. As if the clothes on the back were wet (Bac.).

Skin - Skin easily tanned. Dry, harsh, sensitive. **Acne** in tuberculous children. Ringworm. Measles. Psoriasis (Thyr.). Bran-like scales. Chronic eczema. Intense itching, changes places on rubbing, worse at night. Itching

in cool air, better heat of stove. Itching worse undressing, bathing.

Sleep - Insomnia and sopor. Overpowering sleepiness in daytime. Shuddering sensation on falling to sleep.

Grinding of teeth during sleep. Night, terrors. Nocturnal hallucinations, wakes frightened. Screaming in sleep.

Nightmares. Child wakes screaming. Awakes in horror. **Night sweats.** Poor sleep, restless, wakes early.

Overpowering sleepiness in daytime. Distressing, vivid dreams. Dreams of shame. Dreams frightful.

Stomach - All gone hungry sensation (Sulph.), which drives one to eat. Cramping pain in stomach. Belchings and sensation of fullness over stomach. Flatulent dyspepsia. Nausea with pains in umbilical region with diarrhea. Nausea before breakfast, with sudden diarrhea. Vomiting.

Temperature - Remittent fever. Loquacious during fever. **Profuse sweat**, easy, cold, clammy. Sweat on upper parts, on hands, worse coughing, stains yellow. General chilliness. Chilliness between shoulders or up back. Chilly, at beginning of sleep. Chilly, yet wants fresh air. Shuddering like a chill seems to go from brain down spine. Heat on cheek of affected side in spots. Burning in genitals. Flushes of heat, worse eating. Wants covers on in all stages of fever.

Throat - Hoarseness, better talking. **Enlarged tonsils.** Hawks mucus after eating. Adenoids. Dryness of the posterior sinuses.

Vertigo - Vertigo with obscuration of eyes, is obliged to lean on something. Vertigo with palpitations, nausea. Vertigo with headache, in morning, after dinner.

COMMENTS - Generally a history of tuberculosis in the family. Suppressed acute infections. Tendency for sore throats, colds, and upper respiratory infections or bronchitis. Swollen glands and big tonsils. Sore throats, swollen glands, start losing weight. Recurring tonsillitis in children. Similar to Bac., but more chronic and more severe.

Colds that go into the chest (Phos.). Asthma, associated with frequent colds. Intercurrent for severe, chronic lung disease. Lingered coughs, pneumonias. Coughs where well-indicated remedies don't work.

Rapid emaciation with a good appetite (Iod., Cina.). Emaciation associated with lung diseases. Rickets. Fatigue, faintness, and profuse debility. Great weakness in the limbs, after dinner. Paralysis.

Disturbed circulation, chills and flushes alternating. Extreme exhaustion with sweat. Night sweats and weight loss (Med.). Night terrors. Insomnia from overexcited state and

overactive mind. Children grind their teeth during sleep. "Shivering when beginning to sleep." "Cold feet in bed." Low vital heat.

Fontanelles that fail to close. Hydrocephalus. Meningitis. Characteristic desire to hit their head against the wall. Pressure in the head. Insanity. Hair growth in unusual and new places (Syph., Thuj.). Ringworm, particularly in children (Bac.).

Voracious craving for ice-cold milk. Desires sweets, chocolate, fats, smoked meat, pork, bacon, exotic foods and spicy foods. Craves variety in food. Diarrhea.

Better in the mountains, in pine forests. Desire for open air, particularly with respiratory conditions. Better motion, activity, exercise (Rhus-t.). Worse cold, damp with cold hands and feet.

Hyperactive children. Children seem to have two personalities, one very sweet, nice and apologetic, the other destructive, obstinate, and argumentative. Tantrums, behavioral problems. Can be snappy, irritable, peevish, over-reactive (Cham., when due to pain). Very intelligent, but learning disabilities. Too much energy, can't slow down to learn anything (Med., because they can't focus).

Easily bored. Very excitable. Active and very restless. Always needs something new. Strong desire to travel. Sense that there is something missing (Calc-p.), but they don't know what it is. Discontent. Passionate, driven and dissatisfied. Deep feeling of unfulfillment, emptiness. Very romantic, yearning and longing, pining. Falls in love easily and deeply, can be easily grieved (Nat-m.).

Easily upset. Hard to please, capricious. Malicious, conscious intent to do harm or to disrupt their environment (Med. is unconscious, more confused). Characteristic desire to break things. Can bite or mutilate themselves. Insanity. Fear of wasting their life, their time, of not accomplishing something significant before they die. Fear of dying or despair over their recovery. Dislike of dogs and cats, severe allergies to cats.

Nebel used Tub. in exactly the same way as Burnett; others have used Bac., on the indications Burnett laid down and with Burnett's results.

In 1892, Arnuphy began giving Tub. 6x and 8x trituration in acute and chronic tuberculosis cases, with encouraging success, but with undesired aggravations at times. These were avoided with 12x and 30x.

In one case, originating in influenza, both apices were affected, the right one breaking down and abundant pleuritic effusion on the left side. Six weeks' treatment with Tub. brought about recovery. When seen a year later, the patient was quite well except for retraction of the left side.

Arnuphy frequently used Tub. for bronchitis, catarrhal pneumonia, lobular pneumonia, tubercular pleurisy, parenchymatous nephritis and influenza. He gave two cases of acute lobular pneumonia with characteristic

symptoms and high temperatures quickly resolved by Tub.

One case concerned a boy, 3, who received the 12x; the other was a man, 78, who suffered from chronic bronchial catarrh. The latter was taken with influenza, pneumonia developed and he was in a very serious state. Tub. 30x made an almost immediate change for the better and recovery followed.

Arnuphy related that, in this case, an abundant perspiration took place (the skin had been dry) during the night and he observed this in all cases of pneumonia when Tub. acted favorably.

Clarke found Tub. 30c, 100c, 200c and 1000c the best general antidote to the chronic effects of influenza poisoning.

A curious use of Tub. was made by Jau- regg of Vienna in a case of insanity. He had observed that cases of insanity are always benefited by an attack of an acute infectious disease, especially if it is accompanied with high fever. The idea then occurred to him to utilize the fever produced by Koch's Tuberculinic injections.

He tried it on some patients and though the favorable symptoms soon disappeared after the fever subsided, there remained a steady clearing of the confused sensorium. Insanity is very frequently a manifestation of the tuberculosis miasm and there is something more than a pyrexial power in Tub.

RELATIONS - Vaccinosis may block the way of action of Tub. until Thuj. has been given. When Tub. fails Syph. often follows, producing a positive reaction. **Compare:** (1) Bac., Phos., Sil. (2) Tub-a., Form-ac. Stann., (3) Psor., Lach. (4) Teucr-s. - tuberculosis, garlicky odor of all secretions and breath. **Complementary:** Bac., Phos., Calc., Chin., Bry.

***TURQUOISE

(Gemstone)

PHARMACY - turq. Turquoise. Gemstone. Hydrous copper aluminum phosphate. $\text{CuA16(PO4)4(OH)8, 5H2O}$.

Historical dose: All potencies.

CLINICAL - Asthma. Backache. Cramps. Coryza. Cough. Diarrhea. Faintness. Fractures. Headache. Heat, flushes. Influenza. Injuries. Leucorrhea. Vertigo

HOMEOPATHIC - Injuries after falling from a height. Injuries to bones, fractures. Sharp pains. Internal or external squeezing pain. Sharp pains. Internal trembling. Accelerated pulse. Tension. Faintness on rising. Weakness, lassitude. Emaciation. Influenza.

Worse in the morning, afternoon, 1 to 4 p.m., after midnight, 3 a.m. Worse from waking. Coldness in the morning, in bed. Heat flushes, at noon. Heat aggravates. Better from the moon.

MIND - Fastidious. Industrious. Creative. Memory, active. Dullness, slowness of mind. Difficult concentration. Aversion to mental work. Forgetfulness. Discouraged.

Cheerfulness. Excitement, exhilaration. Laughing, quickly followed by weeping. Alternating moods. Horrible news, sad stories, affect profoundly. Sadness. Grief. Homesickness. Weeping. Despair.

Impatience. Irritability, waking aggravates. Irritability before menses. Confrontational. Censorious. Hatred. Angry, toward husband. Averse to husband. Aversion to company. Anxiety, during cough.

Vivacious. Confidence increased. Amorous disposition. Clairvoyance. Foreboding. Tranquility. Relaxed feeling. Persistent thoughts. Delusion that she is betrayed. Delusion of being old. As if in a dream. Time passes too slowly, appears longer. Detached. Sensitive to noise, light. Starting during sleep. Restlessness.

Abdomen - Distension. Abdominal pain, better from diarrhea or vomiting. Cutting, squeezing, cramping pain, during diarrhea.

Back - Backache, worse draft of air, bending forward. Back pain, cervical, dorsal, under scapula, lumbar. Dorsal contraction. Lumbar, dorsal tension. Aching pain, cervical, extending to occiput. Cervical stiffness. As if neck gripped by a hand. Pain, swelling in the cervical glands. Pimples. Eruptions, acne.

Breasts - Itching in nipples.

Chest - Compressed sensation. Constriction. Eruptions, acne. Itching, evening. Pain in the ribs. Tingling. Tingling, side.

Ears - Clear discharge. Noises, especially in the left.

Eyes - Dryness, irritation. Heaviness, tired sensation. Swelling. Scratching sensation. Pain, as if from sand.

Face - Discoloration, red flushes. Greasy. Wrinkled skin. Dry lips, posterior nares. Peeling, rough lips. Herpetic eruptions, painful, suppurating. Eruption on lower lip, around mouth. Acne, on forehead. Pimples.

Female - Profuse clotted menses, frequent, too early, too soon, too short. Cramping pain in uterus, during menses. Leucorrhea, lumpy. Itching vagina. Pain, burning vagina. Sexual desire increased, decreased.

Foods - Aversion to meat, sweets. Desires alcohol, cold drinks, cold food, salt, pickles at night. Wine aggravates.

Heads - Sudden headaches. Headaches in the afternoon, evening, on waking. Headaches, worse motion.

Forehead pain, behind the eyes, extending to vertex. Temple pain, extending to vertex, forehead. Occiput pain, at night. Vertex pain. Dull pain. Piercing, penetrating pain. Squeezed pain in occiput. Expanded sensation. Sensation of swelling. Sensation of wet towel inside

Turquoise head. Itching scalp.

Kidneys - Urging to urinate. Pain before urination. Frequent urination. Feeble stream, slow, weak.

Limbs - Sharp pain in hip, thigh. Cramps in legs, hips, ankles, feet. Leg cramps at night. Leg weakness, descending stairs with trembling. Burning foot. Blotches, red eruptions. Dry eruptions. Echymoses. in lower limbs. Eruptions in legs, calf, knee, itching. Itching eruption in the forearm, shoulder, hands, palms. Numb finger, second finger. Electrical current sensation in arms. Stiff, tense shoulder.

Lungs - Asthma. Difficult breathing. Dry cough. Night cough.

Mouth - Metallic taste. Numb tongue. Pain, biting in the tongue. Roughness inside lip. Swelling gums.

Nose - Obstruction at night, wakes him. Obstruction, morning. Coryza in the morning, with fluent discharge. Clear discharge. Sneezing in the morning. Acute sense of smell.

Perspiration - Scanty sweat.

Rectum - Constipation, ineffectual urging. Diarrhea. Frequent hard or soft stool. Bloody stool. Flaky stool.

Skin - Abscess. Echymoses. Eruption, pimples, worse warmth. Painful eruptions, red, sudden itching.

Sleep - Yawning, vehement, violent. Falling asleep difficult. Restless. Unrefreshing sleep. Sudden waking, after midnight, 1 a.m., 2 a.m., 3 a.m. Difficult waking. Deep sleep. Vivid dreams. Dreams of cats, insects. Dreams of food, of water, of urinating. Dreams of houses falling apart, of falling, of injuries. Dreams of making purchases, of money, of servants. Dreams of being small, of being very tall, of growing large. Dreams of a man who looks like a woman.

Stomach - Appetite diminished, easy satiety. Appetite increased. Thirst. Tension. Noises, gurgling. Eructations at night. Nausea, with chill, headache. Vomiting.

Throat - Pain. Itching. Thick sensation. Voice rough.

Vertigo - Vertigo with headache, during sleep.

Vision - Acute or blurred vision.

COMMENTS - One of the first gemstones to be mined, turquoise has long been prized for its intense color, which varies from sky blue to green, depending on the quantities of iron and copper within it.

Turquoise symbolizes laughter, humor, confidence, and purpose. Turquoise is said to strengthen eyesight and even cure blindness. Strengthens and calms the mind and body. Stimulates tissue regeneration. Revitalizes blood, nervous system.

It is said to be beneficial for circulation, bowel cramps and the chest area including lungs and respiratory system. Throat, lungs, asthma. Tones and strengthens entire body. Good for internal cleansing. Infections. Headache. High blood pressure. Anorexia. Teeth, jaw ailments. Hearing disorders.

Like amethyst, it protects and detoxifies from alcohol, poison, pollution, x-ray/sun radiation. Induces enthusiasm. Encourages family bonding. Promotes trust, love, kindness and innocence. Empowers artistic traits. Provides discipline, attention and understanding. For fear, depression.

RELATIONS - Compare: Amethyst. Amber. Ruby.

REFERENCES - Murphy. Rowe.

***TUSSILAGO FARFARA

(Coltsfoot)

PHARMACY - tus-fa. Tussilago farfara. Coltsfoot. British herb. Farfara. Tobacco waste. N. O. Compositae. Waste, sandy, clay banks. Tincture of fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Coughs. Gonorrhea. Scrofula. Tuberculosis.

HERBAL - Cooper noted that Tussilago farfara is used in the form of a confection for coughs. The leaves are mucilaginous and were much used in scrofulous disorders. Smoking the dried leaves relieves coughs.

HOMEOPATHIC - Tus-fa. has been used as an intercurrent medicine in tuberculosis of the lungs (Tub.).

Coughs. A popular reputation in gonorrhea.

REFERENCES - Clarke. Cooper.

***TUSSILAGO FRAGRANS

PHARMACY - tus-f. Tussilago fragrans. Petasites fragrans. Italian tussilage. Fragrant Tussilage. N. O. Compositae. Tincture of whole plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Obesity. Plethora.

HOMEOPATHIC - Demesnes proved Tus-f., taking three drops of the tincture on the tongue. After first causing a disagreeable, spiteful mood, it set up in a few days an opposite condition, which lasted some time. A journey

taken on the ninth day of the proving, which usually caused loss of weight, did not do so.

Tus-f. has a peculiar sensation induced was as if a morsel of food lay at the bottom of the cardia and would not pass. Stoutness increased and plethora was added, later on the abdominal protuberance permanently disappeared.

REFERENCES - Clarke.

***TUSSILAGO PETASITES

(Bitter-burr)

PHARMACY - tus-p. Tussilago petasites. Bitter-burr. Petasites officinalis. Petasites vulgaris. N. O. Compositae. Grows on sandy meadows on the banks of streams. Tincture of whole fresh plant. **Historical dose:** Tincture and all potencies.

CLINICAL - **Coughs.** Gallbladder, colic. Gonorrhea. Headache. Kidney colic. Lumbago. Night-sweats. Orchitis. Prostatitis. Pylorus disorders. Sinusitis. Spasmodic cough. Throat, sore. Tibia, pain. Uvula, burning.

HERBAL - Tussilago petasites grows in Central and Northern Europe. Tussilago means "cough-wort." According to Green's Herbal, it is "a genus of Compositae established for three or four species of Tussilago, which have the flower-heads partially dioecious in racemes, sometimes branching into panicles.

"The essential characters which separate them from the common Coltsfoot (Tussilago farfara) are very slight and the foliage is the same" (Treasury of Botany). Tussilago petasites grows on river-banks that are little

trodden on. The roots are an admirable

medicine in the worst kind of fevers with boils or buboes."

A medicinal plant, it was used as a diaphoretic in the middle ages. Its pharmacological action is sudorific, diuretic, emmenagogue and anti-asthmatic. It has been used for uterine cramps, coughs, hoarseness and urinary disorders.

HOMEOPATHIC - In 1847 it was the object of a fragmented homeopathic proving by Kuchenmeister and in 1960 of a pharmacological study by Karl Haas. A recent pharmacological study of the root extract revealed a product with antispasmodic action.

Tus-p. has some action on the urinary organs and was found useful in gonorrhea. Affections of pylorus. Irritation of the urethra. Crawling in urethra. Gonorrhea, yellowish, thick discharge. Erections with crawling in the urethra. Inflammation and pain of the spermatic cord. Lumbar pain. Pains in the frontal sinuses.

Modalities - Pains in pylorus worse by pressure. Lumbago worse standing. Drinking causes belchings. Worse from walking.

COMMENTS - Kuchenmeister and five others took substantial doses. Most noticeable among the symptoms were a lumbago of very great severity. Tightness of the chest. Headache shifting from one part of the head to another during two days. Pain about the pylorus. Urethritis with yellow discharge.

Hansen gave the indication "Acute or chronic gonorrhea, yellow or white, thick discharge." Crawling in urethra, jerking in spermatic cord and drawing in right testicle are additional symptoms of the proving.

Rosenberg gave some experiences. The first concerned an extremely violent gonorrhea, penis swollen, painful, emission of urine extremely painful, mixed with blood, patient feverish and restless.

Tus-p. was given in water. There was a great aggravation of all symptoms in thirty- six hours. The remedy was discontinued and marked amelioration followed. Resumed again, much diluted, rapid cure followed. The remedy was used externally as well in this case.

A second case was a chronic ophthalmia, the result of gonorrhea "cured" with turpentine. Tus-p. restored the discharge and then cured.

Rosenberg referred to a writer who said of the plant that if it is macerated in water, the water will not spoil even if kept for years.

RELATIONS-Co/n/we.'(l)Tus-fa.orTus-f.- pylorus pain, plethora and corpulency. (2) Pain in pylorus - Tus-f. is as if a morsel had lodged at bottom of cardia. (3) Lumbago, Ant-t. (4) gonorrhea, Thuj.

REFERENCES - Boericke. Clarke.

***TYPHA LATIFOLIA

(Cat-tail Flag)

PHARMACY - typh. Typha latifolia. Cat-tail flag. Tincture. N. O. Typhaceae. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC - Diarrhea, dysentery. Summer diarrhea complaint of children.

RELATIONS - **Compare:** Cupr., Chin.

REFERENCES - Boericke.

***ULMUS FULVA

(Slippery Elm Bark)

PHARMACY - ulm. Ulmus fulva. Slippery elm bark. Ulmus campestris. Red elm. Moose elm. N. O. Ulmaceae of the Urticaceae. Grows in the mountains of Canada and Pennsylvania. Pounded dried inner bark. Decoction of dried bark. Tincture of fresh bark. **Historical close:** Tincture and all potencies.

CLINICAL - Boils. Burns. Chilblains. Constipation. Deafness. Hemorrhoids. Herpes. Inflammations. **Malnutrition.** Ophthalmia. Pain. Sore throats. Syphilis. Ulcers. Wounds.

HERBAL - Slippery elm is an herbal diuretic, emollient, and demulcent. A decoction of the viscous inner bark is used as a poultice for painful inflammations. It may be used as such in all cases of weakness, inflammation of the stomach, bronchitis, etc.

The coarse powder forms the finest poultice to be obtained for all inflamed surfaces, ulcers, wounds, burns, boils, skin diseases, purulent ophthalmia, chilblains etc. It soothes the part, disperses the inflammation, draws out impurities, and heals speedily. The finely powdered bark makes an excellent gruel or food, and in addition possesses as much nutrition as oatmeal.

COMMENTS - In a case in which the mucus membrane of the rectum was dry and extremely painful, Burnett relieved the sufferings with 20 drop doses of the tincture.

Cooper mentioned that the triturated bark gives much relief as a snuff in old vascular deafness with tubal obstruction. He could not speak too highly of this remedy, and are confident there is nothing to equal it in the world for its mentioned uses.

Inflammation in the bowels of infants and adults has been cured, when all other remedies have failed, by an injection into the bowels of an infusion of 1 oz of powdered bark to 1 pt of boiling water, used while warm. Slippery elm is also used in lozenges to relieve irritation of the pharynx.

The food or gruel should be made as follows: Take a teaspoonful of the powder, mix well with the same quantity of powdered sugar and add 1 pt of boiling water slowly, mixing as it is poured on. This may be flavored with cinnamon or nutmeg to suit the taste, and makes a very wholesome and sustaining food for infants.

REFERENCES - Clarke. Cooper. Murphy. Potter's Cyclopeda.

***UNCARIA TOMENTOSA

(Cat's Claw)

PHARMACY- uncar. Uncaria tomentosa. Cat's claw. Una de Gato. N. O. Rubiaceae. Tincture from the inner bark. **Historical dose:** Tincture and all potencies.

CLINICAL - AIDS. Arthritis. Asthma. Brain tumors. Cancer. Chronic fatigue syndrome. Circulation poor. Colitis. Crohn's disease. Exhaustion. Fibromyalgia. **Immune, weakness.** Prostate enlarged. Radiation poisoning. Ulcers. Virus effects. Weakness.

HERBAL - Uncaria tomentosa, or cat's claw, has been used by the Ashaninka Indians of the Peruvian Amazon. The inner bark and the root contain similar properties, but the inner bark is preferred over the root, because stripping the bark does not kill the plant.

It is reputed to **enhance immune functions**, increase energy and stamina. An ideal tonic for those who are mentally, emotionally and physically exhausted from overwork or excessive stress. Helps against viruses, radiation, chemical toxins and chemotherapy effects.

COMMENTS - Hank, age 53, suffered from partial urinary blockage due to an enlarged prostate for over two years. After drinking three cups of cat's claw tea daily, using one teaspoon full of the powdered herb per cup. He reported that his symptoms dramatically diminished after three days.

REFERENCES - Murphy.

***UPAS ANTIARIS

PHARMACY - upa-a. Upas antiaris. N. O. Loganiaceae. Resinous exudation of Antiaris toxicaria. **Historical dose:** All potencies.

HOMEOPATHIC - Merrell noted that Upa-a. is used in Java as an arrow poison. It is a deadly poison to the muscular system. It suspends both voluntary muscular action and that of the heart without causing convulsions. It produces **clonic spasms**, violent vomiting, diarrhea, great prostration.

REFERENCES - Boericke.

***UPAS TIEUTE

(Upas Tree)

PHARMACY - upa. Upas tieute. Upas tree. Strychnos tieute. N. O. Loganiaceae. Tincture of the inspissated juice obtained from the root and bark. **Historical dose:** The tincture and all potencies, third to higher potencies.

CLINICAL - Asphyxia. Backache. Conjunctivitis. **Eye, pains.** Hangnails. Headaches. Palpitations. Sexual excess. Styes. Tetanus. Vision, disorders.

HOMEOPATHIC - Upa. is obtained from a Strychnos and must not be confounded with Antiaris toxicaria, the concocted juice of which forms the "**Upas antiar**" poison of the Javanese. S. tieute is a climbing shrub. Pitet made a courageous proving of it, carrying it to the length of producing tetanic symptoms.

Upa. produces **tonic spasms, tetanus and asphyxia.** A large proportion of the symptoms occurred in the head and eyes. A remarkable headache, "superficial drawing pain traverses left temple from before backward and ceases at outer angle of orbit, the part is hot and painful to touch."

Pressure in the eyes, feeling of a foreign body under the eyelids. Severe pains in orbits inflammation of the conjunctiva of the lids. Distorted vision. "Every morning weakness of the eyes with lachrymation, the lids being so heavy that they close involuntarily as if from drowsiness."

Drowsiness. Pressive and lancinating pains. Pain in the left side of the throat as from a splinter on swallowing. Pain in left

Upas tieute sciatic nerve in left iliac fossa. Chiefly affects the left-side.

MIND - Irritable. Disinclined for mental work.

Back - **Dull backache**, as after excessive sex.

Causations - Sexual excess.

Chest - Sharp pain throughout right lung toward the liver, stopping breathing.

Eyes - Dull, sunken eyes. **Pain in eyes and orbits with conjunctivitis.** Styes.

Head - Dull headache deep in brain.

Heart - Violent palpitations, sensation of heaviness in stomach.

Limbs - Hangnails inflamed, itching and redness of nail roots. Numb hands, feet.

Male - Desire increased with loss of power.

Modalities - Better after rising. Better evenings, after dinner. Headache better in open air. Pain in left iliac fossa worse by touch. Throat worse pressure. Worse by motion, walking. Worse morning, afternoon and evening.

Mouth - Herpes on lips. Burning on the tongue. Pain in mouth, as from a splinter (Nit-ac.).

Sensations - As if the brain were rudely shaken. As if a foreign body in eye, as if sand in eyes. As if a splinter in throat on swallowing. As if a foreign body in esophagus preventing swallowing. As if an iron hoop around waist preventing breathing. As after sexual excess.

COMMENTS - Keynote sensitiveness. Irritability, crossness, moroseness increased sensitiveness to cold, the least irritation brought on spasms, pressing in throat causing feeling of suffocation.

Vertigo, ending in pressing headache. Twitching in brain and orbits. Pulsative headache with throbbing all over body. Great exhaustion after convulsive seizures. Itching in patella. Sexual function depressed. Distressing symptoms after sex, as occur after sexual excess.

Left half of face red and hot, right half pale and cold. The tongue is coated white so thickly that it can be scraped off. Aversion to meat and eggs, the very thought of them causes nausea. Smell of manure in nose. Sallow complexion. Severe symptoms in the liver and from the right lung to the liver (cutting as with knives).

RELATIONS - **Antidote:** Cur. **Compare:** (1) Upas-a., Ox-ac. (2) Upas when Bry. fails (typhoid).

REFERENCES - Boericke. Clarke.

***URANIUM MURIATICUM

(Uranium Chloride)

PHARMACY - uran-m. Uranium muriati- cum. Uranium chloride. **Historical dose:** All potencies.

CLINICAL - Diabetes. Glycosuria. Malassimilation. Pancreas, disorders.

HOMEOPATHIC - Tongue reddish at edges. Malassimilation. Dyspepsia. Prout noted it for diabetes mellitus and insipidus, especially when the diabetes originates in assimilating derangements.

Many cases of diabetes have been cured or much improved by either of these preparations, usually administered in the 1x or 2x trituration or dilution, several times a day for weeks.

REFERENCES - Raue.

***URANIUM NITRICUM

(Uranium Nitrate)

PHARMACY - uran-n. Uranium nitricum. Uranium nitrate. Uranyl nitrate. Solution in distilled water. Trituration.

Historical dose: All potencies.

CLINICAL - Albuminuria. Anal, itching. **Ascites.** Backache. Bedwetting, nocturnal. Bronchitis. Constipation.

Debility. Diabetes mellitus. Diabetes insipidus. Dropsy. Duodenum, ulcer. Dyspepsia. Edema. **Emaciation.** Enteritis. Gastric, ulcer. Glycosuria. Impotency. Insomnia. Malassimilation. Milk, secretion. Nephritis. Nephrotic, syndrome. Neuralgia. Ophthalmia. Peritonitis. Phosphaturia. Seminal discharges. Stomach, ulcers. Stomatitis. Styes. Ulcers. Urine, incontinence. Vertigo.

HOMEOPATHIC - Uran-n. belongs to the chromium group of elements. Uran-n. was proved by E. T. Blake, his monograph forms part of Hahnemann's *Materia Medica*.

Blake's proving was suggested by the observation of an old-school experimenter, Leconte, who found sugar in the urine of dogs slowly poisoned with Uran-n. Blake was not very successful in producing sugar, but his proving is not any less valuable on that account and clinical use has filled out the picture.

Uran-n. causes glycosuria and increased urine. Produces nephritis, diabetes mellitus and insipidus, degeneration of the liver, high blood pressure and dropsy. Its therapeutic keynote is **great emaciation, debility and tendency to ascites and general dropsy**. Excessive thirst, nausea, vomiting, excessive appetite. Dry mucus membranes and skin.

High blood pressure. Burning in the stomach, gastric ulcer. Incontinence of urine. Burning in urethra while passing urine. Impotency with nightly emissions. Backache and delayed menses. Menses suppressed during diabetes. The left side was more affected than the right.

MIND - Ill-humor, not feeling well all day. Depression.

Abdomen -Abdomen bloated. Borborygmi.

Flatus. Sharp colic with tenesmus and raw feeling in rectum. **Enteritis and peritonitis with meteorism and great prostration.**

Back - Pain at lower angle of left scapula, worse deep inspiration. Tenderness of spine near and extending to kidneys.

Breasts - Excessive secretion of milk.

Chest - Intermittent pain, radiating from left side to ensiform cartilage, worse fasting.

Cough - Cough with purulent discharge from left nostril. Cough with loss of appetite and great prostration.

Eyes - Styes in left upper lid. Edema of lower lids, worse than usual. Lids inflamed, agglutinated. Shooting from right orbit to occipital protuberance in evening. Pain over left eye.

Female - Pale, anemic. Menses suppressed during diabetes. Flushing of upper body during menses, with giddiness and faintness. Excessive flow of milk.

Food - Malassimilation. Ravenous appetite. Eating followed by flatulence. Excessive thirst with intermittent vomiting or with emaciation (diabetes). **Loss of appetite during menses.** Craves raw ham, tea, sweets. Intense thirst from sensation of dryness in mouth and fauces. Excessive thirst at night.

Head - Head heavy on waking. Heaviness of head with general languor. Dull, heavy pain. Heavy, burning, in right side of vertex. Shooting from right orbit extending to occipital protuberance, in evening. Frontal headache. Dull aching in right temple. Pain in forehead, over left eye. Pain in left temple, with feeling as if he had taken cold. Severe pain, at posterior edge of right and left temporal bones. Aching at occipital protuberance. Fullness of head. Sensation of blood flowing to head, before eating. Neuralgia on posterior edge of left temporal bone.

Kidneys - Contracted, gouty kidneys, with gastric disturbances. Sore pain in bladder region in evening. Acute nephritis. Diabetes insipidus and mellitus. Incontinence of urine at night. **Nocturnal bedwetting.** Burning in urethra, with very acid urine. **Sugar in the urine.** Copious urination in cold weather. Diuresis. Unable to retain urine without pain. Urine often excoriating. Urine greenish and smelling fishy. Urine pale, milky, with ammoniacal odour. Profuse, painful urination.

Limbs - Stiffness in loins. White vesicles on arms and legs with red areolae, burn and itch.

Lungs - Bronchitis with copious mucus expectoration and much emaciation. Chronic colds. Hydrothorax and congestion of lungs. Lung infiltrated with gray tubercle.

Male - Complete impotence with nocturnal emissions. Organs cold, relaxed, sweaty.

Modalities - Better from deep breathing. Worse at night. Headache worse walking.

Mouth - Painless ulcer with one elevated side in mouth, opposite left anterior upper molar, worse evening. Acid saliva. Ulcers in mouth, with copious salivation.

Nose - Itching in nose. Left nostril stuffed. Dry coryza. Nostrils sore with purulent acrid discharge. Chronic scabbing of inner nostril.

Rectum - Borborygmi. Constipation. Urging in rectum and bladder. Soft stool, twice in one day. Anal itching.

Sensations - As if blood were flowing to head. As if he had taken cold with headache.

Skin - White vesicles on hands and legs, with red areola. Burning and itching. Ecchymosis. Epithelioma. Lupus exedens.

Sleep - Restless, with shivering and heat. Extreme languor, on rising from bed. Feeling as if he had taken cold. Great drowsiness and prostration during menses. Restless at night during menses. Sleeplessness.

Stomach - Constant faintness at stomach, even after a hearty meal. Indigestion in afternoon. Dyspepsia, flatus after food, acidity, pain. Tasteless, putrid belchings. **Sinking at pit**, with acid eructations, flatulence and copious urination. **Boring pain in pyloric region**. Burning pain. Gastric and duodenal ulcers. Recurring hematemesis. Nausea and **vomiting**.

Temperature - Shivering, alternating with heat, at night, with great restlessness. Shivering during day.

Throat - Hawking of tenacious mucus. Contracted feeling in throat.

Vertigo - Vertigo, faint, flushing of upper part of body during menses. Vertigo, worse in evening. Vertigo with heaviness of head. Vertigo with debility and cold feeling.

COMMENTS - Many cases of diabetes have been relieved or cured by Uran-n., usually in the lower potencies. Diabetes with excessive thirst, polyuria and dry tongue. Glycosurias by no means an essential part of the indications for Uran-n.

Diabetes concomitant with indigestion, belching, burping, and heartburn. Urine with bile and sugar in it, can smell fishy. Kidney disease with protein in the urine, nephrotic syndrome. Stomach ulcers. Very weak (Ph-ac.), debilitated, tendencies toward dizziness.

One case, involving a married woman, was cured with 5 grain doses of Uran-n. 2x.

She was weak and emaciated, vomited mucus mixed with blood and coffee-ground matter and passed dark, tarry stools, sensitive and tender over region of pylorus.

Dr. Choudhury noted a case of diabetes in a middle-aged man. The patient had progressive weight loss, weakness, and great weariness in the legs with edema. His tongue was coated white, severely dry mouth. Pale, looked haggard with dark circles. Neither Chin, or Phos-ac. helped. Uran-n 30c cured. The patient needed no insulin after treatment.

RELATIONS - Compare: (1) Elemental relatives, gastro-duodenal affections, Chrom. and Kali-bi. (2) Diabetes, Phos., Ph-ac., Syzyg., Thyr., Lac-def., Lac-ac. (3) Sinking immediately after meals, Ars., Cina, Lyc., Sil., Staph. (4) Craves tea, Sei.

***UREA PURA

(Carbamide)

PHARMACY - urea. Urea pura. Carbamide. Urea nitrica. The chief solid constituent of the urine of mammals. White crystals. Trituration. Also tincture or solution of the nitrate, Urea nitrica. **Historical dose:** Tincture and all potencies.

CLINICAL - Albuminuria. Cirrhosis. Coma. Convulsions. Diabetes. Dropsy. Eczema, gouty. Gout. Kidney stones. Liver, cirrhosis. Pleurisy. **Skin, disorders.** Tuberculosis. Uremia.

HOMEOPATHIC - On general indications, Urea, has been used in medicine by **both** schools. Merck mentioned that it is diuretic and is used in cirrhosis of liver, pleurisy, kidney calculus.

The failure of the kidneys to eliminate urea from the blood leads to uremic intoxication, delirium, convulsions and coma. Tuberculosis. Lumps. Enlarged glands. Kidney dropsy with symptoms of general intoxication. Albuminuria, diabetes, uremia. Urine thin and of low specific gravity. Constant urging, much sediment in urine. Intolerable sensa-

tion in abdomen, with burning skin.

Gouty eczema. General uneasiness, felt ill, poisoned.

Urea acted as a nervous tonic in tuberculosis patients. Urea is a hydrogogue diuretic in the treatment of dropsies. 10 grains every 6 hours.

Abdomen - In right hypochondrium, a steady, dull sensation. Intolerable sensation in abdomen and burning of the skin.

Eyes - Itching and profuse watering of eyes.

Head - Head very dull, as if filled with a very heavy lump.

Kidneys - Constant urging to urinate, beginning at root of penis. Profuse diuresis with rapid diminution of dropsy. Albuminuria, bloody urine, general dropsy.

COMMENTS - Burnett used both Urea 6c and Ur-ac. 6c in gouty eczema, "where the gouty eczema has been the cutaneous outlet for the constitution."

Burnett gave Urea in gouty cases where the urine was thin and of low specific gravity, "it thickens the urine and gives great relief to the patient."

Allen cited from Mauthner two cases of kidney dropsy with symptoms of general intoxication in which Urea, 2 grains., divided into three doses and given two hours apart, cured brilliantly.

Arthur Buch related cases of tuberculosis cured, on the plan originated by Harper of Nottingham, with Urea in 20 to 30 grain doses three times a day. Under the treatment, lupoid nodules disappeared, tuberculous glands

disappeared, tuberculous joints *improved*. No ill-effects of the treatment were noticed, "on the contrary, the action has evidently been in many cases that of a nervous tonic."

Villers examined the urine of an intensely neurasthenic woman, suffering from severe asthma and found 4.5 percent of urea instead of the usual 2.5. In order to find out the effect of Urea, on the healthy, he took for five days Urea. 15x., five drops thrice daily.

He was then compelled to stop by the severity of the symptoms. He gave the same dose to a patient, a woman. She begged after a short time to be allowed to discontinue the medicine, as it affected her so painfully, causing constant urging to urinate, much sediment in the urine intolerable sensation in abdomen and burning of the skin.

RELATIONS - Compare: (1) Ur-ac. - gout, gouty eczema, rheumatism, lipoma. (2) Urt-u., Tub., Thyr. (3) Urin., Ur-ac., Thiosin., Urt-u. (4) Diuresis, Thyr. (5) Tuberculosis, Tub., Bac.

REFERENCES - Allen. Boericke. Clarke.

***URICUM ACIDUM

(Uric Acid)

PHARMACY - ur-ac. Uricum acidum. Uric acid. Lithic acid. Trituration. **Historical dose:** All potencies.

CLINICAL - Eczema. Gout. Lipoma. Rheumatism. Sebaceous cysts. Tumors. Wens.

HOMEOPATHIC - Ur-ac. has been used on inferential grounds in gouty conditions. Burnett gave it in the 5th and 6th potencies. It is most useful in cases where deposits persist, it stirs them up and helps to eliminate them.

Gouty eczema where the eczema has been the skin outlet for the constitution. Gout. Lipoma. Rheumatism. Headaches with pain as if the head will burst, worse when talking.

COMMENTS - Merschcuredacaseof lipoma situated on the left side between abdomen and breast, "as large as a man's head, only lengthened." Relief was almost immediate, the tumor disappeared in a month.

RELATIONS - Compare: (1) Urea., Urin., Urin-f., Urt-u.

REFERENCES - Clarke.

***URINUM FERMENTA

(Fermented Human Urine)

PHARMACY - urin-f. Urinum fermenta. Fermented human urine. Old human urine is fermented naturally in a glass jar for a few years, then made into potencies. **Historical dose:** Tincture and all potencies.

CLINICAL - Acne. Bites. **Blood, disorders.** Boils. **Burns.** Cancer. Dropsy. Dysentery. Eczema. Fungus. Gout. Hair, loss. **Infections.** Plague. Psoriasis. Rashes. Ringworm. **Skin, disorders.** Scars. Scurvy. Snakebites. Tuberculosis. Ulcers. Uremia. Varicose, ulcers. Warts. **Wounds.**

HOMEOPATHIC - Old urine has a higher ammonia content that is more effective on skin disorders as eczema and psoriasis. To store urine for later use, one should pour it into a glass bottle and close it tightly. Keep the bottle in a cool, dark place for long periods of time.

Side effects can include headache, **diarrhea**, itching and rashes, pain, fatigue, soreness of the shoulder, and fever. An increase in symptoms of the specific illness may also occur.

COMMENTS - S. Mills Folwer mentioned the use of urine as a remedy for scurvy in the Civil War. In Andersonville prison the starving prisoners were dying by hundreds of scurvy and Mr. T. (who told the story) was one of the sufferers.

His legs were flexed upon the thighs and the thighs upon the body in such violent contraction that it was impossible to extend them an inch and any attempt to do so was attended with shocks of pain as from an electric battery. He could only move on his elbows and rump.

Within the stockade were growing two large turpentine trees. Of the pitch from these trees the patients would take enough to make their urine "clear and white as crystal." The urine voided was allowed to stand until it began to sour, which took twelve to twenty-four hours.

The patients then took a "good swallow" four or five times a day. They felt the good effect of every dose. The treatment cured Mr. T. and all his companions in misfortune who adopted it.

RELATIONS - Compare: Urea., Urin., Urac.

REFERENCES - Murphy.

***URINUM HUMANUM

(Human Urine)

PHARMACY -urin. Urinum humanum. Human urine. Dilutions. **Historical dose:** Tincture and all potencies.

CLINICAL - Acne. AIDS. Albuminuria. Anemia. Ascites. Baldness. **Blood, disorders.** Boils. **Burns.** Cancer.

Chronic fatigue. Cirrhosis. Diabetes. Dropsy. Dysentery. Eczema. Fungus. Gout. Hair, **loss.Hepatitis**. Immune, weakness. **Infections**. Infertility. Leprosy. Liver, disorders. Multiple sclerosis. Ophthalmia. Plague. Premenstrual syndrome. Psoriasis. Ringworm. **Skin, disorders**. Scars. Scurvy. Tuberculosis. Uremia. **Wounds**.

HOMEOPATHIC - Urine is one of the most ancient remedies and can be used topically, internally and in homeopathic potencies. An important component of urine is urea, a commonly recognized antibacterial, antifungal, and antiviral agent.

The Chinese treated wounds by sprinkling urine on them and the custom is widespread in the Far East. It is a major therapy in Ayurvedic medicine and was commonly used in ancient India.

It is a custom in Yorkshire to wipe the baby 's tongue with its own napkin in cases of thrush. For pimples and blotches the natives of Barbados drink their urine and apply it locally. Soldiers in Germany would urinate in their boots so they wouldn't get sores and blisters on their feet from long hikes. In Switzerland, for cases of ophthalmia in children, it is the custom to bathe the eyes in the children's own urine.

Taken internally urine is believed to stimulate the circulation and is valued as an active oxytocic. Anasarca, generally more marked in upper than in lower parts of body. Heaviness, heavy for work, having neither his usual life nor warmth in him. Loses her breath if she walks quickly, is obliged to stop.

Used for multiple sclerosis, colitis, lupus, rheumatoid arthritis. Cancer, hepatitis, pancreatic insufficiency, psoriasis, eczema. Diabetes, herpes, mononucleosis, adrenal

Urinum humanum failure. Allergies. Premenstrual syndrome, easy labor, mastitis. Cancer.

Abdomen - Ascites. Fluid in abdomen and in parietes of chest and belly.

Face - The face is very much swollen. Countenance pale, expression heavy and vague.

Head - Heaviness of head, worse on stooping.

Kidneys - Urine scanty, thick, deep brown and very offensive.

Rectum - Diarrhea.

Skin - Acne. Boils. Burns and skin rashes. Eczema. Scar tissues. Psoriasis. Wounds.

Stomach - Little thirst.

COMMENTS - In the Brit. Med. Jour, of 1900 a number of instances of Western urine therapy were given. Cooper made some additions to these.

Cooper had a case of a youth with crops of boils which nothing could remedy. He was recommended to drink a cupful of his own urine every morning for three mornings. Then after an intermission of three days to resume and so on until cured. He was cured on the ninth day.

Cooper mentioned the case of a man who suffered very much from weak and inflamed eyes until he began to bathe his eyes in his own urine, which after a time cured him. A case of blackheads was cured in exactly the same way. This patient drank the urine when fresh.

A case of chronic bronchitis was much relieved. This patient was deaf and misunderstood the doctor's direction to bring some of his urine. He thought the doctor said "drink," and acted accordingly. Urine also cured ague and urticaria.

Allen under Urea, gave some symptoms observed on a man who, for a skin affection, drank the morning the urine he had passed the night before. The symptoms were severe, consisting of general dropsy, scanty urine and excessive weakness.

Cooper also mentioned that a celebrated breeder of cattle and horses succeeded in getting his animals' skin into an astonishing condition of fineness by giving them about a tablespoonful of old human urine with every meal. Kraft mentioned that urine has been used as a remedy for croup.

These cures are to some extent analogous with nosode cures, as the patients drank their own urine, but Urin., Urea., and Ur-ac. are also medicines on their own account and rank with the sarcodes. The symptoms of uremia may be taken as a pathogenesis of Urin. for the use of the potencies.

Urea cured kidney dropsy and Urin. produced it. The skin action of Urin. is remarkable in connection with its use in the dressing of leather, no substitute having been found for it in this.

RELATIONS - Compare: (1) Urea. - probably urine owes its chief effect to urea. (2) Ur-ac., Urt-u.

REFERENCES - Clarke. Murphy.

***UROLOPHUS HALLERI

(Round Sting Ray)

PHARMACY - uro-h. Urolophus halleri. Round sting ray. N. O. Urolophidae. **Historical dose:** All potencies.

CLINICAL - Acne. Backache. Catarrh. Chilly. Cramping, pain. Cough. Delusion. Diarrhea. **Fainting**. Fibromyalgia. Flatulence. Hay fever. Herpes. Hot flushes. Itching. Nausea. Nightmares. Nosebleed. Osteomyelitis. Palpitations. Tinnitus. Trembling. Vertigo.

HOMEOPATHIC - Sting ray venom is a protein which is water soluble. Low concentrations cause heart changes associated with bradycardia, mild hypotension and vasoconstriction. Some degree of respiratory depression is noted and convulsions may also occur.

The pain is immediate and severe. Pain is constant, pulsating or lancinating. The area is quite swollen and pale with a bluish rim, spreading around the wound. Local necrosis, ulceration and secondary infection are common. Bleeding may be profuse.

Symptoms may persist for weeks to months after an injury including a dull ache and swelling which is better on elevation. Osteomyelitis can occur and amputation has been known to be necessary.

The venom is associated with anorexia, nausea, vomiting, diarrhea, frequent urination and salivation. Muscular cramps, tremors, paralysis of the affected limb. Fainting, palpitations, hypotension. Heart rate irregularities. Difficulty breathing, cough, pain on inspiration. Fever at night with copious sweating. Nervousness, confusion or delirium are also known to occur.

Similar to Sep. Chilly, but can't stand stuffy rooms, gets faint in a stuffy room. Very sensitive to weather changes. Needs a lot of sleep. Apt to get headaches. Worse in morning, better in evening. Worse from light or jar. Worse tobacco smoking. Less sensitive than Sep.

Low backache (Sep.), better moving about, does not come back once he moves about. Likes a cushion in the back. Menopausal hot flushes. Palpitations, felt as if heart is pushing out. Fibromyalgia. Hay fever. Chronic nightmares. Dreams of being chased by spirits, of being lost in a house. Tired, self pitying patients.

MIND - Difficult concentration. Dullness of mind, worse mornings. Confusion on waking. Forgetful. Memory weakness, for proper names. Indifference. Want of confidence. Sadness on waking. Indolence. Aversion to company. Disagreeable thoughts. Censorious.

Anxiety, paroxysms. Attacks of anxiety. Fear of animals, snakes. Fear that something bad will happen. Restlessness. Hurried, impatient. Irritability. Shrieking during sleep. Suspiciousness. Talks to himself. Daydreaming. Clairvoyance. Delusion floating in air. Delusion being persecuted. As if in a dream.

Abdomen - Distension, evening. Noises, rumbling. Cramping pain. Flatulence.

Back - Back pain, extending into lower limbs, lying ameliorates. Backache, worse before menses. Aching pains in dorsal region. Lumbar pains.

Breasts - Pain in breasts, worse motion.

Cough - Night aggravates cough. Morning cough. Violent barking, dry cough. Hoarse cough.

Ears - Pain in right ear. Stopped sensation. General noises, synchronous with pulse. Tinnitus. Ringing noises.

Eyes - Discoloration, redness, morning. Itching. Pain, burning, lids.

Face - Eruptions forehead. Acne. Herpes on lips.

Female - Profuse menses. Menopausal hot flushes. Sexual desire decreased or increased.

Food - Appetite diminished. Extreme thirst. Thirst at night. Desires fruit, vegetables, meat, sweets, cinnamon. Aversion to meat.

Head - Fullness. Head pain, in the morning, on waking, in the afternoon, evening, at night. Headache, worse in the afternoon, at night. Dull pain in the forehead. Pulsating pains.

Heart - Palpitations.

Limbs - Eruptions on the hands. Itching of hand, ankles. Cutting pain in foot. Soreness of foot. Swelling of ankles, foot. Tension in shoulders. Twitching, upper arm. Trembling, worse mornings.

Male - Sexual desire increased.

Modalities - Better in evening. Worse change of weather, stuffy room. Worse periodically. **Worse in morning**, after midnight, at 3 a.m., at 9 a.m. Worse afternoons. Worse from light, noise or jar. Worse tobacco smoking.

Mouth - Aphthae.

Nose - Catarrh. Sneezing in the morning. Nosebleed, worse in the morning.

Perspiration - Night sweats. Profuse sweats.

Rectum - Diarrhea, in the morning. Painless diarrhea. Flatus after dinner, during diarrhea.

Sensation - Bubbling sensation. Lassitude tendency. Weariness, worse mornings.

Sleep - Restless sleep. Sleeplessness from worries (Ambr.). Waking too early. Waking after midnight, 2 a.m. to 4 a.m. Amorous dream. Chronic nightmares. Dreams of animals, of water. Dreams of being chased by spirits, of being lost in a house, of murder

Stomach - Stomach cramps. Noises, rumbling. Pulsation. As if something alive in stomach. Nausea during cough.

Temperature - Chilly, lack of vital heat. Sensation of heat. Menopausal hot flushes.

Throat - Pain, in the morning, on the right, better warm drinks. Sore or sharp pains. Scratching in throat. Sensation of swelling. Choking, constriction in throat. Lump sensation, worse on swallowing. Swelling of cervical glands.

Urine - Strong odor.

Vertigo - Dizziness. Faintness tendency, worse in the morning. Vertigo on rising, on turning or moving the head.

Vision - Blurred vision.

COMMENTS - Margery Blackie wrote about using Sting Ray in her book Classical Homeopathy. She described patients who needed Sting Ray as "sallow, usually dark who have rather heavy rings around their eyes. They look tired, are chilly yet at the same time cannot stand a stuffy room. They are sensitive to all weather changes, but as a rule can stand real heat. They tell you of their need to sleep, how many hours they need, how they must have it or else they are no good at all.

"They get a slight headache as with Medusa, and like a Sepia headache, but even duller. It usually starts in the morning, strangely enough is usually better in the evening, and is made worse by noise or jarring, rather like Sepia although to a much lesser degree.

"In women, you think the patient must be Sepia. They come in looking pale and drugged and very tired, with rather dark rings. You think they are going to be Sepia, but their chief complaint is of lower backache and gradually they tell you (and Sepia of course also tells you) that it always improves if they walk about. A Sepia backache goes away if the patient walks about. The only difference is that with Sting Ray it does not come back, but in Sepia it always comes back when they sit.

"This type of patient also gets quite a lot of palpitations, the men as well as the women. If the men have a tendency to faint, they think their palpitations has something to do with it.

"The woman gets palpitations quite a lot but forgets it again if she is walking. The history is typically that if she gets bad palpitations, and has to go out because she has a very busy morning, by the time she comes back from shopping it is gone, which surprises her very much but which is a good symptom.

"They are rather tired-out patients, but in no way so despairing or such martyrs as Sepia. Sepia can be real martyrs if they go on getting tired out and have a lot to worry them, especially if they have to look after various members of the family and will not accept any help that is offered to them. Sting Ray patients are much less like this, but they do get rather hopeless.

"One of these patients, the best case I had seen, was a dark, tall, rather tired looking man who used to faint if he had to stand for long. He found it humiliating when he had fainted at two cocktail parties where he had to stand for a long time. He asked if I would give him something to stop him doing that. He had a headache and said that when it came, it lasted more or less all day. but was always better in the evening. These patients also tend to be a bit sensitive to tobacco smoke and I think that this is why he had fainted.

"In one year, just after using Sting Ray the first time, I had two soldiers who fainted continually, especially if they had to stand for an injection. Both of them had fainted half a dozen times each within the last so many weeks. They had had a lot of injections and had had to stand for rather long.

"One of them had taken part in the Queen's birthday parade and had fainted. He had been held up between two other soldiers who had held him on his feet until he came round again, but he felt frightful. Both these men did well on Sting Ray and neither of them ever fainted again."

RELATIONS - Compare: Sep., Lach., Medus., Murx.

REFERENCES - Blackie.

***URTICA URENS

(Stinging Nettle)

PHARMACY - urt-u. *Urtica urens*. Stinging nettle. *Urtica dioica*. The Common Nettle has similar if not identical properties. N. O. Urticaceae. Tincture of the fresh plant in flower. **Historical dose:** Tincture and all potencies, tincture and lower potencies.

CLINICAL - Agalactia. Ague. **Allergic, reactions.** Anemia. Arthritis. Bee, stings. Breastfeeding, disorders. **Burns.** Deltoid, rheumatism. Diarrhea. Dysentery. Edema. Erysipelas. Erythema. **Gout.** Gravel. Hemorrhages. Hemoptysis. **Hives.** Intermittents. Itching. Leucorrhea. Malaria. Menorrhagia. Phlegmasia dolens. **Kidney, colic. Kidney, stones. Neuritis.** Rheumatism. Shellfish, allergy. Spleen, disorders. Throat, sore. Uremia. Uric acid, diathesis. **Urticaria,** nodosa. Vertigo. Whooping cough. Worms.

HERBAL - In Sweden, nettles are regarded as a remedy for anemia. Fresh nettles are cooked and eaten like spinach for the purpose, or a nettle-tea is prepared from dry nettles. The juice of nettles with sugar is popular for hemorrhages of all kinds. Used in gravel and urinary disorders.

Gerarde noted several other uses, including how nettle juice inserted into the nostrils stops nosebleed. He added that it is "good against inflammation of the uvula." Useful in pleurisy, pneumonia, and whooping cough. "Being eaten," as Dioscorides said, "boiled with periwinkles, it make the body soluble, doing it by a kind of cleansing faculty, it also provoke urine and expels stones out of the kidneys, being boiled with barley cream it

is thought to bring up tough humors that stick in the chest.”

Gerarde noted that “The leaves or seeds of any kind of nettle do work the like effect, but not with that good speed and so assured as the Roman nettle [U. Pilulifera].” Cooper reported that “A bundle of nettles applied to a rheumatic joint or part, has long been a favorite country remedy.

A leaf of the nettle placed on the tongue and pressed to the roof of the mouth stops bleeding from the nose.”

Gerarde mentioned its antidotal action for snakebites. It’s also useful for bee stings. An application of the tincture, even on the most sensitive parts of the face or eyelid, gives instant relief. In cases of stings about the eyes, the application may have to be repeated every five minutes and a compress must be kept on all night.

HOMEOPATHIC - Commonly known as stinging nettle, Urt-u. produces stinging or stinging, burning pains.

First degree burns, used locally and given internally. **Bee stings** (Apis). Urticaria, associated or alternating with rheumatism. **Antidotes ill effects of eating shellfish.**

Rheumatic and gouty pains and fever were all evoked. **Gout and rheumatism** associated with **urticaria-like eruptions**. Among the rheumatic pains a pain in the **right deltoid muscle** is very striking. **Neuritis**. The right side very much affected, but also the left hypochondrium (spleen).

Uric acid diathesis. Bedwetting and urticaria. **Kidney stones**. Gout and uric acid diathesis. Spleen disorders. Urine-like odor of the body. Favors elimination.

Dysentery. Burning and itching of anus. Hemorrhages. Angio-neurotic edema. Profuse discharge from mucus surfaces. Very periodic. Ague. Headache with spleen pain, rush of blood to head, sore abdomen.

Affects the **breast glands**, genitourinary organs, liver and spleen. Increases milk flow. In the case given in Allen, it caused swelling of the breasts and profuse flow of milk in a woman years after the birth of her last child.

Abdomen - Chronic disease of large intestine characterized by large secretion of mucus. Sore abdomen, when lying. Burnett noted it for liver tumors.

Breasts - Swelling of the breast with stinging, burning pains. **Diminished secretion of milk** after childbirth. Arrests the flow of milk after weaning.

Causations - Ill effects of burns, beestings, eating shellfish, suppressed milk, urticaria.

Chest - Sore feeling as from a blow to left side of chest. Intermittent soreness in right chest during day. Hemoptysis from least exertion of lungs.

Constitutions - Gouty constitutions. Uric acid diathesis.

Eyes - Eyes feel weak and sore. Pain in eyeballs as from a blow. Feeling as if sand were in eyes.

Female - Uterine hemorrhage. Acid and excoriating leucorrhea. **Pruritus vulvae with stinging**, itching and edema.

Head - Headaches, worse over eyes. Headache with stitches in spleen. Dull aching in occiput and over eyes. Stinging pain in right parietal bone. Urticaria of scalp suddenly appearing.

Kidneys - Hemorrhage from bladder. Urine suppressed. Strangury, gravel, disease of bladder and kidneys. Uric acid toxemia. Acrid urine causing itching.

Limbs - Rheumatic pain in arms and ankles, worse right arm. Continuous pain in deltoid. worse rotating arm inwards, difficulty dressing. **Acute and chronic gout**. Gout pain in ankles, wrists. Raised, red, itching blisters on skin of hands and fingers. Stiff soreness on inside of left knee.

Lungs - Hemoptysis after violent exertion. Whooping cough. Scanty expectoration, frothy.

Male - Itching and stinging of scrotum, keeps him awake. Swollen scrotum.

Modalities - Better from lying down. Worse water, cool bathing. Worse cool, moist air, snow-air. Worse by touch, lying on arm. Worse yearly. Hemoptysis worse from violent exertion. Burning in skin is worse after sleep.

Rectum - Diarrhea. Frequent urging. Small, painful stool. Stool scanty, a greenish- brown slime, with urging and tenesmus. Mucus mixed with white matter like boiled white of eggs. Ascarides with great rectal irritation. Intense itching of anus from pinworms. Hemorrhoids with raw burning in anus during and after stool.

Sensations - Burning, stinging, itching and soreness are the principal pains. As from a blow in the eyeballs. As of sand in eyes. Muscles of right arm as if bruised.

Skin - Burns and scalds. Sunburn with intense burning, itching. Vesicles. Burn confined to skin. **Hives** with rheumatism, after shellfish, with pinworms. **Itching, raised, red blotches**. Nettle rash, worse every year in the same season, suppressed nettle rash. Rheumatism alternates with nettle-rash. **Chickenpox** (Dulc.). Urticaria nodosa (Bov.). **Urticaria**, burning heat with formication, violent itching. Erythema with burning and stinging. Prickly heat. Angio-neurotic edema. Herpes la- bialis with sensation of heat and itching.

Sleep - Drowsiness when reading.

Stomach - Nausea with burning in throat.

Vomiting from suppression of nettle rash.

Temperature - General heat in bed with soreness over abdomen. Fever of gout. Tropical fever. Sweatiness,

at night with vertigo, with throbbing all over the body.

Throat - Burning in throat. Frequent hawking of frothy mucus causing cough, expectoration scanty, frothy.

Vertigo - Headache with spleen pains.

COMMENTS - Severe allergic reactions (Apis., worse heat), particularly food allergies (Lyc., Bry.). Urticaria, weals, welts, and hives (Apis., Puls., Nat-m., Sulph.). Allergic reactions to bites or stings (Apis., Led., Hyper.). Dermographia, red and itchy skin, easily marked. Bright red shiny rashes that itch and sting. Vesicles (Canth.). Burns (Canth.). Old burns that refuse to heal. Shiny sunburns with a stinging, burning pain (Calen.). Palliative for herpes, canker sores. Fever blisters with stinging (Nat-m., Rhus-t.). Burning and itching of the anus and vulva. Allergic vaginitis, vaginal lips are swollen, red and inflamed, especially if due to some dietary reaction. Regulates milk production.

For reactions to the fresh stinging nettle plant. Intermittent fevers, malaria (Ars., Nat-m., Chin.). Enlarged spleen, painful, often associated with viral infections (Nairn., Cean.). Gout, used in tincture. Arthritis or gout, in packs on the joints.

A woman who had no children for three and a half years and had nursed none of her children took a pint of hot infusion of the herb. Her breasts swelled, then discharged serum, followed by copious milk.

Burnett may be said to have rediscovered Urt-u. as a remedy. The history of how he came to use it is one of the most fascinating passages of his works. Burnett's tincture is made of the small nettle, Urt-u., which is the variety used in homeopathy.

Burnett noted that the nettle springs up everywhere near human habitations. He noticed it flourishing more by the side of ditches that carry off fluid sewage, thus possibly living to some extent on uric acid.

Burnett's discovery of its fever action occurred when a female patient was cured of ague (which he had not succeeded in helping) by drinking nettle-tea on the advice of her herbalist. Urt-u. was useful to him in cases of the fevers of the East India, Burma and Siam. It also has a marked anti-gout action.

Urt-u. causes fever as well as cures it, and one of Burnett's patients was obliged to stop taking it: "It sets all my pulses beating, makes me terribly giddy, makes me feel as if I was going to topple (forwards) on my head and then a bad headache comes on and when I take it at night, it makes me very feverish." When she took the dose in the morning she did not have the fever, and Burnett said, "The fever of gout generally comes on at night."

With Urt-u., Burnett cured severe cases of uremia, vertigo. Burnett used Urt-u. a good deal in spleen disorders and found patients under its use often passed large quantities of gravel.

Burnett gave Urt-u. to a middle-aged, unmarried woman who had enlarged spleen and "who smelled so strongly of nettles that it almost nauseated me whenever it was my duty to examine her."

While taking it, she passed large quantities of gravel, but this did not attract much notice, as the woman was in the habit of passing considerable quantities of gravel with her motions. She had localized abdominal pain preceding such an occasion by a number of days. The painful spot, just under her spleen, she called her "gravel-pit." Putting this and other points together, including the fever action of Urt-u., Burnett concluded that Urt-u. was a remedy for acute gout, which would cut short the attack "in a safe manner, namely, by ridding the economy of the essence of the disease product, its actual suffering producing material."

He usually ordered five drops of the tincture in a wineglass full of warm water every two or three hours. Under its action the urine became more plentiful, dark and loaded with uric acid.

J. L. Nottingham noted two cases cured with Urt-r. The first concerned Mrs. W., 38, tall, slender, with auburn hair, who had eczema vulvae with violent itching and burning. She had swelling and thickening of her labia. Smooth, pale, dry appearance of the mucus surface. A dry, scaly, fissured appearance of labia majora and skin.

Thirteen years before, she had a sinus from the right ovary emptying into the uterus. The husband had sycotic warts on the glans penis. Urt-u. lx relieved all the symptoms and removed sexual excitement induced by the itching and uncontrollable desire to rub.

The second case concerned Mr. N., 21, who had swelling, stinging, and burning of his face, hands and feet with redness. Rubbing with a fingertip would leave a white line for some time.

When out in the cold, damp, snowy air, his hands, feet and face became purple-red, puffed and stinging cold. Going into a warm room he had increased swelling, stinging, itching all over him, especially of hands and face. Urt-u. relieved in twenty-four hours. In four days he returned home better than he had been for years.

RELATIONS - Antidoted by: Dock leaves (Rumex obtus.) rubbed on the stung part lessen the pain, also the nettle's own juice and the juice from the common snail. **Antidote to:** Apis (bee-stings). Antidotal to hemlock, mushrooms, quicksilver, henbane, serpents, and scorpions. **Compare:** (1) Apis, Medus., Nat-m., Lac-c. (2) Ric. - diminished breast secretion. (3) Bomb-pr., Rhus-t., Chlol., Astac. (4) Puls. - urticaria. (5) Bol-lu. and Anae.

- urticaria tuberosa. (6) Lyc. and
Hedeo. - uric acid conditions. Form.

***USNEA BARBATA

(Tree Moss)

PHARMACY- usn. Usneabarbata. Tree moss. Old Man's Beard. Tree-hair. N. O. Lichenes. Tincture. The fresh lichen is macerated in five times its weight of alcohol. **Historical dose:** Tincture and all potencies.

CLINICAL - Cystitis. Headaches, congestive.

HOMEOPATHIC - Usn. is for some forms of congestive headache, sunstroke. Keynote bursting feeling, **as if temples would burst or the eyes burst out of the sockets**. Throbbing carotids. Head began to ache, soon could feel the blood press into the brain with domestic attentions he got to sleep and woke next morning uncommonly well. Pain over entire head or front head with feeling as if temples would burst or eyes burst out of sockets.

COMMENTS - Anshutz wrote, "This article appeared in No. 284 of the U. S. Medical Investigator signed 'M.D.' In March 1878, I was cutting wood. I cut down a soft maple, the top was well loaded with moss. It attracted my attention, I viewed it closely.

"I ate a little, about the size of a hickory nut, as trimmed up my tree. My head began to ache. I cut off one log and had to go to the house. I could feel the blood press to the brain. My wife worked over me and I got to sleep.

"Next morning felt well, never felt better. I did not think of the moss I had eaten. I went on a visit and was gone five days. On my return I went to my tree. The first sight of it reminded me of my headache. I gathered some of the moss and made a tincture. I soon had a case of headache to try my remedy on, it stopped at once.

"In the fall, about September, a load of young folks came to pick cranberries. Two of the young ladies had headache from riding in the hot sun. Both took the lounge. Now for my remedy. I put one drop of tincture in a goblet of water, gave a teaspoonful ordered another in fifteen minutes. The second dose stopped the pain.

"A young married lady came on a visit to a relative - was having pains in her head. I was sent for, found her wild with pain. She said she had been subject to headache for five years, had got tired of doctoring. Gave her one drop in a cup of water, teaspoonful in twenty minutes, no more pain.

"I put ten drops in a two-drachm vial of alcohol, directed her to take one drop when she felt her headache coming on. One year after she wrote her friend it had cured headache, sent thanks to me.

"I could give many more cases where the pain is over the entire head or front head with a feeling as if the temples would burst or the eyes would burst out of their sockets. I have always used the tincture. I have not noticed any other effect from it, would like to see a proving."

RELATIONS - **Compare:** (1) Lyc., Glon., Bell. Bry. (2) Tillandsia us. Spanish moss.

***USTILAGO MAYDIS

(Corn Smut)

PHARMACY - ust. Ustilago maydis. Corn smut. N. O. Fungi. Fungus on Zea maydis. Trituration. Tincture of the **spores**. **Historical dose:** Trituration and all potencies, tincture to third potency.

CLINICAL - Agalactia. Alopecia. Cancer. Crusta, lactea. Colic. Constipated. Dysmenorrhea. Eczema. **Fibroids**. Galactorrhea. Headaches, menstrual. **Hemorrhages**. Masturbation. Menopause. Menorrhagia. Menstruation, disorders. **Miscarriages**. Nails, disorders. Nosebleeds. Orchitis. Ovary, pain. Psoriasis. Rhinitis. Scald-head. Sexual, organs. Tonsillitis. Tumors. Uterine, hemorrhage.

HOMEOPATHIC - Burt, who proved Ust. on himself and others, introduced the remedy to homeopathy. It had been observed that pregnant animals feeding on maize affected with smut were very liable to abort. Roullin noted that shedding of the hair and sometimes of the teeth, occurred in animals and men, that mules that fed on it cast their hoofs, and that fowls laid eggs without shells.

Ust. affects the female sexual organs, skin, hair and nails. The provings brought out a specific affinity for the reproductive sphere of both sexes, especially for the left ovary and uterus.

Ust. congests the uterus and produces hemorrhages, generally passive or in clots, dark and watery blood.

Flabby condition of uterus. Uterine hemorrhage, menstrual, post-partum and menopausal. **Bleeding fibroids**. Bearing down, as if everything would come from her. As of a knot in uterus, bowels, throat etc.

Suppressed menses without cause. Vicarious menstruation, bleeding from the lungs and bowels, and bleeding between the periods with left infra-breast pain. Crusta lactea (Viol-t.). Prostration from sexual abuse.

Warm room causes oppression and faintness. Excessively tired feeling. Loss of hair and nails. Tumors have

been seen to disappear after its use.

MIND - Great depression of spirits. Weeps frequently. Irritability, worse being asked a question or to repeat anything. Could not bear to see or talk with anyone. The day seemed like a dream. Restless sleep.

Abdomen - Pain as if intestines were tied in a knot. Colic pains, better by hard stools or constipation. Cutting in umbilical and hypogastric regions. Pain in right lobe of liver.

Back - Pain in back extending to extreme end of spine. Pain in region of right kidney. Dull pain in lumbar region with great despondency and mental irritability. Bearing down in sacral region as in dysmenorrhea. Sensation of boiling water flowing along the back.

Breasts - Pain under left breast, at margin of ribs, between periods, constant.

Constitutions - Adapted to tall, thin women, at menopause.

Chest - Aching, burning distress in sternum. Heat and pressure. Constriction with pain. Oppression along the sternum.

Eyes - Weakness of eyes. Hot feeling on closing lids. Lachrymation in open air. Lids agglutinated in morning. Spots in vision.

Face - Sudden pallor in face, when sitting, in evening. Burning of face and scalp from congestion.

Female - Menses, half liquid, half clotted, bright red, discharge of blood from slightest provocation. Profuse menses after miscarriage. Foul, yellow or brown leucorrhea. Vicarious menstruation from lungs and bowels. Menorrhagia at menopause (Calc., Lach.). Oozing of dark blood, clotted, forming long black strings. **Uterine fibroids, bleeding.** Hypertrophy of uterus, sub-involution. **Cervix spongy, easily bleeding.** Post-partum hemorrhage. Profuse lochia. Ovaries burn, painful, swollen. Acute ovarian pain, worse left. Pains shoot down thighs. Uterus feels drawn into a knot. Bearing down pains when child nurses.

Food - Poor appetite. Thirst at night.

Head - Sticky secretion matting hair. Milk crusts. Vertigo with white spots before the eyes, at menopause, with profuse menses. Nervous headaches from menstrual irregularities.

Heart - Palpitations. Sudden flying pains from the heart to stomach, arresting breathing.

Kidneys - Tenesmus of bladder and incontinence of urine. Urging. Light-colored, high-colored, red, acid, scanty or increased urine. No desire, but uneasiness.

Limbs - **Sensation of boiling water along the back.** Muscular debility. Clonic and tetanic movements. Muscular contractions, especially of lower limbs. Cutting in bones of right hand and foot. Rheumatic symptoms in arms, fingers and legs. Feet swollen in morning.

Male - Irresistible desire to masturbation. Emissions, every night and when talking to a woman. Spermatorrhea with erotic fancies and amorous dreams.

Modalities - Colicky pains better by constipated stool. Ovaries worse from pressure. Menorrhagia worse rising and motion. Abdomen and eyes worse by touch. Riding in carriage aggravates backache. Walking aggravates frontal headache, pain in left groin, pain in loins. Swelling aggravates pains in tonsils. Open air causes

Ustilago maydis lachrymation. Worse from menopause. Worse motion.

Mouth - Bitter, thin salivation. Coppery taste in morning. Tongue coated in morning. Prickling in tongue with feeling as if something were pressing the roots upward with dryness of nostrils.

Nose - Boil in right nostril. Dryness of nostrils in forenoon with dry feeling in skin. Rhinitis, bitter taste offensive odor noticeable to patient himself. Bright nosebleed, better pressure.

Rectum - Loose, soft, dry, lumpy, black stool with pain and rumbling in abdomen. Light-colored diarrhea. Constipated.

Sensations - As if head were being lifted off. As if forehead would burst open. As if something were under root of tongue pressing upward. As of a lump behind larynx. As if intestines were being tied in knots.

Skin - Dry, hot skin. Congested feeling in skin. Tendency to boils. Psoriasis. Eczema, copper-colored spots. Pruritus, sunburn. Painful, destructive disease of nails. Alopecia.

Sleep - Restless night with fever, troubled dreams. Difficult falling asleep, then unpleasant dreams. Sexual dreams without emission.

Stomach - Cutting in stomach. Burning in esophagus at the cardiac orifice. Belchings, of sour fluid, of sour food. Vomiting of blood, passive, venous, accompanied by nausea, better by vomiting.

Teeth - Looseness of teeth. Aching all day in decayed upper first and second molars.

Temperature - Abundant sweat. Pulse at first accelerated then enfeebled. Chills running up and down back. Heat at night. Internal heat with vertigo.

Throat - Dryness of fauces with burning dryness in stomach. Feeling as if there were a lump behind the larynx, which produces constant inclination to swallow. Left tonsil enlarged.

Vertigo - Full feeling. Nervous headache from menstrual irregularities. Aching in eyeballs with much lachrymation.

COMMENTS - Bleeding fibroids (Sec.). Tendency toward miscarriage and passing of dark blood (Sec.). Heavy, dark menstrual flow, debilitating. Alopecia after childbirth.

Hurndall related the case of a small female dog that brought out many features of Ust.'s action. About a fortnight before he saw the dog, she had aborted five fetuses at about the fifth week of gestation. Since then, there had been passive hemorrhage of dark clots.

Moreover, the dog was a perfect specimen of alopecia, not having a hair of any sort on her body and only a little about the head. The cervix os of the uterus was soft, spongy. Great tenderness about the posterior parts when manipulating the hindquarters.

Ust. 3x was prescribed, five drops three times a day. In two days the hemorrhage was completely arrested, tenderness reduced, spirits revived and general health improved. At the end of three months there was a nice coat of hair growing, which in due course became perfectly normal.

***UVA URSI

(Bearberry)

PHARMACY - uva. Uva ursi. Bearberry. Mountain box. Red berry. Bear's grape. Arctostaphylos. Arbutus uva ursi. N. O. Ericaceae. Tincture or trituration of dried leaves and fruit. Tincture of fresh leaves gathered in autumn. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, disorders. Cyanosis. **Cystitis.** Dyspnea. Dysuria. Gonorrhea. Hematuria. Kidney, disorders. Kidney, stones. Nausea. **Pyelitis.** Urinary affections. Urticaria. Uterine, hemorrhage. Vomiting.

HERBAL - Uva ursi is a good kidney tonic (Equis.), it helps prevent the formation of kidney stones and tendencies toward bladder infections. A few experiments have been made with Uva ursi that have seemed to confirm its traditional reputation as an

"astringent used to check excessive secretion of mucus, as in urinary and bronchial disorders and even in kidney stones."

The leaves are principally astringent, with which they combine mild tonic and soothing properties. It increase the flow of urine and particularly show their influence upon the uro-genital tissues. In chronic and sub-acute mucus discharges-such as catarrh of the bladder, leucorrhea, gonorrhea, and gleet it lessens the discharge gradually and giving tone to the parts.

The tincture of the leaves may be used in chronic diarrhea and dysentery. Especially suited to an ulcerated condition of the bowels. Uva ursi has been used as a tonic and astringent in a bleeding stomach, bowels and kidneys. It is more soothing to the stomach than nearly any other astringent.

HOMEOPATHIC - Diabetes, gravel and strangury. **Pyelitis.** Kidney stones. Aching of the kidneys and bladder, congestion and ulceration of the bladder and prostate gland, involuntary seminal emissions, and incontinence of urine. Characteristic shooting pain from hip to hip.

Chronic bladder irritation with pain, tenesmus and catarrhal discharges. **Cystitis** with bloody urine. **Burning after the discharge of slimy urine.** Slime passes with blood. Bladder symptoms are better lying on the back. Painful dysuria, with frequent but difficult discharge of thick, ropy urine of strong, pungent odor. Constant urging to urinate and straining, with discharge of blood and slime. Straining without any discharge at all, or only a few drops of urine. Cutting and burning pain in urethra, which is followed by discharge of blood.

Dyspnea, nausea, vomiting, pulse small and irregular. Uterine hemorrhage. Cyanosis. Urticaria without itching. **Bladder - Cystitis.** Involuntary urination, green urine. Painful dysuria.

Chest - Uneasy tightness with a sensation of weight at the chest.

Face - Flushing.

Head - Slight vertigo and headache.

Kidneys-Pyelitis. Kidney stones. Frequent urging with severe spasms of bladder, burning and tearing pain. Urine contains blood, pus and much tenacious mucus with clots in large masses.

Nose - Fluent coryza with rawness.

Stomach - Weak, sick at stomach, sore all over as if bruised.

Throat - Hoarseness with pain in bowels, stopped up in throat, no appetite. Throat tickles, feels like coughing all the time, sore and bruised all over. Cough, nose raw and burning, cutting and burning on urinating.

COMMENTS - Uva. should be remembered when there is a spasm of the bladder with straining and a discharge of pus, tenacious and clots of blood. It is recommended for hematuria, painful burning urine. Slimy or purulent urine. Calculi of the bladder.

Dropsy, depending on disease of the heart or liver. Leucorrhea and lingering gonorrhea in females. In one cured case there were pains shooting through from hip to hip.

RELATIONS - Compare: (1) Sec., Cann-s. (2) Arbin. - a crystallized glucoside of Uva, found also in Kalm., Gaul, and other genera of the family of Eriaceae, given in doses of 3 to 8 grains with sugar three times a day. Used as a urinary anti-septic and diuretic. (3) Arctosphylos manzanita - acts on kidney and reproductive organs. Gonorrhea, bladder catarrh, diabetes, menorrhagia. Tincture of leaves. (4) Vacc-m., Huckleberries - dysentery, typhoid, keeps intestines aseptic and prevents absorption and re-infection.

REFERENCES - Boericke. Clarke. Murphy.

***VACCININUM

(Cowpox Vaccine)

PHARMACY - vac. Vaccininum. Cowpox vaccine. Vaccinia. Vaccinotoxinum. Lymph from cowpox vaccination pustule. Nosode. Trituration of vaccine matter. **Historical dose:** Tincture and all potencies.

CLINICAL - Albuminuria. Chickenpox. Conjunctivitis. Eczema. Keloids. Keratitis. Headaches. Hematuria. Herpes. Iritis. Leprosy. Malaise. Menorrhagia. Neuralgias. Nephritis. Nevus. Scars. **Smallpox.** Sycosis. Tumors. **Vaccinosis.** Whooping cough.

HOMEOPATHIC - Vaccinosis, smallpox and cowpox are inter-related diseases and the nosodes of each are available for the treatment or the prevention of manifestations of all three. The vaccine poison is capable of setting up a morbid state of extreme chronicity, named "vaccinosis" by Burnett. It may do this without causing the primary symptoms, when the vaccination apparently does not "take."

The symptoms of vaccinosis are protean and are, for the most part, identical with the symptoms of the sycosis of Hahnemann; **vaccinosis** is a sycotic disease. Leading features of the vaccinosis miasm include neuralgias, inveterate skin eruptions, chilliness, and indigestion with great flatulent distention.

Vac. has skin eruptions, **new growths**, sycotic conditions. Restlessness. General malaise. Languor, lassitude. Tired all over with stretching, gaping feeling, unnatural fatigue. Child wants to be carried. Many persons faint when being vaccinated.

Vaccinosis is related to whooping cough. An old-school observer vaccinated a child while they were suffering from whooping cough, and the whooping cough vanished.

Burnett repeated the experiment in other cases with such success that he wrote to the journals to recommend it as a routine practice in the case of unvaccinated children. On the other hand, homeopaths have observed whooping cough immediately after a vaccination and have cured it with Thuja. 30c.

MIND - Capriciousness. Confusion, she does not remember things at the time she wants them. Desired to be carried. Restlessness. Ill-humor, with restless sleep. Irritable, impatient, nervous. Crying. Disposition to be troubled by things. **Morbid fear of getting smallpox.**

Abdomen - Stitches felt in liver and spleen.

Abdomen is bloated up with flatulence.

Anns - Severe pains in left upper arm at vaccination mark. Rheumatic pains in wrists and hands. Keloids on re-vaccination marks.

Back - Backache. Aching pain in back, worse in lumbar region, extending around waist. Chill running down back. Twisting pain in lower back. Weakness in small of back coming on suddenly, ameliorated by lying down.

Chest - Stitch in left side of chest, anteriorly, under short ribs. Stitches in right side under short ribs, in front from right to left, then at corresponding place in left side, but from left to right, lasting five minutes.

Eyes - Keratitis after vaccination. Tinea tarsi and conjunctivitis. Conjunctivae painfully sensitive. Weak eyes. Inflamed and red eyelids. Redness of eyes and face with small pimples on face and hands. Gauzy sensation before eyes in morning, cannot see well.

Face - Redness and distention of face.

Female - Menses rather profuse and too frequent.

Food - Appetite gone. Disgust to taste, smell and appearance of food. Coffee tastes sour.

Head - Eruption like crusta lactea. Frontal headache. Forehead and eyes feel as if split. Forehead felt as if it would split in two in median line from root of nose to top of head. Stitches in right temple. Prickling in left temple, as if going to sleep.

Heart - Febrile action of heart, arteries.

Kidneys - Nephritis with albuminuria, hematuria and dropsy, developed after vaccination.

Limbs - Tearing in left thigh downward. Soreness of lower limbs, as if heated or over-exerted. Legs ached immoderately, hardly able to get about. Break-bone sensation and a feeling as if bones were undergoing process of comminution (Eupper.). Twisting pains in both knees.

Liver - A stitch in hepatic region, at margin of last lower rib, axillary line.

Lungs - Short breath with aching in pit of stomach and pressure in region of heart. Whooping cough.

Mouth - Dry mouth and tongue. Tongue coated, dry yellow with papillae showing through coat.

Neck - Swelling of neck under right ear (parotid gland), with sensation like being cut.

Nose - Full feeling of head with running at nose. Bleeding at nose preceded by a feeling of contraction above and between eyebrows, soon after eating meat.

Sensations - As if forehead were split. As if head or over-exerted in lower limbs. As if bones of leg were broken and undergoing process of comminution.

Skin - Hot and dry. **Eruption like variola.** Small pimples develop at point of vaccination with fourth dilution. Red pimples or blotches in various parts, most evident when warm. Eruption of pustules with a dark-red base and a round or oblong elevation, filled with pus of a greenish-yellow color, resembling varioloid, some as large as a pea, some less without depression in the center, coming with a round, hard feel in the skin (like a shot), very itchy.

Sleep - Waked in middle of night by pain in forehead and eyes as if split and stinging in temples.

Stomach - Aching in pit of stomach with shortness of breath.

Temperature - Fever with heat, thirst tossing about, crying, aversion to food. Chill with shaking.

COMMENTS - Tingling, burning in skin over whole body, most intense in forehead skin and in lower and anterior portion of hairy scalp, which are tinged with a scarlet blush or efflorescence, similar to the immediate precursor of variola-like eruption.

Garrison was consulted by a woman, 50 of

a tubercular family. She had consolidation of both apices, had been losing flesh for three months, with severe night sweats. Almost constant, hacking cough with considerable expectoration at times. She was given one dose of Vac. 200c.

In a week she reported that she had not had a severe coughing spell since the dose and for the last three days hardly any cough at all. She received one dose of Vac. a week, and at the end of six weeks returned to business.

Vaccinating on a nevus in a child can destroy the growth by its inflammation and subsequent scarring.

Frolich related the case of a child, age 6, who had well-developed nephritis seven days after vaccination with calf vaccine. The first symptom was puffed eyelids, then pain and swelling of the scrotum. On the fourteenth day, the urine contained blood, the inguinal glands were enlarged and tender, with slight edema of the legs. The urine contained blood and alumen for another month, when he recovered. Other similar cases have been observed.

Burnett said the worse time of Vac. is the early morning. "Waked in middle of night by pain in forehead and eyes as if split and stinging in temples."

Vaccinum 6c in water, for one day with strict diet, repeated after eight days, acted as a preventive in six hundred cases. It treated many cases of variola and varioloid.

Vaccinum 200c quickly relieved the severe symptoms of variola occurring in a child, aged six months. Two days before appearance of eruption the child had been re-vaccinated (after an interval of eight days) on a nevus near right nipple. Swallowing difficult through implication of tongue and fauces. Pustules, many of large size, scattered over scalp, face, body and limbs.

RELATIONS - Antidoted by: Thuja., Vario., Apis, Sulph., Ant-t., Sil., Maland. **Compare:** (1) In smallpox - Vario., Maland., Thuja., Ant-t. Sarr. (2)Nephritis - Apis, Merc-c. (3)Tubercu- losis - Bac., Tub. (4) Whooping cough - Dros., Thuja., Meph., Coc-c., Cor-r.

REFERENCES - Boericke. Clarke. Murphy.

***VACCINIUM MYRTILLUS

(Bilberry)

PHARMACY - vacc-m. Vaccinium myrtillus. Bilberry. Whortleberry. Black whortles. Whinberry. Trackleberry. Huckleberry. Bleaberry. Hurtleberry. Vaccinium frondosum. N. O. Ericaceae, Vacciniaceae. It is a native of swampy, mountainous regions. Tincture of flesh berries. **Historical dose:** Tincture and all potencies.

CLINICAL - Arthritis. Cataracts. Diabetes. Diarrhea. Dropsy. Dysentery. **Eye, disorders. Eyestrain.** Glaucoma. Gout. Hemorrhoids. Indigestion. Macular, degeneration. Malaria. Myopia. **Nausea. Night-blindness.** Retinitis. Scurvy. Ulcers. Vaccinosis. **Vision, disorders.** Wounds.

HERBAL - The name Bilberry (by some old writers "Bulberry") is derived from the Danish "bollebar," meaning dark berry. Bilberry is a close relative of cranberry and the natural order is allied to the Ericaceae. Bilberries are used in making jams, preserves, liqueurs, and wines.

The leaves can be used in the same way as those of Uva ursi. A decoction of the leaves or bark of the root may be used as a local application to ulcers, and in ulceration of the mouth and throat. A tea made of the leaves is also a remedy for diabetes if taken for a prolonged period.

The fruits are astringent, and are especially valuable in diarrhea and dysentery, in the form of syrup. They are

also used for discharges, and as antilactagogues. It is helpful in scurvy and urinary complaints, and when bruised with the roots and steeped in gin has diuretic properties valuable in dropsy and gravel.

Bilberry contains nutrients needed to protect eyes from eyestrain or fatigue, and can improve circulation to the eyes. It works by improving the microcirculation and regeneration of the retina. British Royal Air Force pilots during World War II, ate bilberry preserves before night missions as an aid to night vision.

Clinical experience confirms that, when given orally, it improves visual accuracy in healthy people, and can help those with eye diseases such as pigmentosa, retinitis, glaucoma, and myopia. Cataracts and macular degeneration. **Poor vision and night blindness.**

The dried fruit and tea has been used as a treatment for diarrhea and as a relief for nausea and indigestion. For mild inflammation of the mucus membranes of the mouth and throat. Stomach problems and irritated digestive tract.

HOMEOPATHIC - Vacc-m. is applicable to vaccinosis, malarial and dysenteric cases. Eye disorders. Diarrhea. Dysentery. Diabetes.

Dr. A. H. Croucher, in an article published in the Homeopathic Review, gave cases of inveterate diarrhea cured by it. His experience has been repeatedly confirmed.

Clarke always used it in the herbal tincture, generally giving 5 drop doses every four hours.

RELATIONS - Compare: (1) Sima., Chin., Rheum., Merc.

REFERENCES - Clarke. Murphy.

***VALERIANA OFFICINALIS

(Valerian)

PHARMACY - valer. Valeriana officinalis. Valerian. N. O. Valerianaceae. Tincture of the fresh root. **Historical dose:** Tincture and all potencies.

CLINICAL - Asthma, spasmodic, nervous. Bedsores. Clairvoyance. Coxalgia. Headaches. Heart, palpitations. Heels, pain. Hypochondriasis. Hysteria. **Insomnia.** Levitation, sensation. Menopause. **Nervousness.** Neuralgia. Sensitive. Sciatica. **Sleeplessness.** Toothache.

HERBAL - Valeriana officinalis is usually found in moist hedgerows or on the banks of ditches and streams. The peculiar fetid odor of Valerians is probably due to the presence of Valerianic acid. It is especially agreeable to cats, who become intoxicated with it.

The Treasury of Botany noted that "Volatile oil of Valerian seems not to exist naturally in the plant, but to be developed by the agency of water."

Valerian root is largely relaxant and moderately stimulant. It is a mild stimulant to the circulatory and nervous system. It is an antispasmodic, laxative, diaphoretic and anthelmintic.

A nervine and antispasmodic in cases of irritability, restlessness, hysteria, and nearly all forms of acute nervousness, **insomnia, calming the brain, inducing quietude and sleep.** The most valuable uses to which it can be put, are cases of nervousness, restlessness, and hysteria.

If large doses are employed, nausea, vomiting, diarrhea and hiccough, with frequent urination, result. If it is long continued, as state of low, melancholy and hysterical depression results. The heart's action is increased, the temperature raised and formication of the hands and feet is complained of.

HOMEOPATHIC - Valer, first appeared in homeopathic medicine in Stapf's Additions, the article on it was written by Franz, and Hahnemann and Stapf were among the pro vers.

Valerian produces **over-sensitiveness of the nerves**, spinal, genitourinary. Affects the mind, muscles, calf, heels, and Achilles tendon. Hysteria, over-sensitiveness, nervous affections. Lack of reaction, when apparently well-chosen remedies fail.

Alternating **symptoms. Mental and physical dispositions change suddenly** and go to extreme. Red parts turn white. Constant heat and uneasiness. **Insomnia.** Profuse sweat at night. Pains are darting, tearing, move outwards, are felt here and there or come and go, jump from one place to another.

Epileptic fits. Paralysis and contraction of limbs, hysterical. Agitation of all nerves, jerks, twitches, trembling. Restlessness, impulse to move, cannot keep still. Weak, single parts, eyes, arms, wrists, popliteal etc.

Globus hystericus. Illusions of vision, hearing, smell or taste. Slight injury causes spasms. Straightening out limb aggravates sciatica. **Hysterical flatulence.** Bedsores form soon in typhoid. Sensation of a thread hanging down from esophagus.

MIND - Mental disturbances passing from one extreme of emotions to another, from the highest joy to deepest grief, from mildness to grumbling. **Changeable disposition and moods.** Impatience, passes quickly from one subject to another. Tremulous. Over-sensitiveness (Staph.). **Irritable.** Anger. Mad, raving, swearing.

Hysterical spasms and disorders generally. Wriggles or squirms about. Inclined to faint. Hysteria, dreads being alone and especially in the dark. Hallucinations at night. Erroneous ideas, thinks she is someone else,

as if all around were strange and disagreeable. Delusions of animals, men. Feels light, as if floating in air.

Abdomen - Abdomen inflated and hard.

Hysterical cramps. Spasms, cramps in bowels after food and at night in bed. Flatulence. Draws abdomen in involuntarily.

Back - Lancinations in left lumbar region above hip, worse when standing and especially when sitting, than when walking. Rheumatic pains in the shoulder blades.

Causations - Injuries, slightest injury causes spasms.

Chest - Sudden stitches in chest and liver from within out. Eruption of small, hard nodosities on chest.

Constitutions - Hysterical women who have taken too much chamomile tea. Nervous, irritable, and hysterical subjects in whom the intellectual faculties predominate and who suffer from hysteria and neuralgia.

Ears - Otolgia with spasmodic drawings. Jerkings in the ears. Hyperesthesia. **Earache from exposure to drafts and cold.** Nervous noises. Tinkling and ringing in the ears. Illusions of hearing, imagined he heard the bell tinkle.

Eyes - Swelling and painful sensibility of eyelids. Myopia. Brightness and light before eyes in a dark room, vision sharp. Sparks before eyes. Objects seem too near eyes. Wild look.

Face - Pain appears suddenly and jerks. Muscles twitch. Cheeks red and hot in open air.

Female - Menses late and scanty (Puls.). Neurasthenia of sexual organs.

Food - Voracious hunger with nausea, as if from navel.

Head - Headache, which appears suddenly or in jerks. Fullness as from rush of blood to head. Pressive headache. Headaches, better moving about, worse sunshine. Moving eyes aggravates headache. Sensation of great coldness. Pressure in forehead. Bending head back aggravates pain in occiput.

Heart - Stitching in heart with quick, small and weak pulse.

Kidneys - Much straining and prolapsed rectum during urination. Urine increased and more frequent in nervous women. Urine contains a white, red or turbid sediment.

Limbs - Rheumatic pains in limbs. Heaviness. **Sciatica, pain worse standing and resting on floor** (Bell.), stretching limbs, better walking. Pain in heels when sitting. Crampy pain, electric-like shocks in humerus (left), wakes from sleep. **Constant jerking.** Tensive pain in the calves, worse crossing legs. Cramps in biceps (right) while writing. Cramps of hands and feet prevent sleep. Pain from calf to heel. Legs feel light after walking.

Lungs - Choking in throat on falling asleep. Wakes as if suffocating. Spasmodic asthma, convulsive movements of the diaphragm. Obstructed respiration and anguish in chest.

Male - Creeping and drawing in of penis, as if it had gone to sleep.

Modalities - Better after a meal, after breakfast. Better after sleep. Better changing position, walking about, motion. Rubbing helps cramp in calf. **Worse from rest, standing,** sitting, stooping, touch. Worse excitement. Worse fasting. Worse from open air, draft. Worse noon, evening, darkness, before midnight.

Mouth - Rancid, greasy taste. Bitter taste on tip of tongue. Tongue thickly coated. Nausea felt in throat. White blisters on tongue and upper lip, painful when touched. Toothache with shooting pain.

Nose - Violent sneezing.

Rectum - Ascarides. Hemorrhoid pain from worms. Painful borings in rectum.

Bubbling pressure above anus in region of coccyx. Loose evacuations, greenish, papescent, and bloody stool. Thin, watery diarrhea with **lumps of coagulated milk, with violent screaming in children.** Discharge of blood from anus.

Sensations - Pressure of hand or covering with hat causes icy coldness on vertex. As if flying in air. As if eyes would be pierced from within outward. As if smoke in eyes. **As if a thread were hanging down throat.** Like lead in limbs. Lightness in leg. As if strained in right ankle. As if bruised in outer malleolus of right foot.

Skin - Skin too dry and warm. Painful eruptions. Eruption of small nodosities, at first red and confluent, then white and hard.

Sleep - Sleeplessness with nightly itching and muscular spasms from excitement, worse on waking. Cannot sleep before midnight. **Insomnia,** during pregnancy and menopause. Disturbed sleep with tossing and anxious, confused dreams.

Stomach - Weak stomach and digestion. Sense of something warm rising from stomach and causing suffocation. Cramps in stomach. Foul belchings, like bad eggs. Heartburn with gulping of rancid fluid. Nausea with faintness. **Child vomits curdled milk** in large lumps after nursing after mother's anger.

Temperature - Chilliness, generally begins in neck and runs down back. Body ice cold with nausea and vomiting. Sensation of icy coldness (Helo., Camp., Abies-c.). **Heat predominates.** Fever composed of disagreeable heat only. Long lasting heat, often with sweat on face. Sudden gushes of sweat, mostly on forehead.

Throat - Choking in throat-pit on falling asleep, wakes as if suffocating. Pharynx feels constricted. **Sensation**

as if a thread were hanging down throat with salivation and vomiting. Nausea felt in throat.

Vertigo - Vertigo on stooping, feels light, as if floating. Head confused, as after intoxication. Intoxication and dizziness with absence of ideas. Whirling in head when stooping forwards.

COMMENTS - Franz wrote that it was the custom among women in Germany to take

Valerian almost as frequently as coffee. He attributed much of the nervous suffering, then prevalent, to this practice. "There is scarcely a remedy," he said, "which communicates its primary as well as secondary action to the organism with more intensity than Valer."

He referenced his own eye symptoms, which were both severe and remarkable, though he had no tendency to anything of the kind before. His symptoms were excited at intervals for four months afterwards, the cause was frequently unknown, showing the deep action on the organism.

Franz recorded burning, smarting and pressure in the margins of the eyelids, which seemed sore and swollen. There were also hallucinations of hearing and of sense.

"Imagines she is some one else and moves to the edge of the bed to make room." "Anxious, hypochondriac feeling, as if the objects around him had been taken from him, the room appears to him desolate, he does not feel at home in the room, he is compelled to leave it." "As if in a dream."

"The many inveterate spasms of the stomach and abdomen. The incurable cases of hysteria and hypochondriasis. Moral disturbances, passing from one extreme of emotion to another. From the highest joy to the deepest grief from leniency. Kindness and mildness to grumbling impatience, obstinacy and quarrelsomeness from a sinking of the vital forces. A painful craving for stimulants to the greatest liveliness and extravagance and vice versa."

In Franz's opinion, tedious convalescence after nervous fevers, and paralysis and contractions of the limbs, were owed less to the original intensity of the disease than to the Valer, with which the patients had been dosed. They were only saved from worse effects because Valer, was frequently given in combination with one or more of its antidotes.

Franz noted that the first and most rapid effect of Valer., which precedes any after symptoms, is an acceleration of the pulse and congestion of the head. Symptoms of the upper and lower limbs alternate frequently. Principally produces symptoms at noon

Valeriana officinalis and early afternoon, and the hours before midnight. The abdominal symptoms are particularly felt in the evening.

Disturbed digestion. Fetid tallow taste before dinner. Flat, slimy taste early in the morning, on waking. Nausea begins in umbilical region, rising into pharynx.

Darting, tearing pains that come and go. Pains appear suddenly. Tearings, cramps, better morning. Constant heat and uneasiness. Restlessness. Nervous irritation, cannot keep still. Tissot recommended Valer. for epilepsy.

Nash cured a severe case of sciatica in a pregnant woman based on the symptoms, "pain worse standing and letting the foot rest on the floor." She could stand with the foot resting on a chair or lie down in comfort.

Hering said it met "Nervous disorders occurring in excitable temperaments. In hypochondriasis it calms the nervousness, abates the excitement of the circulation.

"It removes the wakefulness, promotes sleep and induces sensation of quietude and comfort. Sadness is removed in globus hystericus in all asthmatic and hysterical coughs. Nervous palpitations, profuse flow of limpid urine. Red parts become white."

RELATIONS -Antidotedby: Bell., Camph., Cina, Coff., Puls. **Antidote to:** Merc., abuse of Chamomile tea.

Compare: (1) Asaf., Ign., Croc., Castor. (2) Am-val., Zinc-val. - in neuralgia, gastric disturbance and great nervous agitation. Insomnia. Feeble, hysterical nervous patients.

***VALIUM

(Diazepam)

PHARMACY - diaz. Valium. Diazepam. It belongs to a class of drugs known as benzodiazepines. Trituration.

Historical dose: All potencies.

CLINICAL - Anxiety. Athetosis. Bradycardia. Coma. Constipation. Convulsions. Coughing. Cramps. Delirium tremens. Depression. Diplopia. Dysarthria. Dyspnea. Dysuria. Fainting. Fatigue. Hallucinations. Headaches. Hyperventilation. Hypotension. Incoordination. Nausea. Nystagmus. Photophobia. Rash. Salivation. Sleep, disorders. Tremors. Ulcers. Venous, thrombosis. Vertigo. Vomiting.

HOMEOPATHIC - Valium is used in the treatment of anxiety disorders and for short-term relief of the symptoms of anxiety and panic. It is also used to relieve the symptoms of acute alcohol withdrawal.

To relax muscles, to relieve the uncontrolled muscle movements caused by cerebral palsy and paralysis of the

lower body and limbs. Used to control involuntary movement of the hands (athetosis), to relax tight, aching muscles, and to treat convulsive disorders such as epilepsy.

Loss of muscle coordination. Uncontrolled movements of body, including the eyes. Tremors, vertigo, dizziness. Increased sensitivity to touch and pain.

Confusion. Depression. Anxiety. Over- stimulation, rage, seizures. Drowsiness, fatigue, light-headedness. Unusual tiredness or weakness. Slow heartbeat. Low blood pressure. Headache. Blurred vision, double vision. Hallucinations.

Yellowing of eyes and skin. Skin rash, sleep disturbances. Changes in salivation. Slurred speech and other speech problems. Nausea. Difficulty urinating, or inability to hold urine. Constipation. Changes in sex drive.

MIND - Mental confusion. Dullness of mind. Memory loss. Disorientation. Slurred speech and other speech problems. Depression. Anxiety. Delirium tremens.

Agitation. Overstimulation and rage. Paradoxical reactions such as acute hyper-excited states. Unusual excitement, nervousness or irritability. Feelings of suspicion or distrust. False sense of well-being.

Abnormal thinking. Behavior changes, including aggressive behavior, bizarre behavior, decreased inhibition, or outbursts of anger. Hallucinations. Delusions, holding false beliefs that cannot be changed by facts. Loss of sense of reality.

Abdomen - Abdominal cramps.

Ears - Increased sense of hearing.

Eyes - Blurred vision. Diplopia. Nystagmus. Yellow eyes. Sensitivity of eyes to light.

Female - Changes in libido.

Head - Headache.

Heart - Fast, pounding, or irregular heartbeat. Bradycardia. Cardiovascular collapse. Hypotension.

Limbs - Muscle spasms, weakness. Ataxia. Staggering. Dysarthria. Tremors. Tingling, burning, or prickly sensations. Trembling or shaking. Venous thrombosis and phlebitis at the site of injection.

Lungs - Increased bronchial secretions. Coughing. Depressed respiration. Dyspnea. Hyperventilation.

Kidneys - Incontinence. Urinary retention.

Male - Changes in libido.

Mouth - Changes in salivation. Watering of mouth. Dryness of mouth. Slurred speech. Ulcers or sores in mouth.

Perspiration - Increased sweating. **Rectum** - Constipation.

Skin - Skin rash, itching. Urticaria. Jaundice. Unusual bleeding or bruising.

Sleep - Sleep disturbances and stimulation. Insomnia.

Stomach - Increased thirst. Hiccoughs. Nausea and vomiting.

Temperature - Fever and chills.

Throat - Sore throat. Laryngospasm and pain in throat or chest. Ulcers or sores in throat.

Vertigo - Fainting and dizziness.

COMMENTS - Withdrawal symptoms, similar in character to those noted with barbiturates and alcohol have occurred following abrupt discontinuance of valium. Convulsions, tremors, abdominal and muscle cramps, vomiting and sweating.

REFERENCES - Murphy.

***VANADIUM METALLICUM

(Vanadium Metal)

PHARMACY - vanad. Vanadium metallicum. Vanadium metal. (At. Wt. 51.2). Burnett used the soluble ammonium salt. Trituration. **Historical dose:** All potencies.

CLINICAL - Addison's disease. AIDS. **Anemia.** **Anorexia.** Arteriosclerosis. Atheroma.

Blindness. Brain, softening. Bronchitis. Bulimia. **Cachexia.** Cancer. Colds. Constipation. **Debility.** Diabetes. Diarrhea. Emaciation. Eye, disorders. Fatty, heart. Growth, retarded. Hysteria. Immune, weakness.

Indigestion. Liver, disorders. **Malnutrition.** Metabolism, disorders. Osteoporosis. Paralysis. Pneumonia. Raynaud's syndrome. Retinitis. Rheumatism. Sciatica. Thyroid, disorders. Tonsillitis. Tuberculosis. Vertigo.

Warts. **Weakness.**

HOMEOPATHIC - Vanad. has never been subjected to the test of a homeopathic proving but something of its effects upon the human body are known from its accidental absorption by workers. It is an ingredient in some black pigments and of a black, permanent ink.

Workers become debilitated. They contract a dry, hard, almost convulsive cough, with hemorrhage. The temperature becomes elevated with a diurnal maximum. Diarrhea sets in soon, and flesh and weight is lost rapidly. They are very apt to go from this state into genuine tuberculosis and die.

These symptoms suggest it as a remedy in the early stages of tuberculosis. It agrees with the general characters of that disease, namely the cough, prostration, fever with daily rise, emaciation, hemorrhage and diarrhea. Vanad. also affects the liver with a degenerative process.

Its action is that of an oxygen carrier and a catalyzer, hence its use in wasting diseases. Increases amount of hemoglobin, also combines its oxygen with toxins and destroys their virulence. It also increases and stimulates phagocytes.

It is a remedy in degenerative conditions of the liver and arteries. Anorexia and symptoms of gastro-intestinal irritation. Tremors, vertigo, neuro-retinitis and blindness. Anemia, emaciation. Cough dry, irritating and paroxysmal, sometimes with hemorrhages. Irritation of nose, eyes and throat.

Acts as **a tonic to digestive functions** and in early tuberculosis. Degenerative states with brain softening. Tuberculosis, chronic rheumatism, diabetes. Cold hands and feet. Raynaud's syndrome.

Degenerative conditions of liver and arteries. Fatty degeneration of the heart and liver. Arteriosclerosis, sensation as if heart was compressed, as if blood had no room in the aorta. Deeply pigmented patches on forehead in liver disorders. **Profound weakness**. Emaciation and weakness.

MIND - Restlessness. Gloomy. Yielding, easily influenced. Crying easily over trifles. Fears of failure, criticism, being opposed. Anticipation. Fears of being late. Hysteria and melancholia. Mood alternating. Manic depression. Psychosis. **Anorexia** alternating with bulimia.

Blood - Anemia and nutritional problems. **Chest** - Anxious pressure on whole chest.

Sore chest.

Dreams - Dreams of being late, of futile efforts. Dreams of paralysis.

Eyes - Neuro-retinitis and blindness. Opacity. Arcus senilis. Paralysis of optic nerves. Amaurosis.

Female - Premenstrual symptoms. Menses scanty or absent. Pain in ovaries. Worse at ovulation. Lactation problems.

Food - Loss of appetite. **Anorexia**. Bulimia.

Disturbed fat and glucose metabolism. Retarded growth. Desires licorice, sweets. Weak digestion.

Head - Headaches. Brain softening.

Heart - Fatty degeneration of the heart.

Arteriosclerosis. Hypertension. Sensation as if heart was compressed, as if blood had no room in the aorta. Bursting pain. Constriction sensation.

Kidneys - Addison's disease. Albumen, casts and blood in urine.

Limbs - Chronic rheumatism. Sciatica.

Restless and itching legs. Paralysis.

Osteoporosis.

Liver - Fatty degeneration of the liver.

Lungs - Dyspnea, tiredness, weakness.

Pneumonia and bronchitis. Cough dry, irritating. Colds with sneezing. Tuberculosis.

Mouth - Teeth problems. Tongue green.

Rectum - Constipation. Diarrhea.

Skin - Pigmented patches. Warts.

Throat - Tonsillitis and sore throats, coughing up small, greenish-yellow, bitter mucus. Thyroid problems.

COMMENTS - Burnett told how he came to use Vanad. through reading the result of some experiments on animals in which the Salts of Vanadium produced "true cell destruction, the pigment escaping, the liver being hit hardest."

Burnett had at the time a case of "fatty liver, atheroma of the arteries, much pain corresponding to the course of the basilar artery, large, deeply pigmented patches on forehead, profound adynamia." Vanad. restored the patient, who was seventy and at eighty he was "hale and hearty."

Marc Jousset told of experiments with salts of Vanad., chiefly the meta-vanadate of sodium, by Lyonnet and others. Animals poisoned by intravenous injections rapidly develop Cheyne-Stokes respiration with little or no action on circulation or blood.

Cachexia. These clinical observers gave Vanadates to two hundred patients, suffering from neurasthenia, tuberculosis, chlorosis, chronic rheumatism, etc. It produced in nearly all cases increased appetite, strength and weight. The amount of urea was also increased. They regard Vanad. as "an energetic stimulant of nutrition," and probably an oxidant stimulating organic combustion.

RELATIONS - Compare: (1) Ars., Phos. Am- c. (2) Vanad. - fatty degeneration of liver. (3) fatty degeneration, Phos., Ars. (4) Addison's disease, Adren. (5) Tuberculosis, Tub., Bac.

***VANILLA AROMATICA

(Vanilla Beans)

PHARMACY - vanil. Vanillaaromatica. Vanilla beans. Vanilla planifolia. N. O. Orchidaceae. Vanilla beans, tincture of the fruit. (Do not use the synthetic vanilla extract). **Historical dose:** All potencies.

CLINICAL - Menses, prolonged. Poison-oak. Skin, disorders.

HERBAL - Vanilla aromática is an emma- gogue and aphrodisiac. Vanillais supposed to stimulate the brain and sexual propensities.

HOMEOPATHIC - Various disorders of the nervous system and circulation are produced in workers with vanilla. Menses prolonged.

It has been found effective in curing skin disorders. Marked skin irritation resembling poison-oak is sometimes produced by handling the beans, also by local use of vanilla essence in a hair wash.

REFERENCES - Boericke.

***VARIOLINUM

(Smallpox Nosode)

PHARMACY - vario. Variolinum. Smallpox nosode. Trituration of matter from smallpox vesicle. **Historical dose:** All potencies.

CLINICAL - Asthma. **Backaches.** Chill. Eczema. Fevers. Headache, occipital. **Herpes zoster.** Nausea. Neuralgias. Pustules. **Shingles. Smallpox.** Testicle, swelling. Ulcers. Vaccinations, ill effects.

HOMEOPATHIC - The Vario, nosode is prepared from lymph from a smallpox pustule. It has proved as an efficient preventive against smallpox and vaccinia infection. Vario, is used for **bad effects of vaccinations.** Seems to be efficacious in protecting against, modifying and aiding in the cure of smallpox.

Vario, was Burnett's chief remedy in **shingles**, it generally, as he expressed it, wiped out the disease, eruption and pain as well. It will also cure neuralgia left by herpes. Vario, has aborted many cases of smallpox and has proved an efficient preventive against smallpox contagion and vaccinia infection.

The keynote symptoms of Vario, are the defining symptoms of smallpox. Severe cold, chill, chilly creepings as if cold water were trickling down the back, violent fever with extremely hot skin, with or without high pulse. Violent headache.

General aching in the muscles worse in back, occiput and legs. Nausea. Pain in epigastrium. Pain in limbs as if in bones. **Severe backache.** There may be rash or there may not. Calcareous deposits in the blood vessels, spinal cord. etc.

MIND - Delirium with fever. Morbid fear of smallpox. Fear of death. Wild excitement and begging to know if he was to die.

Variolinum

Abdomen - Tympanites, pouting upwards, looks pregnant.

Back - Excruciating backache. Pain as if back were broken, worse by motion. Terrible pains in back on right side of spine. Pains from back, shift to abdomen.

Ears - Deafness.

Eyes - Inflamed eyelids. Green vision, on rising.

Head - Crazy feeling in the brain. Headache with icy coldness of feet and hands. Pain in occiput.

Limbs - Aching in legs. Muscular rheumatism, worse on motion. Tired all over with restlessness. Wrist pain.

Lungs - Oppressed breathing. Asthma. Troublesome cough, with serous and sometimes bloody sputa. Cough with thick viscid, slimy, bloody mucus, smelling bad. Feeling of a lump in right side of throat.

Male - Enlargement of testicle. Hard swelling of left testicle from a contusion.

Modalities - Worse from motion. Worse after vaccinations.

Mouth - Tongue protrudes during sleep. Foul, metallic taste. Breath horribly offensive.

Sensations - As if a band tightly encircled head. Crazy feeling through brain. As if throat were closed. As of a lump in right side of throat. Like streams of ice-water running down back.

Skin - Hot, dry. Eczema of palms. Herpes zoster. **Shingles** and pains that follow. Eruption of foul pustules. Ulcers look scooped out. Profuse, bad-smelling sweat. As of bugs crawling under the skin.

Stomach - Odor nauseates. Wants to regurgitate food. Vomiting of milk immediately after drinking it.

Temperature - As of cold water trickling down the back. Violent chill. Hot fever with intense, burning, radiating heat.

Throat - Throat very sore, painful swallowing. Deep purplish crimson pharynx and fauces, with gangrenous appearance. Sensation as if throat were closed. Sensation of a lump in right side of throat. Diphtheria with horrible fetor oris.

COMMENTS - Nonspecific shingles (Rhus- t.). Neuralgic pains without defining char-

acteristics. Tendency to herpes, or acutely for herpes zoster or simplex. Acne, with yellow pus, leaving scars and large pock marks (Calc-s.).

G. M. H. recorded the experience he had concerning Vario. 6c given to the mother and children of a family, one of whose members was taken with smallpox and removed to an isolation hospital with his mother to nurse him.

The patient (who did not receive Vario.) was dangerously ill for a month. Neither the mother who nursed him nor any of the other children caught smallpox.

Vaccines were sent by the government, and all the family were vaccinated, but it did not take with any of those who had taken Vario., although the vaccination was repeated.

Moreover, G. M. H. himself, who had taken a dose of Vario., submitted to vaccination, but "although four thorough inoculations were given, they healed up immediately and did not even itch or smart."

A school of two hundred children were "internally variolated" with Vario. (100,000c, Swan) on the evening of February 18th and the morning of February 19th. Of two school mistresses, one was not at all affected, the other was ill for two days in bed.

On February 21st many of the children were ill, by the 23rd, all except forty were. The symptoms were the usual preliminary symptoms of smallpox, and later, Swan found pustules on many.

After the varioloid had passed off, but before the patients had recovered their vitality, twenty-three children were vaccinated without Swan's knowledge. All but one took and had terrible ulcers on the arms and had to be remedied by Vac. (100,000c, Swan).

RELATIONS - Antidoted by: Maland., Thuji., Ant-t., Vac., Sarr. **Compare:** (1) Herpes, Mez., Rhus-L, Ars., Vac. the same action. (2) Maland. - the morbid product of the grease of the horse, a prophylactic of smallpox and a remedy for the ill-effects of vaccination, chronic eczema following vaccination.

REFERENCES - Boericke. Clarke. Murphy.

***VENUS MERCENARIA

(American Scallop)

PHARMACY - ven-m. Venus mercenaria. American scallop. American clam. Pelecypoda class, living along the Atlantic Coast of America, France and Southern England. Tincture of the mollusc, plus an equal part of a trituration at 1/100 of the shell. **Historical dose:** All potencies.

CLINICAL - Allergies. Amenorrhea. Arthritis. Flatulence. Headaches. **Indigestion.** Mania. **Migraines.** Schizophrenia. Weakness.

HOMEOPATHIC - Ven-m., the American scallop, is a bi-valvular mollusk. The proving, after a suggestion by D. M. Foubister, was conducted by Raeside in 1961-62 on nineteen provers, plus seven controls during three terms, one dose morning and evening for fourteen days, using the 30c in first term, 12c in second term, and 6c in third term. The third term produced most of the symptoms.

Ven-m. is above all a remedy with cephalic action. For migraine headaches, accompanied by a host of digestive and urinary manifestations. **Migraines of digestive origin.** Increased frequency of urination.

Frontal and occipital headache, predominantly on the right side, pains of a heavy sort, worse early in the morning and especially in the afternoon. Headache accompanied by vertigo, nausea, vomiting. Furred tongue, flatulence, diarrhea.

Frequency of urination, especially during the day. Scalp and skin of the face and limbs itchy. Predominantly right sided. Sometimes there is a pseudo influenza, weakness at 10 a.m., extreme chilliness from 3 p.m. to 5 p.m. Sensation of contusion when pressure is applied.

MIND - Lack of co-ordination of thoughts. Dull mood, state of indifference and lack of concentration. Sensation of boredom with fear of crying for no reason. Exaggerated irritability from noise and people. Mania. Schizophrenia. Feels cut off from the world. Drunk feeling in the morning.

Abdomen - Abdominal pains around 9 p.m. like menstrual pains. Muco-membranous enterocolitis. Flatulence and rumbling in the morning.

Back - Arthralgia and muscle pain with stiffness in the back and nape of the neck on waking.

Chest - Tender around the sternum.

Constitutions - Allergic, psoric and sycotic types, tending towards a cancerous state following severe self-intoxication.

Female - Amenorrhea. Menses painful, especially at onset, for 2-3 hours. Menstrual pain ameliorated by heat and lying down. Depressed on first day of menstruation.

Food - Desire for cold food, thirsty for cold water, ameliorated in the evening. Food tastes metallic.

Head - Frontal, dull headache, behind the eye to the right with nausea, especially in the afternoon. Occipital

headache on the right side, also in the afternoon. **Migraines of digestive origin.** Frontal and occipital hemicrania of the right or left side with nausea and feeling as if the head were being held tightly. Headache, aggravated in the afternoon, by exercise, ameliorated by sitting quietly in the dark and in the late evening.

Heart - Short stabbing pain in the heart.

Kidneys - Persistent pain in the right kidney on waking up. Fleeting pain in the left kidney. Frequency of urination by day. Urine turbid, frothy with a fetid odor. Frequent need to urinate.

Limbs - Pain and paresthesia of the limbs. Cramps, heaviness, itching of the arms and legs. These pains are ameliorated by movement. Pains in the hip, knee and ankle joints. Right knee swollen, hot and painful. Muscle pain. Arthritis. Arthrosis.

Modalities - Better from movement. Worse on waking, in morning, in afternoon. Worse from noise.

Mouth - Soreness of the left lower lip and corner of lips. Blister on the lips. Tongue coated, furred. Cold feeling in the mouth and throat. Teeth sensitive to hot and cold, especially on the upper left jaw.

Nerves - Incoordination of the mind and body when writing.

Rectum - Slight diarrhea or stubborn constipation with no desire to go to stool.

Skin - Itching eczema. Prurigo simplex. Itching of the limbs, ears, back and face. Urticaria on the left hand. Boils and eruptions on the face.

Sleep - Sleep disturbed, waking at 2 a.m. Dreams of spiders. Dreams of violence, ending in death. Dreams of death and disease.

Stomach - Dyspepsia. Stomach ulcer. Nausea after eating with headache and vomiting. Flatulence all day long. Pressing stomachache with nausea, ameliorated after eating. Heaviness in the epigastrium, feeling of a stone in the stomach, aggravated by menses and at night.

Throat - Pain on right side, spreading to the ear, aggravated by swallowing with dryness, chill and swollen glands. Constriction in the pharynx and larynx. Boil on the neck.

Vertigo - Vertigo on rising after sitting for a long time, worse when ever tired, ameliorated by pressure.

COMMENTS - Ven-m. in one single dose of 30c or repeated once is a remedy both for attacks of migraine and for complaints based on migraine headaches.

RELATIONS - Compare: (1) Calc. - digestive complaints with acrid-smelling stools, nausea and headache, chilliness. (2) Iris. - headache around the right eye with gastric complaints, burning and heartburn. (3) Lyc. - meteorism, constipation, depression, aggravated from 4 p.m. to 8 p.m. **Complementary:** Care, is complementary.

REFERENCES-Julian.

***VERATRINUM

PHARMACY - verin. Veratrinum. Veratria. Veratroidia. Viridia. Melanthiaceae. An alkaloid obtained chiefly from seeds of Saba- dilla and roots of Veratrum album. Trituration. **Historical dose:** All potencies.

CLINICAL - Cohc. Diarrhea. Dysentery. Dysuria. Esophagus, stricture. Intestines, catarrh. Jaw, snapping. Neuralgias. Pain. Paralysis. Spasms. Spine, neuralgia. Tetanus. Twitch- ings. Vomiting.

HOMEOPATHIC - Verin, is both a paralyzer and a great pain producer. It causes a sensation like electric streams in nerves, shooting

Veratrinum pains like electric-shocks in veins, muscles and joints.

Verin, causes tetanus, which Farrington distinguishes from the convulsive action of Nux-v. in that Verin, causes purgation and vomiting with the spasms and that general paralysis does not take place from exhaustion as with Nux-v., but from devitalization of the muscles.

In large doses, it causes violent sneezing and great gastro-intestinal irritation, vomiting, purging and symptoms of collapse. The pulse is rapid, small and irregular and often involuntary muscular tremors come on. A peculiar creeping and prickling sensation in skin generally accompanies these symptoms.

Externally applied to the unbroken skin it has no marked action. If rubbed on with some fat, it passes through the epidermis and causes first irritation and then paralysis of the ends of the sensory nerves and producing a prickly and creepy sensation, succeeded by numbness.

This effect is produced whether applied locally or taken internally. Brunton noted this irritating action in the sensory nerves is also observed if it is inhaled through the nose, where it causes violent sneezing, which also occurs after absorption through the stomach.

COMMENTS - Subsultus tendinum, fibrillary twitchings are marked. Startings and tremors occur in limbs previously affected by paralysis or pain. The pains are tingling, sparkling, prickling, burning. Twitching of facial muscles. Snapping, closure of lower jaw. Drawing pain along the spine. Shocks in head.

Sensations of oppression in head, suffocation of boiling water running over the back. As if a stream of warm air or drops of hot water issued from various parts. As if a frozen atmosphere around feet to knees or cold

water poured on them.

"Dull pain afterwards burning in lower part of spinal column, followed by pain in bowels and prepuce, accompanied with jerking in lower limb."

RELATIONS - Antidoted by: Coffee mixed with a little lemon-juice. **Compare:** (1) Sabad., Aeon., Con.

REFERENCES-Clarke.

*****VERATRUM ALBUM**

(White Hellebore)

PHARMACY - verat. Veratrum album. White hellebore. White-flowered veratrum. N. O. Melanthaceae of the Liliaceae. Alps and Pyrenees. Tincture of the rootstocks collected early in June before flowering. **Historical dose:** All potencies, first to thirtieth potency.

CLINICAL - Amenorrhea. Anemia. Anguish. Anasarca. Angina pectoris. Asthma. Bronchitis. **Cholera**. Colic. **Collapse**. **Coma**. Constipation. Convulsions. Coprophagia. Coughs. Cramps. Deafness. Debility. **Dehydration**. Despair. Diarrhea. Dysmenorrhea. Eclampsia. Emphysema. Epilepsy. Esophagus, stricture. **Fainting**. Fevers. Gastric, catarrh. **Head injury**. Headaches. **Heatstroke**. Hernia. **Hydrocephalus**. Hydrophobia. Hysteria. Influenza. **Insanity, religious**. Intermittent fever. Intussusception. Labor, constipation. Lips, cracked. Liver, hyperemia. Lockjaw. Lungs, edema. **Mania**. Measles. Melancholy. **Meningitis**. Menstruation. Neuralgias. Nyctalopia. Paralysis. Peritonitis. Pernicious fevers. Pneumonia. Pregnancy, imaginary. Ptosis. Rheumatism. Salivation. Scarletina. **Shock**. Sleep, whining. Spleen, swollen. Strokes. **Sunstroke**. Throat, sore. Toothache. Typhoid fever. Vertigo. Water brash. Whooping cough. Yellow fever.

HERBAL - In his Helleborism of the Ancients, Hahnemann showed that Verat. was the principal agent used at Anticyra and other places in Greece to produce the evacuations which were regarded as an essential of the "cure." Spring was deemed the most favorable season and autumn the next.

The herbal treatment was employed in diseases including "mental derangements, epilepsy, spasms of the facial muscles, hydrophobia, ptialism of the pancreas, diseases of the spleens, goiter, hidden cancer," etc.

HOMEOPATHIC - Verat. profoundly affects the mind, **nerves**, abdominal, heart, blood, blood vessels, respiration, vertex and diges-

tive system. **Fainting**, from emotions, least exertion, slight injury with hemorrhage after stools, vomiting.

Progressive weakness and emaciation in acute diseases, whooping cough, ague, etc. Sudden sinking of strength. Paralysis after debilitating losses.

Profound prostration, collapse with extreme coldness, blueness and weakness. Post-operative shock with cold sweat on forehead, pale face, rapid, feeble pulse. **Cold perspiration on the forehead** with nearly all complaints. **Vomiting, purging and cramps in limbs**. **Profuse**, violent retching and vomiting. Breath, tongue, cold as ice.

Effects are violent and sudden. Copious evacuations, vomiting, purging, salivation, sweat, or urine. Excessive dryness of all mucus surfaces. Burnings. Blood seems to run cold, blood sepsis, pyemia. Carphology.

Tonic spasms or cramps in chest, bowels, hands, fingers toes, soles of feet with diarrhea. Convulsions caused by religious mania or excitement, also of children.

MIND - Melancholy with stupor and mania. Head hangs down, sits brooding in silence, wants to be alone. Sits in a stupid manner, notices nothing. **Sullen indifference**. Amativeness. Haughtiness.

Remorse. Busy restlessness. Deceitful, never speaks the truth. Despair about position in society, feels very unlucky. **Delusions of impending misfortunes**. Malingering. Anguish, fear of death.

Imaginary diseases. Thinks herself pregnant. Nymphomania, embraces everybody even objects. Kisses everybody, before menses. Puerperal mania.

Religious mania. Despairs of her salvation. Imagines the world on fire. Prays, curses, shrieks in turn. Frenzy of excitement, shrieks, curses. Cursing, howling all night. Insanity. Violent mania alternates with silence and refusal to talk.

Sings, whistles, laughs. Runs from place to place. Delirium with violence, driving to madness, loquacity or lewdness during pain. Mania with desire to cut and tear things (Tarent.). Aimless wandering from home. Talks about the faults of others or scolds.

Swallows his own excrement.

Abdomen - Sinking and empty feeling. **Cold feeling** in abdomen. Epigastrium painful. Pain in abdomen preceding stool. Painful retraction of abdomen during vomiting. Abdomen sensitive to pressure, swollen with terrible colic. Cutting colic as if bowels were twisted in knots with cramps in limbs and rapid prostration. Peritonitis. Intussusception. Reversed peristaltic action. Sensation as if hernia would protrude (Nux-v.). As if hot coals in abdomen.

Back - Neck so weak, child can scarcely keep it erect, worse whooping cough. Pain crampy between scapulae better motion. Bruised feeling in sacral region.

Causations - Post-operative shock. Shock of injury. Ill effects of fright, disappointed love, injured pride or honor. Suppressed rashes. Opium, tobacco, alcohol.

Chest - Spasmodic contraction of muscles of chest. Oppressed chest, with pain in side during an inspiration. Sensation of fullness in chest, which induces frequent belchings.

Constitutions - Suited to the extremes of age, children and old people. For lean, choleric or melancholy persons. Young people and women of a sanguine or nervo-sanguine temperament. People who are habitually cold and deficient in vital reaction. Persons of gay disposition, of fitful mood. Anemic persons.

Ears - Shootings in ears. Pressure and constrictive sensations in ears. Alternate sensation of coldness and heat in ears. Deafness, as from obstruction in ears. Humming with sensitiveness to noise. Roaring in ears, especially when rising from a seat.

Eyes - Surrounded by dark rings. Eyes dull, clouded, yellowish. Staring eyes, turned upwards without luster. The eyeballs are turned upwards. Pain, as if the eyeballs were bruised. Lachrymation with redness. Dry, heavy lids.

Face - **Face very pale, blue, collapsed, cold.** Features sunken. Deathly pale, on rising, bluish, pinched or distorted, frowning cold, terrified look. Cheek red (left), as if burnt. Tearing in cheeks, temples and eyes. Jaws cramp on chewing. Lockjaw. Lips blue, hang down.

Female - Menses too early, too profuse, suppressed. **Dysmenorrhea with coldness**, purging, **cold sweat. Faints from least exertion.** Menorrhagia with nausea, vomiting, diarrhea. Nymphomania, before menses, from disappointed love, unsatisfied passion in lying-in women. Eclampsia. Puerperal mania.

Food - **Thirst for cold water, but is vomited as soon as swallowed.** Craves ice water, wants everything cold or sour, drinks, juicy fruits and salt. **Voracious appetite**, gnawing hunger in spite of nausea and vomiting. Averse to warm food. All fruits disagree, causing painful distention. Potatoes and green vegetables disagree. Better eating meat and drinking milk.

Head - **Cold sweat on forehead** in all complaints. **Sensation of a lump of ice on vertex.** Violent pain driving to despair, better cold. Headaches with nausea, vomiting, pale face, diarrhea, diuresis. Vertex itches during headache. Rubs forehead. Contracted features. Neck too weak to hold head up. As if cold wind blowing through head. Hair bristle, painful.

Heart - Palpitations with anxiety and rapid audible respiration. Visible palpitations with chorea. Weak, cutting at heart. Intermittent, feeble, slow, thready pulse. Intermittent action of heart in feeble persons with some hepatic obstruction. Tobacco heart from chewing. Blood runs like cold water through veins.

Kidneys - Scanty, red brown urine. Thick, greenish, suppressed, involuntary during cough.

Limbs - Brachial neuralgia, paralytic and bruising pain in arms. Fine burning in arms, right to left. Arms feel full and swollen. Tingling in hands and fingers. Feet icy cold. **Cramps in calves** during stools. Sciatica, pains like electric flashes in legs, must sit up and let legs hang down out of bed. Soreness and tenderness of joints. Difficulty in walking, like paralysis from debility. Pains in feet or knees as if heavy stones were tied to parts, must move about.

Lungs - Air seems too hot. Asthma, worse in damp, cold weather, better bending head back. Tickling down throat into lungs. Rattling in chest. Much mucus in bronchial tubes that cannot be coughed up. Coarse rales. Chronic bronchitis in the aged (Hippoz.). Continuous violent cough with retching, worse cold drinks. Neglected whooping cough with complication. Barking cough with belchings, worse warm room. Involuntary urination with cough. Cough on entering warm room from cold air (Bry.). Hollow cough, tickling low down with blue face. Urine escapes when coughing.

Modalities - Children feel better when carried about quickly. Better from warmth, covering, hot drinks. Better lying, walking. Better eating meat, milk. **Worse from drinking**, cold drinks. Worse wet, cold weather, change of weather. Worse at night. **Worse exertion**, touch, pressure. Worse before and during menses. Worse before, during or after stools. Worse fright, during pain. Worse injured pride or honor. Worse opium, tobacco chewing.

Mouth - Dry in center not relieved by water. Salty saliva. Water tastes bitter, like peppermint. Toothache, teeth feel heavy as if filled with lead. Grinding of the teeth. Tongue, cold, pale, cool sensation as from peppermint. Speech lisping, stammering or as if tongue too heavy.

Nose - **Icy coldness of tip of nose and face.** Nose grows more pointed. Smell before nose. Nosebleed from right nostril, only at night in sleep.

Rectum - Diarrhea from drinking cold water on hot days. Constipation from inactivity of rectum with heat and headache. Constipation of babies and when produced by very cold weather. **Large stools with much straining until copious and forcibly evacuated**, followed by great prostration. Evacuations of cholera

morbus and true cholera when vomiting accompanies the purging. Cholera morbus. Cholera infantum. Stools, thin like ribbon, flat. Watery, green, odorless or colorless (rice water) stools, or in large masses with straining, until exhausted with cold sweat.

Sensations - As if he had a bad conscience or had committed a crime. As if she would have to fly away. As if in a dream. As if head would burst. As if heat and cold at same time on scalp. Hair as if electrified. Distress over heart and epigastrium. As if something alive running from stomach into throat. As from ravenous hunger, pain in stomach. As of knives cutting bowels. As of hot coals in abdomen. Sinking, empty feeling in abdomen. As if pregnant or in throes of childbirth. As of knives cutting bowels. Electric pains occur in various parts.

Skin - Blue, cold, clammy, **cold as death**. Skin flabby and without elasticity. Wrinkling of skin of hands and feet. Cold sweat. Skin feels scorched. Dry tetters. Measles, tardy and pale. Nettle rash. Scarlatina in hot weather.

Sleep - Wakes at night trembling. Starts as if frightened. Yawning. Nocturnal sleeplessness with great anguish. Sleep, long, uninterrupted, heavy, too profound. Sleeps with the arms passed over the head. Dreams with frightened waking and a fixed idea that the dream is true, of quarrels. Dreams are anxious, of being bitten by a dog and cannot escape, of being hunted of robbers.

Stomach - Painful, burning at pit of stomach. Hiccough after hot drinks. Cold water brash. **Copious vomiting with nausea, aggravated by drinking and least motion**. Vomits or belches froth. Violent retching. Nausea while eating, cannot get food down without retching. **Cold feeling** in stomach. Gastric irritability with **chronic vomiting** of food. Vomiting, worse drinking and least motion. Great weakness after vomiting.

Temperature - Chill with **extreme coldness** and thirst. **General coldness**, icy, on vertex, nose tongue, mouth, limbs, sweat. Internal heat with cold surface, when drinking. Fevers showing external coldness only.

Throat - Hoarse, weak voice. Loss of voice. Dry, scraping or roughness. When drinking water, it seems to run outside, not going down the esophagus.

Vertigo - Vertigo, especially when walking.

Vertigo with cold sweats on forehead with loss of vision, sudden fainting. Vertigo from opium, abuse of tobacco and alcohol.

COMMENTS - Copious discharges, stools, vomiting, urine, salivation and sweat. Discharges drain the tissues. Exhausting discharges, causing vertigo, blackness before the sight, fainting and collapse. "Rapid sinking of forces, complete prostration, cold sweat and cold breath." Useful for collapse with icy cold sweat (Carb-v.). Fainting from emotions, from the least exertion, from retching, or from stool. Sinking feeling during hemorrhage. "Skin blue, purple, cold, wrinkled, remaining in folds when pinched." "Face hippocratic, nose pointed."

"Hands icy cold." "Face and legs icy cold." "Coldness of the whole body." "Coldness running over whole body soon after taking it." "Continued rigor in back and over arms." "Cold feeling in abdomen."

Coldness predominates in fever, but there is also "heat and redness of face and hands." "Feeling of internal chill ran through him from head to toes of both feet at once." Cold sweats, especially on the forehead.

Cardiac debility, following acute diseases. Thread-like pulse. Low blood pressure. Blood loss, hypovolemic shock. Faints in morning, face red when lying down or sitting up, deadly pale, hands cold, clammy. J. S. Mitchell considered it one of the best heart stimulants in homeopathic doses.

Dryness and burning felt in the nose, mouth, palate, and throat. Pneumonia. Tickling deep in trachea and bronchials. "Tickling in chest, as if it would provoke cough in middle of sternum."

Severe dehydration (Chin.), often associated with heatstroke or sunstroke. Sun headaches or sunstroke. Extreme hunger, craving for cold food and refreshing things. Craves unripe fruit, ice cold drinks, ice cream (Phos.). Great thirst for ice-cold water, during both the chill and heat of fever.

Copious stools. Cholera (Camph. and

Cupr.). Rice-water stools. Watery diarrhea in infants. Green vomit, stool, or urine. Characteristic diarrhea, frequent, greenish, gushing, mixed with flakes.

Cutting colic with cramps commencing in hands and feet and spreading all over. Prostrating after fright, worse least movement with vomiting, cold sweat on forehead during stool followed by prostration. "Violent vomiting with profuse diarrhea."

Characteristic constipation without desire. Large, hard stools, in round black balls from inactive rectum. Frequent desire felt in epigastrium. Painful constipation in infants, children, and women after confinement.

Cramps, convulsions, can be tetanic with lockjaw or epileptic. The eyes are particularly convulsed or the lids paralyzed. There may be vanishing of sight, sparks before the sight, or night-blindness. Neuralgic pains, dysmenorrhea, or migraines, accompanied by diarrhea, vomiting, cold sweat, fainting or prostration.

Delirium and prolonged sleep during fever. Violence in delirium. "Fury: tears his clothing, bites her shoes to pieces and swallows the fragments, cursing, stamping, wants to run away, makes a great noise."

Mental alienation. Insanity. Delusions of personal identity. Exalted, religious or sexual mania. Puerperal mania. Nymphomania, mania for kissing everybody. Delusion that she is pregnant, and she gets physical symptoms from it (pseudocyesis). Destructive mania. Despair and hopelessness, "bowed down with great grief."

Hahnemann said that it has the power "to promote a cure of almost one-third of the insane in lunatic asylums (at all events as a homeopathic intermediate remedy)."

One of the symptoms taken by Hahnemann from Grading is "He swallows his own excrement." Goullon verified this in a case of his in which a child had a craze for eating its own feces or dung lying in the street. Verat. 2c. three times daily, cured in a month.

E. F. Watts had the case of Mrs. C., who had severe nervous headaches for years. Any over-exertion, like riding or working on hot days, would excite them. They frequently began in occiput, settling sometimes in one eye, sometimes in the other. Spig. and Sil. gave no relief.

One day. Watts noticed that the brow contracted and the eyelids nearly closed with the intensity of the pain. Verat. was given and relieved at once.

Gee cured, with one dose of Verat. 200c, the case of Mrs. L., a widow, 43. She had sciatica for four years. Pain sharp, transient, darted upwards and downwards and from both sides to center. Heat, worse "the cooler the better."

Cold sweat with the attacks. Headache from both temples to base of brain, worse by heat. Vertex itched during attacks. Pain compelled her to move about, but no better from motion.

RELATIONS-Antidotedby: (Poisonous doses) Strong coffee, Camph. (pressive pain in head with coldness of body and unconsciousness after). Aeon, (anxious, distracted state with coldness of body or burning in brain.), Chin, (other chronic disorders from abuse of Verat. e.g., daily forenoon fever.), Staph, (most cases. Teste).

Antidote to: Ars., Chin., Cupr. (colic), Op., Tab., removes the bad effects of opium and tobacco. **Compare:** (1) Chin., Verin. - alkaloid from seed of Sabad. - electric pains, electric shocks in muscles, fibrillary twitchings. (2) Cho. - cramps in calves. (3) Camph., Cupr., Ars., Cupr-ar. - intermittent, cold, clammy sweat. (4) Narc-po. - gastro-enteritis with much griping and cutting pain in bowels. Fainting, trembling, cold limbs, small and irregular pulse. (5) Trychosanthes - diarrhea, pain in liver, dizziness after every stool. (6) Agar-em. Agar-ph.

Follows well: Ars., Am., Chin., Cupr., Ip., Camph. (cholera), Am-c., Carb-v. Bov. (in dysmenorrhea with vomiting and purging). Lyc. and Nux-v. in painful constipation of infants. **Followed well by:** Puls., Aeon., Bell., Cham., Rhus-t., Sep., Sulph.

REFERENCES - Boericke. Clarke. Mutphy.

***VERATRUM NIGRUM

(Dark-flowered Veratrum)

PHARMACY - verat-n. Veratrum nigrum. Dark-flowered veratrum. N. O. Melanthaceae. Austria and Siberia. Tincture of fresh leaves

and succulent flower-stalks. **Historical dose:** All potencies.

HOMEOPATHIC - Cooper gave a few observations for Verat-n. The plant, he said, has much the same botanical characters as Verat, but the flowers are dark-colored. It is native to Austria and Siberia. Verat-n. has headaches, protracted menstruation. Tinnitus aurium.

Ears - Constant buzzing of left ear for two weeks with tenderness of meatus and intense sensitiveness of the head to the motion of an omnibus with beclouding of the brain and pain in nape of neck.

Female - Period continually returning, sometimes light-colored and slight in quantity and sometimes profuse with weak feeling in back.

Head - Constant headache when attempting to move or exert the brain. Fierce headache threatening acute mania.

REFERENCES - Clarke.

***VERATRUM VIRIDE

(American Hellebore)

PHARMACY - verat-v. Veratrum viride. American hellebore. Veratrum helonias viridis. Indian Poke. N. O. Melanthaceae of the Liliaceae. Tincture of fresh root gathered in autumn. **Historical dose:** All potencies.

CLINICAL - Amaurosis. Amenorrhea. Asthma. Bunions. Carphology. Cecum. Chilblains. Chorea. Colds. Convulsions. Delirium. Diplopia. Diaphragmitis. Dysmenorrhea. Eclampsia. **Esophagitis.** Esophagus, spasms. Erysipelas. Headaches. **Heart, disorders. Hiccoughs.** Hyperpyrexia. Influenza. Malarial fever. Measles. Meningitis. Menses, suppressed. Muscle, pains. Orchitis. **Pneumonia.** Proctalgia. Puerperal, convulsions. Puerperal mania. **Pupils, dilated.** Sleep, dream filled. Spinal, congestion. Spleen, congested. Strokes. Sunstroke. Typhoid fever. Uremia. Uterus, congestion.

HERBAL - Growing side by side, Verat and Verat-v. are scarcely distinguishable when not in flower. Millsbaugh, however, said that though much like Verat. in its minor points, Verat-v. is strikingly different in general appearance.

Verat-v. having a much more pointed leaf, panicles looser and more compound, the racemes of Verat. being more compact and as a whole cylindrical, those of Verat- v. scattered, compound and craggy. Verat. flourishes in mountain meadows, Verat-v. grows in swamps and wet meadows and along mountain creeks from Canada to the Carolinas.

Through this confusion, an accidental proving of the latter has been included in the pathogenesis of Verat-v. The plants belong to different orders, though it must be admitted there is a close resemblance in their effects. The root of Verat-v. contains Veratrine and the other alkaloids found in the root of Verat., but in different proportions.

HOMEOPATHIC - Burt proved Squibb's liquid extract of Verat-v, and said he found no other preparation satisfactory.

Hinsdale noted that it is known clinically that such diseases as Tiegel's contracture, Thompson's disease, athetosis and muscular paralysis present a symptomatology quite like that produced by Verat-v. upon muscular tissue.

Verat-v. produces **violent congestive** conditions, base of brain, **medulla**, lungs with nausea and vomiting and weakness. Stomach, heart and capillaries are also affected. Congestions, especially to lungs, base of brain with nausea and vomiting. Congestive stage and early manifestations of hepatization in pneumonia.

Twitchings and convulsions, here and there during sleep, jerking and trembling, threatened with convulsions. Chorea, twitching, contortions, unaffected by sleep, froth about the lips. Lies with head low.

Continuous jerking of the head, sexual excitement. Spasms with violent shrieks, opisthotonos, before and after menses. Children tremble as if frightened and on verge of spasm. Furious delirium.

Muscular prostration, pseudo-hypertrophic muscular paralysis. Great prostration. **Sudden effects.** Sudden fainting, prostration, nausea. Fainting, nausea. Erratic motion, staggering. Lowers blood-pressure.

Numbness. Uneasy sensation in the whole body. Effects of sunstroke. Burn-

Veratrum viride ing in different places tongue, pharynx, gullet of skin which is cold with prickling. Zigzag of temperature. As if damp clothing on arms and legs or clothes would not fit him, seemed as if they were scratching him somewhere.

Especially adapted to full-blooded and plethoric persons. **Bloated, lividface.** Rheumatism of heart. Paroxysms of auricular fibrillation. Induces fall of both systolic and diastolic blood pressure. General pulsations. Eclampsia. Verat-v. has a pronounced action on the esophagus, it causes a sort of ruminating action or reversed peristalsis. The least food causes vomiting. **Red streak down the center of the tongue.** Farrington noted it for **esophagitis**. Uremia.

MIND - Loquacity with exaltation of ideas. Suspicious nature. Fear of seeing her physician, of being poisoned. Quarrelsome. Delirium, furious, screams, howls, strikes incessant muttering. Mania, puerperal. Carphology.

Abdomen - Pain above pelvis with soreness. Cutting at navel to groin. Pain in bowels runs into scrotum. Enteritis with high fever.

Back - Aching pain in back of neck and shoulders. Cannot hold the head up. Opisthotonos.

Causations - Sunstroke. Suppressed menses, lochia.

Chest - Burning in chest.

Constitutions - Suited to full-blooded plethoric persons.

Ears - Deafness from moving quickly with faintness. Cold and pale.

Eyes - Wild, staring during delirium. Blood shot. **Pupils dilated.** Vision of red spots, purple, on closing eyes, unsteady. Double vision.

Face - **Face flushed, livid turgid, but becomes faint** on sitting up. Convulsive twitching of facial muscles (Agar.). Tension across malar bones. Chewing motions of the jaw.

Female - Menstrual colic before the appearance of the discharge with strangury. Suppressed menstruation with congestion to head (Bell.). Rigid os (Bell., Gels.). Puerperal fever, convulsions with mania or mania continues after convulsions have ceased.

Food - Very thirsty, drinks little, which ameliorates for a short time.

Head - Head retracted. **Pain from nape of neck**, cannot hold head up. Congestion intense, almost apoplectic. Hot head, bloodshot eyes. Bloated, livid face. Hippocratic face. Sunstroke, head full, throbbing arteries (Bell., Glon., Usn.). Aching on vertex and between eyes. Strokes. Pain up occiput with dim vision and dilated pupils. Constant jerking or nodding of the head (chorea), throbs on raising up. Meningitis, basilar.

Heart - Constant, dull, burning pain in region of heart. Valvular disease. **Beating of pulses throughout body,**

especially in right thigh. Pulse **slow, soft, weak**, irregular intermittent. Rapid pulse, low tension (Tab., Dig.).

Kidneys - Cystitis with fever. Urine scanty with cloudy sediment.

Limbs -Acute rheumatism. Severe pain in joints and muscles. Violent electric-like shocks in limbs. Cramps in legs, feet, soles, fingers toes. Convulsive twitching. Pain about the condyles. Pulsation felt in thighs. Restless hands during delirium. Vesicles on hands.

Lungs - Dyspnea. Difficult breathing. Slow and heavy breathing, as of a load on chest. Congestion of lungs. Pneumonia, with faint feeling in stomach and violent congestion. **Croup.** Violent cough from very start.

Modalities - Better from rubbing, lying with head low. Better eating. Pain in head better by pressure. Closing eyes and resting head helps vertigo. **Worse from raising up**, lying on back. Worse cold, sunstroke, going from warm to cold. Worse morning, on waking, evening. Worse after confinement. Motion aggravates, sudden motion causes faintness and blindness. Walking causes blindness. Lying down aggravates headache, breathing.

Mouth - Taste like musty odor. Odor from mouth like chloroform or ether. Foul. Increased saliva. Mouth feels as if scalded. Drawn at one corner.

Nose - Pinched and blue. Rapid and continued sneezing with warm biting feeling in mouth.

Rectum - Tenesmus and burning in rectum, better during and after stools.

Sensations - Confused feeling in head as if head would burst. Tongue as if scalded. As if a ball rising into esophagus. As if stomach tightly drawn against spine. As of a load on chest. As of galvanic shocks in limbs. As if damp clothing on arms and legs. As if boiling water poured over parts. As if ankles distorted.

Skin - Hot sweating. Tingling and prickling in skin. Cold, clammy, bluish. Erysipelas with brain symptoms. Erythema. Itching in different parts better rubbing.

Sleep - Sleeplessness. Dreams of drowning of being on water. Coma.

Stomach - Gastritis. Burning in stomach and esophagus. Stomach seems to press against the spine. Constrictive pain increased by warm drinks. **Hiccoughs**, excessive and painful **with spasms of esophagus**. Nausea and vomiting. Vomiting, violent without nausea. Smallest quantity of food or drink immediately rejected.

Temperature - Hyperpyrexia or rapidly oscillating temperature with sweat. Cold clammy or hot sweat. Cerebrospinal, suppurative, acute rheumatic, fever. Fever high in the evening, below normal in the morning. Suppurative fevers with great variation of temperature.

Throat - Burning in gullet, esophagitis. As if as ball rising in.

Tongue - Tongue, white as if bleached. **Tongue dry with red streak down center.**

Vertigo - Vertigo with nausea and sudden prostration, better closing eyes and resting head.

COMMENTS - Hale was instrumental in introducing Verat-v. to homeopathy, using it in fevers and particularly in pneumonia.

Burt made a heroic proving of the liquid extract and his infant daughter (twenty-one months) very nearly died from taking a few drops of the tincture from a phial.

In two minutes she began vomiting. Coffee and camphor were given as antidotes. In five minutes her jaws were rigid, pupils widely dilated, face blue, hands and feet cold, no pulse at wrist.

Her abdomen and back were rubbed with camphor, when she went into spasms with violent shrieks. These spasms were frequently repeated, a hot path being most effective in relaxing the muscles.

Vomiting ropy mucus kept up for three hours. Pulseless, hands and feet shriveled. After three and a half hours she slept quietly and soundly and next morning was well but a little weak.

The congestive symptoms and also of nausea and vomiting, form one of the leading indications of Verat-v. in a great variety of cases. Sensations of fullness. "Head feels full and heavy, rush of blood to the head, face flushed, buzzing in the ears, chest constricted or oppressed as from a heavy load," point to the congestive tendency.

Congestion at the base of brain, chest, spine, stomach. Slowing of the heart's action is a leading effect of the provings (from its action on the heart muscle and cardiac ganglia Dig. on the pneumogastric). Violent pains attending inflammation. Head full, throbbing of arteries, sensitive to sound, double or partial vision.

Chorea, "twitchings during sleep." "Constant jerking or nodding of the head, jerking and trembling. Threatened with convulsions," are other leading symptoms. Puerperal convulsions, Verat-v. has only succeeded when nauseating doses have been given.

Used locally and internally in muscular and joint rheumatism, and in chorea an application to the spine of the tincture, diluted with spirit, has proved a serviceable adjunct.

Verat-v. has been used to "knock down" fever in the same way as Aeon. Nash pointed out that there is some risk in this. When Verat-v. was first introduced he used it largely and successfully in a number of cases, but in one case which appeared to be going on favorably, the patient died suddenly. This he attributed to the Verat-

V.

D. McLellan was sent for in the middle of the night to see an old woman Whom he found sitting up in bed gasping for breath and blue. Rapid congestion of the lungs had occurred. The attack had come on suddenly. Verat-v. quickly rescued the patient from a condition of imminent peril.

Clarke with the 30c, cured a man, 56 of dim sight as if scales over it, numbness, pain in head as if a tight band were around it, rush of blood to head, sleeplessness. Dreaming about water is a characteristic which he has confirmed.

RELATIONS - Antidoted by: Hot coffee. **Antidote to:** Strychnine, use fluid extract, 20-40 drops. **Compare:** (1) Puerperal convulsions, Gels, has dull, drowsy state of mind. (2) Verat-v., apoplectic condition between the fits, face red, eyes congested, violent convulsive twitches. (3) Congestions, Ferr-p., Bell. (4) Plethora, Aeon. (5) Chorea, Hyos. (6) Pneumonia with engorgement, Sang. (Verat-v. more marked arterial tension). (7) Scalded tongue, Sang. (8) Tetanus, Nux-v., Hyper. (9) Rheumatic fever, Bry., Sal-ac. (10) Sunstroke, double or partial vision. Glon., Gels.

REFERENCES - Boericke. Clarke.

*****VERBASCUM THAPSUS**

(Mullein Oil)

PHARMACY - verb. Verbascumthapsus. Mullein oil. Verbascumthapsiforme. Oleum mullein. Great Mullein. N. O. Scrophulariaceae. Tincture of fresh plant at the commencement of flowering. To prepare mullein oil, fill a bottle with the blossoms from the Verbascum thapsus, cork it tight and hang in the sun for four or five weeks. By that time there will be an oily liquid distilled. Mix with ten percent of alcohol. Tincture of the whole plant beginning to flower. **Historical dose:** Tincture and all potencies.

CLINICAL - Anus, itching. **Bedwetting.** Colic. Constipation. Cough. **Deafness. Ear, pain.** Hemorrhoids. **Hoarseness.** Neuralgia. Prosopalgia. Tumors. Urinary, incontinence.

HERBAL - The Treasury of Botany said, "The thick woolly leaves of Verbascum thapsus, the Great Mullein, have a mucilaginous, bitter taste and a decoction of them is employed in domestic practice in catarrhs and diarrhea.

"The leaves are also used as emollient

applications to hard tumors and in pulmonary complaints in cattle hence one of its popular names is Bullock's Lung-wort. It is also called Adam's flannel from its flannellike leaves."

Among its traditional uses Gerarde mentioned it as a remedy for hemorrhoids and as applications for itching hemorrhoids or anal itching. An ointment is made of the tincture. Gerarde said that the oil of the yellow flowers is also curative in hemorrhoids.

The flowers contain, according to Millspaugh, "A yellow volatile oil and fatty acid, free malic and phosphoric acids and their ate salts of lime, a yellow resinous coloring matter and the general plant constituents including an uncrystallisable sugar." An oil prepared from the flowers has been found useful locally in cases of **deafness or earache.**

HOMEOPATHIC - Verb, has a pronounced action on the inferior maxillary branch of the fifth pair of the cranial nerves, on the ear and respiratory tract and bladder.

Catarrhs and colds with **periodical prosopalgia**, spasmodic effects, neuralgias. Nervous and bronchial coughs. Urinary irritation. Tearing, stitching, cramping squeezing, crushing, paralyzing pains. Intermittent pains.

Abdomen - As of a lump or twisting around navel. Incessant gurgling and rumbling beneath left ribs. Inflation of the abdomen, violent and painful pressure on navel. Pinchings and gripings in abdomen.

Back - Lancinations in the back and shoulder blades. Sharp intermittent stitches in left scapula. Backache worse from pressure.

Chest - Shooting in chest, sometimes with oppression and obstructed respiration. Stitch :s in the chest. Red nodosity near xiphoid cartilage, painful when pressed upon.

Ears-Earache. Numbness in left ear. Otaglia with a sense of obstruction. Deafness from getting water in, as in swimming or as if stopped by a valve. Dry, scaly condition of meatus (locally).

Eyes - Pains in eyes, as from contraction of the sockets with burning in eyes. Sight confused, as if directed through a veil.

Face - Neuralgia affecting zygoma, temporo-maxillary joint and ear (Meny.), particularly of left side with lachrymation, coryza and sensation **as if parts were crushed with tongs.** Talking, sneezing and change of temperature aggravate the pains, also, pressing teeth together. Pains seem to come in flashes, excited by least movement, occurring periodically at same hour in morning and afternoon each day.

Food - Mawkish taste with fetid breath. Hunger without relish for food. Insatiable thirst.

Kidneys - Increased urine with pressure in bladder. Burning urination. Constant dribbling. **Bedwetting**, at night, worse coughing.

Limbs - Stitching in the limbs. Stiffness and **soreness of joints of lower limbs**. Lower limbs feel heavy. Cramp-like pain in soles, right foot and knee. Neuralgic pain in left ankle. Thumb feels numb.

Lungs - Asthma. Catarrh with hoarseness and stuffed chest. Frequent attacks of deep, hollow cough with sound like a trumpet, better deep breathing. Soreness in pharynx, cough during sleep. Dry, hoarse cough worse at night. Cough, nervous without waking.

Male - Pollutions without lewd dreams.

Modalities - Better from taking deep inspirations. Worse touch, pressure. Worse cold, drafts, change of temperature. Worse from stooping, walking, talking. Worse sneezing, biting hard (inferior dental nerve). Worse 9 a.m. to 4 p.m., twice a day, at same hour.

Mouth - Copious accumulation of **salty saliva** in the mouth. Root of tongue brown. Tongue of abrownish yellow color, loaded with viscid mucus in morning and after dinner.

Nose - Profuse coryza from frontal sinuses with hot, burning, profuse lachrymation. Sensation of stoppage of larynx and ears.

Rectum - Many bowel movements a day with twisting about navel. Feces hard like sheep-dung and expelled with effort. Fearful diarrhea. Hemorrhoids, obstructing stools, itching and inflamed. Inflamed and painful hemorrhoids. Pain extends deep down, causing contraction of anal sphincter.

Sensations - As if everything would press out at forehead. As if temples were pinched and crushed. As if ears were stopped up. As if something had fallen before ear. As if left ramus of jaw were pressed against upper jaw. As if nose and larynx were stopped up. As if intestines were adherent to wall of abdomen and were being torn away. As of a twist around navel. As if cold water were poured over side of body from shoulder to thigh.

Sleep - Strong disposition to sleep after a meal. Disturbed sleep, at night with tossing. Short sleep at night, lasting only until 4 a.m. with anxious, frightful dreams of wars and dead bodies.

Stomach - Aching of stomach. Sensation of emptiness at pit of stomach, which disappears with a rumbling below left ribs. Frequent hiccough. Regurgitation of insipid serum. Empty or else bitter risings with nausea.

Temperature - Internal coldness of whole body of hands and feet, perceptible also externally. Shuddering, especially on one side of body, as if it were bathed in cold water.

Throat - Very severe pain in throat on swallowing. **Hoarseness**, voice deep, harsh, sounds like a trumpet, **"bassoprofundo."** Sensation of obstruction in the larynx.

Vertigo - Vertigo when pressing one cheek while supporting the head. Vertigo sudden, as from pressure on whole head.

COMMENTS - Mullein oil is used, locally, for earache and dry, scaly condition of meatus. Also for teasing cough at night or lying down. Bedwetting, five-drop doses night and morning

Cushing introduced this now rather well-known remedy to the medical profession in 1884. He wrote "My father's house was the home for all poor tramps, as well as ministers, etc. He fell into the river, got water in his ears and was quite deaf for months.

"A blind man had called, heard loud conversation, asked the cause, etc., then said for kindness received he would tell us how

Verbascum thapsus to make something that would surely cure him and it was worth a thousand dollars in New York City.

"We made the oil, put it in his ears at night and he was well in the morning. For years we kept a bottle of it and it traveled all around the towns and did wonders. That was when I was a youngster."

Hering, in "Hearing and Ears," noticed "In Germany flowers of Verbascum thapsus put in a dark-colored bottle, hung up in the sunlight, give in two or three weeks an oily fluid which has cured many old people and children."

Hahnemann proved Verb, and his proving confirmed many of the old uses. It produced neuralgic pains of very great intensity, pressing and sharp and especially in the facial bones, navel and limbs and a peculiar cough.

Chronic dermatitis of the external meatus and drumhead or exfoliation after furuncle. Catarrhal inflammation of the tympanum Suppurative disease of the tympanum. Accumulations of debris in the case of perforation, scarred eardrum. Chronic inflammation of the eyes. Chilblains. Burns.

Nash described a "Cough, deep, hollow, hoarse in sound like a trumpet." He cured many cases and always used it low. It is more especially a night cough. It occurs in children during their sleep.

Mullein was used as a popular specific for tuberculosis, the leaves being boiled in milk, which was then strained and given warm.

W. B. McCoy gave several illustrations. According to him Verb, (i.e., the "oil") has a "soothing effect on the entire nervous system in many cases acting as a soporific."

In summer diarrhea he gave one to four drops in two ounces of warm water, a teaspoonful every hour. In

bedwetting or dribbling of urine one-drop doses in warm water three or four times a day.

Among his cases were those of two boys who had become deaf from getting water in their ears when swimming. They were cured by having three drops of the oil instilled "in each ear alternately night and morning." O. S. Laws cured a youth of 16 of bed-wetting with fifteen drops of the oils three times a day.

The oil plainly acts on the indications of the proving and may be regarded as an alternative preparation to the official tincture. It might be called *Verbasci oleum*.

Mr. Kemmis spent a large amount of money treating with various physicians for what they pronounced a rose cancer and without any relief. An Indian woman told him to use mullein oil. He distilled it (by sun exposure) and for a short time bathed the cancer with the oil.

The growth of cancer was permanently checked, but it was not healed. Mr. K. lived, perhaps, forty years after the treatment was used and the cancer never again bothered him.

RELATIONS - Compare: (1) *Rhus-a.*, *Caust.*, *Plat.*, *Sphing.* - pain in zygoma. (2) in neuralgia. *Plat.* - pressure, *Stann.* - gradually increasing and decreasing. (3) Deep cough, *Cor-r.*, *Dros.*, *Spong.*, *Sulph.* (4) Sheep-dung stools, *Mag-m.* (5) Cough from tickling in chest, *Verat.*

*****VERBENA HASTATA**

(Blue Vervain)

PHARMACY - *verbe-h.* *Verbena hastata*. Blue Vervain. Ironweed. Vervain. Tincture of entire fresh plant. N. O. *Verbenaceae*. **Historical dose:** Tincture and all potencies.

CLINICAL - Depression. **Epilepsy.** Insomnia. Intermittent, fever. Mental, exhaustion. Poison oak.

HERBAL - *Verbena*, in the form of a tea as a diuretic drink, is used by Vannier to aid elimination in tuberculosis cases. In epilepsy it must be continued for a long time.

HOMEOPATHIC - *Verbe-h.* affects the skin and **nervous system**. Nervous depression, weakness and irritation and spasms. Promotes the absorption of blood and allays pain in bruises. Passive congestion.

Epilepsy, insomnia, mental exhaustion. In epilepsy, **it brightens up the patient's mental powers** and helps the constipation. Intermittent fever. Poison-oak. Vesicular erysipelas.

COMMENTS - Anshutz reported "An extract from a paper by Dr. J. N. White, Queen City, Texas, detailing at length the case of a five- year old boy, who after six weeks of whooping cough, developed epileptic symptoms, having as high as twelve spasms in twenty-four hours.

"After two months of treatment with such remedies as *Sol-c.*, *Sulfonal*, *Hyos.*, *Cann- i.*, *Calomel*, *Zinc.*, etc. with no results, the cases was given *Verbena*.

"Another doctor was in consultation and we quote: I told my friend (the Doctor) that when he became satisfied with the zinc treatment, I wanted to try another eclectic remedy. (The Doctor was an allopath). He was perfectly willing and I put him on *Verbena hastata* tincture, twelve drops, every four hours, skipping the dose at midnight.

"After we both took the case we decided, as there were no curative properties in the *sulfonal*, we would drop it and not use anything to control the paroxysms. Consequently the boy seemed to get worse to the parents, as now he would have several falling spells a day.

"From the first dose of the *Verbena hastata* the boy began to improve. He would have contractions of the muscles of the arms and legs and look wild for a minute or more for the first week, but after that he never had another symptom. We kept him on the medicine, as above, for six weeks and now he takes twelve drops three times a day.

"He has not had any symptom in over two months and all that wild vacant look is gone and he plays, eats, sleeps, etc., as if he had never been troubled with epilepsy."

REFERENCES - Anshutz. Boericke.

*****VERONAL**

PHARMACY - *veronal*. *Veronal*. A dangerous drug made by the action of alcohol upon urea and contains the same radical that alcohol does. **Historical dose:** All potencies.

HOMEOPATHIC - Confluent, reddish spots, dermatitis. Itching of glans and prepuce. Circumscribed dermatitis patch on first metacarpal phalangeal joint. Dr. V arney noted staggering, cannot stand up. *Veronal* makes a man just as drunk as pure alcohol.

RELATIONS - Compare: (1) *Chlol.*

REFERENCES - Boericke.

*****VERONICA OFFICINALIS**

(Common Speedwell)

PHARMACY- vero-o. Veronica officinalis. Common speedwell. N.O. Scrophulariaceae. **Historical dose:** All potencies.

HOMEOPATHIC - Perspiration at night. Perspiration followed by chills and cold sweats after uncovering. Sleepless at night and desire for naps during the day. Desire to sleep on the right side. Worse right side. Sense of fatigue and lethargy. Weakness, worse missing a meal.

Skin eruptions, red and itching violently. Worse evening, exposure to dampness. Tingling sensation throughout body. Sensation of heat. Dramatic increase in energy, increased clarity of thinking.

Dryness. Sensation of cotton in mouth. Numb sensation in gums, as if having received anesthesia. Burning pain in stomach as from heartburn. Worse beginning to eat. Increased or lost appetite. Increased thirst. Better eructations.

MIND-Great mental anxiety. Mental confusion and a sense of being overwhelmed, alternates with clarity of thinking. Irritability, particularly with alternating moods. Desire for husband. Homesickness. Detached feeling. Delusion that people are distant, that the body is vibrating. Delusion of having smoked marijuana.

Abdomen - Abdomen pain, better rubbing.

Back - Stiffness in lumbar region, worse standing. Pain in cervical region, worse cold.

Cough - Persistent bronchial cough with little or no mucus production.

Ears - Hears popping noises, ringing.

Eyes - Heaviness of eyelids. Pain in right eye, worse touch.

Female - Dark brown, mucus-like discharge during ovulation. Sexual desire decreased or increased.

Food - Desires sweets.

Veronica officinalis Limbs - Sharp pain in hips. Perspiration of palms of hands.

Modalities - Worse afternoon, 4 p.m. to 7 p.m.

Nose - Tingling in sinuses.

Rectum - Urging followed by loose stool. Stool, odor of rotten eggs or sulphur.

Sleep - Dreams of smoking cigarettes. Dreams of riding horses, of snakes.

Throat - Sensation of pinpricks, extending to whole throat. **Sore throat.** Skin in external throat around thyroid sensitive to pressure. Fleeting prickling sensation in trachea.

REFERENCES - Riley.

***VERVAIN

(Bach Flower Essence)

PHARMACY - verv-b. Vervain. Verbena officinalis. Bach Flower Essence. The flowering branches are put in a bowl of sunlit water and left to the sun's action for several hours. Subsequently, the water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Verv-b. belongs to Bach's group of **Over-Care for Other's Welfare**, along with Rck-w-b., Beech-b., Vine-b. and Chic-b. Verv-b treats states of over-enthusiasm which lead to exaggerated attempts to convert others to one's own views. Escalating tension and excessive drive of willpower. Gradual depletion of reserves. Manic and catatonic states (Cher- p-b., Imp-b.). Hyperthyroidism.

MIND - Enthusiastic, fixed ideas. Fervency and fanaticism. Excitability, impressionability and quickly aroused motivation and fondness for others. Excessive joy, exaggerated, unbalanced emotions of love and friendship. Extreme disgust and rejection. Hysterical mood swings. Political fanaticism and outbursts of violence. Self-righteous.

Manic states within mental illness. Bipolar disorders and problems with impulse control (Cher-p-b., Holly, Imp-b.). Obsessive-compulsive disorders. Delusions and psychoses with excessive fervency, ecstasy (Clem-b.) and mania.

REFERENCES Bach.

***VESICARIA COMMUNIS

PHARMACY - vesi. Vesicaria communis. N. O. Cruciferae. Alyssineae. Tincture of whole fresh plant.

Historical dose: Tincture and all potencies.

CLINICAL - Albuminuria. Bladder, pain. **Cystitis.** Dropsy. Gleet. Gonorrhea. Gravel. Hematuria. **Kidney, pain.** Prostatitis.

HERBAL - According to the Treasury of Botany, Vesicaria is a genus of Cruciferae, natives of the Northern Hemisphere, distinguished by the globose or oboid inflated pouch with hemispherical valves and numerous

seeds (generally four to six) in each cell. They are herbs, sometimes shrubby at the base with oblong or linear entire or ripened leaves and terminal racemes of yellow flowers.

The *Vesicaria communis* tincture is prepared from the whole plant collected fresh. It has been an old home remedy in various parts of Germany for various forms of urinary troubles attendant on gonorrhea, gravel, cystitis, nephralgia, prostatitis etc.

HOMEOPATHIC - George R. Shafter found nephralgia, acute cystitis, irritable bladder, following acute cystitis, and chronic cystitis. particularly amenable to Vesi. Its main *indication is a great burning and smarting in urethra* with a frequent desire to pass urine. Marked strangury (Thlaspi., Berb., Sars., Chim. and Canth.).

COMMENTS - Shafter recorded many cases, including that of T. S., age 67, who suffered from kidney pain, for which he had received morphine injections in former attacks. Vesi. in 15 drop doses every fifteen minutes, gave marked relief in two hours, which in six hours was complete.

S. B., age 57, had cystitis from cold, high fever, eating, burning pain on voiding urine, which was drop by drop. Vesi. tincture in 10 drop doses, cured in two days.

A woman, age 39, had pain in her back, brick-dust sediment in urine, hands and feet swelling so she could hardly close her hands or walk. Vesi. tincture cured.

Man, age 65, with an irritable bladder, had to rise twenty to thirty times in the night. Vesi. tincture in 20-drop doses, relieved quickly and cured in six weeks.

C. M., 89, chronic cystitis, passing large quantities of mucus, pus. The bladder was at first washed out with boric acid solution, then Vesi. tincture 20 drops every two hours, were given. Improvement followed and in two hours the boric acid washing was stopped and Vesic. given every four hours. This finally cured.

Gonorrhea with smarting and burning on urination and thick creamy discharge. Vesi. tincture a drachm every four hours, soon cured. Gonorrhea, female after being treated for two weeks with injections, was cured in seven days with Vesi. tincture in drachm doses.

Cowperthwaite succeeded in causing albumen to disappear from the urine even in cases of actual Bright's disease. He added that "it is necessary to use only the imported [i.e., European] tincture, 15 drops every four hours" (There are several *Vesicarias* native to North America).

A. L. Davison treated Mrs. P. for general dropsy of a year's standing, was in uremic spasms when first seen, the kidneys having ceased to secrete urine. Vesi. tincture was prescribed, 15 drops in a teaspoonful of water every hour until urine was freely secreted, then three times a day. The second day the kidneys were pouring out urine and watery stools were passed. In a week all dropsy had disappeared.

Bancroft treated Mrs. T. for irritable kidneys and bladder with polyuria. After a time the urine became bloody with occasional thin clots. Previously there had been for some months a thick, yellow sediment. Vesi. tincture, 6 drops four times a day and later 15 drops three times a day, taken persistently, effected a cure.

Halbert reported the case of Mr. H., a young man whose occupation involved much outdoor exercise and who contracted a chill and had lumbago in consequence. Under an "orificial" surgeon his rectum was operated on and the sphincter stretched.

Thereafter he had fever, rigors and acute prostatitis. Urination was painful and difficult and soon hematuria ensued. The pain and nervous exhaustion were so extreme that he was put into hospital and for a time only relieved by injections of morphine. The urine contained albumen, blood-clots, much pus. Urine was only passed by means of the catheter and defecation was extremely painful.

Vesi. lx was given hourly and great relief followed. The painful tenesmus was alleviated and he was soon able to pass urine without the catheter. In three weeks he was able to go home.

Shafer gave Cact. and Thlaspi. in a case of dropsy from heart disease in a woman, age 48. These gave little relief. He then gave Vesi. in combination with the others. There was marked relief in twenty-four hours and in ten days the dropsy had disappeared.

RELATIONS - Compare: (1) Thlaspi, Berb., Sars., Chim. and Canth. (2) In Gravel, Coc- c., Urt-u., Thlaspi. (3) Hematuria, Chin-s., Fic., Phos. (4) Prostatic affections, Hydrang., Solid., Sabal. (5) Cystitis, Chim.

Compatible: Cact., Thlaspi.

***VESPA CRABRO

(Wasp)

PHARMACY - vesp. *Vespa crabro*. Wasp. *Vespa maculata*. *Vespa vulgaris*. European hornet. Giant hornet. Yellow-jacket. American hornet. N. O. Hymenoptera, Sub-order Vespidae. Tincture of the insects. **Historical dose:** All potencies.

CLINICAL - Abscesses, multiple. Alopecia. Bee stings. Bedwetting. **Boils**. Cervix, ulcerated. **Chemosis**.

Edema. Erythema. Fainting. Flushing. Glottis, spasm. Indigestion. Ophthalmia. Ovary, pain. Quinsy. Tongue, swelling. Uterus, ulcerated. Vertigo.

HOMEOPATHIC - The symptoms are mostly the results of stings although Berridge proved Vesp. 30c on three persons. The symptoms included low spirits, pain in right ear, nausea

Vespa crabro with faint feeling and trembling, pain in left side of the neck on waking.

Stinging, burning pains, as if pierced with red hot needles. Stinging piercing deeply, as if a hook were pulled out. Sudden stinging and burning in cheek. Burning of the part, then swelling, red with burning pain. Sudden tearing. Indurated feeling.

Cutting like electric shocks through all joints. Arm, head and face swollen. Eyes red and twitching. Red lines along absorbents. Itching over whole body. Insensibility. Vasomotor symptoms of skin and mucus membranes. Nerve and muscular excitement. Trembling, quaking with chattering of teeth. Convulsions, loss of consciousness, does not answer when spoken to, looks into space, has no recollection of the attack.

Dizzy, better lying on back. Faintness, all day with trembling and nausea. Numbness and blindness. Pulse slow, heart's action scarcely perceptible. Feeling as if dying at night. Heat especially overpowers him. Feet were cold except in summer, when they burned uncomfortably. Perspiration on parts laid on with itching. Axillary glands swollen with soreness of upper arms.

Nausea and vomiting, followed by creeping chills from feet upward. Cramping pain in bowels. Frequent urination. Weakness with bedwetting. Pain in sacrum extending up back. Disorders of left ovary with tenderness.

MIND - Terrible anxiety. Low-spirited. Insensibility. Unconsciousness with inability to move.

Abdomen - Uneasiness in abdomen.

Back - Pain in left side of neck, waking her at night, preventing her from turning it to left side, felt least when lying on back, best on right side. Pain in scapula with soreness.

Ears - Sticking deep in right ear. Purulent catarrh of middle ears.

Eyes - Injection of right conjunctiva. **Chemosis of conjunctiva.** Inflammation of right eye with baggy swelling of conjunctiva. Itching of right lid in evening with swelling afterwards pain in lid and ball. Erysipelatous inflammation of lid, whole side of face painful and swollen.

Face - Pain in cheek as if pierced with red- hot needles, suddenly awakening him from sleep and recurring periodically. Painful and swollen. Erysipelatous inflammation of lids. Swelling of mouth and throat with violent burning pains. Face livid. Face smooth, dark red, bloated. Anxious look.

Female - Menstruation, preceded by pain, pressure, depression and constipation. Menses intermittent, sometimes brown, accompanied by pain and flatulence, preceded by mental depression, pain, pressure and constipation. **Left ovary markedly affected with frequent burning, urination**, sacral pains extending up back. **Erosion around external os.** Pain in left ovarian region. An irritable ulcer surrounded os tincae. Irritation, worse in groin, passing into pudenda.

Head - Fainting and loss of consciousness. A violent heat came over him, felt sick, then turned giddy and spun around and around like a top until he fell, staggered to the house, got into a chair in a moment, fell out of it, almost fainting, dashed water into his face, at length was able to lie down on his bed. Headache. Face and head swollen and inflamed. Alopecia.

Heart - Aching in heart. Slow beating of heart, almost imperceptible. Pulse rapid and small, feeble, with violent beating of carotids.

Kidneys - Marked tenderness to deep pressure in kidney region. Remittent dysuria with backache. **Burning pain** with urination, also itching. Burning urination in women. Hematuria. Incessant bedwetting.

Limbs - Pain in shoulder, axillary glands swollen. Sprained pain in left shoulder joint on moving it, worse lifting arm or twisting it. Aching in hand and arm.

Lungs - Dyspnea. Respiration hurried. Hoarseness. Voice lost. Spasm of glottis (after application of diluted ammonia to tongue), face pale, drops of sweat on forehead, arms thrown out to gasp for air, he got out of bed, sank back on bed, face livid, breath and pulse stopped.

Male - Swelling of scrotum and penis.

Modalities - Better from cold washing of hands. Cold water first relieves then aggravates. Skin better by bathing with vinegar. Worse from hot stove, in a closed room. Worse after sleep, after eating. Worse by motion. Open air aggravates lachrymation.

Mouth - Tongue swollen and tense, swelling below chin, between that and hyoid bone, pain in a point in middle line of tongue, swollen, red, rounded, filled the mouth, immovable, could not speak, only mumbled, swallowing was painful and difficult. Swelling of palate with inflammation. Peculiar taste, as when a nest of wasps is disturbed, worse heat.

Sensations - As if a harpoon were sticking deep in and were drawn on. As if pierced with red-hot needles. As

if a cutting instrument were piercing all joints like an electric shock. Cold, chilly sensation around sting. As if left shoulder joint were sprained. As if about to suffocate. As if dying.

Skin - Erythema intense itching, burning. **Boils**, stinging and soreness, **relieved by bathing with vinegar**. Wheals, macules and swellings with burning, stinging and soreness. Erythema multiforme.

Sleep - Night restless. Sleepless all night.

Stomach - Cold feeling in stomach. Heat in stomach. Indigestion with flushing. Belchings. Nausea in evening after coming indoors with weight in stomach with faint feeling and trembling. Vomiting with swelling of head.

Throat - Swelling of throat, soreness, heat of throat. Hypertrophied tonsils which secreted a cheesy matter. Pharyngeal varicosis.

Vertigo - Fainting, loss of consciousness. **COMMENTS** - W. Rowbotham was stung on the right cheek. The next day, about 4 a.m., he was suddenly awakened by burning, stinging pain in cheek, "as if pierced with red-hot needles" and soreness and smarting along the lymphatics. After bathing the face he got to sleep and was again suddenly awakened by the pain two hours later, which recurred periodically in paroxysm, throughout the day.

Burnett observed a case of a sting on the tongue in a woman. The tongue entirely filled the buccal cavity. The patient's appearance was exactly like one suffering from severe synanche. The swelling was diffuse and deep-seated. There was not much redness.

Berridge demonstrated that the poison of the hornet and the wasp may answer to each other's indications. He cured with Vesp. 100,000c. (Fincke) a symptom produced by *Vespa vulgaris*, namely, chemosis of the right eye.

Mr. X. age 66, had his right eye inflamed for six days. When seen there was redness of right lower lid, baggy swelling of conjunctiva partly covering the cornea when pressed upward, lachrymation of right eye worse in open air, right lids adhere in morning. Vesp. three times daily cured in a few days.

E. T. Blake cured with Vesp. face swollen and puffy, skin transparent and blanched, scalding urine followed by itching, itching of right arm.

Blake also related the case of Miss C. J., who at the age of thirty-one was stung on the left thumb, through some calico and . was never well after, dying at the age of thirty-eight. She was prone to constipation all her life and at twenty-three had "congestion of the left lung." Most of the abdominal, urinary, ovarian and uterine symptoms were hers. Among the latter was an irritable ulcer.

RELATIONS - Antidote: Semp., locally. **Antidoted by:** Apis, Led., Camph., salt water, vinegar. **Compare:** (1) Scorp. - sahvation, strabismus, tetanus, Apis. (2) pains as if pierced with red-hot needles, Ars., Apis. (3) Ulcers around os uterus, Mitch., Eup-pur., Apis., Hydre. **Incompatible:** Arg-n.

REFERENCES - Boericke. Clarke.

***VIAGRA

(Sildenafil Citrate)

PHARMACY - viag. Viagra. Sildenafil citrate. An allopathic drug. **Historical dose:** All potencies.

CLINICAL - Allergic, reactions. Angina

pectoris. Arthritis. Asthma. **Blindness.** Cataracts. Chest, pain. Chills. Circulation, disorders. Coughs. Depression. Diarrhea. Diplopia. Edema. **Erectile, dysfunction.** **Eye, disorders.** **Facial, flushing.** Fainting. **Genital, problems.** Gout. Headaches. Hemorrhages. **Heart, disorders.** Hypertension. Hypotension. **Impotency.** Indigestion. Insomnia. Migraines. Numbness. Photophobia. **Retina, bleeding.** Seizures. Sexual, disorders. Sinusitis. Strokes. Thrombosis. Tremors. Ulcers. **Vision, disorders.** Vertigo.

HOMEOPATHIC - Viagra, used for male impotence, works by dilating blood vessels in the penis, allowing the inflow of blood needed for an erection. Viagra causes erections only during sexual excitement. It does not work in the absence of arousal.

Heart attack, stroke, heart irregularities, dangerous surges in blood pressure, and sudden death have all been reported after use of Viagra, usually in men with existing cardiac risk factors, and typically during or shortly after sex.

Allergic reactions. Chills. Dizziness. Drowsiness. Fainting, falling. Muscle ache. Joint disease. Bone pain. Numbness. Coordination problems. Slow reflexes. Tremors. Seizures. Strokes. Flushing. Thrombosis. Insomnia. Gout. Diabetes. Sinus and throat inflammation.

MIND - Emotional and mental disturbances. Anxiety. Depression. Abnormal dreams.

Abdomen - Abdominal pain. Colitis. Intestinal inflammation. Gastroenteritis.

Bladder - Cystitis. Urinary tract infection. Loss of bladder control. Urinary incontinence. Increased night-time urination.

Chest - Angina pectoris. Breast enlargement.

Ears - Tinnitus. Ringing in the ears. Deafness. Ear pain.

Eyes - Dry eyes. Bloodshot eyes. Increased pressure in the eyes. Eye inflammation and pain. **Retinal bleeding**. Cataracts. Dilated pupils. Photophobia. Sensitivity to light. **Floaters**.

Face - **Facial flushing**. Edema.

Female - Vaginal dryness. Anorgasmia. **Head** - **Headaches**. Migraine headaches. Cerebral thrombosis.

Heart - Angina pectoris. **Heart problems**. Cardiomyopathy. Heart failure. Hypotension. Low blood pressure. Rapid or throbbing heartbeats. Tachycardia, palpitation. Myocardial ischemia.

Lungs - Dyspnea. Breathing difficulty. Asthma. Coughs. Lung inflammation. Bronchitis, sputum increased.

Male - Genital problems. **Erectile dysfunction**. Painful erection. **Prolonged erections**. Abnormal ejaculation. Anorgasmia. **Impotency**.

Mouth - Dry mouth. Difficulty swallowing. Gum inflammation. Stomatitis.

Nerves - Ataxia. Hypertonia. Neuralgias. Paresthesia. Tremors, reflexes increased. Hypesthesia.

Nose - **Nasal congestion**. Sinusitis. Nosebleeds.

Rectum - Diarrhea. Rectal bleeding.

Skin - Raised skin patches. Itchy skin. Contact dermatitis. Rashes. Ulcers. Urticaria. Herpes simplex. Sweating.

Sleep - Insomnia. Abnormal dreams. Somnolence.

Stomach - Thirst. Stomach inflammation. Dyspepsia. Acid indigestion. Nausea, vomiting.

Throat - Laryngitis, pharyngitis.

Vertigo - Dizziness and fainting.

Vision - Abnormal vision. Double vision. **Blue color tinge in vision**. Blurred vision. Color perception changes. Light perception changes. Light sensitivity. **Blindness**.

REFERENCES - Murphy.

***VIBURNUM OPULUS

(Cramp Bark)

PHARMACY - vib. Viburnum opulus. Cramp bark. High cranberry. Bush cramp. Bark water elder. N. O. Caprifoliaceae. Great Britain. The Gueldres Rose or Snowball-tree is the cultivated and sterile variety. Tincture of the fresh bark. **Historical dose**: Tincture and all potencies.

CLINICAL - After-pains. Cough, pregnancy. **Cramps. Dysmenorrhea**. Ears, painful. Epididymitis. Headaches. Hysteria. Labor,

Viburnum opulus false. Labor, pains. Lumbago. Menstruation, painful. **Miscarriages**. Ovaries, pain. Paralysis. **Uterus, pain**.

HOMEOPATHIC - Viburnum opulus, a native of Great Britain, is widely distributed over the northern parts of the continent and America. According to Hale, in America the wild species is called "Cramp bark" and the knowledge of its curative virtues in painful spasmodic diseases, like dysmenorrhea, is derived from the Native Americans. The tincture has a strong odor of Valerianic acid (as also has that of Vib. tinus).

Hale derived his knowledge from herbal sources. In spasmodic dysmenorrhea he gave a few drops of tincture to 3x thrice daily for a week before the period, every hour when the pains set in or every fifteen minutes if the pains are severe.

Cramps in abdomen and legs of pregnant women. To prevent miscarriage when the pains are spasmodic or threatening. False pains preceding labor. After-pains, a dose after each pain.

HOMEOPATHIC - Vib. is a remedy for general cramps. Colicky pains in pelvic organs. Conscious of internal sexual organs. **Prevents miscarriage**. False labor-pains. Spasmodic and congestive affections, dependent upon ovarian or uterine origin.

Paralytic conditions after convulsions. Violent, spasmodic, nervous effects, especially in females, dependent upon the ovarian or uterine origin. Pains make her so nervous, she cannot keep still. Sick feeling all over in pelvic complaints. Hemorrhages. **Left sided symptoms**.

MIND - Very nervous and irritable.

Abdomen - Excruciating crampy colicky pain. Heavy aching, hypogastrium, better menses. **Sudden cramps and colic pains**. Tender, worse pressure about umbilicus.

Back - Bruised feeling in back as after severe exertion. Tired backache, better pressure. Lumbago, better walking with a cane pressed, arms across the back. Pains in the back end in a cramp in uterus or go down the thighs.

Chest - Feeling of oppression over whole chest. Sensation as if muscles of chest failed to act, causing dyspnea. Shooting over left sixth rib near sternum.

Constitutions - Suited to tall, slender, dark or fair haired hysterical subjects.

Ears - Stabbing in ears. Pains in bone waking at night. External ear sore as if bruised.

Eyes - Sclerotica streaked with blood. Sensation of sand in eyes. Pain in right eye with congestion. Burning and lachrymation. Sore feeling in eyeballs. Sore feeling on closing lids. Heaviness of eyes.

Face - Flushed and hot. Face swollen and congested. Swelling about right eye with induration. Face and lips pale, dark circles under eyes. Lips dry.

Female - Heavy aching feeling or excruciating cramps in pelvis, better from menses. Bearing-down pains before menses. **Menses too late, scanty, lasting a few hours**, offensive in odor with crampy pains, cramps extend down thighs (Bell.). **Spasmodic and membranous dysmenorrhea** (Bor.). Leucorrhea, thick, white, blood streaked worse during stools. Leucorrhea, excoriating. Smarting and itching of genitals. Consciousness of internal sexual organs. Pelvic organs turning upside down. Aching in sacrum and pubes with pain in anterior muscles of thighs (Xanth.). Pains from back to loins and womb worse early morning. Uterine pains extend around the pelvis often extending down the thighs. Ovarian region feels heavy and congested. Uterine hemorrhage. **Frequent and very early miscarriage**, causing seeming infertility. **False labor pains**. Violent persistent after-pains. Faint on attempting to sit up.

Food - No appetite. No desire to eat, stomach feels full. Indigestion, food lies heavy.

Head - Head dull and sluggish. Throbbing in head. Terrible crushing pain worse left parietal region with a sensation as if head opening and shutting. Severe pain in temporal region. Head hurt by every cough.

Kidneys - Frequent urging. Frequent, profuse urination during headache, menses, hemorrhages etc. Dysuria, spasmodic. Copious, pale, light-colored urine. Cannot hold water on coughing or walking.

Limbs - Stiff, sore feeling in nape of neck. Feels as if back would break. Sacral backache. Lower limbs weak and heavy. Cramps in calves, before menses.

Lungs - Suffocative spells at night, worse cold, damp. Infantile asthma. Cough during pregnancy.

Modalities - Better by pressure, resting. Better in open air. Worse from motion, sudden jar, lying on left side, lying on affected side. Worse evening and night. Worse in close room, warm room. Worse cold, snow, air. Worse from fright. Worse before menses. Straining at stool aggravates headache. Stooping causes dizziness. Rising causes fainting, nausea and dizziness.

Rectum - Stools large and hard with cutting in rectum and soreness of anus.

Sensations - As if she could not tell where she was or what to do on awaking. As if she could not live, sick feeling at stomach. Emptiness, as if stomach hollow. As if body from waist to lower pelvis would collapse. As if urine continued to flow after urinating. As if menses coming on. As if pelvic organs were turning upside down. As if parts would be forced through vulva and she must support the part. Left side as if strained or bruised by over-lifting.

Skin - Tettery spots on cheeks, arms etc. **Sleep** - Very restless sleep, felt sick all over.

When asleep, sensation of falling and awakened frequently with a start.

Stomach - Constant nausea, relieved by eating.

Vertigo - Vertigo, feels as if falling forward, worse descending stairs. Feels faint on sitting up.

COMMENTS - The first Vib. provings were by H. C. Allen, assisted by eleven provers, male and female with the tincture and first and 30c dilutions. Dr. Susan Fenton of Oakland, proved Vib. on six provers.

One of the six took the tincture up to drachm doses without obtaining a single symptom. One pro ver was cured of a number of symptoms, but developed no new ones. All took potencies at first without eliciting any symptoms.

Taking the tincture all had these symptoms with variations: severe backache going through to the front or around the abdomen to uterus. Cramping pelvic pain. Temporal headache. Three had nausea with pains. All had "sick feeling all over." One had omission of a period, two had menses early.

One case was cured; Miss F., 25, a housekeeper, medium height, rather slender, blonde, sanguine, was strong until she had severe pelvic congestion and was fifteen months under treatment and most of the time in bed.

In June, 1892, a double oophorectomy was performed with great relief, but attacks of pelvic congestion with severe pain still persisted, at first every two to four weeks, later less frequently, causing impairment of general health and strength.

Symptoms included excruciating pains through lower abdomen with bearing-down sensation and a feeling as if the body from the waist to lower part of pelvis would collapse, an indescribable sick feeling all over with severe aching in rectum, great depression of spirits, symptoms better when lying down.

Vib. tincture was taken in three-drop doses thrice daily. After taking it for three days she lost all her symptoms and felt "perfectly well for the first time in over four years." It is evident that "sick feeling all over" in connection with pelvic complaints and "worse from movement, better by rest" are keynotes of Vib.

RELATIONS -Antidotedby: Aeon, (epididymitis), Verat. (Diarrhea). **Compare:** (1) Vib-p. Cimic., Caul., Sabin., Sep., Thlaspi., Xanth.

REFERENCES - Clarke. Hale.

*****VIBURNUM PRUNIFOLIUM**

(Black Haw)

PHARMACY - Vib-p. Viburnum prunifolium. Black haw. An American species. N. O. Caprifoliaceae. Tincture of fresh bark gathered in October and November from trees grown in open situations. Phares. **Historical dose:** Tincture and all potencies.

CLINICAL - **After-pains.** Dysmenorrhea. Infertility. Menorrhagia. Menstrual disorders. Miscarriage. Morning sickness. Tetanus. Tongue, cancer. Uterine, disorders.

HERBAL - Hale quoted his experiences showing a close resemblance between Vib-p. and Vib. with some additional uses of Vib-p.

Viburnum prunifolium is a **uterine tonic**. Useful for habitual miscarriage. **After-pains.** Menstrual irregularities of infertile females with uterine displacements. Morning sickness. Cancer of the tongue, obstinate hiccough. Phares said of it, "Vib-p. is particularly valuable in preventing abortion and miscarriage, whether habitual or otherwise, whether threatened from accidental causes or criminal drugging."

COMMENTS - Phares noted the case of Mrs. W. had never gone to full term, had several children at eight months, all of them dying one month after birth. Frequent pregnancies and hemorrhages had seriously impaired her health.

When next pregnant Vib-p. was ordered and at the eighth month when pains set in vigorously with copious bloody discharge, Vib-p. was given freely and she went to term, giving birth to a healthy boy, who survived.

He also recorded the case of Mrs. L., married eighteen months, had miscarried and suffered long and much in consequence. Being again pregnant, Phares gave her Vib-p. tincture, a teaspoonful thrice daily. At the third month, she was severely injured by a fall from her carriage.

Strong uterine contractions ensued, but were arrested by Vib-p., which had to be given freely for several days, the dose being gradually diminished. For nearly a week, miscarriage was threatened whenever Vib-p. was too long suspended. The patient went to term and gave birth to a large boy.

Hale used the tincture in threatened miscarriage, dysmenorrhea and spasmodic uterine pains. It entirely antidotes the effect of Goss., which is much used for procuring abortion in some of the States, one pint of a strong decoction of the cotton-root being sufficient. Vib-p. when taken regularly completely neutralizes this.

E. P. Fowler cured two cases of cancer of the tongue with the decoction of Vib-p. bark, used topically. Phares thinks it perhaps "the best remedy in the world for tetanus."

RELATIONS - **Antidote to:** Goss.

REFERENCES - Clarke. Hale.

*****VIBURNUM TINUS**

PHARMACY - vib-t. Viburnum tinus. Lau- rustinus. N. O. Caprifoliaceae. Tincture of fresh leaves. **Historical dose:** Tincture and all potencies.

CLINICAL - Deafness. Diaphragm, cramp. Dysmenorrhea. Hypochondriasis. Ovary, pain.

HERBAL - Viburnum tinus is the evergreen shrub known in gardens as Laurustinus. Cooper investigated it, giving always single doses of the herbal tincture in cases analogous to those for which Vib. op. is given.

COMMENTS - Using Vib-t., Cooper cured pain in ovary with depression. He considered hypochondriasis an indication for Vib-t. Deafness with sufferings in lower segment of abdomen and dysmenorrhea, erosions about the os uterus. Cramp in diaphragm.

Horrible headache all over head, worse on right side with right-sided deafness, coming on at 7 a.m. and 11 a.m. and 4 a.m. and 7 p.m. with great sinking in pit of chest. Waking at 4 a.m. with horrid depression of spirits that lasts until noon with a weight on chest and back, has to hold herself up to breathe.

REFERENCES - Clarke.

*****VICHY AQUA**

(Vichy Mineral Springs)

PHARMACY - vichy-g. Vichy aqua. Vichymin- eral springs. Grande grille. Springs at Vichy, France. Vichy springs containing carbonicum acidum, muriaticum acidum, sulphuricum acidum, silica, phosphoric acidum, arseni- cum acidum, ferrum oxidatum, natrum, kalium, calcium and magnesium. Arsenicums. Oxygenums. Silicas. Dilutions. **Historical dose:** Tincture and all potencies.

CLINICAL - Bladder, catarrh. Constipation. Diabetes. Gallstones. Gout. Gravel. Heartburn. Indigestion. Intermittent, fevers. Liver, disorders. Neck, stiff. Rheumatism. Salivation. Skin, disorders. Uterus, disorders.

HOMEOPATHIC - The springs of Vichy are alkaline, both hot and cold. Croserio proved Vichy, taking the water

and triturations of the salt and dilutions.

Constantin James noted that the springs are used in a large number of maladies, especially diseases of the digestive tract, diseases of the liver with or without stones. Abdominal engorgements consequent on paludal fevers, chronic engorgements of the uterus, catarrh of the bladder, gravel, gout and rheumatism, diabetes mellitus, skin diseases.

Among the most prominent symptoms were stitches below mastoid in chest in right loin and in heart. Across the chest there was a sensation as of a bar impeding breathing. Sinking sensation and sensation as if about to be sick. Burning flatulence. In the nose there were illusions of smell, corpse-like odor, odor of cucumbers. After sex there was excessive weakness as if from hunger. **Modalities** - Worse from cold, drafts of air. Worse when seated. Worse after sex. Worse after eating, when eating. Uneasiness is better by dinner.

RELATIONS - Compare: (1) Nat-m. (2) Stitching pains, Kali-c. (3) Bar sensation, Haematox., Ars., Ox-ac. (4) Worse from sex, Kali-c., Kali- bi., Staph. (5) Illusory smells, Anae.

***VINCA MINOR

(Lesser Periwinkle)

PHARMACY - vine. Vinca minor. Lesser periwinkle. N. O. Apocynaceae. Grows in woods and shady places. Tincture of whole fresh plant. **Historical dose:** All potencies, first to third potency.

CLINICAL - Acne. Alopecia. Diphtheria. Crusta lactea. Eczema. Favus. Hemorrhages. Neck, stiff. Nose, redness. Plica polonica. Seborrhea. Throat, sore. Toothache. Uterus, bleeding.

HOMEOPATHIC - Vinca was proved by Rosenberg on four healthy persons, who took the tincture in 20 to 60 drop doses. It produced a deep impression on the organism and tissues. Weakness and prostration. "Weakness as if he would die." Inclination to stretch. Trembling and tendency to start, especially on exciting the mind. Trembling in all the blood vessels. Uterine hemorrhages, followed by great debility. "Toothache better from warmth of bed." Diphtheria. Empty, all gone sensation in the stomach and chest. Distention of abdomen after stool. Stool caused exhaustion. Skin affections, eczema. Plica polonica. Marked affects on the tissues. The left side was most affected.

Abdomen - Abdomen full, tense but painless. Gripping. Rumbling and gurgling with passage of much offensive flatus. Distention after a stool.

Back - Painful tension and stiffness of cervical muscles with an illusive sensation as if a weight were lying on them.

Causations - Anger. Mental exertion.

Chest - Pains in chest with sticking and dyspnea. Stitching in sternum. Pressure on sternum with feeling of emptiness in chest.

Ears - Ringing and whistling in ears with feeling of cold wind, especially the left.

Eyes - Itching and burning of lids, which become red. Eye dry, on getting snuff into it there was so little secretion he was obliged to wash it out. Foggy vision while reading, at times also while walking.

Face - Bloated face with pimples. Dry lips. Swelling of upper lip and corner of mouth. Tearing in malar bones.

Female - Menses, profuse, flowing like a stream without interruption with great weakness, at menopause.

Passive uterine hemorrhages (Ust., Trill., Sec.). Menorrhagia, continuous flow, at menopausal (Lach.). Bleeding fibroids.

Food - Hunger alternating with loss of appetite before the hunger has been satisfied. Scarcely any thirst.

Head - Tearing pain in vertex, ringing and whistling in ears. Corrosive itching of scalp. Irresistible desire to scratch. **Spots on scalp, oozing moisture, matting hair together, plicapolonica.** Bald spots covered with short woolly hair. Hair falls out and is replaced by gray hair.

Kidneys - Diminished secretion of urine. Urine pale yellow.

Limbs - Inclination to stretch limbs. Tearing pains in limbs. Arthritic tearing in bones. Swelling and stiffness of first joints of fingers with burning pain in the nails. Cramp-like drawing in feet and toes.

Lungs - Hoarseness. Tenacious mucus in trachea. Spasmodic cough with little tickling in larynx. Rapid respiration.

Modalities - Worse after swallowing, walking, stooping, moving. Worse anger. Worse reading. Worse in open air. Drinking aggravates, liquids (especially beer) causes belchings, coffee causes nausea.

Mouth - Increased secretion of saliva. Insipid taste in mouth to all food. Aphthae. Tearing in teeth better by warmth of bed.

Nose - Becomes red on becoming the least angry. Tip gets red easily. Moist eruption on septum. Seborrhea upper lip and base of nose. Stoppage of one nostril. **Sores in nose.** Frequent nose bleeding.

Rectum - Urging to stool. Stool first hard, then soft. Stool exhausting with burning in anus.

Sensations - As if he would die from weakness. As if a hammer were beating from within outwards in vertex, cold wind in ears. As if something sticking low down in esophagus. As if a weight lying on cervical muscles.

Skin - Eczema of head and face. Corrosive itching. **Great sensitiveness of skin with redness and soreness** from slight rubbing. Pustules, itching, burning and offensive odor. Hair matted together. Weeping ec - zema intermingled with foul, thick, crusts. Corrosive itching.

Sleep - Frequent yawning. Sleeplessness and restlessness at night. Lascivious dreams.

Stomach - Emptiness in stomach. Gastric disturbance. Empty belchings after drinking beer and generally worse from taking liquid. Nausea after coffee. Violent, bitter, copious vomiting of yellowish-green liquid.

Throat - Cutting in lower esophagus, which provokes swallowing. **Diphtheria**. Ulcers. Frequent hawking. Difficult swallowing.

Vertigo - Whirling vertigo with flickering before eyes.

COMMENTS - Vine, has a wide range in passive uterine hemorrhages. This case is related in Ind. H. R. (ix. 113): uterine hemorrhage, blood dark red, flow copious, uninterrupted with extreme debility. Chin, and Helon. failed to relieve, Vine, 1x effected a rapid and permanent cure.

Frequent nosebleed. The nose "becomes red from the slightest cause, when the least bit angry." Scabby eruptions about the nose and on the septum, which are part of the general skin effect of the remedy.

Corrosive itching of the skin provoking scratching, moist spots and burning in ulcers. The most characteristic effect is on the scalp, where it produces a condition having many features of crusta lactea, favus and plica polonica.

Clarke cured With Vine, "sore spots on the scalp" in a young woman. A number of symptoms were produced in the throat and esophagus.

C. M. Boger recorded the case of a woman, 31, who had a cutting sensation in lower part of esophagus while swallowing food and continuing after. Empty faintness in stomach better by eating. Stomach sore to touch or pressure of clothing. Constipation from induration of feces. Hemorrhoids constantly sore, smarting after stool. Vine. 41,000c (Fincke) cured.

RELATIONS - Compare: (1) Oind., Staph. (2) peevishness with repentance, Croc. Crusta lactea, Med., Melit, Mez., Jug-r., Oind. (3) Viol-t. - with strong-smelling urine. (4) Lappa - glands swollen, axillary glands even suppurate. (5) Staph. - sickly children, pale face, dark rings around eyes. (6) Ust. - filthy eruptions, part of hair comes out, part matted. (7) Alopecia, Bac., Phos.

***VINE

(Bach Flower Essence)

PHARMACY - vine-b. Vine. Vitis vinifera. Vinum. The flowering clusters, shortly after the stamens have grown out, are put in a sunlit bowl of water and left to the sun's action for several hours. Subsequently, the water is strained and used as medicine. Only the wild vine is used. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Vine-b. belongs to Bach's group of **Over-Care for Others' Welfare**, with Rck-w-b., Beech-b., Verv-b. and Chic-b. Vine-b treats the tendency to engage in dominant behavior.

Over-ambitiousness accompanied by envy, frustration and worry, leading to the formation of gastric and duodenal ulcers, or coronary heart disease.

MIND - Assumes control over others. Dominance, preceded by overt attempts to fight back. Disregards peoples' opinions and wishes. Condescending.

Manipulations, schemes and tricks or flattery. Exploitive. Abusive behavior and stubbornness. Passive aggressive personalities. Resistant to change. Very goal-oriented. Tendency to forget one's needs.

Ruthless and violent. Haughty, egocentered and self-aggrandizing. Anger, impatient and exasperated. Calculating. Reserved. Frustration, a sense of injustice, self-pity, rebelliousness and stubbornness.

REFERENCES - Bach.

***VIOLA ODORATA

(Sweet-scented Violet)

PHARMACY - viol-o. Viola odorata. Sweet-scented violet. Violet. N. O. Violaceae, an order most members of which contain emetin, allied to Cinchonaceae. Tincture of fresh plant in flower. **Historical dose:** Tincture and all potencies.

CLINICAL - Cancer. Choroiditis. Cough, spasmodic. Deafness. **Dyspnea. Headaches.** Hoarseness. Hysteria. Neuralgias, supra-orbital. Otorrhea, suppressed. Palpitations. Rheumatism. Seminal emissions. Styes.

Whooping cough. **Worms.** Wrists, rheumatism.

HOMEOPATHIC - Viol-o. has a specific action on the ear. Affects especially darkhaired patients, supra-orbital and orbital regions, rheumatism in upper parts of the body when on the right side.

Locally, for pain due to uterine fibroids. Marked **affinity for the wrists**, especially the right. Affects ears, eyes, and skin. Combined eye, ear and kidney symptoms. **Worm disorders** in children (Teucr.). For snakebites, bee-stings.

Produces great nervous debility. Nervous activity, then sudden exhaustion. **Tension.** "Tension of the occiput and forehead," "Tension of the scalp of occiput even when not moving, though worse bending head forward and backward, painful, compelling him to wrinkle forehead, lasting several days." Tension extends to upper half of face and ears.

MIND - Inclined to weep without knowing why. Childish behavior, despondent, refuses eating, talks in low soft voice. Aversion to music, especially the violin.

Abdomen - Distention of abdomen.

Back - Tension in muscles of the neck.

Jerking drawing in cervical muscles, near nape, extending down, worse lying on opposite side.

Causations - Suppressed discharges.

Chest - Oppression of chest, as of weight on chest.

Constitutions - Cooper considered it suited to "dark-complexioned people of the Ferr. pic. type." Teste used Viol-o. frequently, described the type as "a lymphatico- nervous temperament, a mild disposition, dry and cool skin." Many patients cured by him were tall and slender. Suited to tall, thin, nervous girls.

Ears - Affections with pain in eyeballs. Otorrhea, recurrent from birth. Deafness. Shooting in ears. Roaring and tickling. Deep stitches beneath ears. Aversion to music.

Eyes - Cramp in eyes. Choroiditis. Pain from eyes (left) to vertex worse cough. Eyeball feels compressed. Lids tend to close without physical sleepiness. Heaviness of lids. Flames before eyes. Myopia. Illusions of vision, fiery, serpentine circles.

Female - Dyspnea during pregnancy.

Food - Craves meat.

Head - Heaviness of head with sensation of weakness in muscles of nape of neck. **Scalp tense, must knit the brows. Headache across the forehead**, above the eyebrows. **Tendency to pain immediately above eyebrows. Burning in the forehead.** Throbbing under eye and temple. Acts upon frontal sinuses. Hysterical attacks in tuberculous patients.

Kidneys - **Urine milky** with strong smell. Bedwetting in nervous children.

Limbs - Trembling of limbs. Rheumatism of deltoid muscles and wrists (right) especially in females. Shoulders cold. Pressing pain in bones of fingers. **Pressing pain in right carpal and metacarpal joints** (Ulm.).

Lungs - Difficult breathing, anxiety and palpitations. **Dyspnea during pregnancy.** Dry, short, spasmodic cough and dyspnea, worse in daytime. Long spells of cough during day time only with dyspnea. Whooping cough with hoarseness.

Modalities - Bone pains, better after rising in morning. Worse from cloudy weather, cold air. Worse music. Worse puberty, suppressed discharges. Worse bending head backward and forward. Cough worse by day. Hoarseness worse in a cold room. Vision worse from dull, wet days.

Nose - Tip numb, as from a blow. Torpor in the end of nose, as from a blow.

Rectum - Itching at anus'. **Worms.**

Sensations - As if everything in head whirled around. As if eyeballs were compressed. As if nose had been beaten and blood were pressing out. As if hard palate were dried up. As if a stone were lying on chest. Burning like a small, transient flame in spots here and there.

Skin - Dry with moist palms.

Sleep - Yawning and stretching without sleepiness.

Vertigo - Vertigo, everything in head seems to whirl around.

COMMENTS - Viol-o. was introduced by Gross and proved by Hahnemann, Gross and Stapf. Gross said of his symptoms that they recurred equally in all positions, were mild, yet more definitely than from other drugs. Hahnemann had bruised pain in all the bones in the morning in bed after waking, better after rising. Stapf had relaxation of all the muscles.

The mind was greatly excited and disturbed and Viol-o. found its first uses in hysterical cases. Aversion to music, especially the violin is one of the peculiar symptoms.

Increased activity and rush of ideas, generally confused, "Can only grasp half an idea, puts it in its proper place but cannot hold it." Gross experienced the former and Stapf the latter of these.

Gross also noted, "Tension which at times extends to upper half of face, especially of nose, thence to forehead

and temples, as far as ears, alternating with a similar sensation in occiput and cervical muscles.”

The cure of Lady Margaret Marsha, age 67 of an affection of the throat pronounced to be malignant (apparently epithelia of tonsil) with an infusion of violet leaves is on record. Boiling water was poured on the fresh leaves and allowed to stand twelve hours.

Compresses moistened with this were applied externally to the throat and covered with oil-silk. Relief of pain, dysphagia and suffocative symptoms was immediate. The external swelling disappeared in a week, the growth on the tonsil in a fortnight.

Viol-o. has cured a number of cases of rheumatism, chiefly right-sided. It has a marked affinity for the wrists, especially the right. Ear disorders with pain about the eye orbits indicate Viol-o.

RELATIONS-Antidotedby: Camph. **Compatible:** in whooping cough, Cor-r. in worms, Cina. **Compare:** (1) Ulm. - formication in feet, numb, creeping pain in legs and feet, rheumatic pains above wrists, numbness, tingling and full soreness where the gastrocnemius gives off its tendon. (2) Chen-a. (3) Aur., Puls., Sep., Ign., Cina. (4) Caul. - in rheumatism of small joints.

***VIOLA TRICOLOR

(Pansy)

PHARMACY - viol-t. Viola tricolor. Pansy. Ja- cea. Hearts-ease. N. O. Violaceae. Tincture of fresh plant in flower. **Historicaldose:** Tincture and all potencies.

CLINICAL - Bedwetting. Crusta lactea. Dyspnea. Eczema. Flatulence. Gonorrhea. Gout **Impetigo**. Leucorrhea. Ophthalmia. Orchitis. Plica polonica. Rheumatism. Ringworm. Seminal, emissions. Syphilis. Throat, ulceration. Vaginitis.

HERBAL - It had an ancient reputation in asthma and epilepsy and especially in obstinate skin diseases. In Russia a decoction of pansy is a popular remedy for scrofula, swollen glands. Schlegel, of Moscow, used it with good effect in syphilitic affections, especially venereal ulcers.

HOMEOPATHIC - The pansy was proved by Hahnemann and his provers. Skin, scalp and urinary organs are the chief centers of action of Viol-t. The principal uses of this remedy are for eczema in childhood and nocturnal emission accompanied by very vivid dreams. Combined urinary symptoms and skin affection. Nervous paroxysms after suppressed crusta lactea, eczema.

Eczema with urinary disturbances, too copious urination or sudden arrest of secretion. Tinea capitis with frequent involuntary urination. **Urine smelling like cat's urine**. The male sexual organs were much excited. Emissions with vivid dreams occurred, swelling, itching and pains in prepuce and glans with erections.

Hot face and sweating after eating. Dyspnea after eating. Hands twitch and are clenched in sleep. Nervous paroxysms followed suppressed milk-crust. The axillae and clavicular regions were noticeably affected and stitches and burning stitches were prevailing pains. Lying causes anxiety about heart.

Abdomen - Stitches and cutting pain in abdomen with urging to stool, followed by discharge of lumps of mucus and flatulence. Pressing, stinging in the diaphragm.

Back - Swelling of glands of neck. Spasmodic pain and contraction with pinching between shoulder blades (with cutting, tingling and crawling in the skin).

Causations - Suppressed milk-crust (nervous paroxysms).

Chest - Syphilitic ulcers on clavicles. Shooting in chest. Stitches in the chest, on the ribs, sternum and intercostal muscles.

Eyes - Pain in eyes, as if a hard body were between upper eyelid and eyeball. Smarting and incisive and itching shootings in eye. Contraction and closing of eyelids. Myopia.

Face - Hot and sweating after eating. Thickness and hardness of skin of face. Scabs on face with burning itching.

Female - Stitch in region of mons veneris, right side. Painful pustules on labia. Leucorrhea with stitching pain in children in syphilis. Chancroid ulcers about breasts.

Head - Cracked, gummy crusts on scalp, exuding profuse tenacious yellow fluid, matting the hair together with swelling of cervical glands. Eczema of scalp with swollen glands. Milk crusts. Heavy, pressing-outward pain.

Kidneys - Copious, disagreeable odor. **Urine offensive, smelling like cat's urine**. Bedwetting.

Limbs - Joint rheumatism. Itching like eruptions around the joints.

Lungs - Stitches in left side of chest, worse during inspiration and expiration.

Male - Seminal emissions with vivid dreams. Involuntary, seminal emissions at stool. Swelling of prepuce, burning in glans. Itching.

Modalities - Open air helps headache, but causes chilliness. Aversion to open air. Worse in winter, when walking in cold air. Worse 11 a.m. Worse by pressure on side opposite to painful side, lying on non-painful

side. Walking causes vertigo, stitches through chest and abdomen. Sitting causes stitches in abdomen and groin, standing relieves.

Mouth - Accumulation of saliva in the mouth with sensation of dryness. Tongue loaded with whitish mucus of a bitter taste.

Rectum - Chopped soft stools. Stool with mucus and much flatus.

Skin - Eczema of childhood. Large boils all over the body in scrofulous children. **Impetigo**. Intolerable itching. Eruptions, particularly over face and head with burning, itching, worse at night. Thick scabs, which crack and exude a tenacious yellow pus. Sycosis.

Sleep - Inclination to sleep in afternoon. Disturbed sleep with frequent waking. Awakens frequently without cause. Sleep retarded by a concourse of ideas with difficulty in waking in morning. Vivid and amorous dreams.

Temperature - Chill or chilliness in forenoon and in open air. Dry, anxious heat at night in bed with red face. General heat, especially in face with anxiety, dyspnea immediately after eating. Night-sweats.

Throat - Sore throat in evening. Swallowing difficult and very painful. Syphilis. Swelling of cervical glands. Much phlegm, causing hawking, worse in the air. Chancroid ulcers.

Vertigo - Vertigo and dizziness when walking. Head bewildered and perplexed.

COMMENTS - Teste put Viol-t. in two groups, whose types are Lyc. and Cham. Homeopathy has brought out some characteristics of Viol-t. which single out its cases.

Teste quoted from old observers the following as cured by Viol-t.: Milk-crust in children at the breast, or recently weaned. Milk-crust with violent cough and excessive oppression.

Impetigo of hairy scalp and face in children and adult females. Favus and serpiginous crusts in children and adults with swelling and induration of cervical glands. Large boils all over body in a scrofulous child. Pustules and ichorous exanthema of feet. Squamous spots on skin.

Rheumatism and gout, joint rheumatism with itch-like eruption around the joints. Impetigo-like exanthema on forehead. Ichorous ulcers with violent itching.

RELATIONS - Antidoted by: Camph., Merc., Puls., Rhus-t. **Compare:** (1)Tension of tissues of face and forehead, Viol-o. (2) Crusta lactea, Vine. (Viol-t. has urinary concomitants). (3) Eruptions, ulcers, Cham., Graph., Hep., Merc., Oind., Petr., Staph. (4) Stitches, Kali-c. (5) Viol-o. (6) Lyc. Rhus-t., Calc., Sep. **Compatible:** Puls., Rhus-t., Sep., Staph.

REFERENCES - Boericke. Clarke.

***VIPERA ASPIS

(Aspis adder)

PHARMACY - vip-a. Vipera aspis. Aspis adder. N. O. Viperidae. **Historical dose:** All potencies.

HOMEOPATHIC - Proved in 1970 by Boffa and Dupin on 14 subjects, 7 men, and 7 women. The heart, blood and blood vessels were chiefly affected. Sleepiness during daytime. Chilly. **Worse left side.**

Nerves. Throbbing pains. Throbbing headache. Heavy sensation in eyes. Dazzling when raising eyes. Dryness of mouth, with pasty tongue, on waking in morning. Dry mouth before menses. Menses with small, very dark clots or with big red clots.

MIND - Pessimism. Nervousness. Irritability. Disposition to contradict. Impatience. Anxiety. Dreams of death..

Food - Intense thirst for cold drinks.

Heart - Palpitations of heart at night, worse lying on left side.

Limbs - Spontaneous ecchymoses on arms.

Painful heaviness in legs, worse walking, better raising legs. Veins of thighs distended. Marbled, mottled appearance of thighs.

Modalities - Better during menses. Better gentle motion. Worse warm, damp weather, warm room, heat.

Worse left side, pressure. Worse evening. Worse before menses.

RELATIONS - Compare: Vip., Lach., Naja., Aran-ix., Buth-aust.

REFERENCES-Julian.

***VIPERA BERUS

(German viper)

PHARMACY - vip. Vipera berus. German viper. Vipera torva. Pelias berus. Adder. Vipera communis. Common Viper. European Viper with other varieties, especially the Red Italian Viper. N. O. Ophidia, family, Viperidae. Dilutions of the venom. **Historical dose:** All potencies.

CLINICAL - Bites. Goiter. Hemorrhages. Jaundice. Liver, enlargement. Menopause. Multiple neuritis. Nosebleeds. Paralysis. Paraplegia. Phlebitis. Poliomyelitis. Senility, premature. Tongue, swelling. Varicose veins.

HOMEOPATHIC - The effects of bites by the common viper and related species have been collected and have furnished the data for homeopathic prescribing. The venom of common German Vipera torva affects the blood and blood vessels, leading to hemorrhage and inflammation of the vessels.

Allen related the case of a gold beater who found the veins of his right arm become exceedingly swollen and painful, so that he could no **longer** work or **let his** hand hang down. Vip. cured immediately.

A case quoted from Med. Adv. of varicose veins of the popliteal space with the sensation as though the leg would burst and a nervous, fidgety condition of the feet which kept them in constant motion, was cured with Vip. 30c. The bursting feeling appears to be at the root of this characteristic.

A keynote for Vip. in cases of phlebitis and varicose veins is "Worse on letting the limb affected hang down," as if it would burst with fullness. The region of the vessel affected is inflamed and sensitive.

Swan said Vip. was a remedy for all forms of nosebleed.

Vip. affects **veins**, causing inflammation **and ahemorrhagic tendency**. Inflammation of veins with great swelling. Cardiac dropsy. **Bursting sensation, enlargement of liver**. Special action on kidneys and induces hematuria. Edema of glottis. Goiter. Ailments of menopause.

Paralysis, ascending, paraplegia of foot. Multiple neuritis. Poliomyelitis. Temporary increase in reflexes, paresis supervenes, a paraplegia of the lower limbs extending upwards. Resembles acute ascending paralysis of Landry. Vip. has a chronic and periodic action, the symptoms return annually for years.

Abdomen - Excruciating pain in the epigastrium, worse pressure. Violent pain in enlarged liver extends to shoulder and hip, jaundice with fever.

Back - Sticking in kidneys. Pain in loins.

Chest - Oppression with anxiety with violent efforts to breathe and swallow. Veins of chest and abdomen thick and hard. Swelling of chest as far as umbilicus after bite on face.

Eyes - Eyes are dark yellow, red, inflamed and watery, staring, sunken. Pupils are dilated or left dilated, right contracted. Paralysis of lids, dropped over eyes. Vision is dim, dim in left eye, lost in right.

Face - Excessively swollen. Lips and the tongue swollen, livid, protruding. Tongue dry, brown, black. Speech difficult.

Food - Appetite lost. Thirst with moist tongue, for cold drinks.

Female - Menopausal hemorrhage, flow red with dark clots, not profuse but continuous with prostration and faintness from nursing the child.

Kidneys - Strangury. Involuntary urination. Urine is increased, suppressed, dark yellow, as in jaundice. Hematuria. Ineffectual desire.

Limbs - Patient is obliged to keep the limbs elevated. **When limbs are allowed to hang down, it seems as if they would burst and the pain is unbearable**. Shuffling gait caused by paralysis of foot. **Varicose veins** and acute phlebitis. Veins swollen, sensitive, bursting pain. Blue lower limbs. Severe cramps in lower limbs.

Liver - Violent pain in enlarged liver with jaundice and fever, extends to shoulder and hip.

Modalities - **Worse from letting limbs hang down**. Worse by pressure. Worse change of weather, from cold touch. Worse yearly.

Mouth - Scorbutic line on gums. Tongue swollen, brownish-black, protruding. Lips, blue, swollen. Speech difficult.

Nose - Nosebleed with vertigo, while nursing the child.

Skin - Livid. Boils, carbuncles with **bursting** sensation, relieved by elevating parts. Ulcers. Gangrene. Skin peels in large plates. Lymphangioma.

Stomach - Digestion slow. Pain in epigastrium, worse pressure. Nausea with shuddering with attack of faintness. Retching with suffocative sensation. Vomiting after milk of all food and drink.

Sleep - Disposed to yawn. Sleepiness and heaviness with inability to sleep and also almost constant necessity to change the position. Sleeplessness from pain. Restless at night.

Temperature - Temperature is diminished, resists cold badly. Chilliness with cold sweat, with rigidity and clammy sweat, then fever. Fever of irregular type intermittent fever. Sweat after vomiting.

Throat - Swelling like goiter. Edema of glottis. Closure of throat so that she could swallow only water and milk.

COMMENTS - Vip. patients resist the cold badly. The parts may be paralyzed and ulcers and gangrene follow. Worse from letting limb or part hang down. Sensation as if something ran up the thigh occurred in the bitten limb in one case. In one case there was sweat over the whole body except the bitten limb.

Leonard gave Vip. to a woman suffering from menopausal hemorrhage, flow red with dark clots, excessive to prostration and faintness. She had a small uterine fibroid. A few doses relieved and the excessive hemorrhage did not return.

He also noted the case of a woman nursing a child a year old who was much prostrated by hemorrhage lasting several weeks, not profuse, but continuous: Nosebleed nearly every day, weaning brought no relief. Chin. 200c

did no good. Vip. 100,000c cured in three doses.

RELATIONS - Compare: (1) Hemorrhage of fluid blood, Sanguis. (2) Worse hanging down limbs, Calc., Alum., Am-c., Sabin., Thuja. (3) Pelius berus. Adder. - Prostration and fainting, faltering pulse, skin yellow, pain about navel. Swelling of arm. tongue, right eye with giddiness, nervousness, faintness, and sickness. Compression of chest, could not breathe properly or take a deep breath, aching and stiffness of limbs, joints stiff, collapsed feeling, great thirst. (4) Ser-ang. - heart and kidney diseases. Failure of compensation and impending asystole.

REFERENCES - Boericke. Clarke.

***VISCUM ALBUM

(Mistletoe)

PHARMACY - vise. Viscum album. Mistletoe. N. O. Loranthaceae. Viscaceae. Tincture of ripe berries. Tincture of bruised leaves. Tincture of whole plant. **Historical dose:** Tincture and all potencies.

CLINICAL - Ankylosing spondylitis. Arteriosclerosis. **Asthma.** Aura epileptica. **Cancer. Chorea.** Deafness. Dupuytren's disease. Dysphagia. Endometritis. **Epilepsy.** Hypertension. Labor pains, slow. Lumbago. Menorrhagia. Metrorrhagia. Migraine. Neuritis. Orchitis. Osteoporosis. Otorrhea. Ovaritis. Raynaud's syndrome. Retained placenta. Sciatica. Spasmodic paralysis. Spleen pain. Throat, sore. Whooping cough.

HERBAL - Viscum Album's active principle is viscotoxin, a mixture of acetylcholine and choline. Viscum is a chlorophyllous plant, which grown on various trees (apple, poplar) and forms large bunches. It is gathered in August and September, before the fruit ripens. The leaves are then blanched and dried quickly in hot air and stabilized.

In the middle ages, it was used as an anti-epileptic. Hypo-tensor and diuretic. Anti-tumors, by external use, as for papilloma, due to the necrotizing properties of the viscotoxin.

Viscine is most abundant in the mistletoe of the apple-tree, Visco-resin in that of the oak and acacia, excites the sexual appetite. The mistletoe of the hawthorn possesses like all the rest, but in a higher degree, the contractile properties of Sec. on the uterus in uterine inertia. That of the oak has a remarkable anti-epileptic power on horses.

According to Laville, all mistletoes are useful in epilepsy and rabies. A breeder had a very fine stock which became epileptic at four or five years old. He cured them with a tincture of the fresh leaves bruised in a mortar.

HOMEOPATHIC - The first homeopathic symptomatology was established by Proll, Stager, Schier and Black during the second half of the 19th century, using the mother tincture and low potencies. Proell made a proving of the tincture and the symptoms developed resembling an epileptic aura and petit mal, which had the additional epileptic feature of recurrence they recurred frequently for two years.

Vise, affects the nerves and female sexual organs. Lowered blood pressure. Dilated blood vessels but does not act on the centers in the medulla. Pulse is slow due to central irritation of the vagus. The symptoms point to rheumatic and gouty complaints, neuralgia, especially sciatica.

Epilepsy, feels a glow that rises up from feet to head. **Chorea** and metrorrhagia. Chorea from fright. Symptoms like epileptic aura and petit mal. General tremor as if all muscles are in fibrillary contraction. Neuralgia. Paresthesia.

Rheumatism, **tearing pains.** Rheumatoid condition ameliorated in fresh air and by the movement. Gouty. Sciatica with otorrhea. Spinal pains from uterine causes.

Feeling of lightness as if floating on air. The brain is swaying around the inside the skull. Congestion in the head with headaches and vertigo. Blood would not clot and wounds would not heal. Bleeding of bright red blood from the uterus. Valvular disease with disturbances in sexual sphere.

Rheumatic deafness. Asthma. Hypertensive albuminuria. Nausea at the sight of the bottle containing the medicine to be taken. Pruritus. Burning cold under the right shoulder.

MIND - Apathy, sadness. Lack of optimism liveliness. Irritable, sad, morose. Restless, nervous, thoughtless, shakes with impatience. Unable to carry out intellectual activities. Thoughts keep turning to past events, for hours on end. Obsessive persistence of thoughts.

Sensation of strength, optimism, gaiety, desire to undertake anything, full of ideas for the future. Hallucinatory psychosis. Extremely sensitive to noise. Fear of telephones.

Abdomen - Feels as if someone were dragging her down from the waist. Sore about waist. Violent rumbling and painful distention of the supra-umbilical region, ameliorated by expelling wind and leaning backwards. Colitis. Chronic pancreatitis.

Back - Lumbago from a chill, wants someone to press against the back. Stiffness and muscular pains in the nape of the neck, thoracic cage and back. Torticollis. Sensation of a **burning coal** under the right shoulder.

Causations - Chill, wetting. Fright. Suppression of menses.

Chest - Angina pectoris. Nervous dyspnea with feeling of constriction in the chest.

Ears - Deafness from cold. Buzzing and stopped-up feeling in ear. Hypersensitive to noise. Whistling, buzzing. Hears heartbeat. Sclerosis of the ears.

Eyes - Blue rings around eyes. Ocular neuralgia. Conjunctivitis. Mydriasis, ocular neuralgia, conjunctival irritation. Double vision. Bad focusing, eyes weep through fatigue.

Face - Facial muscles in constant agitation. Countenance suffused. Lips livid. Face hot and flushed.

Female - Menses too early, copious with bright red blood and very painful. Menorrhagia. Chronic endometritis. Metrorrhagia. Atonic, post-partum hemorrhage. Hemorrhage with pain. Blood partly clots and bright red. Menopausal complaints (Lach., Sulph.). Pain from sacrum into pelvis with tearing, shooting pains from above downwards. Ovarian pain, especially left. Retained placenta (Sec.).

Food - Felt starving at supper-time. Appetite ravenous.

Head - Feeling as if whole vault of skull were lifted up. Sudden throbbing in vertex. Headache, especially at the forehead, temples and parietal bone, can spread to the whole head. Dull, heavy aching, numbing and congestive, beating or hammering.

Heart - Hypertrophy with valvular insufficiency, pulse small and weak, unable to rest in a reclining position. Low blood pressure. Failing compensation, dyspnea worse lying on left side. Weight and oppression of heart, as if a hand were squeezing it, ticking sensation about heart. Inflammation of the coronary arteries. Feeling of tightness of heaviness. As if the heart is being squeezed by a hand. Heartbeat irregular. Agitation and fibrillation. Pulse accelerated or slow with fear of death. Palpitations in the chest, throat and upper part of the abdomen. Palpitations during sex.

Kidneys - Urinary tenesmus and copious urine. Bladder paralyzed. Involuntary passing of urine as a result of an irritating cough. Urine is turbid and evil-smelling. Urine milky after standing. Bedwetting.

Limbs - Chorea-like movements of the arms and legs. A **glow** rises from the feet to the head, seems to be on fire. General tremor, as if all muscles were in state of fibrillary contraction. Dropsy of limbs. **Sciatica**. Drawing, tearing pains in the arm. Pains alternate in the knee and ankle with shoulder and elbow. Periodic pains from sacrum into pelvis, **worse in bed** with pains into thighs and upper limbs. **Tearing**, shooting pains in both thighs and upper limbs. Cannot keep legs still. Sensation of a spider crawling over back of hand and foot. Itching all over. Compressing pain in feet. Raynaud's syndrome. Walking, bending is painful. Burning sensation in the feet.

Lungs - Dyspnea, **feeling of suffocating when lying on left side**. Stertorous breathing. Asthma, if connected with gout or rheumatism. Bronchial asthma, connected with gout or rheumatism. Glottal spasms and rattles in the bronchi. Painful, frequent cough, scanty, gray or yellow sputum. Spasmodic cough.

Male - Libido increased or diminished. Disturbed libido. Violent, painful erection. Atonic discharge of seminal fluid. Cramping pain in the prostate. Prostatitis.

Modalities - Better by counter-pressure, resting quietly, walking in the fresh air. Worse by slightest movement. Worse winter, cold, stormy weather, becoming chilled while hot, heat. Worse in bed, lying on left side. Worse suppression of menses. Worse mental effort. Worse tobacco.

Mouth - Lips cracked. Dryness of the mouth. Mouth suddenly fills with saliva. Unpleasant taste on waking tongue coated to tip with ochre-yellow fur. Tongue sore. Buccal mucus membrane is as if tanned. Teeth wattered.

Nose - Catarrh in the nose and pharynx. Catarrhal congestion of the mucus membranes with discharge of a watery or purulent liquid. Purulent rhinitis. Polyps. Nosebleed.

Rectum - Feeling of constriction of the anus with empty urging. Feeling of not having emptied the intestine completely after stool. Stools soft, watery or thick, frothy, stinking, explosive, bulky with nightly urging, forcing him to get out of bed. Stools hard and dry. Pruritus and burning of the anus with splinter-line pain. Bleeding hemorrhoids.

Skin - General itching and tingling with no apparent cause, ameliorated in the evening and by perspiration. Formication along the arms. Pruritus, senile and vulvae.

Sleep - Falls asleep late, wakes early. Sleeps, despite exhaustion and after drinking coffee. Troubled dreams of war, bombardment.

Stomach - Gastritis. Heavy sensation, feeling of a stone in the stomach. Squeamish before breakfast and dinner. Heartburn, cutting pain in the stomach, ameliorated by eating and belching. Nausea ameliorated by vomiting.

Temperature - General shivering followed by sudden hot flush towards the head and feeling of anguish.

Throat - Throat dry, burning with sticky discharge. Sensation of constriction around the neck. The feeling of a lump in the throat disappeared in one female prover.

Vertigo - Vertigo, persistent after epileptic attack. Sensation of lightness, as if floating on air. Severe attacks of vertigo totters and has to hold on to the furniture. Vertigo occurs on rising from movement, by moving the head quickly, tends to fall backwards. Vertigo never occurs when lying down. Vertigo when looking out of a window.

COMMENTS - Two women took Vise, to procure abortion. Every muscle save those of the eyes became paralyzed, as did also the intestinal tract. They could not swallow and died of starvation in consequence, the bowels being obstinately constipated. The muscles of speech were also paralyzed.

A boy, 14, ate some berries, soon after began to feel giddy and then became insensible. He was found with suffused countenance, lips livid, conjunctiva injected, pupils slightly dilated and fixed, pulse slow and full, bounding, breathing slow, stertorous.

On pricking the soles the feet were quickly drawn up. Then, cold applications aroused him, when he began to talk incoherently, had spectral illusions and was inclined to be violent.

In a pamphlet on "Viscum Album" Dr. George Black of Torquay put together most of the facts relating to this plant including four new provings, by himself and three female provers.

Black removed with Vise. 3c lumbago from chill, tearing pain, wants something to press against it. Lumbago, right, extending to right buttock, worse by slightest movement. Pain in sacral region, unable to turn either side, worse slightest movement, "pain of a terrible clutching nature, as if her vitals were affected."

Cooper gave great relief with Vise, in "old spinal irritation pains." He also named "spinal symptoms due to uterine causes" as indicating it. Rheumatism, "the weight of my body on the joint causes it to be very sore," excessive perspiration.

Sciatica associated with otorrhea. Burning pain from center of left buttock to inner ankle, heel as if red-hot coal applied, leg feels heavy as lead. In addition a number of cases of catarrhal deafness with noises in the ears were cured or greatly improved.

Belcher gave to a girl, 17, suffering from chorea, 5 drop doses of a tincture of leaves and berries. On the second day he was called to see her and found her suffering as if under the influence of an opiate.

Black also quoted William Huber's experiences with Vise., the first case was of retained placenta with constitutional symptoms after miscarriage at sixth month. Expulsion rapidly effected by Vise. 3c.

A man, 22, robust, fair took a chill from traveling in ice-cold wind. Got a drawing, tearing pain in left lower jaw, lasting some hours. Succeeded by loud buzzing and stopped-up feeling, ending in complete deafness of that ear. Vise. 3c cured.

Metrorrhagia following suppression from working in water. Sciatica left side, cured with Vise. 3c. Rheumatism from wading ill-shod through great tracts of snow, cured with Vise. 3c. Hydrothorax (right) from chill with shooting in spleen, cured with Vise. 4c and 3c.

John Wilde made a tincture of the bruised leaves and gave 5 drop doses to a boy, 14, who had chorea affecting face and limbs. There was improvement in two days and in a few weeks a complete cure.

A boy, nine, strumous with tendency to skin disease, was affected with chorea after a fright. He was completely changed in expression, speech quite inarticulate, look idiotic.

The movements continued at night and the boy was worn out for want of sleep. Vise., 1 to 2 drop doses, did no good. The dose was then increased to 15 drops. Improvement set in at once and a perfect cure was effected, the doses being diminished after a time because soreness of the tongue and redness of the conjunctiva were set up.

C. M. Boger related a case in which persistent vertigo after epileptic seizures, lasting a month at a time, was cured with Vise. 100,000c.

Huber used the 3x and 6x. He considered it applicable to all kinds of rheumatism, acute and chronic, especially when characterized by tearing pains in cases occurring in winter, the result of exposure to sharp winds and in cases of rheumatic deafness.

RELATIONS - Antidoted by: Camph., Chin. **Compare:** (1) Sec., Conv., Bry., Puls., Rhod.

(2) Guipsine - active principle - exalts the hypotensive properties of Viscum. (3) Hed. -

Intercranial pressure. (4) Bry. - Vertigo in the morning on rising, prickling pains, aggravated by movement, great thirst, dry constipation, menses copious with brown blood. (5) Bell. - Neuro-vascular congestion, fear of imaginary things, hypersensitivity and hyper-excitability of the senses, pulse strong, irregular, menses too early with bright red, hot blood. (6) Aran-ix. **Follows well:** Aeon, (rheumatism).

***VITEX TRIFOLIA

(Indian Arnica)

PHARMACY - vit Vitex trifolia. Indian arnica. Verbenaceae. **Historical dose:** Tincture and all potencies.

CLINICAL - Headaches. Injuries. Sprains.

HOMEOPATHIC - Vit. is a remedy used for many traumatic conditions such as injuries and sprains, etc. Pains in joints, abdomen, testicles. Headache in temples,

REFERENCES - Boericke.

***VOESLAU AQUA

(Voeslau Mineral Springs)

PHARMACY - voes. Voeslau aqua. Mineral Spring at Voeslau in Austria, contains calcarea, calcarea sulphurica, calcarea muriatica, magnesia carbónica, magnesia sulphurica, magnesia muriatica, natrum sulphuricum, natrum muriaticum, alumina, silica, ferrum citricum. Dilutions. **Historical dose:** Tincture and all potencies.

CLINICAL-Menstruation, disorders. Seminal, emissions. Urticaria. Vertigo.

HOMEOPATHIC - Voes. is the mineral spring at Voeslau in Austria. Rosenberg observed the effects of Voeslau aqua on the healthy.

The waters produced orgasm of blood, pressure and tension. The throat was sensitive to swallowing warm food and drink. Nettle rash with desquamation. In males there was sexual excitement and emissions, and in females increased secretion of mucus in genitals and many troubles connected with menses.

REFERENCES-Clarke.

***WALNUT

(Bach Flower Essence)

PHARMACY - waln-b. Walnut. Juglans regia. Female flowers are collected and boiled for half an hour. The female flower resembles a green bud with two fuzzy stigmas growing out of the top. After boiling, the water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Waln-b. belongs to Bach's group of **Over sensitivity to Influences and Ideas** with Agri-b., Cent-b. and Holly-b. Waln-b. gives protection from heightened impressionability and sensitivity. Lack of physical stability. Heightened impressionability, may create over-ambitiousness, envy and frustration. Gastric and duodenal ulcers (Vine-b.). Allergies.

MIND - Overly influenced by impressions. Emotional disturbances from impressions. Heightened sensitivity. Exaggerated attraction to sexual matters, even though it may just be mental preoccupation. Delusions when one feels obsessed or influenced by forces beyond one's control (Asp-b.).

***WASABIA JAPONICA

(Wasabi)

PHARMACY - wasa. Wasabia japonica. Wasabi. Japanese horseradish. Wasabi pungens. Cochlearia wasabi. The whole plant is used, leaves, stems and rhizomes. N. O. Brassicaceae. **Historical dose:** Tincture and all potencies.

CLINICAL - Blood, clots. Cancer. Cerebral, thrombosis. **Colds.** Coughs. Diarrhea. Food, poisoning. **Sinusitis.**

HERBAL - The wasabi plant is native to Japan, and is traditionally found growing in or by cold mountain streams. The earliest cultivation of wasabi in Japan dates back to the 10th century.

The grated rhizome, or above-ground rootlike stem, has a fiery hot flavor that quickly dissipates in the mouth, leaving a lingering sweet taste, with no burning sensation. The roots have a strong penetrating odor, which can clear the head and bring tears to the eyes, when inhaled or ingested.

Wasabi is valuable medicinally for its antibacterial properties, and anti-inflammatory action. It has been used for coughs, colds, sinusitis and diarrhea. It is a powerful digestive stimulant, and removes toxins from the body. As a member of the cruciferous family, wasabi contains the same cancer-fighting isothiocyanates as its cabbage relations. Researchers believe that the substances in cruciferous vegetables help prevent cancer by helping the body eliminate excess hormones such as estrogen, thus reducing the risk of hormone-related cancers such as breast and prostate cancer.

Scientists have recently found that a component of the plant inhibits the formation of blood clots and cerebral thrombosis. The plant has exhibited strong antioxidant properties. Research also found that wasabi contains substances that suppress the growth of stomach cancer cells. It has also been used as an antidote to fish poisoning.

RELATIONS - **Compare:** Ars.

***WATER VIOLET

(Bach Flower Essence)

PHARMACY - wat-v-b. Water violet. Hot-tonia palustris. Several flowers are picked by the stalk and left floating in a bowl of sunlit water for several hours. The water is then strained and prepared as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Wat-v-b. belongs to Bach's group of **Loneliness**, with Imp-b and Heath-b. Wat-v-b. treats states of aloofness and haughtiness. Lack of spontaneity and lively involvement. Internal retreating or raising above others may be reflected in a posture of haughtiness and aloofness. Physical stiffness and rigidity.

MIND - Haughty. Feels special, eccentric. Grandiose delusions, narcissistic personality disorder. Reserved dignity. Desire for attention and admiration. Alienates others.

Active engagement with others is avoided or even considered disturbing to inner peace. Disinterest, lack of spontaneity, or even apathy. Tendency to retreat and isolate oneself. Vulnerable and lonely. Insecure. Ailments after severe offense or humiliation.

REFERENCES Bach.

WHITE CHESTNUT

(Bach Flower Essence)

PHARMACY - wh-ch-b. White chestnut. Aesculus hippocastanum. Individual flowers are picked and placed in a bowl of water which is left to the sun's action for several hours. The water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Wh-ch-b. belongs to Bach's group of **Lack of Interest in Present Circumstances**, with Clem-b., Honey-b., Wild-r-b., Oliv-b., Must-b. and Ch-bd-b.

States of preoccupation and intense worry. Mental preoccupation's and worries. Obsessive-compulsive dwelling on an emotional experience. Insomnia from worry, mental preoccupation. Restlessness from worry. Eyesight failure. Irritable colon, gastrointestinal symptoms. Hyper motility, pylorospasm and ulcers.

MIND - Preoccupied with worrisome, returning thoughts. Anxiety, despair. Obsessions, fixations and persistent thought patterns. Delusions and chronic introspection. Automatic responses and compulsive thinking (Cher-p-b., Crb-a-b., Pine-b.). Worried in a state of regret or self-reproach. Disappointment and annoyance. Frustration and exhaustion. Diverted attention.

***WIESBADEN AQUA

PHARMACY - wies. Wiesbaden aqua. The Spring at Wiesbaden in Prussia. Contains in 16 ounces are Carbonic acid 6.416 cubic inches, Nitrogen 0.103 cubic inches of the following solids in grains, Nat-m. 52.49, Kali-m. 1.119 Lith-m. 0.00138, Am-m. 0.128, Calc-m. 3.617, Mag-m. 1.566, Mag-br. 0.027, Calc-s. 0.692, Calc-p. 0.0029, Calc-ar. 0.0015, Calc. 3.210, Mag-c. 0.079, Ferr-c. 0.043, Mang-coll. 0.004, Silicic acid 0.46, Alum-sil. 0.603, traces of Mag-i., Stront-c., Cupr-c. **Dilutions. Historical dose:** Tincture and all potencies.

CLINICAL - Amenorrhea. Angina pectoris. Body, odor of offensive. Constipation. Coms. Diarrhea. Earwax, excessive. Glaucoma. Gout. Hair, rapid growth, loss, grows darker. Hemorrhage. Hemorrhoids. Hernia inguinal, femoral. Indigestion. Miscarriages. Nosebleed. Rheumatism. Infertility. Vertigo. Whitlow.

HOMEOPATHIC - The hot, chlorinated saline springs of Wiesbaden contain 8.176 grams of solids to each liter, and of these Nat-m. makes up more than seven grams. The baths, which constitute the chief part of the treatment, are extremely stimulating.

The baths, combined with drinking the water, generally determine at the beginning of the cure certain phenomena of saturation which disappear on temporary suspension of the treatment. The most common of these is a saburral state of the stomach and a feeling of fullness and tension in the whole abdomen.

Passive or atonic gout, these cases usually pass through a period of aggravation before improvement sets in. Torpid and rheumatisms, the douche being employed as well as the bath. Paralysis, muscular and tendinous contractions. Sprains in complete ankyloses. Stiffness from old fractures. Gunshot wounds which are slow to heal. **Modalities** - Better by nosebleed, by hemorrhoid flux. Worse during menses. Frequent urination worse from coffee. Vertigo worse lying in bed.

COMMENTS - Constantin James noted, "Abdominal plethora and portal obstruction are relieved." By the

artificial congestion which they set up in the venous plexus of the rectum they have for a constant effect the disengage- ment of the viscera under the diaphragm and the prevention of stasis in their parenchyma.

Pelt observed the effects of drinking the water and excessive bathing.

Magdeburg observed the effects on eight very healthy persons. The stimulating, congestive and évacuant effects mentioned by James appeared in the provings. Blood rushes to the face. Vertigo when lying in bed and vertigo which causes falling. Hemorrhages occur from anus and nose which relieve other symptoms.

Fermentation occurs in the abdomen and there is great exhaustion after diarrhea. Hemorrhoid flow occurs with better of abdominal plethora. In one case nosebleed occurred persistently for six weeks, at the end of which a weakness of vision bordering on blindness was cured. During the menses there is great weakness, also constipation.

A number of remarkable symptoms appeared in reference to the skin and nails. The hair grew rapidly and became darker. Nails also grew rapidly. Corns and callosities dropped off.

Berridge cured with Wies. 200c a Miss B., 21 of a soft corn between the fourth and fifth toes of right foot. There was burning and shooting pain. Itching with the sweat. The sweat on the diseased parts made a brown stain. The urine stiffened linen.

RELATIONS - Compare: (1) Nat-m. Corns, Ferr-pic. (2) Callosities, Ant-c. (3) Hair turns darker, Jab., Piloc., Wild.

REFERENCES - Clarice.

***WILD OAT

(Bach Flower Essence)

PHARMACY - wld-o-b. Wild oat. *Bromus ramosus*. The flowering ends are picked and placed in a bowl of water which is left standing in bright sunlight for several hours. The water is strained and used as medicine.

Historical dose: Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Wld-o-b. belongs to Bach's group of **Uncertainty**, with Cer-b., Scler- b., Gent-b., Gors-b. and Hom-b. Wld-o-b. deals with lack of motivation and incentive. A depressive mood may permeate the mind and body. Lethargy, a lack of appetite and mental dullness.

Organic mental disorders and mental retardation after head injuries (Horn-b., Must-b., Scler-b.). Obesity. Peptic ulcer. Non-insulin dependent diabetes. Drug abuse.

MIND - Aimless, dissatisfied. Unmotivated. Absent-minded. Lack of motivation and incentive. Lack of concentration. Boredom, lethargy and dissatisfaction.

COMMENTS - Emotions of frustration, joylessness, aversion, dissatisfaction, meaninglessness, boredom and futility. Feelings of being not fully awakened or activated in one's potential. In some forms of mental illness with organic dysfunction and retardation, this remedy will give incentive within the physical limitations of the disease (Horn-b., Must-b.).

RELATIONS - Cer-b., Scler-b., Gent-b., Gors- b. and Hom-b.

REFERENCES - Bach.

***WILD ROSE

(Bach Flower Essence)

PHARMACY - wld-r-b. Wild rose. *Rosa canina*. Sprigs with leaves and flower heads are boiled for half an hour. Subsequently, the water is strained and prepared as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Wld-r-b. is part of Bach's group of **Lack of Interest in Present Circumstances**, with Clem-b., Honey-b., Oliv-b., Wh-ch-b., Must-b. and Ch-b-d.

States of apathy and resignation. Lethargy, listlessness, lack of energy. Passivity. In sickness, when the fighting spirit is gone and recuperation is not proceeding, or even when death is threatened due to resignation. Schizophrenic states, developmental disorders, psychosis, schizoid personality disorders. Reduced social contact, low emotional involvement.

MIND - Apathy and resignation. Helplessness and powerlessness. Anger or frustration. Disinterest in fighting for health when sick. Retreat from involvement in unfavorable circumstances. Stifled capacity for joy, disinterest in amusement and play, lack of hopes, wishes and dreams.

REFERENCES - Bach.

***WILDBAD AQUA

PHARMACY - wild. Wildbad aqua. The Springs at Wildbad in Wurtemberg. The water contains in 16 ounces, Carbonic ac. grains 0.972, Nat-m. 1.808, Nat-c. 0.837, Nat-s. 0.291, Kali-s. 0.018, Calc. 0.738, Silicic acid 0.480, Mag-c. 0.079, Ferr-c. 0.002, Alum. 0.004 and traces of Mang. Dilutions. **Historical dose:** Tincture and all potencies.

CLINICAL - Bones, pains. Catarrh. Gout. Hair, disorders. Indigestion. Knees, creaking. Nails, soft. Paralysis, spinal. Paraplegia. Rheumatism. Shoulder, rheumatism.

HOMEOPATHIC - In spite of its very slight mineralization, said Constantin James, the water produces very distinct effects in a graduated series.

The first impression of the bath is delicious, this is succeeded by sensations more clear and distinct: a slight degree of excitement, at times luminous sparks before the sight, a finer blood seems to flow to the brain(Puls.).

"One would like to remain in the bath, but something unusual and strange warns you that it is time to get out."

Wildbad is chiefly for **disorders of the spinal cord**, more than half the patients being paraplegic. Sensation as if the brain were over-filled. Gnawing, sinking, empty sensation. Pain as if sprained.

Sensation of looseness in the joints, ankles loose, knees loose, the bones seem as if they did not fit. Teeth seem too long. In one pro ver the hair, which had been greasy, became dry and the beard became of a darker color. Desire to stretch.

Modalities - Worse on waking, at night.

Throbbing and heat in occiput worse lying down. Pain in sciatic nerve, looseness of knees worse walking.

RELATIONS - Compare: (1) Uric acid in urine.

(2) pain in right shoulder, Urt-u. Sang.

REFERENCES-Clarke.

***WILLOW

(Bach Flower Essence)

PHARMACY - will-b. Willow. Salix vi- tellina. Twigs with male or female catkins are boiled for half an hour. Subsequently, the water is strained and used as medicine. **Historical dose:** Take two drops from the stock bottle into a one ounce dropper bottle (add brandy or alcohol, if this bottle will be used for days or weeks). This is the dosage bottle, take a few drops straight into the mouth or as needed in a little water or juice.

HOMEOPATHIC - Will. belongs to Bach's group of **Despondency and Despair**, with Crb-a-b., Oak-b., Star-b-b., Sw-ch-b., Elm-b., Pine-b. and Lar-b. Will-b. deals with states of resentment and bitterness with one's fate. Physical rigidity and worn features may speak of internal bitterness and resentment. Bitterness, disillusionment and depression.

Chronically engaged in repression of aggressive impulses, affecting the heart and intestinal region. Suppressed anger, causing colicky pains, tension headaches, depression. Tachycardia, irregularities in heart activity, hypertension. Hyperventilation. Chronic coughs and constipation (Chic- b., Must-b.) Skin lesions and intermittent insomnia.

MIND - Burdened by an unfavorable and undeserved fate. Blames others for misfortunes. Unfounded resentment, blame. Dissatisfaction and self-pity. Bitterness and dormant despair. Sadness and disappointment. Anger at being mistreated. Outrage and sense of injustice. Self-righteousness, denial of reality, envy and lack of sympathy and compassion.

Malingering (Chic-b.), passive aggressive personality, antisocial and in disruptive behaviors (Holly-b.). Fixed ideas, delusions. Paranoia, as one feels persecuted and thwarted in one's destiny due to the fault of others (Beech-b.).

REFERENCES Bach.

***WITHANIA SOMNIFERA

(Ashwagandha)

PHARMACY - with-s. Withania somnifera. Ashwagandha. Physalis somnifera. Indian winter cherry. Indian ginseng. Wintercheny. N. O. Solanaceae. **Historical dose:** Tincture to first potency.

CLINICAL-Alcoholism. AIDS. Alzheimer's disease. Anemia. Arthritis. Asthma. Brain, fatigue. Breathing, difficulty. Bronchitis. Cancer. Carbuncles. **Convalescence.** Coughs. Emaciation. Emphysema.**Exhaustion.** Hyperglycemia. Immune, disorders. **Impotency.** Infertility. Insomnia. Lumbago. Memory, loss. Nerve, weakness. Paralysis. Rheumatism. **Sexual, debility.** Spermatorrhea. Skin, disorders. Swollen, glands. Tuberculosis. Tumors. Ulcers. Weakness.

HERBAL - Withania somnifera is an important herb used in Ayurveda, the traditional Indian medicine. A native of India, Pakistan and Sri Lanka, the name comes from the peculiar odor of this herb, smell akin to that of a

sweaty horse.

It is an erect branched shrub with a greenish or lurid yellow flowers. In India, it is akin to ginseng in other parts of the orient, both are touted for their longevity enhancing and sexually stimulating properties.

The shoots and seeds are also used as food and to thicken milk in India. It is said to work mainly on the reproductive and nervous systems coupled with rejuvenating qualities. Tumors, inflammation (including arthritis), and a wide range of infectious diseases.

Regulates blood sugar, which aids in suppressing sugar cravings. It is commonly used to increase vitality, recover from chronic illnesses and pain management for arthritic conditions.

HOMEOPATHIC - According to B. Gan- gooly, M.D., from Calcutta, India, in the Homoeopathic Recorder, vol. 37, 1922, With-s. has been employed successfully in all cases of **debility**. Nervousness. Brain fatigue. Loss of memory. Spermatorrhea. Problems resulting from masturbation. Speedy emissions, nocturnal emissions.

MIND - Confused. Cannot collect his thoughts. Loss of memory. Brain fatigue. Indifferent. Sadness, low spirits.

Back - Pain in back.

Ears - Whizzing noises.

Limbs - Great debility.

Eyes - Blue margins around eyes. Painful in the morning. Weak sight.

Face - Pale, flushes of heat.

Female - Infertility. Low sex drive.

Food - Desires sweets, sugar.

Head - Dull headache with buzzing in the head.

Heart - Palpitations.

Lungs - Respiratory disorders. Emphysema. Asthma. Bronchitis and coughs,

Male-Impotency. Low sex drive. Masturbation. Spermatorrhea. Emissions at night and at stool.

Sleep - Lascivious dreams with emissions.

Stomach - Pressure as from as load, with drowsiness, nausea, vomiting.

Urine - Frequent desire to urinate. Burning urination.

Vertigo - Vertigo on standing or walking.

COMMENTS - With-s. is specific for a wide range of conditions including arthritic inflammation. Respiratory disorders including emphysema, asthma bronchitis and coughs, gynecological disorders, especially functional female and male infertility and impotence. Low sexual libido.

Chronic neurological diseases especially anxiety, nervousness, depression and insomnia. Weak digestion, fluid retention caused by lowered body metabolism.

Immuno-compromised diseases including tuberculosis and AIDS, chronic upper respiratory diseases, degenerative symptoms attendant to aging, juvenile mal-develop- ment and growth.

RELATIONS - Compare: Phos.

REFERENCES - Gangooly. Murphy.

***WYETHIA HELENOIDES

(Poison Weed)

PHARMACY - wye. Wyethia helenoides. Poison weed. Alarconia helenioides. Melar- hiza inuloides. N. O. Compositae. Tincture of the root. **Historical dose:** Tincture and all potencies, first to sixth potency.

CLINICAL - Allergies. Asthma. Amenorrhea. Asthma. Bronchitis. Constipation. Coryza. Coughs. Depression. Diarrhea. Dysmenorrhea. Epiglottis disorders. Fatigue. Fevers. **Hay fever.** Headache. Hemorrhoids. Hiccoughs. Indigestion. Influenza. **Itching.** Leucorrhea. Nervousness, Ovaries, pain. **Pharyngitis.** Post-nasal catarrh. Salivation. Sneezing. Throat, sore. Uvula disorders. Weakness.

HOMEOPATHIC - Wye. was introduced and proved with the fresh root or the tincture, on seven men and two women, by Selfridge. The first proving gave Wye. a definite and *important place in throat disorders. Those symptoms make up the first pathogenesis.*

Wye. has marked effects on the throat and has proven an excellent remedy in **pharyngitis**, especially the follicular form. Irritable throats of singers and public speakers. Throat feels swollen, epiglottis dry and burning. Constant desire to swallow saliva to relieve the dryness yet affording no comfort. Swallows with difficulty.

Hay fever symptoms, **itching in posterior sinuses.** Prickling, dry sensation in posterior sinuses, sensation as if something were in nasal passages, an effort to clear them through the throat affords no relief. Burning sensation in bronchial tubes. Dry, hacking cough, caused by tickling in epiglottis. Useful also in hemorrhoids.

MIND - Nervous, uneasy, apprehensive of calamity. Depressed. Incapacitated for mental work. Averse to company. Impatient and quarrelsome.

Abdomen - Pain and bearing down in abdomen, right side. Pain below ribs of right side.

Back - Swollen and sore glands on right side of neck.

Chest - Deep-seated sharp pain just below right ribs, followed by soreness.

Ears - Itching in right ear. Pain in left ear. **Eyes** - Itching in left inner canthus.

Female - Menses commenced with intense burning pain. Leucorrhea. Pain in left ovary, shooting down to knee. Pain in uterus, can outline its contour.

Head - Rush of blood to head. Sharp pain in forehead. Severe headache.

Limbs - Pain in back, extends to end of spine. Pain right arm, stiffness of wrist and hand. Aching pains all over.

Lungs - Dry asthma. **Dry, hacking cough** caused by tickling of the epiglottis. Burning sensation in bronchial tubes.

Modalities - Worse afternoon, after eating.

Worse motion. Worse exercise, it causes perspiration.

Mouth - Feels as if scalded, sensation of heat down esophagus. Itching of the palate.

Nose - Hay fever symptoms. Sensation as if something in nasal passages.

Rectum - Loose, dark, at night. Constipation with **hemorrhoids**, not bleeding. Great constriction of rectum. Itching of anus and rectum.

Sensations - Mouth as if scalded. Uvula as if elongated. Epiglottis feels dry and burning. Weight in stomach as if something indigestible had been eaten. Uterus feels as if it enlarged in order to contain all the pain.

Sleep - Wakes frequently and too early.

Stomach - Belching of gas, alternating with hiccough. Nausea and vomiting. Sense of weight in stomach, as if something indigestible had been eaten.

Temperature - Chill at 11 a.m. Thirst for ice water during chill. No thirst with heat. Profuse sweat all night. Terrific headache during sweat.

Throat - Hot, dry throat. Constant clearing and hemming. **Dry**, posterior sinuses, no relief from clearing. **Throat feels swollen**, epiglottis dry and burning. Difficult swallowing. Constant desire to swallow saliva. Uvula feels elongated. Tendency to get hoarse talking or singing.

Vertigo - Dizzy.

COMMENTS - Nonspecific hay fever, characteristic itching of the upper palate. Hay asthma, allergic asthma. A history of hay fever going to the lungs, or asthma caused by hay fever treatments or decongestants. Kent used this as a prophylactic hay fever remedy.

Tough, ropy saliva. Belching alternating with hiccough. Pain over left ovary, shooting down to knee. In one case, menses, which had been in abeyance since confinement a year before, resumed with much pain.

Hale noted several cases from Selfridge. The first concerned dry asthma in a woman who had several attacks promptly relieved with Wye. The second case noted the effectiveness of Wye. in chronic follicular pharyngitis with dryness of pharynx and burning in epiglottis. In the third case, Hale found Wye. to be successful in a case of severe epidemic influenza.

Clarke had a case reported to him in which a boy had been kept awake many nights by a persistent, dry, hacking, nervous cough. Wye. 30c cured in one dose.

RELATIONS - Compare: (1) Arum, Sang., Lach. (2) In throat affections, Arum-d., Caust., Hep., Stict., Rumx., Pen., Phos., Sulph. (3) Tough, ropy saliva and headache, Epip. (4) Sensation as if something indigestible eaten, Abies-n. (5) Scalded mouth, Ran-s.

REFERENCES - Boericke. Clarke. Murphy-

***X-RAY

PHARMACY - x-ray. X-ray. Dilutions made from absolute alcohol irritated with x-rays through a glass bottle.

Historical dose: All potencies.

CLINICAL -Anemia. Anorexia. Burns. Cancer. **Chronic fatigue.** Debility. Dermatitis. Emaciation. Heart, problems. Hemaphila. Hemorrhages. Infertility. **Leukemia.** Mastectomy, pains. Memory, weak. Ovaries, atrophy. Psoriasis. Purpura. Radiation, dermatitis. Skin tumors. Sterility. Sun, exposure. Testes, atrophy. **Vitality, low. Warty growths. Weakness.** X-ray, poisoning.

HOMEOPATHIC - Roentgen noted that repeated exposure to X-rays produced skin lesions often followed by cancer. Changes take place in the blood lymphatics and bone marrow. Its homeopathic action is centrifugal towards the periphery of the body. The stock comes from the potency 1c of this irradiated alcohol.

The proving on X-ray was conducted by Fincke in 1897, on ten provers, using 6x. This was repeated by W. B. Griggs on two male and one female provers, and published in the Homeopathic Recorder in 1952 using the 30c and 200c potencies.

X-rays have the property of stimulating cellular metabolism. **Arouses the vitality, mentally and physically.**

Useful for syndromes of deficiency of certain elements present in the blood. **Leukemia.**

General debility. **Chronic fatigue and a sick feeling.** Unexplained weakness. **Low vitality and anemia.** Discharges, gray, white with jelly-like lumps. Psoriasis. Corresponds to burns, that refuse to heal. Distressing pain. Sexual glands are particularly affected. Atrophy of ovaries and testicles. Infertility.

X-rays brings to the surface suppressed symptoms, especially the psoric and sycotic due to mixed infections. For cancer patients submitted to treatment by radiation. X-rays, cobalt. For patients submitted for therapy by immuno-suppressors and all anti-tumor chemotherapy.

MIND - Sadness. Aversion to company. Memory, weak. Sleepy. Irritable, desire to kill, especially before and during menses. **Abdomen** - Heaviness and fullness in lower abdomen, distended. Flatulence with ineffectual desire for stool.

Back - Lamé and stiff in back. Aching whole length of spine. Cramping pains in the back and lumbar region in the morning, on walking. Soreness in small of back.

Blood - Decreased leucocytes and platelets. **Leukemia.** Hypochromic anemia. Hemorrhagic syndromes. Hematoma, tendency to hemorrhage, purpura.

Breasts - Nerve pains after mastectomy.

Chest - Thorax painful, palpitations. Contraction of chest at night relieved by belching. Sensation of drops of water trickling down on inside of chest.

Ears - Sensation of fullness, noises in the ear, buzzing. Sore pain in cartilage of left ear when pressing it, later in right ear. Pressing outward in ears. Buzzing in right ear with pressure extending to temples. Intermittent noise as of deep steam-whistle in left ear.

Eyes - Painful to the touch. Eyeballs sore. Sensation in right eye as if bulging. Bearing down of eyelids. Eyelids heavy and sleepy.

Face - Red, smooth eruption on right side of face. Dull pain in right upper jaw. Paralytic feeling in right cheek. Stinging pains in different parts of head and face.

Female - Menses profuse or lacking. Menses dark green one day. Pain darting upward in region of left ovary. Flushes of heat, better afternoons and evenings.

Food - Anorexia, aversion to food. Can eat plenty but does not enjoy it. Desire for sweets.

Head - Sticking pains in different parts of head and face. Ringing in head. Sensation of fullness in the head. Pain in the forehead, occiput, temples, extending to the neck. Better by hot compresses on the forehead.

Heart - Extra systole on coughing or crying. Pain in the precordial region. Noises from the heart prevent him from sleeping on the left side.

Kidneys - Oliguria, tenesmus of the bladder. Retained urine. Kidney colic with vomiting. Clutching pain from left kidney to bladder.

Limbs - Rheumatic pains. Trembling of the limbs. Generalized pains in the limbs, sciatic neuralgia. Sensation of electric current at the limbs.

Lungs - Cough caused by palpitation, in evening. Cough in the morning with green sputum. Grayish expectoration.

Male - Lewd dreams. Sexual desire lost. Sterility. Re-establishes suppressed gonorrhea.

Modalities - Better from hot applications. Worse from cold, open air. Worse movement. Worse afternoon, evening and night, when in bed.

Mouth - Bad taste in the mouth. Tongue dry, rough, sore. Teeth discolored, graygreen color.

Neck - Painful stiffness of the neck, on lifting the head from the pillow. Sudden "cricks" attack first one side of neck, then the other, worse on getting cold. Aching pains in left side of neck.

Nose - Nasal congestion, odor of sulphur vapor.

Rectum - Diarrhea, constipation and anal itching. Green stools.

Skin - Skin is discolored, pale, sclerous, cold. Skin dry, wrinkled. Hyperkeratosis of the skin. **Warty growths.** Radiation dermatitis. Chronic itching eruptions. Papular, vesicular, itching eruptions. Dry, itching eczema. Psoriasis. Palms rough and scaly. Erythema around roots of nails. Painful cracks. Nails thicken. Ingrown nails.

Sleep - Sleepy with headache. Sleepy all the time with chronic fatigue. Sleepy, but unable to sleep for some hours after retiring.

Stomach - Nausea with a sick feeling. Nausea and vomiting with profuse sweat after immense stool. Sick feeling in stomach.

Temperature - Chills as soon as beginning to sleep, running up back, preventing sleep. Chilly while undressing in warm room. Chilliness on moving or from draft. Perspires easily. Profuse perspiration on getting into bed, keeping him awake. Night sweats. Spells of fever, perspiration and weakness.

Throat - Throat painful on swallowing. The pharynx has gray-green mucus, discomfort and cramping pain on swallowing. Sensation of narrowness in the throat.

COMMENTS - Dr. John B. Campbell, one of Fincke's original provers, discovered the great value of this remedy in rousing the reactive vitality of the system, both mentally and physically. In doing so, it brings suppressed symptoms to the surface in persons laboring under a combination of Hahnemann's miasms. This is particularly helpful in deep-seated constitutional ailments, sycotic in character, which often terminate in malignant disease, especially cancer.

Useful for conditions lacking presenting symptoms. When well selected anti-psoric remedies (Calc., Med., Psor., Sep., Sulph., Syph., or Tub.) fail to relieve completely. When well-indicated remedies fail with a history of exposure to radiation. Tends to bring out old suppressed eruptions or discharges (Sulph.).

Non-specific chronic fatigue and weakness. Sores that fail to heal. Neuralgias after mastectomy. Extreme thirst and dryness of the mouth.

X-ray burns, whether of the bone or skin. History of exposure to x-rays. Radiation sickness. Weakness after radiation treatments (Sol.).

Dr. King developed an x-ray burn on his left hand. Eighteen months later, seedy warts appeared. Caust. finally helped, so he believed that Caust. may potentially be another antidote for x-rays.

RELATIONS - Antidotes: Nux-v., Sulph. and the dynamic potencies of the remedy. **Compare:** (1) Cadm-s., Care. - Cancer patients, weak immune system. (2) Electr. - Sugar of milk saturated with the current. Anxiety, nervous tremors, restlessness, palpitation, headaches. Dreads approach of thunder-storms, heaviness of limbs. (3) Magn-ambo. Magn-arct. Magn-aust. (4) Merc. - Desire to hurt, even those dear to him, agitated, confused. Tongue covered with a yellowish coating and retaining the teeth imprints. (5) Phos. - Bleeding of bright red blood, frightened, hypersensitive, afraid of the dark and of storms. (6) Sec. - The limbs are cold with paresthesia, hemorrhaging of black blood, aggravated by the heat, ameliorated by the cold.

***XANTHIUM SPINOSUM

(Spiny Cocklebur)

PHARMACY - xanth. Xanthium spinosum. Spiny cocklebur. N. O. Compositae. **Historical dose:** Tincture and all potencies.

CLINICAL - *Cystitis*. Hydrophobia. Rabies.

HOMEOPATHIC-Xanth. is a wildflower that occurs throughout North America. Boericke stated that cockle is known to be a specific for hydrophobia and is recommended for chronic cystitis in women.

Chronic cystitis, that responds to several remedies in the acute phase but keeps recurring. For chronic or interstitial cystitis with a history of sexual abuse at a young age, especially those that include violence and repeated torment. Strong fear of being attacked, especially at night.

RELATIONS - **Compare:** Staph., Lyss., Hyos., Lach., Stram., Care.

REFERENCES - Boericke. Klein.

***XANTHORRHIZA APIFOLIA

(Shrub Yellow Root)

PHARMACY - xanrhi. Xanthorrhiza apifolia. Shrub yellow root. Contains Berberine. N. O. Compositae. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC - Xanrhi. has dilatation of stomach and intestines, atony, enlarged spleen.

REFERENCES - Boericke.

***XANTHORRHEA ARBOREA

PHARMACY - xanrhoe. Xanthorrhoea arborea. **Historical dose:** Tincture and all potencies.

HOMEOPATHIC - Xanrhoe. has a reputation of being a good kidney tonic. It has severe pain in kidneys, cystitis and gravel. Pain from ureter to bladder and testicles, pain in small of back returns from least chill or damp.

REFERENCES - Clarke.

***XANTHOXYLUM FRAXINEUM

(Prickly Ash)

PHARMACY - xan. Xanthoxylum fraxineum. Prickly ash. Xanthoxylum americanum. Toothache tree. N. O. Rutaceae. Tincture of fresh bark. **Historical dose:** Tincture and all potencies.

CLINICAL - After-pains. Amenorrhea. Aphonia. Asthma. Cholera. Coccyx, pain. Colic. Dyspepsia. Dysentery. **Dysmenorrhea**. Earache. Fibroids. Flatulence. Headaches. **Hemiplegia**. Hoarseness. Hysteria. Injuries. Insomnia. Jaw joint, pain. Levitation. Menstruation, painful. Nausea. Nerves, injured. Nervousness. **Neuralgia**.

Neurasthenia. Ophthalmia. **Rheumatism**. Sciatica. Toothache. Ulcers.

HERBAL - Xan. belongs to the Rutaceae and has a vulnerary action (Ruta.). Xan. contains Piperin.

Rafinesque was the first to investigate Xan., which was known to him as "a great article in the Materia Medica of the Indians," who use the root bark in decoction for "colics, gonorrhea, syphilis inward pains toothache, ulcers, etc. It is a great topical stimulant," he continues, "changing the nature of malignant ulcers."

T. C. Duncan, recounting reminiscences of his boyhood, said, "There was another remedy that set my youthful mouth and stomach on fire and that was Prickly Ash. You wanted to open the mouth to let the cool air get in." This warmth is felt as a warm glow through the entire system with a sensation in the nerves as if gentle shocks of electricity were passing through the body.

HOMEOPATHIC - Xan. exerts its influence on nerves, female sexual organs, respiration and left side. Its action is on the nervous system and mucus membranes.

Injury to nerves. Neurasthenia. Pricking sensation, shocks as from electricity. Numbness of left side. Paralysis, of single parts. **Hemiplegia**. Insomnia. Occipital headache. **Neuralgic and rheumatic** disorders, especially in patients of spare habit and nervous, delicate organization.

Increases mucus secretion of mouth and stimulates the secretion from all glands with ducts opening in the mouth. Poor assimilation, emaciation. Indigestion from over-eating or from too much fluid.

Painful hemorrhages, after-pains, **dysmenorrhea**. Sluggish capillary circulation. Mucus membranes smart as from pepper. As if floor were soft like wool, on walking. Injury to nerves.

Grinding, shooting, radiating, sudden pains, neuralgia. Many pains are radiating, some are sudden, arouse from sleep and cause the patient to catch her breath. Pains are excruciating, unbearable and are accompanied with red, hot face, but the heart pains causes pallor.

MIND - Nervous, frightened feeling. Mental depression. Did not care if she lived or died. **Abdomen** - Some pain in right side below ribs. Gripping pain on waking in morning. Colic pain in right iliac region. Rumbling with soreness on pressure. Flatulence.

Back - Very severe pain in cervical and upper sacral region. Back of neck numb. Dull pain from nape to right scapula.

Causations - Injury to nerves. Wetting (getting feet wet). Suppression of menses.

Chest - Oppression of chest.

Constitutions - Suited to women of spare habit, nervous temperament and delicate nerves. Neurasthenic patients who are thin, emaciated, poor assimilation with insomnia and occipital headache.

Ears - Ringing in ears. Loud noise in right ear, as of a valve constantly opening and shutting. Dull pain in right ear. Darting pain under and back of right ear.

Eyes - Watering of eyes and nose. Lachrymation, pain in lid of right eye. Eyes bloodshot with red margins and feel as if full of sand. Dull, heavy, grinding pain in left eye. Ophthalmia. Eyes twitched, pupils dilated. Vision blurred, as if looking through blue lace. Objects seem a long way off.

Face - Hot flushes over face and head. Face much flushed. Pallor even to lips with heart pains. Neuralgia of lower jaw. Pain in right jaw-socket.

Female - Menses too early and painful. Menses thick, almost black. Leucor-rhea at time of menses. Leucorrhea with amenorrhea. **Neuralgic dysmenorrhea** with neuralgic headaches, pain in **back and down legs**. Ovarian neuralgia with pain in loins and lower abdomen, **worse leftside**, extending down the thigh, along genito-crural nerves. **After pains** (Arn., Cupr., Cham.).

Food - Very thirsty, drank much at a time. Unusually hungry. No appetite. Anorexia.

Head - Feels full. Weight and pain on vertex. Pain over eyes, throbbing pressure over nose, pressure in forehead, head seems divided, ringing in ears. Occipital headache. Sick headache with dizziness and flatulence. Throbbing headache, pain as if top of head would fly off. As if head is divided into two parts. As of a tight band around.

Kidneys - Urine at night and next morning scanty and high-colored. Profuse, lightcolored urine, nervous women.

Limbs - Numbness of left side, impairment of motion. Paralysis of left side following spinal disorders. Hemiplegia. Left arm numb. Neuralgic shooting pain, as from electricity, all over limbs. Anterior neuralgia (Staph.). Sciatica, worse hot weather. Pain in nape, extending down back.

Lungs - Shortness of breath. Constant desire to take a long breath, oppression of chest. Dry cough, day and night. Cough, slight hacking in spells, only in open air.

Modalities - Better from drinking ice-water, vomiting. Better lying down. Headache is better by cold water and in open air. Neck pain is better by pressure and by throwing head back. Worse from sleeping, in morning, 4 a.m. Worse dampness, getting feet wet. Worse suppressed menses. Worse by moving head suddenly.

Mouth - Peppery taste in mouth, fauces and throat. Burning and dry feeling in mouth and tongue. Ptyalism,

tongue coated yellow. Tongue seemed to alternately expand and contract. Dryness of mouth and fauces. Pharyngitis (Wye.).

Nose - Fluent coryza. Right nostril seems filled up, discharge of dry and bloody scales of mucus. Discharge of mucus from nose with congested feeling, as if it were about to bleed. Slight nose-bleed. Dryness of both nostrils. Numbness throughout left side of body, division felt in nose.

Rectum - Constipation in morning. Gripping and diarrhea. Dysentery with **tympanites**, tenesmus, inodorous discharges. Epidemic dysentery. Cholera collapse stage.

Sensations - As if top of head would be taken off by flashes of throb-like pain. As if bewildered with pain in back of head. Feeling of looseness of brain. Eyes as if full of sand. As if walking on wool. As if sunk deep in bed. As if body expanded.

Skin - Measles, dullness, bewilderment, drowsiness and want of sufficient development of the eruption. Old, indolent ulcers.

Sleep - Continued gaping, drowsiness. Hard and unrefreshing, dreams of flying. Sleeplessness in neurasthenics. A dream of suffocation woke her.

Stomach - Dyspepsia from excessive eating and drinking. Feeling of fullness of pressure in epigastrium, fluttering. Intense burning and stinging in esophagus with slight nausea. Empty belchings with slight taste of ingesta. Nausea with headache, with sense of oppression at stomach.

Temperature - Slight chill accompanied by death-like nausea. Frequent chills with pains in limbs, nausea. Typhoid fever in stage of collapse. Sense of heat all over veins, flashes of heat from the head to foot.

Throat - Aphonia. Hoarseness with husky feeling in throat, obliged to clear throat frequently. Throat dry, very difficult to talk. Peppery taste in mouth and throat.

Feels hollow. Pain and soreness in right side of throat. Throat felt as if in a vice.

COMMENTS - Xan. belongs to the Rutaceae and like Ruta, has a vulnerary action, as Clarke discovered in the case of Miss X., 28, who injured her right ulnar nerve at the elbow by repeatedly striking it against the edge of a bath while washing some articles.

For two months she had to keep the arm in a sling. A few weeks after that the arm was swollen. Some eight months after the injury Clarke saw her. The pain centered in the ulnar nerve where it crosses the inner condyle of the humerus, though there was pain above and below as well.

Clarke gave Ruta 30c, which gave some relief to the pain and relieved a frontal headache to which the patient was subject. The arm becoming less well, Clarke gave Xan. 12c four times a day. This made a distinct improvement in the arm and also relieved a dysmenorrhea to which Miss X. was subject. After treatment with various potencies of Xan. the nerve lost its sensitiveness and the patient could use her arm freely.

In one of Cullis' provers, Miss D. (there were six provers, three of them women, all took the tincture), the entire left half of the body became numb, the left half of the head being sharply divided in sensation from the other half. These symptoms with the many head pains and fullness in the head, give the correspondence in hemiplegia in which Xan. has been given with success.

Two additional provings on women appear in C. D. P. In these provings 20 to 100 drop doses of the tincture were taken and symptoms of great severity were produced. Both provers had severe dysmenorrhea pains with increased and anticipating flow.

The symptoms in each case roused the prover from sleep with pain and suffocation, the pain being confined to head, heart, throat and pelvis. Many of the pains were radiating from above right eye over head from right ovary down thigh and in other directions. Left-sided numbness was present in one, who also had symptoms of levitation and disordered sensation.

Cullis, who had success in cases of dysmenorrhea and amenorrhea, related several cases, including that of Miss A., 25, brunette, who had menstrual irregularity since commencement, would go three, four or five months and then her sufferings were excruciating. When she came under treatment had no menses for two months. Xan. 1c was give, 5 drops thrice daily. Menses appeared in three days and were painless.

Miss B., fair, nervous, had menses suppressed by getting feet wet, being then a weekovertime. Xan. lx, 5 drops every three hours, brought on menses the next day.

P. C. Majumdar cured a case of uterine fibroid with Xan. 3x. An emaciated, feeble, wrinkled woman, 56, widow, had been advised by allopaths to have an operation for tumor. Menstruation had ceased fifteen years before. It had been profuse and painful and preceded and followed by leucorrhea.

She had neuralgic pain in right ovarian region, a hard nodular tumor size of a small orange, painful on deep pressure. Fetid, yellowish white discharge from vagina. Nervous, depressed, lazy and sleepy even in daytime. Appetite poor, disgust for food.

Xan. 3x was given night and morning. In a week the pain was better and discharge less. In four weeks Majumdar found the patient a changed person. The tumor was much softer and reduced by half. In six months

the tumor had gone and the patient was quite well, Xan. having been taken intermittently all the time.

RELATIONS - Compare: (1) Gnaph., Cimic., Staph., Mez., Pise.

***XEROPHYLLUM TENAX

(Basket Grass Flower)

PHARMACY - xero. Xerophyllum tenax. Basket grass flower. Tamalpais lily. N. O. Melanthiaceae. **Historical dose:** Tincture and all potencies.

CLINICAL - Backache. Constipation. Dermatitis. Dyslexia. Eczema. Flatulence. Leucorrhea. Poison oak. Typhoid.

HOMEOPATHIC - Xero. should prove curative in eczema conditions, poison oak and early typhoid states, etc.

MIND - Dull, cannot concentrate. Forgets names. Dyslexia. **Writes last letters of words first.** Misspells common words. Bewildered. Loss of consciousness.

Abdomen - Intestinal flatulence. In morning, rumbling with desire for stool.

Back - Feels hot from sacrum to scapulae. Heat deep in spine. Backache, extending down legs. Pain over kidneys.

Eyes - Painful, as if sand, smarting, Hard to focus for close work. Eyes sore, burn.

Face - Bloated, morning. Puffy eyes.

Female - Bearing-down sensation. Vulva inflamed with furious itching. Increased sexual desire with ovarian and uterine pains and leucorrhea.

Head - Feels full, stuffed up, pain across forehead and above eyes. Great pressure at root of nose. Pulsating headache.

Kidneys - Difficulty retaining urine, dribbling when walking. Frequent urination.

Limbs - Limbs feel stiff (Rhus-t.). Muscular lameness, trembling. Inguinal glands and behind knees swollen. Pain in knees.

Lungs - Posterior sinuses raw, discharge thick, yellow mucus. Sneezing. Trachea sore, lumps feel constricted.

Modalities - Better application of hot water. Better in morning. Better moving affected part. Worse application of cold water. Worse in afternoon and evening.

Nose - Stuffed, tightness at bridge of nose, acute nasal catarrh.

Rectum - Constipation, stools hard, small lumps. Difficult, soft stools with much straining. Much flatus. Bearing-down pain in rectum.

Skin - Skin rough and cracked, feels like leather. Dermatitis, especially around knees. Inflammation resembling poison oak. Erythema with vesication and intense itching, stinging and burning. Blisters, little lumps.

Stomach - Feels full and heavy. Belchings sour offensive, an hour after luncheons and dinner. Vomiting at 2 p.m.

Throat - Stitching pain upon swallowing. **RELATIONS - Compare:** Rhus-t., Anae.

REFERENCES - Boericke. Clarke.

***YERSIN SERUM

(Anti-plague Serum)

PHARMACY - yersin. Yersin serum. The yersin serum is derived from the anti-plague serum, supplied by Institute Pasteur. **Historical dose:** All potencies.

CLINICAL - Abscess. Adenitis. Buboes. Colitis. Crohn's disease. Encephalitis. Erythema. Gastroenteritis. Influenza. Ileitis. Meningitis. Parkinson's disease. Plague. Septicemia.

HOMEOPATHIC - According to Fortier-Ber- noville, it is Barishac who proposed Yersin for the treatment of grave or a typical forms of influenza. Severe form of influenza of pulmonary type with hyperthermia, respiratory troubles, soft thick, rosy expectorations, presence of sub-crepitant rales in the base of lungs.

Mesenteric adenitis. Acute entero-colitis, gastro-enteritis with lesion of ilium. Acute enteritis of young children. Crohn's regional ileitis. Influenza of gastro-intestinal form. Pseudo-typho meningitis of milkmen. Meningitis syndromes of influenzal origin. Encephalitis lethargica. Parkinson's disease.

Severe toxic, infectious states, either cutaneous (bubo) or pulmonary. Septicemias accompanied with icterus and hepatic abscess. Acute toxicosis of babies. Lymphoid terminal ileitis of Arnulf and Buffart. Nodulous erythema.

RELATIONS - Compare: (1) Tub-a., Bapt., Pyrog. (2) Mimosa Púdica - thoracic pain, dry cough, irritation of naso-pharyngeal and laryngeal mucus, frequent irritating stools with colic, better by not bath. (3) Amorpho-phallus Ri vieri - general ill feeling with great weakness, gastro-intestinal troubles with weakening diarrhea,

fetid stools.

REFERENCES - Clarke. Julian.

***YOHIMBINUM CORYANTHE

(Yohimbe Bark)

PHARMACY-yohim. Yohimbinumcoryanthe. Yohimbe bark. N. O. Rubiaceae. A crystalline alkaloid obtained from the bark of the Yohimbeha or Yumbel tree of the Cameroons. Trituration. **Historical dose:** Tincture and all potencies.

CLINICAL - Aphrodisiac. Diuresis. Hyperemia. Impotence. Menorrhagia. Neurasthenia. Palpitations. Priapism. Urethritis. Sexual, neurasthenia.

HERBAL - The natives of West Africa discovered a potent aphrodisiac in the bark of the Yohimbeha tree, and from this an active principle. It is a powerful stimulant of the genital function in males.

Excites the sexual organs and acts on the central nervous system and respiratory center. An aphrodisiac, used in physiological doses, but contraindicated in all acute and chronic inflammations of abdominal organs.

HOMEOPATHIC - Useful for priapism and congestive states of the sexual organs. Menorrhagia. Hyperemia of the milk glands, stimulates breast-feeding. In animals Yohim. causes increased liveliness and cheerfulness, hyperemia of the conjunctiva, heat and redness of the ears and of the nose also in dogs.

MIND - Intense agitation with trembling.

Abdomen - Flying heat sensations in abdomen.

Back - Flying heat sensations in back.

Face - Sensations of heat, heightening the color.

Food - Appetite almost completely disappeared.

Head - Agitation with flying sensations of heat in face.

Heart - Heart beats more intense and more frequent, pulse, normally 80, became 108. Flying sensation of heat in heart.

Kidneys - Urine clean abundant, foamy, no trace of albumen, had to rise three times in the night. Urethritis.

Limbs - Hands trembled, could scarcely write, writing was illegible.

Male - Sexual neurasthenia with impotence. Priapism. **Strong and lasting erections** in the morning without increase of desire. Enlargement of testicles and epididymis.

Mouth - Disagreeable, metallic taste. Copious salivation. Tongue covered with a yellow coat.

Rectum - Intestinal hemorrhage. Bleeding hemorrhoids. Stools frequent, liquid, black and bilious.

Sleep - No sleep all night. **Sleeplessness.** Thoughts of events of whole past life keep him awake.

Stomach - Nausea and eructation.

Temperature - Rigor intense heat, waves of heat and chilliness, tendency to sweat.

COMMENTS - Lambrechts related the case of a young man, 28, "thin, anemic, nervous and partially impotent," who took a 5 mg. tablet one morning, another in the evening and a third the following morning. The symptoms were so severe that he discontinued the herb in spite of a certain amelioration of the sexual neurasthenia. Yohim. set up symptoms of fever, disordered the digestion, caused agitation and tremors and increased the action of the heart. Eulenburg used Yohim. in 10 drop doses of a 1 percent solution and "in cases of neurasthenic impotence with excellent result."

RELATIONS - **Compare:** (1) Erections - Canth., Pic-ac., Phos., Graph., Canth.

REFERENCES - Boericke. Clarke.

***YTTRIUM METALLICUM

PHARMACY - yttr. Yttrium metallicum. **Historical dose:** All potencies.

CLINICAL - Aphonia. Cancer. Colds. Eye problems. Headache. Hoarseness. Lung, problems. Voice, problems.

HOMEOPATHIC - Headache in forehead, temples and vertex. Neck problems, stiffness. Eye inflammations, visual disturbances. Colds with watery coryza. Hoarseness. Voice problems. Loss of voice. Stammering. Lung problems. Irritation of lungs. Cancer. Pain in arms. Problems with genitalia, testes and ovaries. Menses profuse.

Bruised pains. Itching. Weakness. Sleepy. **Nervous trembling.** Worse left side. Worse cold weather, cold feet, **cold, damp.** Better being outside.

MIND - Irritability. Humiliation. Mood uncertain, crying. Anticipation. Fear of giving performance, speeches. Fear of heights, ladders. Fear of narrow spaces. Dreams of heights, falling, ladders. Dreams of mountains, volcano, water.

REFERENCES - Scholten.

***YUCCA FILAMENTOSA

(Bear Grass)

PHARMACY - yuc. Yucca filamentosa. Bear grass. Agavaceae. N. O. Melanthaceae, Liliaceae. Tincture of root and leaves when not in flower. Tincture of flowers. **Historical dose:** Tincture and all potencies.

CLINICAL - Biliousness. Coryza. Diarrhea. Flatulence. Headache, temporal. Post-nasal catarrh. Throat, granular.

HOMEOPATHIC-Yuc. was proved by Rowell and four others in the 30c. Farrington gave these Yuc. indications: biliousness with pain going through upperpart of liver to back. Diarrhea which contains an excess of bile. Much flatus passed by rectum. Frequent passage of flatus and of watery, yellowish-brown stools. Dull ache in center of liver. Abdomen sensitive.

As with many liver disorders, there is chilliness, cannot bear to be away from the fire. Face sallow. Bilious symptoms with headache. Frontal or temporal headache with frequent flushing of face. Bad taste in mouth. Tongue coated yellow and taking imprint of teeth. The tongue is usually a bluish white.

MIND - Despondent and irritable. Irresolute. Disinclined to study. Mind wanders, uses wrong words. Unable to remember anything read. When others talking to him, hears but doesn't seem to understand.

Abdomen - Deep pain in right side over liver, going through back. Abdomen bloated after dinner and feels sore. Rumbling. Colic. Crampy pains in abdomen after breakfast. Throbbing, painless, right side about twelfth rib. Much flatus emitted, odorless.

Back - Constriction of neck muscles, seems to draw head backward. Tight feeling around neck, evening, had to take off collar. Severe pain in left scapula, at 9 p.m. Backache.

Chest - Constriction in whole chest and in heart. Pain in upper intercostal muscles.

Ears - Pain behind right ear, 6:30 p.m. Very sensitive to least noise.

Eyes - Dark rings under eyes. Eyes feel hot and inflamed. Itching and smarting left eye, left inner canthus. Dull pain over left eye.

Face - Pale, flushed, burning, yellow. Momentary aching in zygoma, recurring several times. Pain in jaw joints.

Food - Appetite increased, food relished, lost.

Head - Headaches frontal, heavy, pressing, throbbing. Headaches as if top of head would fly off. Temporal arteries throb. Sensation of cold air blowing on left side of scalp.

Heart - Constriction in heart. Momentary aching in heart region. Visible throbbing in arteries of hand. Pulse full and heavy, a little irregular.

Kidneys - Circumscribed edematous red swelling, raw sensation around meatus. Irritable bladder, frequent urination. Burning when urinating. Urine increased, high specific gravity.

Limbs - Crampy pains in knees. Sore, crampy pains in muscle of back of left leg, just above ankle, as if sprained.

Lungs - Hard, rattling cough.

Male - Burning and swelling of the prepuce with redness of meatus. Gonorrhea (Cann-s.). Erections, all night long but no emissions, cannot study, mind runs on sexual subjects.

Modalities - Gripping pain is better bending forward. Worse by noise. Worse motion, pressure.

Mouth - Bad odor from mouth. Taste as of rotteneggs(Arn.). Back of mouth dry. Yellow tongue yellow, coated, taking imprint of teeth (Merc., Podo., Rhus-t.).

Nose - Nose red. In evening, right side of nose constantly running, left dry. Profuse, bloody, watery discharge. Coryza. Sensation as if something hung down from posterior sinuses, cannot get it up or down.

Rectum - Constant desire for stool. Sudden, violent tenesmus, followed by discharge of wind, which relieves the pain. Diarrhea following pains in abdomen. Stools are watery, copious, thin, yellowish brown with smarting at anus. Stool yellowish brown with bile. Tenesmus after stool.

Sensations - As of something hanging down from back of sinuses. As if cold air blowing on left side of scalp.

Skin - Erythematous redness.

Sleep - Very sleepy in the evening. Restless night. Lewd dreams.

Stomach - Aching and sharp pains in stomach. Region of stomach sore and sensitive.

Temperature - Coldness of scalp, left side, as if cold air blowing on it. Coldness, cannot bear to be away from fire. Restless and feverish. Hot, feverish. Face sweats, evening.

Throat - Tonsils dark red, not sore. Pharynx seems covered with granules is dark red. Stringy, greasy-looking mucus back of throat. Sensation as if something hanging down from posterior sinuses.

RELATIONS-Antidoted by: Cocc. **Compare:** (1) Constriction in heart, Lil-t. (2) Biliousness, Bry. (3) Tongue imprinted with teeth, Merc., Podo. (4) Blue tongue, Gymn.

REFERENCES - Boericke. Clarke.

***ZEA ITALICA

(Corn-silk)

PHARMACY - zea-i. Zea itálica. Corn-silk. Gramineae. **Historical dose:** Tincture and all potencies, tincture in ten to fifty drop doses in water.

HOMEOPATHIC - Zea-i. has curative properties in skin diseases, particularly in psoriasis and eczema rubrum. Appetite increased, voracious, alternating with disgust for food. Heartburn, nausea, vomiting, better from drinking wine.

MIND - Easily angered. Mania for bathing. Impulse to suicide, particularly by drowning.

RELATIONS-Antidoted by: Cocc. **Compare:** (l)Stigm.

REFERENCES - Boericke.

***ZINCUM ACETICUM

(Zinc Acetate)

PHARMACY - zinc-acet. Zincum aceticum. Zinc acetate. Trituration of the *metal*. **Historical dose:** All potencies.

CLINICAL - Diarrhea. Erysipelas. Gastritis. Night watching, effects. Toothache.

HOMEOPATHIC - Zinc-acet. was proved by Hahnemann and others. The only clinical uses of Zinc-acet. are from Burnett. He used Rademacher's solution of zinc in acetic acid and gave 5 drop doses three times a day in water to nurses and others who were compelled to work on an insufficient amount of sleep. Clarke verified the great value of this. Burnett also used it for erysipelas of elderly people.

The most peculiar Zinc-acet. symptoms were "Brain feels sore and as if sprinkled with salt." "Throat seems too tight and tongue too short." Empty, hungry sensation. Shaking chill during and after vomiting. Pain and paralytic condition of arms. In the provers it produced a pustular eruption on forehead and knee and the latter was attended with voluptuous itching.

Modalities - Toothache is worse by touch.

Worse in evening. Worse by motion,

ZINCUM ARSENICOSUM

PHARMACY - zinc-ar. Zincum arsenicosum. **Historical dose:** All potencies.

CLINICAL - Anemia. Backaches. Chorea. Nervous, disorders. Night watching. Numbness. Prostration. Weakness.

HOMEOPATHIC - Zinc-ar. affects the lumbar region and lower limbs. Chorea. Numbness, right arm then left, better when writing. Lumbar pain, worse from exertion, sitting, jarring or standing. Occipital pain. Blue vision. Burning in bladder.

Anemia. Neurasthenia. Weakness, enervation, exhaustion, prostration, infirmity. Profound exhaustion on slight exertion. Slight exertion aggravates. Soles ache when tired, better pressure.

Worse exertion, ascending stairs. Weakness, in acute diseases. Weakness and infirmity from nursing the sick. Ailments from night watching. Desires to walk. Worse from 10 a.m. and 3 p.m.

REFERENCES - Clarke.

***ZINCUM BROMATUM

(Zinc Bromide)

PHARMACY - zinc-br. Zincum bromatum. Zinc bromide. Solution. **Historical dose:** All potencies.

CLINICAL - Chorea. Cramps. Dentition. Hydrocephalus.

HOMEOPATHIC - Hale used Zinc-br. on its double indications for teething children who suffer intensely from pain in nerves of head and face. Pains which throw the children into a state of stupor alternating with wakefulness. Hale used the 3c and 6c potencies.

REFERENCES Clarke.

***ZINCUM CHROMATUM

(Zinc Chromate)

PHARMACY - zinc-chr. Zincum chromatum. Zinc chromate. Chrome. Trituration. **Historical dose:** All potencies.

HOMEOPATHIC - Zinc-chr. acts upon the ears, nose, throat and left side. Aching, gnawing, grinding, pain or wandering in shocks. Catching stitches that impede motion.

MIND - Aversion to work.

Abdomen - Cannot tolerate her hands on abdomen.

Back - Gnawing and grinding below and above left scapula.

Ears - Throbbing behind the ears.

Eyes - Vision wavering.

Female - Dryness of vagina with sense of a coming sickness, 10 to 12 a.m.

Food - Indefinite craving, knows not for what. Aversion to even thinking of food.

Head - Inward pressure in spot on bregma. Throbbing temples.

Heart - Cutting at apex, at night.

Limbs - Feet sore. Cramps of gnawing, grinding pain in toes, at night.

Lungs - Cough from tickling in throat-pit. Expectoration, sweet, loose, but had to be swallowed or tough with constant spitting spells.

Modalities - **Worse from motion.** Worse lying on the back. Worse washing the head.

Mouth - Metallic taste in mouth.

Nose - Bad odor within nose. Blowing of pus and blood and scabs.

Throat - Shooting pain from larynx (left side) up through tonsils into ear.

REFERENCES - Clarke.

***ZINCUM CYANATUM

(Zinc Cyanide)

PHARMACY - zinc-cy. Zincum cyanatum. Zinc cyanide. Trituration. **Historical dose:** All potencies.

CLINICAL - Agitation. Chorea. Congestive Headaches. Constipation. Convulsions. Epilepsy. Hysteria. Meningitis. Parkinson's disease. Petit mal. Trembling.

HOMEOPATHIC - Kopp's proving showed it produces the nervous and mental symptoms of Zinc met. with great intensity. Useful for convulsions and paralytic conditions. Great physical agitation. General trembling. Parkinson's disease. Petit mal.

MIND - Great excitement. Great sensitiveness.

Bad temper.

Face - Face suddenly changes color.

Head - Congestion to head.

Rectum - Constipation.

REFERENCES - Clarke.

***ZINCUM IODATUM

(Zinc Iodide)

PHARMACY - zinc-i. Zincum iodatum. Zinc iodide. Solution in syrup. Trituration. **Historical dose:** All potencies.

CLINICAL - Constipation. Coughs. Throat, pain. Tuberculosis.

HOMEOPATHIC - Zinc-i. has been proved by American pro vers, producing some well- defined symptoms, including splinter-like pain in throat. A cough from tickling in the throat and the more he coughed the worse the tickling became.

A peculiar tingling in right side of face to vertex with tension in skin of the part. Undulating pain at border of right free ribs, extending to third rib on same side. Coldness in stomach and bowels with tendency to perspire.

RELATIONS - **Compare:** (1) Splinter pain in throat, Hep., Arg-n. (2) The more he coughs the worse it tickles, Ign.

REFERENCES - Clarke.

***ZINCUM METALLICUM

(Zinc Metal)

PHARMACY - zinc. Zincum metallicum. Zinc metal. An Element, (Zn, At. Wt. 64.9). Trituration of the metal. **Historical dose:** All potencies.

CLINICAL - **Alcoholism.** Amblyopia. Asthma. Bedwetting. **Brain-fag.** Brain, paralysis. Breasts, disorders. Breast-milk, disorders. Cataract. Chilblains. Chin, eruptions. Chlorosis. **Cholera. Cholera, infantum.** Chorea. Constipation. **Convulsions.** Cracks. Dentition. Diarrhea. Diphtheria. Dysentery. Dysuria. Earaches. Ear, discharges. Eczema. Emaciation. **Epilepsy. Eruptions, suppressed.** Esophagus, spasms. Eyes, affections. Eyelids granular. Fatigue. **Foot sweat, suppressed.** Gastralgia. **Headaches. Head, injury.** Heels, pains. Hernia, inguinal. Hiccoughs. Hydrocephalus. Hypochondriasis. Hysteria. Joints, cracking. Lips, disorders. Lochia, suppressed. Masturbation. Melancholy. Memory, weakness. **Meningitis.** Mental, weakness. Neuralgias. **Nerve, weakness.** Nipples, sore. Nymphomania. **Paralysis.** Paresis. Photopsia. Prostate,

discharge. Ptosis. **Restless, legs.** Rheumatism. Sleepiness. Sleepwalking. Spermatorrhea. **Spinal irritation.** Spine disorders. Spleen, pain. Strabismus. **Suppressions.** Tarsal tumors. Throat, sore. Tibia, burning. Tympanitis. Typhoid, fever. Ulcers. Urinary, retention. Varicose veins. Whooping cough. Worms.

HOMEOPATHIC - Zincum metallicum belongs to the magnesium group of metals, comprising also cadmium and calcium. It has long been known in the arts, especially in its combination with copper (Cupr.) in the manufacture of brass. Zinc was proved by Hahnemann and his associates, and it appears among the remedies in his book Chronic Diseases.

Weyner related the poisoning of cows pasturing near a cadmium mine, near which zinc-smelting was carried on. Effects included general emaciation, skin clinging tightly to the body, eyes pale bluish, drawn back into the orbits, horns and ears unequally warm, mouth hot and shiny and hanging down, at times dry, appetite undisturbed, rumination slower, dung grass-green, thin-flowing and fetid, at times a cough.

As the disease progressed, emaciation increased, the horns became rough, milk dried up and diarrhea increased until the animals could no longer rise and died of total prostration.

Zinc corresponds to the poisoning of nerves and the brain. **Brain and nerves are fatigued.** Poisoning from **suppressed eruptions or discharges.** Tissues are worn out faster than they are repaired. Decreased number and destruction of red blood corpuscles. Defective vitality. Marked anemia with profound prostration, increasing weariness, worse eating, with restlessness.

Difficulty developing discharges or exanthemata. Great relief from discharges. Bloody discharges. Suppressed eruptions. Chorea from fright or suppressed eruption. Neuralgia after shingles, better touch.

Chronic diseases with brain and spinal symptoms, trembling, convulsive twitching and **fidgety feet.** **Convulsions with paleface and no heat.** Spinal disorders. Twitchings. Convulsive twitching or jerking, worse at night during sleep. Spasms from spinal injuries. Descending paralysis. Impending brain paralysis.

Isolated effects, formication. One part numb another sensitive, one part hot, other part cold. Transverse pain, shooting pains. Pain in spots, between skin and flesh. Disabling bone pains.

Internal trembling. Fidgety feet and other automatic motions of mouth, arms and hands. Feels nurtib, all over, on lying down. Chilblains, blueness of the surface. **Intolerance of wine. Wine aggravates all symptoms.**

MIND - Muddled mind. **Brain-fag.** Weak memory. Forgets what has been accomplished during day. **Lethargic, stupid, forgetful.** Stupor after nosebleed. Averse to work, to talk. Excitement over trifles. Excitement after hearing horrible things.

Ill effects of fright, grief, anger. Fretful, peevish, cries if vexed or moved during sleep (children). **Child repeats everything said to it.** Chorea from fright. Fear of robbers. Anxiety about thieves. Anxiety from horrible apparition. Desire for company from apprehension and boredom.

Starting in fright. Stares as if frightened on waking and rolls head from side to side. Fears being arrested on account of an imagined crime. **Confusion, dullness after wine.** Great fear, as if persecuted by men or the devil on account of crimes which he has never done. Fears of becoming imprisoned or poisoned, or shot, or buried alive.

Changeable moods. Alternately fretful, irritable, quarrelsome, despondent, depressed. **Irritability in evening.** Impetuous. Weeps when angry. Hypochondriacal mood with gastric symptoms.

Melancholy. Cerebral depression. Paresis. Sadness when alone. **Periods of depression with disease.** Answers very slow and speaks as if in a bad temper. Thinks of death calmly. **Religious affections.** Hears voices speaking from within him in abusive and filthy language.

Easily startled, excited or intoxicated. **Very sensitive to noise.** Sensitive to others, talking and noise. Easily offended. Weeping from vexation. Screams with pain. **Torments everyone with his complaints.** Loquacity. Hysteria better during menses. Kisses everyone before menses. Starting from sleep during menses. Nymphomania during pregnancy. Causeless weeping before menses.

Abdomen - Gripping in upper abdomen after soup. Violent cutting pain in abdomen after milk. Sensation as if a lump in liver region or at navel. Neuralgia of spleen. Jerking from groins to penis. Pain after a light meal with tympanitis. Gurgling and gripping, distended. Flatulence and rumbling, worse alcohol. Hypogastric flatulence. Hot, putrid flatus. Flatulent colic with retraction of abdomen (Plb.). Reflex symptoms from floating kidney.

Back - Pain in small of back. Backache better seminal emission. Spinal irritation. Spine sensitive, cannot bear it touched (Agar., **Ther.**). **Burning along whole spine,** worse sitting. Aching in spine, small of the back worse turning in bed, sitting and stooping. **Dull aching about the last dorsal or first lumbar vertebrae, worse sitting.** Cracking in lumbar region while walking. Lumbar region as if screwed in, on rising from seat. Weakness in lumbar region worse standing. Tension and stinging between scapulae. Tearing pain, burning in shoulder blades, between shoulder blades, better belchings. Small pimples like boils on and between scapulae.

Bladder - Bladder symptoms better urination. Cramp in bladder, preceded by colic. Bladder neuralgia. Pressure upon bladder, but not to urinate. Constant pressure downward in urethra if call to urinate is delayed. Frequent

urging at night with scanty discharge. Involuntary urination

when walking, coughing or sneezing. Burning urination during menses. Burning in urethra before, during and after urination. Cutting pain in orifice of urethra, in evening while sitting. Bleeding after urination. Vicarious bleeding from suppressed menses.

Breasts - Breasts and genitals painful with suppressed menses (Kali-c.). Breasts swollen and sore to touch. Left breast as if swollen. Violent pressing in right breast. Itching about nipples. Nipples sore. Pressing, sore, about right nipple. Stitching pain, beneath breast.

Causations - Ill effects of fright, grief, anger, surgery, night watching, excessive study. Ill effects from brain concussion, frostbite, suppressions of eruptions, otorrhea, menses, lochia, milk. Chorea from fright or from suppressed eruptions, worse during sleep, the feet especially affected.

Chest - Acute stitches in left clavicle. Dull stitches in right side of chest. Burning pressure beneath sternum. Constriction and cutting in chest. Tightness in chest on walking in open air. Chest as if constricted by a band transversely across it. Pressure in chest as from incarcerated flatus. Pressure under short ribs after eating. Left-sided intercostal neuralgia. Chest as if hollow and cold, after expectoration of tenacious mucus. Weak and burning feeling in sternum. Empty sensation behind sternum. Burning in left axilla. Pain in chest as if beaten. Violent stitches in chest when walking in open air.

Constitutions - Nervous constitutions.

Coughs - Cough, must sit up, with asthmatic breathing. Cough after wine. Debilitating, spasmodic cough, worse eating sweets. Dry cough, before and during menses. Short cough from tickling beneath sternum. Cough much relieved as soon as he brings up something. Child grasps genitals during cough.

Ears - Earache with frequent acute sharp pains in children. Itching, better boring into it. Tearing, stitches and external swelling. Discharge of fetid pus. Offensive moisture from left ear. Neuralgia of middle ear. Cartilage of ear extremely sensitive.

Ringings, whizzing in ear. Impaired, from increase of earwax.

Eyes - Intense burning after eye operation. Pterygium, smarting, lachrymation, itching. Smarting as from salt in eye. Eyes as if pressed inward. Pressure as if pressed into head. Itching and soreness of lids and **inner canthi**. Conjunctivitis. Red and inflamed conjunctiva, **worse inner canthus**. Pupils contracted during headache. Pupils dilated alternating with contracted. Blurring of one-half of vision, worse stimulants, with severe headache. Photophobia during headache. Dread of sunlight, with dim, watery eyes. Amaurosis Ptosis. Upper lids heavy, as if paralyzed. **Rolling of eyes**. Eyes feel drawn together. **Squinting**.

Face - Face pale and cold, alternating with heat and redness of cheeks. Bluish, miserable. Paleness of face during convulsions. Waxy, white or yellow face. Lips, sticky, dry, cracked. **Pale lips** and cracked corners of mouth. Redness and itching eruptions on chin. Tearing pain in facial bones. Bones of face as if bruised. Swelling and itching of left cheek. Spasmodic twitching.

Female - Female symptoms are associated with **restlessness, depression, coldness, spinal tenderness and restless feet**. Downward pressure on uterus, bladder and rectum, compelling her to sit cross-legged. Stinging pain in pudendum when walking. Bloody leucorrhea, with burning and itching of pudenda, after menses. Menses too early, painful, with bloating of abdomen. Profuse lumpy menses when walking. Menses too late, suppressed, lochia suppressed (Puls.). Menses flow more at night (Bov.). Complaints all **better during menstrual flow** (Eupi., Lach.). Ovarian pain, better excessive flow. Ovarian pain, **especially left, can't keep still** (Vib.). Sexual desire increased. Nymphomania of lying-in women. Desire for masturbation. Complete loss of sexual desire. Profuse falling of hair from genitals. Varicose veins of external genitals, with fidgety feet.

Food - Loss of appetite, with clean tongue. **Ravenous hunger about 11 a.m.** (Sulph.).

Great greediness when eating, cannot eat fast enough. Extreme thirst. Thirst, with heat in palms. Desire for beer. Aversion to meat, especially veal, during pregnancy. Aversion to sweets, cooked or warm food. **Wine aggravates**, cannot stand smallest quantity of wine.

Head - Brain-fag, headaches of overtaxed school children. **Forehead cool, base of brain hot**. Roaring in head. Dullness of head after meals. **Headaches from drinking small quantity of wine**. Headache with dim vision worse heat. Pressive pain on vertex, at the root of the nose, extending to eyes with weak vision worse warmth, better hard pressure, open air. Heavy aching pain in temples, worse biting. Meningitis. Hydrocephalus after infantile cholera or diarrhea. Rolls head, bores in pillows and grinds teeth. **Occipital** pain with weight on vertex. Crashing in head, on falling to sleep. Feels as if he would fall to left side. Hair falls from vertex. Vertex bald with soreness of scalp. Hair brittle, bristle, sensitive. Brain paralysis. Automatic motion of head and hands.

Heart - Pressure, spasmodic tension and heaviness in heart. Sensations as if a cap over the heart. Hard heartbeat, taking breath away. Irregular, spasmodic action of the heart, occasionally one violent thump. Tension and stitches in precordial region. Stitch at every beat of heart, with palpitations. Violent pulsations in blood vessels during fever. Pulse increased by wine.

Kidneys - Floating kidney. Reflex symptoms from floating kidneys. Pressive cutting about kidneys. Pressure in region of left kidney. Can only pass urine if sitting bent backwards. Hysterical retention of urine. Unable to retain the urine unless the feet are in constant motion. Stitches in kidneys. Sticking and bruised pain in left kidney while standing and walking. Left kidney sensitive to touch.

Limbs - **Restless feet in continued motion, cannot keep them still.** Lameness, **weakness, trembling and twitching** of various muscles. Stumbling, spastic gait totters while walking especially in the dark and with closed eyes. Lightning-like pain of locomotor ataxia, sweaty feet with sore toes. Pains in limbs on becoming heated. Chilblains (Agar.). **Large varicose veins on legs.** Burning in tibia. **Soles of feet sensitive.** Steps with entire sole of foot on floor. Toes, feel swollen, sore, tips ache. Bones of the feet feel broken. Paralysis of feet. Ulcerative pain in heel worse walking. Formication of feet and legs as of insects crawling over the skin, prevents sleep, better rubbing and pressure. **Transverse pains,** especially in upper extremity. Hysterical contradictions, drawing the fingers out of shape. Weakness and trembling of the hands, when writing during menses. Eczema on hands. Sweaty. Pain in deltoid worse raising arm.

Liver - Liver enlarged, indurated, hard and sore. Squeezing, pressure and shootings in the hepatic region. Sharp stitches in hepatic region after supper.

Lungs - Dyspnea from flatulence after eating. **Dyspnea, better as soon as expectoration appears,** worse flatulence. Oppressed and difficult breathing. Very heavy and deep breathing. Breathing, impeded, with apprehension and oppression. Asthmatic bronchitis with constriction of chest. Easy expectoration, at night when lying down, with cough. Copious, expectoration of frothy mucus. Yellow, purulent expectoration. Blood-streaked expectoration. Tenacious, sweetish, putrid expectoration. Metallic tasting expectoration. Large amount of mucus of milky color.

Male - Drawing pain in testicles, spermatic cords. Penis painfully sensitive. Long-lasting and violent erections. Easy **sexual excitement, emission too rapid or** difficult during embrace. Emissions with hypochondriasis. Sadness after emission. Discharge of prostatic fluid without any cause. Atrophy of testes. Neuralgia of testes worse walking. Testicles swollen, drawn up. Shriveling of scrotum. Falling off of pubic hair. Grasps genitals with cough.

Modalities - Better while eating. **Betterfree discharges** and appearance of eruptions, menses. Better rubbing, scratching. Better motion, hard pressure. Better warm, open air. **Worse from exhaustion,** mental or physical. Worse after eating, **after wine.** Worse sweet things, milk. Worse from noise. **Worse suppressed eruptions or discharges, menses.** Worse between 5 p.m. to 7 p.m. Worse being heated, touching anything cold, being touched. Worse approach of storms which causes chills.

Mouth - Bitter or bloody taste. Copious secretion of saliva. Sour, bitter water in mouth. Fetid breath. Inflammation of palate. Ulcers on inner surface of cheek and in throat. Herpes in mouth from sea bathing. Grinds teeth. Gnashing of teeth. Teeth loose. Difficult dentition, child weak, cold and restless feet. Bleeding gums. Echoes speech.

Neck - Pinching feeling on both sides of neck. **Nape of neck feels weary and tired** from writing or any mental exertion. Neck feels lame, followed by stupor. Pain in cervical muscles at night.

Nose - Sore feeling high up, pressure upon root. Stoppage of nose. Obstruction of nose. Fluent coryza with hoarseness and burning sensation in chest. Coryza with hoarseness and burning in chest. Frequent sneezing. Sneezing after meals. Frequent blowing of blood from nose. Nosebleed followed by stupefaction. Swollen. Pain as from excoriation in interior of nose. Redness of nose, remaining after freezing, tip of nose easily frosted. Bores finger into nose or picks at dry lips.

Perspiration - Offensive, sour-smelling sweat. Can't tolerate any covering during sweat. Profuse sweat all night, wants to uncover. Easy perspiration, during day from exercise. Sour sweat with itching over whole body. Sweats on head and hands. Sweats while walking in open air. Sweats at night, especially on lower limbs. Sweaty feet.

Rectum - Desire for stool after eating. Nervous diarrhea. Affections of brain from sudden stoppage of diarrhea. Cholera-like diarrhea in infants. **Cholera infantum** with tenesmus. Constipation of newborn infants. Ulceration of hemorrhoids. Hemorrhoids prolapsed, better heat, worse walking. Crawling as from worms in anus. Soreness, drawing pain in rectum. Burning, sticking pain, itching in anus, during and after stool. Itching in anus with oozing of corrosive moisture.

Sensations - Uneasy, as if he had committed a crime. As if he would have a stroke. As if hair bristled. As if scalp were drawn together. As if she had a large goiter which she could not see over. Pains as if between the skin and the flesh. Nauseating weakness as after smoking too strong tobacco. As if kidney would be twisted off. Wrist and foot as if sprained. As if soles swollen. As if tendons of right sole too short. As if ball of great toe frozen.

Skin - Eczema. Eczema of the hands, in the anemic and neurotic. Sudden itching here and there. Itching of

thighs. **Itching in the hollow of knees.** Formication of feet and legs as from a bug crawling over the skin, preventing sleep. Urticaria-like eruption after scratching. **Retrocession of eruptions.** Ulcers. Slight injury of skin bleeds very profusely. **Varicose veins**, especially of lower limbs (Puls.). Varicose veins of genital organs. **Sleep** - Constant yawning. Overpowering sleepiness. Nervous insomnia with intolerable itching of skin at night. Broken, unrefreshing sleep. Sleep disturbed by violent headaches and painful cramps in calves. Jerks and starts on falling asleep. Cries out while sleeping, body jerks, wakes frightened, startled. Nervous motion of feet when asleep (Kali-p.). Loud screaming in sleep without being aware of it. Somnambulism (Kali-p.), after suppressed emotions. Awakens at night from coldness of feet.

Stomach - Atonic dyspepsia, feeling as if stomach were collapsed. Empty feeling at stomach soon after eating. Burning in stomach. Heartburn from sweet things. Hiccough after breakfast. Bitter eructations after eating, followed by vomiting. Sour eructations, after milk. Sweetish rising into throat with sweet taste. Globus hystericus rising from pit of stomach. Sensation as if a worm crawling up to the throat from the pit of stomach, causing coughing. Nausea, vomiting of bitter

mucus. Nausea and vomiting, worse wine. Nausea from taking even a small sip of wine. Nausea from sight of meat or anything fatty. Vomiting of almost all food or liquid immediately after swallowing it.

Stools - Hard, small, constipated stool. Stools, large, dry, difficult, followed by involuntary urination. Offensive, diarrheic stools alternating with constipation. Stool at first solid, then liquid. Very soft stool immediately after dinner, with and followed by vertigo and roaring in head. Green mucus discharges.

Teeth - Drawing, tearing, jerking pains. Throbbing in a hollow tooth. Grinding of teeth. Sensations as if teeth would be pulled out. Teeth as if long and loose, with swelling of submaxillary glands. Teeth as if sore. Teeth feel on edge. Difficult dentition. Bleeding gums on slightest touch. Retraction of gums. Gums painful while eating. Gums white, ulcerated.

Temperature - Chills begin after dinner. Chilliness in the back, as if fever would appear. Cold limbs, especially hands and legs. Chills from touching anything cold. Chills on approach of a storm. Frequent, febrile shiverings down back, with flushes of heat, trembling of limbs, short breathing and pulsation throughout whole body. Chills followed by cold sweat. Chill alternating with heat. Fever at night, often with sweat. Febrile flushes, with sudden crying out to be fanned, and thirst.

Throat - Hoarseness with burning in trachea. Dry, constant inclination to hawk up tenacious mucus. Frequent acute tickling in region of larynx. Rawness and dryness in throat and larynx, better eating. Pain in muscles of throat externally while swallowing. Pain in fauces when yawning. Bitter taste in throat. Accumulation of mucus in larynx and posterior nares.

Tongue - Tongue coated at root and dry, in brain affections. Tongue white, as from cheese, without taste. Tongue swollen on left side, hindering talking. Blisters on tongue. Tongue covered with vesicles or with white mucus. Stitches in tip of tongue with salivation.

Urine - Urine turbid, loam-colored in morning. Urine very yellow, deposits white flakes on standing a long time. Emission of urine very slow and in a thin stream. Dribbling urine in evening.

Vertigo - Vertigo in occiput. Violent vertigo with stupor. Vertigo deeply seated in brain. Vertigo as if he would have a stroke. Vertigo, as if the seat were undulating when sitting up in bed in morning. Vertigo while sitting up in bed, as if bed were constantly swaying back and forth. Vertigo as if looking through mist, after eating. Vertigo while smoking.

Vision - Blurring of one-half of vision. Dim and misty vision in morning after waking. Dim vision during severe headache. Dim vision watery eyes in brain affections. Dim vision with itching and stitching pain in inner canthi. Impaired vision, as if a thick fog lay before eyes, during headache. Luminous bodies after eye operation. Objects appear elongated. Yellow, blue and green rings. Diplopia. Flickering vision. Fiery flakes floating in large circles, when looking at sky. Vanishing vision with lachrymation and burning.

COMMENTS - Severe fatigue, nerve or brain-fatigue, muscle-fatigue. Brain-fatigue from over-study or from night watching (Cocc.). Restores suppressed eruptions. Can cure the consequences of suppressions and set free the reactive power in conditions of undeveloped disease.

Symptoms worse from suppressed discharges, particularly foot sweat. "Too weak to develop exanthemata or menstrual function to expectorate or urinate to understand to remember."

"Relief to all suffering as soon as menses begin to flow" or discharge is restored. Nash noted that in asthma "the patient cannot expectorate, but as soon as he can he is relieved."

Sexual excitement in both genders. Seminal losses and prostaticorrhea of the male. Nymphomania and masturbation in the female, can be associated with varicose veins or itching of the external genitals. Tendency to press on the pubes or apply the hand to the genitals. Severe boring pain in the left ovary.

Backache with emission, temporarily better by the emission. Backache and spinal irritation in female sexual

disorders as well. Dull aching in spine, worse when sitting. Burning pains all along the spine. Burning pains, tension and constriction.

Facial neuralgias, trigeminal neuralgias. Facial twitches and tics (Agar., Spig.). Neuralgia in malar bones with pressive pains. Pressure at root of nose as if it would be pressed in. Grinds teeth, especially in children with worms. "Teeth fail to develop."

Constriction in the chest, connected with both respiration and the heart. "Sudden, spasmodic, bursting sensation about heart, it appears to be beating regularly, when it suddenly seems as if it would burst through the chest." Varicose veins of the thighs and labia, with fidgety feet.

Insatiable hunger and emptiness, notably at 11 a.m. Great thirst. Hasty eating and drinking. Averse to meat, especially veal, sweets, cooked or warm food. Pain is worse from eating or drinking wine. Tearing headache in side of head, worse from wine, after dinner. Intolerance of wine, wine aggravates all symptoms. Drunk easily. Vascular headaches aggravated by the least sip of wine or alcohol. Vertigo from the least alcohol.

Numbness, tingling, formication and fainting spells. "Incessant and violent fidgety feeling in feet or lower limbs, must move them constantly, cannot keep them quiet." These movements may continue during sleep. Insomnia with restless legs.

Great restlessness in the legs and feet. Great urge to stretch the legs. Hyper reflex alternating with low reflex response. Hyperactivity with restlessness. Tendency toward spasms, leg cramps (Cupr.). Jerking and twitchings of the limbs, convulsions, epilepsy. Convulsions in children, with a history of cradle cap (Cupr.). Crawling, numbness, tingling sensation. Legs go to sleep easily, painful. Painful formication of the legs.

Neuralgic shingles. Parkinson's disease where the key trembling is of the legs and feet, as opposed to the arms, with pacing and restlessness. Multiple sclerosis. Spinal atrophy and deterioration of the spinal cord. Paralysis, but the legs shake or are restless and move. Paralysis after diphtheria (Lac-c.).

Meningitis with sharp pains in the head, worse from the least stimulant. Encephalitis, with brain cry (*cri cephalic*) (Apis.). Hearing loss after meningitis (Hell.). Children with brain disorders have a characteristic "crossness in the evening." On waking there is delirium as if frightened, knows no one, screaming. "Child repeats everything said to it."

Tendency to chilblains, which are swollen and painful and easily made worse by rubbing. Sensitiveness to frostbite, the tip of the nose is easily frostbitten and the nose remains red long after it has been frostbitten. The hands and feet are affected with inflammation, painful eruptions, cracks. There is also a "frost-bitten feeling" in the toes.

Gerstel called attention to Zinc's action in fevers with inflammation of the brain. In these cases the seat of the inflammation was the meninges.

He referred to a case of a child suffering from scarlatina who was "Entirely motionless, limbs icy cold, body cold, skin all over body bluish red, except the parts about the eyes, forehead and chin, which were white." Zinc was then given and the child gradually recovered.

In a case of typhoid in a man in whom mental symptoms had set in, there was a "Muddled feeling in the head, an incapacity to relate anything and a sort of half-smiling loquacity."

Later on he had a "Staring look, almost hippocratic appearance, pale as wax, car-phologia, subsultus tendinum, constant trembling of the hands." Zinc 2c saved the patient.

General twitchings and trembling, according to Nash, are equally characteristic of Zinc. He recorded the case of Miss Smith.; 20, who had been ill for a week with headache, loss of appetite and especially prostration. Over-study was the cause.

Under Gels., and later Bry., she was improving, when she threw off the bedclothes while sleeping and perspiring and took a chill. The bowels became enormously distended, profuse hemorrhage occurred (finally controlled by Alum.), a low form of delirium came on and prostration increased in spite of the cessation of hemorrhage.

Her head was retracted, with complete unconsciousness. Staring eyes rolled upward. Lying on back and sliding down in bed, twitching or rather "intense, violent trembling all over so that she shook the bed." Her hands had to be held constantly night and day by nurses. Hippocratic face, limbs deathly cold to knees and elbows. The pulse was intermittent, uncountable, all signs in short of impending paralysis of the brain.

Two drops of Zinc 200c were mixed in two teaspoonfuls of water. One teaspoonful was worked, a little at a time, between the set teeth and the rest half an hour later. About an hour after the latter dose the patient turned down her eyes and said "Milk." Through a bent tube she swallowed half a glass of milk, the first nourishment she had taken for twenty-four hours.

From that time she improved steadily and received no more medicine for four days. Afterwards she had a dose of Nux-v. **Recovery was perfect.**

F. W. Payne reported a case of cataract in which the right eye was partially affected and the left was practically

useless. There was a bruised, sore, smarting, burning, itching and stinging sensation. At intervals, a sudden sensation as if pepper had been thrown into the eye, causing scalding lachrymation and spasm of the lids. These spells were worse in the evening. Burning dryness as if a stick was under lid scratching eyeball. Flickering before left eye, blue and green rings, green halo around gas-jet at times.

Slight irritation of conjunctiva and tendency of lids to adhere. Worse by warmth, PB *warm days, by aniüää*] Jj\$M Patient nervous, tremulous, impatient, worse by mental emotion. Chorea jerking of individual muscles.

Zinc 200c, given occasionally, steadily improved the case. In six months, the right eye was quite clear and the left steadily gaining. Eleven years later, vision was practically perfect, though some small streaks could still be found in the left lens.

RELATIONS - Antidoted by: Hep., Ign., Camph. (Lob., Teste). **Antidote to:** Bar-c. **Compare:** (1) Agar., Ign., Plb., Arg-n., Puls., Hell., Tub. (2) Erratic temperature in fevers, Puls. ***ZINCUM MURIATICUM

(Zinc Chloride)

PHARMACY - zinc-m. Zinc muriaticum. Zinc chloride. Solutions in water or alcohol. **Historical dose:** All potencies.

CLINICAL - Bright's, disease. Chorea. Constipation. Convulsions. Cramps. Diphtheria. *Dysentery. Emaciation. Hematemesis. Hiccoughs.* Hydrocephalus. Smell, perverted. Taste, perverted. Typhoid fever. Wounds.

HOMEOPATHIC - The bulk of the symptoms of Zinc-m. are derived from poisoning cases. Zinc chloride is an active poison and a powerful disinfectant and, being readily accessible in the form of "Sir Wm. Burnett's Disinfectant Fluid," has occasioned many poisonings, both accidental and suicidal.

Most of the Zinc-m. symptoms are the usual effects of a corrosive poison, but some characteristic symptoms appear. One of them was the perversion of the senses of smell and taste. Things had a putrid smell and taste which were not putrid and feces had no odor at all. Quinine had no bitter taste and acids and alkalis had no acid or alkaline taste. Insipid things were most relished.

Other Zinc-m. symptoms were "No natural appetite, but a morbid craving for something to allay the irritation at the stomach." "Vomiting of all food except boiled milk." "Occasional attacks of tetanic spasms of right forearm and hand."

"Emaciation, skin looked as if stretched tightly over bones of face and hands." "Bluish and blue-mottled skin."

"Sleeps on right side with legs drawn up, grinds teeth." Spasmodic twitchings of face and hands, sprains and convulsions were prominent features.

De Noe Walker used a dilution of Zinc-m. as an application to fresh wounds and found it very effectual in securing rapid healing.

REFERENCES Clarice.

***ZINCUM OXYDATUM

(Zinc Oxide)

PHARMACY -zinc-o. Zincum oxydatum. Zinc oxide. Flowers of Zinc. Trituration. **Historical dose:** All potencies.

CLINICAL - Anorexia. Coryza. Debility. Deltoid, pain. Diaphragm, neuralgia. Elbow, pain. Hiccough. Hypochondriasis. Laughter, involuntary. Sleeplessness.

HOMEOPATHIC - An extensive proving of Zinc-o. was made by Wernek, Buchner and Michaelis. These symptoms have been included by Allen in the pathogenesis of Zinc, and some of them will be found in the schema of Zinc.

Jahr kept a separate record of Zinc-o. and Clarke added to his account. The contracting, shriveling-up effect of Zinc-o. was marked in these provings.

Among the more peculiar symptoms were an undulating movement in some muscles. Contraction of the risible muscles and constant impulse to laugh. Teeth blunted incisors feel soft and glued together. Hiccoughs, that are better after regurgitation of bile. Liquid stools which better all symptoms.

In the Zinc-o. provings, the left lung was very markedly affected. Coryza, worse after a meal with difficulty to

respiration and nasal secretion. Stoppage of the nose. Anorexia better after a meal.

COMMENTS - Farrington said that Zinc-o. is very like Con. in hypochondriasis and melancholy from masturbation, the difference being that Zinc-o. is irritating as well as weakening and depressing.

REFERENCES - Clarke.

***ZINCUM PHOSPHORICUM

(Zinc Phosphide)

PHARMACY - zinc-p. Zincum phosphoricum. Zinc phosphide. Trituration. **Historical dose:** All potencies.

CLINICAL - Asthma. **Anemia.** Brain-fag. Bronchitis. Chorea. Coma. Delirium tremens. Dementia. Epilepsy. Fainting. Headaches. Hemorrhages. Herpes zoster. Hydrocephalus. Hyperventilation. Impotence. Insomnia. Kidneys, irritable. Meningitis. **Migraine.** Multiple sclerosis. Nausea. Nerve, disorders. Neuralgia. Paralysis. Parkinson's disease. **Restlessness.** Sleeplessness. Tics. Tremors, mercurial. Tuberculosis. Twitchings. Vertigo. Vomiting.

HOMEOPATHIC - According to Hale, Zinc-p. removes the mental depression and paralysis following cerebral congestion and strokes. Hale used it on a combination of the indications of the elements and especially in brain fatigue of business men.

Brain fag, nervousness, and vertigo. Nervous vertigo, better lying. Formication all over body. **Restless, repetitive movements,** head rolling, head banging, nail biting, tapping, thumb sucking, movements of the mouth, worse talking. Restless legs, worse getting to sleep, grabs the bedclothes. Tics and twitchings. Chorea. Hands cold, feet perspire. Paralysis. Epilepsy. Burning pains. Hemorrhages of bright red blood. Cerebral hemorrhages. Petechia. **Anemia.** Neurological complaints. Meningitis. Hydrocephalus. Multiple sclerosis. Parkinson's disease. Vertigo and fainting. Abuse of bromides.

MIND - Moody. Changeable mood. Happy, open, enthusiastic, then gloomy, discontented, hurried. Complaining. Sentimental.

Laughing, hysterical, screaming. Grumbling. Irritability, worse being woken, worse music. Mental depression. Loathing of life.

Mental exhaustion. Fatigue. Brain fatigue of businessmen. Slow mind. Forgetful. **Loss of memory.** Indolent. Aversion to talking. Worse talking. Nervousness. **Restlessness.** Apprehension, worse afternoon and night. **Anticipation and anxiety.** Fear of failure, criticism. Fear of falling, heights. Fear of being alone. Fear of being pursued, thieves. Fear of being observed, touched. Fear of stroke, death. Fear of being buried, the dark. Fear of horror, ghosts. Fear of disease and death of family or friends. Fear of future. Fear of thunder. Superstitious. Strong sexual, desire. Nymphomania, kisses everyone. Sexual excitement and sleeplessness. Delirious, chaotic, confused. Dementia. Idiotic. Mad, manic. Tourette's. Childish, very active, makes mistakes. Ailments from humiliation, insults, fright, sadness, homesickness. Coma.

Abdomen - Abdominal pains.

Back - Backache, worse carrying heavy loads, worse when sitting.

Bladder - Retention of urine, better when sitting back.

Chest - Neuralgic pains and skin symptoms like those of herpes zoster.

Eyes - Eye infections. Foggy vision. Strabismus.

Face - Sickly and haggard expression.

Female - Menses profuse. Generally better during menses.

Food - Desires sweets, licorice, beer, meat, fruit, starch, cold, fish, anchovies. Aversion to fish, milk, warm foods, sprouts, mushrooms, cloves, salt, oysters. Worse red wine, sweets, coffee.

Head - **Migraine.** Pressing pain in forehead, caused by schoolwork. Headache, especially in sides of head. Nervous headache. Neuralgia of head and face.

Heart - Palpitations.

Kidneys - Irritable kidneys with loss of brain power even when calculus is present. Urine becomes cloudy on standing.

Limbs - Bone problems. Growing pains. Rickets. Osteoporosis. **Restlessness.** Tingling fingertips. Lightning-like pains in locomotor ataxia.

Lungs - Asthma. Hyperventilation. Gasping for breath. Sighing. Tuberculosis. Bronchitis. Lung problems.

Male - Enlarged prostate. Erections with unusual voluptuousness and desire. Emissions with voluptuous dreams and intense nervous thrill.

Modalities - Better open air, perspiration, discharges. **Better sitting back,** lying on left side. Better noise. Better movement. Worse touch, rubbing. **Worse from suppressed discharges, vaccination.** Worse noise, music, light. Worse walking. Worse cats, smells, wool. Worse 5 a.m. and 9 p.m. Worse right side. Worse cold weather, thunderstorms. Very sensitive to both wind and wine.

Nose - Hay fever.

Rectum - Constipation. Diarrhea, worse wine.

Sleep - Sleeplessness aggravates. Sleepless after 3 a.m., wakes at three and feels as if under the influence of pleasant and quick music. **Sexual excitement and sleeplessness.** Nightmares, caused by lack of sleep. Somnambulism. Sleeps on right side. Better after short sleep. Erotic dreams. Dream of futile efforts. Dream of paralysis, exams. Dream of thieves, fleeing, of being pursued, abduction, ghosts, monsters. Dream of falling, heights. Dream of accidents, murder, quarrels.

Skin - Eczema. Herpes zoster. White spots on nails. Hair loss.

Stomach - Diabetes, worse during pregnancy. Stomach complaints. Empty sensation in stomach. Nausea and vomiting. Vomiting, worse drinking.

Teeth - Late teething. Worse during dentition.

Vertigo - Fainting. Vertigo, better lying down.

COMMENTS - Ashburton Thompson gave pills, each containing 2/3 grains of Zinc-p. to two patients and both experienced a severe frontal headache with frequent stabs of pain backward, deep in the head to occiput. Hammond cured with it nervousness and vertigo better lying down. In some patients the Zinc-p. 3c potency caused sexual excitement and sleeplessness after 3 a.m.

J. E. Baldwin reported the case of a woman in perfect health prepared a long report and read it to a large audience without undue excitement. The next day, she had some pressure in occiput to cervical spine, lasting four days. Feeling of fatigue with disinclination to any mental exertion. Zinc-p. 2x cured in a few doses.

Zinc-p. 6x has also cured an irritable kidney with loss of memory in an old man.

RELATIONS-Compare: Phos., Zinc., Staph., Thuj., Viol-o., Viol-t.

REFERENCES - Clarke.

***ZINCUM PICRICUM

(Zinc Picrate)

PHARMACY - zinc-pic. Zincum picricum. Zinc picrate. Trituration. **Historical dose:** All potencies.

CLINICAL - Brain, fatigue. Bright's disease. Exhaustion. Facial, paralysis. Headaches. Memory, weak. Neurasthenia. Nymphomania. Parkinson's disease. Priapism. Satyriasis. Seminal, emissions. Sexual, mania. Spinal, weakness.

HOMEOPATHIC - Hale gave this indication of Zinc-pic., "Cerebrospinal troubles of the weakness of character." Hugh Pitcairn noted brain-fag and nervous exhaustion from overworked brain or sexual excesses. Chronic occipital headaches, periodic.

Headache occurring in Bright's disease. Threatened cerebral paralysis, especially in children. Profound neurasthenia., when nervous exhaustion has passed beyond stage of weakness. Seminal emissions. Sexual mania.

COMMENTS - Halbert reported the case of recent facial paralysis from cold cured by Zinc-pic. 3x and a case of Parkinson's disease in a woman, 45, very greatly improved by the same.

Hale gave the case of Mr. M., 36, a merchant. Above ordinary intelligence. Single, correct in his habits, but subject to seminal

emissions since early manhood, occurring about 3 a.m. every third night, leaving him very weak and debilitated, worse every change of weather, especially in hot weather and before and during thunderstorms. Never masturbated.

Complained of loss of memory and energy, dull, heavy feeling in head, sticky, pasty mouth, dry throat, poor appetite. Belches torrents of tasteless flatus after eating, followed by relief and diarrhea. At other times inclined to constipation. Languid, heavy feeling throughout body. Dull aching pain in back.

Zinc-pic. 2x trituration, caused steady improvement, the emissions being reduced in frequency to one in six weeks.

RELATIONS - Compare: (1) Fatigue - Pic-ac., Ferr-pic. and picrates generally.

REFERENCES Clarke.

***ZINCUM SULPHURICUM

(Zinc Sulphate)

PHARMACY - zinc-s. Zincum sulphuricum. Zinc sulphate. White Vitriol. Solution. Trituration. **Historical dose:** All potencies.

CLINICAL - Anemia. Convulsions. Cornea, opacity. Delirium. Dysentery. Esophagus, stricture. Granular, lids. Headache. Heartburn. Keratitis. Laughter, involuntary. Metrorrhagia. Prostration. Prurigo. Tongue, paralysis. Tremors.

HOMEOPATHIC - A large number of poisonings with Zinc-s. are on record and these have furnished the symptoms of the schema.

The use of Zinc-s. in solution as an eye lotion is founded on a specific relationship, and in homeopathic potencies it has cured corneal opacities. Obstinate keratitis in right eye goes away from a 3x lotion.

Zinc-s. has anemia, tremors and convulsions. Trembling and convulsions. Titillation all over body with irresistible inclination to laugh. Prostration. Heaviness. Feeling as though her blood could scarcely struggle through her being.

MIND - Delirium. Great nervous anxiety and depression. Frightful visions during headache, saw her child with its head shattered (cured with the headache).

Abdomen - Inflammation of abdomen with retraction of umbilicus and terrible colic. Sharp, continuous colic. Pain in abdomen and especially in bladder region in groin.

Chest - Violent burning pains beneath chest. Sense of choking and constriction around chest. Pains in chest with vomiting.

Ears - Roaring in ears.

Eyes - Obstinate keratitis. Bluish rings around eyes. Eyes are heavy and dull, staring, fixed with peculiar bright luster, spasms with upper limbs. Pupils dilated. Lachrymation. Opacity of cornea. Diffuse opacity of each cornea goes away on using a lotion around both orbits externally.

Face - Pale, sunken with cold limbs and convulsed pulse, leaden tint, contracted features.

Female - Metrorrhagia.

Head - Violent headache with thirst. Burning, acute pain in head. Immediately felt as if a painful electric shock had gone through his head, he expected his brains would have burst through his skull.

Heart - Pulse fluttering indistinguishable, dicrotic, almost lost, as in cholera.

Limbs - Trembling and cramps. Convulsive movements of upper limbs and eyeballs.

Lungs - Violent cough with bloody and purulent expectoration. Breathing weak, slow, difficult.

Mouth - Very sour taste. Tongue moist, a little blanched, partially paralyzed. Tongue, mouth and lips greatly swollen. Gums swollen and red on outer edge. Irritation of whole buccal membrane.

Rectum - Rectal tenesmus. Constant desire for stool. Purging and vomiting. Bilious diarrhea. Stools infrequent. After three months stools became bloody with sticking and cutting pains in both sides of abdomen and along colon. Obstinate dysentery with emaciation, pale, bloody stools, painful tenesmus and desire for food that failed to nourish.

Skin - Skin pale yellow. Deadly pallor, skin milky white. Herpes zoster. Blisters on neck discharge first bloody water, later

thin, green, ill-smelling pus. Frightful prurigo of children affecting the back.

Sleep - Sleepy and stupid, wanted to sleep and die in peace.

Stomach - Thirst, intolerable and dry mouth. Burning heat in stomach with acute pain in epigastrium. Heartburn. Vomiting and purging with cramps, severe pain and burning in stomach and extreme prostration.

Temperature - Coldness. Shivering violently, slight quivering of lips. Skin and limbs cold and clammy. Hands covered with cold, clammy sweat, but to herself they felt hot and she tried to get hold of anything to cool them. Profuse sweat. Fever followed by profuse sweat. Constant heat, preventing sleep. Burning heat of limbs.

Throat - Inflammation, threatening suffocation. Tenderness in throat. Burning and constriction in fauces. Esophagus is so contracted he fears choking.

Vertigo - Dizziness.

COMMENTS - Severe gastric and dysenteric symptoms. Dysentery, Farrington said it is chiefly in sub-acute cases that it is indicated, when the pains are confined to the sides of the abdomen, probably to the colon. Abdomen contracted.

Burning, acute pain in head. Immediately sensation as if a strong electric shock passed through head, he expected his brains would have burst through his skull. Titillation all over with an irresistible desire to laugh. Sensation as if the blood could scarcely struggle through the veins. A "milk-like pallor of the surface looks like a characteristic."

REFERENCES - Clarke.

***ZINCUM VALERIANICUM

(Zinc Valerinate)

PHARMACY - zinc-val. Zincum valerianicum. Zinc valerinate. Zinc Isovalerate. Trituration. **Historical dose:** All potencies.

CLINICAL - Angina pectoris. Asthma. Brain, fatigue. Colitis. Deltoids, pain. Diarrhea. Dysmenorrhea.

Emaciation. Epilepsy. **Facial, neuralgia. Headaches.** Hemorrhoids. **Hiccoughs.** Hypochondriasis. Hystero-epilepsy. **Insomnia. Neuralgias. Ovarian, disorders.**

Priapism. Sciatica. Seminal, emissions. Stiff-neck.

HOMEOPATHIC - Zinc-val. is a favorite anti-hysteric medicine in old-school practice. One proving, done with substantial doses by C. B. Finney, brought out a strong action on the genital sphere, the usual starting-point of hysteria.

Finney noted the brain-fatigue symptoms of Zinc, and the gastro-intestinal disturbance. The abdominal pains woke him from sleep and he had to rise at 6:30 a.m. for stool, which was partly fecal and partly fluid. Later he was constipated and had tenesmus.

Zinc-val. affects the nerves, ovaries and spine. A remedy for **neuralgias**, hysteria, angina pectoris and other painful affections, notably in **ovarian disorders. Facial neuralgia**, violent in left temple and inferior maxillary. Painful nervous effects. Oversensitive, nervous and sleepless. **Uncontrollable sleeplessness** from pain in head with melancholy. Sleeplessness in children. Hysteria. Fidgety feet. Hypochondriasis, groundless fear. Hysterical heart-pain. Epilepsy without an aura. Obstinate **hiccoughs**.

Finney had distinct heart pains and Hale mentioned angina pectoris as having been cured by Zinc-val. Other conditions named by him are prosopalgia, spinal neuralgia, sciatica, ovarian neuralgia, cerebrospinal meningitis and tubercular meningitis.

MIND - Dullness of mind and headache with erections. Great fullness of head with difficult thinking. Distressed mentally, mind all mixed up. Excitable. Groundless fear.

Abdomen - Mucus colitis. Crampy pains from flatulence in hypogastrium.

Back - Aching up.

Eyes - Tickling over left ear.

Face - Prosopalgia.

Female - Dysmenorrhea, pains down the thighs. **Ovarian pain that shoots down limbs**, even to foot during and after menses.

Head - Violent, neuralgic **intermittent headaches**. Becomes almost insane with pain, which is piercing and stabbing.

Limbs - Severe pain in neck and spine. Cannot sit still, must keep legs in constant motion. Sciatic neuralgia.

Modalities - Better from rubbing.

Mouth - Sour taste in morning. Smothers on attempting to eat.

Temperature - Chills after mental excitement or exertion. Cold parts burn as they warm up.

COMMENTS - Hansen gave "epilepsy without aura." Finney had "Sensation as if a very heavy weight on chest," and dull headache and stiffness of muscles of neck.

Hale quoted C. Dradwick as saying that a considerable number of patients who had hemorrhoids, who were taking Zinc-val. for other troubles, had their hemorrhoids relieved by the remedy.

REFERENCES - Boericke. Clarke.

***ZINGIBER OFFICINALE

(Ginger Root)

PHARMACY - zing. Zingiber officinale. Ginger root. N. O. Zingiberaceae. Tincture of dried root.

Historical dose: Tincture and all potencies.

CLINICAL - Albuminuria. Asthma. Backaches. Breath, offensive. Colic. Constipation. Deltoid, rheumatism.

Diarrhea. Dropsy. Dyspepsia. **Dysentery.** Flatulence. **Food, poisoning.** Heartburn. **Hepatitis. Indigestion.** Menstrual, cramps. Motion sickness. Morning, sickness. Nausea. Nervous. Ozaena. Post-nasal catarrh. Seminal, emissions. Spleen, pains. Urine, suppressed. Vomiting. **Water, poisoning.** Worms.

HERBAL - Ginger tea is a folk remedy for diarrhea from **food poisoning**. The herbal tincture (10 to 15 drops in 2 oz. water three times a day) is a preventive remedy for **traveler's diarrhea** and food poisoning. Hot ginger tea has also been used for acute colds and respiratory infections.

HOMEOPATHIC - Zing, strongly affects the digestive, genito-urinary and respiratory systems. Like most spices, ginger has a specific action on the liver and digestive organs.

Zing, was proved by Franz and others and their symptoms make a full remedy pathogenesis. Particularly useful for states of debility in the digestive tract, sexual system and respiratory troubles.

Diarrhea or constipation and helps with irritation of the colon. Flatulence. Pressure in the stomach as from a stone. Worse from eating bread and especially from eating melons. Prolonged retention of urine or complete cessation of the function of the kidneys.

MIND - Forgetful, weak memory. Cheerful, good-humored, a pleasing sensation in her system. Increased activity of brain. Nervous and fidgety. Irritable and chilly in evening and during menses. Feet very

uncomfortable and did not know what to do.

Abdomen - Colic, diarrhea, extremely loose bowels. Chronic intestinal catarrh.

Back - Stiffness of back of neck with headache and nausea. Back lame. Backache as from weakness, feels stiff.

Chest - Stitches in chest, pleuritic pains.

Causations - Food poisoning. **Bad food or water.** Complaints from eating melons. Worms, parasites.

Eyes - Smarting and burning in eyes. Feeling as of sand in eyes. Sensitive to light with stinging pain in them. Pressure on eyes, worse on left. Weakness of sight, dimness of cornea.

Face - Hot, red face. Exhausted look, blue under eyes, before menses. Dry lips and mouth.

Female - Painful menses, cramps. Menstruation too early and too profuse, blood dark, clotted. Irritable with menses.

Food - Much thirst, dry mouth. Taste of food remains long, especially of bread and toast. **Food or water poisoning.** Complaints from eating melons.

Head - Headache and pressure in stomach after eating bread. Feels confused and empty in his head. Head feels too large. Frontal headaches. Pain over eyebrows. Pain encircling head. Hemicrania, sudden glimmering before eyes. Congestion of *blood in head, especially temples. Itching* on scalp, head and cheeks.

Heart - Violent stinging, pressing pain in left side of chest in region of heart.

Kidneys - Dull aching in both kidneys with frequent desire to urinate. Increased secretion of urine. Stinging, burning in orifice. Urine thick, turbid, dark brown of strong smell. Yellow discharge from urethra. After urinating, continues to ooze in drops. Retention of urine after typhus. Complete suppression after typhoid.

Limbs - Joints feel weak, stiff, lame. Dull, heavy feeling in limbs with numbness. Cramps in soles and palms. Rheumatic drawing pains. Painful swelling of feet. Soreness of heels after standing a long time.

Liver-Hepatitis(Chin.,Phos.). Liver pains, with weakness. **Weak digestion.**

Lungs - Painful respiration. **Asthma** without anxiety, worse toward morning. Humid asthma. Scratching sensation in throat, stitches in chest. Cough dry and hacking, with copious morning sputa.

Male - Itching of prepuce. Sexual desire excited, painful erections. Emissions.

Modalities - Better sitting, standing. Better uncovering. Worse by touch, motion. Worse evening and night, lying, rising. Worse in cold air, damp air. Worse from bread, melons. Laughing or talking aggravates headache.

Mouth - Slimy, bad taste in mouth in morning. Mouth smells foul to herself, as from disordered stomach. Painful sensibility of teeth with pressive, drawing pain in their roots.

Nose - Feels obstructed and dry. Insupportable itching, tingling in nostrils. Intolerable itching, red pimples. Coryza, watery, sneezing, more in open air. Dryness and obstruction in posterior sinuses with discharge of thick mucus. Ozaena.

Rectum - **Diarrhea from drinking bad water.** Diarrhea with much flatulence, cutting pain and relaxation of the anal sphincter (Aloe.). Constipation. Hot, sore, painful anus during pregnancy. Hemorrhoids hot, painful and sore (Aloe.).

Sensations - As if head too large. Confused and empty in head. As if there were an obstacle in throat to swallow over. Pain as from over-work in left deltoid. As of a stone in stomach. Empty feeling in stomach. A shock-like moving downward as from a dropping fluid in left loin. Pain as from weakness in sacral region. As from over-strung muscles in bend of knee. As if going to faint.

Sleep - Sleepy and exhausted, coma. Sleepless, wakes at 3 a.m., falls asleep again late in morning.

Stomach - Weak digestion. **Acidity of** stomach (Calc., Rob.). Stomach feels heavy like from a stone (Nux-v.). Heaviness in stomach on waking with gas and rumbling, great thirst and emptiness. Pain from pit to under sternum, worse after eating. Belching and diarrhea. Nausea, vomiting of mucus in alcoholics.

Temperature - Chilliness beginning in lower limbs, going upwards. Chilliness and sensibility in open air. Chilly in evening. Hot and chilly at same time.

Throat - Hoarseness. **Smarting below larynx**, breathing difficult. Dryness of throat and difficulty of swallowing, as from an obstruction with dryness of posterior sinuses. Increased mucus secretion, no fever.

Vertigo - Vertigo, limbs heavy. Motion sickness with nausea.

COMMENTS - Motion sickness and morning sickness. Deltoid rheumatism, frozen shoulders (Sang., Ferr.). Farrington said ginger may aggravate kidney affections or Bright's disease.

In asthma, Farrington gave the indication: "Asthma of gastric origin, attacks come in the night towards morning. Patient must sit up to breathe, but despite the severity of the paroxysm, there is no anxiety. The nasal mucus membrane is affected as markedly as that of the lungs. Ozaena and post-nasal catarrh."

RELATIONS - **Antidoted by:** Nux-v. **Compare:** (1) Ars., Calad., Chin. (2) Abies-n. Weight in stomach. (3) Prepuce cold - Sulph. (4) Wakes at 3 a.m., Nux-v.

REFERENCES - Boericke. Clarke. Murphy-

*****ZIZIA AUREA**

(Meadow Parsnip)

PHARMACY - ziz. Zizia aurea. Meadow parsnip. Thaspium aureum. Carum aureum. N. O. Umbelliferae. Tincture of root. **Historical dose:** Tincture and all potencies.

CLINICAL - Asthma. Brain, disorders. Catarrh. Chorea. Convulsions. Depression. Dropsy. Epilepsy. Headaches. Hypochondriasis. Hysteria. Influenza. Leucorrhea. Menses, suppression. Migraine. Ovarian, neuralgia. Pleurisy. Styes.

HOMEOPATHIC - The meadow parsnip is a common plant indigenous to the United States on the moist banks of streams and in open wet woods, where it flowers in June and July. Millspaugh noted that Rafinesque spoke of it as vulnerary, anti-syphilitic and sudorific.

Marcy proved Ziz. on himself and some others, and symptoms of poisoning have been added. Marcy considered Ziz. especially suitable in brain affections, catarrhal, asthmatic and pleuritic diseases, and in ovarian neuralgia.

Exhilaration with increased physical strength, but a slight amount of exercise caused fatigue. The spasms and convulsions of the Umbelliferae were elicited. The generative organs in both sexes were excited.

Ziz. has spasmodic movements of the muscles of face and limbs. Chorea, twitching during sleep. Convulsions, epilepsy. Spasms of face and limbs. Spasms, swooning convulsions and fainting fits, ending in death in three hours. Surface of body sensitive to touch.

Whole body white and puffy. Edema of face and ankles. Aspect of grave and chronic illness. Hypochondriasis, desire to commit suicide. Increased strength with inclination for exertion.

MIND - Exhilaration like intoxication, followed by strong desire to sleep. Laughing and weeping alternately. Depression followed by exhilaration. Nervous irritability and a state of depression. Paroxysms of self-dissatisfaction with weeping. Low-spirited indifferent. Indolence with contentment.

Behavior quiet with much apparent suffering and sadness.

Back - Pain in posterior margin of scapula. Aching, smarting, stinging with aching in small of back when at their worst. Smarting burning in small of back. Dull pains in loins, worse by movement.

Chest - Severe pains in pleurae. Pleuritic stitches worse by coughing or deep breath. Bruised feeling in muscles of chest. Pressure causes pain in intercostal muscles. Pain and tenderness on and around xiphoid cartilage. Dull, aching pain under right scapula. Severe shooting from front of thorax to scapula. Sharp pains from sides and chest to both scapula. Severe stitching pains accompanied by feverish symptoms.

Eyes - Redness of both eyes. Pain affects right eye most. Shooting pains through orbits. Sharp pain through right orbit, worse moving eyeballs, stooping or stepping. Eyelids agglutinated on rising by yellowish mucopurulent secretion. Styes, right lid. Styes middle of upper lid, very painful. Sensitive to light (Nat-m.).

Face - Pale and puffy. One cheek red, other pale. Boring pains in cheekbones. Dull pains in jaws. Painful tenderness in lower jawbone, an inch below root of ear.

Female - Increased vascular and nervous excitement. Sudden suppression of menses. Menses appeared in due time but ceased after twelve hours. Profuse menses one day, followed by acrid leucorrhea. Leucorrhea acrid at first, later copious and bland.

Food - Appetite is diminished or lost. Thirst. Craving for acids and stimulants.

Head - Rush of blood to head and face with feeling of fullness (Bell.). Sensation of tightness around head. Intensely painful, sharp headache over right eye (Sang.). Fully developed headache on seventh day, must lie still in dark room, worse evening. Headache associated with backache, worse by coughing. Severe pain in right temple with nausea. Pressure on top of brain. Dull pain in occipital region, extending down neck muscles.

Limbs - Lameness in muscles of both arms from shoulder to elbow. Pricking sensation in right arm with steadily diminished sensibility of the part. Dragging sensation in both hips. Unusually tired feeling in legs after slightest exertion.

Lungs - Trachea sensitive to touch. Roughness in upperpart of larynx when inspiring or coughing. Larynx raw from coughing. Dry cough with shooting pains in chest. Tight cough from deep breath from dryness of larynx. Short, dry cough with severe stitching in right side and sense of suffocation. Breathing oppressed, cannot keep lying down. Asthma.

Male - Excitement. Involuntary emissions at night. Lassitude and prostration after se.

Modalities - Pains fixed, worse by movement. Worse noise, light, evening. Worse contact, touch, motion. Worse lying, stooping, coughing. Pressure causes pain in intercostal muscles. Pressure on stomach causes nausea and faintness.

Mouth - Bitter, bilious taste. Dry mouth. Tongue red and unusually sensitive to cold and warm drinks. Tongue covered with whitish fur, yellow fur. Tongue is broad, furred in middle, red at tip and sides. Oppressed

respiration.

Nose - Nasal catarrh with sneezing and coughing from first inhalation. Nasal discharge of thick mucus. Right nostril congested, sore with injection of pharynx and conjunctiva.

Skin - Itching pimples on forehead, wrists and legs.

Sleep - Drowsiness with sense of fatigue. Sleep prevented by pains. During sleep spasmodic twitches, talking, unpleasant dreams.

Stomach - Stomach sensitive to touch, pressure causes nausea and faintness. Nausea. Acid, bilious vomiting, immoderately.

Temperature - Chilliness and heat alternating with faintness, nausea, pain in right temple, redness of eyeballs, dry and red tongue and thirst for cold water. Chilliness accompanied by spasmodic twitchings of muscles of face and upper limbs, followed by fever. Fever with headache, pain in back, thirst. Fever with stitching pain in chest. Some sense of heat and fullness in

both cheeks. Redness and heat of cheeks. Hot flushes in face and head followed by perspiration.

Throat - Mucus increased. Slight redness of tonsils and palate with soreness. Inflamed pharynx.

Vertigo - Giddiness, swimming, lightheadedness.

COMMENTS - Ziz. is indicated in uterine disorders characterized by increased nervous and vascular excitement. The menses are profuse and followed by acrid leucorrhea. Uterine congestion with migraine, particularly affecting the region of the right eye.

Rush of blood to the head. Flushed cheeks, hot head. One cheek red. Visible pulsations of carotid and temporal arteries (Bell.). Coldness of hands and feet, drowsiness and irritability. Surface of body paler than natural, white, puffy appearance of whole body. Laughs and weeps alternately. Craves acids and stimulants.

Burning, smarting backache. Spasmodic movements of face and limbs. Mind first exhilarated, then depressed, finally indifferent. Restlessness, running into chorea, the movements continue or are even worse during sleep.

RELATIONS -Antidotedby: Puls. - migraine, Carb-an., Staph. - styas. **Compare:** (1) One cheek red, Cham. (2) Uterine congestion, backache indifference, Sep. (3) Chorea in sleep, Tarent. (4) As if in adream, Ambr., Anae., Calc., Cann-i., Con., Cupr., Med., Rheum., Valer., Verat. (5) Laughing alternately with weeping, Calc., Ign., Merc., Nux-m., Puls., Stram.
